#### THIS WORK

18, WITH THEIR PERMISSION, RESPECTFULLY DEDICATED

BY THEIR MUCH OBLIGED

AND MOST OBEDIENT HUMBLE SERVANT,

THE AUTHOR

#### PREFACE

The following work is intended to form a summary ond popular occount of Indio, and its various inhibitorits, adapted principally for the perusal of those who have never visited that quarter of the world, and whose lessure has not odmitted of their examining the numerous volumes through which the local descriptions ore dispersed. Formerly the unccasing changes omong the native powers, the vicissitodes of their politics, and the perpetual fluctuation of their boundaries, rendered the most occurate account that could be given, only suited to the porticular period in which it was written, but since the establishment of the British federal system in 1818, the tranquillity of Hindostan has been rarely disturbed by war, and its territorial mutation quite insignificant. The dominions of severol native chiefs continue still perplexed and intermingled, and the extent of their respective jurisdictions ill defined, but these obstacles ore not of sufficient weight to preclude on ottempt to class the whole alphabetically

With respect to India beyond the Ganges, the unexpected result of the late Burmest wor, begun about a small muddy island in the bay of Bengal, and concluded with the complete establishment of British predominance in that remote quarter, has been the ocquisition of much volumble information regarding the condition of its interior, lutherto a region of speculation and conjecture. In the Eastern Archipelago no change of any importance has taken place since the publication of the first

edition of this work in 1815, with exception of the interchange of some colonies with the Dutch in 1825, but owing to the temporary government of many islands by British functionaries much accurate knowledge, both geographical and statistical, has been since acquired.

To form a geographical basis, Mr. Arrowsmith's six sheet map of Hindostan, and his four sheet chart of the Eastern seas have been selected, but other valuable maps and charts subsequently executed have also been consulted. Within these limits the following countries are comprehended.

## WEST OF THE INDUS.

Cabul, Candahar, Baloochistan, Caffristan, and all Afghan-istan.

### IN HINDOSTAN PROPER.

The provinces of Bengal, Bahar, Allahabad, Oude, Agra, Delhi, Lahore, Cashmere, Ajmeer, Mooltan, Cutch, Gujerat, and Malwa,

# IN THE DECCAN.

The provinces of Gundwana, Orissa, the Northern Circars, Candeish, Berar, Beeder, Hyderabad, Aurungabad, and Bejapoor.

# INDIA SOUTH OF THE KRISHNA RIVER.

Canara, Malabar, Cochin, Travancore, the Balaghaut Ceded Districts, Mysore, Combatoor, Salem and the Barramahal, and the Carnatic.

# IN NORTHERN HINDOSTAN.

The country between the Sutuleje and Jumna, Gurwal or Serinagur, the sources of the Ganges, Kumaon, Painkhandi, Bhutant, the Nepaulese dominions, Sikkim, and also Bootan.

# NORTH OF THE HIMALAYA.

Tibet and Lahdack.

#### INDIA BEYOND THE GANOES

Avo und the Burmese Empire, Laos or the Shan country, Pegu, Arracan, the British provinces south of Rongoon, Siam, the peninsula of Malocca, Assam and the mijacent states, Cachar, Munipoor, Tunquin, Coclin China, Cambodia, Siampa, &c.

THE PASTERY ISLES.

Sumatra, Jovo and the Sunda chain, Borneo, Celebes, and Gilolo, the Moluccas, New Guinea and the Papuon Isles, Magindanao, the Phihppines, &c., and also the islend of Ceylon

In order to give distinctness and application to the facts collected, Hindostan has been portitioned in the large territorial divisions above enumerated, whose relative positions and extent will be best learned from an inspection of the prefixed map. In Hindostan Proper and the Decean, the old Mogal provinces of Abul I azel have been continued, as, notwithstanding the mony changes they hove experienced, they still maintoin their place in the public mind, and are sufficiently accurate for the purpose contemplated. With respect to the south of India, as it has been for olmost thirty years under the direct government of British functionaries, their local arrangements have been adhered to

In orranging the alphabetical distribution, the usual difficulty resulting from the great variety of appellations given to the same place by Hindoos, Mahomedans and Europeans, has been experienced, and not completely surmounted. To obviato it, as much as possible, the whole of Mr Arrowsmith'a names have been odopted, as being those mast universally known, and to facilitate the discovery of their places on the map. In mony of the most remarkable instances, the original denomination is also given according to Sir William Jones's orthographical system; but, although a name be not strictly applicable, it is desirable it should remain permanent, as a deviation even to more appropriate, causes much confusion. Indeed all over the East, owing to the fluctuating boundaries of the native states, the rule has been always to designate rather by the name of city, where the king or governor resided, than by any general name taken from the whole country which he governed. Another objection to an alphabetical description of a country, is that the details are unconnected, being dispersed and separated over different parts of the book, which is certainly against an arrangement in other respects remarkably convenient. To remedy this defect, in some degree, a provincial index has been added, exhibiting the names of the towns, &c. contained within the limits of the large territorial divisions and islands, to which reference may be made for further information regarding any particular portions of space.

The deities of the Hindoos have a still greater variety of names, or rather epithets (Vishnu for example has one thousand) than their towns: the most common have been preferred and adhered to throughout, and the same plan has been followed with regard to the designations of persons, tribes, and castes. In general, what appeared most interesting and important with a view to political application, or illustrative of the state of society, has been selected, and such usages described as have subsisted for the greatest length of time with the fewest variations or infringements. In composing the work, Oriental terms have been usually avoided, but from the nature of the subject could not be wholly dispensed with. A few of the most difficult will be found explained in the short glossary annexed, others in the fext within a parenthesis as they occur. The plan usually tollowed is that of Brooks', Crutwell's, and other Gazetteers,

which on account of the great number of different articles, and the consequent necessity for obbreviation, does not admit of minute detail, or the investigation of disputed facts. From this cause also the historical portion has in mony instances been obridged nearly to a chronological series of sovereigns and remarkable events.

The materials from which this work has been composed, consist of printed documents generally occessible to the public, and manuscript records deposited of the India Board, regarding which o few explanatory observations will be necessory The British government in India is one which records ond reports to England its most minute transactions, furnishing a basis for accurate history beyond those of any other state. In conformity with this principle, it is the practice of each presidency to transmit half-yearly, or occording to the exigence more frequent reports in the political, financial, and judicial, military, public, legal, and occlesiastical departments, accomponied with copies of the correspondence that has taken place with their subordinate functionaries These official records ore extremely voluminous, but their contents rarely bear directly on statistical subjects, the discussions having generally originated in some accidental irregularities, such as the robbery of treasure, disputed boundaries, the irruption of foreign tribes, defolcation of the revenue, the pupillage of nativo chiefs, and other matters of difficult odjustment, brought under the notice of the India Board and Court of Directors Where no event of the noture obove alluded to has taken place, and the tranquility of the province has continued undisturbed by war or controversy, no correspondence has resulted, and its internal condition has remained so completely unnoticed, that the circumstances of several of the Company's old districts of great

wealth and population are less generally known than those of remote tracts, the very names of which are recent discoveries.

At the conclusion of the second volume a list of these and other authorities will be found, comprehending a large proportion of the ablest of the Company's servants, civil, military, Besides " Public Manuscript Documents," and medical. access to which was procured him by the late Right Honourable Mr. Canning, while President of the Board of Control, the author has been favoured with two most important private communications, which have greatly enhanced the value of the present edition. The first consists of a series of extracts from the manuscript journal of John Fullatton, Esq. of Great Stanhope-street, Hyde Park, the only European who has ever made the complete tour of Hindostan, from the Brahmaputia to Bombay, from the Himalaya Mountains to the Straits of Ceylon. These travels occupied some portions of 1817 and 1818, the half of 1819, and the whole of 1820, were performed deliberately, and with such an establishment of horses, elephants, camels, and tents, as enabled him to encamp on any spot, and leave no worthy object of curiosity uninvestigated. It is to be regretted the original journal from which these extracts were made has never been published, and the estimation attached to them will be proved by the frequency of reference.

The other document, consisting of seven large folio manuscript volumes, was received from Sii John Malcolm, K.C.B., the indefatigable promoter of every measure that can either benefit or illustrate India. These contain separate descriptions of above 6,500 towns, villages, hamlets, rivers, and mountains in Central Hindostan and the Deccan; but the imperative necessity of condensation only permitted the selection of such

as were remarkable for their wise, local attirition, temples, pubhe works, or any other extraordinary feature

In specifying the extent of countries, the whole length, but only the average bre-ulth Is given, in enable the reader to avertrun the probable area in square indes without much trouble In an arrangement of this nature strict accuracy cannot be expected, but it appears less vague than the usual mode of stating the extreme length and extreme brealth; an approximation to the reality being all that is wanted. The same obserrition applies to the population of countries that have not yet been subjected to strict examination. When such occur. n comparison of their peculiar circumstances is instituted with those of the adjacent provinces, the population of which is better known, and an estimate computed from the result, where the number of inhabitants has been established on probable grounds, it is particularly mentioned. To facilitate the discovery of a place on the map, besides its latitude and longitude, its nearest distance from some distinguished city is inserted, and also the province within the limits of which it is comprehensed The east, west, north, and south sides of rivers, and the compass directions, in a great majority of cases, refer to their positions in Mr Arrowsmith's map, the length of the rivers, including windings, are calculated according to the rules land down in Major Rennell's Memoir When not otherwise specified, tho standard of distance and dimension is invariable the English mile, sixty nine and a half to the degree.

Many of the above particulars, however, will require future correction, as the very best maps intherto published, although right in the main outlines, are still deficient in accuracy as to the relative position of places. Nor will this defect be adequately rectified until the completion of the East-India Company's Atlas of India, constructed from trigonometrical survey,

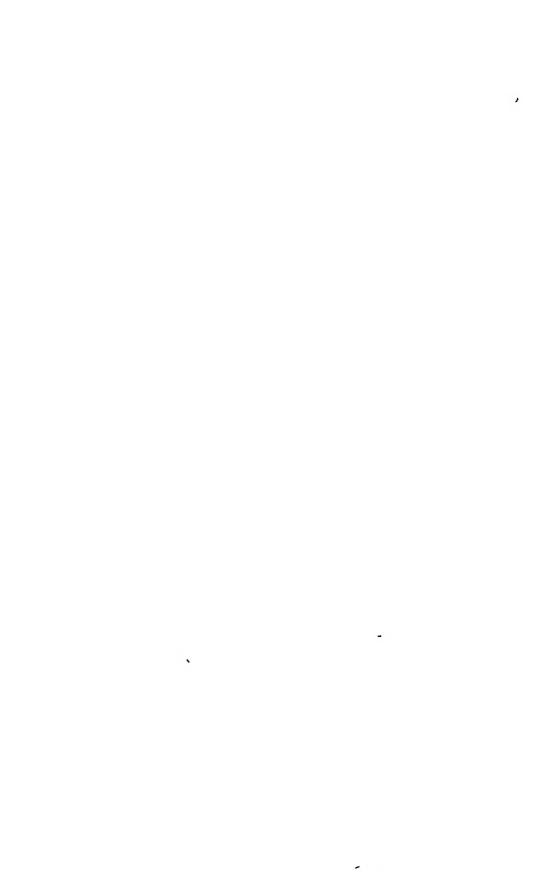

begun by Col. Mackenzie, in A.D. 1800, and still in progress under Col. Hodgson, the surveyor-general of India. It is founded on the triangulation which Col. Lambton extended over the south of India, in connexion with his operations for determining the measurement of an arch of the meridian, and continued since his death by Capt. Everest. This noble monument of the Company's liberality and regard for accurate science is executed on a scale of four English miles to the inch; and judging from the eleven sheets already published, will, when finished, cover above 1,200 square feet.

The prefixed map exhibits the large provinces into which Hindostan, for the convenience of reference, has been divided; but being constructed on so minute a scale, no delineation of the boundaries that distinguish the native and British districts could be attempted. With respect to the first, no native state has yet been brought to understand the advantages we are accustomed to see in a compact territory and well-defined frontier; and with regard to the latter, the limits of none can as yet be considered as finally adjusted. Owing to this uncertainty, a town may be assigned to one jurisdiction, which in reality belongs to another; but the mistake is of no essential importance, and many similar corrections must hereafter be required before the official limits acquire such precision as to preclude the necessity of future revision. In like manner, the local functionaries may hereafter see much to amend with regard to the comparative importance of the towns selected, some, perhaps, having now no existence, although of great historical notoriety, while others may appear too insignificant to deserve insertion where others of greater modern magnitude have been omitted.

To each description of any consequence the authorities upon which it is founded are carefully subjoined in succession, according to their relative importance, the anthor being particularly

ilesirous to give the credit where it is justly due, as well as to establish the high character of the sources from whence his original information has been drawn. But no person is to be considered wholly responsible for any article, the materials being so intimately blended with each other, and the result of the author's own experience thiring a ten years' residence in India, that it would be impossible to define the limits of the respective properties. In various cases the narrative is given as closely as the necessity of condensing many thousand pages into a small compass would permit, in others it has been necessary to compare contradictory and conflicting testimonies, and to select that which appeared to rest on the most solul foundation. Conciseness has been particularly nimed at, and the endeavour to effect it has added greatly to the labour, for it is easy to write a description of a country when the materials are scants, not so when the mass has been necumulating for half n century. In the official correspondence of the different presidencies the surveys and reports of one functionary are sometimes incorporated with those of another, so that occasionally the statement of one pubhe officer cannot be discriminated from those of another, but notwithstanding these difficulties it will be clearly percentible that the details of this work were generally collected under circumstances singularly favourable for the acquisition of accurate information, and by persons the best qualified, from length of service, residence on the spot, and established reputation, to form a correct judgment of their authenticity

#### ABORS

Anon.—One of the small Papuan siles, about three miles in circum ference attnated to the north of Wageco, and raing 200 feet above the level of the sea. It abounds with fish and turtle, oo which the linhabitants subsat as they do not cultivate the lood. Lat 0° 30' N, Jon 131° 18' E

Aportroon.—A town in the province of Beeder, many three miles N.E., from Bejapoor, lat 17°12'N, lon 76°41 E.

Ano (Abooghar or Arbada).—A town in the prounce of Ajmeer, attented near o chain of lofty monntains which in 1820 was a dependency of the Sarowy Rajas but generally possessed by some rebel loos relation. Lat 24° 36 N., lon 73° 22° E fifty-six miles W by 8 from Odeypoor

This height of Abos indicated by the barometer has been extunated of 5 000 feet; and during the ascent so tharty-sax hours travelling the thermometer declared from 108° on the platta of Morwar to 60° Fahrenhelt on the summit of Abos under on olmost vertical sun Indeed the temperature is so mild that some European fruits are indigenous On the Abos mountains ore many

Saiva and Jah inscriptions the most ancient temple having been dedicated to Siva as Achileswara, so early on the saventh centory Jahn temples of the clerenth century olso occur; but the most numerous and important are monuments belonging to the thirecenth century, erected to defied Jam saluts. From the thirteenth century, Jam and Sawa nuscriptions predominate alternotely until the present century. Those of the Sarowy fiamily are Sawa. The hill steel's saud to have been brought from the limalayo, by the sage Vanishta in order that he might continue his devotions on the apot he had been accustomed to.—(Tud, Jackson, 11 phinitiene, 4c)

Anone (or Aburs).- A rude tribe bordering on Assam situated above the junction of the Ddiong with tho main trunk of the Brahmoputra river The hills on the right bank of the myer belong to the Passal and Mosing Abors those on the left Padow Silloo Meboo ond Golemar In 1820 when visited by o British officer enmity but not actual war fare, subasted between the tribes on the opposite banks. Their weapons ore e how and polsoned errows a light spear, ond o heavy shorn aword the dhaw of the Singphos.

This tribe eat of every thing pure ond inpure except beef the cotter of which they obhor They drink a spirituous liquer of their own distillation salt cloth and tobacco are ingreat request. They exhibit faw traces of religion but ore said to secrifice onumals at the shrine of o delty somed Ap-hoom, possibly the

ACHEEN.

Om of the Lama Thetians Their dress is principally made from the bark of the uddal tree; they also wear ornamented cane caps, beads, blankets, and blanket cloaks The Abors appear to have been in the practice of levying contributions on the Assamese of the plains, and of earrying them into captivity. According to the latest information the Ahor country is situated to the north of the Bialimaputra about lat. 28°, and between 93° and 94° E.

Acherroon (Acharpura).—Atown in the Nabob of Oude's territories, thirty-six nules SE. from Fyzabad. Lat 26° 26' N., lon 82° 25' E.

Achrnoon (Acharpura) — A town in the Agra province, twenty-five miles W.S.W. from Campoor. Lat. 26°23' N., long. 79°52' E.

AcLSINES RIVER .- See CHINAUB.

### ACHEEN.

(Ach).—A petty state in the north-western extremity of the island of Sumatra, bordering on the country of the Battas, but not extending inland above fifty miles to the south-east On the western coast, where its influence was formerly predominant, it now possesses no further than Baroos, and even there, and at the intermediate posts, the power of the Acheenese chief is little more than nominal In 1820 Tamiang was the reputed boundary on the eastern and Sinkel on the western coast of Sumatia.

The air is comparatively healthy, the country being more free from jungle and stagnant water than most other parts of Sumatra. The degree of insalubrity, however, attending localities in this climate, is known to alter so frequently, from inscrutable causes, that a person who has resided two or three years on a spot cannot pretend to form a judgment.

The soil is light and fertile, and produces abundance of rice, excellent vegetables, much cotton, and the finest tropical finits. Cattle, and

other articles of provision, are plenty, and reasonable in price. In this province are found almost all the animals enumerated in the general description of Sumatra, and elephants (probably imported ones) are here found domesticated.

Although no longer the great mart of eastern commodities, Achieen still carries on a considerable trade, both with European merchants and the natives of the coast of that quarter of India called Telinga, but which by the Malays is called Kling, and applied to the whole coast of Coromandel. These supply it with salt, cotton piece goods, and receive in return, gold dust, raw silk of an inferior quality, betel-nut, patch leaf, pepper, sulphur, camphor, and benzoin. In the Acheenese territories there is a considerable manufacture of a thick species of cotton cloth, and of striped and checked stuffs. They also weave rich and handsome silk pieces; but this fabric has latterly declined, owing to the failure of the breed of silk-worms, and also to the decay of industry among the inhabitants, who were formerly bold and expert navigators. Payments are commonly made in gold dust, but there is also a small thin adulterated gold coin, rudely stamped with Arabic characters, called maas. erown revenues arise from export and import duties, which are generally levied on the goods in the first instance, and of course fluctuate considerably. Besides this source, the king, being the chief merchant, gains considerably by monopolies, managed by the shahbunder, or master attendant, under whose jurisdiction all commercial transactions are placed.

The government is hereditary, and more or less arbitrary, in proportion to the talents of the reigning prince, who usually maintains a guard of 100 sepoys from the Coromandel coast. At the king's feet sits a woman, to whom he makes known his pleasure; by her it is communicated to an eunuch who sits next to her, and by him to an officer named Kajurang Goodang, who proclaims it aloud to

the assembly Sulten Allsh in Deen wha regared in 1784, when Capt Forrest visited his court had tra velled, and lind been n considerable time in the Wourtuss, where he had been driven when proceeding an a pilgrimage to Mecca. Besides the Malay he spoke the French and Portuguese and understood the enting of cannon and bomb-shells. His stater was a Turk from Constantino-

The country is populous for a na tiva state, but the number of minh tants has never been satisfactarily oscertained. They are taller and ntonter than the generality of Suma trans but they cannot be considered or o genuina people being rather a mixture of Button and Malays with Chulms by wham in all nees their ports were frequented. In the city af Acheeo their conduct depends much on the example of the reigning monarch which is aften narrow ex torttonory and oppressive. The lan guana consists of o mixture of Malay ond Batla with oll the jargons used by the eastern Mohamedans whether Hindastany, Arab-Tamul, ar Moplay, to which last-mentioned people the Acheenese have a cansiderable resemblance; but in writing they use the Malay character In religion they ore strict Mahamedans, and tha severity of their punishments is hor rible but, natwithstanding so much apparent discouragement, both from law and prejudice, all travellers agree in representing the Acheeneso as one of the most dishonest and fisgithus nations of the east which character the lustory af their govern ment tends strongly to corrobarate

The Achecoese territories were visited by the Portuguese or 1809, when Drego Lapez Siqueira cast an char at Pedeer, a principal sea-part an this part of Sumatra. Even ot this early stage of their acquaintance hostilities between the two nations commenced and continued with little cessation until the Portuguese lost Malacca in 1641. In the course af these wars it is difficult to deter name which of the two 11 the more

mised to make her eldest son king of all the pepper countries. The French first visited Acheen under Commo-

dore Beaulieu, in 1621.

In the year 1640 the Dutch with twelve men of war, and the Sultan of Acheen with twenty-five gallies, appeared before Malacca, which they had for so many years harassed, and the following year it was wrested from the Portuguese, who had so long, and under such difficulties, maintained it. But, as if the opposition of the Portuguese power, which first occasioned the rise of Acheen, was also necessary to its continuance, the splendour and consequence of the kingdom from that period rapidly declined, and in proportion its history became obscute. Through the subsequent weakness of the government, and the encroachments of the Dutch, the extent of its ancient dominion was much contracted,

The year 1641 was marked by the death of Sultan Peducka Sırı, one of the most powerful and cruel sovereigns, who, leaving no male heirs, was peaceably succeeded by his queen, which commences a new era in the history of the state, as the succession continued intil 1700 in the female line; the Acheenese being accustomed and reconciled to this species of government, which they found more lement than that of their The last queen died in 1700, when a priest found means, by his intrigues, to acquire the uneasy sovereignty, which, during the whole of the eighteenth century, continued a hot-bed of intrigue, treachery, and sanguinary revolutions

In 1813 this principality was in a complete state of anarchy and dissolution, every port and village having been occupied by petty usurpers, who subsisted by piracy and smuggling In 1814, Capt Canning was sent from Bengal to investigate and adjust the existing differences, but was treated by Jowaher Allum (who died in 1823), the reigning sovereign, with the greatest contempt Soon afterwards this monaich (whose ancestor was, by Queen Elizabeth, designated

a great and puissant prince) was compelled to abdicate the throne in favour of Syful Alum, the son of a shop-keeper at Prince of Wales' Is-In this condition matters remained until 1819, when the usurper was ordered to return to Prince of Walcs' Island, and the deposed chief restoled. In 1820 Mr. Sartolius was deputed to Acheen, which he found in the most wretched condition; the king's authority being reduced to a mere nullity, and having only nominal possession of one small spot within the limits of his reputed do-A commercial treaty had been concluded and ratified, but in the distracted state of Acheen not the slightest good was likely to result, unless supported by military protection to the king, and a direct, active, and continued interference,-(Marsden, Leyden, Forrest, Elmore, Gov. Phillips, Capt. Canning, Sartorius, &c.)

ACHEEN —A town situated at the north-western extremity of Sumatra, the capital of a principality of the same name, lat. 5° 35′ N., lon. 95° 45′ E.

This place stands on a river about a league from the sea, near the N W. point of the island, where the shipping lies in a road, rendered secure by the shelter of several islands. It is described as populous, containing about 8,000 houses, built of bamboos and rough timber, and raised on piles. The sultan's palace is a rude piece of architecture, calculated to resist the attacks of external enemies, and for that purpose surrounded with a moat and strong Near the gate are several pieces of ordnance of an extraordinary size, of which some are Poituguese, but two in particular of English origin: they were sent by King James the First to the reigning monarch of Acheen, and have still the founder's name and the date legible. The diameter of the bore of one is eighteen inches, and the other twenty-Their strength, however, does not at all correspond with their calibre, nor do they seem in other

respects of adequate dimensions. James, who abhorred bloodshed blut self was resolved that his present should not be the instrument of it in others.

The commerce of Acheen is now incoosiderable, and the king (when he has the power) the only merchant, as is usual in this quarter of the world. The child exports are brim mone, betel-aut, rations benzoin, camphor, gold dust, pepper and larges; the imports optum salt pace goods, muslim &c.—(Vlarider, Forrett, Ethore, fc.)

Analls Plan (named by the nature Somandla).—A lofty mountain in the Interior of Ceylon, situated about fifty miles L S E from Columbo and by harometrical observation about 6 152 feet high Lat 6° 47 N lon 80° 32° E

In ascending the road follows the windings of the Caltura river which nt the distance of two miles from Batugedera receives the Magelli, two chains in breadth at the can fluence One portion of the ascent Is over an enormous rock into which four flights consisting of 127 steps, have been cut The apex of the mountain is a distinct rock which stands in the middle of an enclosure about seven feet above the level ground On its top is the impression of the foot of Buddha stamped by that incarnation when he first visited Ceylon To mortal eyes it appears a superficial bollow five feet three and three-quarter inches long, by two feet five inches wide having n margin of brass studded with n few gems of httle value There is nothing olse on the summit worthy notice but the view from thence is sin gularly magnificent. On the one sido n vast extent of wooded hills like an ocean of forest is seen while on the other only the tops of the hills are perceptible rising over the fogs like n number of small islands covered with trees

On the 18th April 1817 at six in the evening tha thermometer stood at 52°, and the barometer (a short one) at 27° 70′; next day ot seven in the morning the first attood at 55°, and the last at 23° 75°. About mid night the thermometer stood at 51°, and never fell lower, the nr being agitated by a gentle what from the Nah. I he name of Adam n Peak was probably first applied by the Mahommedant, who assert that Adam here ismented his expulsion from Paradise standing on one foot until he was paraloned.—(J. Davy §c.)

ADANAO (Admatha).—A town in the province of Malabar, division of Shirnada, celebrated as the throne of the Aivangheri Tamburacul, or cinef of the Namburaca, who are the Brain mins of Malabar

These Namburies will neither est nor drick with the Brahmins of other countries but like other Brahmios they marry and live with their wives, of whom they take as many as they are able to support A Namburie n children are slwoys considered as his herrs but in order to prevent their losing dignity by becoming too no mcrous the younger sons of a Nami burse family seldom marry live with their cldest brothers and assist the wives of the Rajas and other Nalrs of distinction to keep up their families Many Namburies have lost easte by committing mur der or by having eaten forbidden things and in such cases their chil dren generally become Mahomedans

In the division of Shirmada, the low hills occupy a very large proportion of the surface the soil in most of them consists of o kind of indurated elay, whi hon exposure to the mar hecomes as hard as a brick. The continuance of the rain however in this neighbourhood is sufficient to ensure plenty of water for any crop that does not require morn than four months to come to maturity.

Absystion (the impregnable fortrest)—A town in the province of Alidabada situated in nearly equal distances from Calinjer and Pannal, iat. 24° 50° N, Ion 80° 3 E Thefor tress consists of a wall of iooso stones, raised round the edge of a very high aeng.

and steep hill The table land within the fort is a mile in length, by 700 or 800 yards average breadth, and is inaccessible, except by the paths made to the different gates; which are defended by walls and gates, one behind the other, and all of difficult ascent Within the fort are three reservoirs of water cut in the solid rock, and the ruins of three Hindoo temples

In 1809 at was besieged by a British detachment, and after a stout resistance, in which considerable loss was experienced by the assailants, was evacuated by the garrison When the family of Lutchman Dowab, the reiractory zemindar of Adjyghur, was ordered to be removed, an old man, his father-in-law, was sent into the women's apartments to prepare the females for their removal, he not returning after some time had elapsed, the house was entered by the roof, when it was found he had cut the throats of all the women and children, eight in number, and afterwards his own. The deed must have been perpetrated entirely with the consent and assistance of the females, 'as the persons stationed at the door never heard the slightest cries while the catastrophe was performing.—(11 Reg &c)

ADONI (Adavant).—A district in the Balaghaut ceded territories, bounded on the north by the Toombudia, and intersected by the Hoggry or Vadavati river. The chief towns are Adoni, Chagee, and Gooroor. In 1800, this district, along with the tract of country situated to the south of the Toombudra and Krishna rivers, was ceded to the British government by the Nizam, and on subsequent allangements taking place was attached to the Bellary collectorship

Address:—The capital of the above division, situated in lat 15° 35' N, lon 77° 45' E, thirty-eight miles N by E. from Bellary This town was taken in 1568 by Ah Adil Shah of Bejapoor, at which period it stood on the top of a high hill, and con-

tained within its walls many tanks and fountains of pure water, with numerous princely structures. Rajas of Bijanagur, to whom it previously belonged, considered it impregnable, and an asylum for their families in desperate emergencies: but they lost it, with their empire, after the great battle fought with the Decemy Mahommedans in 1564 For a short interval during the eighteenth century it was the capital of a small independent Patan principality, and subsequently become the jaglure and residence of Bazalet Jung, brother to In 1787 it was the late Nizam Ali besieged, taken, and destroyed by Tippoo, and in 1800, along with the district, was ceded to Britain by the Nizam. It is now a town of very little importance, and contains but a scanty population.

Travelling distance from Seringapatam 243 miles, from Madras 310; from Hyderabad 175, and from Calcutta 1,030 miles.—(Fernhta, 12th Register, 5th Report, Rennel, &c.)

ADRIAMPATAM —A small town on the sca-coast of Tanjore, twenty-seven miles S. by E from the city of Tanjore. Lat. 10° 19′ N, lon. 79° 26′ E.

Arng —A British post in the province of Arracan, situated on the route from Shembcwgewn, on the Irawady, to Amherst harbour in Arracan; lat 19° 55' N., lon. 93° 45' E, sixty-six miles S.E. from Arracan town. The Aeng road was completed by the late Burmese sovereign Minderajce Praw, and does much credit to his energy, and to the skill of his engineers It was begun in 1816, and finished gradually. This communication, however, is closed by the monsoon between May and January. In April 1826, when passed through by a battalion of sepoys returned from Ava, Aeng and its vicimty contained few inhabitants, but had previously been the emporium of the mland traffic between the two countries. The tide flows past it, but in April there is not sufficient

water for horis in within six miles of the wharf. A limit his ree from hence might reach the Irawa ly in ten days and the capital of Aro in a month, but the road is not practica ble for heavy artiflers—(Tran, 5c)

#### AFGIIANISTAN

(Afghanist han )-This extensive country is bounded on the north by the Hindog Cosh monotoins and the Paropamisan range: the Indus is its boundary, or far south as lat 320 20" The plan on the right bank of the Indus is inhainted by Balooches; but the chain of the Solman mountales. with its subordinate ranges and the country immediately of their base belong to the Afrians. The lills which bound Sewistan on the north form the southern limit of the Afghad territory Immediately to the north of there hills the Afghan country does not extend so far west as to reach the table-land of helat lut after wards stretches past it on the north, and reaches to the desert which is the north western boundars

These countries are extremely variable in their level, soil, climate and productions. The whole of Africa nistan west of the Soliman ridge la o table-land, lying higher than most of theneighbouring provinces The Hin-tion Cash chain which forms the northern boundary of Afahanistan. looks down on Bulk on the cast it ls lo proportion elevated above the still lower plain of the Indus. On the south it overlooks Sewistan 2 the deep valley of Bolsun on the S W., runs between it and Baloochus-On the west it slopes gradually to the desert, and on the north west the appearance of elevation is lost or It approaches the Paropamisao moun tains The Afghans have no general name for the rountry they inhabit but that of Afghamstan which was probably first applied by the Persians Is frequently used in books and is not unknown to the oatives of the coun try thus designated. The section of the country to the west of the paral

lel of Makloor ton Co 30' P, is comprehended in the extensive protince of khorasan

For so great a surface of country, Afdianistan possesses but few large evers a Indeed except the Indus, there is no river in this region that is not fordal le throughout its course during the greater part of theyeur, the others more resembling large torrents, which occasionally rush down with a heavy flood and afterwards leave their hollow bed empty Their volume la slso much reduced by the number of small rimnels cut for the purposes of irrection by which a large stream Is sometimes entirely drawn off before it rearlies any other river and It may be remarked of the rivers of this region, that their bulk at their months is occur equal to the expect tations they rause when seen emerg ing from the mountains. The indus alone is always navigable, although so little use is made of its channel Cabul river, the Cashgar the According and the Comul. flow towards the cast ; those running to the west are the Helmund or I tymandu the Urghu haul the Khooshrood the Furrali There la only rood and the Lora one small lake, situated to the 5 W of GhiznL

In Afghanistan the south west monsoon is felt with murh less violence than in India being exhausted st no great distance from the sea and not at oll perceptible at Candahar A remarkable exception how ever, to this rule is observed in the north-eastern quarter of Afghanistan, whileh although much more remote from the sea than Candahar is subert to the monsoon, which it receives from the east The countries under the Ilindoo Cosh such as Purkely, Beneer and Sewad bare all o share of the monsoon rains, which diminish os they go west and at Sewad are reduced to a month of clouds, with orcasional showers, obout the conclusion of July and beginning of Au During this short period the monsoon appears in some clouds and showers of Peshawer and in the Bun gish and khuttak countries It is still

less felt in the valley of the Cabul river, where it does not extend beyond Lugman; but in Bajour and Punjcora, under the southern projection of the Hindoo Cosh, in part of the Caffristan, situated on the top of that promontory, and in Teera, near the Tuhkte Soliman, the south-west monsoon is heavy, and forms the

principal rains of the year. The climate of Afghanistan varies extremely in different parts of the country, partly owing to the difference of latitude, but much more to the greater or less elevation of the various provinces The direction of the winds also is of material influence: some blow over ridges of snowy mountains, others are heated in summer and rendered cold in winter by their passage over deserts; some districts are refreshed in summer by breezes from moister countries, while others are so enclosed by hills as to be maccessible to any wind. extremes of heat and cold are also experienced, for while in the sultry valley of Peshawer the thermometer rises to 113° Fahrenheit, the lofty neaks of the Hindoo Cosh within sight remain covered with nevermelting snow. The prevailing wind through Afghanistan is from the west; and it is remarked by the natives, that westerly winds are cold, while easterly are hot The general character of the climate is decidedly dry, being little subject to rain. clouds, or fogs. The annual heat, on an average, is greater than that of England, but less than that of India. while the difference of temperature between winter and summer, and even between day and night, is greater than in either of these countries. If an inference may be drawn from the size, strength, and activity of the inhabitants, the territory may be pronounced favourable to the human constitution, and many districts are remarkable for their salubrity.

To the traveller the Afghan country presents wild unfrequented deserts, and mountains covered with perennial snow. Even among the cultivated districts he will discover a

wild assemblage of hills and waster without enclosures, unembellished by trees, and destitute of navigable canals, public roads, and all the cluborate productions of human civilization, while the towns will be found few and remote from each other. On the other hand, he would be struck with the population and fertility of certain plains and vallies, where he would discover the productions of Europe mingled with those of the Torrid Zone, and the land improved with the utmost industry. In other parts the inhabitants would be found following their flocks, dwelling in tents, or stationary in villages, composed of mud-built walls with terraced roofs

In Afghanistan there are five classes of cultivators, viz. first, proprictors who cultivate their own lands; second, tenants who hire it for a money rent, or for a fixed proportion of the produce; third, buzgurs, who are the same as the mctayers in France; fourth, hired labourers, fifth, vassals, who till their lord's lands without wages. The land, on the whole, is more equally divided than in most countries, Afghanistan containing a great number of landed proprietors. The common lease is one and two years, the best five; the value of land is estimated at about twelve years' purchase. In most parts of this territory there are two harvests in the year, one of which is sown the end of autumn and reaped in summer; the other is sown the end of spring and reaped in autumn. Wheat is the food of the people in the greatest proportion of the country, the barley raised being commonly given to horses; rice is also generally found, but is most abundant in Sewad, best at Peshawer, and is almost the only food of the inhabitants of Cashmere Garden vegetables of all sorts are plentiful and excellent, but most of the sugar is brought from Hindostan; cotton, with a few exceptions, is confined to the hot districts, little, however, is manufactured, a great proportion of the cotton cloth used being imported from India The paima chif il er castor-oil plant, is common, and supplies a great part of the oil used; madder shounds in the col I climate of the west where also the assortida plant is I mad widd was quantities of this last-mentioned drug are exported in India where it forms a favourie lagredient in the cookery of Josh Illindos and Vishomedians. To lace o is produced in most parts of Afranustan.

The grain is converted into flour by wlodmile watermile, or handmile the first being the most com mon in the west, where a steady wind can be relied on for at least four runths of the year There are many rains of old windmills as far east as Cabul and Ghizni, the sails of which appear to have been enclosed within the building the wind having access by an opening the wheel of the watermili is horseontal lineace are empleyed to draw the plough in Tur Listen and the Elmank country but no where else in Afglianlitan i nor are they employed for this purpose either in Hindortan or Persia, that task in all the three being usually anigued to nuch and inflators though in particular parts of the first camels and asset are also used. A considerable number of horses are reared in the Alchan dominions: these from Herst are recknowl per ticularly good, some of them having the figure of an Arab, with superior alze. A good breed of the Indian sort, named tazi is found in Buneco and Damann, and excellent horses of the same description are bred between the Hydrepes and Indus; but excepting those from the province of Bolk which are excellent the harses from the Afahan territories have not n very good character

Camels are the animals must employed for carrange; the dromedary is found in all the plann country, capecually in the dry and sandy parts, and is the tall, long-degged animal common in Iedua. The Bactrian camel is mune rare, and is a third lawer than the nitier but very stout; he is covered with black shagey hair, and

has two distinct humps instead of one bunch bkn the dromedary The best oven are imported from the fisjpoot country. The grand stock of the pastoral tribes is sheep, of the species having tails a foot broad at most entirely composed of fat. rious break of grats, some with long twisted horns, are common among the mountains The dogs of Afghaplaten are excellent particularly the greyhounds an I pointers; the cars are of the lon daired sort, known in Lurope by the name of I craise cats There are three sorts of eagles, and many kinds of hawks traced to the chase the chick species are traleed tn strike the antelope and fasten on lu brad until the greyhounds comn up. Amon, the other birds, beron cranes, storks wild ducks, geese, partridges, pigeons, crows, and spar rows, are common; curkous rare and magnes nuncrons while pencocks are unknown The snakes and scorplane of this country are large; there are no alligators; fish are scarce and turtles and tortoises plenty Flighta of locusts are not of frequent occur rence; bees are common, but musquitoev except in the hot tracts give but little annnyance Among the wild animals from are said in he found in the fully country about the enty of Cabul, but this appears improbable; tigers are principally seen in the Inw country sinng the Indust welves hymnas, finzes and hares are commune every where Bears are found among the woody mountains, but they seldom quit their recesses except when altured by a field of sugar cane; there are two kinds non the common black bear of Iedia, and the other of a dirty white nr sellow colour Wild boars are rare; but n great variety of deer, including the cik abound among the mountains. Wild sheep and wild goats are com-mon, besides which there are porcu pines hedgehogs, mangooses ferrets wild dogs, and monkeys. Elephants are brought from Hindostan, neither that animal nor the rhinoceros being found in n wild state

Many European trees are indige-

nous to Afghanistan, where most of the finest European fruits grow wild. The commonest trees are the large coned fir, with seeds resembling pistaccio nuts; oaks, cedars, a gigantic species of cypress, the walnut, pistaccio and the olive, mulberry, tamarisk. English flowers, such as jessamines, poppies, narcissuses, tuberoses, hyacinths, &c are raised in the gar-The country not having been explored, little is known respecting its mineral riches. Gold is said to be found in some of the streams that flow from the Hindoo Cosh mountains, silver in Caffristan, rubies in Badukshan, and cliffs containing lapis lazuli are supposed to overhang the Cashgur river; lead, iron, and antimony are procured in different tracts; sulphur, rock salt, from the salt range of mountains; saltpetre every where, alum is extracted from the clay at Calabaugh, and orpiment is procured from Bulk and the Hazarch countries.

Afghanistan being an inland country, destitute of navigable rivers and roads fit for wheel carriages, commerce is carried with camels in the level country, and with horses and pomes among the mountains. Caravans go to Chinese Turkistan from Cashinere and Peshawer; from Candahar and Herat to Persia, but the trade to Hindostan is more divided. That of the Punjab and the north comes to Peshawer, while that which crosses the desert of Rajpootana and the countries still further south comes to Shekarpoor, Bahawulpoor, and Mooltan The trade by sea arrives at Corachie, and is thence transported to Shekarpoor and Can-The chief commercial intercourse is with India, Persia, and Turkistan (both independent and Churcse), but the first is by far the most considerable The exports to India consist principally of horses, furs, shawls, madder, assafætida, tobacco, almonds, pistaccio nuts, walunts, havel-nuts, and fruits both fiesh and dried The imports are coarse cotton cloths, mushus, silken cloths ind brocades, indigo in large quan-

tities, ivory, chalk, bamboos, wax, tin, sandal-wood, and nearly all the sugar used in the country. Spices are largely imported from Bombay and the Malabar coast to Corachie, cowries also come by this route, through which horses are exported. horse trade is one of considerable A great number of importance horses are annually sold in north of India, under the name of Cabul horses, and in the west under that of Candahar horses, but almost the whole of these come from Turkıstan. No horses are bred at Cabul, except by men of property for their own use, nor are the horses about Candahar exported Some fine houses from the neighbourhood of Herat are carried to other countries, but few or none to India. A considerable number of horses are exported from Baloochistan, as are also some of the fine breed found on both sides of the Indus, in the county north of the salt range. The great breeding country in the Afghan dominions - is Balk, from which quarter, and from the Turkoman country, lower down the Oxus river, a great proportion of the horses exported are brought. There are two sorts of horses mostly dealt in, one rather small but very stout, the other much larger, and more valued on that account, ald though not near so serviceable, except for war, when, owing to the Asiatic mode of fighting, size is of importance The first are called Toorkies or Uzbekies, the second The great marts are Turkomanies Balk and Bokhara, where Tootkies sell for from £5 to £20, and Turkomanies from £20 to £100 each late years the exportation to India has been rapidly decreasing, owing to the extension of the British possessions, where small bodies of disciplined infantry have been substituted for large bodies of horse, and in proportion as the circle of their depredations has been contracted, the native aimies have been also modified and diminished by a greater admixture of infantry

The origin of the term Afghan has

never been satisfactorily traced but it is probably of modern date, being known to the Af han untlon only through the medium of the Persian The name by which they designate themselves is Pooshtoon in the plural Ponshtanch sometimes prononneed Pooktnunch, whence possibly the word Poton, by which the Afghans are Loown in Imha, may be derived By the Ambians they ore called Sollmance They have no general name for their country but sometimes apply the Persian one of Afglianist han Thenamemost usually applied to the whole country is Kho rassan which is obviously incorrect The Afghans describe themselves as having originally sprung in four dirl mony from the four sons of hiso named Serration Abouresheed Glicorghooslit Betnee and hurich, from whom originate the innumerable tribes branches, and subdivisions which of present exist. The term Ooloos is opplied either to a whole tribe or to an independent branch, the import of the word meaning a sort of clannish commonwealth bhail means a band or o semblage and Zel means sons Throughout all the tribes the elaonuh ettachment of the Afghaos unlike that of the Scottish highlanders is rather to the community than to the cincf who has but little power, and it is but rerely that the personal interests of its khan or chief will influence a tribe to noy action inconsistent with its own interest or honour

The general law of the corpure as that of Mahomed but their peculiar code is the Pooshtoon Wallee or peculiar usages of the Afghans which authorizes the law of retaliation Slaves ore common to Afghantan mostly home born the rest imported. Abysamans and negroes are sometimes brought from Arabla; the Baloochies sell Persians and other pri soners, and many Caffries are pur chased or made prisoners The Caffrey prisocera ore generally females and much sought ofter on account of their beauty. The Afghan inco are of robust make generally

lean Int strong and muscular with lil h noses and check bones and Their halr and beards long fares are cenerally black sometimes I rown, but rately red The western Afghans are stouter than those of the east and some are of surprising strength and stature lit in the aggregate not so tall as the British nations manners are frank and apen, but entirely free from the affectation of military pride and ferocity so di gust ing omong the Patans of India the Persons the African are necused of barbarlam and stupidity because they want the subtlety and mendacity of the former, and are remarkable among castern nations for their ve-Their ruling posmon is the love of gaio and hearding a fovoursto system with oil classes the influence of money being nearly unbounded They are proud of their descent, and great supporters of genealogies their immediate dependents they are kind but the reverse to those who are under them, without ony personal connexion on which occount tho more remnte provinces which they havo subdued, such as Cashmere suffic greatly from their repairty Their vices are those of revenge envy, avarice rapacity, and obsti oacy but on the other hand they ore fond of independence faithful to each other kind to their himediate dependents, hospitable brave hardy, frugal, laborious prudeot and are on the whole at least in their native country, much less debanched voinptuous, and dishonest, than their neighbours the Hundostances and Persians

The above favourable character however nmit in o great degree be restricted to the inhabitants of the country, for the greater part of the sedentary town population ore not Alghans. No grouno Afghan ever keeps o shop, or exercises only han dicraft trade theso vocations being mostly occupied by Tajuks (whose language is Persua) and Hindkles, o people of Indian origin. The only Afghans who reside in great towns are great men and their followers.

soldiers, moollalis, a few who follow commerce, and some of the very poorest who work as labourers. The prohibition in the Koran against true believers taking interest for money, devolves most of the banking business on the Hindoos, for which, from their cautious and penurious liabits, they are admirably suited. The Tanks of Afghanistan are every where remarkable for their use of fixed habitations, and their disposition to agriculture, and other stationary occupations. They compose the principal part of the population round Cabul, Candahar, Ghizni, Hcrat, and Balk, but there are few in the wild parts of the country. whole number in the Cabul dominions has been estimated at about 1,500,000 The Hindikies are more persons. numerous than the Tajiks, and all of Indian descent; their language is a kind of Hindostany, resembling the Punjaub dialect. Brahminical Hindoos are found all over Cabul, especially in the towns, where they carry on the trade of brokers, merchants, bankers, goldsmiths, and grain sellers. They are almost all of the Khetri (military) tribe, yet none follow the martial profession, and they are by no means strict in their adherence to the Brahminical doctrines of purity and impurity.

The food of the common people is leavened bread, rice, flesh, vegetables, sometimes cheese, and afterwards dried curds. Provisions are very cheap, and fruit so abundant. that in the city of Cabul grapes are dear when they sell for more than one farthing per pound. Nuts of all sorts are in profusion; vegetables are low-priced, as are also corrander seeds, turmeric, and ginger. In the Cohistan or hilly country, the chief subsistence of the people is derived from their numerous plantations of mulberry trees, the frint of which is dried in the sun, then ground to flour, and afterwards made into bread. It has been calculated that the produce of an acre of mulberries will support a greater number of persons than one under regular tillage.

The Afghan nation being composed of the aggregate of many different tribes, cannot be properly described without particularly referring to each distinct hody; but these divisions are so minute and extended that it is impossible even to enumerate them, and in point of strength and population, each tribe fluctuates almost annually. In 1809, those of the most importance were the

Durranies (formerly the Abdallies), Ghilpes. Yusephreis, Deggauns, Kızzlebashes (of Persian origin), Turkolames, Khyberies, Bungish, Durranics, Otnian khail, Khuttuks, Delazauks, Momunds, Vizieries, Wurducks, Caukers, and Naussers.

The Hazarehs and Eimauks, who now inhabit what is supposed to have been the original Afghan country, differ entirely from that nation in appearance, language and manners, but bear a strong resemblance to the Toorky tribes in their neighbour-The king is the natural head of the Durranies, the strongest, bravest, and most civilized tribe; but he is obliged to pay great attention to the wishes of the different clans that The tribes that inhabit compose it. the north-eastern quarter, enclosed between the Hindoo Cosh mountains and the Indus, the salt range and the range of Soliman, are comprehended under the general name of Ber Durranies, first given them by Ahmed They are mostly agricultural, but subdivided into numerous little societies The Durranies had formerly the name of Abdallies, until it was changed to Durranies by Ahmed Shah, in consequence of the dream of a famous saint at Chamkunee, and upon this event he assumed the title of Shah Dooree Dooraun the clans into which this tribe is partitioned, the Populzer is the most eminent, and of this clan the Suddozer fills the throne, and is held

neculiarly sacred

The upper corner of Afghanistan north of the Cabul tiver, and we tol the India, is occupied by the lu sephres tribe who also inhabit the country among the lulls named Bencer, Sewad and Punjeora; some of this tribe extend to the Indus. They have possessed the countries they now inhabit 300 years but camo originally from the west about Galrah ond Nooshky The territory was then possessed by the Delazauke who were gradually expelled or extermi nated by the luseplizers At present the latter ore a very numerous tribe, separated into many little com munities chiefly noder an apparently democratic constitution ood not withstandiog their turbulence ond internal discord their country is well cultivated and their villages and water-courses in excellent condition A renowned salot of their own tribe 11 sald to hove left them a blesung ond a curse, that "they should al ways be free but never sinited. ' In consequence of their interminable fouls, there is scarcely a man of ony note who is not constantly on the watch for his life In every village men are seen clad in ormour, and uthers are surrounded by hired sol diers. Lach injury produces fresh retaliations hence ombuseades, sud den attacks in the streets murder in their houses with the consequent distrust alarm, and confusion It is not possible to enumerate all the little republies of the Lusephreis indepen dent of each other The whole popul lation has been estimated of 700 000 persons, but more than half of these ore the mere peasantry (here named Fakeers) who labour for the Yuseph zcia These Fakeers have the liberty of removing from the lands of one master to those of another and even to o distinct community which privi lege is their main protection against oppression

The crown of Cabul is hereditary in that branch of the Suddozei family

which is descended from Ahmed Shah Abdall, but there is no fixed rule for its descending to the cldest son Tho whole of the royal family, except those especially favoured by tho reigning sovereign, are imprisoned In the upper cliadel of Cabul city, where they are well treated but strictly confined. The Ling a title is blishy Doorce Doorsun Ho has the cx clusive privilege of coining and is praced for in the khootleh a part of the religious service of the Mishome-He has the right of making peace and declaring war, but cannot cede any portion of the territory occupied by the Afghan tribes, who have generally shown no desire for western conquests; and it was a death bed injunction of Ahmed Shah to avoid attacking the Uzbeks, whom hedesignated "a luve without honey" Indeed the majority of the Afghan tribes meddlo little with external politics, and possess but scanty in formation regarding the neighbouring states, having no news-writers or in Hindostan, and but few ambassadors The general administration is con ducted by the king with the ossistonce of the Great Vizler, who ought to be rejected from the clan of Baumzel Next to the Viner ore the head secretary (the Moonshee Bashl), the superintendent of the Intelligence department (Ilureurah Bashs), and the commondant of ponishments or public executioner (Nasukher Bashi) The station of Arz Beggee wor here-ditary in the family of Akram Ishan The sluty of this functionary is to repeat in on oudible voice to the king any thing that is said by his subjects when odmitted to the presence and his office it may be aun posed as of considerable amportance

The whole kingdom in 1809 was subdivided into twenty-seven pro vinces eighteen of which had each o separate governor or habin who collected the revenue and commanded the inlitta and a surfar or general who commanded the regulars but sometimes both of these offices were united. The cighteen provinces thus administered were literat burning administered were literat burning.

Candalar, Gluzm, Cabul, Bamian, Ghoorebund, Jellalabad, Lughman, Peshawer, Dera Ismael Khan, Dera Ghazi Khan, Shekarpoor, Sewee, Sinde, Cashmere, Chueh Hazareh, Leia and Mooltan, some of which at present are totally separated from the Afghan dominions, and others under but little control. In settled times the revenue of Cabul was formerly reckoned at near three millions per annum, but the real revenue seldom exceeded two millions, and of this a large proportion was assigned away in military jaghire.

In the cities justice is administered by the cauzies, the mufu, the ameens mekemeh, and the darogalı of the adawlut In the country the landholders were answerable for the police, which in most parts is very bad The established aimy (before the existing anarchy) consisted of Durrames, Gholaumí Shahs, besides which there was a sort of militia named The conduct of the Dur-Eeljaui ee ranies (the ruling tribe) in their wars, conveys a very mean idea of their military character Their armies were always very small, seldom cxceeding ten thousand men of a side, and these ill paid and disobedient. The victory was usually decided by some person of consequence going over to the enemy, on which the greater part of the army dispersed, or followed his example Even when the battle was decided by the sword there was little bloodshed, and that chiefly among the great khans who were interested in the result, the common soldiers sliewing much indifference as to the issue

The language of the Afghans is named the Pushtoo; but its origin is unknown, as a large portion of the words cannot be traced to any of the aucient languages, although Sir William Jones considered it to be a dialect of the scriptural Chaldaic. For writing they use the Persian alphabet, and generally the Nush character, but as they have some sounds not expressible by any Persian letter, they denote these by adding a distinctive mark or point to the Persian

letter, which approaches nearest in sound. In a specimen of the Lord's Prayer in the Pushtoo, the missionaries could scarcely trace four words to the Sanscrit, although half of them were quite familiar as being current in the Hindostany. It is consequently evident that the languages derived from the Sanserit end in the west at Afghanistan, which idea is confirmed by the Baloochy dialect to The Pushthe south of that region too, though rough, is a manly lauguage, and not unpleasing to an ear accustomed to the oriental tongues. None of the famous authors in this dialect are more than one century and a half old, and there are probably no books in the language more than twice that antiquity, their literature being mostly of Persian origin. Their pure authors are chiefly writers on theology and law, but they have also several histories of particular periods of their own transactions The books written in Pushtoo, however, are not to be relied on as giving any standard of the national learning. Persian being still the language in which all seientific works are composed.

The manners of the Afghan tubes differ according as their habits are stationally or migratory. The dwellers in tents are chiefly found in the west, much the larger portion of the eastern Afghans living in houses, and circumstances render it probable that all over the empire the erratic tribes are diminishing, no voluntary migration of a tribe from one distant station to another having taken place for above a century. The commonest houses are built of brick, one story high, and roofed, either with terraces or low cupolas, supported by beams There are neither wheeled carriages not palanquins in the country, both sexes travelling on horses and camels. One of the most distinguished characteristics of the Afghans is their hospitality, for which they are justly famous, it being considered a point of national honour The greatest affront an Afghan can receive is to have his guest carried off They are

remarkabla for their rapacity and preclatory lubits, and will next day, if they meet him at a distance, pliin der the individual they have before hospitably entertoined. They acquire their wives by purchase and among them o samong the anecest 3-ws, it is thought incumbent on the brother of the deceased to marry his widow.

With respect to religion, the Af ghans are oll of the Sooni sect of Mohomedons which acknowleges the three first Coliphs as the Inwful suc cessors of Mohomed and apposed to the Shahs who reject the three first Caliphs as usurpers of the right of All the neplies of the proplict. and fourth of his succes ors ter enmity between these two scets Is the coosequence; and the un learned portion of the Afghaos cer tainly consider a Shish as more of on infidel than o Hindoo yet all the numerous Persians in the country are Shinhs and mony of them hold inch offices in the state and house hold. Another remarkoble neet in Afghanistan is that of the Sorbies which ought perhaps to be coordered rather or o sect of mystified philosophers, than mere sectorates in religion. This class gains ground omong the litelier orders, and such of the Moullahs as are dabblers in general hterature, to whose taste its mysteries and obscure sublimity is admirably Another sect named the Zukkies from Mondlah Zukki Its first patron hald doctrines hostile to all revelation and the belief of a future stote, and are said practically to illustrate their doctrines by the deprovity of their lives The Roushunco sect was very prevalent la the sixteenth century but is now nearly extinct It was founded in the reign of the emperor Acber, by Bajazet Ansara nomed by his enemies the opostle of darkness in decision to the title of Peeren Roushun the opostle of light, which ha hod assumed.

Like many other eastern outlons the Afghons hold their burial-grounds in high veneration, naming them the cuties of the dead These they people with the chosts of the departed

each sitting at the head of bit own grave, although unvisible to mortal eyes. They olso pry into futurity by ostrological and geomentic calculo tions, and by all kinds of divination and sortiege. The most approved modes, however, of discovering the orrangements of providence are either by examining the blade-bone of a steep held up to the light, or by opening of random the Koran or the Forms of Illafr.

The Afghans ossert that they are descended from Afghon the son of Irmia or Birkia, the son of Saul Ling of Brack The early Mahomeilan chronicles mention Rajas of Calml; but this prores no fact, os the same writers call the lindoos Gnebres, and apply the term read with out sufficient discrimination first substantial tradition of the Afglians begins in A.D 997, when Schueta hl a Tartar officer con quered Afghaoistan and made Ghiznl its capital lis son Mohmood greatly extended the limits of the empire and the dynasty lasted until 1160 from which period, until the invasion of Tamerlone, the Afghan history is anyolved in obscurity 1506, the emperor Baber seized on Cabul and Ghiant, prior to his inva son of Hindoostan In 1720, the Afghans conquered Persia, and took Ispahan; but in 1737 their own country was completely subjugated by Noder Shop In 1747, Ahmed Shah ob dally the founder of the Durrany dynosty was crowned at Caodahar In 1773 he was succeeded by his son Timour Shoh who died Zemoun Shoh reigned 1793 until 1800 when he was dethroned by his brother Mahmood who. in 1803 was expelled by his bro ther Shuja who was in his turn expelled by Mahmood in 1809 and sought refuge at Luddenneh where he remained in 1817, with a pension of 50 000 rupees per anoum; but in 1818 ha became restless and gultted his asylum in hopes of regaining the uneasy crown Moontume Runject Singh, the Seik chief of Lohore availing himself of the existing coo

fusion, in 1819-20, conquered Peshawer, the modern Afghan capital, and the romantic valley of Cashmerc. In 1821, Shah Shuja returned from the Kaipoor to Luddeaneh, through Sinde, Jesselmere, and Joudpoor, after failing in attempt to recover his throne by the aid of the Ameers of Sinde. Great lenity was shewn him, and his pension restored, although he had offered to mortgage it to the Rajah of Noorpoor, to raise funds for his adventurous expedition. the same time a pension was settled on his blind brother, Zemaun Shah, at one period the sovereign of Afghanisthan, and the terror of northwestern India. In 1826, the rival kings, Mahmood and Shuja, were equally fugitives; the first with his son Camran at Herat; the last within the British territories. Cabul country was then partitioned among the sons of Futteh Khan, always at variance, and Yar Mahomed Khan was actual ruler of Peshawer, probably under the pro-tection of Runjeet Singh, the tide of conquest having rolled back for the first time from east to west .- (Elphinstone, Foster, Public MS. Documents, Sc.)

AFZULGHUR—A town and stout ghurry in the province of Oude, situated in lat. 29° 25' N., lon. 78° 40' E.

AGHA DFEP (Agha-dwipa).— A small town in the province of Bengal, where there is a celebrated image of Krishna, much venerated by the Hindoos.

### PROVINCE OF AGRA.

This large division of Hindostan proper is situated principally between the 25th and 28th degrees of N lat On the north it is bounded by the province of Delhi, on the south by that of Malwa, on the east are the provinces of Oude and Allahabad, and on the west that of Ajmeer In length it may be estimated at 250 miles by 180, the average breadth. The principal modern geographical

and political subdivisons are the following:

1.Agra district. 🕻

2 The Doah.

3. The district of Etawch.
4. The Furruekabad district.

5. Calpee, Gohud, and Gualior.

6. The Bhurtpoor territories.

7. Alvar and Macherry,

8. The Alighur district.

The surface of this province, to the north-east of the jumna, is in general flat and open, and rather bare of trees; but to the south of the Chumbul, and also towards the western frontier, it becomes more hilly and jungly. The climate, for the greater part of the year, is temperate, and during the winter cool during the nights; but while the hot winds prevail, as in other regions subject to their influence, the heat is intense, and the climate unhealthy, especially in the jungly quarter; but, fortunately, their continuance is not of very long duration. The chief rivers of the province are the Ganges, the Jumna, and the Chumbul, besides many smaller streams, such as the Sinde and Kohary; but, upon the whole, the country is but indifferently supplied with water, and depends much on the periodical rains. To the north of the Chumbil, and on the western frontier, during the dry season, except in the immediate vicinity of the large rivers, which flow with a perpetual current, water for agricultural purposes is procured from wells. A great proportion of the cultivation is consequently restricted to such crops as do not, like rice, require a redundant supply of moisture.

Various streams have their sources in the north-western hills, and during the rains flow with a considerable volume; but even then they do not reach the Jumna, Chumbul, or any large depôt of water, being arrested during their progress; either absorbed by the thirsty soil, or abstracted by the husbandman for the purposes of agriculture. The soil of this province is particularly well adapted for the cultivation of indigo

cotton, and sugar, which tright be raised in any quantity, and the production of which in the British ter retories, is annually fast increasing In those subject to the native chiefs, sericultore still meets with impediments, but nevertheless, during tho long tranquillity they have been compelled to enjoy, has made con siderable advances. The Agra pro vince contains no peculiar nilneral productions, and the animals are such as are usually found in other quarters of Illndo tant but the liorses are reckoned much superlor to those reared further cast, with the exception of those bred in the covernment study at Tirhoot and Chazipoor While describing the local aubdivisions into which the province is partitioned, further per-

tleulars of this nature will be notleed The principal seticle manufactored in the Agra province is course cot ton cloth which was once largely exported, but has latterly much de-The Beneal and Bahar protinces receivo annually an importatloo of raw cotton from the country south of the Chembul, by the route of holpee; but a considerable nor tion of it is the growth of Malwa and the former Maharatto territories to the south-cast of Agra. The Doat or territory included between the Ganges and Jumns which may be termed the garden of the province exports indiao sugar, and cotton The country to the north west of Agra under the Rajas of Macherry Bhurtpoor, and other nativo chiefs, olthoogh ill supplied with water has latterly much improved both in industry and cultiva-Upon the whole the province is but thinly populated when com pared with Bengal Bahar Tanjore and the more flourishing of the British districts and does not probably, lo all its dimensions contain moro than eight millions of inhabitants of which much the larger portion realde within the jurisdiction of the British magistrates.

At present the chief notive potentates within the limits of the provioce vol. z are the Reishs of Macherry and Blum poor; but, besides these it contains letty in lependert eldefe all under the protection of the Rritish gavernment, which I tesers en peace between them, and arbitrates their differences All the country to the east of tho Jumna le directly under British an thorser, and is managed by a regular civil establi hment for the collection of the revenue and odministration of intle The tracts in the south of the Chumbul comprehending Gualier Gobuil Answer &c with the exception of the town and district of halpee, are either in the possession of or tributary to Dowlet Row Stodia.

The chief towns in the Agra, beaides its capital are Alvar, the capital of the Macherry Raph; Bhurt poor, the capital of the Jauts Deep another strong Jaot fortresst Ma thura Bindrabund hanole, Etawah, Gualtor Gohud halpre, Narwar, and I perickabul. The natives are In general a handsome robust race of men, and consist of a mixture of Undoos and Vahomedans few of the Scike having rome so far south A considerable number of the cultl rators to the west of the Junna ore Jauts, and the country of the Macherry Hajah contains many Menattles, long noted for their thlevials propensities. The Hindoo religion is still predominant, although the country has been (ontil recently) permanently subject to Mahomedan rinces since the thirteenth century Parodas are numerous and mosques rare, while the Rajpnot and Brah minical races prevail among the pea-The woods and jungles are santry full of peacocks, another symptom of Hindoolsm: and most of the names are followed by the oilix of Singh, which ought to be peculiar to the the Jants ossume It without cere mony, as do also the Sciks, who being apostates from the Brahminical faith have still less claim to such a distinction The language of com moo intercourse is the lindostany but the Persian (for which Luclish might now be substituted) is used for

18 AGRA.

public and official documents, and is also spoken in conversation by the higher classes of Mahomedans. The Bruj dialect is spoken round the city of Agia, and extends to the Vindliya mountains. In the words of the Lord's prayer in this langnage, twenty-eight correspond with those occurring in the Bengalese and Hindostany specimens, besides two or three Sanscrit words of frequent recurrence in the Bengalese. ancient language of Kanoje, the capital of upper Hindostan, at the period of the first Mahomedan invasion, is thought by Mr Colebrooke to form the basis of the modern Hindostany.

In the temote ages of Hindoo antiquity this province must have formed a very important division of Hindostan, as it contained Kanoje, Mathura, and Bindrabund, the seats of their most famous empires, and still among the most venerated places of pilgrimage The city of Agra is supposed to have been the birthplace of the Avatar, or incarnation of Vishnu, under the name of Parasu Rama, whose conquests extended to and included Ceylon After the Mahomedan invasion it followed the fate of Delhi, and during the reign of Acber, as containing the temporary metropolis, was the leading province of the empire Subsequent to the death of Aurengzebe in 1707, it was alternately possessed and 1avaged by the Jauts, Maharattas, and different commanders deputed from Delhi to restore peace and the impenal authority, neither of which they were ever able to effect of the latter, Nadjiff Khan, governed the districts north of the Chumbul from 1777 until his death, nidependent of all control from the Delhi sovereign (Abul Fazel, Scott, Colebrooke, Missionaries, Wilford, &c)

AGRA DISTRICT — The modern district of Agra joins the Delhi division a short distance north of Kosee, and extends along the banks of the Jumna to its junction with the Chumbul On the west it is

bounded by the pergunnalis of Deeg, the Bhurtpoor territories, and the pergunnalis of Dholpoor, Barree, That portion and Rajakera. tuated between the Chumbul and the Junna is a table land, elevated above the bods of both rivers about sixty feet, and composed of a light soil. In many parts, during the dry season, the tanks, streams, and rivulets are without water, which, for agricultural and domestic purposes, is procured from wells. Cultivation in this district, when compared with its condition in the Company's old provinces, has made but little pro-The waste lands are very extensive, and a portion of them might, without injustice, be set aside for the maintenance of watchmen, of any other public measure This backward state of the agriculture is in a great measure to be ascribed to its locality, and the peculiar political relations in which it is ciicumstanced, the contiguity of independent states, separated in many parts from the British territories by an imaginary boundary, and inhabited by tribes long noted for their habits of rapine, such as the Mewatties and Buddicks, who, after committing crimes within the limits of Agra, find a secure asylum for their persons and plunder in the adjacent native states, or among the defiles and ravines which intersect the southern portion of this division.

The jurisdiction of Chata contains 175 villages, and is bounded by that of Delhi, by the dominions of the Nabob Ahmed Buksh Khan, and by Bhurtpoor. The inhabitants of this tract have been, from time immemorial, most notorious robbers, and it is only within these fifteen years that their roads could be passed with any degree of safety. This predatory disposition, in addition to the facilities afforded by its frontier position, and much jungle between the villages, requires a more than ordinary share of vigilance and vigour on the part of the magistrate to retain the tract in tolerable subordination. Kosee is a place of consequence, wealth, and

commercial Importance Aundrow and Bursans are places of considerable resort, owing to the opinion entertained by the illidodos of time sanctity but the inhabitacts of the first and those of Mathhoc have long had an evil reputation and the latter being situated on the banks of the Jamms, its natives have fallen under the suspection of eaertaing their ingentity and activity in transferring the property of their net, bhours in the Alr-hur division to their own

respective d'a ellinga Sonk is a town of considerable size on the immediate frontier of the district Ilurbola is situated on the high road to Mathura. Between Secundra, near Agra, and Gaowghant the country is barren, with much jungle affording no protection to tra vellers but extremely well adapted for the concealment of thiever. is immediately on the Bhortpoor frontier and much espored neighbourhood of Jet Islog between Blodrabund and Choumaher is fa mons for the bad character of its in habitants who too frequently avail themselves of the conseniences af forded by the neighbouring ravines and jungles. The Hindoo sanctusties of Mathura and Bindraband are two populous towns, where for security, and to promote an Improved system of police gates have been erected at the principal entrances and at the heads of the streets and alleys Prior to 1812 an attempt was made to indoce the zemindara to retun o num ber of watchmen in proportion to the magnitude of their different vil isges but the burthen being found by experience greater than their resources could hear the establishment was ultimately abandoned. In the section of the police division contiguous to the isads of Rajah Lecruth bingh a strong police is required yet in 1812 the only police officer entertained was o Belahur whose duty it was to report to the head of the tannah the occurrences of his sillage, and even this functionary complained that lils wages were not

psid with due punctuality

The prevaling crime in the Agra district is that of tobbery on the highway; and the cooolvance of the semindars with the robbers, olthough difficult of direct proof is an articlo of universal behef The presumption is greatly strengthened when the condition of the country prior to its coming under the British government is considered At that period the semindars openly sheltered thieves, and shared their plunders and as the practice ovowedly continues in the immediate ociclibourhood, the proimbility amounts almost to a certainty The land revenue yielded by this district in 1801 dui oot exceed 8,500,000 rupecs, although ly Sindia a ministers it had been estimated at thirteen iacks It was then held by Colonel Hessing the commandant of Agra as Jaldad In 1813 the Agra district was sald to contain 1,222 Gr7 cutchs or small began of isod in cultiration, assessed at 1 425,802 rupees or ono tupee Iwo annas per bega of 1 000 square yards 130,007 begas fit for agriculture, and 902740 begas entirely waste. (H Turner MS Documents, the Morquis of Has linge åe)

Ada (or Acberabad) - Thecapital of the preceding province, commodlously situated on the south west aide of the Jumpa which in the month of June is here half a mile broad and nerer fordable at ony time lat. 27° 11 V ion 77° 53 E. The houses of modern Agra like those of Benares consist of several stories, and the streets with the exception of that leading from the fort to the Mathura gate which is inandsome for no Indian city so narrow as scarcely to odmit of a palaoquin, but much the greater part of this once flourishing city is now o heap of rums and olmost uninhabited Six miles to the north at Secundra Is the mausoleum of the Emperor Ac-From the summer of the mingret in front of it, the spectotor s eye may range over o great circuit of country, not less than thirty miles in n direct line The wholn of this space is flat, and filled with the rims of

AGRA. 20

ancient grandeur; at a distance the Jumna is seen, and the glittering towers of Agra The fort is large. and strongly built of a red kind of hard sandstone, brought from the quarmes at Futtehpoor It has a ditch of great depth, and double rampart, the inner one being of an enormous height, with bastions at regular distances.

This city was greatly enlarged and embellished by the Emperor Acher, who made it his capital, and it had also the honour of being the birthplace of Abul Fazel, his prime minis-In 1813, a pension of fifty rupees per month was granted by the British government to Mustapha Khan, a resident here, and the reputed lineal descendant of that meritorious vizier. During the prevalence of the Gallo-Maharatta power in Hindustan, the pension to this individual had been reduced to the miserable pittance of fifteen rupees per annum.

The most remarkable edifice in modern Agra is the Tauje Mahal, built of marble, greatly resembling that of Carrara, and crected by the Empcror Shah Jehan for the celebrated Noor Jehan Begum This edifiee, with its light minars, its great gateway, mosque, and Jumant Khana, forms the most exquisite group of oriental architecture in existence, and although the more costly mosaies, of twelve different sorts of stone, within the mausoleum, have been partially despoiled of their riches, the general beauty of their structure remains to this day perfectly unimpared. gardens which occupy the great area in front are adorned with rows of evpresses, and enlivened with fountains. which are still kept in order at the public expense, and usually play on Sunday evenings. Besides the Tauje Malial and the apartments of the imperial palace, there is a small white marble mosque of singular purity of design, named the Mootee Musjeed, or pearl mosque, which with the Juinna Musiced, the great chowk contiguous to the principal gate of the fort, and the toinb of Etimand ud Dowlah, on the opposite bank of the Jumna,

with its delicate marble lettice-work and fantastie party-coloured mosaics, are remarkable structures. There is also an old Roman Catholic college still subsisting in the neighbourhood, but in a decayed condition. In 1814, one lack of rupees had been expended by the British government in the repairs of the Tauje and the Emperor Acber's mausoleum at Secundra; but in India, owing to the nature of the climate, the luxuriant vegetation, and other causes, undertakings of this sort may be described as never ending, still beginning. The tomb of Kundehree Begum, another of Shah Jehan's wives, has not been so fortunate, for while that of her rival has been repaired and adorned at a vast expense, the other is polluted by the presence of a court of justice, which holds its sittings there.

The extensive ruins which surround Agra, added to the celebrity of its name, probably gave rise to the exaggerated idea entertained of its present magnitude and population, the portion of the town, however, which is inhabited is comprehended within a very small compass. It does not appear that any enumeration of the inhabitants has ever been made, but if the amount of the town duties on the import of grain for their consumption, compared with Furruckabad and Bareally, may be taken as any eraterion, the inference would be that Agra is the least populous of the whole. 1813 these duties for Agra were 16,251; for Furruckabad 22,000 rupees, and for Barcilly 22,101 rupees. The present number of inhabitants is probably within sixty thousand, but this number may eventually be expected greatly to increase, from the facility Agra affords to the commerce of western Hindostan, which is already very great, as will appear from the duties paid into the treasury on account of duties received at the custom-house, viz. in 1812-13, 673,006 and in 1813-14, 922,157 rupees. In 1818 the increase of duties, in consequence of the tranguillization of Raipootana, was such that the customs of Agra exceeded those of the preceding

year by 130 000 rupees, and they have since continued progressively to increase

Agra with the rest of the province fell under the sway of Madhalce Sindis and continued in the possession of the Maharattas until 1803 when it surrendered to the British army under Lord Lake Among the ordnance exptured here was one enormous piece weighing about 96 000 pounds winels Lord Loke endeavoured to float down as a trophy to Calcutta. with the view of having it ofterwards sent to England bot it broke through tire frame of the ralt, and sunk in tho sands of the river, where it is all probability still remains. It is not known by whom it was fabricated Agra soon after its capture was made the head quarters of a civil establishment for the administration of justice and coi jection of the revenue, subordinate to the Bareilly court of circuit. A strong garreson is maintained in the fort and military cantonments, and the interior of the fortifications have been much Improved, both as to arrangement and cleachoess. The hi\_her parts of tho fort ore from lifty to sixty feet above the level of the river, and as it is filled with buildings of brick, stone, and marble, the heat is excessive, -(Fallarton R Turner, Ker, Sir D Och terlony de l

Aumenasae.—A Brutsh during in the province of Gujerat, established about the year 1817 when the Saber matty river was fixed on as the boundary between the milish of Ahmedaland and the eastern milish north of the Myhle Beudes the geographical advantage of this division in morked difference was discovered in the habits, manners customs, and even language of the people on the cast and western sides. In 1819 the avern, co for leand jumma was Rupees 11,36,277; in 1820, Rupees 11,72,331

Anmeoasas.—An ancient city in the province of Gejerat, of which it was the Mahomedan capital, situated on the backs of the Sabermatty, which washes its walls. Let. 237 N., len 72° 42° E It is mentioned by Sidi Aii in the journal of his travels overland from Gujerat to Constantinople A D 1554

This was formerly a large city, celehrated for its mosgoes, minarets edi fices and manufactures; but prior to 1820 the heavy and vexations municinal duties exacted by the Moharat tas had reduced it from one of the most opulent and commercial to one of the most muerable citics in tho Last During their government e tax was levied on every inxury and newretched bundle of fire-wood or vegetables, either brought into or sent out of the city On its sequisition from the Peshwa in 1818 the British govern ment abolished all these extortions and simplified the collections, catablishing on ad ralorem duty of £2} per cent. on jedico raw silk, &c., wholly exempting all articles of consumption but augmenting the ordinary imposts on onlym and tobacco. Besides these alterations all restriction on the tran sit of the agricultural products of the British territories through the district were entirely removed Thus city suffered greatly from the earthquake in 1810 but even then its population was roughly estimated at 100 000 souls, and it probably has not since diminished Travelling distance from Bombay 321 miles from Poona 389: from Delhi 019; and from Calcutta by Oojem 1,231 mlles .- (Public MS Documents Carnac, Rennell, &c )

Annsoncoges.—A city and for tress in the modern province of Auringabad to which it formerly gave its owneppellation, lat 19° 5′ N lon 74° 55 E

After the dissolution of the Bhamence empire of the Decean Ahmed Nizam Shah established the independent state of Ahmednuggur about the year A.D 1480; in 1493 he laid the foundation of this town, and made it his capitel Ho died so 1508

Bourahan Sheh died in 1553 Hossem Nizam Shah in 1565 Morteza Nizem Shah became in sane, and was murdered by his son Meeraun Hossein, A.D. 1487.

Meet ann Hossem was assassmated after a reign of two months and three days.

Ismael Shah was taken prisoner

and confined by his father, after a short reign.

Boorahan Shah died in 1594.

Ibrahim Shah, having reigned four months, was killed in battle.

Bahadur Shah, an infant, was taken prisoner by the Moguls, and confined for life in the fortress of Gualior, and with him ended the Nizam Shahy dynasty of Ahmednuggur, about the year 1600. Nominal sovereigns of this family existed at Dowletabad until 1634, when it being also taken, the Nizam Shahy dominions became a province of the Mogul empire under the name of Aurungabad.

Ahmednuggur followed the fate of the Delln empire until the death of Aurengzebe in 1707, when it was at a very early period seized on by the Maharattas, and continued to form a portion of the Peshwa's dominions until 1797, when Dowlet Row Sindia compelled the Peshwa to cede this important fortress with the surrounding district, by which eession he not only obtained the command of the city of Poona, but also the best entrance into the territories of the Peshwa and of our ally the Ni-In 1803 it was taken by the army under General Wellesley, and ceded to the British by Dowlet Row Sindia, at the treaty of peace concluded on the 30th December 1803, with the view of being ultimately restored to the Peshwa

The existing fort is entirely of stone, of an oval shape, and about a mile in circumference, with a great many round towers, and a glacis (a vain precaution in native forts), to cover such parts of the base of the wall as are exposed. The ditch is deep and broad, and the whole area within is vaulted for stores. The city stands about half a mile from the fort, and is also enclosed by a stone wall, and contains a handsome quadrangular chowk, and several to-

lerably well-built streets. The principal edifices in the vicinity are, in ancient palace of the Alimedinggur sultans, a massy pile surrounded by a magnificent most faced by solid masonry, supplied by a enscade of clear water from the adjacent lalls; and the mausoleum of Salubit Jung, situated on the top of a mountain. At present Alimedinggur is the head station of a civil establishment, and in 1820 was estimated to contain 20,000 inhibitants, exclusive of the garrison.

Travelling distance from Poona, 83 miles; from Bombay by Poona, 181, from Hyderabad, 335; from Oojein, 365, from Nagpoor, 403, from Delhi, 830, and from Calcutta, 1,119 miles—(Scott, Fullarton, Ferishta, Malcolm, Fitzelarence, Elphinstone, &c.)

Anneonegus —A British district in the province of Auringabad, composed of conquests made from the Peshwa in the war of 1818 1821 the total extent of land in this collectorate was 5,999,000 begas, of which 3,748,000 were stated to be lost in rivers, rocks, hills, or included in enams (charity lands exempted from the revenue assessment), leaving 2,249,000 begas of arable land in the hands of govern-The total number of villages under the collector's superintendence was 2,647; of which 156 were 198 renewed serinjammy, 179 belonged to Sindia and his dependants, eighty to Holkar and his dependents, forty-four to the Nizam. and twenty-five recently assigned in jaghire, leaving 1,963 in the hands of government. The jumma or assessment to the land revenue was 2,169,248 rupees, but the net clear reverue, after deducting charges, was only 1,280,762 rupees.

The Ahmednuggur district is one of the most elevated and temperate regions of the Deccan, but is scantily peopled, having fallen into decay after the war and famine of 1803-4, aggravated by the more recent destruction caused by the epidemic. The

neighbourhood of the capital how ever has greatly recovered and in 1800 presented an extensive sheet of the richest cultivotion -(1 of tunger, Tullation fc)

The soil of this province may well be called sandy os it is by Abul Fazel and its general appearance is aufficiently dismal a considerable portion of it being absolute desert From the western frontier of the Shekawatty country to Bahawalagar 18 a distance of 280 miles, of which only the last 100 nules south west from Bahawulpoor is wholly destituto of inhabitants water and vegetation From Shekowutty frontler to Poogul a distance of 180 miles the road is over bills and volleys of loose sand These hillocks exactly resemble such as are formed by the wind on tho scu-sbore but for exceeding them

in height, reaching from twenty to one hundred feet. They are said by the natives to shift their position, and to alter their shapes as the wind blows. During the summer the passage of this portion of the desert is dangerous, on account of the clouds of moving sand; but in winter they exhibit a greater degree of permanence, and besides phoke, bear a sort of grass, the thorny bushes of the baubool, and the ban or jujube, the aggregate presenting an appearance somewhat resembling veidure.

Among these suffocating sand-hills a miserable village is sometimes met with, consisting of a few round straw huts, with low sides and conical roofs, like little stocks of corn, surrounded by hedges of dry thorny branches, the whole extremely combustible. Surrounding these abodes of misery are a few fields, depending for moisture on dews and the periodical rains, cultivated with crops of the poorer kinds of pulse, and of bajarry, or the holcus spicatus, which last is raised with great difficulty. The wells are often 300 feet deep, and one in particular was found to be 345 feet, yet with this enormous descent, some are only three feet in An examination of the strata penetrated would be a curious and useful research. The water procured with so much trouble is always brackish, unwholesome, and extremely small in quantity. Two bullocks working for one night can always empty a well. These wells are lined with masonry, and on the occurrence of any exigence, by being covered with boards heaped over with sand, may be effectually concealed by the natives from their enemes, so that a scarcity of water is at once a source of woe and pro-In the midst of these burntection ing sands, the most juncy of all fruits, the water melon, is found in astomehing profusion, growing from a small stalk not thicker than that of the common melon, and attaining a circumference of three and four feet. The optical illusion, termed mirage by the French, is common in this

the appearance of extensivamidst parched and arid sand From Poogul to Bahawulp

Chowhans ..... the Rajas of
Kotah and Boondee spring from the
Hara, a branch of the Chowhans.

The constitution of these countries resembles the feudal system. caeh district, town, and even village, being governed by petty chiefs, dignified with the title of thakoor or lord, who frequently yield but a nominal obedience to the person who has the reputation of being their The land sovereign or superior. rents are very low, but every village is obliged to furnish a certain number of horsemen at the shortest notice. The Rappoots are hardy and brave, and extremely attached to their respective chiefs. They are also much addicted to the use of opium, this deleterious drug heing produced by them on all occasions, and presented to visitors as betel is in other parts of India. They are usually divided into two great tribes, the Rhatores and the Chohan Seeso-Respecting the numdya Raipoots ber of inhabitants, but a very vague conjecture can be hazarded, the extent of country not absolutely desert or uninhabited being so enormous. By comparing, however, the area of the province with that of others similarly situated, the population of which has been better established, there is great reason to believe the whole does not much exceed four millions of souls, in the proportion of one Mahomedan to The principal towns ten Hindoos are Jeypoor, Joudpoor, Odeypoor, Ameer, Neemutch, Kotah, Boondee Chitore, Shapoorah, Bicanere, and Jesselmere

Although Rajpootana is central to Hindostan, and its eastern frontier be within ninety miles of Delhi, it never was thoroughly subdued either by the Patan or Mogul dynasties. Rajas of Ajmeer are mentioned by Ferishta so early as A D. 1008, at which period they joined a combination of Hindoo princes against Mahmood of Ghizm, and in 1193 it was conquered, or rather overrun, by Ma-

homed the first Ganride sovereign of After this date it continued India. tributary to the throne of Delhi, and on account of the rebellious conduct of its chiefs was frequently invaded by the emperors, who repeatedly took and destroyed all their eapital The province notwithstanding never became a regularly organized possession like Delhi, Agra, and many other countries much more remote from the seat of government, but remained in a sort of half independent condition, paying a tribute, and furnishing the imperial armies with a certain number of Rainoot mercenaries, who were always held in liigh estimation for their bravery and fidelity, and served as a counterpoise to the Mogul and Afghan sol-

After the death of Aurungzebe in 1707, and the dissolution of the Mogul empire which ensued, it continued under a nominal subjection to the Delhi throne until about A D 1748, when total independence was assumed by its chiefs and princes. The interval elapsed since then lias been occupied by internal warfare, and by invasions of the Maharattas and other hordes of plunderers During the latter part of the reign of Madhajee Sindia, and the commencement of that of his nephew Dowlet Row, they were near being completely subdued by the disciplined mfantry under Generals de Boigne and Perron, in the pay of these two They were relieved from chiefs apprehensions of impending subjugation by the depression, in 1803, of their grand oppressor Dowlet Row Sindia, whose means of inflicting evil were greatly curtailed by the war which lie then undertook against the British government

The Raja of Bicanere is probably the least important of the five princes of Rajpootana Those of Joudpoor and Jeypoor are at the head of considerable states, and the reduced condition of the Odeypoor Raja is kept from total insignificance by his high lank, and the respect paid to him as the purest of the Rajpoot race. In

1807 a contest arose between the Rains of Jeypoor and Jaudpoor, each pretending ta the honaur of marry ing the daughter of this high-born chieftain, and in the mean time at lowing their daminions to be ra vaged by Ameer Ahan, Holkar and Sindia who pretended to esponse the cause of each respectively, and in reality plundered both In fact. far many years this large province was sa unceasingly harasted and devastated by these depredatars, that every one of the Rajpoot chiefs repentedly begged and entreated to be admitted into a federal union with the British government, offering in same cases half their daminions for protection to the remainder but the nan-interfering system adopted by the latter did not permit of these avertures being accepted A distinct perception of the misery they had suffered was the solu mative which induced these proud and turbulent tribes so long and so unsuccessfully ta seek a connextan with the British nation This was of length conceded in 1818, when they were admitted Into the general federation by the conditions of which mutnal support in the field was plighted while by the same instrument the feudal states (each equal and independent) are withheld from disturbing the general tranquility by attacking each ather Their political differences are in future to be sabmitted to the arbitration of the British government which averts the accessity of resorting ta the sword on petty points of hocour heretofare rendered mevitable by the prejudices of the country Where the government was exercised with any kind of efficiency there was no difficulty in settling the terms. which were to pay the tribute demandable by the Patana ar Maha rattas lato the British treasury at Delhl, which would account for the amount to the respective parties The great mass of the cultivators were highly pleased with these arrange ments and the prospect of future safety which it afforded them but same of the old thakaars, and higher

classes of nobility were not equally satisfied with the change, as under the prior anarchy they were fast estiblishing a species of independence in their respective juginres which they

were compelled to relinguish It was an impartant part of the original plan, not hastly to urge the whole mass of military adventuters to despair by depriving them at once of their accustomed means of subsistence; accordingly Sir David Och terlony made the tender of service to eight of the best Paten battalions ond to about 3 000 harse. The first, ofter pensianing off the superiar na tive officers, were formed into four pattallons for provincial duties twa of which were sent to the Delhi province and the other two retained in Rajpootana British officers being appointed to command the whale The horse were formed into risalias af 500 each and as only the best were taken rendered good service In this manner was the destruction of the predatary Patan power which had been expected to require the greatest exertion of military resources wholly accomplished by the extraoribners address with which Sir D Ochterlany combined negotiatian with skilful inditary movements,

By these arrangements the Ramant states were entirely liberated from Maharatta interference and placed onder General Ochterlony as rest dent and cammander of the forces in Rajpootana, where cantonments have been formed at Necmutch and Ausserabad near tho city of Ajmeer which, along with the pergunnaha adjacent was received from Sindia in exchange far a portion of the Peshwa a territories io Malua Sinco that event multitudes of people have emerged from the hills and fastnesses where they had saught refuge, and have again occupied their ancient and long-deserted villages In no part of limilostan has the British regime had the advantage of no favaurable a contrast with that which it supplanted as in Rajpontann the transitian having been so sudden and no where are the peasantry sa uni

28 AJMERE.

versally sensible of the great improvement in their condition which has taken place. Sccurity and comfort are now established, where miscry and terror before existed, and the ploughshare is again in peace turning up a soil, which for many seasons had never been stirred except by the hoofs of predatory cavalry. although the Rappoot states, by the recent course of events, have gained deliverance from an oppression more systematic and brutal, than nerhans ever before trampled on humanity, it is not to be expected they will all at once abandon their irregular habits, or that tribes, who according to their own notions were created for the express purpose of fighting, will so suddenly change their natures as not to require the frequent interference of the British, and their military coercion.—(Elphinstone, Metcalfe, Marguis of Hastings, Prinsep, Fullarton, &c)

AIMEER (Ajamer, from Aja, a goat, and meru, the sacred mountain at the North Pole .- A city in the province of Ameer, of which it was the former capital, lat 26° 31' N., lon. 74° 28' E, eighty miles W.S.W. from Jeypoor. It stands at the bottom of a hill, the summit of which, named Taraghur, is fortified, and was formerly considered impregnable to open force In 1819 the interior was very ruinous, owing to its long misgovernment, but the inhabitants were again collecting from The houses are of various quarters. masonry, and though decayed, still present indications of former opu-lence. The old palace and gardens of Shah Jehan still exist, and the former contain several habitable rooms. The principal object of attraction, however, is the tomb of Khoja Moyen ud Deen, a renowned Mahomedan saint, to whose tomb the great and wise emperor Acber made a pilgrimage from Agra (230 miles) barefoot, in order to procure male progeny, in which he succeeded Crowds of pilgrims still frequent the saint's tomb, and in Malwa it is not

uncommon for pilgrims who have been at the Aimeer sanctuary, to set up a brick or stone taken from the tomb, near their dwelling, and become saints themselves, and have pilgrimages made to them in conscquence of possessing such a relic. Madhajee and Dowlet Row Sindia, although Hindoos of the Brahmmeal persuasion were remarkable for their devotion to Mussulman saints and customs, and bestowed rich gifts on this tomb, and its peerzadas or at-Jehangeer, the tendant priests. son and successor of the emperor Acher, occasionally kept his court here, which caused the embassy of Sir Thomas Row in 1616, at which period the East-India Company had a regular factory established here. Four miles from hence is a remarkable place of Hindoo pilgrimage named Pooskhur (the lake or tank), and at Nusserabad, fifteen miles distant S.S E. from the city, are the cantonments of a British brigade.

This city was acquired by treaty from Dowlet Row Scindia in 1818. and was found by Sir David Ochterlony in a state of the utmost desolation and decay, but when revisited in 1823, he was surprised at the rapid improvement it had experienced under the management of Mr. Wilder the civil commissioner. Commerce had completely revived, and the population more than tripled since 1818, new houses and shops were daily erecting, under a system of architectural uniformity, making Ajmeer altogether one of the most regular and handsome cities within the British dominions, and externally only second to Jeypoor, on account of the multitude of religious edifices possessed by the latter, the result of many ages. The native population were fully sensible of their own improved condition within so short a space of time, and expressed their consciousness and surprise. velling distance from Delhi 230 miles, from Bombay 650, and from Calcutta 1,030 miles.—(Sir D. Ochterlony, Broughton, Rennell, Fullarton, MS. &c)

Asympte ( drayante the deficult or impregnatio pass).—A town situated near a celebrated pass through the Berar mountains lifty three miles A by E from Agrungabad lat "0" 31 \ lon 75 56'1 The ascent to Ajustee is by a wide and interably well constructed road, protected at the summit by a gateway, leading through a stone fortification that lines the cliff. The town stands on a table lan I two miles distant from the summit and covers a large extent of surface but in it 0 was still thinly inhabited At the northern entrance of the town there is an octaconal seral of a striking appear ance and at six miles di tance there are some Ilindoo care temples resemi ling those of I flora and I lephants, which have not yet been ex plored. (Fallation Lt Bayley 4c)

Areeroo.—A small town in the province of Malwa pergunnah of Dewas which in 16'0 commined 200 houses

Axoax.—A town in Berar twenty nine nules W.S.W. from F litchpoor; lat, £1° 6' \ , ion 77° 11' I...

Aroas a.—A town in the province of Agra, thirty-two miles west from Bhurspoor, lat 27° IG \(\), lon 76° 82° E.

Assaury.—A fortified town in the province of Candelal among the Satpoora mountains, belonging to a petty Raja lat. 21° 45° N., Jon 74° 24° E. Seventy five miles E. froto Broach et a short distance to the north of this place there are passes late the \u00e4sundede and Sultan poor distract.—Alleloom \$\u00f3c)

ANGLOTTA—A town and small district in the province of Beeder bounded by the Scena river The town atands in lat 17° 30° N., ion 76° 18 E., slaty miles N N.E from the city of Bepapoor

Arras —The name of the prin cipal military station in the province of Aeracan, the situation of which has not yet leen fall down in any map

ALAYAMANDA HITER-A sacred river of porthern Illudoutan which apringe from the Himslaya mountains, and Joins the Rhs, waths at Devaprayea the function of the two forming the Cisn ex. A very short distance above Bhadanath the I readth of the Ala kananda does not exceed twenty feet, and further up the stream is concealed under an immense hear of snow, the seembulation of sees Devenrayage the Alakenanda le the largest river, being 142 feet in breadth and if lng during the rains fittr seven feet above its lowest lerel In this over are a great many fit of the tolter species Coppenses destreslates ) four or fire feet in length. which are fed daily by the Brahmins, and some are so tame as to take There la bread oot of the hand also a species of fish named soher six or seven feet long; the scales on the back and skies are large of a beautiful green, and encircled with a white golden border; the belly white slightly tinged with a gold colour ; the tail and fine of a dark bronze The flavour of this fish is equal to its beauty, being remarkably fine and delicate.- (Hoper, de )

ALFOREEK OF HOSAFOSAZ-Scc

ALGLAROS,—A Portuguese for tress to the province of Bejapoor, commanding the entrance of the barbour of Gon, altuated on a point of land to the north of Gon bay

Attawork.—A town belonging to the America of Sinde usery three miles E. by S from Testa lat 24 24 N., Ion 627 137 E. At this place a small branch of the Goonce river is stopped by a mound of earth which separates it from the 2 ukput bunder river.—(Massfeld 45)

ALIOAUM.—A town in Berar are ty-eight miles & W from Ellichpoor, lat 20°26 N. Jon 77° 10'E

Auguur District.-A district in the Doab of the Ganges and Jumna, situated about the 28th deg. of N. To the north it has the district of Merut, or South Saharimpoor; to the south those of Agra and Furruckabad; to the east it has Furruckabad and Bareilly; and on the west, Agra and the Dellii reserved territories The two boundary streams are the Ganges and Jumna, and in the interior are many watercourses or rivilets, which during the iains have a current, but are dry for the rest of the year The northern portion of this district extending, from Alighur to the vicinity of Dellii, is one of the most desolate tracts in the Doab Scarcely a tree is to be seen, but low dark jungle abounds, and afforded at one period a convenient harbour for the banditti that then infested the province country to the southward of Alighur is in general highly cultivated. principal towns are Alighur, Coel, Hatras, Moorsaun, and Anopshehr, and it fell under the British dominion in AD 1803.

In 1815, this district was estimated to contain 1,640,242 pucka begas in cultivation, assessed at 31,49,809 rupees, or one rupee fifteen annas per bega, but the large talooks of Thakoor Diaram were not included, no particulars respecting them being There were also known 1,147,045 begas fit for cultivation, The soil is and 1,188,665 waste fertile and productive under proper cultivation, and the natives a race superior to the Bengalese, and the other more eastern tribes, but until the conquest of Hatras turbulent, predatory, and difficult to govern -(Blunt, the Marquis of Hastings, &c)

ALIGHUR (Alighar) — The capital of the above district, lat 27° 56′ N, lon 77° 59′ E, fifty-three miles north from the city of Agra In 1803 it was one of Dowlet Row Scindia's principal depôts for military stores, and was then stormed by the aimy under Lord Lake, with great slaughter to the assailants. It was soon

after made the head-quarters of a civil establishment for the collection of the revenue, and the administration of justice, subordinate to the Bareilly division

Properly speaking, there is no town of Alighur. Cocl, about two miles distant, is the town and the residence of the civil anthorities. The fort is of a square form with round bastions, a formidable ditch and glacis, and a single entrance proteeted by a strong ravelin. A considerable sum, prior to 1820, had been expended in reducing the rampart and otherwise improving the de-The interior is now cleared of all buildings whatever, and of the public and private buildings formerly occupied by General Perron and his officers not n vestige remains.—(Fullarton, Sc)

Alingan.—A wide valley in Afglianistan, district of Lughman, chiefly inhabited by Ghiljie Afglians, who to the pastoral employment of shepherds unite the predatory yocation of thieves This valley produces grain of all sorts, and has many glens that open into it on both sides, some of which are separated by narrow summits from the adjacent valley of Cooner. When Abul Fazel wrote in 1582, this tract was subject to the throne of Dellu, and emperor Acber — (Elphinstone, Abul Fazel, Sc)

AIIFORA —A town and pergunnah in the province of Allahabad, fifteen miles S W. from Jeitpoor; lat. 25° 13′ N, lon 79° 19′ E.

ALIFOOTA.—A town in Ceylon situated on the top of a hill in a populous neighbourhood, and the principal military station in lower Ouva, lat 6° 54′ N., lon. 81° 25′ E, fifty-three miles S E. from Candy.

ALISHUNG.—A valley in Afghanistan, division of Lughman, at present (1809) chiefly inhabited by converted Caffres By Abul Fazel in 1582, it is described as follows: "The district of Alishing is surjounded by large mountains covered

with snow, in which is the source of the river Ali hung; the Inhabitanta are called Laffres '-(Abul Fasel, Liphentone, dr)

Atheorems a Daood — A small and decayed fort in the listathant prosumer situated on a low hill with a mi eral le village below six miles t.W from the town of Bellary.—(Feliaton)

## ATTAILABAD

A large province of Hindortan proper situated between the 21th and With degrees of north 1st To the north It is bounded by the proxinces of Oude and Agra; on the south by the Hindoo prosince of Gundwana; to the east it has the provinces of Baliar and Gundwans; and on the west Malwo and Agra. In length it may be estimated at 270 miles by 100 the overage breadth At prevent the principal modern geographical and political subdivisions are the following I The district of Allahabad; 2. Benarest L The district of Mirrapoor: 4 The district of Juanpoor; 5 The Reach territory; G The district of Bundelcund ; 7 The disstrict of Campoor; 8 The Manie

poor territory The surface of the province adjacent to the rivers Ganges and Jumna te flat and very productive; but to the south-west in the Bundel cund district the country forms an clevated table-land diversified with hlab fulls containing the dismond mines of Pannah ond formerly abounding in arrong holds. The flat country is extremely sultry and subject to the hot winds from which the mme elevated region is exempted In the corth the principal rivers are the Ganges Jumna, Goomty, ond Caramnaesa and their branches besides innumerable smaller streams In the fully country the rivers are fewer the periodical rains and well water being chiefly relied on for agricultural nurposes but, upon the whole Allahabad may be reckoned one of the richest and most productive provinces of Hindostan

The principal exports are snear, cotton indice, cotton clotta optium, salipter diamonds. Ac The Imports are values salt from the manilme parts of Bengal being one of the etaple oricles in regular demand Within the limits of this province are many large annent and celebrated towns such as Benare. Al lahalad (twi holty places of pilgrimage), Calinjer Chatterpoor Juan poor Virzapoor, Chonar, and Ghaspoor The population is very great in the proportion of about one Mahometian to acrea Hundoos

We learn from Abul Fazel that the terntory composing the modern province of Allahabad was invaded so carly as A D 1070 by Sultan Mah mood of Ghlem, who made a few compulsory converts to the Mahomedan falth Ha returned again in 1023 but made no permanent esta I lahment. It was afterwards wholly sulalurd by the Patan emperors of Della and during the lifteenth century formed thobasis of an independent kingdom the capital of which was Juampoor Along with the other Patan districts it devolved to the Mozuls, an I was formed into a distinet soubsh by the Liperor Acher. who new-named the llindoo sancturry (or pravaga) Allahabad an appelistico whileh it still retains. After the fall of the Mogul dynasty, the northern quarter was appropriated by the shohs of Orde but in 1764 borsh and Allahabad were ceded to Shah Allum the then nominal and fugitive sovereign of Delhi through the interference of Lord Clive with Shuja-tid Dowlah, tho Nabab of Oude In 1772 they reverted to the latter, when that ill-advised monarch (Shah Allum) of his

custody of the Mahorattas

In 1775 the Bengal government
nequired the Bengares districts by
treaty with Asoph-aid Dowlah and
Allahabad and the adjacent districts
in 1801, by cession from Sandet All
his successor on the throne of Oude
The south-castern districts were re-

became an engine of mischief in tho

ceived from the Mahratta Peshwa in 1803, in exchange for an equivalent tract in the Carnatic above the ghauts and in Gujerat—(Abul Fazel, J. Grant, Fifth Report, Ironside, &c.)

ALLAHABAD DISTRICT -This judicial subdivision is mostly composed of territory immediately adjacent to the city of Allahabad, and is intersected by the great rivers Ganges Jumna, but the geographical distribution is ill-arranged, as some portions are ninety and one hundred miles from the residence of the ma-The soil when properly cultivated is remarkably fertile, and yields large returns to the husband-Wheat is the principal crop, and the land most favourable for its production a rich sandy loam, which is a very common soil in this vicinity. During the dry season the land must be artificially watered, which is a much more laborious task than the cultivation. Four bullocks and three labourers are with difficulty able to water an acre in nine days; the average crop is reckoned fifteen maunds per bega, or about seven quarters per acre Barley, peas, oil, seeds, and a yellow dye are often mixed with the wheat. The average rent of wheat land is about one pound sterling per acre

In this district the breed of sheep is small even for India, and the fleece consists of a coarse black wool, or rather hair, altogether unsuitable for cloth, but which answers very well for the manufacture of shepherd's rugs. The usual dress of the peasantry is mcrely a piece of coarse cloth tied round the middle, one blanket, and a sort of turban made of a cotton clout, these three articles composing the sum total of their wardrobe The internal commerce has progressively increased since 1801, and the culture of many articles, especially indigo and cotton, very greatly augmented, on account of the increased and increasing demand from Europe.

In every subdivision there is a small trade of cloth, grain, and other

home productions. In the towns of Currah and Shahzadpoor a considerable quantity of cotton cloths and chintzes was formerly manufactured for exportation, but now it is much reduced. In Allahabad and Futtehpoor advances are still made for the species of cloth named baftaes and The transit commerce sullums. through Allahabad consists mostly of Sambher salt, cotton, unwrought iron, and shawl goods, which, after supplying local consumption, are forwarded to the lower provinces. Prior to 1802, a considerable commerce was carried on at Phoolpoor, in pergunnah Secundra, to the north of the Ganges. The commodities circulated were salt, cotton, iron, drugs of various kinds, copper, zinc, lead, broad-cloth, and other articles of Bengal, but the traders then were so much oppressed by the Nabob of Oude's officers, that they retned with their capital to Muzapoor, and other places of greater security Shahzadpoor and Phoolpoor are still much resorted to by traders from the Nabob of Oude's reserved dominions, and until 1794, while the cloths manufactured in the Doab were much in demand for the European market. many mercantile houses were enabled to invest from fifteen to twenty thousand rupces monthly, in the aiticle of cloth alone. Since that time the cloths termed sullums, baftaes, Shahzadpoor chintzes, and the red kurwa, have been most in demand.

The revenue settlement originally formed here, in the fusly or financial year 1216, underwent two subsequent revisions:

In 1216 (A D. 1809-10) the terms were .....Rupees 2,590,806 1217 ...... 2,667,614 1218 ...... 2,682,084

1219 (provisionally and

In perpetuity) ..... 2,713,081
Although this settlement exhibits on the face of the account a progressive increase, it greatly falls short of the jumma or assessment to the land revenue which the district was expected to yield on its first acquisition. This has been attributed to mistaken

zeal on the first introduction of the Bestlds government, ly immediately carrying the asses ment to the inghest point which the land was capable of sustaining The fatal results of this inconsiderate arrangement in the first instance, were remissions and irrecoverable balances to a large amount, and a sudden fall of the resenue at the formation of the second settiement Added to these exile were numerous transfers of estates by public and private sale amounting in some perguenahs to a total devoiution of the principal and most va justle portion of the district fato the hands of the actual tehvildars or subordinate revenue officers great sliock was in consequence sustained by the credit of government, from such persons having been allowed to pervert their official influcoce and the old proprietors del not disculse their Lopes of recover Ine their estates by the termination and autrersion of the British pre dominance

On the formation of a subsequent settlement measures were taken iv the commis seners Sir Ldward Colebrooke and Mr Dean for cancelling a great number of these illicit and fraudulent tronsfers leaving the par tles should they consider themselves wronged by this proceeding to establish their elalous in a court of justice but the relief thus afforded bore a small proportion to the extent of the greener In the Allahabad district the russed or progreesively increasing Jumma, originated probably in the efforts of the local revenue officers to corry the assessment to the highest practicable pitch hoving in their view the per petuity of the land-tax at the ex ration of the lease It would, however have proved more conducive to the prosperity of the country and ultimately to the improvement of the revenue If the landholder had et the commencement cajoyed the full benefit of a moderate and equal assessment, under the temporary settlements

In every district subordinate to

the British authority throughout Hindortan the state of its police is the next important feature of its hi tory, and its gool the most in posing edifice in the Allahalad in risdertion forty six gang rot beries were committed during the year 1811; but this effence dal not generally pressil being of much more frequent occurrence in the police stations which are not strusted within the Doch Int he immediately on the borders of the Oude reserved territories or subscrat to the then independent and turbulent state of The two pergunnshs his ilcwsh which gang robberies are still most frequent are becundes, situated ou the north side of the Ganges, near the Sabob of Omle's deminions and Rarah, situated to the south of the Ganges contiguous to the ilewali country With to peet to the first. it was clearly ascertsmed, that nut one of the perpetrators lived in thu Allahabad district the otrocities hor ing been committed by a jun little residing within the Oude boun laties and in the la t the depredators look cil for an avylun and market for their booty in Hensh In some in stances these crimes were committed ir ousted remindars whose estates had been sold, and were actuated by malice against the purchasers though many applications had been made to the ileash ilajs for the opprehension of the cruninals no steps to effect that object were taken or probably letended by that potentere

The pasces or village watcharen had long been suspected of not perform Ing the functions of their office with either honesty or violence and in 1812 were discovered to be a most nomerous class of thieses in the disin that year an affray of con aiderable magnitude touk place res perting disputed bounderies, in which although the land in dispute amount ed to only four begans (or one acre and a-third), 900 men belonging to different villages were engaged this occasion 130 were seized and sent to the engistrate for exemination but it may be much daubted whether the seizure of so many persons is likely to restore good order, or whether so satisfactory a result can be expected, as shall compensate for the time the magistrate must devote to it, to the serious prejudice of his other duties.

In 1815, the inhabitants generally evinced great hostility to the introduction of the chokeydary system (an improved establishment of watchmen), and no respectable inhabitant came forward to receive sunnuds. The class denominated Praguals, who perform the religious ceremonies at the function of the great rivers, to the number of four or five thousand, shewed a determination to resist, threatened to cease to officiate, and withdraw altogether, which would have caused a loss to the government of the pilgrim revenue. Many other conspiracies to ariest the progress of the arrangements took place, but by patience and firmness were ultimately dissipated or suppressed. In 1815 this district was found to contain 1,655,106 small begans in cultivation. assessed at 2,793,244 rupees, or one rupee eleven annas per begah, which revenue was realized The number of begahs fit for cultivation was 395,012, and 1,109,777 were waste This settlement was made with 1811 engaging proprietors, and sixty-four farmers of revenue -(Public MS. Documents, Si Henry Wellesley, Tennant, Gutthrie, Fortescue, Lowther, &c)

ALLAHABAD.—A fortified town in the province of Allahabad, of which it is the capital Lat. 25° 27' N., Ion 81° 50' E The fort is placed at the distance of a quarter of a mile on a tongue of land, one side being washed by the Jumna, and the other approaching near the Ganges lofty and extensive, and completely commands the navigation of the two rivers; indeed, there are probably few buildings of equal size in Europe Next the two rivers it is defended by the old walls, beautifully built of polished free stone with scmi-circular bastions at intervals, having cannon

The third or land-side is mounted perfectly regular, and very strong, consisting of three ravelins, bastions, and a hulf bastion. gateway is Grecian, and elegant The government-house is spacious and cool, and has some large subterranean rooms overlanging the river. the angle is a square, where Shah Allum, when he resided here, had The military cantonhis scragho. ments stand at some distance from the fort and the houses occupied by the civil functionaries apart from To an European army a reboth. gular siege would be necessary, but to the tactics of a native army Allahabad is quite impregnable, and has in consequence been selected as the grand military depôt of the upper The most remarkable nrovinces buildings in the neighbourhood are the serai and mausoleums of Sultan Khusro and his mother, the Chalces Sittoon (forty pillars) being no longer in existence. A short distance above the town the government has established a gunpowder manufactory. Up to 1803, the sum expended on the fortifications was twelve lacs of rupees.

The situation of Allahabad being alike adapted for the purposes of internal commerce and defence, must have early pointed it out as an eligible spot for the foundation of a city, and most probably it is the site of the ancient Pahbothia In modern times, from its geographical position, it appears well calculated to be the emporium of Oude, Bundelcund, and Bogalcund. It formerly ranked as a considerable mart for the cotton of the Deccan, and of the countries to the south of the Jumna: but owing to the extortions practised on the merchants by the native revenue officers of the Oude government, the trade gradually resorted to Mirzapoor, and abandoned this poit although so eligibly situated. Ninetenths of the present native buildings are of mud, raised on the foundations of more substantial buck edifices, which have long fallen to decay 1803 the inhabitants, exclusive of the garrison, were estimated at 20,000

persons. Much of the soil in the immediate vicinity consusts of brack dust, martar and broken pottery. The Ganges here is about a mile broad, and does not appear much augmented by the tribute of the Jumna nithaugh the latter is 1,400 and 1,400 an

yards across By the Brahmins Allahaliad is coll ed Bhat Praya, or by way of dietinction as it is the largest and most haly, is simply designated by the name of Prayaga. The other four Prayagas, or sacred confluences of rivers (called sungams in the south of India) are situated in Gurwal, at the junction of the Alseansnila with other streams and are named Deva prayaga, Iludraptayaga, Carnapra Nandaprayaga. yaga, and prayage of Allahisted owes its ec-lebrity to the junction at this spot of the Ganges Jumna and Screswatl There is no such river as the last now vaible in the neighbourhood, but the Ilindans assert that It Joins tha other two underground, and that consequently by bothing here the same religious ment la acquired as If the peortent had bathed in the whole three separately When a pil grim arrives here, he sits duwn on the brok of the river, and has his head and body shaved sa that cack hair may fall into the water, the sacred writings promising him one mil bon of years residence in heaven for every hair thas deposited, After shaving he bather and the same day, or the next, performs the obsequies of his deceased ancestors The tax accruing to government for permismon to batha is only three runces each person, but a much greater ex nense is incurred in charity and cafes to the Brahmins who are seen sitting hy the river side Many persons renounce life at this haly confluence, by golog sn a boat after nerfarmance of certain solemnities, to the exact spat where the three rivers unite. where the devoteo plunges into the stream with three pats of water tied Occasionally olso somo to his body lose their lives by the eagerness of the devotees to rush in ood latha

at the mort sanctified spot, at a precise period of the moon, when the explation powerses the highest efficacy. The Bengalese usually perform the plerimages of Gay Iteneres and Allahabad In one journey and thereby sequire great merit in the estimation of their cunstrymen.

So great n con, regation of people as met in 1812, m the melah or Edir, had not necurred for twenty-eight year, on which account many precautions became necessary to preserve the lives of the pilgrams from the effects of their own meomisferalo ardour la 1815-16 the gross collections were only 79/77 propersy elarges and commission, G720 rupers pet collections Yeal States.

Alishabad is the permanent station of the sudder commission a body of Judges whose office is the same with regard to these provinces as that of the Sudder Dewanny Adam let in Calcutta for the mare eastern portlans of the empire the remateness of the first, very great frauds and extortions had been com mitted by the native agents of the local courts mostly Bengalese who by the influence of their stations had engrossed much of the landed property This commission has suceccded in recovering many of these frandulent acquisitions to the rightful heir This court makes circuits during the months that permit travel ling generally pitching their tents near towns, and holding their courts under trees, an arrangement extremely agreeable to native prejudices, especially those of the lower classes, who always feel afraid and under a constraint in a house, particularly if furnished after the European fashion, where they can neither tell their story well or attend to what is going on

The great emperor Acber was always partial to Allahabad, and was the founder of the modern city, intending it as a strong-hold to overawe the surrounding countries, for which purpose, from local circumstances, it was well adapted. 1765 it was taken by the British army under Sir Robert Fletcher Following the course of the river Allahabad is 820 miles from the sea, but the travelling distance is only 550 miles, from Benares, 53; from Lucknow, 127, from Agra, 296, and from Delhi 212 miles —(Lord Valentra, Public MS Documents, Sir Henry Wellesley, Ward, Tennant, Fullarton, Rennell, &c)

ALLAMBADY.—A town in the Mysore province, seventy-four miles E.S E from Seringapatam.

ALLAND.—A town in the province of Beeder, twenty-three miles N. by W. from Calberga, lat. 17° 30′ N., lon. 76° 41′ E.

ALLAS (Straits of) —This channel separates the large island of Sumbhawa from Lombook Isle, and by the natives is called Gilleesee. In extent it is about forty-five miles, and forms the safest and most convenient passage to the east of Java through the Sunda chain of islands. On each side there are soundings where ships may anchor with moderate tides when necessary, and the plantations and villages on the Lambook shore, which is low land, afford ample supplies of refreshment.—(Thorn, &c.)

ALLESTAR.—A populous town in the peninsula of Malacca four hours pull up the Queda river, situated two or three leagues up a river, and in 1785 the residence of the king. In

1823 it contained 2,000 houses; the inhabitants consisted of Chuleas, Malays, and Chinese, the latter having a temple.—(Dalrymple, Haensel, Anderson, &c.)

ALLOWALLA —A petty Seik state in the north-eastern quarter of the province of Delhi, which in 1824 was held by Futteh Singh, a powerful chief, much in favour with Runjeet Singh of Lahore, and possessing lands on both sides of the Sutuleje.

ALLUMPARVA.—A small town in the Carnatic, twenty-five miles N. by E from Pondicherry, lat 12°15′N, lon. 80° 2′ E. It was taken from the French by Col. Coote in 1760.—(Orme, &c)

ALLY (or Ally Mohun).—A town and small principality in the province of Malwa, district of Rath, situated about twelve miles north of the Nerbudda, lat 22° 5′ N., lon. 74° 18′ E. In 1820 this petty state comprehended 176 towns and villages, which yielded a gross revenue of 30,000 i upees. The jungles of Ally and Mohun are wild, thinly inhabited, and extremely difficult to penetrate, on account of the badness of the roads and scarcity of water, and were formerly considered one of the defences of the adjacent province of Gujerat. -(Malcolm, Burr, &c)

ALLYGUNGE (Aligany)—A town in the province of Bengal, district of Purneah, forty miles N N E from the town of Purneah; lat. 26° 16′ N, lon. 87° 38′ E.

Almora.—The modern capital of Kumaon, built on the ridge of a mountain 5,337 feet above the level of the sea, ninety miles N. by E. from the city of Bareilly, and about 106 miles travelling distance N.E. from Moradabad, by the route of the Bamouree pass and Rampoor; lat. 29° 35′ N, lon. 79° 44′ E.

This is a compactly-built town, consisting of a single paved street, fifty feet in width, three-fourths of a mile long, crowning the sharp ridge of a mountain, and is by far the most considerable town, indeed

the only considerable one, in the newly-nequired British possessions in northern lindosten The houses ore built of atooe slated and generally two, some three stories high the ground floors occupied or shops, and open in front, while the upper stones are faced with a frame-work of wood occasionally carred and painted, supported on the projecting aide walls below The population of Almora does not correspond with its externsi oppearance, ot least in 1810, many of the largest dwellings wero without ony ascertained or bond fide proprietor and had fallen into the hands of persons who had no jost claim to them Small stocks of straw are piled up on the aloping roofs as Winter provender for the cattle.

The old Gorkha citadel built of stone, standa en a commondine point of the ridge at the eastern extremity, and several martello towers have been crected on peaks to the eastward A new citadel, named Fort Molra in the form of a parallelogram with aix bastions, has been constructed on a small connence at the western ex tremity of the town All these defences, however, being built of the loose micaceous schistus which composes the entire hill of Almora ond most others in its viennity, their duration is not likely to be remork Indeed, in 1800 a party of exports and miners were sent to destroy the works and dismantle the fortress The surrounding country is remarkably bleak and naked scarcely a tree being seen within o circuit of four miles from the walls. Almora wos acquired by the Gorkhas in 1790, who were expelled by the British In 1815 of which date the schabitants were mostly foreigners emigrants from the low londs - (Pullarton, Raper, F Buchanan, Public MS. Documents de)

ALOGA.—A lorge rregular village in the Carosine, datrict of Nellore seventeen miles N W from the town of Nellore lat. 14° 40 N., lon 80° 3′ En the viceouty there is a fine reservour and o small hungalow.

where European travellers may be occommodoted

ALOYE.—A small town ond per gunnsh in the province of Molwa belonging to the Rajo of Dewnas, obout twenty-one miles distant from Mishidpoor, lat 21° 40 N, ton 78° 7° E In 1820 the town contonned 400 and the pergannol 2,316 houses of which forty-seven were inhobited by Mahomedans and 2,200 by Jim doos totol population 11,580 souls,—(Malcolm, 4°)

Aloneness.—A town in the provioce of Allahobad, twenty two miles NW from the city of Allahabad, lat. 25° 34 N, lon. 81° 31° E

Alouroon.—A town belonging to Ilolear in the province of Allahabad, thirty miles N.E. from Dittenh, lst 26° 3′ N, lon 78° 45′ E

ALVAR (Alur or Mocherry) -A. principality in upper Iliodostan, mostly attraced in the north western quarter of the Agra province, between the 27th and 28th degrees of north longued. In the Mahomedon histotres it is occasionally nomed Mewat, and its iohabitants Mewatics, olthough this appellation ought to hove been restricted to the more therish portion of them Alvar proper is o killy and woody tract, lying on the south west of Delhi and to the north-west of Agra, confining tho low country slong the western aldo of the river Jumna. Although this country is situated in the centre of upper lindoston and within twentyfive miles of Delhl, its inhobitants hove olways been described as singu lorly sovage and brutol, and robbers by profession, never to be reformed or subdued in this last capacity, under the name of Mewotics they were formerly taken into the pay of the native chiefs on occount of their expertness in the orts of desolution. for the purpose of more effectually ravaging any country which hoppened to be the seat of war

Io modern times o new potentate has onsen named the Macherry Rajo, within whose sway Alvor and several 38 ALVAR

adjacent districts, equal to about 3,000 square miles, are now comprehended, but greatly intermingled with those belonging to the British government, and to contiguous native chiefs. The chief towns in his dominions are Alvar, Macherry, Tejarah, Rajghur, and Alinuggui or Ghosauly. cherry gives its name to the principality, and its chief is thence called the Macherry Raja, but Alvai or Aloor is the real capital. Tejarah was formerly the capital of Mewat, and, like all other old cities, had several pergunnahs annexed to it. is now in rums, but the fort is kept in repair to curb the depredations of Ghosauly is a large the Mewaties town, whose fields are irrigated by water-conduits from the Laswary river. Six miles west of that town a new fort has been erected by the Raja, named Govindghur.

The Laswary river has its source in the Macherry country, about four miles west of Niranpoor, from whence it proceeds through Acberpoor ghaut, by Mahoor and Bambolee to Laswary Near Malpoor an embankment has been constructed across the bed of the river, and the current is conducted by numerous watercourses to the interior of the Raia's country The former direction of the Laswary stream was by Neano and Ketwarec, through the Ploundah pass to Koh, where it was lost; but it now soldom passes Decg, and could never, except during uncommonly heavy rains, have reached Bhurtpoor. In November 1806, the stream of the Laswary was only one foot deep, and the Macherry Raja being desirous of monopolizing the whole, without allowing any to proceed to the Bhuitpoor country, a dispute ensued, which could only be amicably adjusted by the interference of the British govern-

Row Raja Pertaub Singh, the father of the Raja who reigned in 1805, was a subject of the Jeypoor Raja's, and his manager at Macherry about

ment. Considering how hilly a large proportion of the Macherry terri-

tories are, they are tolerably well

cultivated

the year 1780 He subsequently 1e volted from his master, and obtained a grant of lands in the Jeypoor country from Nudjiff Khan, with the title of Row Raja. When Nudpff Khan was engaged in a war with the Bhurtpoor chief, Pertaub Singh wrested Alvai, the present capital, and other districts, from the Bhurtpoor state, and added them to his own. Some time after he quarrelled with his patron Nuduff Khan, and was deprived of all his possessions except the fortress of Luchmenghur, where he was besieged by Nuduff Khan, but saved by the approach of the rainy season; and the latter, whose hands were always full of business, being called elsewhere, Pertaub Singh remained in the government. After that period he maintained his station by tcmporizing with the strongest party. In 1805 his revenues were estimated at seven lacks of rupees, and it was then said he discouraged cultivation that his country might present fewer temptations to invaders; and to augment its difficuties, built several forts. Latterly his policy has been quite the reverse, for in 1823 his country presented a most flourishing appearance.

In 1803, a treaty of alliance was concluded by Lord Lake, on the part of the British government, with the Macheriy Raja, by the conditions of which he was taken under its protection on the usual terms, with which he seemed well satisfied, as throughout the hazardous and energetic campaign of 1804 he continued faithful; for which, in 1805, he was rewarded by a considerable addition of territory, mostly resumed from the Bhurtpoor Raja as a punishment for his

treachery.

The second range of mountains, commencing on the west of Padshapoor to the Acberpoor Ghaut, beyond Alvar, is inhabited by Mcwatics. Tejarah was the ancient capital of the Mcwat country, which contained many pergunnahs, equivalent to an area of about 1,952 square miles. Of this space, in 1807, about 465 belonged to the British, 263 to Ahmed

Buksh khan 301 to the Bhartnoor Roja and 921 to the Hoja of Ma cherry On account of the turbulent disposition of the inhabitants the infloence of any chief over them was very feeble and the authority of the Macherry Raja was but little sttended to 10 1807, the predatory incursions of the Mewaties into the British territories became so daring and frequent that no person could star out of the military contonments at Hewary without an escort and the high road from Delhl ond Rewary was no longer practicable for the merchant or traveller uoless protected by o strong guard. A band of these ma randers bero named Cozaula had the boldness to attack the town of Rewary, although within three miles of the military cantonments, where three battalions of iofantry were osu ally stationed; but the plunderers being all mounted infantry however active, could not prevent their escape.

Owing to the physical nature of the Mewst country jangly, hilly, and abounding with defiles and fastnesses, the externation of these was likely to he a work of great difficulty If at all practicable. It became therefore. extremely desirable to endeavour to cradicate the cvil by measures of a conciliatory nature for these people, although from time immemorial nddicted to robbery and habits of plunder were known to be generally faithful when relied on and trusted During the power of the Delhl throne ond ofter its decline, the only measures adopted to curb the Menatics, were the utmost severity barshness and crucity In order to distress them thay were prohibited from cul tivating the vallies where alone they could procure food and their umplements of husbandry were seized ond destroyed They were also when apprehended subjected to the most cruel punishments and frequently experienced the doom of heing im mured alive between four walls a practice which prevailed greatly dur ing the Gallo-Meharatta power but with such little effect that while these districts were under the charge of M

Perron, he maintained in them for five months of the year from two to five battalions of his troops besules schundies, a species of local militia. This system of terror as might have been expected wholly failed for not withstanding the impending tortures that threatened them the Mewaty outrages continued to increase ond the peaceful part of the community were kent in o state of unceasing alarm and onxlety In 1807 a correspon denco was opened with some of their chiefs by Mr Seton then resident ot Delhi and some measures of a mild conciliatory nature adopted towards the Mewaties, which although they did not entirely extinguish, so much repressed their habits of ranine that we now comparatively hear but little of them

In 1808, o dispute crose between the Rajas of Bhurtpoor and Macherry relative to an embankment maintaloed is the country of the lat ter, which prevented the flowing of the Laswary river into the country of the former and consequently im peded the cultivation of certain lands belanging to the Raja of Bhurtpoor which depended on that source for irrigation On this occasion that British government, no the friend of both parties interfered and required the Macherry Raja to open the crubankment in conformity with his en

cagement la 1805

In 1811 the reigning Raja of Macherry was afflicted with a mental derangement which ofter some time subsided but was ofter a short period succeeded by a most unfortuoate disposition to persecute his Mishomedan subjects manifested by the most wan ton acts of crucity and outrage The resident at Delhi on hearing of these praceedings, adverting to the political relations subsisting between the Raja and the British government thought nt bis duty to address several letters of expostulation on the subject to the Raja, but these not having the desired effect Lord Minto then governor general was obliged to interfere Confidential persons (natives) were la consequence desnatched. 40 ALVAR.

to Alvar, to ascertain the real condition of the Raja's mind, which was apprehended to be still not quite free from insanity. From their researches it appeared that certain Maliomedan devotees had been mutilated by the Raia's order, and that several tombs and places of worship had been destroyed, which act this chief attempted to justify by recriminating on the Mahomedans, that they had destroyed Hindoo images and temples. After mutilating these devotees, the Raia was siezed with a desire, no less savage than curious, of sending their noses and ears to Ahmed Buksh Khan. the chief of Ferozepoor, a most meritorious partizan of the British government: who on receipt of the pot containing the fragments, very properly forwarded it to the British resident at Delhi Besides this notable exploit, having demolished a number of the most revered Mahomedan tombs, he loaded a multitude of asses and bullocks with the bones and ashes, had them transported out of his country, and ordered the sacred stones of the mosques near Alvar to be smeared with oil and sindhoor.

The British interposition on this occasion was exerted in so judicious a manner, that the Raja was induced to revert to the unqualified toleration existing in his country before the perpetration of the late acts of vio-It was, however, determined that the Raja's general conduct should be observed, as it concerned the general interests of humanity, as well as the credit of the British government, to prevent the repetition of such barbarities, which were calculated to excite a spirit of sanguinary animosity between the Mahomedans and Hindoos, and create disturbances of all others the most liable to contagion, and in their result the most difficult to quell The interference on this occasion was authorized, both by the great extent of country that had been bestowed on the Macherry Raja by the British government, and by the continuance of its powerful protection, which had preserved his dominions from the dreadful evils

that had befallen the neighbouring principalities of Jeypoor and Joudpoor. As illustrative of native politics it may be mentioned, that along with the confidential agents, it was necessary to send an emissary well acquainted with the Raja's person, as otherwise his ministers, with the view of concealing his derangement, might have recourse to the artifice of substituting some other individual, not unlike him in stature and general appearance, the success of which would be favoured by the darkness of the apartment.

The above acts of religious frenzy were not the only measures which brought the intellectual restoration of the Raja under suspicion; for towards the end of the same year, he had the gratutious folly to become security to the Patan chief, Mahomed Shah Khan, on the part of Khooshaly Ram (formerly prime minister to the Raja of Jeypoor) for the payment of one and a half lacks of rupees per month, on account of a body of troops, to be furnished by the former to the latter for the service of the Jeypoor state, until the expelled minister (Khooshaly Ram) should be again placed at the head of affairs. This transaction was totally incompatible with the spirit of the relations subsisting between the British government and the state of Macherry, by the conditions of which the British government, having guaranteed the integrity of the Macherry dominions. the latter was placed in a state of dependence, and virtually precluded from interfering in the concerns of other chiefs and states, unless with the consent of the protecting power. For it appeared evident, that if the Raja were at liberty to contract engagements with foreign powers, or concern himself in their disputes and intrigues, the British government might be involved in serious political altercations, and eventually placed in a hostile attitude by the uncontrolled acts of the Raja Situated as the parties were, the duty of protection necessarily implied a right of control over all proceedings of the

pretected party which might intre of ten lency to compel the active ever care of that duty; and it was wholly inconsistent with the calcular poblic cal relations, that a dependent state should be at liberty to form engagements with other powers and to transfer the guarantre of the protect ing power to concerns to which it had not participated

By this act of the Baiz, he piedged the security of the British govern ment to the agreement between Khooshaly Ram and Mahomed Shali Khan thereby rendering it an instrument of public evil, and of injestice to a friendly state, or forced it to engage in a caose of doobtful enoity and unprofitable exertion, since in the event of the Itaja a disincimation or inability to fulfil the obligations he had entered Into (a circumstacre not jess probable than the failure of Khooshaly Bam in the performance of ills engagement), the Patan chief would naturally be disposed to enforce the satisfaction of his claim In this event the interference of tho Botish geremment would become necessary, either to compei the payment of the money, or to protect the Raja against the arms of the claimant, and it would thus here been compelled, through the felly of the Rajs either to cootribute to the support of a military Paten adventurer, alming at the subjugation of a friendly state or to employ its forces in a cause of dublous jostice where its interests were in ne manner concerned

This preposterous engagement, as might have been foreseen, was subsequently broken, and the agent of Mahomed Shah Khen, residing of Delhi, eppealed to the resident for the recovery of the sum due te his master for the time that had classed: but the application was immediately rejected ood the chief informed, that the original engagement was eltogother incompatible with the political relations subsisting between the blacherry Raja and the British govern ment With the view also of prevecting in future a similar miscoe ception of his duties, and to render

more clear the treaty of 1803, a positive engagement was procured from the Rajs, in 1812 lunding him self not tu enter into negocistions. or conclude arrangements of nny kind with foreign powers, without the knowledge and consent of the British government previously obtained. times still more recent, the Rays finding himself in the ricinity of the Jeypoor state which was tern by civil faction and external warfare. endeavoured to avail himself of its micfortunes, and to aggrandize him self at its expense lie in consequence seized on some forts end villages a but the British government Interfered and oldiged the intruder to restore what he had taken; and symptoms of heutation appearing, he was fined for delaying instant olulience to the order, - (Public MS Documents I lent 11 hite Archibal ! Scios Meteolfe, Rennell, &c )

ALYAN (Alor) — A large town in the province of Delhi the capital of the Vischerry Rajo's dominions; lat 27°41 N., ion, 70°32' E., seventy five miles 5 5 W from Delhi This place is situated of the base of

a steep hill, and is strongly fortified and on the summit of the hill, shout 1,200 feet high, is a fortress which contains several tanks. To the south of the town there is a small shallow feel. The Viachery Raja generally resideshere, but his family at Hajghor e strong-hold attuated at the re-entering angle of some mountains the top of which is also fortified. The adja-

ing angle of some mountains the top of which is also fortified. The adjacent bills and peaks do not exceed 1 000 feet in height.—(Lieut 11 hite, James Fraser, &c.)

Atvancest.—A town in the Car natic district of Tionerelly, suxty mine miles N E from Cape Comerin, iat. 8° 51' N., Ion. 76° 14 E

AHAIN.—A town ie the Agra province south of the Chumbul, forty-one mules E from Gueller; lat. 20° 20' N., Ion. 78° 40' E

Anawarose.—A considerable military stetice in the island of Ceylen, tweive miles travelling distance from Candy; lat. 7° 15′ N., lon. 80° 45′ E. The fort here stands on the top of a precipitous hill 2,000 feet above the level of the sea, and at its base are the cantonments, barracks, village, and bazar.—(Davy, &c)

AMARAPURA (the city of immortals), a city of India beyond the Ganges, and during the reign of Minderajee Praw the capital of the Birman empire, lat. 21° 55' N., lon 96° 7'E. It stands on the banks of a deep and extensive lake, about seven miles long by one and a half broad; when filled by the periodical rains, the lake on one side, and the river on the other, form a dry peninsula, on which the city is placed. On entering the lake when the floods are at the highest, the number and variety of the boats, the great expanse of water, with the lofty surrounding hills, present an extraordinary sight to a stranger.

The fort of Amarapura is an exact There are four principal gates, one in each face; and there is also a smaller gate on each side of the great gate, equidistant between it and the angle of the fort, comprising twelve gates in all. At each angle of the fort there is a large quadrangular bastion, which projects considerably; there are also eleven smaller bastions on each side, including those over the gateway tween each of these bastions is a cui tain, extending 200 yards in length; from which calculation it results that a side of the fort occupies 2,400 yards. The ditch of the fort is wide, and faced with brick; the passage across is over a causeway, formed by a mound of earth, and defended by retrenchments. The rampart, faced by a wall of brick, is about twenty feet high, exclusive of the parapet, which has embrasures for cannon and apertures for muskets, the body of the rampaits is composed of earth, sustained within and externally by strong walls Small demi-bastions project at regular distances; the gates are massive, and guarded by cannon. This fortress, considered as an eastern fortification, is respectable, but insufficient to resist the approaches of an enemy skilled in artillery tactics. From the height and solidity of the wall the Burmese consider it impregnable, although a battery of halfa dozen well-served cannon would breach it in a few hours. The southern face of the fort is washed, during the rainy season, by the waters of the lake, and the houses of the city extend along the bank as far as the extreme point of land.

In Amarapura there are but few houses of brick and mortar, and these belong to members of the royal family. The dwellings of the chief persons are surrounded by a wooden enclosure, and all houses whatever are covered with tiles, and have in the ridge of the 100f earthen pots filled with water, in readiness to be broken The splendour of should fire occur. the religious buildings is very striking, owing to the unbounded expenditure of gilding which is applied to the outside of the roofs as well as within. and must absorb much bullion gold leaf used is exceedingly pure, and bears exposure to the air for a long time without suffering injury. These edifices being generally composed of wood and other perishable materials, their existence is not of long duration. Contiguous to the foit is a small street, formerly entirely occupied by shops of silversmiths, who exposed then ware in the open balcony, and displayed a great variety of Buman utensils, but when visited by Captain Canning, in 1810, the greater part of these shops had disappeared, and on the 28th March of that year the entire city and fort, including all the palaces and about 20,000 houses, were destroyed by fire The pudigaut orroyal library is situated in the northwest angle of the fort, in the centre of a court paved with broad flags. The books are kept in wooden cliests curiously ornamented, about 100 in number, and well filled. The greater part concern divinity, but history, music, medicine, painting, romance, and mythological fable have also their separate volumes. Across the lake

there are extended fields of wheat which grain in 1705 was sold in the city at the rate of one tical (&. G.) for fifty-six pounds weight and equal to quality to the finest in Lacland.

Amarquera is subditeded into four distinct subordinate jurisdictions in each of which a Vlaywoon predder This officer, who in the province is a viceroy in the capital performs the functions of a major and holds a civil and craninal court of justice in capital cases he traosistis the evidence with his of into in writing to the lotoo, or gras i chamber of consultation, where the council of state assembles. There are regularly established lawyers who conduct causes and plead befure the fotoo, for which their usual fee is stateen spillings.

This city was founded by the Bur mete mooarch Muniarajee Praw so recently as 1763, about an miles cast of Ava, the ancient capital; but was latterly abandoned by him through some unarcountable caprice for some sterile sand-banks seven miles further un the stream of the Irawady Boildings in this country are wholly composed of wood and lumboos and the river presenting convenient water car rage a capital is soon created, and increases with incredible randity About AD 1800 its population was estimated by Captain Cox at 175,000 and the houses from 20,000 to 2, 000; but the seat of government having been transferred lack to Ava io 1810 by the present king at a population and importance must have diminished in proportion Indeed the embassy in 1827 del not estimato its inhabitants at more than 10 000 persons

Brery Iuchty being supposed of communication may be held between the British fromiter and the capital of Avo in twelve or function days, reto Shembeghewn two days; thruce to Armacan eight days; total twelve days. There is onother road from Armacan to the Arm territories, which branches off of Padang o town situ ated on the Immanly about ten days' jaurney above Rangoon — (Symes, Low Consider Law find & C.)

AMPANOMATY.—A pass from the Concan province on the west coast up the Western Glusts or chain of mountains to the interior 3 lat. 17° 1' A. Ion 77° 20° P.

Awasan a — A fortin the province of tumbs an sitosted on thill, at the base of which is the town and surrounded by jum, let o a considerable distance; but on the south and east sides, in its immediate vicinity there is a cultivated valley half a mile broad, it was captured without bloodshed in 1816

The Golur and Holur tribes are numerous in the district sent of hag poor but have their abodes mostly in the Putlar, a stony portion of Amighur, and in the jungles of Hampylo and Salangury. They are a their hydradering tribe but perfectly under the control of their nalls or chiefe and are never troublesome when the latter are concinited. They speak the Canarese language but have no tradition respecting their original expustration—Jenkins, Holeker, 5c)

Amannan ( imbaloga).—The caputol of a small beak state in the province of Delhi about 11 in miles N by W from the city of Delhi, lat 30° 10' N, ion 70° 44 E.

Antera for Ambhers).—The an cent capital of the Joypoor territories, until Mirza Raja Jesan, h, in the reign of Aurengeele, built the city of Jeypoor, since which puriod the plutepaisty takes that name the Jat 26° 57 N, ion 75° 40° E., five miles N by L. from Jeypoor

The site of this place is singularly romantly, for it stands on the brink of o small take, surrounded on all sules by steep mountains. The palace of the Rights is still in good preseryation and contains some nubbe halls built on the very face of the precipice immediately overhanging the lake. The interior of the old palace contains one very noble hall of audience, a small garden with fountains, and a long succession of passages, cloisters, alcoves, and small intricate apartments, many of them extremely beautiful, and enjoying from the windows, balconies, and terraces, a most striking prospect. The earving in stone and marble, the inlaid flowers and ornaments, in some of these apartments are equal to those of Delhi and Agra, and only surpassed by the beauties of the Tauje Mahal. A great use has been made of stained glass, which from the maccessible height of the windows has remained in good pre-Higher up is the eastle servation with high towers, and battlements, with a few ornamented windows, many narrow loop-holes, and one tall minaret rising above the whole. The interior is not shewn to Europeans, it having formerly been the depôt for the public treasure, and is still occasionally used as a state prison.

It is approached by a steep winding ascent cut in the rock, and passing under three successive gateways The heights above are crowned with towers and battlements; and the royal gardens occupy a small island in the lake and part of the eastern bank. The rest of the narrow space between the eastern margin of the lake is crowded with buildings of the ancient city. The interior is now ruinous and nearly depopulated; but its lofty picturesque pagodas, with porticoes guarded by marble elephants, great bowlee, its arches and pavilions, still preserve the recollection of its former grandeur. There are two Jain temples here, one apparently quite new. The road from Jeypoor to Ambher, until the foot of the mountain that separates the two valles is reached, presents an almost uninterrupted succession of villas, gardens, tanks, Hindoo monuments, and other religious edifices.—(Fullarton, Franklin, Hunter, &c)

AMBLOO.—A small island of about

fifteen miles eireumference in the Eastern seas, situated at the south-eastern extremity of Booro Isle, lat. 3° 55′ S., lon. 127° E This island is but thinly inhabited, having been much infested by the depredations of the mop-headed Papuas from New Guinea, who plundered it in the year 1765, and earned off many of its natives. Beautiful shells are found on the shores of Ambloo—(Stavorinus, Bougainville, &c.)

Ambong.—A large and commodious harbour on the north-west coast of Borneo, having great depth of water, with a button-like island in the centre. Ships keeping this island on the right hand side, will come into a fine harbour on the south side, close to some salt-houses. Lat. 6° 14′ N., lon. 116° 25′ E.

Amboon,—A town in the Carnatic province bordering on the Balaghaut, 108 miles W.S.W. from Madras; lat. 12° 49' N, lon. 78° 46' E. The Amboor division is comprised within a range of hills of moderate height. The river Palaur, declining from its apparent southerly direction, enters this tract about three miles from the eastward, and washes the Amboorpettah, distant three miles to the southward of the fort. The skirts of the hills are covered with palmyra and date trees, from the produce of which a considerable quantity of coarse sugar is made. The territory is fertilized by numerous rills of water, conducted from the river along the margin of the heights, as a supply to the rice fields, the tobaceo, cocoa-nut, and mangoe plantations. In the hot weather in the low country the thermometer under the cover of a tent rises to 100° Fahrenheit, and exposed to the

rays of the sun, to 120°.

The village of Amboor is neat and regularly built; its inhabitants are very industrious, and make a considerable quantity of castor-oil, which they export. On the left side of it is a lofty isolated mountain, on which formerly stood a fort almost impregnable by nature. The upper works have been destroyed since it came

into the proceeder of the Ritich and the loave is a giver of continue ment for the charters The stubs on the top feel periode extent to have rendered its cultivation an elever of importance and on it are two tanks pear to where the turnels formerly stool. The new from hence is melde al lors wa est has summer bus communion wh's that below district suffered gree ly from Hydre s d fierent loss sees of what we call the Carpatic from which it has con jet alloge her recovered. Sear An 'oct the Berramshal ends and the brevi territories commence - (Martine, Sall F Bucksner, (c)

Fort Victoria is situated on the S.E. side of the island, and is an irregular hexagon, with a ditch and covered way on the land sule, and a horn-work towards the sea; but it is commanded by two heights within 700 and 1,200 yards distance, the difficulty of anchoring in the bay constituting the chief strength of the island. The town of Amhoyna is clean, neatly and regularly hualt, and well supplied with water. The west end is inhabited by Chinese, and the south end by Europeans, near to which is the tomh of Rumnhius. On necount of the frequency of earthquakes, the houses seldom exceed one story in height. inhabitants are the Hornforns or aborigines, the Amboynese, Europeans, and Chinese; but of the first there are now very few remaining. Amboynese were converted to the Mahomedan faith about A.D. 1515, the Portuguese subsequently converted a number of them to the Roman Catholic religion, and the Dutch to the Calvanistic, but the greater proportion still remain Ma-The Christians, howhomedans. ever, evidently exect the other seets of Amboynese, both as to morals and intelligence, and notwithstanding all the oppression they have endured, are a peaceful inoffensive race In the Dutch armies they rank above their other Asiatie troops, and receive pay and equipments in proportion. principal Amboynese Christians still bear Portuguese names, but their number is not great. The Chinese are not so numerous in proportion as on the other-islands, yet they are the only strangers permitted to settle here by the Dutch. They keep shops, sell provisions, and intermarry with each other One junk of 500 tons arrives from China annually.

Amboyna was discovered by the Portuguese in A.D. 1515, but was not taken possession of until 1564, and was conquered from them by the Dutch about A.D 1607. In 1546, when St Francis Xavier was at Amboyna, he observed the inhabitants then beginning to learn to

write from the Arabians. At present they speak the Mulay language. 1622, the famous or rather infamous Amboyna massacre took place; in 1796 it was captured by the British, when it was found to contain 45,252 inhabitants, of which number 17,813 were Protestants; the rest Mahainmedans, except the Chinese and It was restored to the Dutch at the peace of Amicus in 1801, recaptured in 1810, and again finally restored after the peace of Paris in 1814. - (Statorinus and Notes, 2 Reg., Bruce, Marsden, Crawfurd,

American —A town in the province of Delhi, twenty-two miles N.W from Pattinlah; lat. 30° 28' N., lon. 76° 10'E

AMPER KHAN -See SI RONGE.

AMERICAL (Amara-cata, the fort of the immortals )—A town on the confines of Sinde, about eighty-five miles E. of the Indus, and of Hyderabad the capital of that province, lat 25° 20' N., lon 69° 49' E. This place was formerly the empital of an independent principality named Dhat, held by the Jada Rajnoots, but being situated on the confines of Joudpoor and Sinde, soon became an object of contention between the two states In 1813 it had been recently enp-tured by the Ameers. The surrounding country is and, sterile, and unproductive, taxes on merchandize, and extertions from travellers, heing the only sources of revenue Emperor Humayoon, after his expulsion from Hindostan by Shere Shah the Afghan, in his extreme distress sought refuge in the desert with the Rajah of Amerkote; and here the Emperor Aeber was born, A D. 1541. —(Macmurdo, Pottinger, MSS, &c)

AMHERST.—The town of Martaban being restored to the Burmese, under the provisions of the treaty of 1826, it became expedient to possess a station on the south bank of the Saluen river, as a inhitary post, commercial establishment, and asylum to the numerous refugees preparing to inspirate from the Barmese dominions. A recess north of Cape kyar hami was selected for this purpo e, the British flag holsted on the 5th April 18-70 and the spot (then covered with jun, le ond fruit trees) having no nutrier name was called Amilerat. Lat 16° 5 \, lon. 97° 25′ E.

This place stands in the north-cast oncic of the guil of Martahan, twen ty-ci, be miles below the town of that name on a triangular peninsula con taining an area of about four square miles, the spex of the promontory (commanding both town and har hour) from twenty five to thirty feet high the rest about ten feet shore hil b-water mark spring tides except a narrow mangrove belt intended for the native quarter Off Amberst promontory, on a detached rock is the Buddhist temple of hyarkams The apex and the most clerated nor tion are reserved for public purposes soch as fortifications the church, &c., the lowest grounds are ouigned ta the natives being most congenial to their liabits; the hi, her grounds to the Furopean and Chinese quar ters, to be built of durable mate-The military cantonments are mala fixed on a mot about one mile and o half from the town, dry, level, and

Up to the 7th Nay 1826 of 431 lots marked out 217 had been given away to Europeans Choose Portu-guese and others besides lands assigned to Burmese and Peguers temporary cootonments had also then been constructed the streets design nated by English names such as Bayley Street, Harington Street &c Estimating the native town at only 2000 houses, the gult rents within a year would amount to 7,322 Madras rupees annually increasing, a great occession of inhabitants being ex nected so that its own resources would in a few years defray the civil and military disbursements From its frontier situation Amberst must become the cinefstation of the south eastern Burmese conquered pro-

clerated.

vinces. In January 1877 it con tained 1,000 inhabitants

The harbour is spacious and secure with three fathoms at low water near tiles, and thips may lie within 100 rands of the shore the steam boat lar mulin fifty line and fall of the tide about nineteen feet; flow of the tide about six miles an hour but without any hore and on the while well adapted for wet docks. Owing to its geographical position the har bour is still as a lake for two hours before and two after high water per mitting an ever communication by hoats with the shore A remarkably noble and beautiful plant, named Am herstin after Lady Amherit has recently been discovered in this neal bourhood Only two trees of it ore known to exist, and these were found in the garden of a Buddhist monnsterr on the banks of the Saluen rate A enecies of oak also grows to a great size in the vicinity of this town, and extenure forests of teak timber fue ther inland up the river Attran Good water is found every where within sis fret of the surface

As a depot from which the Bur mesc Chinese, Shans and other ultra-Gangetic nations may be supplied with the commodities of Britain and Ilindostan Amberst bromises to be a settlement of the first impor tance The short run between it and Hangoon well suit the small coreting trading bonts and there is said to be a safe and practicable route to the Interior of Ava and the Shan country through the towo and province of Tongho From Amherst oplum may be latroduced to the very centre of Avs Siam Laos, and through the latter Into China Prior to 1827 several chests had been imported and sold .- (Crawfurd Lieut Low, Capt Studdert &c)

America Hasseus.—A harbour thus mand in the prosince of Arracan, situated between the Island of Rannee towards the southern extremity and the main land; lat 18° 47' N Ion 93° 0' L.

AHIERAN (or Ampherea) .- Asmail

town in Malwa, belonging to Sindia, and the head of a district containing 175 villages. Lat. 22° 23' N, lon. 75° 13' E., fifty-six miles S.W from Oojein, and twelve W. of Dhar. stands in an extensive valley, which expands towards the north, and is 1890 feet above the level of the sea. In 1820 it contained 500 houses, with good bazars plentifully supplied. Amjerali is tributary to Sindia, to whom the chief (a Rhatore Rajpoot) pays 35,000 rupees per annum, his country, however, under proper management, is capable of yielding three In 1824 the times that amount. Amjerah gross revenues were expected to reach one lack of rupces. -(Malcolm, &c)

AMMALAPOOR.—A town in the Northern Circars, situated on a branch of the Godavery, near its junction with the Bay of Bengal, fifty three miles N E from Masulipatam, lat. 16°25′ N, lon. 81°58′ E. About twelve miles E. of this place is a village named Sura-yana-yanam, and close to it a shallow lake, at the bottom of which sulphur is found deposited. The country is flat in its vicinity, there being no hill nearer than fifty miles, and stones are almost as rare—(Heyne, &c)

AMRAN —A town and fortress, with a small district adjacent, situated in the Guzerat peninsula, twenty-two miles S W. from Mallia, lat. 22° 41′ N., lon. 72° 43′ E Near to one of the adjacent villages is a monument erected to commemorate a traga, committed in 1807, by a Rajghut Brahmin To deter his superior, Hirjee Khowas, from depriving him of some land in the vicinity, he led his mother to the gate of Aniran, and there cut off her head, which had the desired effect stances of this sort are very frequent in Guzerat, and, on most occasions the victim, whether male or female, not only consents to, but glories in the death inflicted. The person who is in many cases the innocent cause of the catastrophe, is considered by the Brahminical code as damned for

ever; while the wretch who for his own profit perpetrates the murder, is not only held innocent by his fellow citizens, but suffers no pang either of heart or conscience. — (Macmurdo, &c)

AMRAWUTTY (Amaravatı). — A large and populous town in the province of Beiar, thirty-four miles S E. from Ellichpoor, lat. 20° 54′ N, lon. 77° 57′ E. A considerable quantity of cotton, of a good length and staple, was formerly transported from hence to Bengal by land carriage, being a distance of more than 500 miles, and it still carries on a general inland traffic of considerable extent.

(Amaravatı). — A AMRAVUTTY large town in the northern Circars, situated in a plain extending along the south bank of the Krishna, twenty miles N.NW from Guntoor, and twelve nules in a direct line S.W. from the fortress of Condapilly. was built by the late Vencatady Naik in 1796, and for a native town displays considerable neatness and iegularity. Five hundred yards west from Amrayutty are the ruins of the ancient town of Durnacotta, which is said to have once been the capital of this quarter of Hindostan. The principal curiosities here are the Amreshwar pagoda, one of the chief Siva temples in Telingana, and the great mound of Depaulding, from whence coins, inscriptions, sculptures are still procured - (Pubhe Journals, &c)

AMROOAH—A considerable town in the province of Delhi, a few miles S W from Moradabad, with a neat mosque and extensive garden, and surrounded by large plantations of sugar and cotton The generality of the surrounding country, however, is poor, sterile, and thinly inhabited, and with a very great extent of ground totally waste.

Amritsin (Amrita Saras, the fountain of nectar)—The capital of the Seik nation, and holy place of their religion, situated in lat. 31° 33′ N,

long 74° 47° E., farty four miles I., from the city of Labore This is an open town about eight miles in eir conference. The streets are nar rows the houses in general good, being lofty and budt of burnt bricks but the apartments are confined is still the grand emporium of trade fur the shouls and saffron of Ca h mere and various other commods tles from the Decean and eastern part of India, and an excise is icsted by the Rajah on all the mer chandire sold in the town according to us value. The manufactures of the place are only a few coarse cloths and inferior silks; but owing to its being the resort of many rich merchants and the residence of bankers American ly a stotlon of considerable opulence Il unject 4 ngh has built a new fort, named limitect chur after himself, and he has also brought o narrow canal from the Rarcy a distance of thirty four tudes

Americar, or the pool of immor tality is a baun of about I'le paces square built of bricks in the centre of which stands a temple dedicated to Ocoroo Govind Singh In this sacred place is lodged under a silken canony the book of laws written by that Goorgo and from 500 to 600 akshes or priests, who belong to the temple and are supported by contributions perform its functions. When Ahmed Shah Abdalla con quered Lahore he destroyed this temple twice and killed cows and threw them into the woter in order to defile it effectually Rungeet Singh has o mint here, ot which come of dif ferent value ore struck in honour of Baba \ausl Shah the most emment Scik somt Good camela, and oceastocolly horses are to be purchased here the first for fifty rupees each These valuable, patient, and il used animals are brought down loaded with rock salt from o mine obout eighty miles oorth of Lahore Strings of 606 are seen on the road with a large lump resembling o block of onwrought marble slung on each suk

Some Seik authorites ascribe the fountation of Amritur to Gootoo Itamidas (who died A D I SI), whilch Is not correct, as It was a terry an cent town known formerly by the name of Clink Gooroo Itamidas added much to its population and built the famous tank or reservoir named Amritur which, in the course of time gave its manne to the town It having at one time Icen also woned Itamida poor — ( Valcolm, III & Reguler, & C )

Assyrances —A small identifying of the north western extremity of Ceylon and subordinate to the district of Jaffinspatam, from which it is acpara of by a narrow strait. It is five miles in length by two in breadth, and affinide excellent pasturage for rearing horses and cattle.—(I ercival, &c.)

ANAJE.—A town in the Mysore territories having a small district annexed twenty-seven miles N W from Chittadroog 1 lat 14°27 N, lon 70°13 E.

ANAN SCRIFF.—A distinct in the sland of Sumatra, extending along the sea-crosst on the SW alde from the Manjuta river to that of Aret The chief bears the title of aultan and his capitol if such a place descries the appellation is named Mocomoco Although the government is Malayan yet the ministers of tho sultan are named Vastra (a title horrowed from the Ilindoos), and the greater proportion of the Inha bitanta consist of aborigines — ( Nors den &c.)

ANALAROO.—The name of n con siderable pepper district in Sumatra

Anan.—A town in the Onde ter ritories thirty four nules S W from Lucknow, lot 20° 31 N., lon 80° 22'

AMAMMA (north middle and south).—Three clusters ofver; small islands in the Clino Sen, situated between lot 2°20° and 3°30° N, and about lon 130°30° E The largest may be estimated at twenty

miles in circumference, but a great majority are mere rocky islets.

Anapertomiou Hills. See Arracan.

ANDAMANS .- The Andaman Islands are a continuation of the Archipelago in the Bay of Bengal, which extends from Cape Negrais to Aeheen head, stretching from 10° 32' N., to 13° 40' N. What has been considered as the great Andaman is the most northerly, and about 140 miles in length by twenty in breadth. This island, however, is separated by two very narrow straits, which have a clear passage into the Bay of Bengal, and, in reality, divides it into three islands. The little Andaman is the most southerly, and hes within thirty leagues of the Carnicobar Isles Its length is about twenty-eight miles, by seventeen in breadth; but it does not afford any harbour, although tolerable anchorage may be found near its shores Situated in the full sweep of the S.W. monsoon, and the clouds being obstructed by high mountains, these islands for eight months of the year are washed by meessant torrents, but, upon the whole, the climate is rather milder The tides are rethan in Bengal gular, the floods setting in from the west, and rising eight feet at the springs. The variation of the needle  $2^{\circ}$   $30^{\circ}$  casterly.

In the centre of the large Andaman is a lofty mountain, named Saddle Peak, about 2,400 feet high There are no rivers of any con-The most common siderable size. trees are the poon, dammer, and oiltrees; red-wood, ebony, the cotton and almond trees, soondry, ehingry, and beady, the Alexandrian laurel, the poplar, a tree resembling satinwood; bamboos, eutch, the melon, aloes, ground rattans, and a variety Many of the trees afford of shrubs timber and planks fit for the eonstruction of ships, and others might answer for masts.

The birds seen in the woods are pigeons, crows, parroquets, kings-fishers, curlews, fishing-hawks, and

There are a great variety of fowls. fish, such as mullet, soles, pomfrets, rock-fish, skate, gurnas, sardinas, roeballs, sable, shad, aloose, eockup, grobers, scerfish, prawns, shrimps, crayfish, a species of whale, and sharks of an enormous size During the prevalence of the north-east monsoon fish are caught in great abindance, but in the tempestuous season they are procured with difficulty. There are many sorts of shell-fish, and in some places oysters of an excellent quality. A few diministre swine are found on the skirts of the forest, but these are very scarce, and probably the progeny of a stock left by former navigators. Although the ordinary food of the Andamaners be fish, they eat likewise lizards, snakes, guanus, and rats Within the eaverns and recesses are found the edible bird-nests, so highly prized by the Chinese; and the shores abound with a variety of beautiful shells, gorgonias, madrepores, murey, and cowries.

The vegetable productions are very few, the fruit of the mangrove being the principal. As the natives possess no pot or vessel that can resist the action of fire, they cannot derive much advantage from such esculents as the forest may contain, and, unhappily for the Andamaners, the co-coa-nut, which flourishes so well at the Nieobar Islands (almost in sight), has never planted itself on their territory.

The population of the great Andaman and all its dependencies does not exceed 2,000 or 2,500 persons, dispersed in small societies along the coast, or on the lesser islands within the harbour, never penetiating deeper into the interior than the skirts of the forest; their sole occupation seems to be that of climbing tocks, or loving along the margin of the sea, in quest of a precarious meal, which during the tempestuous season they often seek in vain

It is an object of much eurosity to discover the origin of a race of people, so widely differing, not only from all the inhabitants of the neighbouring continent, but also from those of the Nicobar Is sods, which are so nears hitherto, however the inquiries of travellers have produced no satisfactary conclosion. In stature they sel dom exceed five feet; their limbs are degreportionstely slender their bei her protuberart with his a shoolders and large heads In appearance they resemble a degenerate cace of negrove with woolly hair, flat noice and thick lenes their eyes are small and red; their eleo of a deep sooty black while their countenances es hibit the extreme of wretchednes horrid misture of famine and ferocity; they go quite naked and are insensible to any shame from expo-

The few implements they use are of the rudest description Thrir prin cipal acapon is a bow from four to hre feet long; the string made of the fibres of a tree or a slip of bamboo. with arrows of reed, headed with Gib hone, or wood hardened in the fire Beildes this they carry a spear of heavy wood, sharp-pointed and a shield made of back. They shoot and spear fish with great decterity and are said to use a small hand-net, made of the filaments of lark ing kindled a fire they throw the fish on the coals and derour it half brolled

Their habitations display little more ingenuity than the dens of wild beauta ; four stirks forced into the ground are hound at the top and fastened transversely to others to which branches of trees are suspended ; an opeoing just large enough to admit of entrance is left on one side and their bed is composed of leaves Being much incommoded by sosects their first occupation of a morning is to plaister their bodies all over with mud which hardening in the sun forms an impenetrable Ottnout Their woolly beads they paint with red other and water; and when thus completely dressed a more hideous appearance is not to be found in the human form Their salutation is performed by lifting one lesond smacking with their hand on the lower part of the thigh

Thrir emoes are bollowed out of the trunks of trees by fire and metro ments of stone has be no iron in use among them, but such as they accidentally procure from I orogene, or from secrels wereked on the cost The men are ennurg and revenueful and have an inveterate haired to ateamerral they have never made any attempt to entitrate the land but subolit on what they can pick up or kills they appear in express an a loration to the can and to impensive beings the grail of the woods, waters, and mountains. In storms they arrethend the lofturnee of a makenant bein, and deprecate his wrath by chaunting wild choruster. Of a fatore state it is not known that they have any idea which possilly arises from our Imperfect means of discoveries, their epiolons

The Andamans to ether with the becolur and leaser Islands, were included by Prolemy in the general apprilation of Insula Boom Fortuna and supposed to be inhabited by a eare of Anthropopharl a description which the bubunty of the modern Andamaners perhapajustlier na far as refers to them; for the inhabitants of the Neobart are a very different race t thry are also mentioned by Marco Polo in the thirteenth century language of the Andamaners has not been discovered to possess the shelt est affinity with any spoken in India, or among the klands

The first settlement of the English was made in the year 1791 near tho southern extremity of the Island which was afterwards removed, in 1703, to Port Corowallis A more picturesque or romantic view can scarcely be imagined that that which Chatham Island and Cornwallis laland present Being land locked on all sides, nothing is to be seen but an extensive sheet of water, resembling a vast lake interspersed with small I lands, and surrounded by lofty mountains, covered with trees The original object of the undertaking was to procure o commodious harbour on the cust side of the Bay of Bengal, to receive and shelter

E.2

ships of war during the continuance of the north-east monsoon. It was also intended as a place of reception for convicts sentenced to transportation from Bengal; but the settlement proving extremely unhealthy, it was abandoned, and the convicts have since been sent to Prince of Wales' Island, and prior to its cession to Bencoolen.

In 1814 Port Cornwallis was visited by Capt. Canning on his way to Acheen, but all his endeavours to establish an intercourse with the natives proved ineffectual. Few vestiges then remained of the British settlement withdrawn in 1796 Recent fires indicated that the ruins of a brick house on Chatham Island afforded occasional shelter to some of the natives. Close to some middy water of the worst quality they found the head and back-bone of a shark, the rest of which appeared to have been devoured the same day

In 1819, two Andaman negrocs, captured by a Burmese fishing-junk, were landed at Prince of Wales' Island According to the Burniese account, they belonged to a party of Andamaners that attacked the Burmese, and wounded four of the clew with their arrows. In height they were about four fect six inches, and in weight about seventy-six pounds, their colour jet black, bodies tattooed, They apand appetites voracious peared averse to speak, except when left entirely to themselves, when they made a cackling, like turkies

In April 1824, the British armament, under Sir Archibald Campbell. destined against the Buimese, assembled at Port Cornwallis in the Great Andaman, where some of the ships remained about a month, but during their stay never could effect any communication with the few wretched beings who inhabit these sequestered regions. Savages in every sense of the word, they rejected all intercourse, and if met at any time accidentally on the margin of the dense jungle reaching down to the sea-beach, they immediately evinced hostile feelings, by discharging flights of arrows at

the boats, and then penetrating the interior On this occasion it was ascertained, that the skulls and bones with which their wigwams were adorned belonged to a species of small island hog, and not to the himman species, as had been suspected.—(Symes, Col Colebrooke, Capt. Canning, &c.)

Andaman (the Little) Isif. A flat island covered with high trees, lying due south of the Great Andaman, from which it is distant about forty Lat. 10° 40' N, long 92° 30' E In length it may be estimated at twenty-eight miles seventeen, the average breadth, but it does not possess any good harbour, although tolcrable anchorage may be found near its shoics visited to procure water, in November 1825, by the Earl Kelhe transport, on her passage to Rangoon, with troops, which were most feroerously received by the natives, who obstructed their watering, and fought two pitched battles, in which they lost many killed and wounded, they would listen to no parley or entreaty, or accept any presents, but discharged showers of arrows, which killed one, and wounded three of the soldiers, and to the very last they endcayoured to cut off the pioneers engaged in One party of them were watering about sixty in number, wild-looking creatures, with finzzled hair, flat noses, small red eyes, and their skins besmeared with mud, and their faces painted with red ochre, they were all completely naked, except one stout man, about six feet high, who wore on his head a red cloth with white spots, and was probably their chief.

They appear, however, to have made further advances in civilization than their neighbours on the Great Andaman, as a hut was discovered on the edge of the jungle twenty feet high, of a conical shape, thatched to within one foot and a half of the ground with rattan leaves, with just room to crawl in underneath. The floor inside was strewed with leaves, and

there were several sleepar, ento make of lumbon gratin raised on pasts while the walls were creamented with rows of smoked shalls of a diminutise from the roof a perre of red and while el requered einth area rently of Malras manufacture was su pended and jack fruits and edible roots were discovered in small concal baketos the drinking accords scened in he the rautitos shell The weapons were a mo t f remalal te how shout seven feet in length stretched with the feet and a ban l low two feet long both strong with the dark red fibres of a tree t the arrows were almose three feet line some with two three and fruit prongs and in hard that when di charged by the soldiers they penctrated two inches into sold timber No canoes of rafts were seen, and no idols of any description.

The forest into which our soldiers penetrated was gloomy and dismal a the trees of east height thickly inter woven with rattany and bu brope, and the air charged with pestilential lapour from the putted regelation with which the awamps ground wos covered : parroquete were shreething over their head and personous anakes gh ling among their feet The ship a locate teturned on board after this implement espedition, falen with home arrows, specimens of thells and ambergues and duting the mulit the savages were heard on the bearly, all outing an I selling deliance ladeed during the whole selventure they never evinced the alightest avoirtoms of fear but were always mo t personally the agreement. (J I Alexander, &c )

Anoarouscitta a town in the prosmee of Orisca forty-eight miles west from Balasore; lat 21° 21' \, lon 80° 5 L

Axora a town in the prosince of Malwa forty five miles N N E from Bhopani Lat 23° 46 N , long 78° L.

Avermo o town in the Nepauleso dominions supposed to be situated about forty miles north of Jemlah Lat 20° 47° N, long 81° 20° E

Authatara fles Malaya, or Colinia por province twenty-three miles At., from falichantelierry Lat. 10" 71 \ , fon 77" 1 1 This Thì. lace is a titatril on the west at le of the mer Alma, and in AD 1600 evetalned 400 houses. It was then a common thursup fare between Malabar and the couthern part of the Carnetic, bring situated opposite to the wide passage between the south ers end of the ghants of Carnata and the bills that run north from Cape The forests here are Coningin extensive and contain abundance of teak and other saluable timber list unfortunately too remote from water carriage in permit its exportation.-( + Backeson, &c)

ANJAN.—A small di trict in the province of Lotch redril to the littud povernment in 1816 and governed by a commis soner deputed from Hombur

This is a very and tract of country water being very scarce and in many parts the soil so loose and early as to be unfit for tanks. The expense of sinking wells theers according to the nature of the soil and the depth where springs are reached and generally speaking twenty three cubits muit be perforated before water is There are some villages where it is necessary to penetrate much deeper, and others where the search le hopeless lintual le ono of the largest villages, and Hohur a sesport, jet both are destitute of water in 1817, out of 201 wells used for brigation aixty six paul no revenue to government and were much the most productive and profitable In fact such la the scarcity of water in Cutch that any person who sinks a well at his own expense I ecomes entitled to the whole of the land it is capable of irrigating 1817, notwithstanding these obstueles, the tilinge was on the increase many applications having been made to Capt McMindo, the commisaloner, by the peasantry for permis sion to extend the cultivation and,

with a view to the further improvement of the district, the Bombay government ordered the construction of several tanks. At that date, owing to the prior anarchy, the commerce of Anjar was inconsiderable, but the state of tranquility it has since enjoyed must have augmented its traffic, as well as its agricultural produce—(Macmurdo, Public MS. Documents, &c.)

Anjar — The capital of the preceding district, situated on the side of a hill nearly ten miles from the gulf of Cutch. The bunder, or port, named Toonea, is fronted by a creek from the gulf, lat 23° 3' N, lon 70° The fortifications of Aniar 11' E. form a polygon, but are not strong, being only six feet in thickness and without a ditch. It surrendered to Colonel East in 1816, after a breach had been effected. During the great earthquake of 1819, the half of this town, situated on low rocky ridges, suffered comparatively nothing, while the other half was almost wholly About 3,000 houses overturned were reported to have been destroyed or rendered uninhabitable, and 165 persons lost their lives In 1820 the inhabitants were estimated at 10,000 persons — (Public MS Documents, &c)

Anjeniva Isle (Anjadwipa)—A small island about one mile in circumference and two from the shore, fifty-four miles S by E from Goa, lat 14° 44′ N, lon 74° 13′ E In 1662 Sir Abraham Shipman, when refused possession of Bombay by the Portuguese, landed on this island with his troops, amounting to 500 men, where they continued until 1665, having lost during the interval by sickness all but two officers, and 119 rank and file—(Bruce, &c.)

Anjengo (Anjutenga) — A small sea-port town in the province of Travancore, seventy-eight miles N N W from Cape Comorin, lat 8° 37'N, lon 76° 53' E A short distance from hence lies Attinga (named in the maps Attancal), the chief residence of the Tumburreties or princesses of

The interior of the Trayancore. country is inhabited by Hindoos, whereas on the sea-coast much the greater proportion of the people are Christians and Mahomedans 1684, the East-India Company received permission from the Queen of Attinga to fortify Anjengo and a small strip of land round it; but in 1813, on account of the useless expense, the factory was abolished, by which a saying of 23,000 rupees per annum was effected The best coir cables on the Malabar coast are made here and at Cochin, of the fibres of the Lacadive cocoa-nut. The other exports are pepper, coarse piece-goods, coir, and some drugs; the imports are of very small amount.-(Fra. Paolo, MS. Documents, Bruce, &c.)

ANJENWELL —A town and fortress on the sea-coast of the Concan, 100 miles S by E from Bombay, lat. 17° 33′ N, lon. 73° 18′ E It surrendered to a British detachment in 1818.

Anjeric.—A considerable village half way up the straits of Sunda, on the Java shore, where ships may be conveniently supplied with water and other refreshments, such as buffalocs, poultry, turtle, fruit, vegetables, &c; lat 6° 3′ S, lon 105° 50′ E. Anjene is situated in a bay formed by Fourth Point and the point of Marak Bay, and is the westernmost poit on the island of Java The village is large and populous, and has a good blockhouse with cannon for the garrison. Towards the interior the country rises gradually, and its fertility is such, that with an adequate population any quantity of vegetables and fruit might be produced The shore, with the exception of a few fine bays, is rocky, chiefly of coral, and much in-At this place Colonel Cathcart, who died on his way to China, as ambassador in 1785, is interred.— (Thorn, &c)

Ankapilly —A town in the Northern Circars, twenty-four miles travelling distance W. by S. from Vizagapatam, lat. 17° 41′N, lon 83° 11′

F This is a large place, nearly a mile in length and wide in proportion, with a good barar and thickly interspersed with trees.—(Fullarien, de)

Annoscrour.—A town in the My some territories forty miles S I from Bangalore, lat. 12° 30° N<sub>2</sub> lon 70° 8 E

ANNADOONOY .- A small district in the Bejapoor province south of the Krishna extending along the north bank of the Toombudes river principal towns are Bijanogus (or Aonagoondy) and the fortress of hopaul After the conquest of Busnagur by the combined Viahomedan princes of the Deccan in 1864 the nominal Rajas were allowed to retain Annagoondy anii soose other districts in jaghtre for several generations From them it possed to the Maharat tas to Hyder, Tippoo the Mysore Dewon Purpeals the Nisam, and ot last in 1803 to the British this nation acting in India as residuary legatee to all the others The surface of this country is wild ond tilly, in terrorred with much wood amonest which are to be seen groves of the wild dote tree. For some miles round the city the soil is encumbered in oll directions with vast piles of granutic rock In 18°0 the reaning Itala was a man of weak intellects about eighty years of age who con tinued to support nn appearance of mock rotalty and to omiso himself with the expectation of recovering the ancient possessions of his family His principal residence was nt Cam lapoor from whence he salked forth with a pack of 100 dogs having still sufficient strength notwithstonding his advanced oge to pursue the chace oo foot -See also BIJANAOUS of which Annagoondy is a section,-(Munro Fullarton &c)

ANNICOL.—A town in the Mysoro territories twenty miles S.S.E from Bangalore; lot 12° 40' N, loo 77° 45' L

Anogaadaroon,-This ancient capital of Ceylon is now o mean village

In the mi ist of a desert. A lorge tank numerous stone pillars, and two im mense tumuls (probably of temples), are now the principal vediges that the spottestificonsidered sacred and resorted to as a pilgrimage.—(Dary fee)

Anneutrica (Anopa steker)—A town in the province of Agra sliu oted on the west side of the Gances, nbout slixty-eight miles L.S.F. from Dielhi; ist 25° 23 \to 0.75° B L. In A.D. 1800 Anophicher was aur resuded by a strong mud wall in some parts from twenty to thirty feet thick, and although of no great extent was thickly inhabited. The houses consisted of a mixture of brick and mud buildings.—(Transst, &c.)

Arters (Anterl).—A walled town of consideral le sure within the portion of the Agra province, tributary to Dowlet Row Studies situated on the banks of the small riser Dealoo twelve miles south from Gualtor Lat 20°5 5 N., lon 75°5 E. The neigh bouring hills are of quartzoze rock.—(Ulmter, 6°5.)

Astrocalle.—A village on the Tuptee in the province and dustret of Camleish, about ten miles 8 W from Boorlampoor in 1820 it was surrounded by o mud woll with brack bastons and was then divided between Sindle and the British govern ment as successors to the Peshwa.—(Feldarlon, 5c)

Aos.—A very small island in the Eastern seas lying off the east cost of Malacca; lat \$2.25 N., ton 104 3.5 E. The surface is high, and covered with o close infly woul A small Molay village here supplies ships with cocon-nuts and vegetables.—(Johnson Elmore \$4.0)

APAKOOKIT — A town in the Milloy peninsula district of Queda ehicfly inhobited by Chulios, six miles 5 E from Allestar

Arrole —A town in the province of Rengal district of Dinagepoor cighty miles NNE from Moorshedabad Lat 25° 9'N, jue 88° 59'E. ARABS. — See CANDEISH PRO-

ARACOTE. — In the province of Mooltan According to native necounts, a few days' journey to the west of Hyderabad, in the centre of seven ranges of hills, there is a pagoda dedicated to the goddess Bhavam, at a place named Aracote — (Maxfield, &c.)

Anall —A town in the province of Allahubad, across the Jumna, exactly opposite to the city and fortress of Allahabad. Lat. 25° 24' N., lon. 81° 50' E.

ARAVARCOURCHY.—A small town in the Combatoor district, fifty-four miles W by S. from Trichinopoly, lat 10° 41' N, lon 77° 54' E A D. 1800 it contained above 300 liouses, the inhabitants of which spoke the Tamul language This place was formerly inhabited by a person of the Bayda caste, named Arava, the name signifying the scat of Araya. It afterwards became subject to Madura. and then to Mysore, the curtur or sovereign of which built a neat fort near the town, and gave it the name of Vijaya Mangalum, by the Mahomedans pronounced Buaman-About the end of Hyder's reign an English army took the fort, at which time the town was destroied.—(F. Buchanan, &c)

ARCOT, NORTHERN —A district in the Carnatic under the Madras presidency, which also includes Sativaid, Pulicat, Cooncoody, in the Barramahal, part of the Balaghaut, and of the western pollams. The limits of this district are ill defined, but it may be described generally as bounded on the north by Cuddapah and Nellore; on the south by the southern division of Arcot, on the east it has the sea and the district of Chingleput; and on the west the Balaghaut of Cuddapah

In 1809, prior to the introduction of an improved system, this fiscal division was in a very miserable condition, but it has since been greatly benefited by judicious management,

and is now comparatively prosperous. In 1810 the rented villages were 3,534; villages not rented 65, besides deserted villages. The large tanks, the water of which contributed to the revenue, were 2,698 in number, of which 451 were out of repair, smaller tanks 1,322, of which 510 were damaged. The watercourses from rivers were 678; from springs 647; from anicuts 238; and from wells 19,223, of which 548 wanted repair; and from this enumeration may be inferred how much the agriculture of Northern Arcot denends on irrigation and the good condition of the tanks, In 1817 the total gross collection of the public revenue was 734,325 pagodas; and in 1822, according to the returns made to government by the collectors, the total population amounted to 892,292 The principal river is the Palam, and the chief towns Arcot, Wallajanagur, Vellore, and Tripetty. -(Public MS Documents, Hodson. Sc.)

ARCOT, SOUTHERN.—A district in the Carnatic under the Madras presidency, extending south-east to Postonovo, which it includes, and during the last war it also comprehended Pondicherry and the lands attached To the north it is bounded by the northern division of Arcot, on the south by Tanjore and Trichnopoly, on the east it has the Chingleput district and the sea, and on the west Salem and the Balaghaut Carnatic. In 1810 it was estimated to contain about 6,400 square nules.

In 1806 this district was in a very miserable condition, and continued so until 1809, when a trienmal settlement of the land revenue was introduced The number of villages then rented was 3,742, and those not rented 246 total 3,988 villages In 1817 the total gross collection of the public revenue, exclusive of Pondicherry, was 647,954 pagodas, and in 1822, according to the returns made to government by the collectors, the total population amounted to 455,020 persons The principal trading ports are Cudalore and Portonote - (Revealor Lifth Peperl, Hoden &c)

Accor (tracet),... The Musual mann capital of the Carnatic of the late to the late to the late to the late the cost half of the late treet, subjects made N. S. W. from Madras Lat 12° 2° 1, lon 70° 2° 7. The hed of the Palar is here half a male wide but in the day season is almost destinate of water. The nearest hills are those to the north of the cantonments, which at a dutance appear clothed with verdure and do not estiblist the smooth naked masses of granute so frequently met with in the Barra o ahal oud Visore countries.

The fort is of great extent and has been a regular formulable criadei but Ita principal defences were blown up above tweety years ego and its area Is now covered with fields of right ond the easter-oil plant loterspersed with the scattered ruins of a few huldings On the side towards the Palar the ramparts protect the place from inundation, and are kept in perfect repair To town is enclosed by walls and contains the former palace of the Arcot Validity of which the principal gateway is still entire Init all the rest to a heap of rules Jummo musiced is a handsome Visiomedan mosque with seven open arches in front and two small but not rocleant minary liesdes this there are four or five other Valiomedan religious edifices of respecta ble architecture, and their tombs are dotal sit le tail tod penorum Sandut Colla is the only remarkable one

Arcot was formerly the nominal capital of the Carnatic below the ghatte in the Nabot a dominous were designated by the Mahomedars and English and it is said to have been noticed by Ptolemy as the capital of the Sorre or Soramundalism whence Corostandel but the existing town is quite of modern date After the Mogul armies capitated Gauge they found it so extremely unlicality that they were obliged to ecoloo on the plants of Arcot, which

led to the establishment of this eaprial about Al 1717. It per ent the town is cliefly inhabited by Mahamedans who speak the Decemy dialect, which we name thindustant.

Annar ad Deen the Nahoh of Arcot, was kille ! in futtle \$ 1) 174 ! after which t' lo place was taken by Chun la Salieb the Leevels can li date to 17 1 it was retaken by Lat ! Travelling untance from Mairae seventy-three miles from beringapa tan 2/7; from Calcutta 10,01 au i from Delhi 1077—(Fallorten F Bachasas Orne Hilles Remuell [c]

Anothenty Unddhasga).—A towo in the Touchmans country province of the Carpatic fifty-two nules 5.5 W from Tanjore Lat. 10° 6 \, lon. 7.0° 3 L

ARENTS.—A small rocky island in the Lastern acas; lat 5° 14 N., ion 115° 10 L

Agrar.—The name of a very high mountain in Papus or New Guner bearing due south from Dory Har hour

Anna — A town in the Acquilleco dominions 110 W.A. W. from Lord, its lat. 28° 1.5 N. Ion h2° 47 L. This place stands on a hill on the amount of which surrounding the chief a castle are about 150 houses,

and 350 more near the middle of the ascent, all with mud walls and thatched roofs. The inhabitants, with the exception of a few Brahmins and Rajpoots, are one-half Kasiyas, and the rest impure cultivators and tradesmen—(F. Buchanan, &c)

ARGAUM (Arigrama).-A small village in the province of Berar, thirty-eight miles W.S.W. from Ellichpoor, lat. 21° 7′ N, lon 77° 3′ On the plains near this place a battle was fought on the 28th November 1803, between the British army under General Wellesley and that of the Nagpoor Raja, in which the latter was totally defeated, with the loss of thirty-eight pieces of eannon. all his ammunition, baggage, elephants, and a great slaughter of his troops. He soon after sued for peace. which was granted. The village in 1820 formed part of the Nizam's dominions.

Arianeoopan.—A small town on the sea-coast of the Carnatie, three nules south from Pondicherry, lat 11° 54′ N, lon 79° 52′ E. In 1748 this was a fortified town, and taken by Admiral Boscawen with great difficulty prior to his unsuecessful siege of Pondicherry. The fortifications have long disappeared, but the place still belongs to the French, who resort here for recreation on festival days, when tents and temporary booths are erected, and amusements pursued with their characteristic The French have a church here, and to the north of the town there is a ferry across the Arianeoopan or Vellenore river.—(Fullarton, Orme, Sc)

ARICLOOR (Aryalar)—A town in the Carnatic twenty-eight miles N. from Tanjore; lat 11° 7′ N, lon. 79° 10′ E.

Ann (or Aring)—A town in the province of Gundwana, seventy-five iniles W S W from Sambhulpoor, lat 20°37′N, lon 82°36′E. About 1775 this place belonged to a Goand chief tributary to the Rajah of Nagpoor. It was then a more flourishing

village than is usually found in these unwholesome tracts, as it contained some weavers, and was frequented by itinerant merchants.—(Lechie, &c.)

ARINKIL.—See WARANGOL.

ARIPPO —A small village in the island of Ceylon, Bay of Condatehy, where the eivil and military authorities reside during the season of the pearl fishery The surrounding country is barien and uncultivated Lat 8° 40′ N., lon. 79° 47′ E, 120 miles N N E from Colombo

ARKI—The residence and headquarters of Ummer Singh, the Gorkha commander, during the predominance of that people among the hills between the Sutleje and Jumna, lat 31° 3′ N, lon 76° 55′ E, sixty-eight miles E.N.E. from Luddeeana.

ARMEATIE —A town in the Nabob of Oude's territories, thirty-seven miles NE from Maniepoor, lat. 26° 8′ N, lon 81° 46′ E.

Armegon —A town in the Carnatie, sixty-six miles N. from Madras. lat 14° N, lon 8° 11'E. This was the first English settlement in the Carnatie prior to the aequisition of Madras In A D 1625, the East-India Company's principal agents having obtained a piece of ground from the naik or chief of the district, they erected a factory at Armegon, which in 1628 was described as being defended by twelve pieces of cannon and twenty-eight factors and soldiers. In 1822 the Armegon shoal was ordered to be surveyed, to ascertain if a safe harbour eould be made between it and the main-land -See Blackwood's Harbour.—Bruce, &c.

Arner (Aram)—A town in the Carnatic, seventy-four miles SW from Madras; lat. 12° 46′ N, lon. 79° 23′ E Duing Hyder's invasion of the Carnatic in 1782, his great magazines were deposited in the fortress of Ainee

Anoo — A large island in the Eastern seas to the south of Papua, the centre of which hes nearly in the 135th degree of east longitude, and

in length the 6th of south latitude It may be estimated at 140 miles As this he Lothe average breadth Island has never been explored lattle le known either of the constry or les Inhabitants The Chincoe mer chants settled at Banda carry on a traffic with this remote bland from whence they procure pearls burd-nests tortoise-shell, and slaves. An aromatle nomed mis of bark resembling cinnamon in its flavour, and much used among the lastern Islands is principally procured here and at Papers ; but It Is rarely carned to Lurope

Aroo is conjectured to be one of the places where the bird of paradice breeds of which seven species are described by Valentyn They are caught by the Papuas, who draw their cotrails and famigate them, having first cut their legs off which gave rise to the fabulous report that this bird had no legs, but kept con stantly on the wing The arrangement of their plomane is such as greatly to facilitate their continuing long in the air, but when they do touch the earth they re-ascend with great difficulty and a particular specict is sold to be unable to sise again The largest are about thirty tockes in leneth

## **ARRACA**

(Rekhaing) -A maritime province of India beyond the Ganges, recently acquired by confuest from the Birman empire. Including its dependencies Ramree Chediba and Sandowy, it lies between 18° and 21° corth lot. On the north it is separated from the Chittagong district by the river Naufs on the south from Bassem in Pegu by o small hill-stream about lat, 18° N to the east it has the Arracan moun tains and on the west the Bar of Bengal In extreme length it may be estimated at 230, by on average breadth of fifty miles occupying on stea of about 11,500 square miles By Abul Fazel in 1582 this country is described as follows ' To the south

can is a large country named Arknug to which the port or bunder of Chitiagong properly ledongs. There are plenty of elephants, but prest scarcits of inner.

Between the mountains and the reathle province is covered with thick woody jungles, so hundated and Intersected by twees lakes erecks and inlets of the sea, as to form a chain of peninsulas, I thmuser, an l blands completely interrupting the land communication between villages, which can only be visited by water The soil is in general argillaccous but in the vicioity of the hills a rich loam prevails flam may be said to fall throughout the whole year, as showers are frequent in February, March and April and the periodical rains continue from June to Novem ber I ven in November and December, occasional and sometimes heavy showers occur According to one statement the fall of rain between the first of June and the end of beptember amounted to 198 inches, and nearly the whole surface of the low country was under water

When conquered by the British in 1825 Arracan was found partitioned into fifty-five divisions of different sires each of which, according to its dimensions, contained from two to sisty paras or small villages 1820 the total population of Arracan. Including Hamree, Christia and Sandowy, was only estimated of 100 000 persons of whom six tentlis were Mughs three-tenths Mahomedans and one tenth Burmeres in deed not more than 400 square miles of the whole surface were supposed to be under cultivation, presentlog a most remarkable contrast to the adjacent district of Chittagong of which Arracan is only o continuation The head Vinhomedana generally speak good Hindosteny, the lower orders of that falth a sort of oilsed dialect t but the prevailing longuoge is the Mugh, which although it differs an some respects (especially pronun emtion) from the liurmese is written in the same character Rekhoing or Arracan, is rather the vulgar nome of the capital than of the people, who by those of Ava are named Great Mianmas, as being the original source The Mughs on the of both races. sea-coast are not addicted to agriculture, preferring hunting, fishing, and trafficking Slavery is tolerated in all shapes, and when a man wants to raise money he pawns his wife. The Mughs have no invariable mode of disposing of their dead; some burn the bodies, others bury them, the wealthy in coffins richly gilt. follow the Buddhist doctrines intermixed with many Hindoo superstitions, such as bloody sacrifices to conciliate the deities of the rivers, woods, and mountains, but their sacerdotal order wear a yellow dress like those of Ava They do not appear to be much respected by the

laity

Besides these maritime Mughs. there are many rude tribes of the same name scattered about the interior of Arracan, and beyond its eastern limits, as well as those of Chittagong. The territory of the principal chief of the Joomea Mughs in 1794, extended from the south banks of the Sunkar river, over the vallics watered by the branches of the Mamuri and Edgong rivers. The people of this central tribe name themselves Reckrisal, or the sons of sweet water, as they call the Sunkar river They dwell in villages, and have convents and priests, who instruct the boys to read and write Discrepancies exist between their religious doctrines and those of the Burmese Rahaans, but the basis appears the same They acknowledge a Brahm or supreme being, who they say gave a different religion to each of one hundred and one nations, which would be considered heretical in Ava, but they agree as to their moonies or law-givers The southern tribes of Joomea Mughs, in 1798, occupied six villages on the upper part of the river that passes Ramoo. which the Bengalese name Bakkally They are poorer, but in other respects differ little from the northern Joomeas The latter have subjected

still more rude tribes, who although tributary, retain their own chiefs, enstoms, and languages. A few Saksahs or Tripuras are settled among the southern Joomeas. the Bengalese they are named Rajbungsies, which literally translated means the "descendants of princes," but all over India is a term denoting a person of low birth. The rude people most numerous among the Joomea Mughs are by the Bengalese named Mooroong, and by the Arracaners, Mroo, but they designate themselves Moroosa. They are said to neknowledge a supreme chief named Layklang, residing at a distance in the Ava territories, but each village has a distinct chief, and the different communities are frequently engaged in hostilities. Both the Joomeas and the Bengalese think this tribe so superlatively impure that they will not interfere in their domestic feuds, and let them fight it

A genuine Arracan Mugh may be described as follows. In external appearance he is of moderate stature. but very robust, the face broad, checkbones wide and high, nose flat, and eyes somewhat oblique, like those of the Chinese. He differs not more from his feeble neighbour of Bengal. in form, feature, and physical strength. than in general habits, particularly with regard to diet Although he stands on some ceremony about taking the life of an animal, he makes none of devouring it when it is dead, and from the rat to the elephant inclusive, nothing comes to him amiss Some species of maggots, and a variety of vegetable productions rejected by most other nations, supply a meal when nothing better can be procured, in short, it is almost impossible to suppose a situation short of absolute confinement in which a Mugh is likely to be starved. Besides being a most foul feeder, the Mugh is personally foul and fifthy, an idea always suggested to a stranger by the disgusting appearance of his black teeth and red saliva

In Arracan proper the only land

assessed was that in which sugar cane hemp indigo onions, garile, and turmerse were grown overa, o number of ploughs emplayed le said to have been 1000 chiefly drawn by buffaloes. The teak tree 14 found oror the sources of the Morossy and haladtur rivers but It is so inaccessible that timber has usually been imported from Hon Other species of timber goon Other species however are almindant With respect to fruit the pine-apples and plantains are of a superior quality; mangoes jarks sweet limes cocos nut and other tropical fruits are plenty t oranges scarce The indigo plant grows wild and fourshes, but the art of extracting the colouring the province are rice and salt and for the culture of the first, the coun try on account of its redundant tootstore and barming sun is peen harly adapted a nothing is wanted but a good government and the human [cmins I imestono may be procured from the Islands of Ramree Cheduba, and Jurgoo Guld and silver particles are found in the water-courses of Basseen for liberty ta collect which the gatherers pay a certain fine A considerable traffic was formerly carried on between Arracan and Ava; the first exporting Hindostany and European goods such as relvet, broad-cloths piecegoods m's musling betel-nut ssit, and other articles; receiving in return tvory allver copper palmira sugar, tobacco, oil and lacunered ware.

During the Burnese sway the costom house duties were collected at many chokeys of which Oores tung was the principal the others being mostly farmed out. The Import and export duties then realized about 50 000 rupees per annum. The five principal ferries were olso farmed and the profits and produce of seventeen of the largest nullahs or water-couries; becs-wax tolber; tobacco cotton bamboos and hill cloth were all government monopohes. There wo also a rude mint.

equal to the counage of about 2000 rupees per day. In A D. 1800 the prospective annual resenue for the next five years was estimated as follows:

Land revenue 2 0 000 per ann Import and esport duties 50 000 Court fees and fines 20 000

2-0 000 rupees

herides the monopolies of salt and

opuum A pattre libitory of Arracan begins In A D 701 and continues through a series of 1 0 native princes down to modern times According to this document, us soverelens formerly occupied a murh more important station in the politics of India than they have recently done for ac cording to these annals, the dominions of Arracan at one period extended over Ava part of China and a portion of Hengal Certainly at present nothing remains to in dicate such a prior state of power and civilization for its combition when acquired by the British was to the last degree savage and batharons It does not appear, however until the Burmese invasion it had ever been so completely subdued as to acknowledge permanent vassalage to a foreign power, olthough the Mogule and Peguers had at different tmes carried their arms into the heart of the country During the rel n of Aurengache, the unfortunate Sultan Shujs his brother and rival, was basely murdered by theAr racan Raja. The Portuguese sometimes as albes at others or open enemies gained an establishment which only decayed with the general ruln of their interests in Asia. In 1783 (corresponding with the Vinch year 1140) the province was con quered after o feeble resistoore by the Burmese and was followed by the surrender of Cheduba Ramree Sandawy ond the Broken Isles The Mughs subsequently made many efforts to reseno their country, moro especially in 1811, under o rebel

chief named Kingberring; but were unable to withstand the bravery, discipline, and eruelty of the Burmese; who even managed to extort a surplus revenue, of which about 18,000 rupees were annually remitted to Ava, for the support of the white elephant and his establishment. Arracan proved the grave of General Morrison's army in 1825, and has continued equally destructive, even to the native regiments stationed on the sea-coast and among the is-Its population is scanty and uncivilized; it possesses no article of export but salt, yields little revenue; requires a burthensome civil and military establishment, and, in a merely pecuniary point of view, is a most unprofitable acquisition -(Capt. C. Paton, F. Buchanan, Licut. Trant, Symes, Morgan, Medical Transactions, Cox, Leyden, Sc)

Arragan.—The capital of the Arracan province, situated on a river of the same name, about forty miles from the sea, lat. 20° 30' N., lon. 92° 5′ E This place stands in a valley surrounded by hills, the highest not exceeding 500 feet, among which are lakes and marshes, communicating with a number of small - streams, running between low mud-A nullah, filled by the dy banks flows through the valley, which separates it at Mahatta from the great Arracan river The tide overflows the flat borders of the river to a considerable extent, its reflux converts these into a noisome swamp, and in this swamp great part of the town of Arracan is built, the water flowing under the houses, which are raised on posts, after the manner of the Mughs, Burmese, Malays, and other eastern nations. With the exception of the swampy ground, the soil consists of rock, crumbling on the surface, and forming itself into gravel, well adapted for roads or the floors of houses The hills generally assume a conical shape, some being insulated, others connected by narrow ridges, but all scattered in an irregular manner,

and separated by many ill-ventilated ravines, vallies, and confined spots of level ground, each occupied by a stream, a lake, or a marsh. A thin layer of loose black soil covers the mouldering rock, and where this has not been washed away by the rain, grass and jungle shrubs abound; but few or no trees of any considerable growth are to be seen, except in the vallies. Fifteen miles to the eastward a range of mountains, about 2,000 fect high, take a direction north and south nearly parallel with the coast, and another range of much less height skirts the shore. Between these the distance varies, but in the parallel of Arracan may be about fifty miles. The alluvial plains that intervene are intersected by a labyrinth of small rivers, in communication with the principal channel, which takes a northerly course, and diversified by detached groups and ridges of hills, few exceeding 700 feet in height.

The town is composed of bamboo huts, built on each bank of the stream, and connected by wooden bridges. In its centre is a square, surrounded by a wall, and containing pagodas, with images of Gaudma, from an inch to twenty feet in height; they are also numerous on the adjacent hills, most of them solid like pyramids.

This town and fort were captured by the Burmese in 1783, after a feeble opposition. They found a considerable booty, but on nothing was a higher value placed than an image of Gaudma (the Gautama of the Hindoos), made of brass and highly burnished The figure is about ten feet high, in a sitting posture, with the legs crossed and feet inverted, the left hand resting on the lap, the right pendant. This image is believed to be the original resemblance of the rishi (saint) taken from life, and it is so highly venerated, that pilgrims have for centuries resorted to it from the remotest countries where the supremacy of Gaudma is acknowledged, to pay their devotions at the feet of his

brazen representative There were also five images of Racshias (the demons of the Hundoos), of the same metal, and of gigantle stature the enardians of the sanctuary A piece of ordustice of most enormous di mensions was also found composed of huge bars of iron beaten into This ponderous cannon measured therty feet in length two and a half in diameter at the mouth and ten mehes in the calibre It was transported by the Burmese to Am merapoora by water as a military trophy, and Gaudmo with his in fernal guards was in like manner conveyed to that capital with much pomp and superstinous paralle tong of Arracan has probably much deteriorated since the above era. as. when captured by General Morrison a army in 1820 it was found in a most miscrable condition and pestilentally unwholsome. In 1826 Alrah was the principal station in Arracan -(Symes Morgan, Public MS 1)oeuments de 1

ARRACAN MOUNTAINS.-A chain of mountains which commence at Cope Vegrais and proceed in a northesis direction almo t to the southern bank of the Brahmsputra In Assam Ry the natives they are named the Lomadoung of Anamertopsu mountains and form a strong and well defined boundary for the province on the side of Ava. general elevation seems to be from 3 000 to 5,000 feet. They were crossed in 1826 from Shembewgewn on the river Ava to Amherst Unr bour in Arracan by Llent. Trant and a detachment of sepoys and were found to decline towards the east in a succession of ranges but more abruptly towards the west. They were supposed to be destitute of water, but abundance of springs were discovered that might be casily collected late reservoirs and it anpeared that a considerable commerce had been carried on by this route before the British invasion

year crossed further south, from Pa-

dangmew to Romere, by Leut Browne and a party of sepoys This route was found much more difficult than the other and hal acree been much frequented. One part of tho road was found to be 4 000 fert above the level of the sea by barometrical measuration; but this was not the greatest elevation attained No human beling or enlivated ground was seen on the line of murch, the whole country heing a succession of lills jumples and ravines—[Leut Trans.] Levil Browne & Browne better the succession of the

Annu —A large and populous town in the province of Bahar the capital of the blishalad district lat 2. N., lon 83° 57 L., thirty five miles west from Patrin.

ABAREN — A Britch division in the province of Gujerat and district of hairs extending along the east corner of the gulf of Cambay, and bounded on the south by the Goelwar and Bhownugger territories It is in terrected by various small rivers of aliott course. The principal towns pre Dondoods and Hanpoor.

ARRAWEN.—A town In the province of Khandesh which in 1810 belonged to Holtur Lat. 219 10 N., 1sn. 75° 48 E., thirty-four miles S W from Boorthamoor. The Satpoorah monatains covered with wood and Jungle are about my miles distant — (Sutkerfound &c).

ABBUNDBL.—A large town, or rather the remums of ooc in the province of Candeish seventyfaules by from Boorhanpoor In 1816 at contained many large buildings but in a very ruinous condition — (Sutherland, &c.)

Aanvaia.—A town in the province of Cutch twenty-six miles N N E from Mallin, lat 23° 17 N lon 71° 3 E

Anval.—A town in the province of Bahar on the south-east side of the Sone river forty miles 8 W from Patna lat. 25° 15 N lon 84° 44 E

Asura,-Ayıllage near Punderpoor,

in the province of Bejapoor, where in 1818 Goklah, the Peshwa's commander-in-chief was defeated and slain The Satara Raja, his mother and two brothers were captured, the Peshwa hunself escaping with the greatest difficulty

ASHTA—A town in the Malwa province fifty-nine inites E. by S. from the city of Oojein; lat 23° 3′ N, lon. 76° 46′ E. During the Pindarry war this was the head-quarters of Cheetoo, and was subsequently conferred on the Nabob of Bhopaul.

Aseerghur (or Hasser ) -A town and fortress of great strength in the province of Candersh, the capital of a district belonging to Sindia, but the fort and a few surrounding villages were ceded to the British government, lat 21° 28' N, lon 76° 23' E, twelve miles N N E from Boothanpoor. By Abul Fazel it is called the capital of Candersh, but native authorities place it half in the Hindoo division of Nemaur, as it stands on the Satpoorah range of mountains which separates the provinces Its name is said to originate from the founder Assa, a rich Hindoo zemindar of the Aheer tribe The upper hill, in its greatest length from east to west, is about 1,100 yards, and its extreme breadth about 600, but owing to its irregular shape the area does not exceed 300,000 square yards It crowns the top of a detached hill 750 feet high. and round the base of the wall enclosing the area is a bluff precipice, from eighty to 100 perpendicular depth, and so well scarped as to leave no avenues of ascent except at two places, both of which are strongly fortified Ascerghiir has also the raie advantage of possessing an abundant supply of water, but it also presents many ravines and hilly ramifications, which greatly facilitate the appioaches of an enemy A saily port of extraordinary construction descends through the rock at the south-eastern extremity, which can be casily blocked up by dropping down stones at certain stages of the ascent near the top. The principal road to the fort is on

the south-west side, where, in consequence, a double line of works are erected, and the masoniy of the whole is uncommonly well finished. A third line of works, called the lower fort, embraces an inferior branch of the hill immediately above the pettal, which has a wall on the south side, but is open elsewhere, being naturally protected by ravines and deep hollows, that extend in every direction.

Aseerghur was the capital of Candeish when subdued by the Emperor Acher, and is described by Abul Fazel as situated on a hill and incomparably In A D 1803 it surrendered to the army under Col Stevenson without much resistance, and the same year was restored to Sindia at the conclusion of a peace. In 1819 it became necessary again to besiege this formidable strong-hold, Jeswunt Row Lar, the (as Sindia asserted) refractory governoi, having rejected all overtures. When all the detachments had joined, the besieging army under Generals Doveton and Malcolm amounted to 20,000 men, and it was captured after an obstinate resistance, with the loss of 213 men killed and wounded, including eleven European officers, and also one company of sepoys, blown up in the explosion of the magazines, containing 300 barrels of gunpowder. The loss of the enemy was only fortythree killed and ninety-five wounded, for they fought under excellent personal cover except from shells. Indeed, it was entirely owing to the havock made in their walls that they were compelled to surrender, such having been the effect of twenty-two heavy-guns, and twenty-six inortars and howitzers, in battery, during sixteen days open trenches

In 1820 Asserghur remained nearly in the same state as when it surrendered, the trenches in the upper fort still open, and fraginents of shells lying scattered about among the ruins Half of the garrison was in tents and the other half quartered in the great mosque, a spacious structure of grey stone, with two minars, but without any cupola Close to one of the tanks on the west side off the fort is a re-

markable sally port conducting by a flight of steps cut in the bottom through the body of the rock in which magazines are also excavated. The petiah of Ascerghur, a large irregular village with one good street or isszar stands at the base of the rock, and in the 2contained only 2000 inhabitants.

The approach to Ascergling from the northward through the huttee pass is over a wild tract of country and the victory is infested by ti gers so oumerous and daring as to coter the lower fort and carry off some of the garrient The wolves are also exceedingly troublesome This fortress with a small tract of jungly unproductive land belongs to the British government but stands in the midst of Sindia s territories 1824 the civil and military establish ments were transferred to Bombey having until then been under the Bengal presidency. Blacker Fullarion Malcolm, Abul Fuzel, 40)

Astroon.—A large villing in the province of Ajmeer district of Jlar rowty twelve miles L.S.E. of Jalraputon which in 18.0 contained about 1,200 inhabitants and the surrounding country was rich and well cultivated. Lat. 24° 30 N ion 76° 2, E.

Asia Isles.—A cluster of low islands in the eastern seas covered with trees lat 1° N<sub>2</sub> lon 131° 30' E

Assanan.—This is the name of o towo country and river on the N E coast of the island of Samstra the first satuated in lat 3° 1 N Ion 90° 60° E. The river at its mouth is about 1,500 yards wide, but is abillow and difficult of secess on secount of oo extensive sand bank. The country is named from the abundance of a sort of long lank grass

There was formerly o colony of Javanese and also one of Portugues and also one of Portugues cattled up the Assahon river, and the remains of no old Javanese fortification are still valide about sereoty unless from its extremity
In 1852, commerce had much de-

creased, but there were still about eighty prows of verlous sizes belong you

ing to the community, engaged in trafficking to Malocca Pennag and The principal imports Singapoor are salt, opium and coarse cotton goods arms and gunpowder are at all times welcome articles ports are dio woods, rattens, nee and wax besides horses and slaves ; the price of the first being from twenty to thirty dollars t of the last women forty t children, twenty ond old men twelve dollars per head. Formerly 300 nimost all femsles, were exported Tin Is said to be abundant in the mountains of the Inland there me many intenor Batta tribes, speaking various dialects some addicted to canmbalism others not The names of the chief abstinent tribes are the harankaran the Pedimbanau and the Tubbus. In 1822 the total nonulation of the Assalian principality of every description was estimated at 70,000 souls. -(Anderson, fc)

## **NASSY**

(Aun) This remote country adjoins the province of Bengal at the north-east ern corner, about the ninety-first degree of east longitude from whence it stretches in an easterly direction to on undefined distance but it is pro bable that about the macty sixth degree of east longtitude it comes into contact with several barbarous and onknown tribes who occupy the la tervening space from thence to the province of Yunan In Chioa In this direction it follows the course of the Brabmaputra, being in fact the valley through which that river flows The average breadth of this valley may be estimated of sixty miles, although in a few places of Upper Assam, where the mountains recedo farthest, the breadth coosiderably exceeds that dittagee. In its greatest dimensions Assam may be estimated at 3.0 miles In length by sixty the average breadth divided into three provinces Cam roop on the west Assum in the cen tre and Seediya at the castern extre mity

In 1809 the territory of the Assam rain no where reached the northern hills, the deb raja of Bootan having taken possession of the tracts adjacent thereto, which is a modern usurpation, since the breaking out of the disturbances that have so long desolated this unhappy country. The western province, named Camroop, with several subordinate or interimyed petty jurisdictions, extends from the Butish boundary to near the celebrated temple of middle Kamakhya (lat. 26° 30' N., Ion. 93° E.), heing about 130 miles in length From the boundary opposite to Goalpara to Nogurbera, a distance of twenty-one miles, the Assamese then possessed only the northern bank of the Brahmaputra, so that on the south side the length of the Camroop was only 109 miles. Its width on the south side of the river may be reckoned at from fifteen to thirty, and on the north aide, on an average thirty miles. About 104 miles allove Gohati, which stands in lon. 91° 50' E, the Brahmaputra separates into two branches, and encloses an island said to be five days' journey in length and about one in width This province contains many low hills covered with woods, and also a great extent of fine low land, all susceptible of cultivation.

Assam Proper, the middle province of the kingdom, was then (1809) of greater extent than the western; but no European having penetrated far beyond the capital (Gohati), situated at its western extremity, there was no data for ascertaining its length. The portion north of the Brahmanutra, named Charidwar, was supposed to exceed 200 miles in length, by twenty in average breadth; but the length on the south side of that river was reckoned less considerable. commenced near the Middle Kamakhya, about 130 miles E. from Goalpara, and reached to Upper Kamakhya, ten miles below Tikliya Potar Within these limits it comprehended the upper half of the western island formed by the Brahmaputra, and included the whole of the

very large island named Majuli, between the Brahmaputra and a large tributary, named the Dehing. The province of Assam Proper was then considered of a higher and hetter soil than that of Camroop, and not so jungly and hilly. Of the third and most remote province, Seedija, nothing was then known, except that it was a small tract on the western side of the Dikrong river, about lon 95° In Maliomedan geography Assam is considered as separated into three grand divisions, called Ootrecool, Dukhneool, and Majuli, which by Abul Fazel, in 1582, are described as follows: "The domimions of Assam join to Camroop, he is a very powerful prince, lives in grent state, and when he dies, his principal attendants, both male and female, are voluntarily buried alive

along with his corpse. From the confines of Bengal at the Kandar custom-house, the valley as well as the river and boundary mountains, preserve a northerly direction to a considerable distance, but afterwards melme to east by north, and the valley through its whole length divided by the Brahmaputra into longitudinal portions, those to the south having generally the greatest breadth. The river Cailasi is alleged to have been formerly between the British territory and Assam; but at present no part of that river passes through the British dominions. This encroachment of the Assamese is said to have taken place some time between the years 1770 and 1780. when six small districts were taken from the Bijnee raja, then tributary to Bengal In 1809 the Assam territory, where it was entered from Bengal, commenced north of the Brahmaputra at Kandar, and on the south at the Nogurbera hill On the north Assam was bounded by the successive mountainous ranges of Bootan, Auka, Dophla, and Meerce, and on the south by the Garrow mountains, which rise in proportion to their progress eastward, and change the name of Garrow to that of Naga

68 Assam.

150 yards across, and the distance of the extreme banks about 600 vards. Between the mendians of 94° and 96° 30', and lat. 27° and 28° the Brahmaputra bends from a northerly to an ENE direction, bounded by the Meerce, Abor, and Meeslimee hills, behind which various ranges of lofty snowy mountains (the Langtan) extend all along the northern horizon, to an unknown depth and altitude, apparently like the Himalaya in parallel lines and ridges observation and the activity of recent explorers, has subverted the pre-existing theory that the Brahmaputra was a continuation of the San-It is difficult to account satisfactorily for the mistake into which Major Rennell and other geographers fell respecting the course of this river, for in the time of the Compte de Buffon, the true notion prevailed, as he speaks of a Lake Champé which gives rise to the two great rivers that water Assam and These were probably the Brahmaputra and the Irawady, and it must be recollected that until the grand revolution effected by Alompra, the present Burmese empire was subject to Pegu The head of the Sakato branch of the Brahmaputra was ascertained to be in lat 27° 51' According to Biahminical geography, the Prabhu mountains form the eastern boundary of Assam, and through them there is a tremendous chasm made by Parasurama (the same who conquered Ceylon and extirpated the Khetries of Malabar), which has ever since admitted the This cleft is still Brahmaputra named Prabhu Kuthara, because it was made with a mighty scimitar.

Many of the streams contributory to the Brahmaputra are remarkable for the winding of their courses. The Dikrung, although the direct distance be only twenty-five miles, is said to perform a meandering course equal to 100, before it falls into the Brahmaputra. It is also noted for the quantity and quality of its gold, which metal is likewise found in other rivers of Assam, more especially near

the mountains. The southern rivers are never rapid; the mundation commencing from the northern, fills both the Brahmaputra and the channels of the southern ones, so that the water has no considerable current until May and June. All the streams east of Seedeeya abound with rapids from the great inclination of their beds.

Assam is bounded on the north by a chain of very lofty mountains, a continuation of those which, taking their use at the western extremity of Asia, extend under different names for an unknown distance into China. The Assam northern mountains towards the west are inhabited by the Abors and the Mismees, which last extend along to the castern hills, where they come into contact with the Singhphos. The other tribes adjacent to Assam are the Abors, Dophlas, Garrows, Bynnes, Khampties, Nagas, Mismees, Moamareas, Meerees, and Singhphos. The five first-named are described under their respective heads The Meerees are a small and babarous tribe, who have some villages on the banks of the Brahmaputra, about lat. 28° N. lon. 94° E. The principal are Motgong and Meereegong differ in language and appearance from the inhabitants of Assam proper, and are armed with bows and poisoned arrows. Before the British conquest they adhered to Seediya Goham, and opposed the Singhphos.

The Mismee tribe inhabit the country about Brahmacoond, and the sources of the Brahmaputra, where they are collected in small but frequent villages, the houses of which are built along the steep faces of the mountains, in such a manner that the rock forms one side of their mansion, and supports one end of the rafter, the other resting on wooden posts; the space under the floor is occupied by their poultry and cattle. Besides swine and their own hill cattle, wealthy individuals have the small oxen of Assam proper, the chowry-tailed cattle of Tibet; young dogs as a luxury

are held to particular estimation as Is also the must beetle which hav ing been squresed between two stones, they dress as a grill. After a feart the shulls of the cattle are blackened and surpended in come to ornament their dwellings. The secouble det of the Ms mers cond to principally of Indiancorn, and a email grain gamed buberelas but ther culti vate sere small quantities of a white ner and also maruya yama, mus-Their summon dress is a siere of coarse cotton cloth but they are very duty in their persons sesteely ever having recourse to water for the put poses of ablotion The Mismees can work rudely to iron and brass but their culmary otenuds are mostly of corper and are obtained from the Jama country with which they Leep un an acure trade They bring from thence smoking pipes, strai, htswords, dyed woollens, beads, rock-salt and the chower tailed cows, In exchange for which they give much skins a bitter medicinal root, lever, and other articles, and formerly slaves captured to Assau Their pipes are commonly marked with Chinese charactors and at well as the smooth and brads are probably of Chiorse ma-sufacture. The Visince females are not kept concraled, and appear fale nod of good stature; the men are athletic with tolerably good compleasons. The country sorrounding Brahmacoond is better peopled than most tracts in this region having a number of villages scattered over it the chiefs of which share the offerings at the sacred well The Monmarcas (Mahamaria) are a

The Monnaress (Mahamaria) are a tithe formerly tributary to Assum but who revolted about A.D 1790 and uoder the command of a pnest committed the greatest exerter. They unhabsted an sland formed by the Boree Dibing river, which does cending from the cast takes a sweep to the southward before it joins the Lahit or Brahmaputra Froper, and forms o large hland shout Int. 27 30° A., loo 98° 30° L., conjectured to be 100 miles in length by forty in

breath. This is probably the Ma Juli of the old maps for the one now traved Mejobis not more than twenty miles fore, by four or five wide. This Last is it unted at the confluence of the Borre Deliviz and Borre Labit with the Brahmapur is the castern extremity bern, in lat \$77.00 km, lon \$15.21 L. I but, as bax already been anoted, using to the non-transmission of the surveys from Bergal all these latitudes long-latitudes and discrements must be considered very more raise.

Opposite to Secilery, about lat Mosmares country ends, that of the Amendos comococes intersected by the Now Dehing flowing from the south-eastern hills. These Sun light tribes were formerly tributary to Assam, but after the decay of that aneient kingdom revolted and wrought it much woe plundering the country and carrying the natives lote slavery In fact the northern and castern parts of Assam have been for a con siderable time (above forty years) streeted from the original inhabitants be these bushamans who encouraged by the intestme discords of the Assamese descended into and con quered the plains compelling their new sul fects to cultivate them and transporting so many into the mountune, that prior in 122, when the British commenced operations in Upper Assam It was estimated they had possession of 15 000 of these wretched beings. In I chrusey 1:25 they were expelled by Colonel Richard a detachment, and half of the above number of captives reened, sod negotlations were then cartying on for the liberation of the rest

Before the British Invasion the Singhpho tribes occupied the entire agree bounded by the south and south-east bils on the north of the Brahmspurin and west by o meridan line drawn from Secular to the hille excluding. Theok and Makroonl, and the Dipung nullah They were then duided late twelve tribes Inhabuing different silla\_cr of the line in the line was the silland of the second of the second of the line was the silland of the line was the line

which Bhisagong was the most important, and were governed by chiefs acting separately or in concert according to circumstances, but acknowledging no supreme head. They were armed with a short square-ended sword, oblong shield, bows and arrows, and were found very desirous of procuring muskets, although but little acquainted with the use of According to tradition the Singhphos emigrated from a much more northerly region (somewhere on the borders of China) than that in which we came in contact with Their religion is Buddhism intermixed with many remains of their primitive superstitions, in fact, they appear to be a sort of Buddhist Rappoots, addicted to war, and delegating the cultivation of the lands to Assamese helots.

The district of Seediya is not considered an integral portion of Assam proper, but has for a very long period been subject to that kingdom. In 1825 it was found in a most wretched condition, and principally inhabited by refugee Khamties and Mulooks expelled from their own countries to the south-east by the Singhphos At the above date Seediya was governed by the Seediya Shab, or gohain, a Khamtı prince claiming descent from the Hindoo deity Indra, besides whom he worshipped most others of the Brahminical pantheon, after the doctrines of the Assamese heresy, but cat all flesh except that of cows. With the assistance of the Abors, Meeries, and other petty tribes, he attempted to make a stand against the Singhphos The town or village of Seediya stands at the mouth of the Koondeil nullah; lat. 27° [52] N.

Under the native government of Assam, before its decline into anarchy, a ready access throughout the country was maintained at all seasons, by the construction of broad and elevated causeways, practicable to pedestrians when all the rest of the plains was under water. In the course of time, during the subsequent convulsions that so long agitated

this miserable kingdom, these bunds or causeways nearly disappeared, but in many parts they may still be traced. One of the principal is said to have extended throughout the whole length of Assam from Cooch Bahar to Seediya. In 1826 it was visited at a spot about two miles from a village named Lakhomati Bhoteya, where it runs through a thick jungle following the direction north 55° east, and dividing the district of Noa Dewar from the Dophla country. The tract on the north side of the causeway belongs to the Dophla raja, whilst the bund itself and the country to the south are' within the boundaries of Assam Pro-The causeway at Lakhomatı is about eighteen feet broad, and generally eight feet high, but in many parts it is nearly obliterated, and very generally hidden by brushwood and trees of considerable growth. There are no villages along this causeway, probably owing to its having been so completely overgrown with jungle as to have become impassable. At a short distance north of it is a small hill rivulet named the Deiring, flowing over a bed of sand and siliceous stones, among which a half-formed coal has been found.

The animal and vegetable productions of Assam are nearly the same with those of Bengal, which country it much resembles in its physical appearance and the multitude of its rivers. Transplanted rice forms threefourths of the whole crops. Next to rice a kind of mustard-seed is the most considerable crop, the oil extracted from it being that most in use; indeed the quantity of sesamum is very inconsiderable. Wheat-barley and millet are very little used merly the cytisus cajan was only culvated for the rearing of the lac insect, but is now preserved for its pulse, and other plants are employed to rear the insect. The most common pulse in Assam is the hairypodded kidney-bean Considerable quantities of black pepper are raised, and also long chilies, choyies, ginger, intractic, especients among and prints. In 18th 18th berd serie found to thrive wall; the letal leaf is interestal, there is plenty of accessmit, tebatero and option, both for homoconsumption and cripwisation. The roward-care thrive, but it mouth estern from the field; a lattle of the accelance jover is extracted, but no rugar manufactured. Coro-acts are very rare; and no palm-wine it made but oranges abound. Cotton is reared by most of the bill tribes, but it it the used by them.

No less than four deferent hade of silk-worms are rearrd, salks of soveral varieties forming great part of the astere clothing, besides fewerg a surr lus for espartation. The silk worm reared on the mulberry is the least common, the most common being that produced on a species of laurus, and called much. The tree Is planted and its branches pruped but the lenect is fed on the tree as it grows and sields two cropes that procured in the beginning of the dry season is red; that which is procured towards the end of environ is white and reclared the best The wilk called medangori la reared la Assam Proper oo a tree that le culti rated the silk called ercods is reared on the racions, in large quantities, lo

Rungpoor Io Camroon the ours are the common labouring cattle. In Assam Proper many buttaloes are employed in the plough. Sheep are very scarce and goats not numerous; there are few horses and oo sees. In 1625 tho British troops procured fouls, beef and real. The Assamese workmen can make locks, padlocks, sacrificial Laives spears spike-mails, clamps for boat-building, and match locks. These are moovations and in 1809 scissors were still unknown. The best goldsmiths are from Bengal. The person who wishes to have ony thing made furnishes the metal of which the workmen receive a share for their trouble as they have no carutal except a few muserable tools

The native women of all castes,

from the oncen downwards, wear the four kinds of silk preduced in the courty, and with which three-fourths of the people are clothed; the rich only decreby in cottons, mostly im ported from Darea. Considerable quantities of the two contact hade are exported. The raw ma ettal it seldom porchased each family spin ring and wrasing the sid which it rears; and petty dealers go round and purchase for ready money what ever run be seared for exportation, or for the use of the few persons who do not your their own rilk worms The proper will or read to only used for dhottes for the persons of high rank and the same may be said of the Medangeri silke the Muga silke clothe the middle clarers and the Leends covers the poor The cotton weavers are mostly foreigners and the cloth they produce usually of the cornert quality to 1809, there were some workers in irory in the Chinese fashion, who it was said could etraten the tooth of an elephaot by covering it with a thick coat of they and cow-dung and then ex point It to a fire According to native export the porful and simple arts of making butter and cheeve were at that date unlown. Lader the old native government,

and prior to the expulsion of the Barmese la 11-25 the custom-houses towards Bengal were usually farmed out to the best bidder; and the whole trade of the country was la fart monopolized by a few individuals, who a recably to the terms of a treaty concluded to 1703, ought to have levied only ten per ceot, on ex ports and imports but in reality extorted as much as they could. Formerly, salt was sold by I properns settled at Goalman to the amount of 100,000 maunds onnually; but the trade becoming monopolized by the furners of the customs that quantity in 1500 dinualshed to 35 000 maunds. This might also in part be attributed to o decreased demands for the population of Assam had been reduced by the long prevniling acar chy, and those who survived much

In 1809, the total impoverished value of the exports from Bengal to Assam was only 2,28,000 rapees, of which amount salt was 1,92,000 rupees, and muslins 10,000, the rest a variety of trifling articles, and a few fire-arms secretly smuggled. The value exported amounted to about 1,51,000 rupees, of which sum-total lac was 55,000, cotton 35,000, mustard-sced 22,000, mugasilk cloth 17,500, and muga-silk 11,350, ivory 6,500, and slaves 2,000 rupees. The balance was usually paid in gold, which is found in all the small rivers of Assam that flow from the boundary hills to the north and south, and more especially from the first. Now that the intercource is quite open, and the British power predominant, it is probable that many other valuable commodities and mineral productions will be discovered, and a brisk tiade pushed towards China and Ava.

According to native report, the gold comes from the mine called Pakerguri, and is contained in the sand at the junction of the Donsiri or Donhiri river with the Brahmaputra, about thirty-two miles in a strait line from Gohati. The miners begin to work from the 15th September to the 14th October, and each man is expected to deliver one and a half rupees weight of golddust, and may keep any excess, but must also make up any deficiency. In 1809 it was estimated that one thousand men were employed and paid in land, and that consequently state received 1,500 rupees weight of gold. A rupee's weight of gold was then valued at eleven rupees' worth of silver; but it was adulterated, and formed into small balls. which were carried to Goalpara, and sold at the rate of eleven sicca rupees for the weight of an Assamese This matter, however, requires further elucidation, which it will ere long no doubt receive the province of Seediya, salt is procured from brine pools, and said to be purer and higher-priced than the salt of Bengal.

While Hindostan was under the

Mogul emperors, the trade with Assum was a somee of considerable national profit, and for many years after the acquisition of the Dewanny in Bengal individuals gained largely, but it afterwards greatly declined. It does not appear that any merchants from Assam ever repaired to Lassa in Tihet, but formerly a commercial intercourse was carried on in the following manner. At a place called Chouna, two months' journey from Lassa, on the confines of the two states, there was a mait established; and on the Assam side there was a similar mart at Gegunshur, distant four miles from Chouna annual caravan then resorted from Lassa to Chouna conducted by about twenty persons, conveying silver bulhon to the amount of about one lack of rupees, and a considerable quantity of rock-salt for sale to the Assam merchants at Gegunshur, to which place the latter brought rice, coarse silk cloths, iron, and lac, the produce of Assam, and otter skins, buffaloe horns, pearls, and coral, previously imported from Bengal A peshcush or offering was then annually sent from the Assam Raja to the grand or Dalai Lama, but no other public intercourse, with the exception of the commerce above described, appears ever to have subsisted between the Tibet and Assam states.

All the royal family of Assam have a right to ascend the throne, except such as have on their body some blemish or mark, whether from disease or accident In order to preclude the danger of a disputed succession, it was formerly the custom to mark every youth that was not intended for the presumptive heirship by a wound on some conspicuous part, such as the nose or ear, his children, if unblemished, having still The sovea right to the throne reign and nobility in Assam live in thatched huts, with walls of bamboo mat, supported by saul posts, and built in the fashion of Bengal with arched ridges and mud floors, each apartment being a separate hut cording to the ancient Assamese constitution there are three great officers of state, named Gohams which of fices are heredstary in three great families. The word appears to be derived from the ancient language of Assam and the title is peculiar to the royal family The Bura Boruya is the fourth great officer, and next to him come six functionaries denominated Phulons. By far the greater part of the land in Assam is granted to persons termed Pykes, each of whom Is held bound to work gra tutously four months in the year, either for the Ling or whatever per non the royal pleasure substitutes. These people either work for their ford in whatever trade they are skilled or pay him a composition regulated by custom These piles are placed under four ranks of offi cers, supposed to command one thousand one hondred twenty, or ten men but these numbers ore m general only imaginary, and the whole militia a mere rabble, without arms, discipline or courage most Important jurisdiction is the province of Camroon odjacent to Bengal the greater part of which was wrested from the Moguls carly In the reign of Aurengache rains are the original petty chief tains of the country, paying over tain tribute and several of them are Garrows and other unconverted tribes

The officers onder whom the pykes or serfs of the crown are placed the rajas, and the farmers of the revenue have charge of the police. It is alleged that the guilty who can bribe escape with impunity, while the punishments of the convicted noor are atrociously cruel Capital pumshments extend to the whalo family of a rebel-parents sister, wife and children is appears probable that It was from this source that the rafts were farmerly supplied which were frequently seen floating down past Goalpara stuck full with human heads All the demostics are slaves and they are numerous every man of rank having several, mostly procured among the occessitous who

mortgage themselves Some were ex ported, and before the British pre dominance, about one hundred o pure easte were annually sold in The girls were chiefl Bengal bought by professional prostitutes and cost from twelve to fifteen ru A Cooch boy cost 25 rupeer a holita 50 slaves of impure tribe were sold to the Corrows. No necu rate estimate of the population car be formed but It Isknown to be ex tremely scanty in proportion to the extent of surface more than three fourthe of which is covered with jun gle The principal places ore Jor Gerghong Rungpoor and Gohati but they scarcely deserve the osme of towns, being mere col lections of hovels for in this wreigh ed country, under the old govern ment, there were no shops and bu few markets There are the remains however, of several remarkable mile tary causeways which must have been constructed with great labour but it is not known in what era.

The following are some of th principal castes and tribes of Assam The Itarhi Brahmins hove long of teined the spiritual guidance of th rajo and his principal functionaries but there is a distinct race of Brah mins designated as Assamese The are vardiles of hanole and ore sor to have been introduced from thene by the Cooch raja, Viswa Singh -Hefore their arrival there were learn ed men among the Kolitas who wer gooroos to the people generally ~ Many Camreop Brahmina are on settled in Assam some of whom ar said to be learned in Hindoe science but very few of either class worship the Section or female destructive energies, although some Pundits ar skilled in astrology and magic Som of the Assamese vaidikas have de eraded themselves, by become Varue and Instructing the impur tribes, a degree of turpitude to which none of the Bengal Vandskas hove a vet submitted In the eastern part of Assam Pro

per beyond Koliyabar besides th Khamties, Meerces, and Dophlas, th most numerous class are the Ahams or governing nation. Those legitimately descended from the compamions of Khumtai still retain the principal offices of state, and may be considered the existing nobility is generally understood that the Ahams, on then arrival, were not accompanied by any females, but espoused those of the country, and the royal family subsequently frequently intermarried with daughters of the adjacent chiefs; but since the introduction of caste the Ahams have restricted their marriages to their The whole have now own tribe. adopted the language of Bengal as their colloquial dialect, have renounced the eating of beef, and three-fourths have adopted the Brahminical doctrines as taught by the followers of Madhava Acharya. The Kolitas, many of whom are settled in the Rungpoor district, are also a numerous tribe in Assam Proper.— Those who can read are called Kayasthas, and are the religious guides for most of the others, and also for many of the Cooch, with whom they intermarry. They speak the language of Bengal, and have nearly the same customs as the pure Hindoos of that country, only they are still more strict as to eating and drinking. the Bengalese Brahmins they are considered pure Sudras, and their features are less strongly marked as being of Chinese origin than those of the Cooch, who are very numerous in the Assamese portion of Camroop, more especially in Dorong. There are a considerable number of Heluya keyots who cultivate the ground, and keyots who fish. first are pure, and assume the title of kaibarta; the latter are impure, but have not adopted the Mahomedan religion, as those in the British district of Rungpoor have done. The Moriyas speak the Bengalese language, but have abandoned themselves to the cating of beef and the drinking of strong liquors. In the province of Camroop there are many Moslems, but so degenerated into heathen superstition, that even the

faithful of Goalpara reject their com-

Nothing satisfactory has as yet been ascertained respecting the ancient history or religion of Assam, the national traditions having a strong tinge of the fabulous. According to these, many ages ago two brothers, named Khunlai and Khuntai, came to a hill named Khorai Khorong, which is situated south from Ghergong, the ancient capital, Khunlai taking with him some attendants, and the god Cheng went towards the south-east; Kluntai remained in the vicinity of the hill Chorai Khorong, and kept in his possession the god Chung, who is still considered by his descendants as their tutelary deity. These two brothers are described as having descended from heaven, and the sovereigns of Assam have always assumed the title of Swerga Raja, which possibly may have meant some part of Tibet or China. It has been conjectured that when these strangers first arrived, the country called Assam proper was governed by twelve petty cliefs, who without opposition submitted to them being so superior in dignity and education; this however is disputed by the Cacharies, who allege that prior to this epoch the country belonged to them. original territory occupied by Khuntai included two very long islands formed by the windings of the Brahmaputra, together with some of the lands adjacent, on both banks of that great river

Thirteen princes in regular sueeession from father to son, continued to govern these dominions with great success according to the rules of their ancestors. They eat beef, pork, and all other foods that shock the picty of Brahminical Hindoos, and drank wine without restraint or remorse of conscience The Deodhaings were then their spiritual guides, performing worship to the god Chung with great mystery and scercey, and possessing some books called Bulongu, written in a character which appears on the old coin, and which seems to have a strong affinity to that

of Am These books are said to be composed in a language which was formerly spoken of the court of Assum and are reported to contain a chronicle of their kings, whose as mes were as follow

1 khuntai 8, Chupinong, 2 Chokupha, D Chhuchong

3. Chutaopha 10 Churang 4 Chuliaong 11 Chujang 5 Chunong, 12. Chupkuk, 6 Tukophi, 13 Chukum 7 Chhachonong

Ail names strongly resembling the

From the beginning of the 17th century the Brahmmenl doctrines appear to have been gradoully encroaching on the old superstitions and about the middle of that age effected the converversion of the sovereign; since which dato the governing party have en tirely adopted the language of Ben gal, which has become so prevalent, that the original Assamese, spoken so late as the reign of Aurengache ls almost become a dead language Brahmins of various degrees of purity have long been the spiritual guides of the court and of three-fourths of the people but there remain many impore tribes who still sbandon themselves to the enting of beef and the draking of strong liquors. the parts odjacent to Bengal there are many Mahomedans hut they have degenerated into heathen su perstation so that they are rejected even by those of Rungpoor It does not appear that the Christian religion has ever penetrated into this region In 1793, when Capt Welsh expelled the Mahamari priest and his rabble from the capital, they retired to By angmars, sooth from Seediya.

Älthough the Assamese have traditions and it is said books, in the oncient language detailing their history before the Mahomedan invasion the Information collected is a syct tooimperfect to be depended upon. They are first noticed by Mogul muthorities in 1638 duning the reign of Shah Jehan, when they assied down the Brahmaputra and invaded Bengal hut were repulsed by that emperor in officers and creatually lost some of

their own frontier provinces. In the relen of Aurengrebe, his ablest general, Meer Jumlah, advanced from Cooch Bahar to attempt the congoest of Assam on which occasion he met with no obstscies to his advance, ex cept such as were presented by the nature of the country, until he arrived at the capital Gergong When the season of the rains began tho Assamese came out of their hiding pisces, and harassed the imperial army, which became very sickly and the flower of the Afghans Persians, and Moguis, pensited The rest tried to escape along the narrow causeways through the morasses, but few ever reached Bengal; and the As samese re-conquered the western provinces, which had been for some time in the possession of the Moguis. After this no more expeditions were attempted orainst Assam, which the Mishomedans of Hindostan have evec since viewed with singular horror as a region only inhabited by infidels, hobsohims and devils.

Hitherto the Assamese had been a warlike and enterprizing people and their priaces worthy of the govern ment ; but after their conversion by the Brahmins the nation suck into the most abject state of pusilingmity towards foreigners and into internal turbulence and confusion About A D 1770 the power of the spiritual teachers had acquired such strength ond their insolence had become so intolerable that the reigning raja with the view of curhing their pride, burned a huilding that had been erected contrary to law by one of them named Mahamari who guided a multitude of the lowest and most Ignorant of the people A rebelboo which cusaed was suppressed by the energy of the raja, but the insurrection burst forth with increased force under his son and successor Goorinath who was driven from the throne by the base odkerents of the Mahamarı priest who attempted to fill at with his own nephew defiroaed raja however having placed ismself under the protection of Lord Cornwallis that nobleman. a short time before his departure for

76

Europe, sent Captain Welsh, in 1793, with 1,100 sepoys, who placed Gaurinath on the throne of his ancestors, and shortly afterwards returned to

Bengal

During the insurrection of the populace under the Mahamari pulcet, the most horrid excesses were committed, and most of the genuine Assamese men of rank were compelled to fly for refuge to a large island formed by the Brahmaputra. these disastrous circumstances, the only individual who evinced any courage or enterprize was one of the hereditary counsellors of state named the Bura Gohaing, who, on Captain Welsh's return to Bengal, seized on the whole authority, expelled the Mahamari, and rendered the future rajas of Assam mere pageants under himself On the death of raja Gaurinath, which he is said to have accelerated, he expelled the lawful heir, but, to save appearances and conciliate the natives, he set up a boy sprung from a sputious branch of the royal family, whom he kept under the strictest seclusion from public affairs.

Many years ago the Bengal government, in consequence of orders from Europe, established a salt agent at Goalpara to monopolize the Assam salt-trade, but after several years' trial, the loss sustained was so great, that the Marquis Cornwallis, who 'always abhorred petty traffic, ordered it to be suppressed. Mr. Daniel Raush, a respectable Hanoverian, succeeded as principal merchant, but soon found himself creditor to the raja, the Bura Gohaing, and to many other chiefs, who had the address to get possession of his property, in spite of his caution and long experience of their bad faith. In 1796 he - quitted his factory at Goalpara, entered Assam, and proceeded to the capital, to endeavour to effect some compromise for his claims, amounting to three lacks of rupees, but on the route he was treacherously assassmated by the raja of Dring's (or Dorong) followers, and had his pinnaccs pillaged, and papers destroyed. In 1801 the Marquis Wel-

lesley, compassionating the distress of his widow and destitute family, despatched Comul Lochun Nundy, a native agent, to the court of Assam, to recover the arrears; in furtherance of which object he furnished him with letters to the raja and prime minister explanatory of his mission, and reminding them that they were wholly indebted for the reestablishment of their authority to the British succours under Captain Welsh. The agent Nundy proceeded accordingly to Jorhaut, the existing capital, where he found the raja and his minister ostensibly fully disposed to render him every assistance, but in private obstructing him so effectually, that after being for two years amused with promises and sham trials, he would have returned from that miserable court as empty-handed as he went, had he not on a frontier station recovered ten thousand runees from a custom-house officer, who had less power or more honesty than his superiors. Indeed Comul Lochun's description of the general anarchy, the injustice exercised, and the horrid cruelties perpetrated by whoever had the power, excites surprise that all the lower classes who had the means did not migrate into the British territories, which were close at hand, and contained immense tracts of unoccupied land.

In 1806 Sir George Barlow made another effort to recover something for Mr Raush's family, who offered to accept twenty thousand rupees in lieu of their whole claims, but with equally bad success The raja and his minister on this occasion, among other excuses for their want of punctuality, assigned the total anarchy of their country, and solicited the assistance of the British government to subdue the insurgents and tranquillize their subjects, an undertaking that would have cost one hundred times the amount claimed. After this evasive reply, the absolute inutility of addressing the Assam state on the subject appeared clearly established, yet, to leave nothing untried, in February 1813 another letter was despatched, recalling the circumstance to the rala's or eather to his mini ter s recol lection and expressing the expects tion of the British government that he would effect some equitable set tlement. In his reply, recessed during the course of 1814, the reaning ruja acknowledges the receipt of the letter addressed to his beather, the late cala, and then proceeds to describe the unfortunate con lition of his country brom the entward and northward the people of are hhamts Dophla and Vahamner, lind assembled and invaded his dominions , while on the li mee frontier a robber named Mnnick Ray, had male repeated inroads land waste their pergunnahs, and plundered the handar custom-house. The tenour of this rente was as uncatiafactory as the former had been but as the case the not warrant a stronger interference than remonstrance, all further proceed-Ince on the subject were su pended

About and prior to this period the western confines of Assam were much infested by bands of freebooters, principally Burkindauses from Unper Hindostan who availing them selves of the local peculiarities of the Bijnee estate had long been in the practice of waging a system of plunder and Incursion on the Assam villages which he contiguous to the Bijnee frontier The first regularly organized hand of this description consisted of the followers of Gholsum Ali Beg a Hindostmy Mogul who had been entertained by the Assam rains to fight against the Mahamari the inveterate enemies of the Assameso principality The Burs Gohaing soon after his usurpation dis mused Gholaum Alı ond lus band and, as they asserted, turned them out of the country without paying them their arrears. On this event Gholaum Alı took up a position on the confines of Bijnee beyond the Ayr river, from whence he continued to make incursions into Assam The first attack was on the hander chokey or custom house in 1805 at the head of 150 men, whee he storm ed the post and carned off such a booty that on twelve of the gang, who were shortly after seized in

Mymuning, hasteen hundred repers were frund. Front this must forward (Johlann All continued to lurk on the confiner of Assam and B jace with about eighty followers not only rawging the frontier vil lages of Assam, lat occa somily intrading the Interior, and plandering basts of valual te merchandire as they passed Jown the Manns treer, which separates Bance from Assam

During this period of anarchy the above adsenturer is sald to have obtained a kind of sovereignty over sixteen villages on the castern hank of the Manas from which he derived a considerable revenue rendily peld by the inhabitants for protections but he was at length vanquished by another corps of freebooters led by a Hadottany Rajpoot named Manick Ray, who drove Cholanm Ali into Bootan and usurped his lucrative post on the frontiers of liquee where he long harboured doing infinite mischlef to that branch of the Goulpara trade natigated on the Manae and making a glitly plus dering Incursions into Assam he oed his predecessor Gholaum Alt Beg were frequently pursued by the detachment of British Separa ata tioned at Jughigopa but the orders of government being peremptory against passing the Ayl river all their efforts were frustrated and from the Bijneo rais no coercivo could be looked for as he was strongly suspected of shar ingle the profits of their depredations. Under these circumstances the harussed tennntry of the adjacent pergunnaha mostly gave up all idea of having a fixed residence retiring at night into the British provinces where they kept there women and children. and re-crossing in the morning, to cultivate their fields in Assam

Such was the deplorable condition of this fertile country in 1814 at which period the great bulk of the people were extremely onsions to throw off the tyoke of the Bura Gohang but such on the other hand was in strains and their pusillaring that his rule was nevertheless acquiested in with the most unqualified submission. The rightful helt to

the throne at that date was Birjinauth Coomar, who was prevented by the magistrate of Rungpoor from levying war against the usurper, with a body of troops raised in Bengal. was then generally supposed that the Bura Gohaing, knowing that Birga-nauth was the legitimate heir, had disqualified him for the sovereignty, by slitting or otherwise disfiguring one of his ears, in which case he could only reign in the name of one of his children. The next sovereign, Chunder Khant, being dethroned by the Bura Gohaing, fled into the British territories, and Poorindra Singh was placed on the throne, but soon after compelled to follow the route of his predecessor.

The Bura Gohaing then seated himself on the throne; but the time of this old king-maker was now come, for Chunder Khant having repaired to Ava, and procured assistance from the Burmese, returned with an army and compelled the Bura Gohning to seek refuge in the British territories, where he took up his abode in the vicinity of Jughigopa In 1821 he re-entered Assam with a body of troops which he had collected in Bootan, but was routed by the Burmese auxiliaries of Chumler Khant, who soon after endeavouring to get rid of his too powerful allies by trenchers, was driven from the throne and compelled to repair to Bengal In June, 1822, Menghee Maha Theliah, the commander-incluef of the Burmese forces, was proel timed rays of Assam, the sulyugation of which he had now completed, subordinate to the sovereign of Ava

Now began the never-failing aggressions that invariably take place when a prosperous native power correst in contact with the boundaries of the British dominions, which at last terminated in a rupture about the multy island of Shapurce, on the costs of Chitagory. A British detechnicat under Colonel Richards, then entered As any, and in the course of 1825, expelled the Burness neurons of 1825, expelled the Burness neurons of the country, which must be referred by unitered to a plete possession of the country, which must be referred by unitered to a detect

an integral portion of the British empire in India Indeed, without population and with an unknown frontier, this phantom of a kingdom could not for a year exist on its own resources, it must consequently be supported by its conquerors; a civil and military establishment appointed; a fleet boats maintained on the Brahmaputra, and many other expensive drains ereated on the Bengal treasury; such is the uncontrollable progress of events in India - (T. Buchanan, Sisson, Public MS Documents, Wade, Klaproth, Comul Lochun Nundy, Licutenants Burlton, Bedford, Ker, N. Jones, Neufville and Wilcox, Abdul Russool, Gardner, &c.)

Assonnagur (Assadnagara, the city of lions)—A district in the province of Bejapoor, bounded on the north-east by the rivers Neera and Beema Like the rest of the province, it has an irregular surface, but is nevertheless populous and fertile, having many hill streams for the purposes of irrigation. The chief towns are Punderpoor, Khattaou,

Nanzerch, and Salpa

Assi are —A town in the province of Aurungabad, forty-five miles S by E from Damaun. Lat 19° 47′ N., lon. 73° 5′ E.

Assemble —A town in the province of Oude about a mile from Meah-gauge, and overlooking a small lake. Lat 26° 49' N., Ion 80° 31' E.

Asser—A small town in the province of Berar, twenty-eight miles north from Jaulna. On the 23d September 1803, a hattle was fought near this place, between the British army under Gen. Wellesley, consisting of 4,500 men, 2,000 of whom were Europeans, and the combined armies of Dowlet Row Sindia and the Nagpoor Raja, amounting to 30,000. In space of the disparity of numbers, the British were completely victorious, although with severe loss in proportion to their numbers, tiz.

Total ..... 1,566

The confederates field from the field of battle leaving about 1 200 alain ninety-eight pieces of cannon seem standards their while camp equipage and n large quantity of am munition. This victory is the more remarkable as above 10 000 of 5 m dia a infantry had been disciplined, and were in part officered by French and other Ecoropeans.

Astour—A small town in the province of Allahabad eight indes from Teary Lat 24° 36 \ lon 78 u0 1

ATAMORITAY—A large village in the Carnatic on the Marawa coast; district of Valdura, where there is a commodious chooltry and a ferry across that branch of the Vagaroo which here disembogues likely into the sea. It stands about twelve miles travelling distance east from Hamnad,—(Fellard &c)

ATCHERA—A town of consider able extent in the southern Concan or Bhoonslah country fifty-six nules north from Goa. Lat, 167 II N, 100 737 32 L. It may be approach to 137 52 L. It may be approach cilly seawithin two miles, where the ancherage is In five fathons with o moddy bottom. It was formerly o place of great reputed sancitive, and a ootorious deput of jurnied goods but in 1818. It was captured by o British detacliment, which versit completed the conquest of Salace, o distinct about 180 miles in curcumference which had belonged to the Feshwa.

ATTAIR.—A town in the Agra province, south of the Chumbul and forty-six miles 5 E from the city of Agra lat. 20° 44 N, 100 78° 20' E

ATTABA.—A town in the province of Allahabad alateen miles north from Calinger; lat 25° 20' N., lon 80° 3.' L

ATTATETEE.—A large district in the aouthern division of the Gujernt province hetween the 20th and 21st parallels of north latitude and bounded on the west by the acs and the city of Surat. It is interacted by many streams flowing from the cast-

ern hills, but not by my river of magnitude. The principal towns are Damaun Dhurrumpoor and Baunada. In 1802 this district which was maraged to the British government by the Guicowar, yielded an annual resease of sia and a-balf lacks of rupees.

ATTERSONAL—A town in the Gujerat province twenty-four miles E. from Alimedahad Lat 23°4 N, Ion 77°3 E.

Arrock (Alac a famt) The town is attuated on the east aide of the Indox, and to the present day returns the oncient name of Varanas or Benares; but it is more generally known by that of Attack The old fortress was built by Acher A D 1581 Lat 827 567 E. 100 71° 57 E.

About ten miles to the north of Attock the Indus la seen assuing through the mouotmos by a number of chancels which are reduced to two where it receives the Cabul river At this point of jonction there are many rocks through which both rivers dash with much Impetuouty and noise but afterwards they collect into one led and proceed through the mountains with a deep and par row atream between high perpen reaches the fort of Attork, the Indus le about 260 yards broad (on the 18th June 1809), but the chancel is too deep and the current too rapid to admit of its being occurately sounded The banks are of black stone polished by the force of the stream and the white sand it con teins, so as to shane lake marble. In the midst ore the famous rocks of Jemalia ond Lemalia, but the reported whirlpool does not rage in the month of June

The modern fort of Attock (the residence of the Afghen government in 1809) stomit oo o low hillock, on the east bank. Its figure is that of n parallicipants, loving the shortest faces (those parallel to the river) oboat 400 yards long and other audeaboot double that extent. The walk are of posisied atone; but although

the place makes a handsome show. it is commaded by a rough hill, from which it is only separated by a ravine, and being situated on a slope almost the whole of the interior, and the reverse of the walls on their faces, are visible from the opposite The town was formerly considerable, but is very much decayed, having been since 1818 in the possession of Runjeet Singh, the Seik Rajah of Lahore. On the Afghan side of the river opposite to Attock is a small village distinguished by a kind of fort erected by Nadir Shah, and a fine aqueduct made by some former chief of the Khuttick tribe to irrigate the contiguous lands withstanding the rapidity of the river here, it is easily passed, both in boats and on the inflated hides of oxen.

It is remarkable that the three great invaders of Hindostan, Alexander, Timour, and Nadir Shah, in three distant ages, and with views and talents extremely different, advanced by the same route with hardly any deviation. Alexander had the merit of discovering the way: after passing the mountains he encamped at Alexandria Paropamisana, on the same site with the modern city of Candahar, and having subdued or conciliated the natives on the north west bank of the Indus, he crossed the river at Taxila, now Attock, the only place where the stream is so tranquil that a bridge can be thrown over it.—(Elphinstone, Rennell, Wilford, Dr. Robertson, &c.)

ATTOWAH PEEPLEA.—A town, in the province of Malwa, twenty-four miles S E from Dewass. In 1820, it contained 500 houses and was the head of a pergunnah; lat. 22° 48' N., lon 76° 25' E

ATTYAH—A small town in the province of Bengal, district of Jelalpoor, forty-four miles N.W. by N. from Dacea. Lat 24° 10' N, lon. 89° 48' E.

Auggun —A large town in the province of Malwa, belonging to Sindia, forty miles N. by E. from Oojein; lat 23° 43′ N, lon. 76° 1′ This

place is beautifully situated on a rocky eminence, between two lakes or tanks 1,598 feet barometrical measurement above the level of the sea. It is surrounded by a stone wall, and has a well-built ghurry or native fortification within In 1820 it was the head of a pergunnah, and contained five thousand houses; but with the exception of one street, the interior, although of considerable extent, is a mere aggregation of mud buildings—(Malcolm, Fullarton, &c)

Augur —This is the name of a modern geographical subdivision of that portion of the province of Lahore situated between the Indus and Hydaspes; but little is known iespecting its topography, except that, according to native reports, it contains several salt mountains, with which substance the soil of this quarter of Hindostan is every where impregnated. The division of Augur hes between the thirty-second and thirty-third degrees of north latitude, has the Indus to the west, and Sinde Sager to the south, is thinly peopled, and comprehends no town of note In some old maps it is denominated Ghepp or Dun Ghepp.

Aul.—A town in the province of Orissa, district of Cuttack, fifty miles from the town of Cuttack in a northeastern direction. In 1813 the tribute paid by the proprietor was 26,680 rupees, his remaining profit was estimated at 15,000 rupees per annum. This is a valuable property, and although only tributary, is situated within the Mogulbundy, or that portion of the district subject to the British regulations In extreme dimensions it is reckoned twenty miles from north to south, by about ten from east to west.—(Richardson, &c.)

AUMNIER —A large and populous town situated in the province of Gundwana, and on the river Wurda, which is here in January a very small stream and easily passed. It runs over a rocky bottom, and forms some small cascades. Lat 21° 25′ N, lon. 78° 30′ E., fifty miles N. by W. from the city of Nagpoor.

## ለሆበሆኑር ነክላው

A large province of the Decenn. situated principally between the eigh teenth and twenty-first degrees of north latitude To the north it is bounded ) y the provinces of Cujerat, Candelds, and Berart oo the south by Hermoor and Beeder t to the east It has Berar on I Hyderalisde and on the west the Indian ocean In length It may be estimated at 700 miles, ly 160 the average breadth The courses of the rivers Veera and Beem's mark its separation on the south west from the coatiguous province of Beiancor

Tids province is also known I v the names of Ahmednugger and Dow letalm It the first having been Its capital during the existence of the Nigam Shaby dynasty and the latter during a short-ined dynasty esta bli hed by Mallel Amber on Alijs sinus from 1000 to 1035 rungabad was partially subdeed under the reign of Acber from which penod Ita hunts were in a constant state of fluctuation until that of blish Jehan In 1631, when Dowletabul, the capital being taken the wholo country was transformed into o sou hab of the Mogul empire then at his Oo this event the seat of zenRh government was removed from Dow-letabad to the neighbouring town of Gurkn which becoming the far ourte residence of Aurungzebe while viceray of the Deccan, recived the name of Aurungabad which appellation was subsequently communicated to the province At present the prin cinal modern territorial and political aubdivisions beginning from the north west, are the following er

12 Ahmedanggar 17 Jooneer

The surface of this province is very irregular, and in general mountainone particularly towards the western chants where the hills attain a great altutule The tract to the east of the ghauts, including much the larger portion of the soulah, is also an elevated region forming part of the table land of the Decean rarely less than I,NUO feet above the level of the sea, and frequently much more The territory consequently abounds with natural fortresses and strong holds which enabled the Maharattas whose native country it is to give such infinite trouble to Aurengache and his generals. If he is the grain cheffy culth stedt the other regetable productions are much the same as in other parts of the Decen dens and fields in the immediate neighbourhood of the villages are very generally enclosed by hedges of the prickly pear and the milk plant the first of which forms an excel lent fence The elimate is particu larly favourable for the production of European foults which preive here at a greater degree of perfee tion than in any other quarter of Handastan, more especially the peach strawberry, and a very fine variety of the grape of a large size and eylin dreal form Tho nectarine has been planted and borne fruit at Seroor The figs are delicious pear Poona and the melon which is universally reared risis in flavour the choicest fruit of an English green house. Tho oranges are large but Inferior to those of the Silbet district, and the unrivalled orange of Daoudeaundy in Tipers in which last the pulp nd heres to a very thick skin only by fibres.

Anrungabad possesses no rivers of magnitude although it contains the sources of many such as the Beema, Neera and Godavery which do not swell to any considerable dimensions ontil they quit its limits. On tho lanks of the two first horses for the Maharatta cavalry were formerly reared in great numbers but though

a hardy breed, they are neither strong nor handsome, although they easily supported the light weight of their predatory riders. The bazars of the cities and larger towns have a sufficiently animated appearance; but in the smaller communities, the dwellings being generally without windows, or other apertures towards the streets, and roofed with flat earthen terraces, present searcely any thing to the eye but dreary masses of dead The religious edifices are distinguished by various architectural peculiarities from the old temples usually seen in Upper Hindostan, as well as from those more to the south: the porticoes are almost universally large, and occasionally nearly as large as the whole sanctuary. In some towns the pagoda rises in the form of a twelve-sided pyramid, divided into compartments, each ornamented with a mythological device in bas-relief; while in others, where the form is quadrangular, the roof terminates in a huge elevation of a cupola

Much the larger portion of this province, and almost the entire seacoast, having long been possessed by the Maharattas, fair maritime commerce never flourished, piracy by sea and plundering by land having always been their favourite employment, until coerced by the strong arm of the British government Until A D. 1818 three-fourths of Aurungabad were subject to the Peshwa; and the remainder (with some exceptions) to the Nizam; but since that eventful year, and the overthrow of the former, nearly the whole has, directly or indirectly, become subordinate to the British nation, with reservation of the rights of certain feudatory chieftains, whose territories will be noticed under their respective heads.

The population of this province, and more especially of the north-eastern quarter, is in proportion much below that of the best British districts, the proportion of religious being about one Mahomedan to twenty Hindoos. The Maharatta language is principally used, but

there are also various local dialects in common use, while Hindostany and Persian are current among the higher classes; the first in conversation, and the last in the revenue re-These last (the nobility) have now fallen, probably never to rise again: but no doubt the great majonity of the humbler classes must, in the course of time, have their condition ameliorated by the introduction of British laws and institutions. a very remarkable circumstance, however, that although this province has been the grand cradle of the predatory bands that for more than a century past desolated Hindostan, and for two years (1817 and 1818) had been the seat of external invasion and internal warfare, yet in 1820 no part of the whole Deccan, or Southern India, exhibited such an appearance of undisturbed tranquillity and repose. Crimes of violence were rare, and highway robbery so uncommon, that it was said a single armed man might carry a lack of rupees in perfect security from the Krishna to the Godavery.—(Fullarton, Wilks, Ferishta, &c.)

Aurungabad (the place of the throne).—The capital of the province above described, situated in lat 19° 54' N., lon. 75° 33' E. This city, originally named Guika, stands a few miles from Dowletabad, which being taken from the transient dynasty of Mallek Amber, in 1634, the Moguls removed their head-quarters to Gurka; which having subsequently become the favourite residence of Aurungzebe, it received a more sonorous appellation It continued for some time a metropolis, after the modern Nizams became independent of Delhi, until they found its vicinity to the Poona Maharattas inconvenient, and migrated to Hyderabad. It is still within the limits of the Nizam's dominions, but, like many other famous eities of Hindostan, is greatly fallen from its ancient grandeur, presenting the usual symptoms of a descrted capital, a scanty population among extensive ruins.

The tirer howlast a mountain stream over which there are two substantial bridges regrettes the city from its principal soluth tie lie un Poors on the north site is marshy ground of some extent. In which fice is cultivated; and on the left enter ing by the Delhighte, is a con Her ab a tank overgrowa willi rank aquis tie plants, from both of which unwholesome estisistinns att e central parts of the city are also very iou indeed almo t on a lerel with the marshy ground. For two-thirds of the year the winds here are from the Il 4.11 , while easterly winds pre vail in November December and Ja The range of the thermo-RUAFT meter during these three manths is from 50° ta 60° during the twenty four hours the alternations of hert and cold being as great as they are audden During the hot months the range af the thermometer is fram 78 to 100 labrenheit The arcrage supply of rain may be taken at thirty alx inches that far the three monsoons prior to 1626 there had not been even twenty-one luches Intermit tent fevers are here prevalent at all seasons. The military cantanments stand on a rocky plain about a mile to the south west of the city and le reckoned healthy while the city Itself is known to be the reverse Tropical fruits of every description are pro duced here in abundance, the grapes and aranges being scarcely inferior to those of I urone. Aorungabad is ataoted in a hollow

and when approached from the north east its white domes and minute are seen rising from below amidst a gror a of trees. Its locality has been parte entarly favourable for ensuring an abundant supply af excellent water which is brought in stone conduits from the neighburing hills, ond dis tributed through earthen ; Ipes to the aumerous stone reservoirs in every quarter, from some of which fuun tains spring up in the centre. The main atrect or bazar is nearly two miles long of good width and resembling in its nichitecture the principal street of Oosein; at one extre-

mity is the spacious quadrangle of the chowle and at a last detrace a hand one modern market, named tha sliph-nage The rums of Aureng sche a palace still corer an extenuve space but they are rapidly disappear ing The eclebrated mausoleum erected by his order to the memory of his dangliter has some resent blance to the Tauje at Agra, but in erery respect fras impoung domes are af winte marble and clustered like those of the Traje last mferror in size fulness and splendour and throughout the whole there is o comparative poverty in the materials in many places stucco is substituted for marble and the exquisite moune The fakeer a lea-reliefs are wanting tomb is an in unificant structure and chiefly remarkable for its fine reser voice with their numerous ici d'eaux ortificial cascades and water nulls Connected with this tomb is a morque and manyather mosques are dispersed ever the town, but none of remark able structure

In the bater which is extensive various kinds of commodities, Furgpean as well as native particularly silks are exposed for sale; and the populatian although much redired is still considerable. In 1820, Italiah Govind Bukeli (the brother of Rejalt Chundoo Laul the prime mini ter at Hyderabad) resided at Hyderabad as gorernor at the ourthern portion of the Nizam a dominions in this quarter The population of Aurungabad gradually decreased until 1815 when without any apparent couse the city began to revive. In 1825 it con tained about 60 000 persons and covered a spot of ground about seven miles in circumference Travelling distance from Poons 186 miles from Bombay by Poons, 254 from Hyderahad 295 from Vindras 647; from Della 750 and from Calcutta 1 022 miles.- (Fullation Lalcutta Medical Transactions II die the Duke of II el lington Fit\_clarence &c)

Antonous —This place stands in the midst af a wild and woody coun try about fourteen miles N V from

•

AVA.

the city of Cuttack. On the north it is bounded by the tributary state of Durpun, and on the west by the fortress of Tigria, and its extreme dimensions are fifteen miles from east to west, by twelve from north to south Owing to the quantity and density of the jungle, the country is reckoned very unhealthy, and in 1813 the annual tribute paid by the zemindar was only 6,868 rupees The articles produced are rice, and various sorts of grain, tobacco, cotton, sugarcane, and oil.—(Richardson, §c)

AUTMALLICK—A talook in the province of Orissa opposite to the Boad zemindarry, thus named because it was formerly covered by eight persons in succession. It consists almost entirely of hills and jungles, and in the trienmal settlement of 1818 was assessed at only 800 sicca rupees—(Roughsedge, §c)

Autoon —A town in the Hyderabad province, twenty-five nules west by south from the city of Hyderabad Lat. 17° 17′ N, lon 78° 10′ E

## AVA AND THE BURMESE EMPIRE.

An extensive and once powerful empire in the south-eastern extremity of Asia, where, until the late war, it occupied, either directly or influentially, almost half of the region described in maps as India beyond the At present the Burmese Ganges. empire, strictly speaking, is limited to the kingdoms of Ava and Pegu; Arracan, half of Martaban, Tavoy, Tenasseum, and the Mergui isles having been ccded to the British government, and Junk Ceylon recovered by the Siamese, while Assam and all the adjacent petty states have been liberated from its yoke How far its influence now extends to the east of the Martaban or Saluen river is uncertain, but several of the Shan tribes are known to be tributary, and also to furnish on

the south by Siam, the sea, and the British district of Martaban; to the west it has the sea, Arracan, and Bengal; and on the east, Siam and the Shan nations. In length, including tributaries, it may be roughly estimated at 560 miles (from lat 16° to lat 24° N.) by an average breadth of about 300 miles. This is given merely as an approximation, for beyond the banks of the Irawady little is known respecting the interior. The genuine Burmese designate themselves Mranmas, and their country Mranma

North from Pegu, on both sides of the Irawady, belongs to the Burmese, who for two centuries have been the most powerful nation in this part of Asia. By Europeans their country is generally called Ava, from a corrupt pronunciation of Aénwa, the vulgar name of the capital, and the names Mrama, Burma, Birma, and Brahma, often given to the nation, are probably all corruptions of Marama used by the people of Arracan. The principal rivers are the Irawady, the Kienduem, the Saluen of Martaban river, the Pegu river, and the Lokiang At present the only beacoast possessed by the Burniese is in the districts of Rangoon and Basseen, at the southern extremity of Pegu. In Ava Proper the difference between the east and west banks of the Irawady is remarkable, the east being barren, arid, and parched up, especially in the neighbourhood of the petroleum wells, whilst the west is fertile and well supplied with moisture, and yields in abundance almost every tropical production The country between Prome and Tongho is hilly, without navigable rivers or practicable roads, and almost destitute of fresh water.

The seasons in Ava, which resemble those of Bengal, may be divided into three, the cold, the hot, and the rainy The first begins in December and lasts until February, during which time the morning fogs are dense, and last until near ten o'clock, when the

knowledged inferiority to the teak of Malabar. A considerable trade is said to exist between Amarapura and Yunan in China. The principal export from Ava is cotton, which is transported up the Irawady in large boats as far as Bamoo, where it is bartered at the common jee or mart with the Chinese merchants, and conveyed by the latter into the celestial empire; as also amber, ivory, and gems, betelnut, and edible nests brought from the Eastern islands. The returns from China are raw and wrought silks, gold leaf, preserves, paper, and some The Birmaus, utensils of hardware like the Chinese, have not any coin, silver in bullion and lead being the current monies of the country.

The Burmese empire is subdivided into provinces and districts of very unequal magnitude and importance, each governed by a viceroy or military chief, called Maywoon, aided in his functions by one or more subordinate officers, named Raywoon, according to the exigencies of his command. These form the lotoo or conneil, in which is vested the power of life and death, for, although anpeal to Amarapura is permitted, the difficulty and expense render the privilege nugatory. These governors and military commandants have no salaries from the crown, but are allowed certain fees on law-suits, a per-centage on taxes, and may levy and extort contributions at their When the king makes war, pleasure or the kingdom is invaded, the Maywoon provides the quota of men at which the province is assessed, and exacts extraordinary taxes for their equipment and support.

Besides these there is a subordinate class of functionaries named meutinogies, or civil chiefs, of whom there is one in every pergunnal, town, and village (like the pitells of the Decean) in the empire. This office is generally hereditary, and the possessors of it have great influence in the management of their respective quarters, as through them the taxes are collected and the vice-roy's orders promulgated. They also

hold courts for the trial of petty considerable derive causes, and emolument from the fees they are authorized to levy, and, owing to their utility at home, are usually exempted from military service. 1825, as the British army advanced, these useful functionaries returned from the woods and jungles into which they had been driven with their people, and were reinstalled in their former departments, which they administered so effectually, that during the long halt of the British army at Prome, surrounded by an immense and agitated population, only one instance of capital punishment took place, and that a conviction of robbery accompanied with murder.

The Burmese administration of justice is at once rude, unskilful, violent, relentless, and rapacious. There is no species of pain or penalty, even death, from which exemption may not be purchased by a bribe, the highest bidder being sure to gain his cause in a civil court. liquidation of fines, wives, daughters, and sons are sold and mortgaged. A minute register of every inhabitant above three years of age is kept, containing, from superstitious motives, the day of their nativity, their names and ages, as well as those of their wives and children, that all and each might be rendered responsible in their persons for their relatives. Persons, when they have been injured or aggræved, are fined, even years afterwards, for not having complained, having thereby defrauded the government and its officers of the fees and profits that would have necrued from the investigation. the 7th February 1817 seven persons were brought out for execution at Rangoon. The first was fired at four times without being hit, and was in consequence declared to be supernaturally protected, and pardoned; the second was shot dead, and the It was subseother five beheaded quently ascertained that the supernatural culprit had paid the governor a large fine

sessed by them greatly inferior to that of the Hindostanies, or any nation of western Asia, and even worse governed and less civilized than the Sumese and Cochin-Chinese. may be attributed to the absence of a hereditary nobility, wealthy land proprietors, and of an elevated and intelligent hierarchy. Without these, knowledge eannot accumulate; nothing is permanently added to the prior fund, which is the natural cheek to misgovernment. According to a Burmese account, the provinces south of Prome contain 160 townships, and about 2,080 villages, with 175,000 houses, in each of which, according to the Burmese custom, from one to four families reside Assuming two families, and five to a family, this estimate would give a population of 1,750,000, or about forty to the square mile area of the provinces south of Prome occupies about one-third of the whole empire, which, supposing it peopled in the same ratio, would give a total population of 3,500,000 persons (including 500,000 Caitans), which is probably not very remote from the truth. It appears to have heen the usual practice of the Burmese, and indeed of the ultra Gangetic nations generally, to transport the natives of their conquered provinces to another quarter, and repeople them with Burmese.

There is no doubt the population and resources of the Burmese empure had been greatly exaggerated by former travellers, and more especially by Colonel Symes, as may be inferred from the following statistical facts recently acquired. The three towns of Amarapura, Ava, and Sakaing, with the districts attached, contain an area of 283 square miles, composing by far the best cultivated and most populous portion of the It is nearly exempted from empire taxation, being favoured through ancient and established usage, to the detriment of the rest of the country. According to the public registers, the above space contains 50,000 houses, and each house estimated at seven

mhahitants, which would furnish an aggregate of 351,200 persons. city certainly does not contain 30,000 influbitants, and in population, wealth, industry, and trade, is grently lielow Bankok, the capital of Stam. other large towns, such as Rungoon, Prome, Monchahoo, &c., not above a dozen m numlier, do not contum more than 10,000 inhalitants each; indeed, in 1827, Rangoon was faund only to contain hetween 8,000 and 9,000 by an actual census.

Onc-tenth of the produce is exacted as the authorized due of government, and one-tenth is the amount of the king's duty on all The reforeign goods imported venue arising from customs on imports are mostly tuken in kind; n small part converted into cash, and the rest distributed in hen of salaries to the various departments of the state. Money, except on the most pressing exigencies, is never disbursed from the royal coffers. one man the fees of an office are allowed, to another a station where certain imposts are collected; a third has land granted in proportion to the importance of his employment. On the other hand, every officer of government, from the highest to the lowest, according to his rank and station, makes an innual fixed present to the king,

The Burmese may be described as a nation of soldiers, every man in the kingdom heing hable to be called on for his military services. In their usual mode of warfare, a Burniese rarely meets his enemy in the open Instructed and trained from field his youth in the construction and defence of stockades, their wars prior to 1824 had been a series of conquests, all the adjacent nations having fallen before them. With reference to mere animal strength, a Hindostany sepoy is certainly not a match for a Burmese, but, alarmed and confounded by the steady advance of the European soldiers close up to their strongest works without firing a shot, distracted by the showers of Congreye rockets, shrapnell

shells, and horder and o trial hed by the smokin- phenomenon of a steam boat they fell before superior know ledge and energy All'rman + il her has not even the con obtion of seeing his general partakin his dan gers he after guing direction what to do this cantions hero to nally leaves the stocks in The investment of the Sheo Daron pagods at Han goon was the bol lest un lertaking of the Burniese during the late war There they advanced within point blank musket range and improving like rability insee a hot fire of shell bombs and shrapnells for are days Their defence of I)onaliew also entl tles them to much praise. Our late anthussador however, demes their chiefs entier conrage intelligence or public spirit and invists that the genius of the Barmese Institutions civil and military, are quite hostife tu the generation of martial liabits and feelings among the mais of the people Indeed he did not hentote to consider them when compared with the fighting tribes of Hindortan, a people eminently tame and un warlike

In their features the Burmese bear a touch peacer recepblance to the Chinese than to the natives of Ilin closton They are not tall in stature but are octive and othictic and have a very southful appearance from the costoio of plucking the beard instea ! of using the rator Both sexes colour their teeth eye lashes and the edges of their eye-hids with black and in their food compared with the Himiostanies ore gross and uncleanly The culmory system of the Bormese and other Indo-Chineso nations la nevertheless much more agreeable to a Loropean palate than that of the notices of Hindon Some of their ragouts how ever ore peculiar one of which sent with others by the king to the mem bers of the late embassy by way of refreshment ofter o boot-race was o dish of fined enekets Although their religion forbids the slau-liter of animals yet they opply the interdie tion only to those that ore domest!

All gure is ergerly sought after and in mony places pullicly Hepti'es such or heards guenos un i enakes constitute a part of the sulphstence of the lower classes To attan era they grant the most Ideral Indulgence, and if they chance to shoot at and kill a fat bullock it The Bur Is a scribed to needent mese burn their dead, and place Impliest frith hi talismans angueies and jo heral astrology The first are uenally written on sheet gold or silver, and inserted under the akin of the person to be protected. All the Hirman sol hers ore tattoord, but the Samese con plet the practice as bar Amnng this people the sit torous ting posture is the most respectful but atrangers are apt to attribute to insolence what in their view is n mark of deference The British troops found the Burmese extrara gantly fond of spirits and they soon proused the language of their con querors sufficiently to mil for a class of I nalesh water (gin) and bramb; but although their country abounds with cattle, they make no use what ever of their milk

In this empire every thing belong ing to the king has the word 'shoe or gold prefixed to it; even her ma jest) a person is never mentioned but in conjunction with that precious metal. withstanding the well-formed arches still to be seen in many of the ancient temples, Burmese workmen enn no longer turn them: which shows how easily an art once well known may be lost. Mosonry in the latter ages has been much neglected, buildings of wood, thatch, and bamboos, having superseded the more solid struc-No chief, tures of brick and mortar however, will enter the house of nn inferior, or even of nn equal, for to do so implies a diminution of dignity. The king never enters the house of his brother, although he is often seen walking arm in arm with him in the

court before his dwelling. The Palı language constitutes at the present day the sacred text of Ava, Pegu, and Siam, the Birman dialect has borrowed the Sanscrit alphabet, in which it is constantly written. But, notwithstanding this appearance of intimacy, the missionaries, in a specimen of the Lord's Prayer in the Burmese language, could scarcely discover three genuine Sanscrit words. Many syllables, however, according with those of the Chinese colloquial dialect are to be found, and the language adopts two of the four Chinese tones The Sanscrit language is here found arrested in its progress eastward, and constrained to lend its alphabet to do little more than clothe and express another system, said, by those who have studied it most closely, to be of mere syllabic origin, and retnining tones completely foreign to the Sanscrit system. The character in common use throughout Ava and Pegu is a round Nagari, derived from the square Pali, or icligious text, formed of circles and segments of circles variously disposed, written from left to right, and usually engraved on palmira leaves. Every place of note in the kingdom has two names, one in the vulgar tongue, and the other The number of in the sacred Pali. dialects spoken in the Birmin empire is said to exceed eighteen

The most remarkable antiquities are to be found at Pagahm, Chagaing, Sanku, and Anglewa. The ruins in

best preservation, and largest in extent, are those of Pagahm, which extend twelve miles along the bank of the Irawady, and five inland. Mnny of the temples there are still entire, and exhibit a superior style, far beyond the utmost efforts of modern Burmese architects. In one of the old temples at Pagalim, Brahminical images of Vishiu, Siva, and Hunimann were found, when visited by the embassy in 1827, besides many inscriptions in the Deva-nagari character. In one spot, where the temple of the Arracan image of Gaudma stands, the late King Mindernja Praw had collected 260 monumental inscriptions, some on white marble, but the greater number on sandstone, mostly however referring to the founding of some temple or monastery.

The laws of the Burmese, like their religion, are Hindoo, indeed there is no separating their laws from their Their code they name religion. Derma Sath, or Sastra, which is one of Menu's commentaries. Their system of jurisprudence, like that of the Chinese, provides specifically for almost every species of crime that can be committed, and trial by ordeal and imprecation are permitted. They are not shackled by any prejudices of caste, restricted to hereditary occupations, or forbidden to associate with strangers, as are the Hindoos of the Brahminical persuasion. A knowledge of letters is very generally diffused, and many can both read and write the vulgar tongue; but few understand the scientific or more sacred volumes. All kioums or monasteries are also seminaries for the education of youth, to which the surrounding inhabitants may send their children, where they are educated grntis by the Rahaans or monks, who neither buy, sell, or accept mo-Their year is divided into twelve months, of twenty-nine and thirty days alternately, which they rectify by an intercalation every third They reckon the month from year the beginning to the full moon, after which they recede by retrogressive

man, so slight a hold has their present religious ereed on the minds of the Buimese, that it has been asserted, and with strong probability, that the king of Ava could in one day, and by a simple order, change the religion of the whole nation, without creating a sensation or occa-

sioning a murmur.

We have hitherto omitted to notice a very important personage, half sacred half prophane, who being the second dignitary in the kingdom, has a regular cabinet, composed of a woonghee or prime-minister, a woondock or secretary of state, a songhee, or inferior secretary, a nakeen, or transmitter of intelligence, besides other subordinate ministers and functionaries, some of whom manage the estates he possesses in the country This individual is the white elephant, to whom presents of muslins, chintzes and silks are regularly made by all foreign ambassadors, the order of precedence in Ava being as follows: 1 The king, 2d The white elephant; and 3. The queen residence of the white elephant is contiguous to the loyal palace, with which it is connected by a long open gallery supported by numerous wooden pillars, at the further end of which a curtain of black velvet, embossed with gold, conceals the august animal from vulgar eyes, and before this curtain the intended offerings are displayed. His dwelling is a lofty hall covered with splendid gilding, and supported by sixty-four pillars, half of which are elegantly gilt two of these his fore-feet are fixed by silver chains, while his hind ones are secured by links of a baser metal His bed consists of a thick mattress covered with blue cloth, over which another of a softer composition is spread, covered with erimson silk. His trappings are very magnificent, being of gold studded with large diamonds, pearls, sapphires, rubies, and other precious stones. His betelbox, spitting-pot, ankle rings, and the vessel out of which he feeds, are likewise of gold inlaid with precious stones, and his attendants and guard

exceed one thousand persons. The white elephant, thus fed, dressed and attended, appears to be a diseased animal, whose colour has been affected by a species of leprosy. The one shown to Captain Canning in 1810, was of small size, of a sandy colour, and apparently unconscious of his own importance, although his votaries at a distance were humbly bowing their heads nearly to the By the Birmans a white ground. elephant is supposed to contain a human soul in the last stage of many millions of transmigiations, at the conclusion of which he is absorbed into the essence of the deity, and annihilated,—according to Birman faith, the highest state of beatitude.

The British embassy of 1826-27 had a more favourable opportunity of examining the white elephant than had fallen to the lot of the prior ones It was the same clephant seen by Capt Canning, of a cream rather than a white colour, and by no means so complete an albino as those belonging to the King of Siam veneration paid to this quadruped Mr. Crawfurd (the ambassador) thinks has been much exaggerated, it not being an object of worship, but only considered as an indispensable part of the regalia, which would be incomplete without it, and its absence would be considered a most inauspicious circumstance, prophetic of evil to the king and nation. Hence the anxiety evinced to obtain them. and the high reward offered for their capture.

Chronological tables of Burmese history, true or false, were procured by the late embassy, which go as far back as 543 years before Christ. The first monarchs are said to have come from India, from Magadha or Bahar, and to have fixed the seat of their government at Prome, where it remained for 336 years. In A. D. 107, it was transferred to Pagahin, where it continued for more than twelve centuries, hence the wonderful extent of the ruins of this metropolis. In 1322 the throne was transferred to Sakaing, and in 1364 to Ava,

where it remained for the 369 years, until the enpiture of that eity by the Tolens or Pequers Alompia made Manchaboo has asthe tawn, the capital halos has asthe tawn, the capital olasois every reign to baking, Ara Amarquura and then hack agant in Ara by his present Majesty in 1822. From the foundation of the monarchy to the present time there has been 128 king, spring an average of seventeen years to each reign.

From the testimony of the Por turuese lifstarians it appears that in the middle of the sixteenth century four powerful states occupied tho remans that he between the aoutheastern provinces of British India Lunan in China, and the Lastern sea. Their territories extended from Cassay and Assam on the north and west, one as far south as Junk Cey-lon These nations were Loown to Europeans by the names of Avn Pegu Arracan, and Sum Ava the name of the ancient capital of the Birmons has usually been necented as the name of the country at large which is properly Mraoma (pronaunced Myamma), and named by the Chinese Zomien The Portn gueso outhors say that the Burmese, though formerly subject to the kings of Pegu became afterwards masters of Ave, and caused a revolution in Pegu about the middle of the IGth The Portuguese assisted century the Burmese in their wars against the Tallens or Peguers, and continued to exercise an influence in the two countries, and still more in Arracan, so long as they maintained an ascendancy la the East over the other European astlons During the reign of Louis XIV several splended at tempts were made to propagate that doctrioes of the church of Rome and advance the interest of the French nation in the kingdam of Sum but little is related of Ava or

The supremacy of the Birmans over the Peguers cootinued through out the saventeenth century and during the first forty years of the eigh

teenth century, about which period the l'eguers in the provinces of Dalla Martaban, Toughe end Prome re tolteds and o civil war on ned pro secuted an both sides with the most About the years savago ferocits 1750 and 17of the Peguers by the ald af fire-arms procured from the Loropean vessels trading to their ports and with the essistance of some renegade Dutch and antivo Portuguese galoed several victories over the Birmans In 1702 they insested Ava the capital which sur rendered at discretion Dwipadi the last of o long line of Birman kings was made prisoner with all his family except two sons who escaped to the Stamese Banna Della, or Beings Della the Pegu sovereign when he had completed the conquest of Ava, returned to his own country A man now arose to rescue his

country from this state of degrada Alampra of Alomendra Praw (the founder of the present dynasty), a man of low extraction then known by the name of the Huntsman hed been continued by the conqueror in the chiefship of Monchaboo, ot that time an inconsiderable village His troops at first consisted of only 100 picked mee with which he defeated the Peguers in several small engagements and his forces increasing, ho suddenly advonced and obtained nassession of Ava about the autumn of 1753 I rom this date after a series of hard-fought actions he first ex pelled the enemy from the narthern provinces, then pursued them into their own territories where after o protracted siege or rather blockade he took the city of Pego which he abandoned to indiscriminato plunder ond massacre He next invaded Sam and would have in all proba bility effected the conquest of that empire of he had not been prevented by a mortal disease which arrested bis career in 1760 to the fiftieth year of his age after a short and prosperous but bloody reign of only eight years. In these wars the French favoured the Pegners while the English chose the conquering side

y4 AVA.

Alompia was succeeded by his eldest son, Namdojce Praw, who died in 1764, when his brother Shembuan assumed the reins of government, and being of a maitial disposition, attacked the Siamese, and took their capital, Yuthia, in 1766, but was unable to retain permanent hold of so distant a country In A D. 1767, or 1131 of the Birman era, the Chinese sent an army of 50,000 men from the western frontier of Yunan, which advanced into the Ava dominions as far as the village of Chiboo, where they were hemmed in by the Burmese. The Tartar cavalry, on whose vigour and activity the Chinese army depended for supplies, could no longer venture out either to procure provisions or to protect convoys. Under these circumstances, their army was attacked and wholly destroyed, except about 2,500, who were sent in fetters to the capital, where they were settled, and encouraged to marry Burmese females. This custom is singular among the civilized countries of the east, and peculiarly remarkable in a people who derive their tenets from a Hindoo source. It is well known that in China even the public prostitutes are strictly prohibited from all intercourse with any other than a Chinese; nor is there any foreign woman permitted to enter their territories, or to visit the ports of this jealous nation. Hindoo women of good caste are equally inaccessible, and admission into a respectable tribe is not attainable by money.

The remaining years of Shembuan were occupied in subduing the revolts of the Peguers, harassing the Siamese, and effecting the conquest of Cassay, and Munipoor its capital, which last event took place in A D 1774. He died two years afterwards, and was succeeded by his son Chenguza, aged eighteen, who proving a debauched blood-thirsty monster, was dethroned and put to death in 1782, by his uncle Minderajee Praw, the fourth son of Alompra, the founder of the dynasty. This sovereign in the succeeding year sent a fleet of

boats against Arracan, which being in a state of anarchy, by the assistance of internal traitors, was conquered after a slight resistance, and was soon followed by the surrender of Cheduba, Ramrec, Sandowy, and the Broken isles The Burmese arms were then tuined against the Siamese, from whom, between 1784 and 1793, they conquered the provinces of Tavoy, Tenasserm, Junk Ceylon, and the Mergui isles.

In 1795, a Burmese army of 5,000 men pursued three distinguished robbers into the British district of Chittagong, where their progress was opposed by a strong detachment from Calcutta, and after much negociation retreated within their own limits, the then refugees were subsequently given up, and two out of the three executed with tortures. This acquiescence on the part of the British government had a prejudicial effect on the subsequent conduct of the Burmese, for it was impossible to convince this most self-important people that they were given up from any other motive than that of fcai; which occasioned so frequent a repetition of violence and insolence, as to render war at last mevitable. Had the invasion of Chittagong been vigorously repulsed in 1795, and a direct refusal given to any proposal regarding the insurgents after so hostile a proceeding had been adopted, the recent war of 1824 might in all probability have been avoided

From the year 1795 until 1809, when Capt Canning's mission took place, the condition of this empire, both moral and political, had been progressively deteriorating, and the intellects of its sovereign gradually The hen-appaverging to insanity rent, or Engy Tekien, had died the previous year, and also his chief minister, a very respectable old man, both of whom had frequently prevented or mitigated the king's sanguinary orders Deprived of these checks, his rage became ungovernable, and he often pursued with his sword and spear any person whose countenance he disliked. Insurrections and rebellions broke out over the country, while its sovereign was earrying oo preposterous intrigues to excite the chiefs and people of 11m dostan against the British government Blost of these were detected by the Bengal functionaries but they were so atterly absurd and irrational that no notice was taken of them Io 1814 this barbarous and ignorant court renewed the wild and extravocant scheme of forming a confederation of all the nativo princes of In British and connerted with the nian circulated o rumour that the king of Ava meant to make a pligramage to Gayn and Benares at the head of 40,000 men An emissary also dis guised as a merchant, was despatched by the route of Dacco on a clan destine mission to the Seik country and Upper Illadostan while the Shabbuoder of Arracan visited Trin complee and Madras to collect information regarding the politics of Southern India. This Burmese in triguo was from the beginning fully known to the British government, but not the slightest importance was attached to It About AD 1817 and the following years this tur bolent nation directed their orms towards the north where they made o cooquest of the extensive jungly conotries of Assam and the adjacent petty states sooth of the Brahms putra where they established and retained a permanent nuhtary force, and threatened the north-eastern quarter of the Ben\_al province hi therto repoted onasminble

the muth-eastern frontier of Bengal, and the contemptions alonce of bla court in every remonstrance on the subject, led to a rupture with the British, which commenced in May 1821, and insted until the 21th of bebruary 1820 when n treaty of peace was concluded by Sir Archibalif Campbell at Yandaboo By the con ditions of this treaty the hing of Ava renounced all claims on Assam Gentish, and Manapoor; ceded the provinces of Arracan Le Taros Tenasserim and Martiban south of the Saluen river; engaged to pay one crore of rupres as an indemnity and to receive a resident British ambassador in his capital The war was distinguished from every other by its duration by its great privations by difficulties of every had arising from the climate and natore of the country by its uncersing and harassing duties, and by its frequent conflicts with the enemy these a British army never exceeding 5 000 fighting men, surmounted and dictated peace olmost at the gates of the enemy n capital. Impartiality however compels us

to give the Burmese history of this war, as it stands recorded in the national chronicle of the Burmese em pire by the court historiographer to the following purport "In the years 1180 and 1187 (Birman era), the kula nytt or white strongers of the west instened a quarrel upon the lord of the golden palace They landed of Rangooo took that pince and Prome and were permitted to advance as far as Yandaboo; for the king fram mo tives of piety nod regard to life made no preparation whatever to oppose them The strangers had spent rast sums of money in their enterprize so that by the timo they reached Yandaboo their resources were exhausted and they were in great distress. They then petitioned the king who in his elemency and generosity sent them large sums of money to pay their expenses back and ordered them oot of the country

Ilis present Majesty is now (1827) forty four years of age, and came to

He is of short the throne in 1819 stature but active form, partial to 1 iding on horseback and on elephants, and more especially on men's should-In this last species of locomotion no saddle is made use of, and for a bridle a strap\_of inuslin is put into the mouth of the biped. His natural disposition is said to be kind and benevolent, and he is easily led and ruled by favourites. He is well acquainted with the literature of his country, and reads, or rather hears a great deal read to him The Queen is about two years older than his Majesty, has a good person and dignified address, but never was handsome. She was the daughter of a chief gaoler, and first taken into the seraglio as a concubine (while the king was heir apparent), where she soon acquired a powerful influence over him, which every year has appeared to increase, and is now so unbounded that the Burmese ascribe 1t to the power of magic, and call her a sorceress She goes with all processions, and in 1823 the Chinese ambassadors were received by the King and Queen on the throne, to the great surprise of that ceremonious nation, who seclude the sex on all public She is not the mother of occasions. the existing heir apparent, and is generally unpopular, but by her devotion to her religion, and liberality to pagodas and monasteries, she acquired the good opinion of the priest-The proper title of the heir apparent is Ing-she-Men (Engy Tekien), which literally means "Lord of the East-house," but the origin of the phrase is unknown. The piesent prince is also named Rungian, after his government; but the most common name by which he is known is Sakya-men, which the Burmese translate " Lord of the World."-(Crawfurd, Symes, Snodgrass, Trant, Canning, Cox, Leyden, F. Buchanan, Licut. Low, Sc)

Ava (properly Angwa) — The ancient, and in iecent times again the modern, capital of the Burmese empire, six miles south of Amara-

pura; lat. 21° 45' N, lon. 96° E. When visited by the British officers 1826 it appeared well-built, but not containing its usual amount of population. It is surrounded by a brick wall, but could have been captured in a few hours. Prior to the rupture with the British, Amaiapura had been the capital; but having been almost destroyed by fire, and some evil omens having occurred, the king resolved on rebuilding and repeopling the ancient metropolis, events easily accomplished in Ava. By February 1824, he had finished the present beautiful (so it is called) palace, of which he took possession with much pomp on the fifth of next March, and to this removal the superstitious Birmans attributed their The audience subsequent disasters house of room in the above palace. although little reconcileable to Eu-10pean notions of architecture and decoration, is said to be singularly splended and brilliant, and there is reason to donbt whether an equally imposing hall exists in any other country. It has the same proportions with that described by Col Symes, but is larger, being in the proportion of 120 by 90 feet In 1827 the population of this city was only estimated at 30,000 persons, and in respect to wealth, industry, trade, and number of inhabitants, greatly inferior to Bankok, the capital of Siam. Its Sanscrit name is Ratnapura, or the city of gems — (Crawfurd, Snodgrass, Symes, 9c)

AVENASKY—A large village in the province of Coimbatoor, about thirty-six miles travelling distance N by W. from Daraporam. At this place there is a bridge constructed of immense flags of stone, and the village contains an ancient and very curious Hindoo temple, covered with sculptures—(Fullarton, &c)

AZIMABAD —A small town in the province of Delhi, seven miles N by W from Kurnal, lat 30° 47′ N, lon 76° 54′ E

AZIMGHUR —A town in the province of Allahabad, thirty-seven miles N. F. from Juanpoor, Lat 21° 6° \\_,
lon 83° 10 E. A consideral lequan
try of cotton goods are manufactured
ond exported from this place and its
vicinity. It was ecded by the \aboligate
of Orde in 1601

AZIMAGE — A large district in the helippoor province situated to the south of the river hinshins, shout the sixteenth degree of north initiate! It is watered by the Guipurba and visil purba rivers but much of the surface still recusion in a state of nestice. The diud towns are Gokank, Bel gamm and Shahpoor

AZIN SAUNES EA SESAL -A SCIAL in the prosuce of Value, situated in a lattle cultivated valley among the wilds of the Vindbysn moun tains between the passes called the Jaumun and Lotecdee glauts about canht miles S by W from the rums This is one of the of Mandon handsomest and most spacious scrais in Handostan the outer wall being & massy work of geey granite with a superstructore of brick and fortified with hastroos and loop holes while the galleries looking into the open square within are built of the red Mandow marble and divided into 176 cells or compartments besides two suites of larger chambers In the centre of the cast ond west ranges There is a small Bheel village on the skirt of the valley, and others are seen scattered about among the sur rounding hills conristing generally of four or five lettle stone hovels. In former times this serai and the ruins of Mandow were tho favourite haon to of the Bheel robbers who then lo fested the neighbouring country 1820 it was in contemplation to transfer the head-quarters of the Bheel corns from Nalebah litther as o better position for watching and suppressing the depredations of such of their mountaineer bretheen as still remained noteclaimed. - (Fullation, 9c)

Azmesiounce (Apanida Gany).

A town in the province of Bengal seventy fire miles N.E. from Dacca vol. 1

lat C1° 13 \, in D1° i This is a place of convieral le inland traffic, with a local-hulding estal inhuent for the construction of native craft

### В

Ban.—A small town in the province of Agra, als miles south from the city of Agra, the road to which is through a fertile country interspersed with clumps of mange trees Lat 27 8 %, ion 77° 40' i

Bases.—A small Idand in the Eastern seas, surrounded by several others scattered between the 130th and 131st degrees of east longuide to length it may be estimated of ergh teen miles by six tho average breadth

Bastica—A town in the province of Gujera the cooles of which had long been the terror of the neighbourhood but were at last so effectually put down by the British go verament that in 1820 their troops consisted of only two horse and 112 foot whereas in 1800 they omounted to 125 horse and 1,000 foot

DASEREE —A town to the province of Malen summed on the north bank of the Arrhadda having little Babere opposite. In 18°0 this place belonged to the Nabob of Bhopant

Basaac—A town and petry state in the province of Malwa, district of Rath In 1820 this was the resi dence of o Rajpoot chief o great proportion if whose subjects were Bluels.—(Blatcolm, dc)

BASSEAWAR.—A district in the Cujerat province, comprehending that portion of the Gnjerat permissil atrainated by the Island of Din To the north it is bounded by hait; war on the south by the sea to the west on the south by the sea to the west on the south by the sea to the west on the south by the sea to the vest the sea and the gulf of Cambay Thils; o very barren tract containing few towns and prodocing barely sufficient food for its own consumption

Until lately this portion of the peninsula was almost unknown, partly owing to physical difficulties, and partly to the well-earned reputation of its inhabitants for barbarity

The sea-port of Jafferabad is properly in Babreeawar, and the Siddees, who have greatly multiplied in the neighbourhood, have formed several villages, where they live by their industry, and collect for sale a great deal of excellent honey, while the Babreeawar mountains afford a never-failing pasture, where during the drought of 1812-13 almost the whole cattle of the peninsula were The country is named assembled after the Babreea tribe of Coolies, which formerly possessed great part of Cattywar and Goelwar, whence they were expelled by the Catties -(Macmurdo, &c.)

BABUAN.—A small island about twenty-five miles in circumference, the most northerly of the Philippines. Lat 19° 43′ N., Ion 122° E

Babuyanes Isles—A number of islands thus named, lying off the northern coast of Luzon, the principal Philippine, between the 19th and 20th degrees of north latitude. The largest are named Babuan, Calayan, Dalupiri, Camiguen, and Fuga, and are from twenty to thirty miles each in cucumference; but besides these there are many rocky isles and islets. Although so far north, the Babuyanes, when visited by Capt. Forrest, were much infested by piratical prows from Magindanao.—(Forrest, &c)

Barre—A middle-sized town and fort in the province of Gundwana, thirteen miles SE of the confluence of the Towah and Ncrbudda, fifteen and a half miles ES.E from Hussienabad, lat 22° 40′ N., lon 77° 57′ E. In 1820 it was the head of a pergunna, and belonged to the Raja of Nagpoor—(Malcolm, &c)

BACKAR (Bhahar) — A fortress in the province of Mooltan, situated on an island of the Indus, dependent on the district of Shekaipoor, and at

present subject to the Afghans, lat. 27° 20' N., lon. 68° 37' E. By Abul Fazel this place and the surrounding district are favourably described; but since his time this portion of Hindostan has apparently been undergoing a gradual deterioration, owing to misgovernment, and the encroachment of the desert. Backar is also mentioned by Sidi Ali Ben Hossein in the journal of his travels overland from Gujerat to Constantinople, A D. 1554.—(Abul Fazel, Sidi Ali, &c.)

BACKERGUNGE (Bakargany).—A district in the province of Bengal, formed about the year 1800, from the southern quarter of the too extensive district of Dacca Jelalpoor. In 1801 the courts of justice and revenue were removed from the town of Backergunge to Burrishol, which was made the capital. A considerable portion of this division, formerly named Boklah or Ismaelpoor, extends along the western bank of the Puddah (Padma) or great Ganges, nearly to its mouth at the island of Rabnabad, which forms the southeastern angle of the Bengal delta. About AD. 1584 this tract was overwhelmed and laid waste by an inundation, succeeded by Mugh invasions aided by the Portuguese of Chittagong, from the combined effects of which it has not recovered to the present day, and the ruins of three old mudforts, built for defence against these incursions, still remain 1801, the district was supposed to comprehend 4,564 square miles.

The lands of Backergunge, notwithstanding their low surface and proximity to the sea, are very productive, being annually, during the periodical rains, overflowed by the fresh water of, and fertilized by the slimy mould deposited by the Ganges. In consequence of this redundant moisture and a hot sun, it produces annually two abundant crops of rice, and is the granary of Calcutta, both for exportation and consumption. From the contiguity of this division to the Sunderbunds (of which it is almost an integral portion), the numerous rivers that Intersect it In every direction and the quentity of jungle still covering its surface, it not only abounds with alligators nad tigers of the most enormous size, but has been from the remotest periods creatly infested by Docoits or river pirates. A strong establishment of boats and sepoys has always been sountained; but their efforts, and those of the magistrates, were for above thirty years wholly unavailing to suppress or even diminish the number of robbeness every remedy ottempted appearing to aggravate the calamity A long perseverance how ever at last succeeded for in 1814 the judges of circuit reported that the Backergunge district was in a state of security from violent depredation and that offences of other sorts did oot prevail to ony great ex tent. Here, as in other parts of Bengal the obstacles to the suppression of crime do not originate from any open resistance to the magisterial authority but from the sacredible difficulty of distinguishing the innocent from the guilty

In 1801, the total population was estimated at 026 723 lobabitants, in the proportion of five Hindoos to three Mahomedans, many of whom reside in hoats the whole year the southero quarter there still exist several Portuguese colonies, of probably two centuries duration, afford ing o melaocholy example to what ex freme degree it is possible for Europeans to degenerate. In June 1822 a great inuedation occurred which submerged na extensive tract of couptry sweeping away houses and cattle ood drowning above 10 000 of the inhabitants and even where no lives were lost much valuable property was destroyed .- (Public MS Documents J Grant Crusp, &c)

BACKERGUNOE -A town in the province of Bengal about 100 miles east of Calcutts Lat 22 42 N Ion 80° 20' E It was the head quarters of the station until 1801 when the courts of justice and re venue were removed to Burnshol

BAOAI HY .-- A strong hill-fort in the province of Bejmoor, fifty-fivo miles AT from Durnor which in 18°0 contained 476 houses and 2,207 Inhabitants, Lat 12" as N., Ion 75° 49' E It was taken by storm in 1818, by a detachment under Sir Thomas Munro although it was al were recloned one of the strongest hill fortresses in India, having for merly made a successful resistance against the whole Maharatto army un der Nana Furnavesc It consists of fortified hills, with a walled town nt the bottom, containing an inner fort

The hills in the neighbourhood of Badaumy are broken Into various shopes huge masses of many thou sand tons being partly detached, or detached and rolled over I ittle temples have been built on their sum mits, and among the charms, and on two of the greater masses, partially separated stand the two castles of For further particulars Bulaomy respecting the Badaumy pergunnah, see Bagulcot.-(Marshall, Blacker,

ac 1

BADANWAL .- A town in the holusten or high-lands of Lahore forty miles S.S.L from the city of Cash mere; lat 33° 36 N., ion 75° 37' E

BADSACHELLUM (Bhadrachalam, the socred mountain).—A town in Gundwana, shueted on the cast side of the Godavery seventy eight miles N by W from Rajamuodry lot 17° 57 N ion 81° 17 E At this statien the zemindar of Poloonshah collects taxes oo all goods passing through his country The merchandize is generally cotton, tracaported from the interior to the northern Circurs salt and cocoa-nuts being brought from the sea-coast in ex change At Badrachellum there is a pagoda of high repute, snered to Seets 200 yards to the south of which is the town consisting of shout 100 huts the whole surrounded with jungle In the middle of the Godavery in this vicinity, the natives assert that o hot spring rises and diamonds are found in the bed of the nver -(J B Blunt, Heyne, &c)

BADRICASRAM (Vadaricasrama). See Sources of the Gangles.

BADRINATH.—See BHADRINATH

BADULLA.—A town in the island of Ceylon, thirty-eight iniles S.E. from Candy, lat. 6° 56', lon. 81° 15' E. This is the principal station of the Onva district, and is situated on a gently rising ground about 2,100 feet above the level of the sea, within an extensive valley bounded by lofty mountains, and watered by a singgish stream which nearly surrounds it. As a town it is insignificant, and the fortifications consist merely of a small stone fort, with cantoninents for the The adjacent land is fertile, troops and though so remote from the sea the eocoa-mut tree appears to flourish. The great mountain Numina Cooly Candy, next in elevation to Adam's Peak, rises in massive grandeur above the Badulla valley, its table summit sloping gently down on every side On the 21st of March 1819, 1,000 feet from the apex, the thermometer stood at 53° Fahrenheit, before sunrise — (Davy, &c)

BAGALAEN (or Bugilin)—A district in the south of Java, nearly central from east to west, but respecting which scarcely any thing is known.

BAGAROO —A town in the province of Ajmeer, eighteen nules S W from the city of Jeypoor, lat 26° 49' N., lon 75° 22' E.

Bagesur —A village in northern Hindostan, sixteen miles N E. from Almora, lat. 29° 49' N, lon 79° 24' E.

BAGHUL —Apetty state in northern Hindostan, situated between the Sutlege and Jumna rivers. It was conquered by the Goikhas in 1804, who extorted from it in all shapes a revenue equal to 23,247 rupees. At present it is under the protection of the British Government. Baheree, a fort erected by the Gorkhas, near Urki, is the Rana of Baghul's present residence—(Lieut. Ross, &c.)

BAGHPUT (Bhagapati).—A town in the province of Dellin, seventeen miles north from the city of Dellin, lat. 28° 56' N., lon. 77° 7' E.

BAGLANA (Bhagelana) - A large district in the province of Amingahad, situated lietween the 20th and 21st degrees of north latitude This is a remarkably fully province, but contains many fertile plans and valhes interspersed, and is stinlded with fortresses erected on the peaks of the Baglana is one of the mountains. original Muhurattu countries where that tribe first emerged into notice, and it is still mostly occupied by petty chiefs of that nation. On account of its great a sturnl strength, and the resistance it was capable of opposing, it does not appear that it was ever thoroughly subdued, either by the Moguls or the Decemy sovercigus. It was insuded by the Mahomed ins in AD 1296, under Sultan Allah iid Deen, but it was an acquisition they were never able permanently to re-It continued under a nominal subordination to the Delhi throne until the appearance of Sevajee, the first Maharatta leader, when it was one of the earliest that revolted, and remained, with various vicissitudes, under a Maharatta sovereignity until the fall of the Peshwa in 1818 -(Ferishia, Rennell, &c)

BAGLEE —A town in the province of Malwa, which in 1820 contained 500 houses; lat 22° 39' N, lon 76° 28' E., fifty-four miles SE from Oojen This place is situated near the Cali Sinde, and has a small well-built ghuriy or native fortification — (Malcolm, &c.)

BAGRA.—A fort in the province of Lahore, situated on a peak 6,168 feet high, in the district of Mundi, lat 31° 29′ N, lon. 78° 13′ E

BAGRODE —A town and small fort in the province of Malwa, situated on the road from Bhilsa to Ratghur, and eleven miles from the latter. 'In 1820 this place belonged to Sindia, and contained about 600 houses.—(Malcolm, &gainglec)

BAGELCOT (including Radaumy) -A subdivision of the limit h district of Darwar in the province of Beja poor boun led on the north-east by that part of the river her has Imme distely also e the hapen Sunrum or function of the river Valpurha. The extreme length of this tract is about fifty-four miles and extreme breadth forty-four but from the leregularity of its shape, the square contents do not exceed 1,230 miles. It is hadly watered the named rains not being sufficient to farol h perennial streams or to fill the tanks with more than n few months supply; most of the sil lages are consequently on the banks of the larger races

Before the rains the climate is in tensely but and the rainy season has not the violent character of a coast monsoon. The whole quantity of rain that fell ot Badaumy in the months of July August and Septem ber 1820, amounted to only enliteen inches and the whole annual rain did not exceed twenty-dix tuches un ostonishingly moderate quantity for no intertropical chimnte and often greatly surpassed in one month of the south-west monsoon near the coast, or first range of hills the want of running streams and largo wells the garden economy of the district is necessarily limited

The perguunalis of lisguicot and Badanmy are decidedly in the oncicot Cornatoes or Canora proper and the language is universally Canarese Prior to 1810 they had been long administered by the Rostia family, and in 1820 contained 319 inhabited townships, including the towns of Bagulcot, Badaumy Keroor Per water and Seroor The oumber of houses as stated in the nonulation returns was 21 654; of inhabitants 97,884 or about four and o half to a house the moles usually exceeding the females The most numerous tribe is the Jungum or I ingawat, who comprise one third of the whole the Dhungur or shenherd casto one-fifth Mahomedans one-sixth the remain der Bernds Mooslegeers and other classes.

These pergunnalis were among the territories of the Shahnour Saloh, whileh in 17 at came into the pos ession of the Valiarattas when theel ler Dilaice flow was Perhang but the country was then in a very disorderly state and the Sababa power little Hurne tho more than nominal serson of misrule the population oc oured lights of violence and rapine. and it is quite incred ble how su I len and universal a change took p are on their transfer to the Brush govern ment in IRIB Dr Marshall, writing on the snot in 1820 ileelares that in no country had he ever met with such o total obscuce of crime; in deed he thought it too miraculous to last - ( Mershall fe )

BAGITCOT .- A town in the lintish district of Darwor province of Belo poor which in 1800 contained 1,370 houses and 7-23 subabitant the cusha or chief town of a pergun nah, and the residence of the prin eipal merchants and bankers. mint had been established here prior to the Mahamata conquest in 1755 which continued of work to 1830 It is entirely a private concern the undertaker purchasing all the bullion, and assume the com on his own ne count He pays o small tax to go rerument and is responsible that his coinage contains no more timn the authorized proportion of alloy -(Marshall &c)

Baoua .- This ranks os o minor province in the old division of Ilin dostan where it still retains its name and dimensions, but in modern geography is ottached to the provinces of Malwa and Gujerat It comprehends the hilly tract of country which formerly separated these soubaha is bounded on the north by Mewar nod on the south by a narrow strip of Malwa, which extends from Petha ud to Dobud and divides Bagur from Rath The aspect is extremely un couth, consisting almost entirely of ranges of hills running in o northerly and woutherly direction mostly covered with thick low juogle forests of terk black-wood &c especially near the western and southern boundaries On every side there is a descent from the old limits of Malwa to Bagur, and from thence, but more imperceptible, into Gujerat, the respective limits being distinctly marked by ridges of woody hills of moderate elevation The chmate for a considerable portion of the year is reckoned unhealthy, and, owing to a deficient supply of water, is comparatively unproductive. The mountain streams soon run themselves dry, and the digging of wells and tanks is attended with great labout and expense; reservous, however, are sometimes constructed by throwing an embankment across the stream of a narrow valley.

Excepting the towns of Doongurpoor, Banswarra, and Sangwara, this division contains no inhabited places of any importance, but vestiges of antiquity lie scattered over the surface, tending to prove, in particular localities, a prior condition of greater prosperity. At present the great mass of the population consists of Bheels and Meenas (between whom no intelligible distinction has yet been drawn) under various petty thakoors or chiefs, generally pretending to the dignity of Rappoots.—(Malcolm, &c)

BAHADRA.—A town and petty state in the province of Delhi. In 1819 the chief of this principality requested that the British government would take his small territory under its protection, as it was then claimed by the Rajas of Patiallah and Bicanere.—(Public Documents, &c.)

BAHADURPOOR.—A town in the Gujerat province, sixty-two miles E. by S from Cambay, lat 22° 11' N., long. 73° 46' E.

BAHADURPOOR.—A town with a fortified ghurry, in the province of Gujerat, seven miles from Dubboi, lat. 22° 10' N., long 73° 45' E

Banadurpoon —A town in the province of Malwa, district of Cliendaree, lat. 24° 15′ N., lon. 78° 4′ E. In 1820

it was the head of a pergunnal belonging to Sindia.

## BAHAR.

(Vihar, a monastery of Buddhists)

This large province is principally situated between the twenty-second and twenty-seventh degree of north latitude. Until the conquests of 1815, it was separated from the Nepaulese dominions by a range of hills, and a low woody country, on the south it has the ancient and barbaious Hindoo province of Gundwana; to the east it is bounded by the province of Bengal; and on the west by Allahabad, Oude, and Gundwana. The river Caramnassa was the old line of separation between the Bahar and Benares territories The space comprehended within these limits is one of the most fertile, highly cultivated, and populous of Hindostan, in proportion to its extent of plain arable ground, which may be computed at 26,000 square miles, divided naturally into two equal portions, north and south of the Ganges, which runs here an easterly course for 200 miles.

One of these divisions extends northerly to the forests of Nepaul and Morung; is separated from Goruckpoor in Oude on the west by the Gunduck, and a crooked line between that river and the Goggrah. This northern division is bounded on the east by Puineah in Bengal, the whole area being one uninterrupted flat, which was divided by the Emperor Acber in four districts, viz. Tirhoot, Hajypoor, Sarun, with Chumparun or Bettiah.

The central division of Bahar extends south of the Ganges sixty miles, to the range of hills called in Sanscrit Vindya-Chil, which separates the lower plains from the territory above the Ghauts. It is divided on the west from Chunar in Allahabad by the river Caramnassa, and from Bengal on the east by a branch of the southern hills, extending to the pass of Telliaghurry, on the confines of Rajamahal. The district named Bahar, situated in the midst of this cen-

trai tract, occupies about one-half of the whole level area the plains of Mongher one with more the rest being mountainous. libotas most south-westerly division chiefly between the rivers Sone and Caramonsa the remaining di trict extending along the south side of the This central division on Ganges. account of the superiority of its soil and climate, yields nearly two-thirds of the total annual produce of ordust Exclusive of these two divisions there is a straggling hilly country, which seelds but little

Still further south there is a third and elevated region, comprehending 18 003 square miles, though comparatively of inconsiderable value. This highland includes the modern sul> divisions of Inlamow, Hamphur, and Chuta Nagpoor bounded on the west by the province of Allahabad, on the south by Cundenna and Oresa, and on the cast by Bengal. This last division is geographically termed the three bellads or cantons. and is also by Mahomedan writers sometimes described under the appel lation of hokersh but more com monly happoor, from the diamond mines, real or imaginary, it is supposed to contain. The following were the superficial contents of this province in 1784, ta-

The lands of eight districts, containing 25,287 The lands belonging to Pa-

Iamow Rumghur, and Chota Nagpoor 18,553
Portion of hilly country in Monghir Rhotas, &c... 7,133

1,073

The provioce of Balar enjoys great natural advantages a temperate cil-mate, lugh and fertife soil, well watered, prodoctive of the direr grans and oil the luxures required for the more octre lainbutsots of the north Itsgeographical postionaiso is central hoving easy communications internally not aerving as a thorough fare for the commerce of Bengal with the upper provinces of Illindostan.

Three advantages brought Baliar into a high state of prosperity before tho l'atan conquest, and which has con tinued without interruption omidet all its political vici situdes. In Bahar Proper and the contiguous districts a parching wind from the west prevails during a large portion of the hot mason blowing with con ider able strength during the day but commonly succeeded at night by a cool breeze from nn opposite direction; sometimes it ceases for ilays or weeks, groung way to ensterly gales. Beyond the limits of the Bahar district to the west, refreshing I reezes, and cooling showers of hall and rain are still more rare. During the cold season a blighting frost is sometimes experienced in Bahar ond Benares at which period, among the hdis the wind is singularly bracing to Luropean consututions, the thermometer nt sun-rise ranging from 35° to 40°. Pahrenbert and frequently in tho afternoon of the same day rising to 700

Agriculture manofactures and commerce have siways flourished in this province Oplum may be con sidered as its peculiar produce, and the simple commodity of the country Salipetre is principally manufactured in the divisions of Hajypoor and So run. Cotton cloths for esportation are fabricated every where 'In addition to which are the ordinary productions of grain sugar indigo oil betel-lenf and a smrety of flower essences especially rose-unter and otr of roses. I lke the greater part of Upper Hindostan Balior wos formerly supplied with salt from the Sombher lake in Rajpootano but its inhobi tants now consume the Bengal salt with a portion of that imported from the coast of Corpmandel

The manufacture of saltpetre scarcely passes the castern limits off Bahor and it is a practical remark, that the production of mitre is greatest during the prevalence of the hot which which ore perhaps executal to its furmotion. These pareling which from the west did not formerly exteed beyond the eastern

104

taın

limits of Bahai; hut by the change of seasons, which have been remarked within these forty years, the influence of the hot winds is now felt in Bengal, where, on that account, the manufacture of saltpetre might now be attempted with success. One hundred parts of mitre earth from the Tirhoot district, when analyzed by Dr. John Davy, was found to con-

BAHAR.

Artificial nitre beds consist of the refuse of vegetable and animal matter undergoing putrefaction, mixed with calcareous and other earths. The air furnishes the oxygen and nitrogen (or azote), which are the component ingredients of nitric acid, but how lime contributes to their union is not known, and the appearance of potash is equally extraordinary.

The opium produced in the provinces of Bahar and Benares is monopolized by government, to be sold in Calcutta by public auction, and, for yarrous reasons, this monopoly seems less exceptionable than many others, At present, the opium agent at Patna makes his purchases in the districts of Bahar, Ramghur, Shahabad, Sarun, and Tirhoot; but Dr F Buchanan is of opinion, that, with some pains, the whole quantity might be procured from the Bahar district alone, which would tend greatly to the suppression of the contraband trade in this nar-In the evening, each capsule of the poppy, as it attains the proper stage of maturity, has a slight incision made in its whole length, and next morning what opium has exud-

days another incision is made, at

After two or three

ed is collected

some distance from the first, and according to the size of the capsule, it admits of being cut from three to five times, but the crop lasts six weeks, as the capsules advance at different periods The extraction of the opium does no material injury to the seed, which is chiefly reserved for future sowing; but a little is also used in Formerly the native sweetmeats. onum sent to Calcutta was much adulterated by the intermixture of foreign ingredients, and it was difficult to discover the nature of the adulteration; it has, however, been supposed, that it is usually vitiated with an extract from the leaves and stalks of the poppy, and with gum of the mimosa. Although the soil and climate are so singularly adapted for the production of this intoxicating drug, yet in 1815, the Board of Trade reported that the two agencies of Bahar and Patna had never been able to supply a greater quantity of opium, in the most favourable seasons, than was sufficient to satisfy the demand for foreign trade, and that during unfavourable seasons (which frequently occur) the quantity had never been equal to meet that object,

In the nature of landed property, there are several distinctions between Bengal and Bahar, of which the following are some of the principal. In Bengal the zemindarnes are, or rather were, very extensive, and that of Burdwan alone was equal in produce to three-fourths of Bahar, in which the zemindarries are comparatively small The power and influence of the principal zemindars in Bengal were proportionally great, and they were able to maintain a degree of independence, which the inferior zemindars of Bahar soon lost. The latter also, having been placed under a provincial administration, from distance as well as comparative inferiority, have been precluded from that degree of information which the zemindars of Bengal, from their vicinity to Calcutta and access to the officers of government, have been able to attain The lands of Bahar have

from time immemorial been let to farm, and no general settlement, since the acquisition of the Dewaunt, had heen roncluded between government and the poster ors of the soil until the final and perpetual settlement in 1792 There are few Instances of ja hire in Itengal, probably not more than three or four but they are frequent lo llabar. The custom of divid ing the produce of the lands in certain proportions between the culthatne and government was almost nniversal in Bahar; but in Reneal this custom was very partial and limited. Upon the whole the proprictors of the soil in Baliar were in a degraded state as compared with those of Bengal In Bahar there ore but three principal zemindirnes t those of Shahabad Tirhoot, and Tickary

Here as in Bengal, by the too precaltate conclusion of the perpetual revenue acttlement and ile obolition of the Canongoe office, the tenant was apparently left at tho mercy of the remindar a but experi care has shewn that he does not in practice autier the hardships to which in theory he would appear exposed the reciprocal wants of the partles driving them to something like so amlcable compromise. The landlord can no more do without the tenant. than the tenant can do without tho The obligation of the landlord latter to pay his land-tax is peremptory histailure ruln biarvation is equally the lot of the cultivator If he cannot get employment. Nature however in this climato requires lit tle ond olthough frequent instances have occurred of zemindars hoving been ruined, none have been recorded of o cultivator being starved for wont of employment Io reality, the tenaots both of Bahar ond Becares are certainly in a better coodition than during the time of Cossim Ali Onehalf of the produce la still the usual abare of the enitivators and the demand for them is so great that they can and do make better terms tenant who had one plough ot the timo of the perpetual settlement, will

now have two or three plou h, and shore that date the hire of a cloudman has nearly doubled while grain is on an otera, e cheaper. And although cloth and some other articles of neces ary use are dearer the culturator, who was formerly almost maked it now accordinated.

105

The principal rivers of Bahar are the Gan er the Sone, the Gunduck the Dummodah, Caramnassa, and the Hewah the twn last being boundary rivers besides these, there are Innumerable awaller streams province in general being abundantly aupplied with moisture In the door tracts south of the Ganges Irrigation is osually effected by water drawn from wells by means of a lever and butlete and conducted to the fields through almon, channels. In other parts tanks for the same purpose ore formed by damming up o hollow through which a stream runs with a mound of earth as le practised in Visore and the Carnatle on a larger scale The towns of the greatest magnitude pre Patna Chuprah Daoudnagur, Caya, Bolipoor Monghir Arrah, Chietra and Muzuffer 1000 As we advance north through Bahar the rare of natives improve In stature and appearance on com-pared with the Bengalese; but they oro much more oddicted to intrylentlag drugs the deplorable effects of whileh every alliage cambits melan choly evidence; and as to religion on sancturry in Hindowan can ex hilat so deprayed and degraded a crew as the presthood of Gaya my also the Bahariana are decidedly saferior to their neighbours lo eleanfiners for nothing can surpass the filthmesa of the mud-huta to o Bahar village These however, are generully larger than the matted dwellings of the Bengalese and in towns are not unfrequently of two atomes The concesson betwixt Beneal and Bahar has always been so saturato that it is difficult to separate their histories and atatistles more especially with regard to revenue and population on which topics the

reader will find some additional information under the head of Bengal.

In a remote era of Hindoo history, as conveyed down by their mythological legends, Bahar appears to have been the seat of two independent sovereignties; that of Magadha, or South Bahar, and that of Mithila (Tirhoot) or North Bahar. Although Gaya, the birth-place of Buddha, the great prophet and legislator of eastern Asia, be within the limits of this province, and is still a revered place of pilgrimage, yet among the resident inhabitants no Buddhists are to be found, so completely has the race been either converted or eradicated, for there is some reason to believe that until the first Mahomedan invasion, the Buddhist religion was professed by the chiefs, and the Jains assert that they were predominant prior to the Buddhists. A specimen of the Lord's Prayer in the Magadha, or dialect of South Bahar, when examined by the missionaries, was found to contain twenty-four of the words used in the Bengalese and Hindostany translations, besides some words of pure Sanscrit At present it is supposed that more than one-third of the inhabitants profess the Mahomedan faith.

The tranquillity enjoyed by this tract of country, since its transfer to the British, is probably unexampled in the history of India, the roai of the cannon at Buxar, in 1764, being the last hostile sound that has reached the ears of its inhabitants. consequence has been, that the cultivation of the soil, more especially since the decennial settlement, afterwards rendered perpetual, has been progressively increasing, and population of particular tracts (for it is difficult to get the natives to transfer then labour to contiguous wastes) absolutely overflowing the other hand, religious buildings are visibly on the decline, the followers of the two iival persuasions having no longer, as they formerly had, the wealth necessary for the construction of such edifices. The few which at present piety or superstition finds

means to erect are generally poor and insignificant; an observation which also applies to domestic buildings of every description.—(J. Grant, F. Buchanan, Colebrooke, Fullation, Sir E. Colebrooke, Lord Teignmouth, Gholaum Hossein, &c.)

BAHAR.—A large district in the Bahar province, of which it occupies the central portion. On the north it is bounded by the Ganges; on the south by the districts of Ramghur and Boglipoor; to the east it has Boglipoor; and on the west Shahabad. Its whole length is about 120 miles, and its extreme width eighty; but the superficial contents do not exceed 5,358 square miles, of which 403 belong to the city of Patna's jurisdiction.

A great proportion of this division is level and highly-cultivated land; but there are also many hills, most of which are extremely rugged, and their sterility rendered more conspicuous by their nakedness. Many of these are scattered about with the utmost irregularity, and stand quite insulated among the soil of the plains. In the heart of the district are three remarkable clusters, one on the west of the Phalgu, one on the east side of that river; the third a long narrow ridge adjacent to Shukpoorah; the whole, however, of inconsiderable elevation, the highest probably not exceeding 700 feet. The hills towards the southern boundary are more considerable, and some of them probably twice that height. From hence a continuation of hills and narrow vallies reaches, with little or no interruption, to Cape Comorin, all of which are considered portions of the Vindhyan mountains that bound the vast Gangetic plain. The hills of the Bahar district no where approach the Ganges, and the interior, reckoning from the Ganges, is in general flat, but not subject to inundation. The term terriani is here applied to the banks of the Ganges, whether high or low, and great pains are taken by cultivators in the collecting and conducting of water.

The Ganges is no where fordable within the limits of this division, at any season of the year, and he channel when elear of blands is generally n mde broad Bendes that noble stream, the chief rivers are the Sone. the Punpun the Pholou, the Sacri and the Panchane, with their nit merous branches The district con tmos nothing that can be called a lake, nor are the permanent marshes any where extensive During the miny season, for the purposes of cultivation a great proportion of the soil is converted into a marsh t but io the dry seasoo even the low lands parellel to the Ganges from Patna downwards, become devold of morsture. On the banks of the Ganges towards the Sone west winds prevail from the 13th of January to the 26th of March from which period until the 12th of Juno the cust and west winds are cently equal From the last date until the end of July the east wind prevalls, and from then until the end of August the west winds prevail From that time un til the end of October the tast winds return and finally from that period until the 13th of January the cast and west winds are nearly halanced; many irregularities however, take place in the periods and duration of these winds. The rainy season is generally of the same length as in Baglipoor but when the fall has not been very copious from the 15th September to the 15th October the rice crops suffer, coless there is o good deal of rain towards the end of October Rains that happen in January are injurious to most crops, especially to wheat, although the fields of that grain require at that season to he artificially watered. Two or three days of cloudy weather with drizzling rain, will at that seasoo entirely burn up a crop of

Although the wnoters are oof ac vere fires are extremely comfortable and all the ontires who can prueura one, aleep by it yet frosty ogsits are Tare. The heats of spring are excersive, and much aggravated by the

duit, there not lying at that time a vertice of vegeta lon and ont only the west minds, but a'm those from the exel are hot and parchi heat of the Bahar district he eet the whole much have than that of Tir boot. I sen the deserve to ween Pains and Hajrpeer, two paces situated opporte to each safer can the Garges levery perceptive as I between Gain and Mura especie ! much greater than rul the lef ere ! from the triling d ferrore of la deles get by the natives Babar le greealer ed a healthy enun ry, whose Tubere except its northern parts, is por green aldered such Both I atea and fears are found to be hotter than event other parts of the if net heat of the fire seems one to a great extent of palot sant on an island immediately frorting the towns and that of Gays partly to the sante of the Phalgu, and partly to the refection of the sun from the and rocks that surround it

In this district there is much land of a poor soil but the prejention great Close up to the hills is gree rally arable, but most of the little are utterly unfit for tillege of any Near the large stress of the 1100 interior, especially ocar the senten e channels of the one and thete, the strong dry, west whale of a rier have blown from the parched beds of the torrents large heaps of sand, that form little billocks of mostra sand perfectly harren; but in the vicinity of the Ganges a great deal of the land gives two crops a year The transplanted rice is all fine; but the very linest, named lawmatl does not exceed one-fourth of the whole, and is olways in great demand among the Baboos of Colcutta, Io 1811 there were 21,000 legas under cultivotion for cotton and a great deal was besides imported from The cultivation of tobacco was not great, and that of indigo of little importance

The rents here are herey, amount mg usually to one-half of the crops after deducting the expenses of

the harvest, and sometimes to ninesixteenths, but, except in the eities of Patna and Gaya, or other large market-places, the ashraf or high ranks pay no rent for the land oceupsed by their houses, nor ean any landlord refuse to allot land for the purpose to any ashraf who re-The natives of the British quires it isles, however, not being dignified with the title of ashraf, find great difficulty in procuring land to build on, and must always pay an extravagant rent, a circumstance (as Dr. F Buchanan observes) by no means the usual practice of successful invaders. These ashrafs consist of high castes, both Mahomedan and Hindoo, such as Seids, Patans, Moguls, Brahmins, Khetries, Rajpoots, Kayasthas, and Vaisyas Although the rent of land is much higher than in the districts further east, where some pay next to nothing, the gencrality of the people are in much better circumstances The extent of land here exempted from revenue is quite enormous, and in 1801 was estimated by the collector as equal to half the amount of those paying a land-tax, yet the last were reported to be in the best state of cultivation Many of these rent-free portions are still large, but, owing to the established rules of succession, are fast frittering away into petty portions. This minute subdivision of property has reduced a great majority of the zemindais to the condition of mere peasants, just a stage above beggary. The profit on the assessed lands is supposed greatly to exceed ten per cent, indeed probably exceeds the whole amount of the revenue (which in 1814 was 1,748,006 rupees), yet the assessed lands up to 1811 had not become saleable property, many of the lots put up to auction by the collector having for want of puichasers fallen into the hands of government, which tends to prove that the settlement made by Lord Cornwallis is not a security even for the revenue which he rendered perpetual. The tricks, chicanery, and reguery, by which this apparently unaccount-

able predicament has been effectuated, would require, to detail them, a volume of most enormous dimensions, and when narrated, would put to the blush, conjointly and severally, all the pettifoggers in Europe

The villages here usually consist of mud-walled houses, closely huddled together, so as to render a passage through them on an elephant or in a palanquin often impracticable; but the district being populous, and the inhabitants of a gregarious disposition, it contains a remarkable number of considerable towns, such as Patna, Gaya (the residence of the eivil establishment), Daoudnagur, Bar, Dinapoor, Baliar town, &c. &c. In 1811 the population of this district, excluding Patna and its jurisdiction, was estimated by Dr. Franeis Buchanan at 724,159 Mahomedans, and 2,030,991 Hindoos; total 2,755,150 persons In 1801 Mehedi Alı Khan, the son of Gholaum Hossein Khan the historian, resided in Slaves of the descripthis district tions called Nufur and Laundi are very numerous, often liberated, seldom sold, and frequently, owing to the poverty of their owners, left to find a subsistence for themselves. Considering how many large towns there are in Bahar, the number of prostitutes is small, and the petty town of Rungpoor, with the small tract immediately adjacent, contains more than the immense city of Patna with the territory attached to The convicts here, as in most other districts, are employed on the roads, which, in fact, is doing little more than making a place agreeable to those who keep carriages, and next to nothing to the public, if the natives be considered as forming any part of it.

The six great places of pilgrimage in this district are the river Punpun, Gaya, Rajagripa, Baikuntha on the Panchane, Lohadanda near Geriyak, and Chyaban Muni, but the two last are little frequented It deserves remark, that the Buddhists and Jains both agree in placing within the limits of South Bahai, and its immediate

This district is universally allowed to be in the old Hindon territory called Magadha governed in ancient times by Jarasandha who in the Brahmindeal ingends is called an Aur or enemy of the gods. According to training, this proceeding of considerable dimensions used to stand on two hills in this district, having a fivot on early and look across Hindo tim in Divarance is Gujerat, at the thousand wires of a Gujerat, at the thousand wires of

110 BAHAR.

his kinsman Kiishna, as they bathed in the western ocean, and also pelted them with brick-bats. To revenge these incivilities, Krishna sent his kinsman Bheem to punish Jarasandha, who killed him in a valley near his own house, towards the conclusion of the third age of the world. At present the Hindoo inhabitants, when they wish for an image, take the first that comes to hand in a ruin, and in the selection pay little or no regard, either to the sex or the attribute. Many of the old images are in a superior style for Indian productions, but very far removed from approaching European ideas of perfection.

In the police division of Duryapoor there was a temple on a hill, which the natives told Dr Francis Buchanan had contained a lingam, which they complained had been removed by Mr Cleveland to Boglipoor, a proceeding very unlike the conciliatory conduct for which that gentleman was so justly celebrated. On subsequent inquiry, however, it appeared that it had not been a lingam, but an image of the sun, and that it had not been carried away by Mr Cleveland to Boglipoor; on the contrary, it had been carried away by the late Mr Davis, one of the directors of the East-India Company, but this gentleman did not consider that he was carrying the sun's image from these villagers, but from a bear that made the ruined temple his abode, and did not appear to have any occasion for an image of that luminary In fact, the number of images scattered throughout this district is quite incredible

The era in this district is called Sumbut, but that word implies era, or rather juncture. The Pundits consider their era as that of Vierama. The year of the Sumbut 1869 began on the first day of the waning moon, in the lunar month Phalgun, which was on the 28th of February 1812. The year consists of twelve lunar months, but after every thirty lunations an intercallary month is added. This year is used every where by the Hindoos in their ceremonies, but

is here also used in their eivil affairs, which is attended with some inconvenience, as at different years the same months happen at somewhat different seasons.

The great leprosy is found here in two varieties, one of which attacks the small joints, and the other the skin, of which it renders large portions perfectly insensible. The prejudice against the unfortunate persons seized with this dreadful malady is so great, that some of the lower eastes, when seized with it, have destroyed themselves. These are placed in a boat, and a pot of sand being tied to their neck, they are conducted to the middle of the Ganges, and there thrown over-The people thus destroyed are perfectly willing, both because they are helpless and miserable, and because they think that the sin, to which the disease is attributable, will be removed by dying in the sacred stream, and they cannot afford to pay for the prescribed forms of explation by prayers and ceremonies The books of law condemn this species of explation by drowning: but a passage of the Mahabharat is interpreted in support of it, and where perfectly voluntary, it certainly saves the miserable wretch from much suffering in this world

Chronic swellings of the legs and throat are not more common than in Boglipoor That of the throat is generally ascribed to the persons having resided long on the north side of the Ganges, and certainly the vast disparity in the proportion of those affected on the two sides of the Ganges cannot be accounted for on any other principle than some peculiar condition of the water flowing from the Northern mountains, for in every part where this water flows

the disease is common.

In the division of Newada, the Jain sect have two places of pilgrimage; one a tank choked up with weeds, especially the Nelumbum The temple stands on a small square island, and contains two stones, on each of which there is an inscription, and

are also plenty on the banks of the river. Further east, approaching Bicancie and the Bhatty country, the soil degenerates to an arid said, destitute of vegetation, to travel through which an establishment of camels is as requisite to carry water, as in the deserts of Aiabia.

The principal towns are Baliaunipoor, Ahmednoor, Seedpoor, and Ooch. The strongest place is the fort of Derawnl, which owes its ability of resistance to the utter sterility of the sands that surround it, yet it was the usual residence of Bahawal Khan, the founder of the dynasty The inhabitants of this district are Juts, Baloochies, and Hindoos, which is the usual mixture of population in the adjacent territories, but within the limits of the principality the Hindoos are the most numerous class

The town of Bahawulpoor stands within a short distance of the united streams of the Beyah and Sutulcie, here named the Gurrah, which winds very much and is muddy, but the water when filtered is of an excellent In encumference it exquality. tends about four miles, but the walls include gardens and mangoe groves The houses are built of unburned bricks, with mud terraces, and very thin walls of the same material Ĭt is noted for the manufacture of silken girdles and turbans, and the camels being fleet and strong, are in great demand for hunting The resident inhabitants are principally Juts and Baloochies, both professing the Mahomedan faith. the number of Hindoos is also considerable hawul Khan, the founder of this state, was rather a tributary prince than a governor delegated by the Afghan He died in 1811, leaving sovereign a son of very inferior abilities, and the state has since fallen a prey to the rapacity of Runjeet Singh, the Seik Raja of Lahore -(Elphinstone, Registers, Smith, &c)

BAHDORIAH — A subdivision of the Agra province, intersected by the river Chumbul, partly within the British territories and partly in those belonging to Dowlet Row Suidin

Baidianath (or Deoghur )—A celebrated place of Hindoo pilgi image in the province of Bengal, district of Birhhoom, said to have been built by Ruja Praun Mull of Ghiddore; lat 24° 32' N., lon, 86° 40' E , 110 miles W by N. from Moorshedabad town of Deoghur is situated on a rising ground, and for many miles in extent is surrounded by forests. The temple here is famous for a lingam it contains, respecting which a strange story is told in the puranas, where mention is also made of a river. present there is no stream whatever, although there are several sacred pools. Pilgrims resorting to Baidyanath usually bring water with them from the prayagas, or sacred junctions on the Ganges, and pour it over the lingam, round which they walk a certain number of times, while others he down and continue fasting until they have had a favourable dream. Prayers of various sorts are addressed to the presiding deity Some prny to be kings in the next transmigration, or for such worldly enjoyments as they prefer, others pray for happiness in the heaven of the divinity they address; while some, tired and harassed by the miseries of successive births, pray to be released from existence altogether.

At a particular season the roads are crowded with pilgrims of both sexes and all ages, on horseback and on foot, dressed in quilted cotton, dyed green or yellow, and presenting a most cheerful and animated sight. On his shoulders every man bears a semicircular frame of bamboo, with a basket at each end, decorated with peacocks' feathers and other ornaments In one of these baskets the pilgrim's baggage is deposited, in the other his stock of Ganges water, in small glass phials holding two or three ounces each, and as many bring an overplus, strangers who have come unprovided are enabled to purchase a small supply of the sacred fluid for

to the south of lades a stopendous wa'l of mountains, named the ghauts riscs absuptly from the low country, auryortin. In the nature of a terrace a test extent of level pain, which are so clerated as to effect the terr perature and render the climate cooler This table-land extends from the her how to the southern extremirr of Mrate and Is named Balaglant or stone the ghaute in con tradi tinction to I arconchaut, or below the ghouts. This extensive and fruitful tegion formed the accient Hindoo empere of harrata, no part of which was below the mountains atheugh in modern times the term has been so misapplied by I properns and Mahomedane as to signify ex clustely the country (Carnatic) below the chauts. Under the present head the term Balachantle testricted in the territories acquired by the Bri tish government in 1800 and since subditided into the collectorships of Bellary and Guldapah They were acquired by treaty with the liam, dated the 10th October 1600, and comprehend all the territory si tuated south of the Arisina and Toombuden overs, which fell to the Nursm a share by the treaties of heringspatam in 1702, and Mysore in 1710 together with the talook of Adoni and all his Highness a other di tricte south of these givers. This large tract of country now composes the Balaghaut coded districts, and to these two-thirds of Punganoor were edded and part of Goodeput having been exchanged for certain districts, which had been reserved by the treaty of Mysore as the eventual portion of the Perhap but which by the sunplemental treaty of Mysore fell Into the possession of the British govern ment. Under the ancient native acvereigns the quarter of the Balaghtut was subdivided into many sec tions the chief of which were hur noul Adeni Cummim Harponells, Rydroog Bellary Goots, Ghazi-1

poor, Cuddapah, Dupaud, Gurrumcondah, Punganoor, and Sidhout.

The ceded districts contain more ground than Scotland, and occupy the centre of what is improperly termed the peninsula, which inland position seems to occasion the frequent droughts experienced in these The northern boundary is well defined, and the Toombudra river formerly afforded a sure protection for many months of the year. It also fills some water-courses that irrigate the country about Bijanagur, the ancient Hindoo capital, and about Rampoor in Adon. Owing to the clevated surface of this region, it has no large rivers, except the Krishna and Toombudra, which mark its boundaries to the north southern portion of the ceded districts consists of vallies lying between the eastern ghaut mountains, which extend from Colar to Gurrumcondah, and from thence stretch inland as far west as Sera To the north of these divisions are Cuddapah, Gooty, and Bellary, which lie lower than the mountain vallies to the south, but are intersected in different directions by many ranges of low lulls

The soil of these territories is generally good, especially the black land, which when cleaned and properly ploughed requires nothing more than a harrowing for the next twenty years; in fact, a farmer may cultivate a field of this description for his whole life, without perhaps plough-The black ing it more than once soil is most common in the western divisions, where a noble plain of this description is seen from the top of Adoni hill, stretching north-west and south-east from Gooty to the Toombudra, fifty miles long by from sixteen to twenty broad, which, whether it be considered as an object of agriculture, or as a landscape, presents a grand prospect. This rich soil appears to be pure black mould from two to twelve feet deep, but how and when first collected remains unknown. It contains no vestiges of decayed branches or trees, while

the red and black soils are often abruptly mixed; the latter, indeed, is found among rocks where trees never could have grown. Round the hills and rocks, which abound, the soil is 'usually a red gravel, and both black and red soils are mixed with sand and calcareous stones. In some red fields they do not even attempt to clear the land of stones, as every successive ploughing raises a new crop of stones, which in some respects are not detrimental.

The soil here is in general more fertile than either Canara or Malabar. Two or three nights' rain will ensure a greater crop, in proportion to the extent of surface and seed, than six months' drizzling in Canara. The black soil is the most fertile, and when once ploughed requires little further trouble; but as the red soil is worked with slighter and cheaper tools, the poorer classes of farmers are generally settled on it. Drill husbandry is universal. rains are uncertain, but ought to fall in June, at which period all the peasantry are looking up to the heavens for a shower, as one good night's rain is sufficient to enable the cultivator to sow his seed: but if it fails in June, the whole crop is in danger of being lost. If a little of the rain which deluges Canara, tears up the soil, and injures the agriculture, could be transferred to the ceded districts, they would be among the most fertile of Hindostan As it is, the rains are heavy in September and October, when they often do as much damage by bursting the tanks as their absence occasions during the earlier months.

The labour and expense of clearing black land are very great. Having cut down the shrubs and bushes on 100 acres, the farmer proceeds to plough east and west for one month, and then north and south for another. The succeeding month is employed in grubbing up the roots, after which it is harrowed by a ponderous machine for one month and a half. This lastmentioned implement is so heavy as to require twelve or sixteen bullocks.

which work from morning until morn and then rest. Mer the first great harrowing they again harrow with two erraller machines and six bui jocks for a foren ale an i finally with a still amallet drawn in two bollock & The work however does not finish here for labourers are required for two weeks jonger to clear the ground of roots; after which in his harrows are again employed. This previous preparation being complet ed cotton and koraloo are sown together by a drill reachine after which it modergoes repeated harrow ing, horing and drilling and about three or four months afterwards the crop is tupe when it is resped by three or foor gatherings in the course of a month if it be talen care of there will be no occasion to plough a field prepared in this manner for twenty years t but it most be annually harrowed with four builocks inforo the seed is scattered, for if this be neglected, the great plough and heavy machinery must be agus brought out There is still much waste land in this province where poverty cramps and deadens the charts of the cultivator in some parts the seed is put into the ground without nor previous process, and pressed down by a bush on which a large stone has been placed instead of a harrow

The red soil requires turning up and ploughing ten or twelve hullocks being necessary for one hun-dred acres it is first cleated by frand labour with the hoe and hatchet, and then well ploughed, it is in general full of atones, which in some laces they do not attempt to more. sometimes they manure by folding sheep, one thousand being necessary to manore alx acres when kept on it ten nights, which process however must be annually repeated At other times they manure with the dust, ashes, and refuse of the village, which is thinly spread after a shower and ploughed in this will last four years. Tho seed is then deposited by a dail of a simple construction consuling of three shares which make their fur

raws about an inch deep. Three ind for immisson are placed directly over the there formed at the top in one cup from whence the seed drops through the jumboos into the furrow A woman follows the plough helding a hallow bamboo perpendicularly, with a cup at the top, into which sho poura seed of a large size The lumtoo is dragged along by the drill machine to which it is fixed by a string fire or sie feet ion, the female hol iing it steady with one hand while she pours in the seed with the other The plou h with a horizootal share drawn is two bellocks follows, cut ting the earth horsentally and filing un the forrow To manage the drill and horseontal ploughs four persons and four bullocks are occessary One person drives the bullocks a nother pours in the seed of which eight different blode are frequently sown together; a woman conducts tho hallow ey hader dragged after, sod a man or boy drives the bullocks that follow with the horizontal plough Before they begin to work the ma chine is painted and consecrated,

The great armics that have so often traversed this province have destroy ed the trees except a few clomps which are chiefly found omong the hills t no expense therefore hould be spared in promoting the planting of trees, especially of polmirus. cording to the survey accounts there are 50.2.9 wells in the Hala hant ceded districts of which in 1507 above 13,914 were out of repair Carden produce was then supposed only to pay about aix and one-eighth per cent, of the land rent The hare rocks and absence of wood gives the surface a sugged and savage appear ance, which well agrees with the character of the people who are more laborious and hardy and at the same time more ferocious than the ontives below the ghauts I their food dress and weapons are also more manly than those of their lowland neighbours and on the first acqui attion of the territory every inhabitant not only carried but was accustomed to the use of arms, while

12

every village was fortified. At that era they were also, probably, the poorest people under the British go-So far were they from vernment having any property in the soil, like the landholders of Canara and Malabar, they were seldom even fixed tenants, but migrated from farm to farm, and from village to village, where they clubbed together to carry on their cultivation. Even the houses were government property, and the only proprietors of land were the The enaum, or charity enaumdars lands of the village, were established during the Hindoo empire of Bijanagur, and tolerably well tilled These lands had been resumed and measured by Tippoo, who laid his hands on every thing, but the ingenuity of individuals rendered the resumption

little more than nominal The troubles that so long prevailed in the ceded districts before they were transferred to the Madras presidency, occasioned the destruction of all the ancient revenue accounts; there is reason, however, to conclude, from the tenour of all tradition, from existing documents, and from inquiries, that the land has all along been the property of government. The ancient princes were accustomed to grant away the property in the soil, as well as the government rent, a proof that the land entirely belonged to government. Tradition states that the Bijanagur dynasties took half the produce estimated in kind, and converted it into money at a rate unfavourable to the farmers and cultivators The avowed principle of the Mahomedans, after the conquest of Byanagur in A D. 1564, was an equal division of the produce between the government and cultivator, the share of the first being converted into money at the average of ten preceding years, but the last was further burthened with the payment of fees. It is said that, at the period above-mentioned, there were few chiefs like the present poligars The chiefs of Anantpoor, Raydroog, and Ouke, were great officers of state under the Bijanagur sovereigns, and

held their districts as personal jaghires for their maintenance. Even the Annagoondy Rajas, the descendants of the royal race who so long ruled the south of India, were at last subdued, and though permitted to hold a few districts, were subjected to pesheush The brood of poligars, that afterwards did so much mischief, sprung up between the period above alluded to and the reign of Aurengzebe.

War, famine and bad management, all combined for many years to depopulate the ceded districts and diminish their revenue; but the incessant rebellions of the poligars seem to have been the main cause of their These poligars were originally either public officers of government, who held villages for then personal maintenance, or they were renters who set up for themselves, or lastly they were usurpers. were merely potails or head villagers, who, taking advantage of the strength of the country and weakness of the government, withheld the revenue and levied troops These self-created chiefs kept up all the state, and were installed with all the formality of legitimate sovereigns, although their incomes did not exceed from two to three hundred pagodas per annum, and their pretensions were never acknowledged by any of the different governments that preceded the British in the administration of the province Neither the Cuddapah nabobs, however, nor the Maharattas, could keep them in subjection, or compel them to pay their tribute with regularity; while the struggles to enforce it on one side, and to resist it on the other. produced unceasing broils, and distracted the country during the whole of the eighteenth century In fact, neither Hyder, Tippoo, or the Nizam, made the slightest progress in restoring tranquillity, and anarchy had attained its utmost perfection in these districts when they were transferred to the British government this period of distraction the poligars withheld the revenues in order to raise a force to defend themselves;

the ormy sent against them plundered on all sides, so that their rebellion and reduction were equally destructive to the miserable cultivators

In A D 1800 the British functionones entered the Balaghaut neded districts where they found confusion The Inhabitaots worse confounded had been plundered not only by the reveoue officers, but by every person who could pay o bribe for the print lege of trying to extort money chief inhabitants had not only been permitted but encouraged to carry on o predatory warfare ogninst each other on the same terms. The Indolcoce and corruption of the Nizam s officers influenced them to obandon the collection of the revenue to poliear remiodars ood the head-men of villages Every village was a gar rison the linkslutonts of which frequently turned out and fou ht a pitched battle with the village nearest to them The Nizam's troops were olways engaged in the siege of some place, while the executors of those thus armed with outhority and the habitual obstinacy of the village recorde soode it difficult to say which was in the right Murders were so common that few families of hote had escaped assassinations or were themselves unpolluted with blood In those times the head man acted the part of a little potentate in his own village and the anarchy that pervaded the provioce might in some measure justily his taking on himself the dictatorship of his little republic but the impunity which o few hondred rupees secured for the most atrocious erimes, tempted every man who could afford it, to indulge his rapacity malice, or ombition In most parts tho head-man of the village, the head cultivator ood the village accountant, so peaceable in the Company's old territories, had become leaders of banditti chiefs of robbers and sapguinary ruffians, garrisoning dens and strong-holds. To the cast matters were still worse, for there the poli gars had generally resumed their former situations and depredations The impotence, so short, of the

Nizam a officers the predotory and militory habits of the notices, so frequently overtun by large ormies the frequent transfers from one govern ment to onother, and the frontier stontion which enabled offenders to escape had introduced a state of onarchy searcely errer excelled in the

annuls of India The strong arm of the British power established o reluctant tran quility, and the country was begin ning to recover from its state of desolation, when o severo drought, in 1803 greatly mured it In many ports the fadure of the dry erop was so complete, that the blade never oppeared above ground; in others it never produced on ear but withering was abandoned to the cottle fortunately the same drought that prevailed in 1803 continued with unabating severity throughout 1804, when the crils were infinitely oggravated The continuance of the drought for two years had parched up the ground; there was no grass in the pastures, straw was enermously dear; o great proportion of the cattle pershed and many of the poorer inhabitants were forced to oult their houses During this year the drought was so severe that nothing but the prodent measures odopted by tho principal collector (Sir Thomas then Colonel Munro) to alleviote and more especially his abstaining from all the measures which so frequently oggravotou scarcity coold have saved the country from the horrors of o frome such as then desolated the Nizam's country and such as had in former seasons out so bad, desoluted the ceded districts. The rice here in Juce 1804, was eight seers per rupee while on the opposite side of the Krishna, at the distorce of only thirty mdes, it was five seers. Tho soil and produce of Adoni in the British territory and of Raichoor in that of the Nizam, are nearly the same and they are only separated by the Krishna; yet in Raichoor thero was a famine, when in Adon; thero was only a scarcity, and both were equally protected by the ormy onder

General Campbell In 1805, a great increase of revenue took place in consequence of a favourable season following the two preceding years of dearth, and ever since these districts have greatly improved, notwithstanding the recurrence of bad seasons, and other serious obstacles from a

turbulent population.

The ceded districts, when obtained in 1800, were placed under Col. Thomas Monro, and were valued in the deed of cession at 1,651,545 star pagodas, including all heads of reve-The collector, in the first instance, fixed his rate much below what had been the former demand, increasing it only as the means of the cultivator and the state of the country improved In the course of seven years the land revenue alone increased from 1,006,593 to 1,517,272 pagodas, and under the able management of Col Munro, the inhabitants of the province, from disunited hordes of lawless freebooters, became as far advanced in civilization, submission to the laws, and obedience to the magistrates, as any other subjects under the Madras presidency. In 1817, the total gross collections of the two districts (Bellary and Cuddapah) into which this province was divided amounted to 1,740,304 star pagodas.

In 1806, after the survey of the province was completed, instructions were issued to make out new returns of the number of inhabitants in every village, as far as was practicable by actual muster, except with those castes who seclude their women from public view. The total number of inhabitants, according to the lists returned, amounted to 1,917,376 persons, which shewed an increase of one-fourth of the population in five years of tranquillity, partly arising from the return of persons who had emigrated during the Nizam's domination; but the remainder must be attributed to the falsity of former These records of the population tended to prove that the males exceeded the females in number onetenth. The number of cattle, sheep,

and goats could not be ascertained with the same accuracy, their owners having a superstitious prejudice against their being counted by others, or even

by themselves.

Within the limits of this province districts are subdivided into villages, under the guidance of potails, or head farmers, by whom the peasantry are guided. In all villages the latter are in the habit of meeting and debating on the subject of rent, and there are many villages where they settle among themselves the exact proportion of the whole rent that each individual is to pay; they are called veespuddi, or sixteenth villages, from the land rent being divided into sixteenth shares. A great part of the Cuddapah district is composed of these villages, and they are scattered, though more thinly, over other parts of the country. When the season for cultivation draws near, the peasantry of the veespuddi villages assemble to regulate their several rents for the year; the pagoda is usually the place ehosen for this purpose, from the idea that its sanctity will render the engagements with each other more binding, every village being in this manner a small collectorate, conducted by a potail or head farmer. This quarter having been brought under subjection by the Mahomedans at a comparatively late period, and never thoroughly subdued or settled, a very great proportion of the inhabitants follow the Brahminical persuasion; but in the larger places, such as Cuddapah, Bellary, Adoni, and Curnoul, many Mahomedans are to be found. That the courts of justice in the Balaghaut ceded districts have but few causes is partly accounted for by their poverty, law being as yet too expensive a luxury.

Indigo is here raised and exported in considerable quantities, and the coarse sugar manufactory is also on the increase. Cotton is one of the chief productions, which although that first languished, is now rapidly on the increase; the peasantry, in general, being a very industrious race, and most of them cultivators by caste.

habitants. Indeed the sites of several factories may still be traced, by a ruined gateway, a group of tombstones, or some such memorial, and the foreign flags are still hoisted on the respective premises by a Portuguese writer, who for sixteen rupees per month officiates on behalf of the different sovereigns, who have long ceased to have any other representa-The salt agent for the Cuttack district usually resides at Chundepoor, on the sea-beach, a few miles from hence, where salt is manufactured by lixiviating the mud according to the process practised in the Sunderbunds Formerly a considerable quantity of grain was exported to the south, but this branch of trade has of late years declined, owing to the long-continued peace enjoyed by the Madras territories, which has enabled them to supply their own consumption without importation. Balasore, however, is still the principal port of the Cuttack district, and is provided with dry docks, to which vessels not drawing more than fourteen feet of water can be floated at spring tides. In 1822 it was estimated to contain 10,000 inhabitants, and was frequented chiefly by Maldive vessels, salt boats, and a class of sloops that carry rice to Calcutta Travelling during the cold season distance from Calcutta 141 miles. (Fullarton, Stirling, 10 Reg., Lechie, Bruce, &c.)

BALI ISLE.—See BALLY.

Balij.—A town in the province of Gujerat, Kaira district, thirty-three miles S E. from Ahmedabad, lat. 22° 40′ N., lon. 73° 10′ E This place, until 1817, although completely insulated by the British dominions, belonged to the Guicowar, from whom it was obtained in exchange for another tract of equal value.—(Public MS. Documents, &c)

BALLY (Phalaki)—A town in the province of Beeder, twenty-two miles N.W. from the city of that name, let 18° N, lon 77° 19′ E. Fifty years ago this was a large town, but

it is now much decayed, and answers better to the description of a village - (Upton, Register, &c)

Ballaroon —A town in the Berar province, fifty-eight miles SW. from Elliehpoor, lat. 20° 39' N., lon. 76° 56' E

Balliaghaut.—This place is now comprehended within the limits of Calcutta, being properly its poit for the eastern inland navigation, although within the memory of inhabitants still alive a jungle intervened two miles in extent, infested by tigers and other ferocious animals. A remarkable ehange has since taken place, there being a handsome avenue of gardens and houses the whole It is situated near the western extremity of two shallow muddy salt lakes, which at low water are nearly empty, but when full admit native craft of considerable burthen — (Fifth Report, &c)

BALLY (Bali or Little Java) -An island in the Eastern seas, separated from Java by the strait of Bally, and lying between the eighth and ninth degrees of south latitude south-eastern extremity of Java is in lat 8° 41′ S, lon 114° 25′ E. Table Point, the southern promontory of Bally, is in lat 8° 50' S. In length it may be estimated at seventy miles, by thirty-five the average breadth The coast rises gradually for ten miles towards the interior, to a ridge of mountains which stretches across from east to west, and terminates at the eastern end in the peak of Bally, which is volcanic The straits are narrow in some parts, and a six-knot tide runs at full and change

This island exhibits the same gcological features as Java, but it has an iron-bound coast, and is destitute of harbours, and even of safe anchorage. The lands are irrigated by abundant streams and rivulets from the mountains, and are remarkably productive. In the lower tracts the chief-article of food is rice, but in the upper maize and sweet potatoes, the animal food is mostly swine's flesh and beef, the price

of an ox seldors exceeding Insterling. A con lders' e une her of ox and buffalor hales are in conarquence expected but the natures have not yet learned the art of sait in, their hides. Hesides these the third experts are rice bards meets. coarse cloths, cotton parm, salted principal imports, epium betel-nut nory, gold and silver Unlike the Malays, the Balmese al hor a tea faring life nor are they much ad lieted to merchandising the Boggess prous (to It.4, about fift) being the grand carriers of the Archipelago most profitable trade not long aco was that of slaves which has since much diminished yet from 300 to 1.000 are still zanually exported mostly by the Chinese, who prefer them oo account of their superior strength and intelligence

Thenatives of Hall excel the Ma layaand Javanese in stature and muscular strength and appear a superior race to the generality of the Lastern islandera, The Chinese population is also considerable especially at Blelling The demand of the chiefs for a share in the crops rests on the peculiar husbandry of the country which depending greatly on Irrigation. of which he is the distributor, he claims in consequence for the water expended. The constitution is esaentially despotic as modified by the aystem of village government, which prevails here as in Java In 1815 the ordinary price of rice was 133 poundafor three-fourths of a Spanish

idollar
In Java the establishment of a Mahomedan government for nearly four
centuries has tended to obliterate
the general knowledge of the better
educated; but in Ball the Mindoo
faith however perceived by local
soperations is still the paramount
religion the Mahomedan doctrinea
having made little progress, ond no
portion of the island having ever
been permanently subjected to European outhority. The great mignerty
of the Balinese ore Illindoos, of the
sect of Siva, authorited in the four

erest exites of Best-oles hhetnes labyer and buless. There are shou fen Bodibi to und nels o of entracts beldingure and designated by the Hinden name of Chambals The Its inese link-wire may be em tracelle entered erents of bym's last the great one a of the populace, The those of Bergal, worship their tutelary gods, every village mountain forest and river busing its peculiar delty. The Beabrains are treated with great respect and con duct the alministration of jostice, cital and criminal, They have their hair bound up in a knot, but do not wear the duringuishing thread ; the three inferior castes cron their hair Proces are usually but not interably of the military caste as in 1815 the Raja of Carang Amem, the most powerful on the island was of the mercantile class. Little at tention is paid by the great mass of inhabitants to the Brahmiolcal doc trines of purity and impurity of food for they eat beef without remorae. and lines and poultry are among their daily lummers. The succederal and restrict themselves to a vegetable thet

In Itally there are no religious mendicants or asceties addicted to extravagent acts of mortification but the practice of sacrificing the widow and concubino at the funeral plie of the hosbands is carried to an excess uoknown in Hindostan These Im molationa are most frequent among the military and trading castes for a female of the acrolle class rarely un dergoes the sacrifice; and what is mare extraordinary one of the sacred order never does When the father of the present Haja of Blelling was burned accenty four women mounted the pile along with the corpse The Ba linese language is a rude, simple and peculiar dialect besides which there la o copious and refined language of deference borrowed from the Samerit and Javanese The Ilindoo era of Salirahana or Suca aeventy-eight years dato after the birth of Christ is naiversally used here, under the denomination of Saca-warsa-chaudra. It is said that the Brahmins here are able to calculate echipses from tables in their possession, but this fact has not yet been well established.

In A.D. 1815 the island of Bally was divided into eight states, each independent, and governed by its own chief. At that date the total population was loosely estimated at 800,000 souls; but as the computation was founded on the number of males whose teeth had been filed, no great accuracy is to be expected; viz

 In Klongkong
 30,000

 Carrang-assem

At present the state of Klongkong is allowed to be of the highest antiquity; yet in 1633, when the Dutch solicited assistance at Bally, the prince of Gelgel appears to have been paramount. In 1814, the Raja of Blelling's brothers having insulted the British post at Blambangan, in Java, an expedition called at Java on its way to Gelebes, and received the submission of several Rajas, and during some time the town and crattan of Blelling were occupied by a British garrison—(Crawfurd, Raffles, Thorn, Forrest, Leyden, &c.)

# BALOOCHISTAN,

(Or the Country of the Baloochies). The boundaries of Baloochistan, in their widest acceptation, are, the Indian ocean to the south; Seistan and Afghanistan to the north; the provinces of Laristan and Kerman to the west; and to the east Shekarpoor and the Sinde territories. Within these limits are comprehended the provinces of Jhalawan and Sarawan, Mekran and Lus, Cutch Gundava, and Hurrund Dajel, Kohistan, and the The space may be described as being included between the latitudes of 24° 50' and 30° 40' north, and the longitudes of 58° 55' and 67° 30' east; but some sections of country exceed these limits east and west. The whole of this extensive region composed the dominions of Massir Khan, the father of the late Khan of Kelat; but since his death, in 1795, it has undergone many political and territorial changes

To the south, Baloochistan Proper commences at Bayla, from which place it extends northward to Nooshky, seventy-nine miles N.W. from Kelat. This country is described as a confused heap of mountains, through which the roads generally lead in water-courses and the dry beds of small rivers. Jhalawan is the most southerly district of Balooelustan, and Sarawan the most northerly. They are a mass of mountains from Kohunwat, on the frontiers of Lus, to the desert which separates them from Candahar; the length of this stupenduous range is 350 miles, but varies in breadth at different places. These mountains are barren, being cluefly composed of coarse, black stone, the valles of Wudd, Khozdar, and Sohrab are capable of cultivation. The elimate of this alpine region assimilates in a considerable degree to that of Europe, experiencing four distinct seasons: spring, summer, autumn, and winter. The heat is seldom unpleasantly great, but during the months of December, January and February, cold is intense.

The plains of Wudd, Khozdar, and Sohrab, produce, in favourable seasons, plentiful crops of wheat, barley and jowaree, and in some of the lesser vallies grass grows abundantly. Flocks of sheep and cattle are numerous in every part of the country. Jhalawan and Sarawan are subdivided into smaller districts, and every district ınto innumerable khaıls or societies, each of which furnish their quota of troops, according to the population or the exigence of the service. Shal and Mustung, two stages to the north of Kelat, were given to Nassir Khan by Nadir Shah for his services at Mished, and Hurrund Dajel for those in Hindostan. Nooshky is a small tract of about thirty-six square miles, at the base of the Kelat mountains. It is an arid tract, the

gandy falls of which are continually shifting with the winds. A slender stream called the Xyrur issues from the bills, and irrester a small pertion of the country; and there are also small patches of land capal 'e of cui tiration lo different parts of the sand but which frequently become quito sterile for want of rale The inhald tants of this tract dwell onder black felte stretchedover wicker work made This species of of the guz plant village is named toomso or khad, and in most of them a few limdoos are to be found.

The soil of \ooshky being so sandy. the heat in the summer months is ex cessive on which account tho ichsbitants migrate to the mountains for cool air and water, as the stream at that season fails to the valley inhabitants import grain from Cutch Gendava, and berstan, and dates from Mckran. The Baloocines here are called Aharroes and Rukheani, and are related to those of the same tribe in Seistan and Bunpoor In appear coce they are tall men with small bones; are extremely idle and diesoiote, and addicted to thleving They undertake predatory incursions to Mckran and carry off into slavery every person they capture worth the trouble; some they sell at helat and Candahar the remaloder are brought into the horde, and igcorporated with it. In this part of the country all the Baloochies understand Persian t but they speak a dialect of the Baloocky among themselves, different from the hoorgalee spoken by the Brahoocer Sohrab is a fine valley extending north and south fifty miles, by about twelve in breadth The middle, through which the water runs from the hills, is well cultivated with many villages scattered about half a mile osunder The mountains in many parts of Baloochustan are inhabited by shepherds who reside in temporary huts erected on any spot that offers good pasturage

The general soil of Baloochisten is sandy stony, and end, end the mountainous tracts coosist mostly of hard black rock. The earth on the

plains is mixed with such a profusion of rebies and small stones that the mould is scarcely visible t yet this most unpremising mixture prodoces when properly ti led and frrigated, abundant cross of wheat and barey, and where uncultiva.ed grass of a In the parched distribut growth and desert portion of Baloochistan the date tree bears the first rank in point of importance The best tim-ber is procured from the arbor tree (greatly resembling the teal) and the tamarind both remarkably hard and dorable, and of great dimensions, to which may be added the babooi, tamsrisk, and mulberry The neem, peepol, sissoo, chinar mangoe, walnut and sycamore, are also found in dif ferent tracts; but the oak, ash and fir are unknown Almost every description of mineral is said to be found here, but oor information on this head is as yet defective. Hock salt is common to the westward, and on the road from Cutch Gundara there is a range of hills containing salt of a perfectly red colour and operient quality. In that vicinity solphur and alum are also found and to the west of Nooshky white and grey marble

The wild and domestic onimals of Balcochistan are very nomerous comprehending both tropical and Earo peas classes. The horses are strong well boord and large but usually vicious. Those experted to India ore mostly reared to the sooth of kelst, and in Cutch Gundava. The aheep are of the fat-tailed species. The causel and dromedary are highly prized by the Balcochies; the first for butthen the last for speed

There are few countries so wholly without commodities suited to commercial exchange as Baloochistans; partly owing to the oversion of the natives to regular industry, and partly to the physical noture of the country, consisting either of stupendous mountains, or arid plants destitute of mostore, vegetotion, or navigable rivers the reads being generally nothing but the stry beds of torrents. The population is also dispersed into small sixtoo is also dispersed into small

societies, hostile to each other, and yielding scarcely a nominal obedience to any chief. The exports from Kelat are at present insignificant, but it was once the great channel of merchandize from Khorasan, Candahar, Cabul, and India The imports from Hindostan consist of iron, tin, lead, steel, copper, indigo, betcl-nut, cochineal, sugar, spices, silks, kincaubs, gold eloths, chintzes, and coarse Land watered by weils woollens. pays one-twentieth of the produce; that by the rains from one-tenth to one-sixteenth, and that by natural springs a still higher proportion

The inhabitants are divided into two great classes, severally known by the appellations of Baloochy and Brahooee, which are again subdivided into an infinite number of tribes, khails, and tomuns Between these two great classes there are leading distinctions of language and appearance, but the national aggregate is exclusively denominated Baloochies, partitioned into three distinct tribes, the Nharooees, the Rinds, and the Mughsees These are mostly stationary, but the Brahooees are more migratory and unsettled. The latter have tall persons, long visages, and high features, the former short, thick bones, round faces, and flat lineaments, and the hair and beards of both are brown In husbandry and domestic occupations the Brahooees are hard workers Those residing near the plains till large tracts of land, and dispose of the produce to the Hindoos for exportation and the sale of cheese and ghee, the produce of their flocks, with a few coarse blankets, carpets, and felts, form the only traffic in which the Brahooces engage Their food is the same as that of the Baloochies, except that they prefer flesh ment half cooked, without bread, salt, or vegetables, to any other species of nourishment.

The Brahooees and Baloochies are equally noted for their hospitality, but the latter are less addicted to rapine and predatory violence, yet are fully equal in personal bravery and

the endurance of hardships. They are also considerably exempted from the worst traits of the Baloochy character, which are avarice, a vindictive disposition, and proneness to cruelty All the Baloochies are excellent marksmen, but the Brahooces excel in strength and courage. They train greyhounds with great care, and frequently exchange them for one or two eamels, or pay 400 rupces for one of superior quality. The breed of shepherds' dogs is also excellent The broad-sword exercise and shooting at a mark are favourite amusements with the Brahooecs, and, as swordsmen, they are said to surpass most of their neighbours. common dress is an under coat which fits close to the body, and is worn over the pyrahun or shirt, their trowsers are gathered up at the anele, and they wear a small round flattopped cap of felt silk The shepherds wear a covering of white felt above the shirt in winter, with cloth trowsers and a small felt cap Petty quarrels are usually adjusted by the chief of the khail or society, but an appeal in capital eases may be made to Kelat, except when a traveller has been murdered, on which emergencies the nearest chief is authorized to carry the law into execution

In religion, both the Baloochies and Brahooces are of the orthodox Soonee sect of Mahomedans, and strenuous adversaries to the Shias. Neither the Baloochy nor the Brahooee are written languages, and the early history of both tribes is entirely traditional On examining the translation of the Lord's Prayer into the Baloochy dialect, the missionaries found only four words of Sanscrit The Baloochy partakes considerably of the idiom of the modern Persian, from which at least half its words are borrowed, but greatly disguised by a peculiar pronunciation. The Brahooee, on the contrary, in no respect resembles the Persian in sound, but contains a great many Hindu words, having a strong resemblance as they strike the ear to the Puniabee dialect. The Dehwars

of Baloochistan speak pure Persun and resemble in every respect tho Tajiks of Afghanutan Among the dispersed societies of Baloochistan there are a few ilindoos scattered who carry on the miseral le traffe of the country, and act as money-changers and agents to the natise chiefs. It is probable that long after the first Vishomedan invasion a great proportion of the country still continued in the occupation of the ilindoor but for more than a century past, the Mahomedan tribes have been progressively so in rea ing in burbarity that no mediom could be observed and the native Hindoos liste cither undergood compulsory conversion or descried the country A converted tibe of lindoos at present settled in Cutch Gundara still retain the name of Gooroowaner or disciples of the Goorgo or Brah The few Hindoos minical priest who migrate to this quarter from ilindoostan for the purposes of trade seldom being their families, and have probably degenerated as travellers have not observed among them that repugnance to fiesh meat which characterizes most of the purer castes of India.

More than two centuries ago the enty of helat with the surrounding country was possessed by Sewah Ilaja, a l'indoo at which period the Baloochles (as at present) tended flocks in the mountmos The inhabitants were then much infested by the depredations of the people reald ing in the low country lying between helat Sinde and Shikarpoors and to protect them the Raio sent for Kumber (which in the Baloochy signi fies an Abysalnian) o Baloochy chief ond took him into his service allow ing him five bundles of grass and wood daily for each mon In progress of time this chief increased his followers and seizing on the govern ment raised the tributo to 100 bun dles of grass and wood per day, besules o contribution of horses. camels and foot-ruoners. This tra bute is still occasionally exacted by the khans of Kelat, and pald by the

deliwars or peasantry in the neigh isombood who are said to have come originally from I cross although they have gruch the appearance of His doos.

humbur, the first numper, was

Sumbur, the father of the next

Mahored Khan; who was sue creded I; his soo

Abdallah hhan the father of has ir him who ascended the throne after putting to death his brother Hadjee khan \assg khan performed some important services to hadir Shih who rewarded him with the denstion of several prorinces; and being a man of consi derable abilities greatly extended the Balcochistan dominions, which he left in a comparatively flourishing state at his death in 1705 to his eldest son, Mahmood Khan who then accended the throne Since that period the territories suffect to helps have been greatly curtailed by the Ameers of hinde and other neighbouring princes the talents of Mahmood Khan being very inferior to those of his father in conduct ing affides he was greatly assisted by his brother, Mustapha Khan who proved of an active and martial disposition ; but since 1810 Baloochistan has been involved in such locessant broils and revolutions that the semblance of government has also disappeared in tott, Mustapho hlian above-mentioned was assassi nated by his jounger brother who in 1812 was killed in battle against the forces of Malmood Lhan, the eldest brother

In 1815 the territory immediately subject to Mahmood Khon comprised the high hilly country of Sewistan and the low country of Cutch Gundarn and Hurrund Dajil to the eastword; bounded on the north by the ill-defined province of Khorasson south by Law and Sinde on the west by Mckran and on the east by Sinde In 1810 his whole clear revenue was only 30,000 rupecs, collected from Hur

rund Dayil, Cutch Gundava, and the The Khans bazar tolls of Kelat. of Baloochistan acknowledge the paramount authority of the Cabul sovereigns, to whom they are feudatories; but the degree of their submission is in proportion to the talents of the reigning prince, and the political circumstances of the Cabul government. Formerly it was supposed that, upon a grand emergency, that the Baloochistan dominions could produce 25,000 infantry and cavalry, but so large a number has never yet been collected together, nor would it be an easy matter, in so barren a country, without navigable rivers, to subsist them if they were. -(Pottinger, Christie, Macdonald, &c)

BALWUNT —A village in the province of Orissa, district of Cuttack, thirteen miles south from the city of Cuttack. At this place there is a choultry for the accommodation of the Juggernaut pilgrims, having a temple of Narsingh (the man lion) in the centre

BALUMBA.—A town in the Gujerat peninsula, situated on the Gulf of Cutch; lat 22° 40' N., lon. 70° 36' E.

BAMBARAH —The ruins of a city in the province of Mooltan, lying on the west side of the city of Tatta, and conjectured to be those of an ancient city named Brahminabad by Persian authors, who report it to have been the capital of a flourishing Hindoo kingdom in the tenth century They also name it Mahaura and Manhawar. The site of Bambarah was on a hill covered with trees and bushes, and exhibits in the neighbourhood many tombs of Sindian warriors, who fell in a battle between Gholaum Shah and Meer Ali —(Maxfield, &c)

BAMEENY (Vanan).—An island in the province of Bengal formed by the sediment deposited by the waters of the great Ganges and Brahmaputra, where they unite with the ocean in the Bay of Bengal, under the name ofthe Megna In length it may be estimated at twelve miles, by five the

average breadth; but its surface is very little raised above the level of the tide, which here runs with frightful strength and rapidity. At Bameeny there is a government establishment for the manufacture of salt, subordinate to the Bulwa and Chittagong agency.

BAMIAN.—A city subject to the Afghan sovereigns of Cabul, which, although so far to the west, was subject with the district to the Delhi throne during the reign of the great Emperor Acber, as appears by the following extract from Abul Fazel, A D. 1582 "In the district of Zohak Bamian is the castle of Zohak, a monument of great antiquity, which is in good condition, while the fortress of Bamian is in ruins. Tooman Zohak Bamian 861,750 dams."

This famous city, the Thebes of the east, is situated in lat 34° 30' N, lon. 66° 57' E, on the road between Cabul and Bahlac, eight days' journey from the latter place Like Thebes of Egypt it is entirely cut out of an insulated mountain To the south of it, at the distance of two miles, are the ruins of an ancient city named Ghulguleh. which according to tradition was destroyed at a very carly period by the The city of Bamian Mahomedans. consists of a vast number of apartments and recesses cut out of the rock. some of which, on account of their extraordinary appearance, are supposed to have been temples. By Abul Fazel there were reckoned to be 12,000 of these recesses in the district of Bamian. The attention of travellers, however, is principally attracted by two collossal statues, fifty cubits high, which are erect, and adhere to the mountains At some distance from in niches these two is a smaller one, fifteen cubits high One of the large statues is supposed to represent a male, and the other a female, and the small one their son. They are all much disfigured, and the legs of the male broken; for the Mahommedans never march that way without firing two or three shots at them, but owing to their want of skill they seldom do

much mischief From the numerous fragments remaining it would appear as it there had been many hundred statues, the est tence of which, and of the exerctions, would indust that the lababitants had at one time followed some branch of the Hindoor religion. When Fraun Poory, the noted Hindoo ascetic, while this place between 1770 and 1780 he was struck with the number of statues that the mindred of the thin still remained, although the place had long been deserted by its length thants. In A.D. 1250 it was taken and destroyed by Gengla hina.—[Wilfurd Dussen Mail Fartl, 5c)

BANNEL RIVER — A considera ble atream formed by the junction of several others which rue in the mountains of Goodwana. It tractions the province of Cuttack and using with a branch of the Mahanaddy called the Broops proceed with it to the sex which it joins peer Point Falmiras

HARIWFAS.—A small town in the province of Agra, about fully cight miles travelling distance from the city of Jegpoor it covers both alopes of a steep and rocky filer, insolated from the plain. The Interior is meanly built, but it contains soveral Hindoo temples.—(Fullerian, fr.)

## BANDO (See BRANNO)

Bawoss (or Bemourer ) -- A small silings in the province of Delhi situated oo the northern confines of the Bareslly district, forty-one miles travelling distance & from Almora; lat. N, lon E. It is now tho principal thoroughfare between Hobileund and Kumoon an execulent road twelve feet wide having been constructed with great labour and expense between Bamon and tho fortress of Almors. This road in some places is cut out of the salid rock; in others supported by parapet walls winding round the face of a hill It is carried directly over the creat of the great Goggar mountain which rises to the height of 7 600 feet above the level of the sen, the

read crossin, at an elevation of 7,000 feet. The village livel is situated in the great Sun forces near the face of the humano bills and close under them two miles from the village there is a cleared spot, with a commissant deput for troops and travellers... [Fullrice, jet.]

Bawroon.—A town in the proviore of Value, fifty-fire miles 5.5 E. from the city of Oojeln; lat. 22° 40' N., lon. 76° o' E.

Baurnoaa —A considerable town in the province of Stalwa, situated in the Rewa river, I 388 feet above the terrel of the seas lat. 2° 11 N<sub>2</sub> inn. 75° 80° E. The fort of Bampoon has never been finished but the walls ore well built, and within them is a palace (also unfinished) begun by Jerwant llow Holear, in whoo it contains a statoe sculptured in white ontains a statoe sculptured in white marble. In 180° the number of houses was estimated at 4,00° and the city with the pergunnaha statched formed part of the dominlons of Mulhar flow Holear—(Bioleain 4°)

RANNAGREA — A town in the Orista province, eighty miles h W from Unitack; lat 21° 3 h ion 8.5° 2° 2. To the south of this place are some troo miles and forges

BANATE RIVER (Fanosa ) - The source of this river is in the province of Aimeer, but the exoct spot has never been ascertained. In passing through that tract it attains to a considerable bulk, ond even when pursuing its course from Deers through the Mehwas, its size is not insignificant; but it afterwards toses itself in the hakreze ond by the turno It reaches Rahdonpoor is reduced from various causes to o small stream Three miles below Rahdunnoor the bed of the Banors is half a mile broad, but during the dry season not more than twenty yards of this space conturns water the current being two feet and a half deep, and the water of an excellent quality. To this part of its course the banks are nearly on n ferel with the surrounding country. which is loundated during the rains to the extent of two miles. Twenty-five miles below Rahdunpoor the Banass is wholly lost in the great salt morass named the Runn.—(Macmurdo, &c.)

Banaganapilly.—A town in the Balaghaut ceded districts, situated at the northern extremity of the Curnoul plain, commencing at the southern range of hills near Cuddapah; lat. 15° 18′ N, lon 78° 18′ E This village stands at the foot of a low range of hills where the diamond mines are found. The miners here are content to sift and examine the old rubbish, from a prevailing opinion, common also elsewhere, that the diamond is always growing, and that the chips and small pieces rejected by former searchers, actually increase in size, and in process of time become large diamonds matrix of the diamonds produced in the south of India is the sandstone breccia of the clay slate formation, and those found in alluvial soil are produced from the debris of that rock. —(Heyne, Voysey, &c)

BANAUL.—A small district or valley in the province of Cashmere, situated among the southern hills The village thus named stands in lat 33° 56' N, lon. 75° 13' E, forty miles SE. from the city of Cashmere Five miles distance to the south-east of Banaul begins a boundary of a division of the Cashmere territory, lying beyond the great circle of mountains. governors of Cashmere permit the fertile valley of Banaul, ten miles in length, to remain uncultivated, that it may not afford food or shelter to the neighbouring Hindoo states in the kohistan of Laliore, who at some former period penetrated through this tract to the interior passes of Cashmere The Banaul district is elevated, and looks down on the plains of Cashmere — (Foster, &c)

BANCA—An island lying off the north-eastern coast of Sumatra, from which it is separated by the straits of Banca. In length it may be estimated at 135 miles by thirty-five the average

breadth. Monopin, a high mountain with a peak a few miles north of Mintaow, the capital, is an excellent landmark for the entrance to the straits.

The geological formation of this island is a primary rock, the principal mountains being granite, those of an inferior elevation a red non-stone; and between these two the tin is found in alluvial deposits, seldom lower than twenty-five feet from the As yet only about 3,400 geographical square miles have been surveyed, the mines now worked being confined to the north-west quarters, but from one extremity to the other, the existence of tin has been ascertained in all the alluvial tracts, and it probably abounds also The ore found is in the mountains the common oxide of tin, mostly of a reddish brown colour, and it is washed in the numerous mountain streams that distinguish the scenery of Banca A great majority of the miners are natives of China, and notwithstanding the difference of climate, and the severity of their occupation, they appear to enjoy good health.

Tin in every language of the east-ern islands is known by the name of timah, a word presumed to be of Malay origin Its geographical distribution comprehends Banca, the Malay peninsula and its isles, and Junkceylon, whereas in Europe its range is confined to a very few places. It is so abundant in this island, that in 1813 the British government, by paying an additional price per picul, increased the quantity to 2,083 tons, or about half the whole produce of Cornwall. China and the continent of India are the principal markets for exportation.

The inhabitants of Banca are Malays, Chinese, and indigenes, the last subdivided into mountaineers and men of the sea. The first are few and indolent, the second laborious and active, the third remarkable for laziness and rude simplicity. These live dispersed over large tracts of country in the interior, subsisting

nearly in a state of nature and oversa to European society, and all restraint or habits of regular industry men of the sea (lloyads or Orang Laut) oppear to be the remains of a peculiar people who with their farithes and bousehold gods inhabit small prows along the sheltered lease of the coast and procure their food by fishing

Banca lies opposite to the firer Palerobang in Sumstra, where the nominal sovereign of the 1 land resides, at his capital named Palemhang 1817 the island and trines were ceded by the Suken to the British government and taken possession of with n view to the suppression of plracy In 1817 they were made over to the hing of the Aetherlands. The chilef town is named Vintow -(Craufurd Raffles, Marsden Thorn, Staunton Statorinus Tistore (c)

Banca (Straits of).- The Island of Sumstes forms the western and that of Banca the eastern side of tho strate, in passing through which the Sumatran coast may be approached neurer than the other The country is covered with wood down to the svoter's edge, and the shares so low that the sea overflows the land and washes the trunks of the trees. The depth of water 19 very leregular of some parts shouling in one cast of the lead from twelve to seven fathomy, and in others from seven to four There are also coral banks so near the surface as to be easily distin guished by the white colour of the water over them The strarts of Banca should always be entered with a favourable monsoon, according to the destination of the vessel- (Stounton, King &c)

BANCA,-A very smoll island in the Eastern seas surrounded by a cluster still smaller lying off the north-eastern extremity of Celebes; lot 1º 50' N lon 100 E. This ssland obounds to cocos-nuts, himes jacks, fish turtle and rattans has o harbour at its south end and is well inhabited Near Banco is the har bour of Tellusyong called Talesse by VOL. I

Lalentyn ot which are some wild cattle but no inhabitants blands ore much frequented by plratical cruleers from Vingindanso and Soulog .- (Forrest, &c)

BANCALLAN .-- A town on Madura the residence of the ankon of the frland fat 7º 2º 5., fon 112º 45 E. This place is large and populous. The fort is close to the palace and the environs are pleasant having good roads interspersed with country sents and pleasure groun is,- (Thorn

BANCAPOOR -This district occu nies the southern extremits of the Bejapoor province and was formerly distinguished by the name of Shah poor or Saranore It extends olong the north bank of the Wurds and Toombudden rivers The principal towns ore Shalmoor and Bancapoor

BANCATOON (or Benlypoor) -This was formerly a place of importance and strongly fortified until dismantled by Tippoo during one of his cam paigns ogainst the Maharattas. It lies about six miles N F from the city of Shahnoor, in the Bejapoor province

BANCOGRAM -The civil station of the Jungle Vehals shunted on the verge of the helly tract that forms the western boundary of Bengal obout ninety-eight miles from Cal cutta and in a beautiful healthy country The town Itself is quite of modern construction and as jet of small dimensions but uousually open ond next for a llindoo population. The most remarkable public building is so excellent sersi, built at the charge of government for the occom modation of trovellers and exhibiting almost a solitory exception to their niggardly neglect of similar institutions-(Fullarian de)

BACCOST .- (See FOOT VICTORIA ) BANO .- A town in the province of

Allababad astusted on o small buod or lake, fifteen miles east of Teary Lat. 24° 44 N lon 79° 3' E

BANGA -The Bando isles situated about 120 miles E S C from Ambor

na, are twelve in number, viz Banda Neira, Goonong Api, Banda Lantoir, Pulo Way, Pulo Run, Roysyngen, Pulo Pinang, Craka, Capella, and Souangy Banda Neira, lying in lat. 4° 30′ S., lon. 130° E, is the seat of the supreme government of the whole. It has a spacious harbour, but of difficult entrance, with a seven feet rise of tide. Ships anchor under the eannon of two forts, named Belgica and Naussau.

The next island is that of Lantoir, or Banda proper, which is about eight miles in length, and at the eastern extremity five miles in breadth The third and fourth isles in importance are those of Pulo Way and Pulo Run, and at these four only did the Dutch East-India Company permit the cultivation of the nutineg-On Rosyngen there is a redoubt, to which state prisoners were formerly banished, and Goonong Api has a volcano constantly vomiting smoke, and often flame. Under the Dutch there were several other islands known by the appellation of the South-Western and South-Eastern islands, whose inhabitants supplied the Dutch colonists with provisions in exchange for piece goods and other articles.

The Banda isles are all high and volcanic. The soil is a rich black mould covered with trees, chiefly nutmegs, of which the Dutch East-India Company were the absolute proprietors, as well as of the slaves who took care of them. The rearing of nutmegs being the grand object, the isles were subdivided into a certain number of plantations, under the management of a mixed breed of Europeans and Indians, either as temporary proprietors or lessees. The nutmeg tree grows to the size of a pear tree, with a leaf like the laurel, and although two out of three turn out barren, it cannot be discovered until the twelfth or fourteenth year, and it dies about the twenty-fourth year. Each tree, while bearing, will on an average produce ten pounds per annum quantity of nutnieg and mace (a

membraneous substance that envelopes the nutmeg) produced has never been clearly ascertained.

Besides provisions furnished annually from Batavia by the Dutch, piece goods, cutlery, iron, and other commodities, were imported. Dutch burghers and Chinese re-export these articles to Aroo, Papua, Ceram, and the south-east islands, and receive in return from Ceram, sago in bread and flour, and sometimes salted deer; from Aroo and the others, pearls, birds'-nests, birds of paradise, tortoseshell, and from all slaves. The Banda isles were captured by the Butish in 1796, restored at the peace of Amiens in 1801, re-taken in 1810, and restored in 1817.-(Stavorinus, Asialic Register, &c.)

BANDA —A town in the province of Allahabad, situated about ninety miles west from that fortress, and as the residence of the public functionaries, at present the modern capital of Bundelcund. Lat. 25° 30' N., ion 80° 20' E This place, which a few years ago was a moderate sized village, is now become a large and bustling town, its prosperity having been greatly accelerated by the gunge or mart, and some other works erected by Mr. Richardson while judge and magistrate. The Banda cotton has obtained of late years in the European market a superiority over the Jaloun. — (F. Buchanan, Gulthrie, &c)

BANDA.—A small town, the head of a pergunnah in the province of Gujerat and district of Surat. It is a jungly country, inhabited by Dooblas and Dooreas. The Raja's revenue is about 60,000 rupees, and pays a tribute to the British government of 7,800 rupees.—(Elphinstone, &c)

BANDELL.—An old Portuguese town in the province of Bengal, district of Hooghly, and immediately adjoining the town of Hooghly. At this place there is a good Roman Catholic church, and also a monastery.

BANDITTI ISIE -A small island

about (nent) nules in circumference altusted in the straits of Lombhook but why it received ha present etil appellation in preference to many others similarly situated does not appear Lat 5°50'S Inn. 115°21 L.

Bandon.—A sesport town belonging to the Sumerer situated on the west side of the gulf of Siam of the mouth of a river nasigable for vessels not drawing more than fourteen feet of water.—(Cranfurd )?)

Bandona.—An inland town of Javas situated in a awampy country on the high road from Buttenzors to Chembon & S. L. from Batavia. Lat 6° 40, ion 107° 35' E

BANDONDER.—A town in the province of Guodwans, district of Bog heln, eighty miles north from Mundlah Lat. 27-50 V Ion. 81° E. In the time of Aurungsele Busudhoo or Binatin was the name of the northern portnan of Gundwans, then, although actually independent an nexed by edict to the Nugul prostner of Allahabad — (Jas. Grant § 6)

Bannona.—A village on the island of Salactte apposite to Alakim on the island of Bomba) with which is communicates by o regular ferry

BANDALDRE (Bangalura) .-- Alarge fortified town in the Mysore Ils ja s territories, seventy miles N.E from Seringapatain ; lat 12º 57' N., loo 77° 38 E The surface hero is an uodulating table land nearly 3 000 feet above the level of the ses but there are no high hidls withlo many miles The fall to the north of Ban galore, after passing Nundydroog is very rapid, and the sommit of Paughur, which rises from its base is nearly oo a level with the plateau of Bangalore. In the country further west, after passing the range of hills on which Severodroog Paughur and Other elevated stations are situated the surface bas a sudden descent and continues low considerably to the west of Seringapatam, where It begres to asceed again, on approaching the

nestern ghauts. In A D 1800 the thermometer liere never rose higher than 82% or fell below 56° Fahrenheit The cypress and vino grow luxori astly, the apple and produce fruit, and strawberries are raised to the sultan 8 garden

The fortress of Bangalore is a regular work of great estent entirely detached from the town, and constructed of the most solid moterals. It is surrounded by a dutch of remark able depth cut in the solid rock with n spacious glaces and but for its round basting and intreste entraoces might pass for a Europen citadel Tippoo s nalsee hudt of mud, with halls enclosed by high pointed Sarareme arches and pasated walls and ceilings, has still a lively oppensance and it has lately been patched in an incon grous style of architecture by the Mysore Itain, being occasionally used for public entertupments. The toan or nettah of Bancalore is composed of tolerably well gized houses some of two stories, but universally built nf the red earth of the country and roofed with tiles. The principal ba zar is wide and regular and ornamented on both sides by rows of cocon-nut trees. The pettah is en closed with a double llong fortifiention, the walls also of red mud tho space between the toner and nuter defences being protected by a thick bound hedge of bamboos and functe. The cantenment stands about two miles from the pettals and is remarkobly extensive and complete, the squares of barracks being on o great scale and hedged gurdens attached to the officer's hungalows. Besides these accommodations for the mili tary there is a handsome race-stand an assembly and reading room and several well-stocked Europe shops. In 1805 the total population was esti

The cloths made here belog entirely for country use and never exported to Europe are made of different sizes to adapt them to the uses of the natives. The Hindoos seldom employ tailors but wrap round their bodies the web as it comes from the loom.

me ted at 60,000 souls.

The silk-weavers make cloth of a very strong fabric of the silk that is imported in a raw state, but which in time may be raised in the country. The introduction of the silk-worm has not yet succeeded in the lower Carnatic, but there is reason to believe the country above the ghauts, having a more temperate climate, will be found more suitable. At the weekly markets cotton is bought up by the poor women of all castes, except the Brahmin, for these never spin, nor do their husbands ever plough the soil. The females of all other castes spin, and at the weekly markets sell the thread to the weavers

At Bangalore there are many inhabitants of the Mahomedan religion, and owing to the change of government many of them at first suffered great distress Above the ghauts, that species of leprosy in which the skin becomes white is very common The persons among the natives troubled with it enjoy in every other respect good health, and their children are like those of other people only year used above the gliauts is the chandramanam or lunar year, by which among the Brahmins all religious ceremonies are performed Bangalore the christian era of A.D. 1800 corresponded with the year 4893 of the Cali Yug, and 1722 of Salivahanam, which last is in universal use in the south of India. This place was first acquired by the Mysore state in 1687, during the leigh of Chick Deo Ray, and was stormed by the army under Lord Cornwallis in Travelling distance from Sc-1791. ringapatam seventy-four miles; from Madras 215, and from Hyderabad 352 miles -(F Buchanan, Fullarton, Wilks, Lord Valentia, Col Lambion, A H. Hamilton, & c.)

BANGUEY —A small island situated off the northern extremity of Bornco, twenty-three nules in length, eleven the average breadth, on which there is a small fresh-water river and plenty of turtle Lat 7°15'N, lon 117°25'E

BANIACK (or Pulo Bannack) —A small island lying off the west const

of Sumatra, lat. 2° 10′ N. In length it may be estimated at seventeen miles by seven the average breadth. This island is known by a peaked hill resembling a sugar-loaf on the north end of it, and it has a chain of islets to the north east

Banjarmassin —A town and district on the south-eastern coast of Boineo, lat 3° S, long 114° 55' E. The river Bantai massin has a shallow bar at the entrance, over which a boat, though light, cannot float until after the first quarter of the flood Ships anchoing in the harbour of Tombanjou and Tombornio near the mouth of the liver can be supplied with water, poultry, and fish Chinese reside permanently here and in the neighbourhood, from whence they carry on a considerable trade with the mother country ports to Banjai massiii consist of opium, piece goods, coarse cutlery, gunpowder, small cannon, and fire-arms; the exports are pepper, camphor, golddust, wax, rattans, birds'-nests, biche de mar, and some spices The steel procured here has always been reckoned of a superior quality

In 1706 the East-India Company settled a factory and expensive establishment, but next year were expelled by the natives, instigated, it was supposed, by the Chinese, with considerable slaughter, and a loss of fifty thousand dollars. The Dutch also continued as profitless a settlement here from 1747 to 1810, when it was by agreement abandoned to the Malay sultan by Marechal Daendels, for the sum of 50,000 Spanish dollars. After the conquest of Java, however, the British appear to have claimed a predominance, as Banjarmassin had again become dependent on Java, and was garrisoned by coionials under the British resident. It was restored to the Dutch in 1817. and in 1825 (with Pontjanat, Sambas, and Mamoowali) was described as enjoying tranquility, trade flourishing, the pepper culture reviving, and the newly elected sultan friendly -(B) ucc, Stavormus, Raffles, Thorn,  $\delta c$  ) Masty on the air the periods of cloth it any list attention of the content of the

The histories is a bin-le loht, which about fifty feet lone, and nearly as noch in breadth pared with stoner and laving in the centre numerous amil figures of Bu the intermingfed with smill fits of lookin-squar, across with smill fits of lookin-squar, across of gift taper, and Chinese 1 sintings I adulous levends from Hindoo in the latterior waits of the temple and in one of them two cuarre jointings of I centh lades as alopharlesses were across the lades as alopharlesses were stones.

suspended by the members of the Gilt figures of embassy in 1823. Buddha are innumerable, made of cast iron, brass, wood or clay, but all of a wonderful uniformity. Some are of enormous size, one in particular thirty feet high, of gilt wood, intended to pass for copper. Prachadi (called by the Buddhists of Ceylon Dagoba) is a solid building of masonry, without an aperture or hollow of any sort. It is generally built in the neighbourhood of some temple, but is not itself an object of worship. In Bankok there are a few Brahmins, who are supported by the king, and have a small temple of their own - (Finlayson, Crawfurd, Singapoor Chronicle, &c)

BANKYBAZAR—A small town on the east side of the Hooghly river, eighteen miles north from Calcutta; lat. 22° 46′ N., lon. 38° 28′ E. The Dutch last century had a factory here, from which they were expelled by Aliverdi Khan; of both factory and town hardly a vestige is now to be seen. Within a short distance from hence are the remains of a once strong and extensive fortress named Simookghur, of which a plan is given by Major Rennell in the Bengal Atlas (Fullarton, &c.)

Bansbarea.—A town in the Bengal province, situated on the east bank of the Hooghly, three miles and a half N N.W. from the town of Hooghly. Including two adjoining villages it forms a considerable town. To the north are some ruins of Mahomedan buildings of stone, a material very rarely met with in this part of India—(Fullarton, &c)

BANSWARA—The capital of a small independent native state in the province of Gujerat, district of Bagur. Lat. 23° 31′ N., lon. 74° 32′ E. The town of Banswara is a handsome place for this quarter of India, and the walls include a large circuit, but a good deal of the space is occupied by gardens. There are also some handsome temples, and a tolerable bazar, in which a considerable number of Mahomedans are seen. At

some distance is a pool of water, with some rumous temples on it, and n stately flight of steps overhung by palms, peopuls, and tamarind-trees, and beyond it on the crown of a woody hill, the towers of a large eastle. This formerly was the palace of Banswara. The territories attached are divided into seven districts, yielding in 1820 an annual revenue of about 2,07,860 rupees, of which amount 1,01,625 go to the treasury, 96,547 to the subordinate Raipoot chieftains, and 9,694 rupees to religious mendicants. In 1820 there were one thousand families of Gujerat Brahmins in Banswara 1824 the gross revenue was expected to reach five lacks

This principality is mentioned by Abul Fazel, and was formerly possessed by a branch of the Odeypoor Rajpoots, but the two families have been long separated The present Rawul (of the Doongurpoor family), or prince of Banswara, named Bhowanny Singh, in 1820 had thirty-two dependent Rappoot chiefs, who kept their quotas of fighting men in readiness for the service of the state, amounting to 179 horse and 660 foot, besides 200 of the Rawul's own His authority is paramount throughout the whole state, as he alone has authority to inflict capital punishment; but he is himself tributary to the British government, In the immediate vicinity of Banswara the lands are irrigated from tanks In the wilder districts the Bheels, who follow no regular plan of agriculture, compose the bulk of the inhabitants When Malwa and the neighbouring provinces fell into their late state of anarchy, Banswara principality was reduced to a condition of extreme misery; from which it was relieved by the British government, to which it pays a small tribute for protection. In 1824 the Raja of Banswara was twenty-four years of age, and had been on the throne five years -(Malcolm, &c)

Bangingsay...... A town and the trict in the Islan ! of Java vituated at the ex teen estremly on the struits of Belly 7 an ilratravellin, distance from flataving lat. # 7 4, 1 m. 1140 77 e town is a military post of some con coluence being precusary to restrain the depredations of the pirates a ho infest the nei blooming scar and straits. The town is popul lone the country well cultivated and request braithy According to a centre taken by the Deitels govern ment in 1815, the decision of Banana wangy (1 "74 square miles) contained 8477 inhabitants of which number 719 were Chinese This district contains the great volcanie mountain named Goonong mar api which la said to be of such a height that near the aummit water freezes volcanoes of Javo afford sulphur, but the most abundant supply is obtained from hence, and in such a state of purity, as to require no further preparation. The country in its immediate vicinity is uninhabited.—(Crawford, Raffles, Thorn, &c.)

BAR.—A town of considerable trade and great extent in the province of Bahar, but of mean appearance. It stands on the south bank of the Ganges, in lat. 25° 28′, lon. 85° 46′ E Including Masingunge, it is estimated to contain 5,000 houses.

Bara.—A town in the province of Ajmeer belonging to the Raja of Kolah, which in 1820 contained 2,000 houses.

BARABUTTY (Barabatı).—An ancient fortress in the province of Orissa, situated about a mile from the town of Cuttack, and supposed to have been built in the fourteenth century. Its square sloping towers and bastions, and general style, bespeak a Hindoo origm. The Mahomedans or Maharattas subsequently added a round bastion and some other works. The fort has double walls of stone, which enclose a rectangular area of 2,150 feet by 1,800 A noble ditch faced with masonry surrounds the whole, measuring in the broadest part 220 feet across From the centre rises a huge square cavalier supporting a flag-staff, which, combined with the loftiness of the battlements towards the river, give the whole an imposing castellated appearance when viewed from the opposite side of the Mahanuddy No traces of the famous palace of Raja Mukund Deo, nine stories high as narrated by Abul Fazel, are now to be found —(Stirling, &c)

BARAHAT —A town in northern Hindostan, the modern capital of the Gurwal Raja, forty-eight miles N N W from Serinagur, lat 30° 45′ N., lon. 78° 22′ E It stands on the north-west bank of the Ganges, and in 1815 was a most wietched place, consisting of only five oi six houses, surrounded with filth, and almost buried in a jungle of nettles, thoins,

and other rank weeds. At a bend of the river below Barahat there is a phoofa or hanging bridge of ropes, over which the direct road leads to Sermagur. It is said at some former period to have been in a more flourishing condition, and it is probable that since the Nepaulese war, and the political vicissitudes which raised it to the rank of a metropolis, its eircumstances have improved.—(James Frase), &c.)

BARAITCHE - A district in the province of Oude, extending along the north side of the Goggra river, and separated from the Nepaulese dominions by a lofty range of hills. A section of this country was ceded to the British government in 1800; but the greater proportion remains with the reserved territories of the natiob of Oude The northern tracts towards the bills are covered with primeval forests, never visited by the axe, but towards the Goggra the country is open, fertile, and tolerably well cultivated. The principal rivers are the Goggra and Rapty, and the chief towns Baraitche and Many of the old Patan Bulram race are found scattered over this district, and one of their chiefs still dignified with a title, as Khan of Baraitche

Baraitche.—A town in the province of Oude, sixty-four miles northeast from Lucknow, lat 27° 33′ N., lon. 81° 30′ E. In 1582 Abul Fazel describes it as a large city delighfully situated on the river side where Sultan Massaood and Rejib Sillar were buried and held in high estimation.

Barce—A town belonging to the Rana of Dholpool in the province of Agra, forty two miles S.W. from Agra; lat 26° 42′ N, lon 77° 28′ E. The streets are narrow, but many of the houses, built of red stone, are two stories high, and have a comfortable appearance—It is chiefly inhabited by Patans, and contains several handsome Mahomedan tombs.—(Broughton, &c)

BARCELORE -A town on the sea-

court of the Can, a province fifthe miles north by west from Man a lore; lat. 17 3, 5,, lon 74 4 7 1. By some this place has been cooper tured probably on account of 15 name to have been the jost Barace of the ancients.

Basetty (Borels.)........ large deprincipally between the Such and Mil degrees of porth latitude the north it is bounded by the hn maon fullet on the south by the Onde reserved territories, and the therrets of burnekabad and Allahue; on the tast it has the Astubare serred territories and on the west Moradaba ! Ali-liur, and Furrucks When the institutes of Acher were compiled by Abul Fatel in I'50 It was comprehended in the circur of Budayoon ' and described under that name : but the original appellation appears to have been huthair before the Hobilia conquest subsequent to which It was incorporated with the proxince of Helicand

The surface of the Bareily district la In general level and plentifidly watered by many small rivers beildes the Gances bounding It to the west. To the north of llampoor the heula river is navigable duting the raios and serves to float down large tim In the neighbounhood of Ac berabad the country is well cultivated and cloth of a good quality is there manufactured Around Co sipoor la moderately cultivoted with augar-canes and grain but advoncing towards Childays much Jungle is passed Chilkiya is a considerable mart to which the natives of the Kumaon hills while rtill under the Gorkha tyranny, used to resert to ex change their goods for the produce of the plains In 1803 the chief supplies brought from below were chiatzes gudjoes salt coarse sugar, cotton goods coarse cutlers, chean trinkets, coral beads, and alave girls The goods from above at that period were mostly transported on goats, by which mode they were conveyed from very great distances even from

It also contained 7,302 0.22 begahe fit for cultivation but not in actual tillage and ".Sous-" entirely waste The jumma of 1813 for Barelly and Shahjehanpoor, amounted to about thirty three lacks of runers and was collected from more than 1 '00 landholders and renters aummer netwithstanding he north-ern latitude, the heat of this region is intense; but during the winter months when the would blow from the anowy moulitains the thermometer falls below '70 and water freezes in the tents. There is nothiog peculiar in the vegetable productions, except that flarely is noted for a species of thee of excellent flayour named the basmots (pregnant with perfume), which is greatly au perior to the finest sort of what is called Patna rice The common hackery or cart in use throughout the Baresly district and in most parts of Robileund le o much larger and more commodious vehicle than that of Bengal and capable of transporting a heavy load but the roads and bridges here are better than in most parts of the Company's provinces

The tribe of Banjaries (carriers and bullock drivers) are particularly

numerous in this district, having They are been estimated at 14,000. all converts from Hindooism to the Mahomedan faith, and boast of being descended from some of the most noble Rappoot tribes, priding themselves on the warlike exploits of their Many of them Hindoo ancestors repeat from memory long traditional poems, recording their martial deeds piior to the first Mahomedan invasion, or above eight centuries back. Besides carrying merchandize, the Banjaries find employment in cultivating lands and winnowing rice by contract with the neighbouring farm-

The district of Barelly, including Shahjehanpoor, contains several large and populous towns, the chief of which are the two capitals Pillibeet, Chandowsy, and Budayoon are also large towns, and the whole territory formerly swarmed with a race of warlike Mahomedans, ready to join any leader Some thousands of this description served under Holcar, Jes-wunt Row, and many with their countryman Ameer Khan. were formerly disaffected to the British government, not because it was unjust or oppressive, but because there was no employment for them, and they were left mactive, without distinction or even subsistence. This turbulent race has gradually disappeared, having either sought employment elsewhere, or been gradually lost in the great mass of the populalation; at least crimes of a violent or hemous nature are not now more frequent in Bareily than elsewhere. The Rohillahs or Patans (for they go by both names) of this district are a tall and handsome race, and when compared with their more southern neighbours, are white and well-featured There are but few Hindoo temples, and the two sects are probably on an equality in point of number, but classification or enumeration of the inhabitants has never taken place -(Deane, Gott, the Marquis of Hastings, Guthric, Tennant, Sn H Strackey, 5th Report, Fullarton, Glyn, &c)

BAREILY —A large town in the province of Delhi, the capital of the above district, situated on the banks of the united streams of the Jooah and Sunkra, about forty-two miles NW from the Ganges, lat 28°23' N., lon. 79°16' E The site of Bareily is elevated and pleasant, but the British civil station and cantonments are to the south of the town. The principal street or bazar is nearly two miles long, and tolerably well built, consisting, however, almost entirely of booths only one story One mosque, from its style of architecture and high position, has a striking appearance, and there are several other tolerable buildings of the same class The old fort, situated at the western extremity of the main street, is crumbling to ruin, but after the insurrection of 1816, government judged it advisable to erect a small regular citadel on the plain to the south of the town, for the eventual protection of the European inhabitants should any similar commotion again occur It is of a quadrangular form, has a good ditch, and two bastions projecting from opposite angles, an arrangement which gives the whole rather an odd appearance, but it is quite of sufficient strength for the object contemplated

The lands in the vicinity of Barely are not more elevated than eight feet above the Ramgunga, while the mountain streams by which the district is intersected lessen the expense and labour of cultivation, and by their annual inimidations fertilize the soil. In A D 1822 the number of brick and mud houses and huts was 12,263, shops of ditto 1,663, total 13,926. The population then consisted of

The industry of the Mahomedans of Barerly is mostly confined to ma-

nufactures having relation to war, such a sword cutiery how and arrow making sa I l'err, farriery, elephant, camel or isoliock-driver, horse-deal In Act or to certala focarte, laven tions, and luxuries probably imported by their forefathers from I erais and Arabia, such as the transfactore of fine carpets, embenders, hookas, book-bin has un I the trades of tobacco and beer dealers en-ravers. turners Co.t or lastly to trades which the Hindron are presented from exercising by religious obstacles such as shocmshers curriers but chers bakers tailors water-carriers, and milk dealers. Basiar for Breat/—A fortified peak is northern Husdorsa, between the rivers Jumaa and Tosse 6,038 feet above Saharunpoor which is visible from it; lat 40° % % los 77° 25 ? Inval is from the plaise requiring a cold climate would find it here; for the redoubt iluring the winter is almost butted in saw which remains in shady places usuit April.—(Cop. Hod,100 fc)

Harmacone (Faranagara) — A small towa su the proslace of Bengal situated on the east side of the Hooghly river, about three miles obvo Calcutta. It was originally a Portuguese settlement, but after wards rame sato the possession of the Dutch and by the carrier British outhorities is described as being the Papho of Calcutta

Bancac.—A small walled towo in thoprovince of Delhi shunted within the Begum Somroo s territories

Banoas —The capital of o Make ratta chericos, kaous hy the family name of Guicowar (Gaskerad), who divides with the Britals government the largest and finest portion of Gu [rat iss portion (in 1818 about 12 000 square miles), bling mostly, in the aoniscra quarter int 22° 21' N., lon 73° 23 L.

This pince is mentioned by Abul Fazel and in Aurungzebe s reign was

a large and wealthy town; nor does it appear to have since undergone the great vicissitudes to which all the ancient capitals of India have heen sub-In 1780 (for we have no 1ected more recent description) the fortifications consisted of slight walls, with towers at irregular distances, and several double gates The town is intersected by two spacious streets, dividing it into four equal parts, and crossing at the market-place rums of some handsome Mogul buildings are still to be seen, but the Maharatta structures are mean and contemptible. Near the city there is a stone bridge over the river Viswamitra, which is remarkable as being the only one in Gujerat, where the streams are usually crossed in feiry boats, or on a light platform, floated by cmpty earthen pots In the environs are several magnificent wells, with steps down to the bottom. In 1818 the total population of the city was estimated at 100,000 persons

The Baroda district, though still labouring under all the defects of a native system, and notoriously oppressed for the last ten years, is rich, well cultivated, and in many places enclosed and adorned with hedges of mangoe and tamarind trees, in fact, the appearance of the country villages and inhalitants surpasses any of the British pergunnals in its neighbourhood. Perhaps this may be attributed to some prior and permanent good government, but when the history of the Guicowar family is recollected, it would be difficult to say at what period that state of good government could have existed Tranquillity and the vicinity of a capital may have assisted; but be the cause what it may, the Baroda division in 1821 was decidedly one of the most flourishing tracts in Hindoston remarkable, that the Gincow ii territories south of Broach, although sinnlarly farmed and managed, were at that same date oppressed and impoverished

The wilder tracts of the Guicowar's territories (as vell as those with which they are intermixed) are mostly

occupied by Bheels, the other and more sedentai yinhabitants are Muhomedans, Hindoo Banyans, and Rajpoots of aspurious description, chiefly occupied in the cultivation of the soil (there are not many Mahomedans, c\cept about Baroda), and lastly, Coohes, who form more than half of the whole, and by some conjectured to be the aborigines of Gujerat. This claim, however, may be disputed by the Bheels, if they be not the same pcople in different stages of civilization They themselves pretend to be descended from the Rappoots, but this pretension is constantly asserted by the wild and martial tribes all over India. The Coolies here are acknowledged by the Hindoos as their kindred, while the Bheels have rejected, and they occasionally internialry with

the Rajpoots

At present the chief ostensible employment of the Cookes is agriculture, and when well-treated and kept under, they are punctual in their payments, and not bad tenants. live, however, under their own thakoors and chiefs, whose authority alone they wilingly acknowledge; and pay little respect to the laws, unless they happen to coincide with their interests. Until quite recently, they have been one of the most turbulent and predatory tribes in India, and with the Bheels were for a long time the incessant disturbers of Gu-The courts of justice and jerat. dwelling-houses of the European functionaries are still placed within the walls of towns, to escape the desperate attacks to which they were luble; and the magistrates have constantly large bodies of armed men in their employ, and even the regular infantry and European eavalis are frequently called out to repress these Cookes, who are harrly nich, and in their plumlering evenrsions frequently display a most des-Their usual dress is perate conrage n petticoat round the waist, like that of the Bheels, and a cotton cloth wrapped round their head and shoulders, to which, in cold weather, they add a gmlted kirtle or lebada, over

which they wear a shirt of mail with vaunt bearers and gauntiets; an i never consider them elves properly accountred without a sword lauckler ond bon and arrows to which linesemen ad I a lang spear an I a battleaxe. The cotton lebada is generally atnined and fron-moulde! by the slift of mail; and such tokens of their margal occupations being reckuned honourable the young warriors it cil to counterfest them with charcoal and oil t in other respects they are fond of finery. In their marauding expeditions they are very secret cal leeting at night under some popular chief by the eleculation of a token passed from one to the other and when ony of the party are strin the parents are anly informed of it by finding some sprigs of the peopul tree scattered in a particular manner before the doors In fact even now (1824) their turbulence cantinues such that scarcely a year elapses without same sieges of Cooly forts and fastnesses.

The rise of the Guicowar s power was almost contemporaneous with that of the Peshwa in the Decean Pillajee Gulcowar was patel ar ma naging proprietor of a village who after many struggles and intrigues established his own power by the same artifices that had been practised by his superior the Peshwa towards the pageant Rajn of Saturah 111s son Damajea Guicowar succeeded in A.D 1747 and reigned uotil 1708 Futteh Singh Guicowar until 1789; Managee Gineowar until 1792; Go-vind Row, notil 1800 Anund Row Guicowar until 1819 when ha was succeeded by his brother Syjee Row Guicowar who had previously acted as regent.

The Guicowar dynasty was first noticed la the political transactions of the British notion obtain 1782; by the treaty of Bassen in 1802 the intercourse became more frequent as the British government then under tank to arbitrate ond adjust all differences between the Guicowar nod Pealwar cessions of territory to the valoe of eleven lacks of rupees were valoe of eleven lacks of rupees were

received and a sub alary farce of 7 000 troops furnished Subsequent events produced a still mare lotimate tinion between the two stotes, tho Cucowar's affairs being Invalved his such engineen, and the debt accu mulating so rajilly as to threaten the absorption of the whole recenue Colonel Alexander Uniker was in consequence deputed to Barods to endentour to extricate the Gulcownr from his embarra sments and to rentore order to his finances so effectually occomplished, that after proxiting for every branch of the family adjusting the Pesliwa s pemary claime paying the tumultu ary troops and easing the revenue nsecsments the tatal debt in 1816 amounted to only fifty five lacks of ronces This incumbrance has probably been since wholly liquidated; at least Anund Baw Guicowar when he died in 1819, was reported to have left a tressure in money and lewels execuling one crore of rupees

In 1815 In consequence of the ex isting confision the Bambay govern ment endeavoured to effect an alteratian in the made of administering justice throughout the Guicowar's dominions, without introducing too creat a change in the judicial system of the country Punchaits ar orbitratino by o jury of five first occurred but this method of settling disputes hawever beautiful in theory is evi dently adapted for o more primitive ntata of society than exists lo Gu jerat where the employment of tho people ore diversified their habits industrious yet beentious and where rights had not previously been de cided by any written law but by the innomerable intricacies af local usage Judicial establishments with positivo powers appearing necessary, both to regulate and assist the punchaits a new court was created to take cog orzence both of civil and criminal cases, an arrangement deemed clust ble to withdraw the severeign from the direct administration of criminal justice The judges however soon became corrupt partly owing to the iondequacies of their salaries, of the

same time it may be doubted whether any salary could entirely eradicate this inherent defect of the native character, while the sovereign himself openly practises the most undisguised peculation. The reigning Guicowar in 1824 was said to be a man of talents, but so desperately fond of money that he used to lend it to himself.—(Public MS Documents, Walker, Carnac, Elphinstone, the Marquis Wellesley, &c)

Baroo (or Barye).—A small town in the province of Gundwana, near the hills on which Chowraghur is built, from which it is distant SSE. about thirteen miles, lat 22° 45′ N, lon 78′ 50° E In 1820, it was the head of a pergunnah belonging to the Nagpoor Raja—(Malcolm, &c)

BAROOLY GHAUT —A pass through the hills which bound the Berar province on the north, and through which there is an ascent to a table land The source of the Wurda river lies two miles from hence.

Baroos—A town on the west coast of Sumatra, the inhabitants of which have benzoin and gold, and procure camphor from the interior. The imports are the same as specified under the article Sinkel, to which may be added white beads, pulicat handkerchiefs, chintzes with large flowers and grounds, white dungaree, salt, rice, ghee, oil, a few metal watches, and gilt hilted swords.—(Elmore, &c.)

BARRABUTTEE.—A fortress in the province of Orissa, about a mile from the city of Cuttack Lat 20° 27' N. lon 86° 6' E. This fortiess is of a rectangular form, the ramparts next the river being double the height of the other sides of the quadrangle. It has no glacis, and the walls are going fast to decay, but it is surrounded by a ditch 130 feet wide and twenty deep, filled from the Mahanuddy, and inhabited by a numerous and ancient stock of alli-Within are an old mosque, a barrack, magazines, and the house of the conductor of ordnance, who

in 1820 was the only European resident. It was stormed in 1803 by a British detachment from Bengal, and captured with little loss—(Public Journals, Fullarton, Leckie, Upton, &c.)

Barrackpoor.—A military cantonment in the province of Bengal, situated on the east side of the river Hooghly, about sixteen miles above Calcutta, where the sepoy battalions composing the presidency division have their quarters. Here are the unfinished arches of a house begun by the Marquis Wellesley, but discontinued by orders from the Court Horse races are run of Directors here during the cold season. place may be described as a large military village inhabited by soldiers, with bungalows for the European officers and other Europeans, who are attracted here by the salubrity of the air, the vicinity of the Governor General's residence, and the beauty and convenience of the river.

Barragurry —A town in Northern Hindostan belonging to the Nepaulese, forty-five miles S S E from Catmandoo, lat 27° 5′ N, lon. 85° 55′ E. The situation of this place is so unhealthy that Capt Kinloch's detachment suffered greatly by their stay here, during the attempt to penetrate into Nepaul A.D 1769 In 1792, when General Kirkpatrick went to Catmandoo, it was the residence of the Gorkha governor of the western Teman —(Kirkpatrick, &c.)

BARRAMAHAL —A principal subdivision of the Salem province under the Madras presidency, of which it occupies the northern extremity, consisting properly of the following twelve places, which are all within the Hindoo geographical division of Dravida, a tract bounded on the west by the ghauts These cantons are Krishnagiri, Jacadeo, Varina Ghada, Bunjunga Ghada, Tripatura, Veniambady, Ghangana Ghada, Sudarshana Ghada, and Tutucallu. Although not so elevated, the Barramahal is on the whole a wilder and more mountainous region

than the Mysore and was once studded with formulable bull firsts. After the fall of Seriogapatani in 1799, several Important sections of imper Carnata were annoused, and all the poligars restored to their extacts and put on a smalar footing with the semindars of Bengal. They may a fixed rent or tribute for their lands, but have an jurisdiction over the Inhobitants. The property in the soil is mostly vected in the accreting except in the polyams and o few annall free extacts.

In the onnexed districts the rice cultivation is not important ilry seeds kitchen-gardens and plonta tions of cocon-nuts and palms being the priocipal orticles cultivated. The monufactures ore coarse and only sulted for the lower classes a rich mon undertakes to construct & reservoir at his ows expense for the Irrigation of land he is sllowed to hald in free estate and by hereditary right ane-fourth of the lond so wa tered but he is also bound to keep his reservoir in repair and experience proves that tanks of this description are notariously kept in better condition thos those supported by govern ment. The peasantry assert that they can compel the halder to perform his duty but that the sovereign has no master every encouragement abould therefore be given to induce rich natives to invest their money in works of such utility The Barramehal was ceded to the British government by the treaty of Seringapatam in A.D. 1792 and it was then in a most miserable stote , but the good monagement of Colonel Alexander Rend in the course of five years more than doubled the reveoue while the rents were diminished in proportion villages, however are evidently inforior io nestoess, cleanoess, and comfort to those of the Mysore, or of ppper Combatoor and even to many lo the Carnatic. The inhabitants have in general a miscrable oppearance, ond beggars are unusually numerous Never having been subdued by Mahomedans until the inroads of the Cuddapah Nubabs, it still contains a

very great proportion, perhaps moeteen twentieths of genuine lindoo inhabitants.—(F Buchanan, Sydenkam Sir Thomas Munro, 5th Report, 4c)

BARSANSAD —A village belonging to the Bhirripore Raja in the province of Agra near to Buno and remerkable for the rules of sepul chres payllions bowlies and other Volumendam structures all farmed of the red aand stone of the country — (Eullarios &c)

BARREAU. The contol of a small undependent principality in the profrom Cambay, lat 22º 44 N lon This town stands in a valley near the river Pannali, in a anrrow spot just sufficient to contain the houses, which are neat and mony built of brick between the river and the Juli The extensive wilds of Barreah comprise almost tha whole space from Godra to Dahud o distonce of almost forty miles, of which scarcely a single spot is cultivated the only inhabitants being a few wondering and predatory Bheels Although this great jungle is tolerably apen in most places so as to affer little impediment to light troops yet it would be almost imperious to

begange and beavy guns
This principality may be described
as one of the few independent petty
states oow existing in Hindostan,
being nat only exempted from the
payment of any established tribute,
but claiming a chout from silt tha
neighbouring districts, of which it is
very tenanous. These chouts with
certain moderate duties an trade
compase nearly the whate of the
Rap's revenues, which in 1819
amounted to about 57,000 rupces.—
(Ther' &C.)

BAREN ISLE.—An island and volcase about 1,800 feet high in the Bay of Bengal, attuated in lot 12° 15' N, ond fiften leagues east of the northermout Andaman The cruptions are very violent stones of the weight of three or four tons being sometimes ducharged When your

- de 1

ed in 1822, the high cone continued to send forth volumes of white flame, and the sea close to it was almost boiling. The more distant parts of the island are thinly covered with withered shrubs and blasted trees—(Col Colebrooke, &c.)

Barripoor.—A town in the province of Bengal, about sixteen miles SE from Calcutta, formerly the residence of the salt agent for the Twenty-four perginnals.

BARWAH.—A village in the province of Allahabad, district of Bundelcand, ten miles S.S E from Jhansi Lat 25° 25′ N, lon. 78° 39′ E

In 1790 the Hindoo soubahdar of this district was an uncommonly accomplished person, and had acquired a considerable knowledge of Euro-At the advanced age pean sciences of sixty he had formed the project of studying the English language, in order to comprehend the Encyclopedia Britannica, of which he had acquired a copy, Such, however, is the inconsistency of human nature, and the strength with which Hindoo prejudices adhere, that about five years afterwards, having been seized with some complaint which he considered incurable, he repaired to Benares and there drowned himself in the Ganges.—(Hunter, &c.)

BARWALLAH.—A large brick town to the north of Hansi, in the province of Delhi, given up to Saheb Sing, the Raja of Pattiallah.

BARWARRAH,—A mud fort with round bastions and a ditch, in the province of Ajmeer, ten miles west of Rantampoor, lat. 26° 3′ N., lon. 75° 3′ E

Bany (Ban)—A town in the Oude territories, thirty miles north from Lucknow, lat. 27° 15' N., lon. 80° 50' E

Basurr Istes—A cluster of small rocky islands lying due north of Lazon, the great Philippine between the 20th and 21st degrees of north latitude. These islands, situated between the Philippines and Formosa.

are five in number, besides four small rocky islets —Dampier gave the following names to the five largest, viz. Grafton Isle, Monmouth Isle, Groat Isle, Orange Isle, and Bashee Isle. They are inhabited by a race of strong athletic men. Grafton Isle is about thirteen leagues in circumference, and has good anchorage on the west side. It produces fine yams, sugar-cane, taro, plantams, and vegetables, besides hogs and goats in Iron is the favourite meplenty dium of exchange, but money is now also understood. The water is very fine and in great abundance close to the beach

The Spanards took possession of the Bashee islands in 1783 in order to procure gold, which is washed down by the torrents in considerable quantities, and is worked by the natives into a thick wire, which they went as an ornament. They are an inoffensive race of people, whose chief delight consists in drinking a liquor named bashee, distilled from rice and sugar-cane, after which they engage in dancing with every mark of satisfaction and gratification. Spanish governor resides on Grafton Island, with about 100 soldiers, several officers, a few priests, and some cannon.

These islands were visited by Dampier, who gives a favourable account both of the civility of the inliabitants and the abundance of hogs, they were afterwards seen by Byron and Wallis, who passed without landing.—(Mearcs, King, &c)

Basouda (or Gunge Basouda)—A town in the province of Malwa, situated on a river that runs into the Betwah, twenty-five miles north from Bhilsah, lat. 23° 53′ N, lon. 78° E. In 1820 it was the head of a pergunnah belonging to Sindia, and contained 2,000 houses.

BASOUDA.—A town in the province of Malwa, with a strong glurry on the top of a hill in the vicinity, sixteen miles S W. from Ratglur, lat 23° 35' N., lon 78° 23' E. In 1820 it contained 500 houses.

Bassittan—An island Islag off the south-western extremity of Vio godanso and surrounded by o clur ter of smaller ones. In length it may be estimated of forty miles, by any the average breadth in the centre there is a range of mountains, but it is low towords the cosast ond destinate of good harbours. Grain is the chief production, which the soul yields plentifully cowiers are also abundant. The population is scanty and the sovereignty is claim ed by the Sooloos.—(Forrest Dal rample, fee).

Bassein (Basna) - A scaport town in the province of Aurungabad separated from Salsette by o narrow strait and situated about twenty seven miles north from the fort of Bombay lat, 19° 20' h , lon. 72° 50 L' The surrounding country here presents an improved state of cults notion ootwithstanding it has been so many sears under a Maharatta govern ment and long exhibited o striking contrast to the desolution that prevailed in the British island of Sal Many of the cultivators are Roman Catholie Christians teak forests that supply the marine yard at Bombay he along the western ade of the glight mountains to the north and north-cast of Bassein the nomerous moontain streams afford ing the means of water carriage.

The Portugueso obtained possession of Bassein by treaty with the Sultan of Cambay so early se 1531 and with them it continued uout captured by the Maharattas in 1750 baying been more than two centuries in their undisturbed possession was taken from the last-mentioned race by General Goddard a srmy, but restored at the peace of Salbyo and here, on the 31st Dec 1802 wos signed the celebrated treaty betweeo the Peshwa sad the British goveroment, which onminiated the Maharattas as o federal empire In 1824 this was o coosiderable place and surrouoded by o regular foruscanoo of ramparts ond bastions, but without o glacis, which from the VOL. I

marshy stoto of the surrounding country is not much wanted. There was then a small garrison stationed in one of the gates under an Fuglish conductor of ordnance and the place was kept locked up but within ot the above date it was completely uninhabited, containing nothing but o pagoda in rood repair, and a melan choly display of rulned houses and Of the latter there were churches so fewer than seven some of const derable alze but all of mean areal tecture olthough they are striking from the lofty proportions usual in Roman Catholic places of worship and from the singularity of Chilstian and European ruins in India .- (Mal colm Rennell Bruce, Malet, &c)

Bassers (or Palken)—A town and district in the dominions of Avn province of Press the first situated about 102 miles west from Rongoon; lat, 16° 50° N 100 p4° 45° E. This port has a greater depth of water than Rangaon but in less centrally situated for trade for the streams that connect the Basseen river with the Irawady are avvigable only part of the year so that for the remainder it is precluded from five Interconso with the northern quarters of the Burnesce empire

BASSUM for Il summ J-A district in the Hyderabad territories division of Nandere situated between the twenty first and twenty-second degrees of north latitude It has on uneven hilly surface intersected by small streams that flow into the Godavery Re pecting this part of the Decean very httle is known although it is particularized by Abul Fazel in the Institutes of Acher At Houndah Nagnath o village south of Bassum town, is an sucient temple covered with statues and sculpture evidently belonging either to tho Buddhists or Jains Among the statues are three large simple-looking figures in a contemplative position. with curled wigs - (Erskine de)

BATANO.—An Island is the castorn seas lying off the south-eastern L. extremity of the Malay peninsula, and surrounded by numberless small rocky islets. It is separated from the island of Bintang by a narrow strait, and may be estimated at twenty-five miles in length, by ten the average breadth.

BATANG (or Patany Hook.)-A port in the Gilolo passage, situated on the east coast of the island of Gilolo; lat 0° 9' S., lon. 128° 48' E. On this hook or point is a very strong capacious natural fortress, only accessible by ladders, up the face of a perpendicular rock. The top is level ground three miles in circumference, containing houses and gardens 1770 the natives here supplied the French with clove-plants, which do not thrive further east than Gebby isle, on which account the Dutch formerly maintained cruizers here to prevent the smuggling of spices.-(Forrest & c)

BATALIN.—An island in the eastern seas situated off the coast of Celebes, about the 124th degree of east longitude, and between the first and second degree of south latitude length it may be estimated at twentyfive miles, by seven the average breadth; but it does not uppear to have been ever explored.

BATAVIA.—A large city in the island of Java, the capital of the Dutch possessions in the Eastern Archipelago; lat. 6° 8' S, lon. 106° 54' E. The ground plan of the town is in the shape of a parallelogram; the length of which from north to south is 4,200 feet, and the breadth 3,000 feet. The streets are laid out in straight lines, and cross each other at right angles. This city, however, is greatly changed since the British conquest in 1811, prior to which all the fortifications had been destroyed by General Daendels, who demolished the ramparts in order to admit a free circulation of air. Of the splendour and magnificence which formerly procured for this city the appellation of Queen of the East, little is now to be teen, whole streets of houses have ing been pulled down, canals filled

up, forts destroyed, and palaces le-The stadthouse, where the supreme courts of justice and police assemble, still remains; but all the wealthy inhabitants after having transacted the business of the day, retire to the more elevated stations of the interior: and although the richest productions of Java continue to be deposited in the warehouses of Batavia, few Europeans venture to sleep within the limits of its pestilential

atmosphere.

The great church, built in 1760, has been also pulled down, in consequence of the foundation having given way, so that the new Lutheran is the only one frequented by the Protestant part of the community, the native Christians resorting mostly to the Portuguese church. According to a census taken by the British government in 1815, the district of Batavia, including Buitzenzorg, contained a population of 408,327 persons, of which number 55,027 were Clunese A poll-tax however being levied on the Chinese, and other duties rendering it the interest of all parties to withhold accurate returns, it is probable the real amount exceeds the above estimate.

Population of Batavia and its suburbs within two miles distance. A D.

In 1818 the total producqupois. tion of this berry in Java was estimated at 25,840,000 pounds. Sugar is usually sold to the exporters at eight Spanish dollars the white, and six or seven the brown, per Java In 1818 the total quantity produced amounted to 27,200,000 pounds, ranking in quality with that of the Brazils Teak grows so abundantly in Java, that in 1818 it was estimated that the hull of a teak ship, well-fastened and sheathed with copper, might be constructed for £12

per ton

The Dutch being the only nation that keeps up an intercourse with Japan, a ship is annually despatched from Batavia laden with kerseymeres, fine cloths, clock-work, spices, elephant's-teeth, sapan-wood, tin and tortoiseshell The returns from Japan consist principally of ingots of the finest red copper, which is converted into a clumsy sort of coin for paying the native and European troops Various other articles are smuggled in by the officers, such as sabre-blades of an excellent temper, Japan camphor, soy, china-ware, lacquered ware, The cargo always and silk goods. contains a present for the emperor of Japan, and he in return sends one to the Governor-general, consisting usually of desks, drawers, and closestools of valuable inlaid wood, covered with the celebrated Japan varnish, and incrustated with flowers and other designs in variously coloured mother-o'pearl.

A.D. 1619, John Pieterson Coen, the Dutch governor, took the town of Jacatra by assault, and in a great measure destroyed it. He afterwards founded another city, not exactly on the same spot, to which he gave the name of Batavia In 1811 it surrendered at discretion to the British army under Sir Samuel Auchmuty, General Jansens having retired to the fortified camp at Cornelis, where on the 25th August of the same year he was attacked, totally jouted, and the island subsequently was completely subdued Of the strong camp at Cornebs there are now few traces, the

fortifications having been all rased, the works destroyed, and their site soon covered by the exuberant vegetation of a tropical climate During the British possession of Batavia, which lasted until the 19th August 1816, its condition was greatly improved, and even its pestilential atmosphere somewhat ameliorated by the great pains bestowed on the draining of the marshes, the cleaning of the town, and the removing of the Europeans to the elevated tracts of the mterior - Stavorinus, Barrow, Raffles, Crawfurd, Thorn, Staunton, &c)

BATCHIAN—One of the Molucca islands, separated from Gilolo by a narrow strait, and situated between the equator and the first degree of south latitude. It is of an irregular figure, but in length may be estimated at fifty-two miles, by twenty the average breadth. In 1775 the Sultan of Batchian claimed dominion over the islands of Ooby, Ceram, and Goram, but was himself held in vassalage by the Dutch The inhabitants are nearly all Malay Mahomedans.—(For rest, &c.)

Bate Isle.—An island situated at the western extremity of the Gujerat peninsula; lat. 22° 27' N, lon. 69° 19' E Bate signifies an island of any kind, the proper name of this one being Shunkodwar. There is a good harbour here, well secured from the prevailing winds, but the anchorage is rocky. Although the port has been improved, it is and has always been an msignificant place: yet in 1803 it repulsed a British attack with considetable slaughter. In 1809 about 150 vessels belonged to Bate, and, until the interference of the Bombay presidency, were the piratical vessels so much dreaded by native craft along the western coast of India.

The island does not produce sufficient food for its own subsistence, large quantities of ghee, sugar, grain, &c. are consequently imported and consumed by the numerous pilgrims that resort to the holy places. In 1809 Bate contained about 2,000 houses, mostly inhabited by Brahmins, but it

also possessed Amranra, Positra, Biburvalla, ond some other furtified places, aince dismontied. The whole revenue arising from the temples poet duties, and pirated property, probably over omounted to two lacks of rupees per annum In 1807 its chiefs were fixed for there present and compelled to aign as coggenent to abstant from robbery in future. It was taken and sanced by Sultan Mahmood Degra, of Ahmedatad and Gujerat, in A D 1462

Shunkodwara is the proper decomi-notion of this island being derived from that of o Illndoo demon, thus named from his dwelling in o large chook, couch shell or buckie, withio which he concealed tho sacred vedas recently stoleo from Brahma, An In carnation of Visitou, under the name of Shunk Narayan cut open the shell and restored the redas to their low The demon pleaded as ful owner his excuse that he hoped to hove been put to death by Vishau for the theft which would hove insured him future beatstode. In consequence of thisexploit Shaok Narayan (Vishnu). or the destroyer of the shell demon, established his own worship on the island where it flourished until the flight of another llindoo god nomed Runchor from Dwaraco to escapo the fury of a Mahomedan army sinco which the latter has taken the lead and engrossed oll the offerings,-(Macmurdo Treaties &c)

BATICALO.-A town god district co the east coast of Ceylon situated on an island three miles in circumference. aixty-six miles S 8 E. from Triocomalee lot. 7° 43' N , loo 81° 45' E The fort here is of a square form with a few hastrons on which lo 1803. twenty four guns were mounted Tha inlet of the sea that surrounds Baticalo penetrates thirty indea into tho country and comprehends several other islets of stdl smaller dimensions. Io many places this frith is a mile broad but unfortugately a sand bar stretches ocross the ootrance and precludes all but craft under eighty toos The iohabitaats ore mostly illindoos

and Mohomedans, the native Christians being comparatively few in num The interior remains covered with primeral forests and thick jungle where wild in woods the noble savage man, here a very miserable animol ranges unmolested under the name of bedah or vedah Beynnd the first chain of hills are the still more rugged mountains of Ouve renowned for oges as the last osylum of tho Candian monarche; ond it was omldst them that in 1631, the Portuguese army and their general Constantino do San, in ottempting to track the king to his den were overpowered and perished to o man .- (Cordiner Bertolacco Mojor Johnston, Percival. đe)

BATINGAIL-A large town la the province of Aimeer about seventy five miles S W from the British canton ments at Luddecanna, lat 30° 12' N., Ion 74 48 E Formerly the sur rounding country was known by the name of the Lacky jungle, much celebroted for the goodness of its pasture, and the excellent breed of horses, said to have been improved by the Persian and Tartar horses, Introduced during the invasions Nadir Shah and Ahmed Shah Abdolls of Cabul Forty years ago thus junglo was described as foroning o circle forty miles In diameter and the then Rojn of the Lacky jungle paid a tribute to the Scik chief of Pattialiali The soil being sondy o great depth must be perforated before water is reached. George Thomas

BATALAN (or Vatela).—A lorge town in the province of Lahore situated to on open ploin twenty-aix miles N E from Amritist Lat 31° 48 N., lon 75° 6° E. It is sur rounded by grores of mangoot-tices and tenks of water and is considered to healthest place in the Puopab The hills lie obout seventy mides off and in winter are covered with soow—(11th Reg \$\frac{1}{2}\).

BATTAMANOE.—A point on the morth west coast of Baroco lot 5° 6 N, log 116° 45'E To the south of Battamande is a commodious bay at the mouth of the Pandoosan river. From Pirate's Point, which hes in 7° N., are several bays, where shipping may anchor safely, and get water from the shore.—(Elmore, &c)

BATTANTA —A small island in the Eastern seas, about the 131st degree of eastern longitude, and separated from the island of Sallawatty by Pitt's Straits. In length it may be estimated at thirty-five miles, by five the average breadth.

BATTANPALLY ISLES.—Two small isles lying off the western const of Wageeoo, about the 130th degree of east longitude, both comprehended within a circumference of eighteen miles.

BATTECOLLAH (Batucala) —A considerable town on the sea-coast of Canara, the name of which signifies the round town. Lat. 13° 56′ N., lon 74° 37′ E It stands on the north bank of a small river, the Scandaholay, which waters a very beautiful valley, surrounded on every side by hills, and in an excellent state of cultivation.

BATTAS (Batak)—The space in the island of Sumatra known by the name of the Battas country, may be described generally as comprizing that portion of the island situated between the equator and 2° 30' north latitude, with the exception of a few Malay settlements at the mouths of the rivers on the coasts. On the north-west it is bounded by Acheen, and on the south-east by the Malay countries of Rawa and Menaneabow. It is partitioned into numerous distriets, the principal of which are Toba, Mandeling, Angkola, Humbang, and Si Nambila The district, or rather province of Toba, which is much the largest, is again subdivided into Silindung, Holbaug, and Linton.

Proceeding in a north-easterly direction across the island, we meet with the Batta district of Loohoo and Manambin. Following the same direction from Natal, we meet with the divisions of Palampungan and

Mandeling. Going from Batang Tara, we meet with those of Angkola, Barumun, and Sama Jambu, from Tapanooly with those of Pangaran, Lambung, Silendung, Butur, Holbang, and the district of Humbang. Proceeding north-east from Baroos, we meet with the districts of Linton and Si Nambila, from Sinkel, with the district called Dairi, and from Tarumo, with the divisions of Alas, Karaw, and Ria, extending inland nearly to the northern extremity of the island. The great lake of Toba, the middle of which bears about north-east from the settlement of Tapanooly, is situated nearly in the centre of the Batta country, and the best peopled tracts are those on its The total population of the borders Batta eountry has been estimated at 1,500,000 persons.

The Battas (properly Bataks) consider themselves the carliest settlers on the island, but all traditions of that event are lost, except a notion that the mother country lay to the east of their present domicile beyond The Sultan of Menancathe sea. bow appears subsequently to have obtained a supremacy over them, which they acknowledge to the present day. In their persons they much resemble the Hindoos, are of middle stature, robust and well made, with rather prominent noses. Their teeth are carefully filed down to the stumps. and blackened

Rice and sweet potatoes, with an unusually large proportion of salt, form their principal sustenance, animal food being only indulged in on paiticular occasions, when they are not very scrupulous as to the animal, the mode in which it lost its life, nor its state of sweetness or putridity. The well established practice of cannibalism, led both Malays and Europeans to the conclusion that the Battas were a serocious and martial people, than which, however, nothing can be more remote from the fact, for in quietness and timidity they surpass the Hindoos, and even although they eat each other during their wars, they commit no excesses

on crops or cattle. This provide are by the same notherative directived as cruel cowardic, and sortially avail-

CHOUL With respect to re' gion, the Battas believe to the existence of a hupryme Briog who after completing the creation of the world committed its covernment to his three sons, but even they have become averse to tho trouble and now perform the duties of their office by valeels and provies. to their different gradations they are described as the gods above the gods of the midde and the gods below the whole with their names savouring strongly of Hindon derivation. Besides these they have a fabulous serpent with horns like & cow on which it sopports the earth but every village has also its guardiso destr, whom they conciliate by propulatory escribees. Besides these ceneral interferences with the affairs of the community, each induidant Batta se constantly watched over by a number of good and evil genit, called Boyus and Sastana. These are chiefly the souls of departed ancestors, who possess great power over the living either to protect or aunoy them but much the most inclined to the latter By the host of gend, ghous, spirits and divinities the uspersitious Batta is held in sock per petual dread that danger threatens him oo every side not the less real in his opinion from being invisible. To others the path may seem clear and unobstructed but the teeming imagination of the Batta meets a phantom at every corner he turns. Not a village but has its brigade of demons protecting its interests ood avenging its injuries, besides squadrons of ghosts ond other disem bodied spirits wondering about to retaliste ony lesult they or their on centors may ot ony prior period have received

To obviate these constantly impending evils recourse is had to the priest, who not unusually is also the Raja and village nateologer, and of course coousited on every occasion of importance. Owing to their penurious

half a tie Battes do not wille ly ofer exercices, but on adequate currectneses and while under severe fears or sufferers when they invoke the shades of their ascertner, and rule offerings to the gods percet by impecting his imple ducovers the animal proper to be of cred whether hutalo per hid or find, and also the nature of the crime committed. The suppliant is informed that his affliction is a slotstion from one of the invisite gentli for the misconduct of some of his ancestory to obviate which he most ecicbrate a feast in honour of his father or grandfather, and thereby obtain ile foreveners. Of a future atate of reward and punishment these people have not the ale htest idea, and consequently look forward to death without terror, except that exceed by the apprehension of hodily pain Alshou, h they believe in a constant and immediate interpolition of super natoral agents in human affairs, it has no joiluence on their morals for it may be sa'cly asserted that the corruntions of the heart so inherent in savere nature exists among them without restraioti

The language of the Battas bears so great a resemblance to the Malay, that they may be considered dialects of the same origin but the inneusce of conversation differs more from the Maley than that wouldly written Like the Malay also the grammatical relation of its words are eminently simple and rarely admitting the use of either conjunctions or personal pronouns and its intonation is dern sounding and harmonous. The written characters are remorkobly simple and distinct easily formed and fully rapoble (with the exception of a single instance) of expressing every soond that occurs in the language. They ore written, like the Sonscrit from the left to the right, horizontaily (out perpendicularly) in one continued line, without separating the words As they ore undoubteilly of Sonscrit derivation, they partako of the noture of that system each coosooant coolaining an loberent vowel sound in addition to its proper organie sound, by which it has uniformly the power of a distinct pure Probably about one Batta syllable Their books are in fifty can read. chiefly astrological, religious, fables, omens, predictions, charms, &c: they are said. however, to possess a history of the creation, and an account of their own origin; but these have not yet been seen by any Euro-They seldom commit their poetry to writing, but their memories are so loaded with it, that they can support alternate contests in quatrains for many hours

Almost all crimes are punished with fines proportioned to the offence and rank of the perpetrator, but the chief who presides may always be bribed. They have no written code universally received, but in most districts one or more books of law and usages is to be found, which vary in weight of authority according to the degree of estimation bestowed on the individual by whom they were first

indited.

Persons caught in the act of housebreaking or highway robbery are publicly executed with the knife or matchlock, and then caten forthwith; no money can then save them: but if the delinquents befortunate enough to escape immediate detection, they are only fined A man taken in adultery is instantly devoured, and may be lawfully eaten piece-meal, without being previously killed. Men killed or taken prisoners during a great war, are also publicly caten, but if only two villages be engaged, this is not allowed: in the last ease the dead are left on the field, to be buried by their respective parties, and the prisoners may be redeemed. In May 1821 twenty persons were entirely caten in one day, in the village in the Silindung district, where Messrs Burton and Ward resided for a short time in May 1822, and their skulls These eriminals were preserved. inhabitants of a village situated near the puth leading to the coast, and in the habit of plundering travellers and traffickers. It does not appear,

however, that any European has yet seen cannibalism actually practised.

Interest on small debts is sometunes so high as 100 per cent. per mensem, and a man and his whole family are sometimes sold to discharge a debt, the principal of which only two years before was a single dollar. In eases of debt incurred at games of chance, their usages are singularly barbarious and inhuman; yet these infatuated and soudid people will frequently risk their all on a single throw of the diee Domestic slavery exists to a considerable extent, but they import no foreigners; the slaves are principally orphans, debtors, and prisoners of war. A man may have as many wives as he can purchase, but seldom has more than two, who are mere labouring slaves, the husband doing comparatively little. The dead are generally buried outside the village, and a funeral feast is a necessary accompaniment.

The Battas are on the whole a more industrious race than the Malays of the sea-coast, who are mostly supplied from the interior, both with the necessaries of life and articles for commercial interchange to A.D 1820 the Battas could not be prevailed on to accept in payment of any other dollars than those of Carolus the Third and Fourth, which have a remarkably large and full bust. while those of Ferdinand the Seventh are small and spare To these last they were consequently averse, while the Caroli bore a premium of two and three per cent, which subsequently increased as the Battas either hoarded them up and concealed them, or melted them to fabricate personal ornaments.

Exclusive of the general deference to the ancient sovereign of Menancabow, the Battas acknowledge the supremacy of a single chief, residing at the north-west extremity of the lake of Toba, but the dependence seems entirely founded on superstition, as he interferes in no lay affairs, which are settled by the head-men of the villages, whom he usually appoints as deputies. Indeed, the actual

currone of the personne from recombination. Ber les this extrapress influence every tillage is a dather convers to proserving within heef ever cital and polarisal power, like the ancreat municipal towns of largoe. The chief with the assissance of the leading more frames have declares war encolodes power and administers justice. Ille power greatly depends on his personal character and the degree of address with which he manares the supersitions fear of his people.

That this extraordinary nation has preserved its stationary barbarity and the rude genulneness of its character and manners, may be attributed to ratious causes such as the want of the precious metals; the vegetal e riches of the soil exoils obtained; there ignorance of navigation; the desided nature of their government which are carcumstances unfavourable to the propagation of ocw opinous and customs and laster the ideas enter tained of the ferenty of a people practising anthropophasi which may well be supposed to have damped the ardour and restrained the scal of religious Innovators. - (Burton and Hard. Marsden Inderion, &c )

BATTU (or Pale Rets )-An Island lying off the western coast of bornstra, situated immediately south of the equipoetral line and in length about forty miles, by ten the average breadth it is inhabited by a culony from the Island of Neas who psy a scarly tax to the Raja of Baloaro o small fortified village in the interior, belooging to a different race, whose number is said to be limited to 100 which it is oot allowed to exceed exactly as many children being reared as are sufficient to supply the deaths They are reported to resemble the Macassars and Buggesses ood may have been originally adventurers from Celebes The influence of the Baluaro Hoja over the Ness colocutt, who out number bls subjects by taenty to one is founded on a superatitious belief with which they are impressed, that all the woter in the

lifted will become salid they neglect to put the tax. He in his turn, to go is danger from the Natay tradies who recent hither from Padarg and are not equily credie on in a deed to pay there are annual to see a universamone of gold.

The final of the jeep le here as on the other wonthewn term bems ran lides is result ago and their experts occasions on its constantial expunsities, and season or bath decrear. No tice is cultivated. Pulo Itatu is vide from batal little on the main-land of fromtin, and is cultily covered with wood. Mariator, 60.

Barretaet — A harbour situated at the oorthern extremity of the leant of Viagoulanaog ist \$2.5 %, but 15.0 %. This port is known by a remarkable rock about the size of a large duelling-hout e, of a pipe-clay colour, letturen which and the main is a rerf of rocks, that hostis may gave over at high water; within these is ten fathoms water. The Dutch once attempted is actificated here, but were capelled by the natives,—I described in the statement here, but were capelled by the natives,—I described in the statement here.

Bart Bana,-A petty town and state of some nate on the north eastern roast of humatra situated on both sides of a river of the same name; lat T' 15" \ lon 90" 37 1... The name Batu Bara or, instea from a large stone in the Interior which at night has the appearance of being red hot The country is subordi nate to but from whence the local chiefs receive their chops and digni tles; but being rich and commercial. their allegance is not very submissire. In 1622 salt-fielt rattans und alik cloths were the principal exports: about servoty chests of onlym and some raw silk the chief imports; slaves and horses are brought down from the Interior The Inhabitanta are considerable prow owners, and general carriers of the traffic between this part of Sumatra and Penang &c Some are in consequence wealthy, according to Violay ideas ond own several large vessels They also ma

nufacture rich silk and gold cloths, and coarse cotton cloths. In 1822 the stationary Malay population was estimated at 10,000; the Batta cultivators of the interior, most of them cannibals, were also numerous. The Batta chiefs sell their daughters to the Malay nobles for between 300 and 400 dollars, and usually present along with her ten or twelve slaves, a few horses, and some buffaloes. The blood-money for murder here is 444 dollars and 44 pice, and wounds of various degrees of severity are expiated in proportion.—(Anderson, §c.)

Baug —A town in the province of Malwa, situated at the confluence of the rivers Girna and Waugney, about cighty miles S W. from Oojein, lat. 22° 26' N, lon. 74° 54' E. mountainous tract on which Baug stands stretches for a considerable distance along the course of the Nerbudda, but leaving in general an intermediate plain between the ridge and the river of about ten miles in There are few towns or breadth even villages on this range, which is thinly peopled by miscrable Bheel tribes, some still in the migratory stage.

The town of Baug is built on horizontal beds of sand-stone, at the foot of a range of low hills about 100 feet high, forming the western boundary of a pleasant valley, three miles long by one in breadth. 1818 it contained only 400 houses; but prior to the desolation of the last twenty years is said to have contained 2,000. It lies on the road from Malwa to Gujerat by what is termed the Oudipoor pass, and from hence two roads diverge, one eastward through the Tanda pass, the other by the Tirella ghaut, leading to Indore and Oujein In 1820 the town and perguinah belonged to Sindia, but yielded him only 9,000 supees per annum. Iron ore abounds, and is fused by the native blacksmiths, who procure above fifty per cent even by their imperfect processes.

Four miles S S.E. of Baug are the sculptured cave temples, four in number, but only the most northern remains in a state of preservation. The open area of one cave is eightyfour feet square, besides which there are many side rooms, and others further advanced into the hill; but without plates it would be impossible to render the subject intelligible. Mr. Erskine is of opinion that these excavations are of Buddhist origin, and present another example of temples dedicated to that religion, in countries where we have no historical record that it ever existed, and where not a single individual of the sect is now to be found. Throughout the whole there is no trace of Brahminical mythology, there being no unnatural or distorted figures with many limbs or heads, except a mutilated figure of Ganesa, which has the appearance of being a much more recent piece of sculpture than the others.—(Dangerfield, Malcolm, Ershine, &c.)

BAUGLEE —A town in the province of Malwa, situated on the Keiree nullah, five miles north of Soondursee, and containing a stone ghurry, or native redoubt. In 1820 it belonged to Raj Rana Zalim Singh, and contained about 1,000 houses.

BAUGREE (Baghhari). - A wild and jungly pergunnah in the province of Bengal, district of Midnapoor, situated towards the north-eastern quarter. Although within sixty miles of Calcutta, up to A D. 1816, owing to peculiar local obstacles, the authority of government had never been properly established in this tract, nor had the peaceably disposed inhabitants ever enjoyed that protection which had been so effectually extended to all the other parts of the old British provinces. In Baugree the leaders of the Choars continued to act as if they had been independent of any government, and endeavoured to maintain their independence by the most atrocious acts, and frequently by the murder of individuals in revenge for evidence

given acromit them Bed les thus ferfetteing exione and murder la the prosecution of the read nary soration, these miscrearts were growtally grady to legome the icetra ments of price e makes amon, the inhaditarts, when the tralignity of there hatted athenlated them to an saturation which ther were ton countly to perform with their swa bands. Perry attempt to establish an efficet police basing failed, it became necessary to concentrate the powers usually sected to different local authorities in one functionary under the immediate direction of the Governor-general which was accord in it done and Mr Oakley deputed to execute the ardnous communion.

The first mearure adopted by this gentleman was to accertain the principal ringles lers of the hunditi In order that they mucht be specifically excluded from the general amnesty to be offered in the creat majority of the Choare; the next was to deprice them of their accustomed supplies of foods to encourage a count of active co-operation among the inhabitantes and generally to dimini h the terror which the crucity of these tubbers had Impressed on the neighbouring villagers and cultivators The suc cess of these measures was becoming daily more enorpictious when It was unfortunately arrested by the laur rection of the Pakes in the adjacent pergunnals of Bhunjthoom The effect however of this commotion was only temporary for by the middle of 1816 the gang of ilunderers had been dispersed and crimes of ener mity nearly suppressed while the current rescoue due to government was realized In February 1816 the Choar banditti consisted of nineteen leaders and about "00 accomplices. In the course of a few munths all the chiefs except two were apprehended. or fell in the ottempts to opprehend them their frequent and pertinacious resistance being partly ascribable to their long habits of ferocity and partly to their expectation of capital punishment if taken alive - (Public MS Documents, Oakley, Se)

Barranta—A town in the protings of Modular near the mouth of the Lating, which tegether with the whose eccutive under Parker in 12 m below of to the America of Ernde—(I')chaptons, (iv)

Nation A town in the protitle of the Pasition (National, or grant
truck of the Pasition (Padras), or grant
truck of the Langer, twenty-one in least
National Mooreline data); int 23
25 Nation, National State and of considerable estimaterial importance. It
is also the seat of a commercial resident on the part of the Lat India
Company in 1848 a plantation of
teak trees which had been effected
here, had a thinky appearance.

Baraywan....A town in the Gujerat prefunda, twenty seven miles west from Junachur; lat 21° 2° %, lon 70 17 L

Bayretrau.—A firm in the north orn circurs thirteen miles W N W from Nisampatnam; lat, 15° 05' No. lon 40° 20' 1

Barners,—A town belonging to Sindia in the province of Malwa twenty miles from Chendarce

DATFOUR (Formers) - A scaport town on the Malahar coast seven miles south from Calicutt lat 110 10' \" lon 76" 62' 1.. Tippoo new named this place Sultanpatnam and Intended to have made it a commercial emporium. Tenk ships of 400 tons are built here of timber procured in the orighbourhood and from the clups and saw-dust, teak tar is extracted. Some saw mills were crected here on speculation with the view of supplying the deck rards at Bombay with planks; but the mov ing power being wind it oppeared too precarious for the heavy machinery required

Bracti (I yacula) — A native fort on the Malatar coast thirty-seven miles B by W from Mangalore and placed like Cananore on a high point, projecting into the sea towards the sunth and having o bay within it lat 12°23 N, lon 78°5' E. The town stands north from the fort, and in 1800 contained 100 houses. The inhabitants are chiefly Moplays and Mucius, with a few Turs (cultivators) and people of the Concan, who had long settled in Maldiar as shopkeepers—(F Buchanan, &c)

Beara.—A considerable town in the province of Gujerat, forty unles E. by S from Surat Castle, where a small detachment of troops is usually stationed.

Bidagium (Vedaghar).—A town in the province of Gundwana, nine nules south-west from Gurrali, lat. 23° 5′ N., lon 80° 9′ E.

Brnsonr ( Beidururu ) .- A district in the north-western extremity of the My sore Ruja's territories, situated on the summit of that range of western fulls which overlooks the provinces of Canara and Malabar, and is named the Western Ghants. These mountains, clevated from 4,000 to 5,000 feet above the level of the sea, present to the west a surface in many places perpendicular to the horizon, and their height intercepts the clouds of the western monsoon Nine rainy months in the year are usually calculated on in this climate, and for six of that number it is usual to make the same preparatory arrangement for provision, water excepted, as are adopted in a ship proceeding on a long voyage. This redundant moisture not only favours the peculiar products of the soil, but also covers the face of the country with timber of great dimensions, and underwood scarcely to be penetrated.

The exports from Bednore consist principally of pepper, betel-nut, sandal-wood, and cardamums, the imports salt, rice, cocoa-nuts, oil, turmeric, and cotton cloths. The roads being bad, most of the exports are carried to Mangalore by porters; the most important article is betel-nut. The difference of elevation makes this chimate a month later than on the sea-coast. The cattle are small, but the number reared exceeding that required for domestic purposes, the surplus is exported. When con-

quered by Hyder, in 1762, the Bednore domnions comprehended the maritime province now named Canara, and to the east a tract of open country, reaching to Sunta Bednore and Hoolukera, within twenty miles of Chutledroog—(Wilks, F. Buchavan, &c.)

Bennone —A town in the Mysore territories, the capital of the preceding district, and situated in lat. 13? 50' N., Ion. 75° 6' D. It was originally named Biderhully, or bamboo village, until the seat of government was transferred from Ikery, after which it was called Biderury, or bant-On this removal, the hoo place whole revenue being expended here, Bednore became a city of great magnitude and commerce, and is said to have contained 20,000 houses, besides lints, defended by a circle of woods, hills, and fortified defiles. taken by Hyder in 1763, it was estimated at eight miles in circumference, and the plunder realized was reported (by native authorities) at twelve millions sterling Being, like his son Tippoo, a great changer of names, he called it Hydernuggur, in which it rejoiced until 1783, when it was taken and plundered by a detachment of Bombay troops under General Matthews, but they were soon after attacked by Tippoo and his French auxiliaries, and all destroyed or made At Tippoo's death, Bedprisoners nore still contained 1,500 houses, besides hits, and it has since grently recovered, being a convenient thoroughfare for goods. During the Ranny's government, one hundred families of Concan Christians settled here, and subsisted by distilling and vending spirituous liquors, but Tippoo carried them all off to Seringa-Travelling distance from Sepatam rıngapatam, 187 miles, fi om Madras, 445, and from Poona, 382 miles.— (F. Buchanan, Wilks, Rennell, &c.)

Beeans—A small and extremely mountainous district in Northern Hindostan, situated about lat 30° 15′N, lon 80° 50′E, and bordering on the Nepaulese territories, cast of

the Calı River by which it is tra

Brawez.—A town belowing to the Bruth poverment in the Pricvince of Candroh situated at the confinence of the Sooranddy and Arkye at the Ni angle of which is a small fort; let 21° 10° N., Ion 73° 45 E. In 18 0 it was the heal of n pergunnah containing 186 vil la\_sez.—(Halcolo &c)

Brguorr.—A Portuguese town with a small fort situated on a nar row ereck communicating with the larbour of Gos from which it is threteen mides hy h di tant it stands within the limits of the Coaterntories, and is the outal place of embarkation for traiellers who have come down the Ram Ghaut from the Decean.—(Fallation §7).

Berentaco (Berekaler).-A mi serable village in the Acpaniere dominions with a substantial dhurrum sals astusted on an elevated hank above the bed of the Beechisco tor rent twenty-seven miles south from Cotmandoo lat 27º 19 \" lon 84º This place consists of about a dozen huts but affords no supplies to the traveller except wood and wn ter, of which last there is a very fine spring besides several small streams ing wide stony channel; yet there is no cultivation in the vicinity, the only Inhabitanta being a few Parbutties or mountain Hindoos who collect duties and supply travellers. The oame Bichakor signifies o place obounding with scorpions. During the last campaign against the Nepau lese Beechiaco was taken by Sir Daand Ochteriony who established a depot and fortified it with a stock nde.-(F Bachanan &c)

BEEGINFOON.—A village in the province of Mooltan division of Sinde situated on the west bank of the Goocee on the road from Hyders bad to Mandavic in Cutch lat 24° 35' N<sub>n</sub> lon 69° 5 L

## BEEDER

A province of the Deccan situated

principally between the seventeenth and twentieth degrees of north lat! tode and at prevent comprehended in the distribution of the Sizam the north it is bounded by Aorureslad and Berar; on the south by the large province of Hyderahad; to the cast if her Hyderated and Condwa ns t unl on the west Aoruogabal and Berspoor The surface of this prosince is uneven and hilly but not mountainous on lit is intersected by many small streams, which having fer tilized the soil flow into the Beems hrehma, and Godavery The coun try lo general is very productive, and under the old Illindoo government contained a redundant popolition but It as now thinly inhabited compared with the British provinces Although long the seat of a Mahomedan sovereignty, and still subject to princes of that persuation the Hindoos exceed the rival sect in the proportion of three to one unction of three languages, the Telings, the Malmratto and the Ca narese takes place in this province some where near the carlial. Tho largest rivers are the Godavery and Manjern; the chief towns Beeder Calberge \undere and Calliany The principal modern subdivisions

1 Calberga. 5 Beeder 2 Naidroog 6 Nandere 3. Akulcotta. 7 Potree

4 Callany
After the Mahomedan conquest the
province was the seat of the Blame
nee dynasty of Decemy sovereigns
the first of whom was Allah ud Deen
Houssuo Kangoli Bhamenee A.D.
1347 whose capital was Callerga.
Bendes the princes of the Kizam
Shahy, Adil Shahy, and Cuttub
Shahy families founded on the runs
of the Bhamenee dynasty, there were
two others composed of sections of
ther once estenaire dominions. One
was founded by Ameer Bereed (about
1518), the prime minister or rather
the confiner of the two last Blamenee sultans and called after him the
Berreed Shahy Ilis dominions were
Berreed Shahy Ilis dominions were

small, consisting of Beeder, the capi

tal, and a few districts round the city. The 10val dignity did not remain long in his family, his territories being wrested from his grandson by the other princes of the Deccan, and the short-hved kingdom of Beeder de-Along with the other Deccany provinces, it was subjugated by the Moguls towards the conclusion of the seventeenth century, during the reign of Aurengzebe, from whose successors it was abstracted in 1717, by Nizam ul Mulk, and has ever since been occupied by his successors the Nizams of Hyderabad. But the Peshwa had always large claims for choute on this territory, which, when regularly paid, yielded seventeen lacks of rupees; but when by the fortune of war the Maharatta claims devolved to the British government, the arrears had so accumulated, that in 1820 they amounted to two and a half crores of rupees. - (Ferishta, Scott, Mackenzie, Elphinstone, &c)

BEEDER (Bider) - The capital of the preceding province, situated in lat. 17° 49' N, lon 77° 46' E, seventy-three miles N.W. from Hyderabad. According to descriptions given forty years ago, and we have none more recent, this place is fortified with a stone wall, a dry ditch, and many The wall is six miles round towers in circumference, and the town it encloses stands in an open plain, except the east side, which is on a ground that rises about 100 yards whole is much decayed, but the remains of some good buildings are still visible. It was formerly noted for works of tutenague inlaid with silver, and near the runs of old Beeder, Ahmed Shah Bhamenee founded the city of Ahmedabad, which he made his capital instead of Calberga, and this is the modern Beeder. Travelling distance from Hyderabad seventyeight miles; from Delhi 857, from Madras 430, and from Calcutta 980 miles — (Upton, Scott, Rennell, &c)

BEEJALFOOR —A town in the province of Malwa, three miles and a half south from Indore, which in 1820 contained 300 houses.

Beejapoon (Vijayapura).—Atown and pergunnah in the province of Gujerat, division of Chowal, at present subject to the Guicowar, lat 23° 37' N., lon. 72° 46' E., forty miles north from Ahmedabad. This tract had been transferred to the British government prior to 1810, but up to that period not the least progress had been made in cradicating the turbulent and rapacious habits of the na-In 1811 it was let in farm for five years at an annual rent of 171,647 rupces; and in 1817, after many endeavours, was given in exchange to the Guicowar for some more peaceable pergunnahs.—(Rowles, Carnac, &c)

BEEJNOTE.—A town in the province of Ajmeer, situated about fifteen miles east of the city of Jesselmere.

BEEMA RIVER (Bhima terrific).— This river has its source in the mountains about forty miles north of Poona, which it passes at a distance of fifteen miles From hence, with many windings, it flows in a south-easterly direction, receiving the accession of various hill streams, until after a course of about 400 nules it joins the Krishna near Firozeghur. The horses most esteemed by the Maharattas are bred on the banks of the Beema. They are of a middle size and strong, are rather a handsome breed, generally dark bay with black legs, and are named from the country that breeds them, Beemarteddy horses - (Rennell, 5th Register, &c)

BEENISHEHR .- See MALEBUM.

BEERAT.—A town in the province of Agra, sixty miles N N.E. from Jeypoor, lat. 27° 42′ N, lon 75° 59′ E.

BEERANAH—An open village in the province of Ajmeer, situated to the south of the Cuggur, sixty miles N W. of Hansi, encompassed by a runous mud wall without a ditch. In 1810 it contained about 3,000 inhabitants, and had sixteen wells in the vicinity.—(E. Gardner, &c.)

Berngun.—An open village in the

province of Ajmeer thirty-five miles from Histor and three from Futteh ahad, sitosted on the south side of the Coppur niver

Brownsan.—A rdiage in the province of Delhi district of Vierus about twenty-three mies E.\ L. from Delhi. To the west of this place there is an old but spaceous seral.

Bearn Sonson -- See Sterougha

Bruan karaa.—A fortified town in the province of Vintus, altusted within o narrow defile of hills on the left bruk of the Lathutty river. In 1870 is contained about 1,100 lahalutants.

Briot 200 — A small district in the hobition of I shore situated to the north of Chamba but respecting which nothing further is known

Benove.—A town in the province of Allahabad, seventeen miles N W from Pannah Lat. 23° 1 A., fon 80° & E.

Bettage,—A town and pergunnals in the province of Agra, nineteen miles S.E from halpee Lat. 2.0 54 N., lou 79°54 E.

Benere—A town and small per gunnah in the province of Allahabad seventeen miles N from Jest poor Lat. 25° 26 N., lon 70° 18'

Bener.—A town in the province of Delhi, district of Saharunpoor obout fifteen miles N W from the town of Saharunpoor

BELEXIBA.—A village situated on an emmenou in the province nod district of Caodenh about fifty miles 8.5 W from Boorhanpoor ond remarkable for a well built stone fort, a rare object in this district where the village forts are usually of the most wretched description.—(Fullation & Janos & Jano

BEIROOHWARUE.—An extensive but unfinished fartress in the province of Malwa altuated on the left bank of this Sipra a short distance below Oosein Its outer wall comprehends

a smaller fort, also incomplete which encloses an area with opatiments ranged in galletter like a seral and o pagods of ancient appearance dedicated to Bhairara, one of the forms of first mock wenerated by the Vlaharattas—[Fallerton, &c.]

REMORE RI Filavechare J .- A large hill fort in the provioce of Canderds, aituated among the Satpoora range of mountains and formerly the camusi of the old Hindoo province of hemaur I at. 21° 16 N., ion 7.0° 30 L. By Abul Fazel it is called the capital of Candersh The modern district of Beja hur took its namo from this fortress which, hawever, has long been neglected Kurgoon being onw considered the principal town, as the manager on the part of the Holker family resides there With the execution of the small division of Burwannee the circar of Bejaghur comprises nearly the whole of south revenue of one lack and a half, in 1820 only 50 000 rupees, per annum. - ( Malcolm, Sc )

## BEJAPOOR

A large province of the Deceme eatendag from the 15th to the 18th degrees of north lattude. On the north it is bounded by the province of Aurungabid on the south tip the Tombouldra Wurda med district of Cansara; to the east it has Aurungabad and Highambad along the course of the Beema trier and to the west the Indian occasi. In length it may be estimated at 250 miles by 200 the overnee breadth.

The western districts of this province are very mountainous, especially in the vienity of the ghauts where hill fairtesses of great natural strength dound. The sate selected for these strengholds ore nearly oil of the same chuncter namely isolated councies with flat summer, and sides perpendicular for fifty or a hundred text from their upper margin or easily made so by scarping. Being thus reodered inaccessible from he low, except by one narrow and difficult path, all necessity for outworks is superseded, and the fortress usually presents only a wall cresting the edge of the precipice, instead of the numerous and intricate lines of defence which connect rock with rock from the base to the summit of the fortified droogs in the south of India. Although less alpine, all that extent of surface to the east of the ghauts is also greatly elevated above the level of the sea. In such tracts as are flat and arable the black soil prevails, particularly along the courses of the principal rivers, such as the Krishna, Toombuddra, Beema, and Gutpurba

There is nothing remarkable in the agriculture or productions of Bejapoor, and the local peculiarities will be discussed under the principal heads respectively. The horses reared on the banks of the Beema were held in great estimation by the Maharattas, and mounted their best ca-Until recently the whole seacoast was possessed by that race, which being little addicted to maritime commerce, whatever traffic did subsist was mostly carried on by means of land carriage, but the amount of this species of interchange all over the Deccan has always been considerable As this section of Hindostan did not come under the sway of the Mogul emperors until long after the death of Abul Fazel, and remained but a short time in subjection, we have no ancient description of its condition; at present the principal modern geographical and territorial subdivisions are the following, beginning at the south-west.

- 1 The Concan 2 Colapoor
- 3. Mortizabad.
- 4. Assodnagur.
- 5. Bejapoor district.
- 6. Sackur.
- 7. Raichoor.
- 8. Mudgul 9. Gujunderghur,
- 10. Annagoondy.
- 11. Bancapoor. 19 Gundual

- 13. Noorgool.
- 14 Azımnagur.
- 15 Ryebaugh.

16. Darwar. In this province, approaching Krishna from the southward, Maharatta tongue becomes more more in use, leaving this river to south, the Canara dialect decline a similar proportion: so that Krishna may be deemed the divi boundary of the two languages, the Canara is rather more spoke the northward than the Maharat the south of that river. The Kri is remarkable also for separating

The deers and destruction of the lispapor leneany empire, and the rise of that of the Maharatta. Impered see nearly at the sares time that the presume round with structure levand ever to have been subject to the trune of the lathough regularly enumerated to the lat of one table. Harme the retin of Autroparts its process for use disputed with standard lists the Maharatta, and with them, then the retire retired to the larger portion of it revalence.

After the conclusion of the war with Doubt lies Sinds in 1401 the Maharatta territories in this province exhibited a scene of the most extraonlimity anarchy, and although nononally subject to the Peshwar, his authority scarrely extended beyond the city of Poons, and was trainted I verery perty head of a village. Tho different chiefs and leaders of bandittl ly whom the country was occupied were almost innumera, les the names and designations of the principal were Gollah (afterwards generals simo to the ex I chwa and Liled in battle). Arres Sabele and Itala Sabele (the sons of Purseram Blow and heads of the Putwarden family), Appeh Dessaye, I orkia, Bapocjee bindia, the Vlochoor Cur Madarow Hastin, tha Haja of Colspoor Futteh Singh Bhoonsla Chinternun How (tho nephew of Pur seram Bhowl Tantia Punt Pritty Niddy and others of inferior note depending on these leaders. These assumed the title of jaghiredars, of though they were properly only seringjamy sirders of the Poons state In fact there were very few of tho southern ja hiredars who had any just pretensions to the territories they occupied in 1603.

In A D 1818 the whole of this vant province with the exception of the territory reserved for the batara Ilaja became subordanate to the British government which cetablished the district of larvar and new modelled the political relations of the

different petty chiefs and jaghiredars, the most noted of whom in 1821, besides the powerful Putwurden family and the Colapoor Raja, were the chiefs of Kittoor, Moodhole, Nepaunee, Nurgoond and Ramdroog, Gujunderghur, Shanoor, and Jambhotee, all coerced (most unwillingly) into peaceful habits by the strong arm of the British power—(The Duke of Wellington, Ferishta, Elphinstone, Malcolm, Moor, Wills, &c)

BEJAPOOR (Vijayapura, the impregnable city)—The ancient capital of the province of Bejapoor. In old books of European travels it is generally written Viziapoor. Lat. 16° 46′ N., Ion. 75° 47′ E

When taken by Aurengzebe in person, A.D. 1689, the fortifications from description appear to have been of immense extent, for between the wall of what is usually called the fort and the outer wall of the old city, there was said to have been room for 15,000 cavalry to eneamp Within the citadel, or inner fort, were the king's palace, the houses of the nobility, and large magazines, besides extensive gardens, and round the whole a deep ditch always filled with water. It is still asserted by the natives, with their usual proneness to exaggeration, that Bejapoor while flourishing contained 984,000 inhabited houses, and 1,600 After its surrender the reservoirs and wells in the fort decreased, and the country around became waste to a considerable distance. At present it exhibits to the view a vast expanse of runs, which prove the original magnitude of the city when it was the capital of an independent monarchy.

The great dome of Mahomed Shah's tomb is discerned from the village of Kunnoo, fourteen inles distant, and from the numerous spires, cupolas, and minarets that strike the eye, a great population is anticipated; but on entering the gate the illusion vanishes, for, excepting the receptacles of the dead, all the other buildings are more or less in a state of ruin. The walls of the outer fort extend eight

measured miles by the counterscarp of the ditch, and though decayed in many parts, there is not yet a complete breach through any part of them, mdeed, in 1819 guns were still mounted on them, and centinels stationed at the gates. Of these there are seven, viz. the Mecca, Shahpoor, Bhaminy, Padshapoor, Allahpoor, and Futteh gates, one being shut up. There were formerly a ditch, covered way, and glacis on the eastern face, but time has scarcely left a vestige of them. The inner fort or citadel is fast crumbling into ruins, and within its enclosure, the palace, or rather its ruins, is situated.

About five miles from the great western gate is a village called Toorvee, built on the outskirts of the former city. At this spot are still to be seen the remains of a loyal palace, of a mosque, and of various other erections of less note. To the east of this stands the Dirga of Chunda Saheb, a Mahomedan mosque—a mean structure, but still the resort of devotees; and in a hollow near it are the clegant mausoleum and mosque of Abdalla Khan, minister to one of the Bejapoor sovereigns. From hence to the glacis of the fort is a succession of rums, chiefly Mahomedan tombs, foreibly reminding the traveller of the space between Delhi and the Cuttub Mmar. The mausoleum and mosque of Ibrahim Adil Shah stand among the other rums of the old city, at a short distance without the western wall of They are built on a basethe fort. ment 130 yards in length and fiftytwo in breadth, and raised fifteen feet; inside 115 by seventy-six, covered by an immense dome raised on arches. The mausoleum is a room fifty-seven fect square, enclosed by two verandas thirteen feet broad and twenty-two feet high. The central chamber of the latter is quite plain, as is also the interior of the mosque, but in other respects these buildings excel in claborate architectural elegance, and might be advantageously compared with the most celebrated Mogul sepulchres in upper Hindostan. The fretwork of the ceilings of the verandas,

their pools entered with passings of the horse in hater's of and stone trilices pleated with a mechanic of Araba claracters are all in the highest still of control tenjorne. The observational control and small entering concress and small entering the properties of the properties of

The number of buildings presining in a tolerable state of preservation within what it called the fort of Bejapoor (for it is proverig a great city expanded by fortifications from mother still larger) to still very conside ra' le One entire and very regular street for nearly three miles, about fifts feet wide pased throw-hout and presenting many stone buildings, both private dwellings and mosques. There is also another after of this description, which runs parallel to the north hat somewhat more of trucked with rulded. The most remarkable ed fices within the fort are the tomin of Ain doi Hera and SI sh \cusor the low and municed or great mounter the ex-lebrated manuscieum of bultan Nah ground Shah the lowice of the Nao Bagh the town called the Opperer Hoori besidercolpshs mosques and municipums innumerable. There is also a low limdoo temple, supported by numerous pillars of single stones in the carbest and rudest style of Brah minical architecture aupposed to have been the work of the landous and this is almost the only llindoo strueture extant in or about Bejspoor The nilitary Khajoos, said to have been built by a sweeper is another of the currotities on occount of the ma sy stone chains that hang from its angle which must have been cut from solid blocks as no joining in the links is perceptible

This inhabited portion of the fort is chieffy in the vicinity of the great mosque. There are also groupes of houses scattered over its vast area and and invels are sees stuck op among the massy ruins. There are also some enclosed oud entireated.

felder but the space penerally is a ud ferom, emercia unh grais and shado and interspersed with trees If others the western gate there is a well-frequented lutar meatly built of stone which is new almost the sele tel s'ated quarter of what is ra'led the enty licermor as it now stilled to may be described as two er ters algoining each other that which le called the firt lung to the ea t so I the old cuts to the west. On the southern aide of the fort there are no traces of any arcient buillings or of the city walls the walls of the fort being the nithmate boundary of Be Ispoor in that direction lost of the large edifices (the palaces in the cita lel excepted) appear to have had I tile or no wood tired in their con struction the presails g character of the architecture being ratter massive noting wallow strong less that the ilon or cleant design There are some enormous guns still remaining beer corresponding with the Lief wear magnitude of the fort Lormerix there were Inche but in th'O only the great brave gun (cast in lot i) and the lone trin one remained I of the caldre of the first an Iron built weld in- \$10 lb would be required In 1523 the Bombay gosemment was extremely destrous of rending it to I me'and as a present to the bles but ontil the roads are Improved it would be almost Impossible to tran port such a ponderous mate to the sea-coast

Until 1818 this city was compre hended in that portion of the Bela poor province belonging to the Poon's Maharattas during which the ruins were the ooted haunts of thiever. who have been extirpated since the introduction of the British authority No regulars urrey of this quarter having ever been executed the post tion of this city is laid down in the tumps full twelve miles tienter the icoction of the Vinhaulia and Arlah na than it ought to be, and two-thirds of the towns and slilages placed in its vicinity has o either no existence or are minamed ne mi placed dutrict of Bejapoor is inhabited by

Canarese, who retain their own language and manners, and in 1818 joined Sir Thomas Munro to expel their Maharatta rulers. By Mi Chaplin in 1820 the Maharattas were reckoned to compose only one-eighth or one-tenth of the population, and were mostly soldiers and Brahmins.—(Fullarton, Moor, Scott, Sykes, Elphinstone, &c)

Bejapoor —A large subdivision of the Bejapoor province, bounded on the north, west, and south, by the Beema, Maun, Angurry, and Krishna rivers The chief towns are Bejapoor (already described), Huttany, and Mangulwara.

BEJAWLE —A town in the province of Allahabad, district of Bundelcund, twenty-four miles S. by W. from Chatterpoor, lat 24° 37′ N., lon. 79° 32′ E Ruttun Singh, the chief, is a dependent of the British government.

Besignus —A town in the province of Agra, situated on the south side of the Kohurry, and within the Maharatta territories south of the river Chumbul; lat 26° 4′ N, lon 77° 15′ E., eighty miles S.W from the city of Agra.

Brjour.—A town in the province of Allahabad, twenty-two miles S S W from Chatterpoor; lat. 24° 38′ N, lon 79° 27′ E.

Belan.—A town in the province of Agra, twenty-one miles SSW. from Kanoje, lat 26° 49'N, lon. 79° 33' E.

BFLAFOOR —An old Maharatta fortress in the province of Aurungabad, division of Callianee, now in a decayed state, which defends the entrance of the river Pan, below Panwell —(Fullarton, &c)

Belaspoor (Belaspura).—A town in the province of Delhi, district of Moradabad, comprehended within the Rampoor jaghire, lat 28° 55' N, lon. 79° 9' E.

Breasroon —A town in the northern Hindostan, the capital and resi-

dence of the Raja of Cahlore, situated on the left bank of the Sutulete (which is here about 100 yards broad when the waters are at the lowest), 1,465 feet above the level of the sea, lat 31° 19' N, lon. 76° 45' By Mi Foster, who visited it in 1783. Belaspoor is described as a well-built town, exhibiting a regularity not often met with in this quarter of Hindostan, and in 1819 it retained the same character. The streets are paved, though roughly, and the houses are built with stone and mortar. The Ranny, or princess of Cahlore (written by him Caloui) there resided, and possessed an income which he estimated at twelve lacks of rupees, but a tenth part of the sum would, probably, have been nearer the truth. In 1810 Belaspoor was said to contain 3,000 houses. 1820 Joudh Singh, a turbulent Seik chief, was fined and punished for systematic disobedience, and more particularly for aggressions committed against the Ranny of Belaspoor and her dependents. In A.D. 1822 this dependent Seik state of Belaspoor devolved to the British government, on the death of the Ranny Deo Koonwur. It was offered to Sobha Singh Kulsea, on condition that he relinquished all lands held under Rungect Singh, on the north side of the Sutuleje, who declined accepting it on these terms. It was in consequence retained at the disposal of government, with the view of being exchanged for some debateable tracts in the Bhatty country.—(Foster, Public MS., &c)

Belemcheroo —A small fortiess of a compact form in the Balaghaut ceded districts, situated on an eminence about fifty miles NE of Gooty, in the division of Curnoul.

Belgaum (Balagrama).—A small subdivision (or talook) in the Darwar district, province of Bejapoor, which consists of only three small hamlets, besides the cusba, or capital, being nearly surrounded by the Shahpoor perguanah belonging to the Putwurden family. In Hindoo geography it

is considered within the ancient region of Canara but very near the borders of Mahara htra and it is decidedly in the tract of rountry distinguished among the na lies at the "holun. The languages are Canarese and Maharatta The Ochry gravel is here so hard as to approach the nature of atone and when cut a few feet from the surface is carable of being formed into a astural brick, and it is of this substance that nearly the whole town of Releasen is built. The contrast between the lareness of the gravelly hills during the dry months with their verdure in the rainy acason is very great

Mearly the whole population in the town of Belgaum, which in 1820 contained 1,30° houses this stated by 7,502 persons one-shot Mahazattas, one-such Mahazattas, one-such Mahazattas, one-cucht Jaine, who have a regord iere; one-shot Brahum, and one-succenth the Jungum or 1 measure act; the remander coulds of vorticus descriptions of artisans. The houses are better than in most parts of loda, those of the upper classes being uniform, substantial and roomy and the lower classes respectable respective.

cottages, Formerly few coins were known in the bazar, but in 1820 the British troops here were paid in no less than twenty-one sorts of different coins affording an ample harvest to the money changer The working days of a Ihadoo weaver in this talook are estimated at 250 days per anoum; eighty five being dedicated to religious festivals deaths mar risces commemoration of ancestors &c. Belgaum is said to be the oldest town but most of the merchants and backers reside of Shahpoor Both exports and imports are confined to the ax fair months of the year the violence of the rains and badness of the roads putting a stop to all fur In 1820 there was ther locomotion an excellent road making to the Ramehaut to be continued from thence to the sea-coast .- (Marshall

Brtcaru.-A town and fortress in the firstell dutrict of Darwar province of Bejapoor 115 nules travel ling distance " W from the city of Bejapour, and forty three \ W from Darwar ; lat lo 32 \ inn 74° 42' L This place was captured in 1818 after the longe t resistance made by and of the Perhwa a forces it was found in complete repair, the walls marry and solid; the ditch broad and deep surroun led by an emlanade of 600 sanle and garreened by 1,600 men who only lost sevents killed and wounded during the siege, the interior being to extensive as to al ford alumbant mon to avoid shells. It had been long famous for the salu brity of its climate equal le temperature and the invigorating fresh ness of its atmosphere which peen liarly pointed it out as a suitable can tenment far troops the water else being excellent, and it was in consequence selected as a permanent mili tary station

This fort stands in a plain, and is a work of great strength and extent The ramparts are fixed with atone. fianked by massy roomi bastions and protected by an admirable wet ditch cut out of the rock with a sort of glatis and advanced work in front of the principal gateway Two ancient temples and the ruins of some native dwellings are still perceptible among the heaps of subbleh which encumber he large interior area. The rown of Helgaum (which in 1821 contained 7,652 persons) stands high and is within the influence of the sea breeze Mesterly winds prevail for olmost seven months of the year and ore succeeded for a short time by a north wind during the rest of the year the winds are variable but mostly from the east and south-east -(Fullarion, Blacker Marshall, &c)

BELOAUTENY.—A town in the province of Bengal, district of Rajdish; obsult forty-six miles E of Nation, and formerly the station of the commercial resident of Hurrial ofter wards incorporated with Commer colly

Belgram (Balagrama )—A town in the province of Oude, fifty-eight miles N. W. from Lucknow, lat. 27° 10' N., lon. 80° 5' E This town, though now reduced, is of some antiquity, being described by Abul Fazel in 1582, as very healthy and famous for producing men with melodious a rumous fort and moat. The dccayed buildings appear to have been in the best style of Mogul architecture, but the present inhabitants, few in number, dwell in small houses either of mud or wood This place is remarkable as having been the station first fixed upon for the British "advanced, force," in this quarter, which was afterwards transferred to Cawnpoor. — (Abul Fazel, Tennant, &c.)

Belinda.—A small town in the province of Allahabad, sixty-six miles south from Lucknow; lat 25° 53' N., lon. 80° 49' E.

Bellary (Valahari)—This revenue and judicial subdivision of the Balaghaut ceded districts occupies the western section of the province, but its limits have not yet been defined with sufficient accuracy Besides the lands attached to the capital, it comprehends Harponelly, Adon, Randroog, Gooty, and Curnoul, under which heads respectively further details will be found, and for a general view of the country, the reader is referred to the article Balaghaut. The principal towns are Bellary, Bijanagur, Harponelly, Adom, Gooty, and Curnoul, the chief rivers, the Krishna, Toombuddra, and Vadavati. Cotton is generally cultivated but not in large quantities, on account of the precarious nature, and the uncertainty as to its future sale In 1812, the quantity raised was estimated at 2,000 maunds, but it is supposed since to have greatly decreased In 1817, the total gross collection of the public revenue amounted to 981,221 pagodas, and in 1822, according to the returns made to government by the collectors, the total population amounted to 927,857 persons. In 1815, the

Madras government granted a remission of 2,092 pagodas, on account of the injury done to the crops by the pilgrimage of his Highness the Peshwa and attendants through the district to the temple at Soondoor. This, however, was not the whole loss sustained by the inhabitants who. voices, and it is still distinguished by happened to reside within the tract of these locusts, who had besides plundered them of their forage, poultry, and various other articles. In 1814, the judge of Bellary stated in his report to government that not a single application had been made to him for a punchait by any individual. whatever — (Hodson, Chaplin, Public MS. Documents, &c.)

> Bellary -A hill fort with a fortified pettali in the Balaghaut ceded districts, and at present the head-quarters of a civil establishment and military division; lat. 15° 5' N, lon 76° The fort is a quadrangular building on the summit of an isolated mass of rock, not remarkably high, but protected by three distinct ranges of works one above the other There is but one ascent to the top, partly formed by steps cut in the rock, and partly by scaling its irregular surface and taking advantage of its cavities. The pettah below is spacious, and contains a handsome bazar, besides barracks for the European troops, and houses for some of the officers, the principal cantonments, however, are without the walls. The general aspect of the spot is rather naked. but the officers' bungalows are neat white buildings, with tiled roofs, and gardens enclosed by little hedges of the milk plant. The cantonment bazar is ornamented with rows of trees, and is perhaps the widest, cleanest, and most regular military bazar in The lower fort at this place is considered by competent judges to be stronger than that at Gooty -(Fullarton, Sir Samuel Auchmuty, &c.)

Bellary (Valahari)—A decayed town in the province of Allahabad, thirty miles north from Gurrali, lat 23° 46′ N, lon 80° 20′ E From the extent of runs seen round this place, it probably at some furner period was of greater importance than it has kitely been a just it suffered greatly by the repea oil incursions of the I industries. To thence bloomtood are some fine I linder temples. A lattic to the south of Bellary, the province of Guadwana commences.

BELLANY PASE—A pass in Ceylon on the road from Columbu to Canda, altuated about ten makes 5 M from the last. The Bellany mountain is 7,000 feet above the level of the aca, yet the summit is thaded by noble forest trees the accounty beautiful and the sar cool and fresh—(Dary, &c)

BELLENCOROAN.—A tarm in the Northern Curcars, dutret of Guntoor thirty-aix onlets. We from that place; lat 16° 31 N., in 60° 3 k. At this place the country begans to assume a hully appearance as it recedes from the sea. The soil is black and covered with stones of different kands, among whech grow Indian corn and cotton but the tract generally may be considered as very supproductive. In the adjacent villages salt petro is mannfactured.—(Hayans, 46°).

BEHERR.—A town in the province of Lahare 103 miles north from the city of Lahores lat 33° 4 N., ion 74° E

BEMPORA ISLAND .-- One of the Ni cobar Islands, which see.

BENABES DISTOICT (or zemladary ) -This large division of the Allahabad province is altuated principally between the twenty-fourth and twenty-sixth degrees of north latitude When ceded la 1775 by Asoph ud Daylah the Nabob of Oude it was sobdivided into sixty two pergunnalis containing 12 000 square miles of which 10 000 composo o rich culti vated flat on both sides of the Ganges The chief modern subdivisions are the city and district of Beaures and the districts of Juanpoor and Mirza poor In the institutes of Acber. A.D Lo82 Abul Fazel describes the prosince as foliaws Circar Benares, cootaining eight mahala mea

enterent 170 663 begat revenue 8,169,318 dams. This circur for nihes 630 caralry, and 8 400 infan-

try "
The christe of Bensree, which in winter is so severe as to render fres agreeable becomes so heated for three months after March by the setting in of the hat winds as to destroy all verdure and would prolable be destructive to all I propean artificial grasses were they introduced. Turning radishes and a variety of greens and garden stuffs are raised by the natives but mostly for the consumption of Europeans, There is not much land onder rico cultivation, the chief agricultoral productions being larley wheat, and a species of the pea. A small quentity of flan is raised on the shirts of almost every field an account of the od its uso as an article of clothing nat being understood here 1 : ery field of barley contains a mixture of grain or pear; and at the distance of eight or ten fret a beautiful flowering shruh used in dieing is planted condiderable quantity of sugar is produced in this district and manufactured by a very slniple process a stone mortar and wooden pistan turned by two bullacks, the wholo not worth twelre supers constitute the most expensive part of the ma chinery, and the boiling pots are of the most common carthenware Here as In the West Indies the augur harvest is the joyous and husy senson The jamma or land assess-ment to the land revenue to 1813 was 40 70 124 rapees and the gross receipts of the whale zemindary 456 707 rapecs. Natwithstanding the odvantages that were supposed to attend o acttiement in perpetuity. the land reschue of the Benercy districts continued to fluctuate in its amount without improving and at the obore date was nearly half o luck below the rate originally assessed by Mr Duncan

From Pittin to Buxar Ghazipoor Benares and Mirzapoor, a rith country and much cultivation are seen while the numerous clumps of of mango trees give the surface the appearance of a forest, and afford an agrecable retreat to the cattle sides of the Ganges, a short distance above Mirzapoor, belong to the Nabob of Oude, and exhibit a marked contrast to the Benares districts, which in the general scale of prosperity yield to few within the British dominions, and are still gradually advancing in population, cultivation, commerce, and buildings, both do-The stone mestic and religious quarries at Chunar and Mirzapooi were formerly monopolized by the government, and either let in farm or managed by an agent; but in 1799, in order to encourage the excavation of the quarries, the whole were made free, subject to a moderate duty, which in 1815 yielded 37,000

runces.

Plain and flowered muslins, adapted to common uses, are manufactured in the northern, baftacs in the western, and sanaes in the eastern parts of the province. Tissues, brocades, and ornamented gauzes are the general manufacture A species of bitterish salt is made in different places, but much the greater proportion of what is consumed is now imported from Bengal, and from Sambher in Almeer. A great quantity of excellent indigo is annually raised and exported from Benares, which also furnishes a proportion of the government opium. The principal rivers are the Ganges, the Goompty, the Caramnassa, and the Sone, the two last being boundary rivers, and the country in general is tolerably well supplied with water The largest towns are Benares, Mirzapoor, Juanpoor, and Ghazipoor In 1801 the total population was estimated at three millions of inhabitants (probably under-rated), in the proportion of ten Hindoos to one Mahomedan in the towns, and twenty to one in the country.

The code of Bengal regulations has, with very little alteration, been extended to Benares; but in consideration of the high respect paid by the Hindoos to their Brahmins,

they have received some special indulgences in the mode of proceeding against them on criminal charges; and it has been further provided in their favour, that in all cases where by law a Brahmin would be adjudged to suffer death, the sentence shall be changed to transportation, or miti-gated, at the discretion of government. At the same time some evil practices of the Brahmins were put a stop to; one of which was the holding out a threat of obtaining spiritual vengeance on their adversaries by suicide, or by the exposure of the life, or actual sacrifice of one of their own children or near relations. was then ordered that atrocities of this nature should not be exempted from the eognizance of the magistrate (as they had hitherto been), or the usual process of the cuminal law The consequence of this interference was, that the frequency of the crime diminished so imperceptibly, that in 1801 only one instance had occurred in the populous district of Juanpoor within six months, on which occasion a Biahmin destroyed himself, and a relation buried his body at the door of the zemindar of the village, with whom he had a dispute. Voluntary suicide, however, still continued frequent, four or five persons destroying themselves in the same district each solar month. Another tribe of Hindoos, named Rajcoomars, were accustomed to destroy their female infants in consequence of the difficulty of procuring suitable matches, as is still the practice among the Jhareja chiefs of Cutch and Catty-From this practice Mr. Duncan, the resident, prevailed on them to desist, and his injunction has probably been effectual, as the continuance of it has ever since subjected the offender to the ordinary punishment for murder

Mansuram, the grandfather of Cheit Singh, possessed originally but half the village of Gungapoor, by addition to which, after the usual Hindostany forms, he laid the foundation of this enormous zemindary. He died in A.D. 1740, and was succeeded by his

Benasts City ( arausili J-The Sanserst name of this place is Vara-nashi, from Vara and Nashi two streams; and its geo-raphical pooltion is in lat 20 10' \ lon 63' 1 E. The Ganges here makes a fine sween of about four miles in length and on the courer side of the curre which is also the most elevated. stands the holy city of Renarce murgin is covered with houses to the water's calce, and the opposite shore being level the whole may be viewed at once Ghauts or landing-places, built of large stones are frequent and some thirty feet high before they reach the atreets. The erection of them is reclosed by the Hindoos an act of useful plety, which perpetuates their name

The streets here are so extremely narrow that it is difficult to penetrata them even on horseback houses are built of stone some alx stories high close to each other some of them fantastically painted with groups of mythological figures from the Ihodoo pantheon with terraces oo the summit, and very small wio dows to prevent place and inspection The opposite sides of the streets in some parts approach so near to each other as to be onited by galleries The number of stone and brick houses from one to six stories high exceeds 12 000 and the mud bouses to above 10 000 besides garden houses In general each story of a house is rented by a distinct family, and a great many of the large houses contain 200 persons. In 1803 (according to Mr Dean) the permanent

inhalatants, by conversion and cat! mate amounted to at 000 and we may now with safety wid an one to that me where which was exchange of the a tembets on their Mogul printer and several other foreigners i during feetsvals, the concourse is almost begood calculation. The Vahomedane are not supposed to be more than one in ten and there are said to be 8,000 house occupied by Brahmine who receive contributions although each I as a property of his own the aides natives from all parts of India consi lerable oumbers of Turks Tar tars, Persians, Armenians an leven I propeans are found in Bensres.

The mosaur with its minura was inuit by Aurungrebe to mortily the Hadoos Not only is it placed on the most elevated site and const i cuous from being close to the river, but the foundations are fald on a sacred spot, where before stood a Handoo temple which was destroyed to make room for the Mussulmann edifice. From the top of the minare there is an extensive view of tho town and adjacent country, and of the numerous Hindon temples sent tered over the city and its environs The I oropean houses at Scroli are handsome although they look naked for want of trees but this bareness is requise in India on account of the myriada of musquitoes and other insects winged and unwinged which their foliage would harbour Raja a residence la at finmnagur on the opposite side of the river, about a mile from the enty The I propent residents are not oumerous a judge collector register and assistants the members of the courts of circuit and medical men compose the whole government establishment; to which may be added a few private merchants indigo-planters and persons attached to the government mint Amidst such a crowd of notices and in so sacred a town It may be sup posed that meadieants are numerous many of the natives however pos ners large fortunes and ore actively engoned as bankers and diamond merchants for which gems (brought

mostly from Bundelcund) Benares has long been a noted mart. The land in and about the town being high priced and much sought after, and the natives constitutionally litigious, law-suits respecting their proprietary rights are unceasing.

At this city is still to be seen one of the observatories founded in different quarters of Hindostan by the celebrated Raja Jeysingh of Jeypoor. The greater part of the instruments are of stone, and some of them evidently intended for the purposes of judicial astrology; but the whole establishment has long been utterly neglected. Some miles to the east of Seroli there is an extraordinary monument, called the Saranath. appears to be a solid mass of masonry, from forty to fifty feet in diameter. originally shaped like a bee-hive; but the upper part has since crumbled down. Externally it is eased with largeblocks of stone, exceedingly well fitted and polished, and decorated near the base with a broad belt of ornamental carving, representing a wreath, and differing greatly from purely Hindoo sculpture. Indeed, it much more resembles the building seen by Mr. Elphinstone during his embassy to Cabul, of which he has given an engraving, and to which he ascribes a Greek origin. At Benares the Saranath is supposed to have been a Buddhist structure, from its resemblance to certain tumuli discovered in Ceylon, and in the Buddhist cave temples in the west of India.

Benares, or Casi, or Varanashi, the first being merely the Mahomedan misnomer adopted by Europeans, is lield by the Hindoos to be sacred for ten miles round, and the famous lingain it contains is said to be a petrifaction of Siva himself Another legend of equal authenticity informs us that Benares was originally built of gold, but in consequence of the sins of the people became stone; and latterly, owing to their increasing wickedness, has degenerated into thatch and clay. The Brahmins assert, that Benares is no part of the

terrestial globe, for that rests on the thousand-headed serpent Ananta (Eternity), whereas Benares is fixed on the points of Siva's trident; as a proof of which fact, they assert that no earthquake is ever felt within its holy limits, and that in consequence of its peculiar situation it escaped destruction during a partial cataclysm or overwhelming of the world. Most persons stay but a short time at Benares and then return to their families: but even so transient a visit secures the pilgrim entrance into the heaven of Siva. Some visit this sanctuary repeatedly, and one devotee is mentioned who had been sixteen times from Benares to Ramisseram, in the straits of Ceylon. There are regular guides or cicerones, who meet the pilgrims in the different villages through which they have to pass, and conduct them collectively to Benares, and many votaries resort here to finish their days, the Brahmins admitting that even the beef-eating English who die within its sacred limits may obtain absorption into Brihm. Some learned Hindoos relax so far as to admit the possible salvation of Englishmen in two other eases; if they become firm believers in Gunga (the Ganges), or die at Juggernauth: and they even name an Englishman who went strait to heaven from Benares—but it appeared that he had also left money for the construction of a temple.

The country opposite to Benares is called Vyasa Cası from the following legend. At a certain time, the great saint Vyasa, the compiler of the Vedas, being angry with Siva, began to found a city which should eclispe Benarcs. The destroyer (Siva) being alarmed, sent his son Ganesa, the god of wisdom, to thwart by artifice this intention, and lie, in prosecution of the design, became the saint's disciple, and asked him daily what would be the result of living and The query dying in the new city was repeated so often that at last the holy man lost his temper, and in a fit of rage exclaimed that in the succeeding transmigration they would

he born asses, and in consequence abandoned his design. At present some runs of temples are to be seen but on account of the above another and an unnecessary apprehendion of future deterioration few persons choose to reside on a spot thus cir runstanced.

Benares has been long celchrated as the revered seat of Brahminical learning and is still reckoned so hely that several foreign Hindoo rajas here, who perform for their em ployers henefit the requisito sacrifices and oblations In 1801 besides the public college for Illindoo btersture, lastituted during the residency of Jonathao Duocan, Esq., there were in the city private teachers of the Illudoo ood Mohomedan law t and of the first 300 were stated to he eminent the oggregate of their pupils amounted to 6 000 Frem o prevailing idea that If they were to receive ony remuneration from their disciples the religious ment of teach log the vedas would be lost, they occented of nothing from their scholars trusting to donations from pd erims of rook and to regular salaries assigned them by different Ilindoo princes such as the Rajas of Jeypoor, Tanjore and some Maharatta chiefs.

In 1811 it was found necessary to revise and new model the regulations of the Hundoo College to adapt them to the prevailing habits and omalous of the natives and to correct abuses. of which the following were tho most remarkable The samo prejudice existed then as in 1801 against tho function of professor considered as an office or even a service and tho most learned puodits had invariably refused the employment although the salary was liberal That part of the pisn that supposed the attendance of teachers and pupils in a pubhe hall was found altogether meonsistent with the Brahminical teneta. and in reality not only ocver took place but tended to prevent the professors giving instruction at their And lastly feuds had own houses arisen and embezzlements taken place

omong the natire members of the col Sarious men ures were then lege adopted by Lord Vinto with the view of remedying these defects, and renovating the tosto for Illindoo literature; but, under existing circumstances, this appears to be a hopeless task and a misdirection of the native studies which might be much more profitally applied to the Lugish lan-guage and Luropean science and lite-In 1801 there were thirty persons eminent as instructors in tho Mahomedan law; but they were mostly persons of independent property who held public employments ond gave Instructions gratis ing ond writing are taught here at the same time The boys are col lected on a smooth flat of sand, and with the finger or a small reed form letters in the sand which they learn to pronouoce at the same time, when the mace before each scholar is filled up with writing it is efficed and propared for a new lesson

A considerable tract of country adjacent to Beneres la subordinate to tho jurisdiction of its magistrate, and in a progressivo state of improve-The cultivation has every ment ' where extended an observation that may be opplied to the whole zemin dury, as except in pergunnah Chown sah, and among the hills to the south east of Chunar there is hardly a suf ficient quantity of uncultivated land for the grazing of cattle The most valuable articles of produce are sugarcace opium tobacco betel leaf, and

The onelent came of Benares was Cass or the splendid, which it still retains; but there are not any notices of it to the works of the ancient geo\_ruphers although they specify Mathora and Clusobarn, which lay near the Juona. It is probable that of the period of the Mahomedan Invasion it was subject to the Hindoo empire of Kanogi. In AD 1017 Sultan Mahmood of Ghazm took Benares ood the town of Cassimo or Cassimo now Patas, and penetrated as far as the country of Ouganam or Unja, to the west of the Cossimbarar river.

Next year he overran these countries again, proceeding east as far as Kisraj, or Cachcha Raja, or Cooch Bahar. From that date the Hindoos remained long unmolested, as it does not appear that the Mahomedans made any permanent conquests in this quarter before the end of the twelfth century, or about A D 1190, from which era it followed the fortunes of the Delhi sovereigns until it devolved to the British, with the rest of the zemindary, in 1775.

This eelebrated town has enjoyed the most undisturbed tranquility since it came under the direct government of the British nation, by the expulsion of Cheit Singh, in 1781. It has, in consequence, annually expanded in size, the buildings having united the neighbourhood with the body of the town, and as it stands at present, it is probably the largest and most populous city of Hindostan. The inhabitants, generally, are better informed than the common Hindostanies, and are fully sensible of the contrast between the British dominions and those of the native powers, with respect to security of person and property, and the tale of every foreign pilgrim assists to refresh their atten-The Benares court of circuit comprehends the following districts, viz 1. Mirzapoor, 2. Allahabad, 3 Bundelcund, 4 Juanpoor, 5 Goruckpoor; 6. the city of Benares.

The travelling distance from Calcutta to Benares is 460 miles; by Moorshedabad, 565; from Allahabad, 83; Buxar, 70, Bareily, 345, Calpee, 230, and Kanoje, 259—(Ward, Lord Valentia, Tennant, Lord Minto, Fullarton, Routledge, &c.)

Bencoolen (Bencaulu), or Fort Marlborough—The chief establishment possessed by the British East-India Company on the island of Sumatra, until it was delivered up, with all their other settlements on that island, to the Dutch, in A D. 1825.

The town and district of Bencoolen comprehend an area of about ten square miles, with a population of rather less than 20,000 persons, half

of which is concentrated in the town, and consists mostly of Europeans and their descendants, Chinesc, Neeassies (from Neas Isle), Malays, and negroes Neither cattle nor sheep are natives of the spot, the buffalo heing the only indigenous animal of domestie pecora, but it has not ever been subdued to the yoke. The only species of cultivation that has thriven has been that of the nutmeg and elove. In 1825 it was expected that the first crop would yield 89,000lbs., and the second 34,000lbs, besides 22,000lbs of mace The best and inost extensive plantations are worked by slaves, without whose aid the cultivation could not be prosecuted. The majority of these are from the island of Neas, some ooloo or country people, others Chinese, and some natives of Bally Menghering debtors are also a species of slaves, being obliged to exist and work entirely for the benefit of their creditors

The imports consist of cloths, lice, and salt, by the Buggesses and Bally traders, who take in return opium, English printed cottons, piece-goods, iron, steel, and dollars From Batavia are imported salendangs, handkerchicfs, tobacco, sugar, and various smaller articles, from Bengal, opium, taffaties, coarse cloths, chintzes, and white cloths, from Coromandel, salt, and blue and white piece goods and chintzes, from Europe, iron, steel, Aurora cloth, beads, brass wire, cutlery, and printed cottons, and from the northern parts of Sumatra, gambir, salt-fish, oil, salted eggs, poultry, salted fish-roes, timber, and planks There is little or no intercourse with Bombay, the inland trade is insignificant, and the eastern trade in 1821 had greatly declined Such was the description of Bencoolen immediately prior to its delivery to the Dutch, on the 5th April 1825

This settlement was acquired in A.D. 1685, and so early as 1698 had already cost the East-India Company £200,000, and continued a most useless, unprofitable colony, until it was fortunately got rid of. So unenterprizing also were the settlers, that

Haccala, or Hauges Dees ) A large and important province of Hiedman situated towards the east emestrenty letween the twenty feet and twenty-seventh degrees of north is stude. To the north it is morth is stude I-worded by the deminions of Acresula billion, and Bootan; on the south ly the lay of Bengalt to the east it has Assem and the Burmese territonest and on the west the prosince of Rafar In length it may be esta mated at "Lo mire, by 300 the aver

are breadth.

The recognition position of Ben gal le assendarly happy with respect to security from the attacks of foreign Along the whole northern CHARMICA frontier, from Assum westward there rune a telt of lowland from ten to twenty miles in breadth covered with the most explorant vegetation, par ticularly a rank weed named in Hengal augea's grace, which sometimes grows to the belefit of thirty feet and fe at thick as a man a wri t and mised with these are tall forest trees, Beyond this belt rise the lafty mountains of northern Hindostan the population of which is but thinly scat jered an I partially enshard. On the south of Benyal is a sea-coast guard ed by shallows and impenetrable woods with only one port and that of difficult access. It is only on tho west that an enemy is to be appre hended and there also the natural barrier is strong and the adjacent countries sterile and thinly peopled The river Ganges Intersects Bengal ta a south-casterly direction, and separates it into two territorial diviarons, neatly equal in extent, and so protected that in case of invasion the exitern tract would remala ex empted from the raypees of war and present as asylum to the inhabitanta of the other more especially from the

rarages of esvaley
The area of Bengal and Bahar is 149,917 square miles, and with Benares not less than 162,000 square miles. The following proportions of this surface are grounded upon many surveys, after making allowance for large rivers.

According to another calculation Bengal contains 97,244 square miles; if from this that portion of Tipera which is independent, the woods called the Sunderbunds, and other wastes, equal to 13,244 square miles, be dedubted, the remaining inhabited country will be equal to 84,000 square miles, but the extent of waste and surface occupied by rivers, marshes, &c seems here greatly underrated.

Prior to the cessions made by the Nabob of Oude in 1801, the country immediately subordinate to the piesidency of Calcutta, or, as it is termed in the official records, Fort William, comprehended the entire soubahs of Bengal and Bahar, with the large zemindary of Benares (in Allahabad), and Midnapoor (in Orissa), besides some tracts of country which had maintained their independence during the most flourishing periods of the Mogul empire. For many years after the British conquest, the revenue being collected, and justice administered through the medium of native agents, the original Mahomedan fiscal divisions into large zemindaries were allowed to continue unaltered; but subsequently, when it was determined to introduce an improved system of police and jurisprudence, the province was subdivided into the following seventeen districts, each of which will be found described in its place.

Backergunge,
Birbhoom,
Burdwan,
Chittagong,
Hooghly,
Jessore,
Mymansingh,
Moorshedabad,
Nuddea,

Purnea,
Rajshahy,
Rungpoor,
Silhet,
Tipera,
24 Pergunnahs,
Midnapoor,
The Jungle Mahals.

The average area of a district may be estimated at 5,500 square miles; when they greatly exceed this, it is owing to the extent of waste and wood lands; when less, to their being attached to city courts, or being otherwise peculiarly circumstanced.

The first aspect of Bengal suggests for it the designation of a flat cham-The elevated tracts paign country. it contains are only an exception to the general uniformity, and the mundation which annually takes place in the regions watered by the Ganges seems the consequence of a gradual descent, and does not any further invalidate the notion of a general level. The tract of annual mundation was anciently called Beng, whence probably the name Bengal was derived, the upper parts of the province not liable to inundation were called Barendra.

Rice, which is luxuriant in the tract of inundation, thrives in all the southern districts, but ascending the Ganges, it is observed gradually to yield the first place in husbandry to wheat and barley. The mulberry acchmated in the middle districts of Bengal, shows a better defined limit when it meets the poppy, which is peculiar to the northern and western provinces In the opinion of the Hindoos, the resort of the antelope sanctifies the country graced by his presence · a sentiment more connected with physical observation than The wide with popular prejudice and open range in which the antelope delights, is equally denied by the forests of the mountain and the inundation of the fen.

Throughout the whole province there are not any hills of considerable elevation to be found, and but for the extreme flatness of the southern quarter wen I group deprive the pane of Income less than I M. The period cal winds that prevail in the Bay of Beneal extend their Infloence over the flat country, until ti cy are diverted by chains of mountales into another direction, nearly correspondent however with the course of the Garges; for when a prosince is traversed by large sivers It Is probable that the winds are much Influenced by the tendency of these In the south of Bengal the CONTAC prevailing winds are north and south: in Bahar rast and west ; and the same takes place in Assam, fullowing the direction of the Brahmanutra Bengal northerly and southerly winds blow sitemately, during unequal por tions of the year over that quarter of the province that faces the head of the boy The seasons of Bengal con form nearly with these changes of the

prevailing winds, and are usually distinguished by the terms cold, hot, and

rainy

In the beginning of April, and sometimes earlier, particularly in the southeastern quarter of Bengal, there are frequent storms of thunder, lightning, wind, and rain, from the northwest, which happen more frequently towards the close of the day than at During this, much any other time. attention is required in navigating the These squalls moderate the heat, and continue until the setting in of the periodical rains, which generally commence early in June. the rains break up in the beginning of September, the weather is intensely hot, and the inhabitants, especially the European part, become very sick-The natives from the result of their own experience assign six scasons to the year, each containing two The spring and dry season occupy four months, during which the heat progressively increases, until it becomes almost intolerable, even to those born in the country. In the middle districts it is lessened by occasional thunder storms, named northwesters, and in the eastern mild showers of rain are still more frequent, and refresh the earth

The scorched inhabitants are at length relieved by the rainy season, which in general commences nearly at the same season throughout the whole province. During the two first months the rain is heavy and continual In this period an interval of several successive days is rare, and the rain pours with such force and perseverance, that three, four, and even five inches of water, have been known to fall in a single day. In the two following months the intermissions are more frequent, and of longer duration, and the weather more sultry The rivers, and especially the Ganges, which begin to rise even before the commencement of the rainy season, continue to increase during the two first months of it, and the Ganges reaches its greatest height in By this time the livers of the third Bengal are much swollen, and the Delta of the Ganges overflowed.

The average annual fall of rain in the lower parts of Bengal is seldom short of 70, and as rarely exceeds 80 inches.

About the middle of autumn the rivers begin to decrease, and as winter approaches the showers cease to fall, and the inundation gradually drains off and evaporates Fogs, the natural consequence of such evaporation in cold weather, are frequent in most parts of Bengal Proper. Dew at this season is every where abundant and penetrating, and in the higher latitudes of India, as well as in the mountamous tracts, frost and extreme cold are experienced. Even in the flat country it is obtained by the simple artifice of assisting evaporation in porous vessels, although the atmosphere be much warmer than the freezing temperature Throughout the whole winter in Bengal, dews continue copious, and greatly assist vegetation, affording nearly as much moisture as eorn requires in so loose a soil. The barometer here is remarkably stationary, standing within a few tenths of an inch of the same height throughout the year, and exhibiting within these narrow limits the phenomenon of diurnal tides.

As the damp of the climate cannot be ascribed to any inherent moisture of the earth, it must originate from causes on or above the surface; to the want of a general system of drainage in so level a country, to the iuxuriant vegetation, and to the closeness of the woods, which, not being adequately opened, obstruct the ventilation of the surface, and retain a redundant and unwholesome quantity of moisture, amidst rotten leaves and putrid vegetable substan-In the cold and dry seasons the heavy dews are probably not more than sufficient to supply the daily exhaustion of the sun, and probably rather contribute to salubrity than Under these circumstanotherwise. ces the principal experiments should be directed to draining on a general plan, and the cutting of broad, straight roads through the forests and jungles, as much as possible in the direction of the prevailing winds

In Benral and lisher only onethird of the land is estimated to be tilled but this is excluder of laye and follows In Logian! there are four arres of arable an I meadow land for every inhabitant ; in Ben-ai little more than one acre of tilled land for each Induidual. The patural seasome of rice are ascertained from the progress of the wild plant, which sons heelf in the first mouths of the winter, and vegetates with the carly moisture at the approach of the raise. During the period of the rains it sipen and drops its seed with the commencement of winter. But the common husbandry of Bengal sows the rice at the season when it would naturally regetate to gather a crop in the rains it also withholds seed

so effectoally. At the peacest a countplence the catt e tread out the corn or his staffel reshes out the smaller seeds. The practice of storic grain in sale terraneous boards with is frequent In Benares and the report provinces and also in the south of Inda, is not adapted to the deep climate and mout soil of Bencel, where grain is boarded above ground is round buts raised from the ground and in large piles, the self-renerated heat of which will not allow insects to lise within the hear. If rice be used too soon after It is ea hered (for instance one or two months) It has been found experimentally to be very unwholesome food.

In the management of forced race Irrestion dams and embankments retalo the water on extensive plains, or preserve it in lakes, to water lower land as occasion may require. Reservoirs, ponds, water-courses and di Les are more generally in a pro-rest of decay than improvement. The rotation of crops which engrosses so much the attention of colinh trocd cul tientors in l'urope, le not understood in Hindustan and a course of husbandry extending beyond the year was never dreamed of by a licard farmer Neither is he in the tuecersion within the year guided I y any choice of an article adapted to restore fertility to hand impoverished by a former crop. The Indian cultivator allows his field a lay but never a fallow The cattle kept for labour and subsistence are mostly fed on small commons, or other passarage or at home an cut grass. The cattle for breeding and for the dairy are grazed in aumerous herds in the forests or on the downs. The dong in place of being applied to the fields, is carefully collected for fuel. The Bengal farmer restricts the use of manore to sugar-cane mulberry, tobacco poppy, and some other articles

In Ben al many tanks have been dug, which are frequently used in aupplying the inhabitaats with water not only for domestic purposes, but also for arrightion. But astentation and the love of fame have in some parts increased the oumber and mre-

of these exceptions to a destructive extent, no one being interes ed in their regule which is not productive of any equitation. Almost every tark therefore, is soon shoked up with aquatic plants and becomes a suster of tile smells had water an ! distensives and there being many more tanks then are remainte, ranch land is thereby lost to agracultore. In some tarts of the province the tril I as reached to such a pitch that the demne of a new tank outht to be probleted unless the necessity for blished, and security or his to be taken for he being kept in proper repair and free from noxlous weeds. At present the only measure taken by the natures for this purpose in large tanks is to place a quantite of mercury at the hottom of the tank on its first formation; and although rumberiess examples of the lartificacy of this absurd espedient duly accur the excavators continue perfectly credolous.

The simple tools employed by the native in every art are so coarse and argamently on inadequate to his pur pose that it creates surprise how he can effect his undertaking; but the long continuance of feeble efforts accomplishes what compared with the means appears impracticable plough Is the lastrument that stands most in need of improvement readiness with which the Indian can turn from his osual occupation to any other branch of the same art, or to a new profession is characteristic of his country and the success of his ear-Hest efforts in any employment new to him is daily remarked with won-The want of capital le maaufactures and agriculture prevents the subdivision of labour every manufacturer and artist working on lils owa account conducts the whole process of lile are from the formation of his tools to the sain of his prodisction. Leery inhouser and artizan who has frequently occasion to recur to the labours of the field becomes a husbandman

A cultivator in Bengal who employs acreacts employs one for each plough. × 2

and pays him monthly wages, which on an average do not exceed one runce per month, and in a very cheap district, the wages are so low as half a rupec: but the task on the medium of one-third of an acre per day is completed by noon. The cattle are then left to the herdsman's care, and the ploughman follows other occupations during the remainder of the day. Generally he cultivates some land on his own account, and this he commonly rents from his employer for a If the herd be payment in kind. sufficiently numerous to occupy one person, a servant is entertained, and receives in food, money, and clothing to the value of one rupee and a-half per mensem. The plough itself costs less than a rupce The cattle employed in husbandry are of the smallest kind, the cost on an average not being more than five rupees each. The price of labour may be computed from the usual hire of a plough with its voke and oven, which may be stated on the medium to be about 4d per day. The cleaning of the rice is executed with a wooden pestle and mortar, the allowance for husking it being nearly uniform, the performer contracting to deliver back fiveeighths of the weight in clean rice. the surplus, with the chaff or bran, paying for the labour. Five quarters of rice per acre are reckoned a laige produce, and a return of fifteen for one on the seed.

As a middle course of husbandry, two yearly harvests may be assumed from each field: one of white corn, and another of pulse, oil seed, or milet. The price of corn fluctuates much more here than in Europe, and has a considerable influence on the value of most other articles, though it cannot regulate the price of all. When the crops of corn liappen to be abundant, it is not only cheap, but wants a ready market, and as the payment of the rent is regulated by the season of the harvest, the cultivator thereby sustains considerable detriment. In Bengal, where the revenue of the state has had the form of land rent, the management of the

public finances has a more direct influence on agriculture than any other branch of the administration. The price of rice has rather diminished than increased since British conquest, nor has Bengal suffered a famine of any severity since A D 1770

The orchard of this province is what chiefly attaches the peasant to his native soil, although the seasons in Bengal are not favourable for the production of many kinds of fruit, owing to the rains occupying great part of the summer; and the heat of the spring is not sufficient to bring them to maturity before the rainy season commences. But he feels a superstitious veneration for the trees planted by his ancestors, and derives comfort and profit from their fruit. Orchards of mangoe trees diversify the plain in every part of Bengal, and the palmyra abounds in Bahar. The cocoa-nut thrives in those parts of Bengal that are not remote from the sea, and the date tree grows every where, but especially in Bahar. Plantations of areca are common in the central parts of Bengal, the bassia thrives even in the poorest soils, and abounds in the hilly districts. Its inflated corollas are excellent and nutritious, and yield by distillation an intoxicating spirit. The oil expressed from its seeds, in mountainous tracts, is a common subtitute for butter. Clumps of bamboos abound and flourish as long as they are not too hastily thinned. This gigantic grass is remarkable for the rapidity of its growth. Its greatest height (from forty to fifty feet) is completed in a single year, and during the second, its wood acquires all the hardness and elasticity which render it so useful. They supply the peasant with materials for building and may also yield him a profit, as it is probable a single acre of thriving bamboos produces more wood than ten of any other tree.

Potatoes have been introduced into Bengal, and apparently with the most beneficial effect. The quantity procured by Europeans at almost every, season of the year proves that they

are not unsulted to the climate and the small potatoe is little if at all in ferior to that of I'm land; just the eron being less abundant in the mar Let this root is generally dearer than rice. The watery insipldity of tro-pleal vegetables, is a circum tance universally remarked by Europeans on their armal in India. Asparagus, cauliflower and other exculent plants. are raised for European consumption but they are comparatively tasteless.

The profits of cattle consist in the increase of stock and the milk of buffaloes, which are grazed at a very small espense. The milk of the lat ter is universally preferred by the Ben galese and most other ilindostanles to that of cows which is emmoratively little used, although to a Furopean taste the first is insignd, and the butter made from it disagreeable Cat tle constitute a coolderable partion of the peasant a wealth, and the profits of stock would be much greater did the consumption of suimal food take off the barren cows, and oven that hore passed their prime This is not auffirient to render sheep an object of general attention. Their wool applies the home consumption of blankets, but it is too coarse and brings too low a price to afford a large profit on this species of stock

The native Bengally horse or tattoo is a thin Ill-shaped victous, and every way contemptible animal and is never used in a team bullneks being better adspted for that species of laboor The Bengally cart is nearly os bad as their plough with clumsy wheels and axietrees which never being offed moke a laud creaking noise; nor esn the nativo driver be prevailed on to alter what was the custom of his forefathers The elephants camels and oxen attached to the commissariat, are kent in excellent condition The buffle loes are generally of a dirty black colone with long semicircular horns which lostead of standing or bending forward, ore laid backwards on the neck so that when he ottacks he is obliged to pot his snout between his forelegs, to enable hun to point his

horns forward The Bengalesa sheen are naturally a thin lank, and dimi notice breed of a dark grey colour, beside which o Furopean sheep seems a monster in size but when fattened for table, the mutton equals the best of I urope, and greatly aur passes the generality

Pariah dogs infest the streets of all the towns in Bengal and the approach of evening is onnounced by the howling of jarkalls, which then quit their retreata in the jungles Apes and monkeys swarm in the woods and sometimes plunder the fruit shops of a village Being a sa cred animal the natives often voluo tarrly supply their wants ond seldom injure them The Brahminy or sa cred buil of the limitoon also ram bles over the country without interruntion. He is caressed and nampered by the people to feed him being deemed a meritorious act of religion The crow, kite masons (or grakle) hop about the dwellings of the Bengalese with a familiarity and senso of safety unknown in Eorope gantic herons (arden ardenio) are scen in great numbers and from their solemn military strate are named adjutants by the Furopean soldiera tonds anakes frogs ligards ond other reptiles, which are their food obound

The abundance of fish affords o supply almost attainable by every class, and lo the Ganges and its innomerable branches are mony differ ent Linds. Their plenty at some seasons is so great that they become the food of the poorest notives who are said to contract diseases from a too liberal indulgence The amollest kind are all equally acceptable in a curry, the standing dish of every nature fumily throughout Hindorian; and in fart with opilau comprehends their whole ort of cookery. The bickty or cockup is an excellent fish t as is also the sable fish, which is uncom monly rich, and cata best os a tama riad pickle But the highest flovour ed fish not only in Bengal but in the whale world, is the mengoe fish, thus named from its appearing in the ers during the mangoe scason, en it is a favourite dish (especially roc) at every European table It is narkable that the mangoe fish, alongh a sea fish, and found exclusivewithin the influence of the tides, s never been observed in the Krish-, Godavery, or any of the Deccany ers, nor in fact any where along the y except in Bengal and the rivers of n. The sable fish is also found in c Cavery. Mullet abound in all ers within a certain distance of the ı, and may be kılled with siiall shot they swim against the stream with eir heads partly out of the water. sters are procured from the southn coast of Chittagong, not so large, t fully as well flavoured as those of rope; turtle of a good quality om Cheduba and the coast of Ara-Porpoises abound in all the n ge rivers within 200 miles of the a, and alligators in almost every

ten by the inferior eastes.
The staple productions of Bengal
r exportation are sugar, tobacco,

Tobacco, it is probable, was un-

er, where there are also meredible antities of small turtle, which are

k, cotton, and indigo.

nown to India as well as to Europe fore the discovery of America. It pears from a proclamation of the mperor Jehanghire, mentioned by at prince in his own memoirs, that was introduced by Europeans, cier during his own reign (the beginng of the seventeenth century) or that of his father Acber. The indoos have names for the plant in eir own languages, but these names, ot excepting the Sanscrit, seem to corrupted from the European deomination of the plant, and not to s found in ancient compositions. he practice, however, of inhaling e smoke of hemp-leaves, and of her intoxicating drugs, is of long anding, so that tobacco, when once troduced, soon became general roughout India, and the plant is ow one of universal cultivation roughout Hindostan.

The sugar-cane, the name of which as scarcely known to the ancient

inhabitants of Europe, grew luxuriantly throughout Bengal in the remotest times. From India the plant was carried to Arabia, and from thence to Europe and Africa. From Benares to Rungpoor, and from the borders of Assam to Cuttack, there is scarcely a district in the province where the sugar-cane does not flou-It thrives most especially in Benares, Bahar, Rungpoor, Birbhoom, Burdwan, and Midnapoor, is successfully cultivated in all, and there scens to be no other bounds to the possible production of sugar in Bengal than the limits of the demand, and consequent vent for it. growth for home consumption and inland trade is immense, and it only needs encouragement to provide for Europe also, being cheaply produced and frugally manufactured.

Cotton is cultivated in Bengal, but the enormous quantity exported by sea is almost exclusively the produce of the northern provinces and of the Decean, which also furnish a considerable portion of that used for internal consumption. The names of cotton in most European languages are obviously derived from the Arabic word kutn, pronounced cootn. Some sorts are indigenous to America, others are certainly natives of India, which has at all times been the country most eclebrated for cot-

ton manufactures.

Europe was anciently supplied with silk through the medium of Indian commerce. The dead language of India (the Sanscrit) has names for the silk-worm and manufactured silk, and among the numerous tribes of Hindoos derived from the intermixture of the original races, there are two classes mentioned whose appropriate occupation was the feeding of silk-worms, and the spinning of silk. A person who feeds his own silkworms has full employment for his family. The rearing of them is principally confined to a section of Burdwan, and to the vicinity of the Bhagirathi and great Ganges, from the fork of these rivers, for about 100 miles down their streams. The stations where the East India Company a investment of all is mostly procured are Commercelly Jongerpoor Rau leah Malla, Hadanagore Huorpoor, and Costumbarar There is also a considerable quantity of a IL obtained from wild all a worms, and from these reared oo other plants besides the mulberry Noch silk of this kind supplies home consumptions much is imported from the countries situated on the north west border of Beneal, and the southern frontier of Benares; much is exported wrought and un wrought, to the western parts of India, and some cuters into mano factures much estremed to Europe Four crops of mulberry leaves are obtained from the same field in the course of each your-the liest in December 1

The manufactore of Indge appears to have been known and practised to iodis from the earliest period. From this country whence it derives its name I wrose was anciently sopplied with it wash the produce of America engroused the market. The sputted exertions of a few individuals restored thus commerce to Bernal solvel by the superior qualities of their manufactores; for so far a regards the cultore no material change has taken place to the practice of the

BStere

The principal food of the great body of people who inhabit this provioce is rice of which from the fer tility of the soil the combined result of an ardent sun, and the saturating periodical raios two crops are obtained annually besides a variety of other cerealis and pulse. The first harvest is gathered about the end of August; the second, whirli is the greatest lo December; the lesser articles from February until the end of April; so that the land yields its fruits almost the whole year general the supply is so abundant as to render Bengal the granary of India, and It is at very dutent intervals that o teason is not boontful The na tives from their Indolent and Improvident habits, never practised the precaution of keeping a stock of

grain in reserve, the knowledge of which onder a native government would have exposed them to list extertions. When a season of drow hi therefore intertence the ground is parched up and a scarrity enouge, which is aggrasted to the poor iy the artifers of the grain-dealers; abould a deafering of rain continue through two succeeding seasons, the grain in store would be wholly on egial to the supply of a people whose subsistence is almost entirely argetable.

The exportation of grain from the corn districts, and the returns of salt constitutes the principal offects of internal trade. The importation of cotten from the western provinces and the exchange of letel-nut, together with a few articles of less oote complete the sort ir for internsi con sumption I sece-goods, asik salt peter opens sugar and indico for merly passed almost wholly through the Cor pany a hander but now all sorts of traffic are much more oven and practued generally by every deects than of merchant Crain the internal commerce of which is en tirely conducted by the natives supplies the consumption of the cities and the export trade of Bengal: but except in cities, the great mass of the population is every where subsisted from the produce of their im mediato nei hbourhood

i'lein mosline distinguished by their various names, according to the closeness or fineness of their testure, as well as flowered striped checkered denominated from their patterns, are fabricated chiefly in the province of Dacen. The manufacturo of the thingest sort of that musiln is almost confined to that quarters other kinds more closely woven, are manu factured on the western side of the Delta of the Ganges : and o different sort distinguished by more rigid tex ture, does not seem to be limited to any district Coarse muslins in the shape of tuthans handkerchiefe, &c are made in almost every district. and the northern parts of Benares afford both plain and flowered muslins, which are not ill adapted for common use, though, like the European article, incapable of sustaining any competition with the beautiful and inimitable fabrics of Dacca.

Under the general name of calicoes are included various sorts of cotton cloth, such as baftaes, cossaes, &c, to which no English names have as yet been affixed, they are found every where, and are, for the most part, known in Europe by their Indian denominations. Pack-thread is woven in sackcloth in many places, more especially on the northern frontier of Bengal, where it is employed as clothing by the mountaineers. A sort of canvas is made from cotton in the neighbourhood of Chittagong, Patna, and some other places, and blankets for common use are made every where. A coarse cotton cloth, dyed red with cheap materials, is chiefly manufactured in the centre of the Doab: other sorts, more especially blue, are prepared for inland commerce and exportation, both fine and coarse calicoes receive a topical dyeing, with permanent and fugitive colours. The zemindary of Benares, the city of Patna, and the neighbourhood of Calcutta, are the principal seats of this manufacture of chintzes, which appears to be an original art in India, invented long ago, and brought to a perfection not yet surpassed in Europe. Dimities of various kinds, and damask linen, are made at Dacca, Patna, Taunda, and other places.

The neighbourhood of Moorshedabad is the chief seat of the manufacture of wove silk and taffeta, both plain and flowered, tissues, brocades, and ornamented gauzes, are the manufacture of Benares; plain gauzes are woven in the western and southern corners of Bengal The weaving of mixed goods of silk and cotton flourishes chiefly at Maulda, at Boglipoor, and at some towns in the district of Burdwan; a considerable quantity of filature silk is exported to the west of India, and much is sold at Mirzapoor, passing thence to Central Hindostan

Tusser, a wild silk, is procured in

abundance from countries bordering on Bengal, and also from districts included within its limits The wild silk-worms are there found on various soits of trees, common in the forests of Silhet, Assam, and the Deccan; the cones are large, but sparingly covered with silk, which in colour and lustre is greatly inferior to that of the domesticated insect. Its cheapness renders it useful in the fabrication of coarse silk, the production may be greatly increased by encouragement, and a very large quantity might be exported at a moderate expense It might be applied in Europe to the preparation of silk goods, and, nuxed with wool or cotton, form, as it does in India, a bcautiful and acceptable article of dress. The manufacture of saltpetre scarcely passes the eastern limits of the Bahar province, under which head (as also that of opium) it will be found described.

The export of hides from Bengal may be greatly increased. Including buffaloes, it is calculated that the Company's old provinces (Bengal, Bahar, and Benares) contain fifty millions of cattle, but until recently the demand was so small, that the currier frequently neglected to take the hide off the cattle that died a natural death. About 1797 some Europeans engaged in the tanning of leather, and the manufacture of boots and shoes, which although not so strong and water-proof as the British. answer so well that they have greatly reduced the exportation The natives have also arrived at considerable perfection in the fabrication of saddles. harness, and military accountrements, and other articles composed principally of leather. An excellent canvass is now manufactured in Calcutta, and sold much cheaper than that imported from Europe that freight is reduced to its minimum, corn of various kinds, and more especially ricc, admits of exportation, as also rum, little inferior to that of Jamaica, with liquorice and ginger, which last is annually exportcd in increasing quantities.

It is extremely probable that an-

notte, midder, coffee coces seeld peal and even ten would there io lints b India, which now complehends every sancty of climate The plant from the seeds of which arnot to is prepared is already enturated in Bengal and coffee plants have threen in botanical and private gerdens. Madder i a notice of the mountainous rerions bordering on Bergal and under the name of munleet is already a considerable article Various drugs used la of export dreing are sent to Lnaland auch as ralls, turmeric safflower and also merolelans, which are here weed in preference to galle Moranda roots, which give a permanent colone to cotton and blossoms of the arctanches, which give a durable colour to mil

Gum-stable and many other sorts of gums and resion for manufactures, are the produce of trees that grow anontaneously in Bengal besides a multitode of medicinal drugs and cume which abound in ilindostan and the adjacent countries. Ingetable oil, more particularly inneed, might be supplied from these prounces, which are also adapted for the cultivation of flav Tincal brought from the table-land of Tibet Is among the exports from Benesl and veertable and mineral alkalies may hereafter become a considerable article of commerce The fossil afkali is found in abundance, and the forests of Ben-gal are capable of furnishing potash to large quantities The preparation of sal-ammoniae might be advantageonsly connected with the maoufac ture of saltpetre

Beddes the articles above enumerated having reference principally to Bengal the Indian markets furnish some previously imported from China, the Eastern Idee, and Gulfor Persu, aloes, avasferlida, benzolin, camphor, cardamones, cassus lignes, cussia, and casela buda arrangoes covries Chilar root enumbar, clures, chinaman, outmegs mace elephants tech ratians mother-o pearl pep per, quickailver chubarb sago, sena mony, scnna, and suffrort and nurbi-

singly salie, consider, cummisseed and range other commodities which would occupy too much room to enumerate Of heavy and flas in all their variles and also of the different substitutes for these articles, Reveal produces a greater alundance than any other country. The true heaps i found in many parts, but is lattle used by the native, current for the seed oil as a medicine and i wan into alcating logistics of the mixed with the tool care of the hosts.

The exports to harope nod the United States of America still constitute the most considerable portion of the forega commerce of Rengal The trade to Chuna and the rast ward now takes percedence of that to the ceast of Loronandel which last has desindled away since the conquest of Mysore and settlement of the Larnstite, events that have emancipated Viadras, with respect to gralo, from her former dependence on Bra

cipated Viadras, with respect to gralo, from her former dependence on Ben fal Owing to its admirable facility of transportation by water the internal connectee of Bengel is very great,

commerce of Bengal is very great, but as may be supposed in a country so productive and thickly populated by far the most important interchange is to the article of mee Of this grain in Bengul there is annually a great ranation of price the difference between the months of July and December respectively being very remarkable and a source of great profit to opulent speculators but to the Indigent classes of cultivators of Infinite damage These last obtain rice for seed and for the consumption of their families, either by a ruinous mortgage of the ensuing crop, or at an exorbitant rate of interest in the month of July, a period when the price is almost uniformly at the high cst in January, when the principal harvest is gathered they are under the immediate necessity of seiling the produce of their fields to discharge the instalments then due as they have neither means to convey the crain to a distant market nor ecrources to enable them to postpooe its sale notif o more farourable pe-

They are thus compelled at once to glut a confined market with the whole produce of their village, where the only purchasers are the rich speculators, who are consequently enabled to fix the prices at their own discretion. The evil is less felt in the vicinity of great towns or navigable rivers, nor does the Calcutta price essentially vary at those periods which in the interior of the province are the cheapest and dearest of the year. An investigation, made in 1815, tended to prove that the ten years from 1793 to 1803 were collectively cheaper than the ten preceding and following, and that the price of rice and similar articles has not experienced any permanent augmentation since AD. 1761. 1793, the average prices of ploughing cattle have experienced a rise of seventy-five per cent; but the hire of coolies, or day labourers, in the country, has not altered, being still four and a half and five pons of cowries per day. The rise of wages paid to labourers by natives who cultivate their own lands has been, on the other hand, considerable. In 1793, an able servant received about four rupees per annum with his clothing and diet, whereas in 1814 they received six and eight rupees yearly, and in some situations even more. Near Calcutta in harvest time, the usual price of 640 seers of paddy or rice in the husk, is five rupees five

The inland navigation employs a great many vessels, and it is interesting to note, at a mart of great resort, the various constructions of boats assembled from different quarters, each adapted to the nature of the rivers they usually traverse The flat clinker-built vessels of the western districts would be ill adapted to the wide and stormy navigation of the lower Ganges. The unwieldy bulk of the lofty boats used on the Ganges from Patna to Calcutta, would not suit the rapid and shallow rivers of the western tracts, nor the narrow creeks that the vessels pass in the castern navigation; and the low but

deep boats of these districts are not adapted to the shoals of the western rivers. In one navigation, wherein the vessels descend with the stream and return with the track rope, their construction consults neither aptitude for the sail nor for the oar. the other, wherein boats are assisted by the stream of the creek, and opposed by the current of the next, as in the Sunderbunds, and under banks impracticable for the tracking rope, their principal dependence is on the oar, for a winding course in narrow channels permits no rehance on the Often grounding in the shallows, vessels with keels would be unsafe, and all Bengalese boat constructions want this addition so necessary for sailing.

These useful vessels are also very cheaply found. A circular board tied to a bamboo forms an oar, a wooden triangular frame, loaded with some heavy substance, is the anchor; a few bamboos lashed together supply the mast, a cane of the same species serves as a yard for the sail, which is made of coarse sackcloth; some from the twine made of the stem of the rushy crotularia, or of the hibi-The trees of the country afford resins to pay the vessels, and a platform of mats, thatched with straw, supplies the stead of a deck to shelter the merchandize. vessels are navigated with equal frugality; the boatmen receive little more than their food, which is most commonly supplied in grain, together with an inconsiderable allowance of money, for the purchase of salt and the supply of other petty wants. Fifty years ago, Major Rennell estimated the number of boatmen employed on the inland navigation of Bengal and Bahar at thirty thousand, but ten times that number would apparently be nearer the mark in such a region of rivers, where almost every cultivator and fisherman is also occasionally a navigator.

In the land carriage the owners of the cattle are also the principal traffickers, oftener purchasing at one market to sell at another, than letting their earlie to have to resident exerchants. They transport their secretarists on ourse trained to buy their postetimes but not frequently, on horse of the tattoo breed, and sail more tarrely on britance. The latter, although more don't are more dongs is not along travellers than the or and do not lears a much greater burden; leviles which they are too ford of fing down in the many saters they have to water him, then to wake

through with their loads The bi-bways throughout Bengal excent in the immediate elclasty of the principal civil and military stations are not generally in a condi dition for wheel carriages or for distant fournies. At present the braten pathway through Hengal directs the traveller but no artificial rosul or any accommodation and in the rainy reason his progress is almost wholly barred. The total decay of the pulhe roads most be ascribed to the want of sobstantial and durable ma terials for their continuction Beneal covernment have completed a toad from Calcutts to Benares but oren this road for the space of about seventy miles through the plains of Bengal is not passable for wheeled carriages during several months of the year A road to Jurgernauth has been recently constructed, and an officer is now employed in open ing a direct communication between Calcutes and Nappoor by a road intended to traverse the allds and fastnesses of Gundwans, which have for ages farmed an impenetrable bar

As yet Bengal may be said to have bot one hatbour of martime export, which is Calcutta althou, haquarerigged vessels of moderate burthen occasionally load rice in some of the Sunderbuod rivers and vessels of large dimensions are bould of and said from Islamabad the capital of Chittagong But the aggregators is to significant compared with the commerce of the great metropius, uoder which head some further details will be found

rier between Bengal and the Deceun

The original tonoper to which all in

ternal commerce seems to have been conducted in Bengal was at banta or even markers and this practice is at Il' very prevatent. These bants are held on certain days only and pre ersorred in be petty senders and traler who wish to direct of their commodities by retail They are number established in oven plans where a figural is erected to the exclusive of which the farmer brings the produce of his land the mechanic of his work there and the fish creen of his net On the feeticals of certain Hindoo gods unit of per sons reputed saints by the Mahomedans a great number of persons assemble at spots extremed peculiarly sacred, and traders embrace these opportunities of finding a market for their goods, in supplying the wants of the multitude in Bengal a barar is a daily market where things in common use are regularly sold, and it is not non unl to have them lo a haut, where a number of petty ven ders leasiles the established shop-Leepers frequent them In gunges or bunders the chief commodities sold are grain and the pecestaries of life, and they often include bazars and haots, where the articles are sold by retail and in great variety It is a very common termination for the names of towns in Bengal, where it is usually restricted to places that have water-carriage. Dakan a shop, and dokandar a shapkeeper are Pereian worder but until the arrival of the Alehomedane such establishmenta were probably very rare, or did not at all exist in Bengal where a vender sitting in the open air surrounded by his goods, was the original native manner of selling commodities; and in many parts of the province the number of shops is still remarkably amall

Oot of Calcutta and the two large cities of Dacca and Moorshealabad, the usual currency of Bengal is aliver and cowries; gold veldom appears, and copper has never been lottoduced bonto years ago gold to the provincial tracts was abundant, but has alace become very scarce, which becomes speedily depreciated. e country there is still a conble number of the old unl comage, which is subjected to y batta or exchange, but there nor transactions, and even some nsiderable magnitude, are setby cowries, which shell forms reellent medium of exchange g many nations widely sepafrom each other, and has the mendation of being altogther able. roughout the province there is informity of weights and meawhich not only vary in every et, but are different in the same et for different kinds of goods. are even different weights for me species, rice being sold by reight and bought by another. er are there any stamps on the its, which are usually bits of . There is no denomination of it greater than a maund, which bdivided into forty seers. al a factory maund weighs se--four pounds ten ounces, and tory seer one pound thirteen es; but the bazar maund is ten ent. heavier, and equals eightyounds two ounces avoirdupois. ds are sold by the seer or maund, is, by vessels supposed to conthese weights. The grain meaare of basket-work in the shape hemisphere, and are supposed, heaped, to contain a certain tity of rice in the husk. iring the Hindoo government, ers, or dealers in money, were ably of small importance, and n rank; but on the Mahomeconquest, commerce seems to increased, and to facilitate its itions bankers were introduced the west of India During the omedan sway the revenue was

tted to Moorshedabad by these

ers, but since the British ascen-

ortunate result for the poor. were greatly cheated in this ar-

eomnion silver currency is the

, however, a considerable por-

by the money-changers.

daucy this branch of profit has been lost to them in the provincial parts, where they are now chiefly employed by the landholders in keeping their rents, paying the revenue, and taking care of the surplus. Potclars, or money-changers, are a very numerous class, but many of them, having no shop, sit in the open air with heaps of covries placed before them. In the more rural tracts the money-changer goes to market with a bag of cownes on his head; if a rich man, with a loaded ox, which, if strong, may carry to the value of 150 rupees. All the early time of the market he sells cowries for silver to the people, and in the evening the various hucksters bring back their cowries and exchange them for silver, paying a batta in exchange each way to the potdar. In Calcutta cownes are reckoned thus, but in the country parts they are much cheaper: 4 cowries ..... 1 gunda.

20 gundas ..... 1 pon. 32 pons .. ..... 1 current rupee, less

than 2s (2,560 cowries) It is customary with the money-

changers to lend to all servants who

have monthly wages, and at the end

of the month, when the wages become due, they return the loan in silver; for all this class, if trusted, anticipate their income bourers among the natives receive their daily pay in cowries; the daily markets, even of Europeans, are made with these shells; they are distributed in alms, used on all occasions, and are, in fact, an excellent unforgeable eirculating medium, and a proof of cheapness in whatever country they form the common currency. The natives of course become well acquainted with their quality, and a Bengalese huckster refuses as stoutly a cowry with a hole in it,

The inhabitants of Bengal Proper are certainly numerous in proportion to the tillage and manufactures that employ their industry It has, however, met with checks, as happened in 1770, when it is supposed nearly

as in England a shopkeeper does a

Birmingham shilling

one-lifth perished by famor. In 1751 the same calamity prevailed, but in a much less degree; to 1707 many lives were fost to the eastern districts by inundation and in 1759 by a par tial searcity; but since the period last mentioned, an interval of thirty nine years, famine and even scarcity have been unknown a fact probabily not to be paralleled in Asiatre his-Various estimates of the total population have been made at differ ent times, but outil 1801 during the administration of the Marquis Nellesley, no approach to actual invest! gation was ever attempted. An io quity of this description requires to be cooducted with peculiar delicary, the natives in general being averse to even the semblance of unnovation and to any new arrangement that tends to bring them more immedi ately under the observation of the magistrate, or to impose on them either additional duties or expense. Neither can accurate returns be ex pected from the semindars who are icalous of the intentions and views of government. Different lodirect expedients have in coosequence been resorted to such av, a compotation from the quantity of sait consomed which being a monopoly could be ascertatoed with tolerable preci-Sign

to 1801 by the directions of the Marquis Wellesley, then governor-general, the Board of Revenue lo Bengal circulated various questions on statistical subjects to the maristrates and collectors of the different divisions with the view of ascertain ing the population and resources of their respective districts torns to these were with some valuable exceptions rather hastily made and without due coonderation of the subject: but it is remorkable, that all these pubbe functionaries, either from the fear of appearing to exaggerate or from the novelty of the subject, kept greatly within the real amount, which we shall exemplify by a comparison of their estimotes with others subsequently made, and uoder more isvourable circumstances by Dr Frao

cle Bachanan. In 1807, 1804 and 1802 the generations was deputed by the generation of the deputed by the generation to survey and report on the Bengal districts of little-point prosecution of which the pulse of feet more and Parinesh in the prosecution of which the pulse of feet more directed to render him every were directed to render him every acultance and to furnish him with every requisite record and document.

The resolts of his survey were most rolumnous, and minuto reports on the resources and actual condition of each district accompanied by statistical taides of the most elaborato description, comprehending not only the population of the whole but of every police subdivision und town of any importance or magnitude; and on the whole he was of onlinion that the total amount, us given in his tables, was not materially wrong, al though they might err in particular Instances Dr Buchanan was selected by the government for this deputation on account of the well-carned regulation he had sireally sequired for general knowledge, soundness of jodgment and habits of laborious research; and certainly no person of equal abilities, with the exception of Mr Bayley, ever directed so much attention to this particular object. or executed it with so many col-The result of lateral advantuges his investigation however gives so enormous u population, when com pared with prior estimates as utterly to astonish the mind; yet his conclusions succeeded a most severe examination of all the existing curcumstances, while others were made. mostly after very superficial coorders. then and somewere er idently the effit aroos of mere fancy and conjecture When we add to this, that Mr Bayley's subsequent sovestigation of the population of Burdwan to 1814 tend ed completely to corroborato Dr Buchanan's calculations, we must think then entitled to a decided preference. To render the subject more intelligible we subjoin the respective estimates of the magnatrate collector and Dr Francis Buchanan

Rungpoor District:
The Magistrate's estimate, 1801 1,000,000
The Collector's ditto, 1801
Dr. Francis Buchanan's ditto, 1809 2,735,000
Dr. Flancis Buchanan States, 100
Dinagepoor District:
The Magistrate's estimate, 1801 700,000
The Collector's ditto, 1801
Dr. Francis Buchanan's ditto, 1808 3,000,000
Purneah District:
The Magistrate's estimate, 1801 1,400,000
The Collector's ditto, 1861
Dr. Francis Buchanan's ditto, 1810 2,900,000

Bengal comprehends within its controlled hunts three large of let Laleuts, Daces and Voorsbehaled, besides many prospersons intend trading towns soot as Hooghly terriguner, Bogwangola, and Corsimburar, each containing a great propulation but of which no authorite returns have as yet been published. The full lowing is the number of Inhaleunit reported on very probable grounds to be resident in the cities and towns respectively to which the numbers are attached —

Chandercons .. .. 18 143 Villages of from 100 to 800 inhabitants are astonishingly numerous and lo some parts form a continued chalo of many miles along the lunks of the sirere, elimitar to what we find described to the most populous tracts of the Chinese empire. While passing them oo the Island navigation It is pleasing to the the cheerful bustle and crowded population by land and water; men, old women children birds and beasts all mixed and in timate evancing a consciousness of safetyandsecurityfrom oppression to be seen to no native governed terri Nor have the inhabitants of Bengal any real erris to complain of, except such as originate from their own propensity to litigation and from the occasional predatory visits of gang robbers and river pirates To protect them from the last partly owing to their own want of energy, the exer tions of the government and their servants to the magistracy have been most atrenuous ood continued with such increasing vigour, that there la at last a prospect of this desirablookject being accomplished With respect to the first the Bengalese are from

some laberent peculiarity cutremely prome to levil de putations and, politically pacific seem socially and domeritarily martial. Among them was receas fraitered into law and the ferocus passons dustried down to the likering and sualling of the hot and tallage. In the vocaleration they are gravily as itsel by the females who after the age of thirty generally turn transparts and become agutated by a furious spirit of discord which they rent lo such load recent, and lodecent railings as are no where else to be reralled.

In the recessoo system of Bengal the grot, or cultivator, is described as a tenant paying rent, and his supernor as a landdord or standholder; but strictly pealin. his payment heretofore was a contribution to the state levied by officers named semindary standing between him and the govern meet. In the role for the durishon of the crop, whether under special en gacements or by custom, their proportions are known, tree.

Half to the landlord and half to

One-third to the landlord and two thirds to the tenant.

The standard for the regulation of rates has been lost, but we learn from other sources that the assessment was limited not to exerced in the whole a fournly part of the octual gross produce of the soil. In early times the demands of the Illindoo soveregna were allil more moderate. The Mahabarat states that the prince was to lery a fidirely part of the produce of mines and o tenth of corn. Meno ood other legulators authorize the asteredga to esset an eighth, a tenth, ore twelfish of grain according to circumstance, and o sixth of the clear annual produce of trees.

With respect to the much-disputed nature of landed property in Bengal to one point of view, the zembndar, as descendante of the occuent independent Italias, seem to have been trabulary princes in another light only the officers of government; but probably their real character partook of the nature of both This, however,

must be obviously restricted to Ryns who possessed great zemindures. Numerous landholders subordinate to these, as well as others independent of them, cannot evidently be traced to a similar origin, and the Mahomedan sovereigns and governors of Bengal seem to have been altogether indifferent with respect to the mutations of landed property, provided the new proprietor paid his revenue

The zemindars are now acknowledged, for various reasons, and from considerations of expediency, which decided the question, as proprietors of the soil. Yet it has been admitted from high authority, that anciently the sovereign was proprietor of the soil; that the zemindars were officers of revenue, justice, and police, and that their office was frequently, but not necessarily, hereditary. To collect and assess the contributions regulated as they were by local customs or particular agreements, but varying at the same time with the necessities of the state, was the business of the zemindar, as a permanent, if not as a hereditary officer. For the due execution of his charge, he was checked by permanent and hereditary officers of revenue and account.

Various changes have taken place since the British conquest, in the mode of collecting the land revenue of Bengal. From 1767 to 1769 the collec-

tion was entirely under Mahomed Reza Khan. Mr. Verelst, in 1769 sent supervisors into several districts. In 1770 two boards of revenue were appointed, one at Moorshedabad and one at Patna. In 1772 Mr Hastings, in consequence of instructions from home, deprived Mahomed Reza of all power, and made Calcutta the seat of fiscal government. In 1773 the collectors were withdrawn, and six provincial councils appointed. these councils were withdrawn, collectors again deputed, and a supreme board of revenue appointed in Calcutta, which still continues. The total amount of the land revenue collected from 1772 to 1789 was remarkably equal, averaging about 295 lacks of current rupces.

In 1793, during the administration of Lord Cornwallis, the territorial revenue of the Company's old provinces (Bengal, Bahar, and Benares), which had before fluctuated, were permanently and irrevocably fixed, at a certain valuation of the property moderately assessed; but this permanent settlement has not yet been introduced into the territories subsequently obtained by cession and conquest. The mighty mass of papers, with which the agitation of this question crowded the East-India Company's records, proves the ability, labour, and anxiety with which it was discussed.

In the coded pravinces the public revenue has always been satisfactomly collected if compared with the collection only a few years ago in the lower districts even under all the advantages are ing from a permanent settlement. For a considerable period of time subsequent to the ennelusion of that acttlement the ultimate nr rears stand in a much higher ratio to the jumms than they did in the ceded districts a very few years after their negulation nor was it until the year 1800 that they were reduced within a moderate compass. Hence a new argument prises against a premature settlement in perpetuity of the apper provinces which under their present constitution are sufficiently prosperous the cultivation extending and the population increasing and becoming daily more contented and tractable all of which improvements have taken place under o system of temporary leaves and in salte of adverse and precarious acasons.

The Mahomedans from the begin

ning of their power employed tha Person language in the affure of government and notwithstanding its clumsy and cumbersome arithmetic in the collection also of the revenue. This practice aided them in maintain ing their outhority and coabled them instead of blindly depending on native functionaries, to look into the conduct and details of public busmess as well as to keep intelligible registers of the income and expen diture of the state The native Hin door finding that a knowledge of the language of government was necessary to every concern of revenue and

YOL I

fuetice, made exertions to semire it and la process of time became teach ers of it throughout the whale Mogul empire At present owing to this panetty of 1 propent agency and its enormous expense the size of the districts and the multifarious duties of the collectors it appears mani fest that these afficers can only la spect much the greater portion of business through the medium of natire servants that is to say through the falsest medium possible

Among the various pretexts adopt ed by the landowners in this province for reducing the revenue to a trifle one of the most cummon and successful is to write down a large portion of their estates as destroyed by nivers This furnishes a good plea not only far a deduction from the revenue assessment but keeps open a class for the lands that might be afterwards recovered In many cases this has succeeded as no additional revenue is exacted when o river ad is new lands to o zemindary; o gradual diminution of the agercgate revenue must be constantly taking place. Under these circum Under these circum stances the most substantial advan tages would be derived from regniar surveys of each district respectively undertaken by professional persons, and executed in a scientific manner

In Bengal the class of needy land preprietors is very numerous; but even the greatest zeminders are not In a situation to allow that indulgence and accommodation to their tenants which might be expected on viewing the nominal extent of their in come. Responsible to government 0

for a tax originally calculated at tenelevenths of the expected rents, and owing to their own dissolute habits, they have not usually any considerable surplus after their expenditure to compensate for their risk. Any accident, any calamity, may involve a zemindar in difficulties from which no economy or retrenchment can relieve him. Prior to 1790 half the revenues of Bengal were paid by six large zemindaries, viz. Rajeshahy, Burdwan, Dinagepoor, Nuddea, Birbhoom, and Calcutta.

Free lands are distinguished according to their appropriations, for Brahmins, bards, encounastics, asceties, priests, and mendicants, or as a provision for several public officers. The greater part of the piesent free lands in Bengal were originally granted in small portions of waste ground. The more extensive tracts of fice land are managed in the same mode as estates assessed for revenue, and the subject is adverted to in each

district respectively.

Sayer revenue of the nature of land rent, consists of ground rent for the sites of houses and gardens, revenue drawn from fruit trees, pastures, mathes, rent of fisheries, and other variable imposts Many aiticles of sayer formerly collected within the village have been abolished; such, for example, as market tolls and personal taxes. Ground-rents never were generally levied from cultivators engaged in husbandry. No branch of administration requires more prudence and circumspection, or a more accurate knowledge of the temper and character of the people of India, than the imposition of new taxes. and it is always preferable to seek an increase by the renewal of old, rather than the establishment of new taxes. The civil and domestic usages of the natives are so interwoven with their religious rites, and they are so particularly alive to every innovation or departure from established custom, that in fixing a tax on articles of general consumption, it is not to be considered whether it really be more or less oppressive than a tax

directly collected from the individual, but whether it be so felt by him nn impost on articles of consumption, the anbiect who is compelled by his inclination or necessities to the use of it, thus gradually and almost imperceptibly contributes to the revenue of the state; while a personal demand on him for the payment of a sum much less than the aggregate of what he indirectly contributes, may be considered by him an extortion, which he is warranted in evading if he can. Owing also to the abuses inseparable from all transactions carried on by native officers with small salaries, placed beyond the inspection and control of the Company's European functionaries, the community when a duty is laid on, have in general to pay almost twice as much as ever finds its way into the public treasury

A poll-tax called jaziyeh was imposed by the Khalif Omar, on all persons not of the Mahomedan faith. The Mussulmaun conquerors of Hindostan imposed it on the Hindoos as infidels, but it was abolished by the emperor Acber At a subsequent period Aurungzebe attempted to revive it, but without success In addition to the other sources of revenue, the British government levy a tax on Hindoo pilgrims, in continuance of former usage, at Gaya, Juggernauth, and Allahabad

The civil and military government of the territories under the Bengal presidency, now comprehending the richest portion of Hindostan proper, is vested in a Governor-general and three councillors. Vacancies in the council are supplied by the Court of Directors, with the sanction of the India Board, from civil servants of not less than twelve years' standing. For the administration of justice throughout the subordinate provinces, there are in the civil and criminal departments one supreme court, stationed in Calcutta, and limited in its jurisdiction to the Maharatta ditch; six courts of appeal and circuit. the Calcutta, Moorshedabad, Dacca, Patna, Benares, and Bareilly; and fortyseven nilabani eny courts, stationel a followat

The city courts are :

Benares, Moor hed.had,

Docca, Patna,

The courts of circuit con it of three judges with a re-i ter, to-ether with nature officers Mehomedan and llindoa The judges make their ear cur and ataled berrode, and also hold regular and frequent gool deliveries They try enmiral offences according to the Mahamedea Lan ; but when the scatence is capital, or imprisonment is awarded beyond a defined period It does not take effect until it secrites confirmation from the asperior erlminsi court stationed in Calcutta and named the Sudder \usamut Adamiot, or chief criminal court The practical business of this court in to reviso trials; but it is in no case permitted to aggravate the severity of the sentence

In the provincial districts the officer who in bis ermisal capacity has the appellation of magnitume is also the civil judge of the district or city in which he resider. He tries all suits of a civil satore prosided the cause of actions has orisen the property ensecence be suitated or the defendant be resulent within his jarisdiction. To try suits of a small amonout the julger may appoint my

the entirely slowers, from whose decisions an appeal lies to the judget and such a few exceptions the decusers of the judget are appealable to the pensistral courts of circuit within the lounds of which he reides, back distinct court has a register with one or more well-stratified among the justice full versacts and each court is pensified with as free day qualified to expose the limiton and Mahorotters law.

In criminal matters the magistrates of de tricts are see of with powers to apprehend and examine all often dees. Oo s'util offences they may fact and execute sentences to cases of greater a rocky it is their in iness to secure the commend de nevents which is effected by committing or holding to buil Lach rillsh or district is subdirided fato portions usually about twenty miles aquare and In each of these a darorsh or head police-officer, i established armed followers who is empowered to apprehend on a written charge and to take accusty when the offence ir builable for appearance before the The average size of a marnirat? Beneal district may be taken at 6,000 servare miles : but in particular instances owing to the great extent of waste and woodlands or the reverse the dimensions vary extremely Burd wan coatalesonly 2 400 and flamphur above 10,000

The will mate court of appeal in cut in sters out is the cuty of Calcutta and is styled the Sudder Downing Adam in or chief evil court. To this court all causes respecting personal property beyond 5000 repeated to real property, it is calculated by certiss tules differing according to the assure and tenure of the property. From this court as appeal lives to the Ample courts and the court as appeal lives to the property concerned amounts of & 000

Under the Mahomedan government sultors pleaded their own causes and the practice continued until 1703, when regular native advocates were appointed These pleaders are usually selected from the Mussulman college at Calcutta, and Hindoo college at Benares, and the rate of fees is fixed by public regulation. This institution ensures suitors against negligence or misconduct, on the part either of the judge or his native assistants, the advocates being often as conversant in the business of the court as any of the public officers As an ultimate security for the purity of justice, provisions have been made against the corruption of those who administer The receiving of a sum of money or other valuable gift, or under colour thereof, by a British subject in the service of the government, is deemed to be taken by extortion, and is a misdemeanor at law.

Written pleadings in the native languages have been introduced, for the purpose of bringing litigation to a point, and enforcing in legal procecdings as much precision as the habits of the people will admit Before this modification, the charge and defence consisted of confused oral complaints, loudly urged on the one side, and as loudly contradicted on the other. In receiving evidence great indulgence is granted to the scruples of easte, and the prejudices against the public appearance of females so prevalent in Select eases, eivil eastern countries and criminal, are annually published, which reports, by diffusing a knowledge of the legal principles established in the courts of the Sudder Dewanny and Nizamut Adawluts, are productive of essential benefit in the gencral administration of justice, and tend to prevent litigation, to which the natives are so prone, that in some districts they might almost be reduced to two classes, plaintiffs and defen-The Marquess Cornwallis, dants. about 1793, allowed all causes to be filed without expense, and the consequence was that the courts were soon overloaded An institution fec was in consequence established, with a retrospective operation, and the result was that in one day, and in one court, no less than 14,000 causes were struck off. What must the

effect have been in the whole pro-

The Mahomedan law constitutes ostensibly the ground-work of the criminal jurisprudence of the country; but although the name and many of the external forms of that code be retained, its execution is so corrected in essentials that it may more properly be regarded as the administra tion of British eriminal justice. present the system of eriminal law, as promulgated in the provinces subordinate to the Bengal presidency, is in reality a system of junisprudence founded on the natural principles of justice; which form, or ought to form, the base of every criminal code civil matters the Hindoos and Mahomedans substantially enjoy their rcspective usage. The prejudices of both are treated with indulgence, and the respect that Asiatic manners enjoin to females of rank is scrupulously enforced

In the eriminal department, no offence has occupied so much of the time and attention of the government and its functionaries as dacoity or gang robbery, which for an astonishing length of time baffled the united efforts of every department; but at length, by unremitted preseverance and vigilance, if not wholly eradicated, it has been greatly diminished. Indeed, gererally speaking, this scourge, under which Bengal suffered from the first acquisition of the province until it had reached its acmé in 1807, has beengenerally suppressed. Robberies, in the ordinary sense of the expression, are still committed, but dacoity, considered as a crime distinguished from all others by its peculiar malignity and by involving the perpetrators in other crimes of a most atrocious and sangumary character, has been nearly extinguished The Sunderbunds have always been regarded as peculiarly adapted for the reception and concealment of river pirates: yet even in this labyrinth of wood, water, and rank vegetation, great progress has been made in the attripation of gaing robbery.

In the ceded and eonquered pro-

vinces although less progress has apparently been made in the supportssioo of crimes than in the old term tones yet manifest traces are per ceptible of the inflorace of a regular system of civil polity on the great mass of the people. On the first acquintion of these provinces, one of the greatest crils was the private war which the proprietors of estates and individuals carned on against each other Vindictive assessmatlon for real or imaginary injuries, was also a crime of frequent occurrence; and both enormities had their origin in the same cause, raz, the weakness of the preceding governments and the want of regular tribunals to take cognizance of wrones committed by Individuals on their fellow aubjects, Considerable progress has been made towards the suppression of both these crunes; but murders, perpetrated by a class of people named Thurs, atill continue in spite of the increased ex ertions of the police. In the upper provinces highway robbery and gang robbery are seldom known to prevail together; the first usually commencetog when an effectual check has been given to the last.

As decests of gang robbers occupy so prominent a part to the criminal jurisprudeoce of Bengal a few more observations towards the development of their character may be usefully croployed Sixty years ago tho rivers of Bengal were nearly impassa ble for unarmed boats, on account of the temente bands of pirates who roamed u ochecked through every part of the province; at present except occasionally in some largonyers near the sen, the inland navigation is wholly free from every persious obstruction Among the dacolts in Bengal many instances occur of whole families practising robbery from generation to generation and individuals among them boast that their progenitors were hanged, or died in perpetual imprisonment Their leaders succeed each other like officers of o regular establishment, and being all predestinarians, they ore lodifferent 29 to the result of their hazardous

career Aor do they attach obloquy to the name of daroit : In that chararter they are something; as la bourges or cultivators nothing sales this they to the last entertain hopes of escaping punishment either by figing for concealment to the erreks woods, jungles, or low islands overgroun with rank weeds; or when captured by the expectation that the terror their namo inspires will prevent evidence appear ing sgainst them When they are at last brought to the fatal tree, tho decosts who suffer capital punish ment meet their fate with the great est fortitude and the exhibition is considered by the lookers-on as a sort of gratis entertaioment Tho penitence and contration shows by erminals in Fraland, when the sen tence is on the point of execution, and which makes such a actious and estutary impression on the spectators Is never observed in thus country, where in fact frions are much more afraid of transportation than of death

In Bengul, robbers are not ahunned and hated as in Europe On the con trary, they have homes often land and cattle and are not only associated with but are frequently men of lo fluence in their villages although their profession be universally known This can only be ascribed to a general absence of the moral principle, which applies to the Vishomedana as well as in the lindoos, the lower classes of the former having evidently adopted many of the worst practices of Hindoo idolatry The decasts of both religions are not noty unrestrained by terrors of conscience but affect to sanctify their execrable deeds by of ferings and invocations to the god dess Call; and that human blood is now seldom shed on these occasions, is to be attributed to the introductlen of the British system of police which with all its defects, is perfection compared with that which proceded it The great mass of Bengaless are certainly not constitutionally brutal or mexorable on the contrary, they are usually mild and placable yet it mutt be admitted, that the cri

ninal h such instances of eruelty and furnisty, as perhaps the history of no feroclary in Europe can parallel

coun the universal prevalence of per-Tomay also be attributed the long jury inuance and existing frequency conting 1 obbery; and to such a pitch of ganameless audacity has this crime of stattained, that the judge is often long ed to investigate the character oblighe witness with more anxiety of that of the prisoner than hindary dewan, by caste a Braha zer after having circumstantially min, n to the nature, number, and sworors of the wounds inflicted on authof his cutcherry (office) servants, two ed to have been muidered in an allegapt to dispossess him of the cutattery, scarcely blushed when the cher men were produced alive and .twourt in court, and merely pleaded unhistenuation, that if he had not in as he was instructed he would swo lost his place The little oblihavon attached by the natives to an gatin, appears in a great degree to oatheed from the nature of their suprostition, and the degrading attriperes of their deities, as well as the but'll absence of moral instituction -totin their system of education, and irolnecessarian tendency Hence orıits ates the general exclamation of gin ninals, when convicted of murder, crit it was their destiny, and they thalom or never acknowledge any seler motive It is probable that in othe the exemplary punishments intimted will deaden the alaciity with

hay solid improvement of character and There is no crime more frequent Bengal and Hindostan generally, in the murdering of children for the sake of the gold and silver or nathlats, with which, in spite of every

flicich cumes have hitherto been com-

whited, and the steady and just admi-

miltration of the laws go a certain

nisy towards imbuing the inhabitants

exhortation on the part of the British functionalies, they persevele in adorning them These horrid crinies are usually perpetrated by friends, neighbours, and relations, unable to resist the tempting opportunity, and the parents would almost appear voluntarily to dress out their child for a victim The frequent occurrence of the crime, attracted at different periods the attention of the government, and the courts of circuit were consulted as to the nossibility of suggesting any preventive expedient, not likely to excite dissatisfaction among the natives by such interference with their domestic usages. Nothing, however, could be devised except increased vigilance in detecting, and rigorous enforcement and publicity of the punishment

Constituted as the government now is, the zemindars could not with justice be made responsible for the property plundered on their estates, unless they were authorized and requiled to retain establishments for the seizure of public offenders: an arrangement that would in effect transfer the charge of the police to the zemindars, and again open a door to all the abuses committed by them in former times, when they were entrusted with the police of their iespective estates. At present it scarcely ever happens that the zemindars resist the execution of a decree of the civil court, or assemble their people afterwards for the purpose of fighting and dispossessing the person in whose favoui the decree had been awaided. By this class, however, the large portion of lands, allotted during the Mogul government for the maintenance of village watchmen, have heen long ago appropriated, and have wholly disappeared from the public records It is consequently to be apprehended that if waste lands were again set apait for that purpose, a sunilar absorption would take place as soon as they had attained a ceitain stage of cultivation

Much might be said respecting the chriacter of the Bengalese zenindars, a most important class of natives, but

It is very difficult to render the subject intelligil le to Luropean readers. like the great ma s of the people & Bengalese remindar enjoys only the present hour le improvident of the future, and mo t of them are more puppers in the hands of the unprincipled managers of their cets es They are consequently soon involved in difficulties from which they are un at le to extremte themselves and their estates are sold t but their ruin they impute to the strictness and severity of government in the exac tion of the revenue it was no doubt the intention of government to confer an important benefit on this class of subjects, by abolubing the enutom of imprisoning them for arrears of resenue; but they assert it has been found, from melaneholy experience that the system of sales and attach ments substituted in its stead has in the enuise of a very few years reduced more of the great zemindars in Bengal to distress and beggary and effected a greater mutation of landed property in the province, than perhaps ever happened in any age or country as the more consequence of internal regulations. Blind and Inacusible as the natives are to cousequences, they will hardly give them-selves the trouble of guarding against a dutant end or undertake anything for the sake of a remote advantage more than the mere stimulus of 100ney being necessary to rouse them To this apothy and supineness in their dispositions, joined to habits of dumpation extravagance and disunion is to be ascribed the ruln of many zemindors; but in other cuses this effect has resulted from their estates being over-asses ed and the shifticulties in realizing the renta due by sub-tenants and cultivotors

In this province there are many female zemoiors, generally subservient to ond under the management of the family Brahmin who centrols their consciences. This person has bis owe private interests to attend to ond, without appearing exerts an influence over the public business of the zemoidary. The ostensible

manging agent salents to the control of a concealed authority, which he must conclisive and the loterests of the state and remindac qually iced to it. A lieshelia in Bengal not only obtaiou a lease of land on better terms then any other exist but also enjoys exemption from various impositions and exteritors to which the less ascred relayer are still jected.

Throughout the whole of Bengal, there is very little distroction to be observed between the houses of the meanest peasant and those of the semiodar, which is probably to part owing to the rule of Inheritance that prevails, both with Mahomedans and Hindoos, and in families is an inter minshie source of scalousy, comity, and dispute. Property of every sort being universally fial le to equality of partition among the herrs, most, if persevered to soon redoce all to the same level and its progress to the lowest degree be accelerated with so increasing momentum. Another eril consequence of this community of property to that it deadens all individual exertions for its improvoment

Religious buildings and public edifices of great size are now seldom constructed in Bengal What wealth remains with the natires is more widely diffused than formerly and the fortunes accumulated by Europeace are invariably remitted to Eu-This latter class now occupy the atations of those native officers who in former times, either from mutives of charity or osteniation, raised those buildings of utdity which are oow to be traced out only by their ruios and in fact the light soil, alluvial situation and exubernot vegetation of Bengal, are hostile to the permanence of onyerections, however well constructed originally With a particular class of natives it is a very general complaint that they can not now procure a livellhood in the British provinces They allege that onder former governments, the num ber of troops entertained and the various descriptions of servanta required foe state and foe the revenoo

collections, afforded means of employment which are now lost; the troops and officers under the British government being circumscribed to the smallest possible scale. On this account, and probably also the equality of ranks in the distribution of justice, some of the principal inhabitants, especially the Mahomedans, cannot be reconciled to any foreign government; and, reflecting with regret on the loss of their former privileges, view with disgust the impartial system of British jurisprudence, which has wholly neutralized their importance in society. In the course of time it is to be expected that this sensation will subside, and either give place to a conviction of the advantages resulting from the exchange, or be wholly forgotten, by people nearly insensible either to the past or the future One thing is certain, that owing to the long duration of domestic quiet, they have already forgotten their former condition of turbulence and anarchy, when scarce a year passed over without their being disturbed by the rumour, or terrified with the atrocities, of actual warfare.

The great increase of law suits has been the subject of much animadversion: yet it may be traced to a cause highly honourable to the British government, viz. to the increased value of every description of property, but more especially of landed property, and to the confidence felt by the natives in that security. consequence leads them to prosecute for the recovery of rights, real or imaginary, which in other times, and under other circumstances, they would have abandoned as unworthy of attention, which sentiment has been greatly strengthened by the strict adherence on the part of government to the terms of the decennial settlement of the land revenue, afterwards rendered perpetual Formerly the cultivators of the soil when oppiessed beyond endurance, were accustomed to assemble in crowds, with ploughs and other implements, and demand justice with violent and outrageous clamour, at present they proceed by

regular process, and harass each other through the forms of law in the civil and criminal courts.

It is difficult to say whether the great bulk of the natives be decidedly attached to the British government or not, their common speech to European functionalies being a mere rant of praise and flattery; and it may be presumed that those inhabitants with whom the British associate, are not deficient in extolling the happy effects of the British domination. Generally speaking, it is probable that the first class of Hundoo inhabitants are dissatisfied, chiefly from motives of ambition; the middling satisfied and the lower well pleased with the British government, which has so essentially meliorated their condition. On the other hand the higher ranks of Mahomedans, whose government we have subverted, in addition to their religious prejudices, have many political reasons to detest our predominance. The men of opulence now in Bengal are the Hindoo merchants, bankers, and banyans of Calcutta, with a few others at the principal The greatest men formerly were the Mahomedan rulers, whom we have superseded, and the Hindoo These two classes are zemındars now reduced to poverty, and the lower classes now look up to the official servants and domestics of the the English gentlemen. No native has any motive to distinguish himself greatly in the army where he cannot rise higher than a soubadar, a rank inferior to an ensign.

It has always formed part of the Bittish system to endeavour to raise up a class of respectable landed proprietors, on which account great encouragement has always been given to the permanence in families of landed property, but it is to be feared without success, principally owing to the invincible folly of the native proprietors, and the nature of their law of inheritance, which parcels out their estates into the minutest fragments. At present, it must be confessed there is no intermediate class between the sovereign and the common people,

and the distance between the two is consequently infinite Notwith fand ing the long duration of the Viahomedan away, it had very intle effect on the mass of the people; and our government most have still les, because we do not like the Mahamedans, mis and coalesce with them t they consequently appear as remote from adopting & nglish customs as the English are from adopting theirs. Respecting the nature of the British government the natives remain super latively ignorant in Calcutta a de gree of curiosity may sometimes be observed, and a denire to converse on atate affairs but on these occasions the best-informed natures always betray an extreme ignorance The most learned have no knowledge of the law of nations, nor do they suppose the measures of the supreme power to be founded in county or moderation the potico of a supreme executive covernment presembine laws and ifmits to its own authority not pre-senting a very intelligible idea to a On this account many of them still consider the regulations of covernment as only temporary and liable to be altered and resemded by the interest or caprice of the power that enacted them Although the bulk of the natures

cannot be described as decidedly at tached to the British government, which they certainly do out under stand that government is nevertheless very strong, and secure from any serious internal commotion for none ever stood more independent of pub-he opinion To the inhalitants the political state of the country is a complete incomprehensible mystery; yet it is probable that since our effectuni establishment in 1765 on oatiye ever dreamed of subverting the government. In this point of view tho mass of natives are most ignorant and belpless without concert or com bination and no oppression of the ruling power would produce any re sistance that might not be quelled by a company of sepoys The power of the British government in Bengal is completely despotic, and the sub-

mi sion of its sulperts perfect and unqualified. This is in fact so row picte as to precis le the necessity of exerction or intimitation of now kind; all appearance consequently of military interference may be kept wholly out of sight, and it will be only when 2 utopean laws, religion and literature, come to be disseminated that it will be necessary to draw the tensuighter in prove that we possess power irrectables to command obedience.

The army is powerful and may be with certainty depended on so long as ther are resultely pail. The scopes the the rest of the people are entirely uninstructed as to the form of povernment policy of their rulers, or justice of their wars and in this Ignorance and gnathy consists our

strength.

It is a truth perfectly obvious that the peculiar interests of the British nation recommend the happlaces of its native sulvects. On the acquisition of there territories the primary object certainly was to discover what could be obtained from them not how they might be most benefited. In process of time however it became necessary to derive how they might be benefited in order that the same amount of resources might con tinue to be drawn from them Per sons who remembered the state of this province in 1769 and 1789 tho thirtieth of the revolution were inclined to think that it exhibited more appearance of opulence at the first than at the last period no oninion confirmed by the records of the province for the twelve years subsequent to 1700; the decime continuing long after the effects of the famme had ceased to operate But, without resorting to local mismanagement, the mature of the connexion which binds Bengal to Britain will sufficiently occount for the tendency of its fater nal condition to deteriorate All tho offices of trust and emolument evel and military and the highest lines of commerce, are in the hands of atran gers who ofter a temporary resi dence depart with the capital they have secumulated while under native

rulers, even the extortions of lapacity and the drains of tilbute again entered circulation, and promoted in some form the territorial industry. Under its present constitution, the remittance, or rather tribute, to Britain, carries off every year a large share of the produce, for which nothing is returned.

Beyond Bengal the natives of the northern mountains prove by their features a Tartar origin, they people the northern boundary of Ben-On the eastern hills and adjaeent plains the peculiar features of the inhabitants sliew with equal certainty a distinct origin; and the elevated tract that Bengal includes on the west is peopled from a stock obviously distinct, or rather by several races of mountaineers, the probable aborigmes of the country. The latter are most evidently distinguished by their reliligion, character, language, and manners, as well as by their features, from the Hindoo natives. Under various denominations, they appear formerly to have peopled the vast mountainous tract that occupies Central India, and some of their tribes have not yet emerged from the savage state the mixed population of the middle districts the Hindoos may be easily distinguished from the Mahomedans, and amoug the latter the Mogul, Afghan, and then immediate descendants, may be discriminated from the naturalized Mussulmaun Among the Hindoos may be recognized the pecuhar features of the Bengalesc, contrasted with those of the Hindostany.

In this province the first rudiments of education are generally given in small day schools, under the tuition of teachers, who are little respected and poorly rewarded, and are quite different from the gooroos (family priests) who instruct in religion Children usually go to school at five, and are instructed to read and write at the They begin by tracing same time letters on the floor with a pencil of steatite, and in five or six months they are thus able to read and write. They then begin to write cyphers on palmyra leaves with a need and ink.

and at the same time learn numeration and the subdivisions of weights and measures, and of time belonging to astronomy, or rather to astrology, the whole occupying about eighteen months. After this progress they begin to write on paper, and to learn to keep accounts, and at the same time to multiply, divide, and subtract, with the rule of practice, in which the usual arithmetic consists.

In this scheme of instruction, accounts and arithmetic are divided into two distinct departments. one for agriculture, and the other for commercial affairs. When both are learned, the former is taught first; but not many of the natives acquire that knowledge, or are able to tell how many begås or fractions a rectangled parallelogram contains for the Hindoo geometry, as far as is known, in practice proceeds no further tical surveyors have no mode of ascertaining the extent of irregular figures but by reducing them to rectangled parallelograms, in which they are guided merely by the eye or by rough estimation, and even in measuring parallelograms, they are destitute of any instrument that can ascertain whether or not all the angles be equal

The Bengal year 1232 began on the 11th April 1824 When this era was instituted is uncertain; but, according to tradition, is said to have been introduced by one of the Mahomedan kings of Bengal, and seems originally to have had reference to the year of the Hejira, but without adjusting the Bengal solar to the Hejira lunar year, consequently, in three centuries it will have lost about eight years.

In Bengal, parents are generally satisfied with instructing their children in mercantile accounts, and in keeping a very full day or waste-book, in which every transaction is carefully recorded, and to which is added a kind of ledger, but their books do not admit of striking a regular balance, like the Italian method. It is only arithmetic commercial and practical that is taught at school, the ap-

plication in remeration and to the Leegung of Ironka, as her of a ever of Lynn pa was made boat to made some office or shop, where the yearsh commencers and start and learns the stale and granger of emiterpond erer The peof the sharpires style for writing on back and leaves, at il orth the coronal marner of libdistant I sheen entirely a'unstored and the real pen and turntoo interand introduced for the Mahomelans, are now unlectually emplaced even in writing on the pal myra leaf, which substance is still used for works of value being more dural le ti an the paper falmeated in the punioce Besides paper the notives pay for writing rather less than one ruper for every 32,000 let ters of the all habet.

It has long been remarked that selence and laterature ateln n progres lac state of decar among the natives of Indu the number of learned men being not only dimini hed but the carrie of learning even among those who still devote themselves to it greatly contracted. The abstract actions are almoduted a polity literatoro neglected; and no branch of learnin cultivated but what is con pected with the peculiar relations sects and doctrares or with the accause of this retrograde condition of literature may be traced to the want of that encoura-ement which was formerly afforded to it ly trinces chickains, and oputent indiri loals noder the native governments now past and gone Influenced by a deoure to retrieve native learning from its prostrate condition Lor | Minto to 1811, adopted certain measures for the encouragement of erudition and science by a system of liberal salaries and donations; bot it is greatly to be doubted whether, under existing circumstances, it be practicable to rembue the natives with a taste for their own literature or if practicable, destrable With the prospect before them of a long and intimate con nexlon with their present rulers it would probably prove a much more

The genuine Bergulere towns are not areared into exects but into deridons of ex t, west north south, and centre. In one part the Illadons reside, in another the Mahomedans, and in a third the native I orturuese &e The Illadoo portion is farther subdivided into the quarters of Brah mino scriber weavers mi makers washermen larbers cultivators, pot ters tem but this distribution is not alante strictly observed It is not the custom to build one house suf ficient for the whole family t on the contrary, except among the great a separate house or but is generally allotted for each particular purpose, and these huts collectively are sor rounded by a fence The houses of the rich are of brick, and flat-roofed generally two stories high, but the windows are mere air-holes first story the idol is set up t the upper rooms are necupled by the family Throughout the province, except in large towns there are no inns nor place of accommodation for the mere traveller t yet in every small town he may procure on empty house or hot where he may have slielter

Blany intelligent persons have been of opinion that vegetable food sea sound with experient and water to drink, is the diet best adapted for a rulers, even the extortions of rapacity and the drains of tubute again entered circulation, and promoted in some form the territorial industry. Under its present constitution, the remittance, or rather tribute, to Britain, earries off every year a large share of the produce, for which notling is returned.

Beyond Bengal the natives of the northern mountains prove by their features a Tartar origin, they people the northern boundary of Ben-On the eastern hills and adjaeent plains the peculiar features of the inhabitants sliew with equal certainty a distinct origin, and the elevated tract that Bengal includes on the west is peopled from a stock obviously distinct, or rather by several races of mountaineers, the probable aborigines The latter are most of the country. evidently distinguished by their reliligion, eharaeter, language, and manners, as well as by their features, from the Hindoo natives. Under various denominations, they appear formerly to have peopled the vast mountainous tract that occupies Central India, and some of their tribes have not yet emerged from the savage state the mixed population of the middle districts the Hindoos may be easily distinguished from the Mahomedans. and among the latter the Mogul, Afghan, and then immediate descendants, may be discriminated from the naturalized Mussulmaun Among the Hindoos may be recognized the pecuhar features of the Bengalese, contrasted with those of the Hindostany.

In this province the first rudiments of education are generally given in small day schools, under the tuition of teachers, who are little respected and poorly rewarded, and are quite different from the gooroos (family pitests) who instruct in religion Children usually go to school at five, and are instructed to read and write at the They begin by tracing same time. letters on the floor with a pencil of steatite, and in five or six months they are thus able to read and write They then begin to write cyphers on palmyra leaves with a reed and ink.

and at the same time learn numeration and the subdivisions of weights and measures, and of time belonging to astronomy, or rather to astrology, the whole occupying about eighteen months. After this progress they begin to write on paper, and to learn to keep accounts, and at the same time to multiply, divide, and subtract, with the rule of practice, in which the usual arithmetic consists

In this scheme of instruction, accounts and arithmetic are divided into two distinct departments. one for agriculture, and the other for commercial affairs. When both are learned, the former is taught first; but not many of the natives acquire that knowledge, or are able to tell how many begas or fractions a reetangled parallelogram contains. for the Hindoo geometry, as far as is known, in practice proceeds no further tical surveyors have no mode of aseertaining the extent of irregular figures but by reducing them to rectangled parallelograms, in which they are guided merely by the eye or by rough estimation, and even in measuring parallelograms, they are destitute of any instrument that can ascertain whether or not all the angles be equal

The Bengal year 1232 began on the 11th April 1824 When this era was instituted is incertain; but, according to tradition, is said to have been introduced by one of the Mahomedan kings of Bengal, and seems originally to have had reference to the year of the Hejira, but without adjusting the Bengal solar to the Hejira lunar year, consequently, in three centuries it will have lost about eight

Mony intelligent persons have been of opinion that regetable food seasoned with espoleum, and water to slrink, is the diet hert adapted for a warm climate: but the justice of this notion there is much reason to ques-The natives of Bengal, who subsist exactly in this manner, have extremely weak constitutions, incapable of resisting the slightest change of air or water. It is more probable that those who enjoy a diet which includes animal food, and strong liquors in moderate quantities, are best able to support the influence of unwholesome climates, and the sudden alterations of the atmosphere. The Arabian prophet has also had encomiums for his prohibition of strong liquors, upon the supposition that excessive inchriety would throw the natives of warm climates into most ungovernable paroxysms The fact, however, is here exactly the reverse, for nothing can be quieter than a drunken Bengally. On these occasions he either retires with his wife or mistress to some private place, where both parties drink until satiated, or he swallows so much liquor at once as to deprive himself both of reason and voluntary motion, and falls down prone on the earth a stupid block. It is seldom or never that, like the Centaurs and Lapithæ, he engages in that boisterous conviviality which generates feuds, broils, and quarrels

The extracts of poppy and hemp are considered by native moralists more innocent than spirituous liquors, yet they are much more apt than distilled spirits to lead to the most beastly private intoxication. A Brahmin who intoxicates himself with these drugs is considered blameable, but it does not involve loss of caste. Many of the lower tribes use them whenever they can, but it is only the very lowest that will drink spirits openly. All women chew tobacco, but it is only the females of unclean tribes and prostitutes that will smoke No man loses caste by snicking tobacco, and all practise it except a few pundits, who content themselves with snuffing, which is considered more dignified than smoking. Men seldom chew tobacco

In general a Hindoo man of rank

or high caste passes a great part of lus time cooking: but the ceremonies which this operation involves being very troublesome, many of the natives kindle a fire but once a day, generally in the evening, when they make their principal meal In the morning and at noon they eat some food that does not require cooking, such as parched rice, or rice parboiled and afterwards beaten flat and dried. Those who can afford the expense, mix it with molasses, and form cakes or balls: and some mix it with milk, sour or curdled, or with tamarinds. poor either eat it without any addition, or moisten it with a little water, and, if such luxuries be attainable, with a little salt or some acid fruit. The preparations of milk are various, consisting of boiled butter (ghec), curdled sour milk, butter-milk, inspissated milk, and curds The natives use only boiled milk, the taste as it comes from the cow being con-Neither is the sidered unpalatable butter ever used without having been boiled, which process converts it into an oil that keeps much better than butter. Even in the climate of Bengal, it undergoes little change for a month, and may be used after having been kept a year. The Bengal sweetmeats please neither the eye nor palate of Europeans, but the rich natives use large quantities, mostly fired in oil or butter.

Dogs, the humble ally of man, are little honoured in India, and no employ can be more disgraceful than the taking care of this faithful brute; yet the breed in Bengal is very numerous, and every village swarms with half-starved curs, which eat every sort of carcase and filth, and are not reckoned the property of any The natives rarely enter into any familiarity with them, nor are the children ever seen either caressing or tormenting them, as in Europe. They are in fact merely tolerated; one or two, according to the wealth of a family, being permitted to eat the scraps, in return for which they sleep in the yard, and bark when a The bitches stranger approaches

are few in number and comments poor started than the deet brief a trivered evilve and has redere strict neutra ity in their quarrella These erratures are so provide that the number of dogs always exceeds that of the houses which give them shelter and a large proportion have no resource but in roam about in misery i'be jackale. But onder all their hardships they retain the after tionate nature of their binds the les t feeding attach es them and when the panes of hunger are deadened the elightest notice delights them and they soon discover who is the chief person of a party though he neither caresses nor feeds them Cate are ant numerous and are ike dogs just tolerated and ine in a half-domestle helf-wild state

The Bengalese are ingeneral when young a lively handsome race of men There it also a softaese in their fratores corresponding to the generaimiliness or perhaps puedlanimity of their character and were it not for the uncharitable operation of caste they would, comparatively be a friendly inoffensive race They have a thorou h contempt for all other nations and easter (which seems reciprocal), whom they consider impure and de-railed originally illadoos but to consequence of their sine and enormities fallen from that hiele The contrast between the bluntness of a Luropean and tho amouth easy polish of a Bengalese is very striking; the latter are naturally pointe and frequently exhibit a suarity and suppleness of manner that surprises a stranger This observation, however, is only applicable so far as regards their conduct towards their superiors for to inferiors of whatever nation they are usually insolent and contumelious Their youths are lively, inquisitive and of quick perception and the common people noisy and loquocious These are of a dark brown colour, middling stature thin but well made of an oval countenance mosy with aquilino noses, and all with black eyes and hair

since every were a marriel care or duposed to a restary if e for which indeed, their want of personal ettergth and constitution almost incommitates therat the army is in consequence entirely secretal from most and mertern findostan. in if threefourths of the Bengal caracy were Mahomedan for with the exception of the Malarattas the Hudons in general are not partial to the duties of a trioper The reverse is the case in the Ben, at Infantry three-fourthe of which is composed of Hindoor who are usually more decile an I less di strated than the Mahomedan The standard below which so recruit is taken is five feet als inches but a large proportion of the grenadiers

are the feet and unwards,

The dress of the Hindoo men of rank has become orarly the same with that of the Vahomedans. The mar ried Hindoo females use red-lead as an ornament; but instead of pointing their cheeks like the I propens ladies, they cub it on their foreheads, fineers and nails and also point round the soles of their feet with red. is com pliment a woman is commended when she is discribed as walking like a dock or an elephant which is also a sort of waddle. The teeth are beautiful when like the seed of the pomegratrate (black and red); the oose when like the leak of a parrot; the hands and feet like the water hily; the hair when black as a cloud; the chin when resembling the mangoe; and the lips when like the fruit of the talacueha. The hardships imposed on filindoo widows of pure exite are so severe and degrading that women of high spirit often prefer the funeral pilo: while others sobmit with nationce and act or menial servants to the vain heauties who are derked in the ornaments of which they have been deprired; others, to escape these harsh regulations renounce easte ond seek refuge is a brothel In 1823 tho num ber of suttees or widow bursings within the Bengal presidency was, Brahmios 234; Khetries 35; Vassyas 14: Sudras 202; total 575 The geomoe natives of this proreal number is probably much greater

as the returns are only given with accuracy about Calcutta, within the limits of the Calcutta court of circuit, where 340 out of the above sum total were perpetrated. The ages were, under twenty years of age 32; from twenty to forty years 208; from forty to sixty years 226; above sixty years of age 109; total 575 widows

To the ear of a European the native music sounds harsh and disagreeable, and to the professed musician is altogether insufferable The performers, however, are numerous, and the variety of noises they are able to produce, considerable The highest description consists of bands of instrumental music, which accompany the voices of girls who sing and dance. The latter is quite as bad as then music, being slow, lifeless, and without grace or meaning The greatest art is to jingle time with some chains, or hollow rings, called goongooroos. which are tied round their ancles, During the Mussulmaun Mohurrem, some persons are employed to sing the praises of Fatima, the daughter of Mahomed, and of her unfortunate sons, Hassan and Hossem But it is principally at marriages, and during religious processions and grand solemnities, that the full din of harmony is heard, proceeding from eight different kinds of drums, besides gongs, hantboys, buffaloe horns, and brass trumpets, performed by the lowest dregs of the people. From these formidable implements of sound each man extorts as much noise as he can, paying little or no attention to what his comrades are about Sometimes the men amuse themselves singing liymns or love songs, accompanied by small drums; but it is considered as very disgraceful for a modest woman to sing, or play on any musical instrument. While lowing, the native boatmen endeavour to lessen their fatigue by singing the adventures of Krishna and Radha, and it is among them that any real melody is to be found, some being sweet and plaintive, and strongly resembling the national airs of Scotland and Ireland

In Bengal the common washermen

are almost all Hindoos of a low tribe; but nearly all the tailors are Mahomedans, the needle apparently having been totally unknown to the Hindoos before the Mahomedan invasion. great proportion of the barbers are a pure tribe, and shave without soap Rich men often retain barbers, who shave them, pick their ears, cut their nails, and knead their bodies, commonly called shampooing, an operation to which the natives are much attached. Ten days after a woman has been delivered, the nails both of her and her child must be cut. No native woman, except a prostitute, will allow their hair to be cut, such care of her person being deemed incompatible with modesty Of the medical profession there are here three sects of native physicians, the Yunani (Ionians) among the Mahomedans; the Saka dwipt in Bahar; and the Vaidy as in Bengal

Domestic slavery is very generally prevalent in Bengal, among both Hindoos and Mahomedans More trusty than hired servants, slaves are almost exclusively employed in the interior of the house Every opulent person, every one raised above the condition of the simplest mediocrity, is provided with household slaves, and from this class are chiefly taken the concubines of the Mahomedans and Hindoos, in regard to whom it is to be remembered, that concubinage is not among people of these religions an immoral state, but a relation which both law and custom recognize without reprehension, and its prevalence is only liable to the same objections as polygamy, with which it has a near, and almost necessary connection. In the lower districts under the Bengal presidency, the employment of slaves in the labours of husbandry is almost unknown In the upper provinces beginning from Western Baliar, and Benares, the petty landlords, who are themselves enlivators, are aided in their husbandry by slaves, whom they very commonly employ as herds and ploughmen Landlords of a higher class have in a few instances the pretensions of masters over a part of the tenants long settled on their estates, and reputed to be decreased form persons who were the acknowledged states of

their ancre ore

It would be diffcult to firm a eren nutation of the ounder of eleven throughout the country or the proportion been to the free population In a general point of them it may be stated, that slaves are neither so few as to be of no ermaleration or 13 numerous at to compose a note to proportion of the 1 hal dants. The oumber which crets nly la nut relatriely great has been kept up first be propagation; secondly by the sale of free children loto stavery; and thirdly by importation from alread, by sea or land but this has been lon, prohibited blasery however in its severest sense mus be sald to be unknowe the dementic clase being it it ally rather a favourate and confiden tud servant than an algeet dender and held superior to the hirelin leath In the master a extimation and in his Opulent persons frequently emanespate but rarely sell their slaves ! and the manualision of staves being deemed an act of picty, it frequently takes place from religious motises, and slaves are expressly redeemed by purchase The number of slaves coo tinually dimioishing by these procesacs, a demand constantly exists for the purchase of them which is chiefly supplied by the sale of children by their parents during fundee or under circumstances of peculiar calamity. In such exigencles parents have been known to sell their children for prices so very loconsiderable and so little more than nominal that they may frequently have credit for a better motive than that of momentarily reliev ing their own necessities namely, the saving of the children a lives by interesting in their preservation persons able to procide that nour-liment of which they are themselves destitute There is no reason for being that they are ever sold through avarice or the want of natural affection Indeed the known character of the people in all their relations exempt them from the auspicion of such conduct pressure of want therefore, nione atl

were exhausted At present the existence of slavery, as sanctioned by the Hindoo and Mahomedan law, is tolerated and maintained by the courts of judicature under the British government in India, nor does it appear that any legislative enactment is called for. Although the native laws have not provided against the barbarity of an inhuman master, the British local regulations have, by expressly annulling the exemption from kisas, or retaliation for murder, in 1798, since which period slaves have not been considered out of the protection of the law, either in the cases of murder of of barbarous usage.

Among the native population of the eastern districts of Bengal, the Mahomedans are almost equally numerous with the Hindoos, and in some particular parts, such as Ghoraghaut, a majority of the cultivators appear to have embraced the Arabian In the central districts the Maliomedans do not compose a fourth of the inhabitants, and to the westward the disproportion is still greater. As an average of the whole, the Mahomedans may be computed at onesixth of the total population of Bengal and Baliar Of the four great castes, the aggregate of the Brahmin, and Khetri, may amount at the most to one-fifth of the Hindoo population, but, except families that have evidently migrated into Bengal, there are none that pretend to be genuine Khetris or Vaisyas, so that the original Bengalese may be considered as divided into Brahmins and Sudras.

In this province the highest Sudras are the Vaidyas, or medical tribe. The Kayasthas (pronounced kaist, hence the word caste), or writer tribe, follow next, then come nine tribes of tradesmen, who, although greatly inferior to the scribes, are considered pure Sudras, as a Brahmin will condescend to drink water offered by them, nor is he degraded by attending to their spiritual concerns. nine trades are druggists, shell-workers, coppersmiths, cultivators of betelleaf, weavers, makers of garlands, blacksmiths, potters, barbers.

some strange caprice, not only the bankers, but also the goldsmiths, are excluded from the pure castes of artificeis, while barbers, pot-makers, copper and blacksmiths, obtained

that much-envied dignity.

When Raja Bollal Sen arranged the castes of Bengal, it does not appear that he promulgated any code of written regulations, at least no book answering to this description is In this province comnow extant merce and agriculture are permitted to all classes, and, under the designation of servants to the three other tribes. Sudras are allowed to prosecute any manufacture. In practice little attention is paid to the limitation of castes, daily observation shewing Brahmins exercising the martial piofession of a Khetri, and even the menial one of a Sudra. It may, however, be received as a general maxim, that the occupation appointed to each tribe is entitled merely to a preference, every profession, with a few exceptions, being open to every description of persons. Many tribes of Hindoos, and even some Brahmins, have no objection to the use of annual food, and at their entertainments it is generally introduced. By some, animal food is daily eaten, and the institutes of their religion require that animal food should be tasted even by Bialimins at solemn sacrifices, forbidding the use of it unless joined with the performance of such a sacrifice.

In this province, and throughout Hindostan generally, every caste, in order to preserve purity, form themselves into clubs or lodges, consisting of individuals of that caste residing within a small distance, and in Bengal termed collectively dol, which govern themselves by particular rules and customs, or bye-laws. At the head of each dol is a chief, whose office among the higher ranks is hereditary, and whose duty it is to punish all transgressions, either by excommunication or by fine, but his decision must be guided by the sentiments of the principal persons coniposing the society In large towns there are commonly two ar three cluefs of dals, where adherents in general quarrel and annoy each other os much as circumstances will per ruit. Each caste when it is numerous to any place has, besides one ar rance distinct dals or societies far enforcing the observation of its rules. Each kind of Brahmin and each sub division of Sudra has Its own and mast of these are parcelled out luto diverging branches, which dispute about purity and precedence In the various tribes the chiefs of castes are called by different names but tho most comman is paramaniks. crimes usually numshed by these combinations are the esting of far bldden things, or the cating in company with forbidden persons and cohabiting with thase who are impure

or farbidden. To describe the ceremonles of each or of any one at the Bengal castes, would be impracticable within any reasonable limits, and If practicable would only prove in how pre-posterously frivolous a manace time may be wasted. In the observance of these ceremonies however every Hindoo seems to place his chief gratification and glaries in an establish ed reputation far their strict ner farmance. Except the bodies of children the dead of all castes are harned; but the funeral pila being expensive many of the poor cannot affard to be reduced to ashes. As o substitute, a tarch ar whisp of straw is put into the mouth of the corpse and afterwards, if ocar o large river it is thrown into the water or if nt a distance, buried but the first la always preferred and fills the Gan ges and ets branches with disgusting objects. The Bengalese Hindoos have in general a great terror of the dead, and will seldam venture to 10habit n house ar hut where a person This seems connected with their custom of exposing their sick ta perish on the banks af rivers, which tends to aggravate the last pangs of nature, and sometimes not only accelerates death but exhausts that strength which might possibly

have enabled nature to overcome the disease. The custom also furnishes an apportunity of practiling after horid crimes and it has probably been to guard against the possibility of nucle events that Hindoo legislature bayo impased such severe hardships ou widows.

Of the existence of Bengal us o separato Lingdam with the limits onaigned to it at present there is no other evidence than its distinct lan guaga and peculiar written character At the time of the war of the Minhabharat it farmed part of the empire of Magadha, or Bahar from which however It was dismembered before the Mshamedan Invasion but It Is rarely in Hindoo books of any Lind termed Bangala Gaur and Banga Desa being the usual distinctive ap-pelistions. Traditions still current in Beneal make Bollal Sen thu immudiate successor of Adisur, a person af the Inidya, ar medical tribe wha procured the government of the province but subject to the monarch of the north west Ho is said to have resided partly at Gour but chrefts at Biktompoor eight miles south-east from Dacca

Adsur's wife had o aan named Bolial Sen begotten by the nver Brahmaputra under the farm of a Brahman Thra offinning of the flood succeeded Adaar and regulated the different eastes as they now exist in Bengal and it is prabably awang ta this circumstance, that the methed trihe, being that af the prince in placed next in rank to the Brahmar Indeed, of the five dynasties that are said to have raled Bengal priar to the Mishomedian invasion the four less it are said to have been Kaists and an the first Khetr.

Hollal Sen was succeeded by Lakhyamas Sen who according to tra ditroo had a son named Madhara Sen who had a son named Su Sen naually considered by tha Hindoos as the last of their kings but according to the Ayeen Achery Lakbyaman Sen was the last In A D 1803 during tho reiga af Cuttuh ud Deen an the Delli throne, Mishomed Bukhtyar Khillijce was despatched with an army by that sovereign to invade Bengal, and marched with such rapidity that he surprised and took the capital. On the approach of the Mahomedans, Raja Lakhyaman, who resided at Nuddea, made his escape in a boat and fled to Juggernauth, where, according to Mahomedan authorities, he died, but the traditions of the country state that the Raja, dreading the destruction of Brahmins and sacred animals, which a protructed existence might occasion, by a power holy men are supposed to possess, deserted his visible body It is possible that the Raja only retired to his remote canital, Bikrampoor, near Dacca, where there still resides a family nossessing considerable estates, who pretend to be his descendants We also find that Soonergong, in the vicinity of Bikrampoor, continued to be a place of refuge to the Gour malcontents, and was not finally subjugated until long after the overthrow of Raja Lakhyaman.

The kingdom being in this dastaidly manner abandoned by its sovereign, fell an easy prey to the Mahomedan general, who having destroyed Nudden proceeded to Gour, where he established his capital, and reared his mosques on the ruins of Hindoo temples According to Mahomedan authorities, the conquest of this large province only occupied one year: but it would appear that after the capture of Gour, the Maliomedans were unable to extend their dominion over the whole Hilldoo kingdom of Bengal, not only towards the north and east, but even towards the west; nor did they acquire possession of the whole, constituted as it is at present, until a late period of the Mogul government

From this era Bengal was ruled by governors delegated from Delhi, until A D. 1340, when Fakher ud Deen, having assassinated his master, revolted, and erected the independent kingdom of Bengal After a short reign he was defeated and put to death, and was succeeded by

the Company's trade continuing at Chuttanuttee In 1693 Sir John Goldesborough was sent out as general superintendent and commissary of all the Company's possessions; but he died in Bengal in 1694, having confirmed Mr. Eyre as chief 1696, during the rebellion of Soobha Singh, the Dutch at Chinsura, the French at Chandernagore, and the English at Chuttanuttee, requested permission to put their factories in a state of defence, and the viceroy having in general terms assented. they proceeded with great diligence to raise walls, bastions, and regular fortifications; the first permitted to foreigners by the Moguls within their doininions.

1697. Azim Ushaun, the grandson of Aurengzebe. In 1700 this prince, in consideration of a valuable present, permitted the agents of the East-India Company to purchase their townships, with the lands attached, adjacent to their fortified factory, viz Chuttanuttee, Govindpoor, and Calcutta, Mr. Eyre, the chief, in consequence of instructions from home, having strengthened the works of the fort, it was named Fort William, in compliment to

the king.

1704. Moorshed Cooly, or Jaffier Khan. This nabob in 1704 transferred the seat of government from Dacca to Moorshedabad, as being more central The annual surplus revenue during his administration, which comprehended also Cuttack, amounted from 130 to 150 lacks of rupees (£1,500,000). and was regularly transmitted to Delhi every February, accompanied by valuable In 1706 the whole presents stock of the United East-India Company had been removed to Calcutta, where the garrison consisted of 129 soldiers, of whom sixty-six were Europeans, exelusive of the gunner and his

1725 Shujah-ud-Deen, son in law of the late governor, who was succeeded by his son,

1732. Serferaz Khan, who was dethroned and killed in battle by

1740. Aliverch Khan. It does not appear that this nabob ever remitted any part of the revenue to Delhi. After the invasion of Hindostan by Ahmed Shah Abdalh of Cabul, and the death of the Emperor Mahomed Shah in the following year, the Mogul empire may be considered as annihilated beyond the immediate

vicinity of Delhi.

1756. Seraje-ud-Dowlah, grandson to the late nabob, in April this year took undisputed possession of Bengal, Bahar, and a portion of Orissa; but it does not appear that he ever applied for, or received investiture from Delhi. On the 20th June he captured Calcutta, and shut up the prisoners, 146 in number, in a room twenty feet square, where they all perished except twenty-three. On the 1st January 1757, Calcutta was retaken by Admiral Watson and Col Clive; on the 20th June the nabob was defeated at Plassey, and early in next July was assassinated by order of Meerun, the son of his successor, in the twentieth year of his age, and fifteenth month of of his reign On learning, in 1757, this important conquest, the Court of Directors established a sort of rotatory government, by the enactments of which, four of their civil servants were appointed directors in Calcutta, to succeed each other every three months, from which favoured list of periodical rulers the name of Clive was excluded, but this nondescript constitution, as may be supposed, was of very transient duration. For the subsequent native princes of Bengal, see the article Moorshidabad,

m from this era may be dated the commencement of the British covernment of this province all though the devianay or authority to collect the revene was not obtained from the Delhi sovereign until 1765.

On taking a retrospect of the preceding centory, it appears that front the establishment of Aurengrebe on the imperial throne until the invasion of hadir Shah, a period of eighty years, Bengal enjoyed profound peace without, and experienced only a few transient commotions internally Under the government of the two last legitumate sleeroys, Jaffier Khan and Shujah Khan who ruled in soccession nearly forty years the state of the country was eminently flourishing ond the taxes little felt although the annual tribute remitted to Delhi was oscally a ctore (see millions) of rupeer; the xemindars paying their land-tax directly fato the royal treasore, without the intervention of local collectors on the part of the so-Even after the usurpation vereign of Aliveral Llian, the zemindars were so opulcot as at one timo to make him a donation of a crore of rupces, ond another of fifty lacks, towards defraying the extra expenses lacorred in repelling the tocursions of the Maharattas Bengal had then few political relations to maintain and was never exposed to invasion of any timo except from the west; the military establishment was consequently inconsiderable and tho general arrangement of the cird administration remarkable for economy simplicity ood despatch

In the first period of Brittly administration, from 1737 to 1705, the provinces with the exception of a few districts ceded to the Company, were continued under the distribution of envi and eriminal justice, the collection of the reveaue and the geogral powers of internal superintendence were delegated; the Britisti reservage the direction of foreign policy a controllist, ionizary influence and quore consulerable commer

cial advantages than had ever been conceded by the greats of emperors, or the prior stages of the country In 1765 the dewanny was obtained by Lord Clive from the Emperor Shah Allum under the coodition of naving him twenty-als facks of rupees enaually besides accuring him a considerable tract of territory in Upper Hindosten both which he forfest ed in 1771 by patting himself vo-luntarily into the power of the Ma-This important and most harattas valuable acquisition observes a na tere historian (Seid Gholaum Hosscin), was settled without hesitation or argument, as easily as the purchase of an ass or any other animal with out envoys or reference either to the King of England or to the Company

Lord Clive returned to Fagland in 1707, and was succeeded in the government by Mr Verelst; and on his denattore in December 1769 by Mr. Cartler The crops of 1763 and 1769 proved senaty oad throughout the month of October 1769 scarcely a drop of rain feil The almost total fulure of a third crop after the deficiency of two preceding ones filled the miserable inhabitants with con sternation and disoray Somo reliance was still placed on the crops of inferior grain, usually reaped between February and April but the refresh ing showers that commonly fall between these months also failed no rain descending until late in the The heat in conseintter month quence becamo losupportable and every sort of berb was to a great degree dried to o powder The result was universal despoodence, and a too well founded opprehension of lm pending destruction, for the same ea lamity extended to Upper Hindostan and no adjacent country was capable of furnishing on adequate supply

The British administration and the nature officers took the olarm at an early period and dedpted such precautionary measures as were in their power. In September 1769 the British and oil their dependents were obsolutely prohibited from trading in gram ood seriet injunctions were.

with doubtful policy, promulgated against the hoarding of grain, or dealing in it clandestinely, and as a measure of necessity, 60,000 maunds were stored for the subsistence of the army. For these exertions the natives were principally indebted to Mr. Becher, of the civil service, who yet on his return to England found himself traduced as the author of the famine, and the purchase of a stock of rice for the army may have assisted to suggest the notion of a monopoly

In the northern districts of Bengal the famine raged so early as November 1769, and before the end of April had spread universal desolation Rice rose gradually to four, and at length ten times its usual cost, and even at these prices was to a vast multitude Thousands unattamable crawled forth to the fields, and endeavoured, by knawing the bark and chewing the bitter and astringent leaves of tiees, to prolong their miserable existence In the country the highways and fields were strewed with the dving and the dead; in towns the streets and passages were choked up with Vast numbers flocked Moorshedabad, the capital, and supphes for that quarter were eagerly sought. Subscriptions were liberally made, and the Company, the Nabob, the ministers, and European and native individuals, largely contributed to the feeding of the poor. In Moorshedabad alone 7,000 were daily fed for several months, and the same practice was adopted in other places; but the good effect of these charitable endeavours was scarcely perceptible amidst the general mortality. In and around the capital, it became necessary to keep a set of persons constantly occupied in removing the dead, who were placed on rafts by hundreds and floated down the river. At length, the persons employed in this sad vocation fell victims to the novious effluvia, and for a time, dogs, vultures, and jackals were the only scavengers. The air liceame offensive, and resounded with the frantic crics of all ages and seves in the agoutes of death In many places

entire families, in others whole villages, became extinct, forbidden and abhorrent food was resorted to; the child fed on its dead parent, and the mother on her child A gloomy calm at length succeeded, and it was found that death had ended the miseries of so great a proportion of the cultivators, that when the new crop reached maturity, in many parts no proprietor remained to claim it. The number cut off during this period of horror has been variously estimated, but probably exceeded three milions, and although the desolation was of such uncontrollable magnitude as to be evidently beyond the power of man either to prevent or inflict, yet in England it was ascribed to the very persons who endeavoured to alleviate its rayages, and even to others who were not in the country when it commenced. Nor did the total impossibility of establishing a monopoly of grain, prevent a general belief in the western world, that the inhuman expedient had been resorted to by the servants of the East-India Company. The calumny originated in the French settlement of Chandernagore, and from thence was transmitted to Paris. London, and Europe generally, where it has been registered as truth in the page of history, has been made the subject of religious lamentation, has been mmortalized in verse, and, such is the power of perverse credulity, is still considered as an indelible stain on the British character, yet is wholly a phantom, and never had the slightest foundation in fact.

In 1772 Mr. Hastings was appointed governor, and next year, by the interference of the British legislature, a new constitution was given to Bengal, and a majority of the members that were to administer it sent from England, the others being selected from the existing council. About the same period, 1772, English supervisors were sent into the districts to superintend the collection of the revenue, by which incasure the British government stood forward as dewan, an office hitherto executed by native functionaries, residing at

Moorabedahal the old seat of poserpment and of the pulse existequer. Trese native wisi ters, with then Leers they explored in the prosinces were now lada ile and the Conmany in the abliof they round to rotes servers undertook the col lection of the revenue Along with their former controlling power the governor and countil June1 the se tual co-misance and executive tonresement which until then he I remainful vested in the rative talor ters. The osten He seat of government and of the eachoquer was remoted to Calcutta, the province subdealed into collectorships and a harepean civil screant stationed in each district as a revenue collector

This atteration tran ferred to the Inglish the civil almini tration of justice and every interpo log medium between them and their Indian subjects being the placed they earne to transact I rences immediatels with each other The direct authority of the Butt is now pervaded the loterior and the natire or country goremmert was alrowed In his form and fact with the excertion of the nalsoba terraining function that of chief criminal magi tra e The pulshe functionaries then (1772) commenced their operations at I areparently with a very strong desire to allerate the softra grof the people t but owing to the poselty of the ta k, enmitted many errors both in finance and the administration of justice which rather tended to argrasate them. On this occasion suffi cient attention was not just to the essential distinction between the land hulder basing an interest in the soil. and the resenue servant whose object was of course not the permanent welfure of the district under his ma angement but the temporary realiza

trob of the greatest possible revenue.

Mr llastings continued in the government until 178 when he returned to Purope and was areceded
by hir John Macpherson. From the
period of the resolution in 1757 the
Britth in Bengyl entered into no
external offensive allipaces, purpulagexternal offensive allipaces, purpulag-

the system recommended by Lord Clier which was to send schemes of conquest and pointical intrigue, to Impease the dorrestic condition of the reprinces and in procure respect by moderation and rood faith deciation from the principle, how ever began to 1774, having for olject the peruntary advantage of the Company; and in 1778 a much wider desistion took slace by the carrying on of officeure war with a view to the acquilition of territory la tho west of Ind a. By these measures as enormous debt was incurred and the gul he resources greatly exhaust ed; to which exits succeeded the at tack of Hydre Ali on the Carnatic, and a defen ire war a most him and his after the French the support of which fell wholly on Itengal 'On this emergency the legisla ure again inter fered, and regulations were enacted to correct the coals then prevalent and slee to invigorate the authority of the home administration of ladias affile.

Lord Comwalls reached Bengal is September 1766 and luring his government the last period took place of tle British territorial administration of Beneal the land tevenir having been permanently fixed and the same enin ment of rights secured to all the inferior occupants of the soll essential reforms were also made in the admisistration of insuce. Un to this date the blak station of supremo eriminal ju le remained tested in tho nabol represented by some Vishomedaa delegate who filled the Inferior courts by sale with ble own mean retainers who to reimburse them seives exercised every extortion and oppression.

Under tits destructive system the country greaned, and with its exist ence the Emil in government was just ly represented. But reluctant to encist he last remaining perceptive of the nahob it long temporized, until the evil became insupportable, when an arrangement took place, by the conditions of which the mabob appoint of the Covernor-general is council his deligant in the office of supreme

Lord Cornwallis and criminal judge the other members of that body then took upon themselves the duties of the office, removed the chief criminal court from Moorshedabad to Calcutta, invested the collectors of districts with magisterial powers, and established courts of circuit for the principal divisions of the country. This great department was in fact wholly renovated, and filled with men of principle and ability, having adequate salaries, and subject to the strongest responsibilities. Even Europeans were placed under the cognizance of these provincial laws, and the authority of the collector subsequently restricted to the mere receipt and disbursement of the revenue, (since modified), the distribution of justice being transfeired to a distinct class of magistrates Henceforward the law became the arbiter in all matters of property between the government and its subjects. For the administration of justice, the Hindoo and Mahomedan codes were in general made the standard for the respective sectaries of these religions, modified in some instances where they were barbarous and cruel, and improved in others having a relation to political economy, but continuing in force, so far as regards religious tenets, marriage, caste, inheritance, and some other points. During this important period the arrangement of the Company's army was new modelled, and its constitution greatly improved.

The government of the Marquis Cornwallis lasted until August 1793, when he was succeeded by Sir John Shore, afterwards Lord Teignmouth, who pursued the beneficial measures of his predecessor, which were subsequently nearly completed by the Marquis Wellesley. This nobleman reached India the 26th April 1788, and left Madras for England the 20th August 1805

The Marquis Cornwallis airived at Calcutta on his second mission in July 1805, and died at Ghazipoor, near Benarcs, the 5th of next October. He was succeeded by Sir

George H. Barlow, who held the reins of government until the arrival of Lord Minto in July 1807. Lord Minto returned to Europe in 1813, and was succeeded by the Earl of Moira, afterwards Marguis of Hastings, who reached India in the October of that year. This nobleman held the reins of government until the 9th January 1823, when he resigned, and was succeeded provisionally by Mr. Adam, until the arrival of Lord Amherst, which took place on the 4th of August 1823. — (Colebrooke, F Buchanan, Public MS. Documents, Sin H Strachey, C Grant, Fullarton, Ward, Wilson, Stewart, Crisp, J. D Paterson, Harington, Mill, R. Grant, East, Gholaum Hossern, &c)

BENGAL, BAY OF —This portion of the Indian ocean has the figure of an equilateral triangle, very much 1esembling in shape, though larger in size, that formed by the continent of the Deccan and Southern India, and usually, but improperly, denominated the peninsula. On the west, one limb extends from Bengal to Ceylon, on the east from Bengal to Junk Ceylon; and the third across the bay from Ceylon to Junk Ceylon. Each limb may be estimated at 1,120 miles in length, and the whole is comprehended within the latitudes of 8° and 20° N. At the bottom of the bay the difference of longitude between the towns of Balasore and Chittagong on the opposite sides is 4° 53'.

The eastern coast of the bay is strewed over with numerous islands and chains of islands, varying in dimensions, elevation, and other circumstances, while on the western coast not one is to be found from Ceylon to Bengal. Neither does the west coast possess one good harbour for large ships, whereas the opposite coast affords abundance, such as Arracan, Cheduba, Negrais, Syriam, Martaban, Tavoy, King's Island, Junk Ceylon, Pulo Lada, and the Mergui Archinelago In other respects also the two shores differ considerably; Coromandel, thirty miles from the

beach, has no soundinger the east coast has soundings two degrees off Coromandel in comparatively a clear country ; the cast con t of the har le covered with wood Coromandel is often purched with heat, from the winds blowing over barren sunds) the enst coast la always cool On the west coast the mouths of the rivers are barred with sand; on the cast coast they are deep and middy Cocomundel has often destructive gales ; the east coast has seldom any

The numerous rivers that flow into the bay bring down such sast quantitles of allme mod, and sand, that the sea appears turbed at o great distance from the shore. In these parts the tides and currents run with great selecity; and when counter currents meet a rippling is formed extending several miles in a straight line attend ed with a noise resembling breakers.

The winds in the bay of Beneal Are raid to blow six months from the north-east and the other six from the south west this is not precisely the case, but it is sufficiently occurate for general purposes. It is remarkable that in many parts of India during March and April there are on shore strong winds blowing directly from the sea while in the offing it is a per feet calm; thus at Bengal there ore in that scaron very strong southerly winds while in the bay calms prevoil ontil Voy and June On the coast of Malabar the south west monsoon does not commence blowing with atrength until the beginning of the rainy season; but on shore there are strong westerly winds from ebout the vernal equinox .- (Forrett Johnsons Rennel F Buchanan Finlayson de )

HENORAROW -A considerable town in the Nabob of Oude a territories, atuated on on elevated anot of ground forty-four miles W from Lucknow | lat. 20° 54 N., lon 80° 7 E.

RENTOTIES A tilinge on the west erart of Legion, much releismed for the execulence of its oysters; lat G' 21 S., fon 70° 56 B., thirty-clait miles & S L. from Columbo.

## BERAR

A large province of the Decean, al turied between the placteenth and twentieth degrees of north latitude, the limits of which do not appear to have ever been correctly defined To the north it is bounded by Candenie and Malwa ; on the south by Aorung alad and Beeder; to the east It has the extensive province of Gundwana ( and on the west Capdensh and Aorning almi In 1.12 It was described by Abul Fazel, in the Institutes of Acber as follows : The ancient names of this soubah are Durdatutt, Hoodavoodyntt and Fithener It is antuoted in the accord climate; the length from Inttalch to Beersgurh ly 200 cors, and the breadth from Buniler to Hudia measures 160 toss On tho east it joins in Becracurh ; on the north is Settarali I on the south limdia I and on the west Telingana. It endire led into the following districts leby 4 Vernalahy 5 Kallem ( 6 Basanmy 7 Mahnrey B Blamrkdurg 9 Patra ; 10 Telinganch ; 11 Roingur; 12 Bheker; 13 Puffyslch

It will be percured that the province of Bernt, as described by Abul Fazel, differs materially from the modern acceptation of the name the former including (but Improperly) the whole region from Dowlatabad to Orasm the eastern portlor of which was certainly not subdued and probably but very industractly known to the Emperor Acber or his functionories. Augpoor has generally been considered the capital, and its sovereign named the Berar Raya but this is a mistake, as the city of Nagpoor atunds in Gundwana, the proper capital of Berar being Ellienpoor The soubah of Berar was formed while Acher reigned from connuests made south of the Nerhudda, but the

eastern quarter of the Decean, as assigned by Abul Fazel, was never thoroughly subdued, or even explored, by any Mahomedan ruler. The urmcipal geographical subdivisions of note at present are,

1. Beytalbarry. 5. Waussim.

Nernallah.
 Gawelghur.
 Kullum.

4. Manhker.

The modern province is centrally situated, being nearly at an equal distance from the Bay of Bengal and the western coast of India Berar Proper 13 an elevated vulley, ascended by a chain of ghauts or mountain passes, extending from Adjuntee to the Wurda river, which were surveyed in 1816 by engineer officers from Ma-The section of this chain, extending from Adjuntee to Lucknawanec, a distance of fifty-seven miles. having been the routes of ingress and egress of the Pindarries, was subject to stricter investigation than the rest; a description, therefore, of this portion will furnish a tolerable idea of the whole

The general circumstances of the range are entirely the same, and their aspect nearly so, presenting merely a succession of high grounds, with here and there a small peak visible above the rest, the deep breaks and ravines, which lead in some places to a gentle, and in others to an abrupt descent into the valley of Berar, being only perceived when nearly approached Some of these ghauts are impassable for carriages, laden camels, or bullocks, some for horses, and some are mere hill paths The surface of the hills in this section of the chain is covered with loose stones and low jungle, and but little cultivation is seen, neither is there any timber large enough for building, although enough may be found for stockades, or revetments for an earthen parapet, if wanted to barricade a pass About Botalghaut some trees of larger size The Badoolah ghaut is the easiest ascended, and is the one most frequented by natives and travellers In 1816 a great proportion of the villages near the hills were found uninhabited; and the tract of country along their summits, from Buldaunali to Muir, was equally desolate, the soil lieing apparently imappropriated. A considerable proportion of the villages are subject to the Nizam, but others towards the north-west belonged to the Peshwa, and have of course devolved to the British government. In the vicinity of Soulut the range between Ajuntee and Lucknawaree attains its greatest elevation, and with the exception of a few projecting points, the face in general resembles a perpendicular wall. Owing to the extent of these chains, and their numerous openings, which permit horse to pass in almost every part, any plan of defence against predatory cavalry is impracticable.

Even hefore the desolating invasions of the Pindarries, the Nizam's portion of Berar between Jaulna and the Tuptee was thinly inhabited and little cultivated, although the soil is naturally rich, as is proved by the abundance of fine grass it spontaneously produces The soil in this quarter is the black cotton, so generally prevalent through the Deccan and south of India. The grains most cultivated in Berar are wheat, Indian corn, Bengal gram, peas, and vetches, flax also is raised. These are all sown about the end of the rains in September and October, and are ripe in January. The Nagpoor wheat is reckoned the most productive and nutritious in India, and requires only three months to come to perfection. When distilled it yields an excellent spilt resembling whiskey, but not quite so good. The second crop, which is Indian corn, is sown after the violent rains of June and July, ripens in October, and with wheat forms the chief subsistence of the inhabitants

f The largest rivers of Berar are the Tuptee, two streams both named Poorna, one flowing east and the other west, the Wurda, the Pain Gunga The towns of most note are, Ellichpoor, Mulcapoor, Baulapoor, Akont, Akolah, Nernallah, Gawelghur, and Omrawutty. A great pro-

219

portion of the inhabitants are llin doos but from various causes the country how never attained any re markable degree of prosperity t indeed for mony years past its decline has been progressive more especially of the portion transferred to the \izam Such commerco as exists, m 1504 is merely that of itinerant inland ear riers so numerous all over the Dec can and m one particular instanco la promoted by a singular practice prevalent among the lowest tribes of Berar and Guodwana who not unfrequently yow to perform suicide in gratitude for boons solicited from idols, and in their opinion obtained In fulfilment of their premise the successful votory throws bluself from o precipiec named Calo Bhairava, ai tuated in the mountains between the Tuptee and Nerbudda The annual fair held near the spot early to spring usually witnesses eight or ten victims to this superstition and at the same time much business is transacted by merchants and others ottracted to the spot by the expected immolations

Among the states that crose on the ruins of the Bhomenee empire of the Deccan A D 1510 one consisted of the southern portion of Berar and was comed the Ummod Shahy dr nasty from its founder Ummed ul Mulk but it only lasted four genera tions when it fell under the dominion of Ahmednugger A D 1574 and un der the Mogul sway towards the con clusion of the seventeenth century When that great empire relaxed the strength of its grasp the prevince was overrun by rapacious hordes of Mahorattas ond was for some years olmost equally slivided between the Peshwo and the Rojo of Nagpoor Tho lotter having in on evil hour put himself forward as the Ally of Dow lul Row Sindio his share was in 1804 transferred to the Nizam with whom great part of the modern pro vince still remoins nod suffers much miscovernment

The whole of the Nisam a possessions north of the Godavery had for many years been infested by backs of freebucters, known by the names of

Nalks and Bheels who deprived tho cultivators of their harvest com pelled merchants and travellers to here large e-corts and by their cruel ties and depredations kent the Bernr province in a stote of incessant com motion The ranges of hills inter secting Berar had long been possessed by robbers, who either subsisted on direct plunder or by levying contri butions on the inhobitants and traveliers an exemption from replac being purchased by stipulated pay The cultivators ments in money accured their crops by giving a share to the freebooters and trevellers consented to a tax for permission to prosecute their journey in safety the course of time these duties became established and deficed and entitled the inhabitants to protection from all extraneous depredation Tho Nizam a government knowing from experience the difficulty of extirpat ing these maranders, whose dens were attuated in the fastnesses of moun tains inaccessible to the operations of regular troops considered it good policy to acquiesce in a acttlement which it had not nower to prevent, only which to o certain degree protected the traders and cultivators. The ministers of Hyderabad in consequenco not only sonctloned the en gazements, but provided for the regular poyment of the compulsory duues, govo londs to the Naks and occasionally employed them in the acrylce of the state

Owing to the famioes of 1807 and 1808 many villages in Bernr were descrited nod the Noiks and Bheels lost the contributions they had so long been occustomed to exact make up the deficiency they took advantage of the distracted state of the country and extended their ravages in which proceeding they were joined by many needy adventorers from all parts of the province and by some troops from the disbanded ar mies of Simlia, Holkar and the Nagpoor Raja Their parties gradually became more formidable and as the difficulty of subsistence tocreased with their numbers their predatory

excursions became more extended, more frequent, and more destructive. Different bands occasionally quarrelled about the distribution of the booty when acquired, and many sanguinary engagements took place during the adjustment of their respective pretensions; but the result was, that large tracts of land were abandoned to wild beasts, and a great proportion of the villages deserted. The cultivators, finding no peace without, flocked eagerly to the walled towns, and even in their immediate vicinity the crops were not secure from the attacks of the Bheels, large bodies of whom ranged unrestrained throughout the country. Raja Mohiput Ram, the Nizam's viceroy in Beiar, either from indolence, despair of success, or with the view of employing them for his own exigencies, not only took no measures to suppress them, but was suspected of affording them secret encouragement, and of sharing Raja Govind Buksh. their plunder another of the Nizam's officers, often endeavoured to eheck their rapine, but the Bheels managed always to evade such bodies of troops as they could not resist. The service against them was of so fatiguing and dangerous a description, that the Nizam's officers either shunned it, or undertook the task with apathy and reluc-Cavalry could not act in the strong and rugged eountry to which the Bhcels retreated, and even infantry could not penetrate their more secluded haunts.

These difficulties, however, might have been overcome, had not a still greater remained, which was the encouragement given to the banditti by many officers in the Nizam's service, and more especially by the Nabob Soobhan Khan This faithful dignitary of the Nizam's court not only concerted the plundering expeditions of the Narks, and supplied them with provisions and ammunition, but actually employed some of the government troops to assist them, receiving the plunder into the fortresses where he commanded as un officer of government, and retaining a share for

his own benefit, estimated in common vears at five lacks of rupees. The Nizam's prime minister, Meer Allum, had often expressed his desire to liberate Berar from these oppressions, which had so absorbed the revenue that scarcely enough was left to pay the few troops stationed there. efforts were found meffectual so long as Soobhan Khan was permitted to retain his jaghires in the province, his conduct being so insolent and eontumacious, as well as secretly favourable to the disorders he was employed to suppress.

In addition to these evils this miserable province suffered much from the Nizam's own troops, especially the cavalry, although ostensibly maintained for its defence at an enormous expense. These eavalry corps were of two descriptions: first, such as were paid directly by the local government of Berar from the revenues of the province; secondly, those supported by different chieftains in eonsideration of nulitary jaghires conferred on them. The first deseription, by far the most numerous, was composed, like all the irregular horse of India, of small independent squads, raised and commanded by different sirdars. On any emergency these squads were united into one large body, when the command was generally bestowed either on some favourite, or on some individual able to conciliate by bribery the good-will of those in power. Although this faulty organization was sufficient of itself to render such corps unserviceable, a still greater eause of their insufficiency arose from their mode of payment Each jemadar of a squad hired his party to the chieftain, for a sum varying from forty-five to fiftyfive rupces per horseman, for which the jemadar engaged to furnish a horse, rider, accoutrements, and ammunition. Every loss or casualty was borne by himself, so that it was not only his interest to avoid danger, but also to maintain his party at the smallest possible expense To counteract this tendency a muster-master was appointed by the Nizan, but

this footh-way was not referentiff pervaded of a to concue at the les position on the futers went and wes Learn't be foregraf as for in street Hence many of three horses had en existence but on paper and many ter day. The second description of carairy above alluded to was that of the jarbitedare, negation in the same manner at the I'mt and with a sere honourable every mone, equally inch eient The winter to I of ile brit description gare 7 latt and of the second 4,310; but the effective num hera pever were ascertained; and in ad litton to there Salabut hhan, one of the lachitedars, was bound to main taio 2000 Infantry When Colonel Poreton remared to flerar and took charge he found that any endeavours to improve these corps, constituted as they were would be pravalling and that in point of fact they were as much dreaked as the Hudistics by the peaceful Inhabitants they were sent to protect

The Niram a regular Infantry sta tioned in Berar were convibered the most effective of bis forces, and com po ed the contingent he was bound to furnish in the event of a joint war taking place. Those however arrying under itaja Mohiput Ram could not be depended on as thereond ted of sepore who had formed the corps of \ Itaymond and never could be brought to a lopt the British duck pline, but remained dressed in the French costume practised the French exercise and employed French words of command The person who in reality commanded these troops, and possessed considerable influence over them was a Spaniard named Clements D Avils steadily attached to Moniput Ram and as well as his troops, autonously hostile to the Britab cause. Most of the other officers were low adventurers ready to engage in any dispute; and the holf-caste men were destinguished from the natives merely by wearing o bot

Under these untoward circum stances, Meer Allum the Szania prime minister in 1807 applicated

flats Count H tak (if a feether of Res Clandes Lad) to especiale bu every lials 4 1 pot liam in the sudemerr pert of Brest, and at the same time exercise could be at a pass lesteen of the list he laiding fore ar recent it it ed assertate of I necks The good effects that had been artiespecial from this even see by the thirt fee mate a ray sould brane man for by a succession of events. It is Unhiral lines on recession medice of the processes lon, atterpend to rol leet there a under pretency of harlo, been enleted with three to linders-In It but the leading lash redain and raditory shieftains distreparted his orders. Being thus frustes ed In ble martial projects he entertained the drugs of excepte, with his tres sure | but salarquently relinquished it, prois' ly on account of his family being at the capital, where he ender toured I y intrigues to obtain permisslop to join there; but hierur was fixed on for the future place of his residence. The restless nature of life amidilan however ere ling drove him into oven rebellion when like troops, amounting in 6000 men were attacked by a Stram a detach trent condition of 1 000 caraley an I 1,300 infantry; when owing to the da tarily conduct of the carelry the telels proved sletonous killing and woonding nearly the whole of the infantry Upon the distance a part infantry Upon the distance a part of the libit is subsidiary force was marched against him and in a very short campaign effectually subdued tils troops, and enmpelled himself to surren ler After Infinito difficulty from the caprice and perseness of the Auam's character, which could only be surmounted by the direct Interference of the British govern ment, Sookhan Alton the other dis infected naboli was removed from Herar to the capital and Clement D'Avilla from whom resistance had been expected submitted in thomost peaceoble manner, merely requesting permission to proceed to Gon.— (Captain Sydenham I lent Rayley that Fatel Rennell Heyne Ferishia Colebranke Leckie &c )

Bereng.—A town in Cashmere, thirty-seven miles E from the city of Cashmere, near to which is a long defile in a mountain, containing a reservoir of water seven ells square, considered by the Hindoos a place of great sanctity.

Berhampon (Barhanpura)—A town in Bengal, situated on the east bank of the Bhagirathi, or Cossimbazar river, about six miles south from Moorshedabad; lat 24°4′N, lon. 89°14′E. A brigade of native and European troops are stationed here in commodious barracks, which form a noble square, separated from the river by a fine esplanade, with a hospital, bazar, and other buildings to the north.

Bernagur (Virnagara)—A small town in the province of Bengal, district of Moorshedabad, five miles north from the city, lat. 24° 16' N., lon. 88° 13' E.

Bernaver.—A town in the Delhi province, thirty-three miles N. by E. from the city of Delhi; lat. 29° 8'N, lon 77° 16' E

Beroden —A town in the province of Agra, twenty miles E from Alvar; lat 27° 44′ N., lon 76° 50′ E.

BERUD (tribe) - See PADSHAH-

Beroll.—A town in the province of Allahabad, fourteen miles north from Ditteah, lat. 25° 51' N., lon 78° 28' E

Berown —A small native fortification in the province of Allahabad, five miles north from Ditteah, lat. 25° 51′, lon. 78° 21′ E.

Besuki (Vasuki)—A town and small district in Java, situated near the eastern extremity of the island. It is but indifferently supplied with water, and has very little land fit for cultivation that is not already under cultivation; but it is better peopled in proportion than the adjacent districts The town of Besuki stands in lat. 7° 40′ S, lon. 113° 35′ W.

633 miles E from Batavia —(Raffles,

Brss River.—This river issues from the great tank of Bhopaul, in the province of Malwa, and proceeding in a north-easterly direction, joins the Betwah or Betwuntah, one mile north of Bhilsa. At Islamghur it is joined by the Patna, a small liver that flows from the lesser tank of Bhopaul.

Besself Ghaut (Bisavali Ghat).

A pass through the western range of mountains leading from Mysore to the mailtime province of Canara

Betaison—A town and place of pilgrimage in the Agra province, situated on the Jumua, thirty-five unles S.E from Agra; lat. 26° 57′, lon. 78° 24′ E Near to this place are the remains of Sarapura, an ancient Hindoo city.—(Tod, &c)

Bettian (Bhattia, named also Chumpa un)—A town in the province of Bahar, district of Shahabad, ninety miles NNW from Paina, lat. 26° 47' N., lon 84° 40' E

Bettoorian (Bhitoria)—A subdivision of the great zemindarry of Rajeshahy, in the province of Bengal. A D. 1396, Raja Cansa, the Hindoo zemindar of this tract, rebelled against Shums ud Deen, the Mahomedan sovereign of Bengal, who was defeated and slain. On this event Raja Cansa seated himself on the vacant throne, which, after a reign of seven years, he transmitted to his son Cheetmul; who turning Mahomedan, reigned under the more sonorous appellation of Sultan Jellal ud Deen

Betwa (Velava), or Betwuntee River —This liver rises in the province of Gundwana, three miles southwest of the Shahpoor ghaut, enters Malwa about sixteen miles east of Bhopaul, and afterwards receives the accession of many streams until it reaches Erich, where it winds eastward through a broken rocky ridge, which causes a rapid, and afterwards joins the Jumna below Calpee, having completed a serpentine course of

about 310 miles in o north-casterly direction. Although during the rains in considerable body of water flows through its clasonel, it does not appear in he navigable of any time of the vear.

Bryan (lipses) Rives (the Hyphans)—This is the fourth river of the Punyth of Leliore and the Hyphans of Alexander's instorants. The Best (yea) Gunga and the Han (rano) Gunga are said to form the Beyan the first passiog Note haun grals to the south and the latter to the northward both in a westerly direction joining of liurrecpond, one march below the fort one passing on each side ood unting below so as to form in 1 shad. Abul Fazed writes that the source of the Beyah named Abyekoond is in the mountains of

heloo pergunnah of Sultanpoor After sssuing from the fulls this river flows in a south-westerly di-1800 when the floods were of the highest measured 740 yards ocross, the stream passing with a rapid cur rent and a high bank on the right Bide In the cold season it is ford oble licre of most places, but in Its bed ore mony quicksands and when the waters are low mony Islands and sandbanks are left exposed. Beyab joins the Sutuleje thirty five miles below Bhirowal near Horraka, and not far from Ferozepoor after which conjunction the united streams are first named Beas and fur ther on Gurrah by which appellation it is also knows at Gordeean glinut near Pakputtun 160 miles above Bahawulpoor and 100 SSW from Lahore The Bevah and Sutulcie at their confluence, are nearly the same size but the last is rather tha largest. Their course also is nearly the same from the snowy ridge 150 miles, to their junction and 260 more to where they unite with the aggregated waters of the Jhylum Chinaub and Ravey The total length of its course including windings. may be estimated at 500 miles. In 1805 Lord Lake pursued Jeswunt

How Holker to the banks of this river where he said for pence and concluded a treaty — (Mocariney Rennel fc)

## Beyrangen See Bicanen

Bivant—A tunn in the province of Cutch district of Wagur, situated towards the northern extremity fifty chit miles N I from Anjar lat 23°41 N 100 70°0° E The site of Beylah is commonding as n ml litary post to check the plunderers from the desert

Brysas (Thar) -- A town in Ben gal the godern residence of the Cooch Baler rags thirty two miles N E. from Rungpoor lat 26° 18 N., los 80° 22° E

Beyersia.—A town in the province of Vislwa pergunneh of Oojein which in 1820 had a small stone ghurry, and contained 300 houses.

Beyversanax,—A small distret in the Bernr province situated south of the Ajuntee glant, between the twentieth and twenty first degrees of north blatude respecting which scarcely ony thing is known Except Ajuntee it does notappear to contain any place of note.

Beroaha (Bijors)—A toxn in the Northern Circars forty-ooe miles NW from his ulipatism int 16°30° N lon 80°43 E. The stream of the Arisins is there confined between two bold projecting mountains which form a strait 1'100 Junds broad Lower down the river expands to the width of a mile but is still bounded on oil sides by fine mountain seemery. The great thorough faro between the Curcars and the Carantle is by the ferry of Bezoars which is provided with some large deep boats, besides abundance of catamistics formed by two palmyra trunks is shed together and plotformed with boards.

The town or rather village of Bezoara, is peopled with Brahmins and beggars. At one extremity is a well built Monomedan serai and mosque in the stylo of Upper Hindostan,

and apparently a modern erection The rocks above are also embellished with picturesque Hindoo temples, and several cave temples have been formed in the body of the mountain, and another in a conical hill on the opposite side of the Krishna They are, however, very inferior to the meanest of the Hindoo excavations in the west of India The bungalow maintained here for the accommodation of travellers commands a fine prospect over the surrounding country.—(Fullarton, &c)

Bhadrinath (Vadarmatha) —A town and temple situated on the west side of the Alacananda river, in the centre of a valley about four miles long, and one where broadest; lat 30° 43′ N., lon 79° 39′ E, eighty miles north from Almora in Kumaon, 10,294 feet above the level of the sea The town is built on the sloping bank of the river, and in 1808 contained only about thirty huts for the accommodation of the Brahmins and other attendants on the temple, which is about forty-five feet high, of a conical form, with a small cupola, surmounted by a copper roof, over which is a golden ball and spite The principal idol is three feet high, cut in black stone or maible, dressed in a suit of gold and silver brocade, the hands and feet only being un-This temple, in 1808 was covered said to possess 700 villages in different parts of Gurwal and Kumaon, and the high priesthood is restricted to the remote Deceany Brahmins of the Chault or Namburi tribes; indeed, latterly, the pontificate used to be put up to sale by the Gorkas During the months of pilgrimage the deity is well clothed, fares sumptuously, and has a large establishment of servants, but on the approach of winter he is tacked up in a vault along with the treasure, and the priests take their departure. The number of pilgrims who visit Bhadrinath annually has been estimated at 50,000, mostly religious mendicants and devotees from all quarters of India The surrounding country is of the most gigantic

altitude The middle peak at the head of the Bhadrinath district, marked as No 19 B in Capt. Hodgson and Lieut Heibert's survey, lat. 30° 44′ N., lon. 79° 16′ E, was found to be elevated 23,441 feet above the level of the sea.

At this place there is a warm bath, supplied by a spring of hot water that issues from the mountain with a thick steam and sulphurous smell; and close to it there is a cold spring. On the 29th of May 1808 masses of snow seventy feet thick remained undissolved, and the tops of the high mountains have probably nevel lost then white covering since the beginning of the world A great majority of Hindoos, who know nothing of Bhadrinath except from books, imagine that many holy persons have retired to this asylum, where they have been living for several thousand years in quiet expectation of better times To pilgrims who arrive with hopes of meeting these personages, a cavern is pointed out as the place of their residence: but as the excavation is choked up with snow, there is no danger of its inhabitants being disturbed until the return of the golden age —(Raper, F Buchanan, Capt. Hodgson, Lieut Herbert, &c )

BHAGA SINGH —A temple in Northern Hindostan, thirty-cight miles N E. from Almora, lat 29° 48′ N, lon 80° 13′ E; 7,635 fect above the level of the sea

BHAGFSUR (Bhagiswara).—A mart in Northein Hindostan, district of Kumaon, situated west of the Calibranch of the Goggra river, twenty-two miles ENE from Almora, lat 29° 52′ N, lon 79° 53′ E Fairs are held here three times in the year, and are attended by traders from the low country.

BHAGWUNTGHUR—A Rajpoot village in the province of Ajmeer, sixteen inles N.W from Rantampoor, lat. 26° 10′ N, lon 76° 5′ E

BHAIRAVA MATH — A Hindoo place of worship in Northern Hindos-

tan intuated omong the sources of the Ganges, eacht miles W.S.W. from Gangoutn

Buallont,—A town in the prorance of Gujerat, situated on the south bank of the Nerbulda, infect miles N I from Broach t lat. 21° 50', lon 73° 15' E.

BHAMBHORA GHES — A fort In-Northern Hudostan district of Busland and the Long rules between the Andril and Matroli two feeders of the Paber river; 1st. "11" 14 \( \)\_n ion 77" 47 \( L. \) Lievation abore the sea D 944 feet.

BILAMIO (or I awas)—A town in the Birmese dominum situated on the banks of the Irawaldy 170 miles north from the cruy of Ava lat. 24° 10° N ion. 90° 44° 1 twenty miles from the province of 1 unan in Chlor. This is the capital of one of the time principalities of the Shaus or Virelap Shans, as they are designated by the Bormese. This principality is said to occupy the space between the Irawaldy and China, sod is said to hore been taken from the Chinese since the accession of the present Birman dynasty—(Vynex, & Bachanas fe)

BHANTOOR,-A town in the prosince of Orissa, maty five miles 8 W from Cuttack | lat 10° 48 N 1 Dur ing the insurrection of the Pikes this was for some time the head quarters of the second battallon eighteenth regiment of Bengal \stivo Infuntry commanded by Vlajor Wel bent Hamilton who along with nearly oll his detachment fell a victim to the unhealthluces of the post. This officer joined the Bengal army lo 1707, when only fifteen years of age and on the 4th of May 1799 entered the breach at the sturming of Senn gapatam with the grensdiers of his battolico He afterwards perved as o subaltern in many other quarters during the intervols of leisure devoting his ottention to the study of the Asiatic languages in annio of which (the Arabic Persian and Maharatts) he attained so remarkable o profi escocy that he was oppointed under YOL I

Ale Fighinstone to the escorta at Poons and Nagpoor with a view to his assistance in the ilipiometre department After taking the moal furlough to I mope, he rejoined tho Bengal army, and served through tho Acpaulese campaigng but as han pencil to many other officers with out any opportunity of destinguishing himself From the Himslaya mountains he was marched south to the salt swamps of Cuttack where he met ble fate on the 10th April 1818. s the premature oge of thirty-teren and now her buried at Juggernauth like almost all really brave men his manners were singularly centle and moffen we and life de position so kind and charitable that he protably never had an enemy By his personal friends lie was sincerely be loved and among these may be mentioned as best known to fame Sir John Malcolm and bir James Mack intoth

BHANFOORA .- \ large town in the province of Vising belonging to Lini-Lar althoted on the Rewn river thistrict of Rampoora t lat 24° 31 No. 100 70° 00 L The fort here has never been completed The walls are built of stone and there is a palace within also unfinished. They were both begun by Jeswunt Ilnw Holker of whom there is a energed marble statue and the walls are like wise ornamented with sculpture It Is one of the best built towns in this quarter and in 1920 was estimated to contain a population of 13 400 persons - (Malcolm &c)

Buster -- A smoll town in the province of Allahabad twenty-one miles north from Banda lat 25° 45 N ion 80° 20' E

Bhatta.—A considerable town in the province of Ajmert district of a Harrowty, forty-five miles S by E from Bhanpoora lat 24° 15' N lon 78° 30' E

BHATTIA.—A town situated near the western extremity of the Guje rat pennisula, lat 22° 9' N, loo 00° 26 E

BHATNEER .- This town, the modern capital of the Bhatty tribe, is of some antiquity, as it was taken and destroyed by Timour, when he invaded Hindostan in 1398, when the surrounding country must have been in a much superior condition, or it would neither have attracted his notice or subsisted his vast army. stands on the eastern verge of the great sandy desert, in lat 29° 36' N, Ion 74° 12' E; about 130 miles N N.E. from Breanere, and 100 N.W. from Hissar. The whole country west of Hissar to Bhatneer is an immense plain, in travelling over which the stages are long and water scanty. By the natives the soil is described as of a hard substance and blueish colour, so as at a distance to have the appearance of water. This town was taken from the Bhattees in 1807 by the Raja of Bicanere, who in 1810 still retained possession — (Lieut, White, E Gardner, &c)

BHATGONG -A city in northern Hindostan, and, before the Goorka conquests, the seat of an independent chief; lat. 27° 40′ N, lon. 85° 8'E.; eight miles ESE. from Catmandoo. It ranks the third of the Nepaulese valley, and thirty years ago was estimated to contain 12,000 houses; but, probably, the number was exaggerated by the native infor-The palace and other buildings have rather a striking appearance, owing chicfly to the excellent quality of the bricks and tiles, in the manufacture of which the Nepaulesc excel. Its ancient name was Dharmapatan, by the Newars it is called Khopodais, from its resemblance to the dumbroo or guitar of Siva. Bhatgong is the Benarcs of the Gorkha dominions, and was supposed to contain many valuable Sanscrit manuscripts; but none have as yet been brought to European notice. It is also the favourite residence of the Nepaulese Brahmins, containing more families of that easte than Catmandoo and Lalita Patan together, but they are not in great repute either for learning or devotion Of the lower

classes a great proportion are Newars, the Khetri or military tribe flocking to the capital for employment.—(Kirkpatrick, F. Buchanan, &c.)

BHATTIFS -The country of the Bhatties is situated in the northeastern quarter of the Aimeer province, about the thutieth degree of north latitude, and, until the progress of events brought the British arms into their vicinity, were scarcely known even by name It is difficult to assign limits to such a country and such a people, both abhorrent of dcfinition, but the following may be considered an approximation towards To the north it may be accuracy. described as limited by the combined streams of the Sutuleje and Beyah (the Hysudrus and Hyphasis), here named the Gurrah, on the south by the territories of the Bicanere Raja and the Shekawutties, on the east it has the district of Hurrianna, and protected chiefs in the Delhi province, and on the west the great sandy desert, of which it is almost an integral portion. The north-cast corner, in some old maps named Latty Afghany, is still wholly unknown, although within a short distance of the British cantonments at Luddee-This extensive tract of waste country forms a natural boundary to the British possessions in this quarter of Hindostan.

From the town of Futtchabad to Bhatneer, along the banks of the Cuggur river, is the part of the Bhatty territories best adapted for cultivation, being (it is reported) benefitted by the overflowing of that river; but respecting its source, course, and termination, our knowledge is still very imperfect. The land within the influence of this inundation is said to produce wheat, rice, and barley; the remainder of the Bhatty country, owing to the want of moisture, is mostly unfit for agricultural pur-poses. The Cuggar is now lost in the sands to the west of Bhatnecr, although it is supposed formerly to have joined the Sutuleic in

In the the vicinity of Ferozepoor month of March the tanks dry up rapidly, after which deep wells are the only resource for the parched eattle and their owners Bhatneer and Batladch are the principal Blatt ty towns; but those best known to Europeans are situated in the vicinity of Hurrianna (where in some parts this tribe claim n right of pasturage), and are named Futtehabad, Sirsah, Ilnneah Beerghur, and Beeranah There is but little trade carried on in this community the members of which have hitherto preferred thier ing to every other vocation With the exception of the sale of the sur plus grain ghee, and earth (all Ind. nificant except the last's they maintain but little intercourse with the neighbouring states and that chiefly through petty traffichers of the Sheikh Furreed sect Their Imports

are white cloth sugar, and sait The Bhattles were originally shepherde of whom various tribre are still found la the Punish and scat tered over the buch erounds east of the Indus from the sea to Ooch the institutes of Acber these bordes are by Abul Fazel named Asham Their chiefe were originally Respoots but now Mahomedana which falth has also been adopted by the lower castes who were originally They have long been noted Jauls. as n plundering people, remarkable in Hindostan for carrying on their depredations on foot, and for the length and rapidity of their pedeatrian excursions The Bhatty females appear in public unveiled and are not compelled to observe the strict seels mon so universal elsewhere among the followers of Mahamed

Prior to the cession of Hurranna to the British, the chief of the Bhat tice was khan Bahadur Khan who in 1810 held twenty-one tillages Including Futtehabad Sirsah and Ro ncah It was then estlinated that the force which the Ilhattles could collect would not eneced 10,000 men of whom not one-extreenth pos sessed fire-arms They were found however very expert in conducting

n al ht attack, and would travel on their expeditions in a very unexpect ed illetance. In the year above-mentlaned Hanesh formed the western boundary of him Bahadur's country, having an extensive tract of wasto leod on the north west and south Bhatneer the negrest town is distunt about forty read miles in the west. The town of Nehar lies forty three road miles to the south and belongs to a Shekawutty chiefinin The town of Tulwunia sulject to Raja Falieb bin h stands about forty road miles to the north Some years prior to the British conquests in this part of Hindoston the revenues of buttehalad Sirah and Ranesh were extinuted at 40 000 rupers per an num It is and to have since become less productive on account of the banks which have been constructed across the Lugger river by the Seik chiefs to the north west, which have prevented these perguanaha from receiving their due share of the stream It was also calculated, that If the Bhatty country taken possession of had been retained it would have slelded a revenue of 80,000 rapees per annum although distress lind been caused by a deliciency of rain In that and region

On the first occupation of Hursi anna la 1807 nothing was left un done by the British nutheraties to concluse the Bhatties who were as sured that their frontier would no longer be disturbed by handittl from thence as ha I litherto been the case onder all native governments Bhatty chiefs were in their turn nois erted to restrain the predatory liabita of their subjects, and suppress oil aggressions on a friendly territory; but it was eventually found that they contemned all authorsty that Inter fered with their schemes of phinder Bahadar khan also declined affording his assistance declaring he was apprehensivo of being entrapped and made prisoner as had happened dur ing the Galio-Maharatta sway in upper Il mdostan

All amleable overtures being reject ed and the aggressions on the inhabit 0 2

tants of Hurrianna continuing, an expedition was marched into the Bhatty country in December 1810, under the command of Col. Adams. when Bahadur Khan was expelled, and Futtehabad and other refractory towns submitted without resistance. On this occasion Zabeta Khan (the son of Bahadur Khan) joined the British camp, without stipulating for any terms, in consideration of which unconditional submission, all his country was restored to him, with the exception of Futtehabad, which was retained as a frontier post, from whence a garrison could superintend the motions of this unquiet race, whom it was difficult to wean from the predatory habits to which they had been accustomed from time unmemorial. The towns of Beerghur and Beeranch were also re-annexed to the district of Hurrianna, from which they had been separated making these experiments, it was judged expedient that Zabeta Khan should receive back his territories unencumbered by any tributary engagement, as the payment of a tribute virtually implied an obligation on the superior power to protect its tributary, which might eventually have proved embarrassing, and was at the same time completely at variance with the fundamental maxim of British policy, as referring to the native principalities of Hindostan For some time afterwards tranquillity prevailed through the Bhatty country, but in 1818 they again became restless, and possessed themselves of Futtehabad. which had been held by the Seiks under the British authority. A strong detachment was in consequence again marched into the country, for the purpose of destroying all the petty forts, and expelling the agitators, which service was effected without encountering any serious opposition. -(Lieut White, George Thomas, Col. Adams, Archibald Seton, &c)

BHAVANI RIVER.—A river in the Coimbatoor province which flows past the town of Sattimungalum, and afterwards joins the Krishna at Bhavani Kudal.

BHAVANI KUDAL—A town in the Coimbatoor province, fifty-eight miles N.E. from the town of Coimbatoor; lat. 11°26′ N, lon. 77°44′ E. It stands at the conflux of the Bhavani and Cavery, on which account it is considered a place of superior sanctity, and much resorted to by the Hindoos It also contains two celebrated temples, one dedicated to Vishnu, and the other to Siva.—(F. Buchanan, &c.)

Bhawur —A pergunnah in northern Hindostan, situated between the Sutuleje and Jumna. The section of this pergunnah situated to the west of the Tonse was formerly named Bucan, but now Dewghur, from being the spot where the sect and tenets of the Mahassoo Dewtah religion originated, since which epocha the Dewghur division has been considered holy land.

According to Brahminical traditions, at a remote era of time, a man ploughing in the pergunnah of Bucan saw a snake, which, erecting itself before him, said, "I am the divinity of the place. raise near this spot an image to be worshipped, and call it Mahassoo Dewtah, and it will reveal to you laws that are to be obeyed." On learning this vision of the cultivator some Brahmins made an image, and placed it in the field where the snake had appeared, and after some time had passed away, it was inspired to give them the following instructions, the observance of which secures the devout from the evils of the present world, and insures their happiness in that which is to come, viz

1st Never to sleep in a bed with four legs

2d Never to drink pure milk Butter-milk is permitted, but it is meritorious to abstain from the eating of butter, it being more praiseworthy to burn it at the shrines of the Mahassoo Dewtah or demigod.

3d Always to sacrifice the finest goats on the demigod's altar, and if similar sacrifices elsewhere be abstained from, so much the better

Some time after the promulgation of this specimen of supernatural wis-

don the Brahmuns removed the limage to Oonoorce, on the east bank of the Tone where It still remains much venerated by the people and Its presthood amply supplied with of ferings. — (Public MS. Documents, Birch, 5c)

BRIERE NOATH—A walled village with n mud fort belonging to Holear In the province of Cande h pergan nah of kurgoond fifty-two miles N N W from Boorhampoor This was formerly a large town, but so entirely runned by the Pundary Increasions, that only secenty-fire isourer renormaned. In 1800 the Inhabitants were returning and one street wol re-occupied — (Fullarion, Violeolas, 6fc.)

BREELS.-See Valwa and Cam

BRENNTO.—A small village in the hepaulese territories situated on the Rapty, whence a road leads over the Checupany mountalo; lat. 27° 23° An. ion 84° 80° E fourteeo miles SW from Caimandoo pt the place the valley of the Hapty finishes, ond the high mountains of Lama Dangra separate it from the country on the north watered by the brauches of the Bogmutty.—(F Buckanga ft c) of the Bogmutty.—(F Buckanga ft c)

BREEKTAL LARF .- A small but picturesquo lako in northern Illndustan omeog the mountains of humaon twenty nine miles travelling distance south from Almora, god on the lugh road from thence to Bamouri. The shape of this lake opproaches the figure of a triangle the length of the longest side being a mile and of the shortest five furlongs but it appears at some former perind to have been conviderably larger and its decrease has been attributed to the depositions from the different streams flowing into it About the centre its depth is eleven fathoms and its elevation above the ses 4,271 feet On the margia is a temple of Mahadeva ar Siva and the remains of an old Gorkha fort oo an eminence to the south below which stoods the village of Bheemtal.

consisting of a few miscrable hitte, with a government house for the occumedation of travellers, laving a commissariat depot attached. About two miles to the east of Bherntol there is another small lake, equally beautiful named the Nashoochea Tal ond the natives report that there are many others in the viciosty—(& bularios, 11 cbs.), 4c.

BILLINGTA—A small town in the Afmeer province, division of Chiltere, situated on the Goornety tiver, that y miles E. by S from Oderpoor Ia 1820 it was the head of a pergunnal yielding o revenue of about 10 000 rupees per moum to nrelative of the Oderpoor Ranas; but the town did not contain more than 600 houses.—(Valcolm &c.)

Baren —A small district in the Nizam a dominions in the prevince of Agrungshod astuated between the 18th and 19th degrees of north latt tude. This is a hill; tract of country thirdly peopled and ill governed but respecting which almost nothing is known as lathe case with the Nizam's dominions generally. It is intersected by two small streams the Sindpuna and Kumilya. Bheer the principal town stands in lat. 19th 17th, in 17th 58 E., serenty miles E from Ahmednog entry.

Bittanau.—A town in the Ajmeer province forty-seren miles N E from the cut of Oderpoor; lat. 23-26° N, lon 74-47 E In 1818 this place presented vestiges offormer opalence and industry but at their percent owing to the marrety so long prevalent as Rajpootons at was cearly roofiess and depopulated.

Buinn.—A town in the Agra province south of the Chumbul forty six miles N.E from Guaisor; Int 20° 27' N., Ion. 77° 20' E.

Bainoun,—A town in the province of Ajmeer thirty-four miles E.S.E. from Odeypoor Lat 24° 3 N lon 74° 13 E

Barakor,—A petty state in nor thern Hindustan, consisting of mouo talas, and containing acuther mloes or mart; formerly one of the twenty-four rajaships, but at present subject to the Nepaulese; lat. 27° 58' N, lon. 83° 48' E.

BHIRA —A town in the Lahore province, eighty-two miles N W from the city of Lahore; lat. 32° 10′ N, lon. 72° 50′ E.

Bhirowal.—A town in the province of Lahore, situated on the north side of the Beyah river, which when the floods are at the highest is here 740 yards over Lat 31° 20' N., lon. 75° 5' E, twenty-four miles S.E. from Amritsir.

BHISAGONG.—A village in the Singpho country adjacent to Assam, situated about lat. 27° 28′ N, lon 95° 40′ E.

BHOBANESER (Bhavaneswara).—At Bulwanta, in the province of Orissa, on the new road, sixteen miles from the town of Cuttack, a lofty massive tower is seen rising among the thickets that skirt the frontiers of Khoorda, six miles within which are the 1 emains of the ruined city of Bhobaneser, consisting of deserted and dilapidated towers and temples sacred to the worship of Mahadeva, From amidst the whole rises the great pagoda of the Ling Raja (Siva), conspicuous for size, loftiness, and the superiority of its architecture.

The natives say there were originally more than 7,000 places of worship consecrated here to Mahadeva, and that it contained no less than a erore of lingams. The vestiges of many places of this description are still visible, mostly mere shapeless masses of brick, buried amongst brushwood and rank vegetation The buildings are constructed of a reddish granite, resembling sandstone, in the form of towers rounded towards the summit, seldom less than sixty, and one rising to even 180 feet in height, The stones are held together by iron clamps, but no wood is to be seen throughout. The exterior is adorned with a profusion of sculptured ornaments, and the runed courts scattered over with an infinite variety of bulls,

lingams, and other symbols of Mahadeva, mixed with the forms, energies, and attributes of the whole Hindoo Pantheon.

About the centre the great tower or sanctuary uses to the elevation of 180 feet, erowned by an ornamented crest or head-piece, resembling a turban, which figure forms a distinguishing feature in the temple architecture The local traditions and of Orissa. histories concur in fixing the date of its completion in A D. 657. The city of Bhavaneser was founded by Raja Lalat Indra Kesarı, who reigned between A D. 617 and 660. A small establishment is still kept up here by the Khooi da Rajas, and the ruins are occasionally visited by Bengalese pilgrims on their way to Juggernauth. Among the curiosities of the neighbourhood is a huge figure of the lingam, forty feet high, consisting of one single shaft of sandstone -(Stirling, &c.)

BHOJIPOOR —A town in the Oudc territories, 102 miles N. from Lucknow; lat 28° 20′ N., lon. 80° 53′ E.

BHONSLA.—An old subdivision of the Concan, in the province of Bejapoor, bounded on the north by the Dewghur river, on the south by the Portuguese territories attached to Goa, and on the west by the sea. Like the rest of the Concan it rescribles an inclined plane, with an irregular surface, declining in height from the western ghauts as it approaches the sca. It is traversed by many mountain streams, such as the Dewghur and Atchera, and formerly the resort of the piratical fleets that infested the west coast of India. The principal town is Warree, or Sawuntwarree, the chief of which is usually denominated the Bhonsla. The other towns of note are Malwan, Vingorla, and Raree. It is now comprehended within the British Concan districts.

Buoos.—The modern capital of Cutch, founded about two centuries ago by Row Bharra, lat. 23° 15′ N, lon. 69° 52′ E. It stands on the S.W. side of a hill, on which extensive but

Ill planned fortifications have been crected as they afford no protection to the town Viewed from the north Bhool has an Imposing appearance from the display of white buildings, mosques, and pagodas, interspersed amon, plantations of date trees ; but a nearer approach detracts from the priur respectability of its appearance The Row s palsee however, is a castle of good masonry, the cupoins and roofs of which are encrusted with a sort of enamel that gives it a Chinese uppearance To the west of the tuwn, und covering two shurt faces of the furt is o large tank, with stairs down to the water, and in the centre an In 1818 the town elevated terrace continued obout 20 000 inhabitants. umung whom are artists remarkable for their ingenuity in wurking gold and silver In 1819 the hill-fort of Bhooj was taken by escalade by a dotachment under Sir William Keir, und on the 16th June of the same year both town and furt were nearly destroyed by an earthquake.-(Macmurdo, 5¢)

# BRUPAUL-See BOPAUL

Bunrawer.—A rulenus town in the province of Minden belonging to Dowlet Row Sindia, situated on the right bank of the Minye river; let 22° 34 N<sub>2</sub> inn 75° 5 E.

Bunassa.—A smull town in the province in Ajmer, division of Har rowty situated on the left bank of the Cali Sind river. The inhabitants manufacture mill-stones from excellent free-stone found to the neighbourhood.

Bnoarchaor (the great) — A ghant in pass In the province of Auringabad through this western range of from Binnbay to Finnan Since the capalison of the Feshwa this pass has been greatly enlurged and improved, and an excellent carriage road fits miles in length naw forms the communication between the maritime district of Callance and the table-lead

of the Decean, exhibiting the most transmittent scenery.—(I'sdiarton, 5e)

Rimarchary (the lens)—A pass through the munitum that stretch across the division of Jooneer in the Aurungabad province commencing about nineteen miles S.L. by E. from I oona. The ascent is rather steep and stuny, but neither difficult ur long and leads to a regun elevated about 600 feet alove the mure nur them tract of table-land, where stands the city of Poonah In traveling southward, a marked improvement of the temperature is experienced immediately after eleaning this pass.—(Fullerion &c.)

Bunwantroon.-A tuwn ur rather market-place in the province of Bengal district of Dinagepoor, situated in the division of Ranny Sunkul At the festival of Nekmundun (a Mishomedan saint)ngreat meeting is held here from the 7th to the 17th of April A militury guard and civil officers ottend to preserve peace for the mul titude is great, and consists chiefly of rogues thieres, prostitutes, anindiers, musicians jugglers, showmen, and religious mendicants, augmented by idlers, pilgrims, and traders from Booton, Acpaul, I urneah Benares, Patua, Rungpoor, and Moorahedabad the aggregate sometimes amuinting to 100 000 persons,-(F Buchanan de)

Binnanner (Bhavani).—A tumn in the Delhi pronnee eighty-two milles W from the city of Delhi, Lat 28° 37° N., Inn 75° 40° E. In 1809 at was starmed in open day by a Brush detachment under Col. Ball, and captured with the luss of 130 killed ond wounded the unbablishes being confident of their strength from hiving repelled all farmer attacks by the nature powers.—(Public MS Documents, fr.)

# BROW BERGH -See FYZARAR

Bunwanguo.—A scaport town in the province of Gujerat situated on the west side of the Gulf of Combay, lat. 21° 48' N., lon. 72° 16' E. It was named after the grandfather of the present Rawul, who founded it on the site of a village called Joona Wurwa These princes had the good sense to encourage trade and extirpate piracy the town in consequence waxed rich, and is now the chief mart for the export and import trade of Cattywar, Ahmedabad, and Mar-One curious and not very creditable manufacture has long been established here, which is a mint for the fabrication of base money, where every sort of rupee current on the west side of India is so well counterfeited, that even native bankers have been deceived. In 1812 the Raja was not only suspected of conniving at the practice, but also for sharing in the profits. From 1810 to 1814 thirty-eight Arabian vessels arrived here aggregating 2,716 tons, Surat and Bhownuggur being their chief places of resort In 1821 the harbour was injured by the bursting of embankments.

In 1807, with the voluntary con-currence of the Raja, the tribute he used to pay to the Guicowar, amounting to 74,500 rupees, was transferred to the British government; but this change did not authorize any interference with the internal concerns of the genuine Bhownnggur territory. In 1809 it was discovered that its chieftain, although tributary, and aetually under the protection of the British government, connived at the depredations of the turbulent Catties, and was in consequence fined, In 1816 his military establishment amounted to 900 infantry and 1,090 horsemen, a large proportion of whom he subsequently discharged; but kept the remainder in so effective a state, that in 1820, after a long and persevering pursuit, they attacked and nearly destroyed a considerable party of Komann Catties, whose depredations, however, the Bhowniggir cabinet was strongly suspected of having instigated This being an extraordinary instance of effectual aid derived from a native ally, Mr. Elphinstone, the governor of Bombay, addressed a suitable complimentary letter to the

thakoor His connivance, however, with the plunderers, having been subsequently clearly proved, he and his dewan were fined in the mitigated penalty of 100,000 rupees, for having originally created the insurrection, which his troops took so active a part in suppressing—(Public MS Documents, A. Robertson, Carnac, Walker, &c)

BHUGWANFEA —A small insulated district in the province of Candeish, bounded on the west by Nemaur, and on the north and south by the Satpoora and Vindhya ranges of mountains, and on the east by Gundwana. It is nearly bisected by the Nerbudda river. The principal towns are Hindia and Hurdah —(Malcolm, &c.)

BHUGWUNTGUR—A fortress in the province of Bejapoor, situated on a steep rocky hill close to the Massoora river, which is about 400 yards wide with a deep muddy bottom. Lat. 16° 8′ N, lon 73° 38′ E., fifty-seven miles N.W from Goa.

BHUJLE.—A petty state in northern Hindostan, situated between the Sutuleje and Jumna It contains no fort except that of Kungur, which is possessed by the Cahlore Raja. Bhujee was conquered in 1811 by the Gorkhas, who were expelled in 1814 by Sir David Ochterlony In 1815 the total revenue was estimated at 6,500 rupees per annum.—(Lt. Ross, & c)

BHURASOO —A village in northern Hindostan, one of the remotest T'hats or divisions of Roween Lat 31° 17′ N.,lon 78° 25′ E, seventy-seven nules N. by W. from Sermagur.

Bhurtroon (Bharatapura.) The capital of an independent native chief in the province of Agra, thirty-one miles W. by N. from the city of Agra. Lat 27° 17′ N, lon 77° 23′ E. The Bhurtpoor territory, including the small pergunnal of Tanna, is superior in extent to that of the Macherry Raju, and reaches from Gopaulghur, in lat 27° 39′ N. to Biana, and forms the western boundary of

the Agra district. In 1815 the total area was rather less than .. 000 senare miles Illustpoor Deer Cambrette Werre and Biana are tho chief towns. Gopsulghur is a strong fut and the town of hurnau is of great extent. with a large brick fort in the centre but in a ruinous condulon; only the eastern quarter of the town bein. In halnted. Norgar, Rolam, Wareser and others are of little note. Tho country from Deeg to Bhurtpoor is so low that during the heavy rules it may be said to be completely inundated. In 1823 the Bhurtpoor ter ritory was to a most flourishing con thinon the villages numerous and well constructed, and the crops waving abundance, yet the persantry went constantly armed which did oot in dieste such conscioumers of personal safety as is to be seen within the life tish districts The peacock is here hel I in such veneration that it is dangerous to kill it. The Bhurtpoor Raja is one of the principal chieftains of the Jants which are a tribe of low Sudras, who presuming on their temporary importance venture to assume the title of khetri (the mi httary caste). They must however, be carefully discriminated from the Jauts or Juts, who are the old Mo homedan peasantry of the Punjab

The tribe of Jauts first attracted notice in limdostan about A.D 1700 when having migrated from the banks of the Indus, in the lower part of the province of Moolton they were al lowed to settle in the avocations of industry in several parts of the Doab of the Conges, ood Jumna. Their subsequent progress was uncommonly rand and during the civil wars car ned on by the soccessors of Aurene zebe they found means to secure themselves o large portion of country in which they built forts and occumulated treasure The title of rain is a Hindoo distinctioo some of them hove assumed but to which they have no more real right than their ancestors had to the contents of the imperial caravans, which they were io the hobit of pluodering During

Auren relect last mare's in the Dec can Choramon, the Jast, pullaged the lagrage of the army, and with part of the spoil erected the fortress of Bartpoor Sporal Vall cor of his soccessors, new modelled the gosemment, and was afterwards Adled In battle with Sindy & Khan A D 1763 He was succeeded by his son Jewar bin h who was secretly murdered in 1774 at which person the Jaut slominions extended from Agra to within a few miles of Delhi on the north, and near to I tawch on the south Ther also possessed a tract south of the Jumna; and besides places of Inferior strength had three forts then deemed impregnable About 1780 Nudoff Ahan subdued great part of the Jaut country, ond left the raja little besides Bhurtpoor and a small district of about seven lacks of ru pees per annom

On the death of Jewar Singh in 1764 his brother Huttun Singh ascended the throne, and being also assessinated was succeeded by his brother hairy Singh on whose death Hunjeet Single assumed the sove-reignty When Madhaje Sindin first undertook the conquest of Upper Hindostan, he esperienced extential assistance from Raja Hunjeet bough, who on this account was treated with creat comparative lenity by the Via

In September 1803 a treaty of per petual friendship was concluded by General Lake on the part of the Bri tish government with the Bhurt poor Raja, ond so stocere was the unice on the part of the former that districts yielding o revenue of 754,000 rupees per aonum were made over to the lotter in full sorereignty Notwithstanding so regu far a compact, ratified in the most solemo manner with all the customory formalities and in the maintenance of which both the Rules interest and honour scemed concerned. m 1805 this prince most unaccounta bly espoused the declining cause of Jeswant Row Holear recently discombted by Lord Lake and admitted him with the shattered remains of his army into the fortress of Bhurtpoor, before which the British army arrived on the 3d of January 1805.

Bhurtpoor is a town of great extent, and every where strongly fortified, being surrounded by a mud-wall of great height and thickness, with a very wide and deep ditch. The fort stands at the eastern extremity, and is of a square figure, one side overlooking the country, the other three within the town. It occupies a site that appears more elevated than the town; its walls are also said to be higher, and its ditch of greater width and depth. The circumference of both town and fort is about eight miles, and their walls, in all their extent, are flanked with bastions at short distances, on which are mounted very numerous artillery. Lord Lake's army approached Bhurtpoor a large expanse of water at the north-west side of the town suddenly disappeared, and it was subsequently discovered that the whole had been admitted into the ditch that surrounds the town and fort.

Within these fortifications the whole forces of the Bhurtpoor Raja were concentrated. The infantry of Jeswunt Row had taken a position and entrenched themselves under the walls, and all the inhabitants of the adjacent country, who were in any way capable of aiding the defence, were thrown into the place assembly of such a multitude created the most serious obstacles to the operations of the British army. Measures were specdily executed to retaid its progress, and the effects of the battering train were almost immediately repaired, which probably constituted the most efficient source of that resistance which was experienced during the siege.

The town and fort were amply provided with all kinds of military stores, Bhurtpoor having long been the mart of Hindostan for these articles, which had also been accumulated by the Raja The great extent of the place, and the smallness of the besieging army, confined the operations to one point, the besieged had con

sequently an opportunity of procuring supplies from the neighbouring country, which would have been precluded could the place have been completely invested In the course of this siege, also, the British engineer officers, however zealous in the performance of their duty, were found, neither in abilities, knowledge, or experience, adequate to the magnitude of the exigence; which deficiency doubtless had considerable effect in impeding the progress of the besieging army. And, finally, due credit must be given to the bravery of its defenders, and to the military conduct of their leaders But there is reason to believe that, with the exception of Holcar's forces encamped under the walls, and which were attacked and routed with the loss of all their artillery, the garrison and inhabitants sustained but a trifling loss compared with the enormous carnage which destroyed the flower of the British army, amounting to 3,100 killed and wounded. 222

Notwithstanding so obstinate a defence, and the slaughter which thinned the ranks of the besiegers, the Raja, perceiving that their perseveiance must ultimately prevail, sent his son to Lord Lake's camp with the keys of the fortress, and agreed to compel Holkar to quit Bhurtpoor. On the 17th April, the siege being thus concluded, a second treaty was arranged, but with stipulations calculated to enforce a stricter performance of its conditions The territory conferred on him was resumed, he engaged to pay twenty lacks of rupecs towards the expenses of the war, and to leave his son as a hostage until events proved that his fidelity could be relied on. From

this date his policy secret to laste leven to theart not listate the lift if h poterment to the object verge of its forbearance and to concede introducidly when a crisis secretal log-caling. While M. Petrone go-serned Upwer Hindowian he made the petty chieft in tantity obey his most dictatorial mandate; but they last been treated by the British with such delicacy and it herally that their dependent con litton has whilly lissappeared, and with a saftee petrer sity of disposition, they think it on a ble to enforce what it hecitates to

Command llaja Runject Sin h, who so well defended his capital died early in 18°1 as I was succeeded by his son Baldeo Sin h: who died suddenly on the 28th behruser at Confidendon having scarcely sat a month on the throne; leaving a son Bulwant Singh, theo seven years of ace who was recognized by Sir David Ochteriony as the legitlmate successor In March 1924 his mather and ancle guardians were attacked by Durjont bal a cousin of the your; lisjas, the uncle murdered many here lost and the boy taken possession of by the usurper Lord Amberst, then Governor-general forbore resorting to correian na long as hapes could he reasonably entertained of accomplishing by means of negociation the restoration to power of the legal mate prince; but every effort having been exhausted and a powerful army assembled siege was laid to the place which after aix weeks of open trench er was captured by storm on the 18th January 18°G, with the loss of staty-one Europeans and forty-two natives killed and 283 Europeans and 183 natives wounded; tatal 509 while the garrison lost about 4 000 men mostly killed. Durjust Sal and his family were caught during their flight, and sent prisoners to Allaha bad The principal bastions curtales, and other important parts of the for ufication were subsequently idous up and demolished and the fartresses of Biana, Deeg Weyre Kumbhere and Kama, having surrendered with

ont expension, were occupied by the the Northeast Merchen Lake Mr Dotargue Welshen Lake Mr Docurents Lieut White, Hunter, Lend In Sel.

But TANT.-A truct of country in Sorthern Hindortan which formerly composed the libote prosinces of Ti bet which commence on the north from the table-lan I beyon I the mountains. They comprise different passes into That an I some of the lotticet peaks of the Himslays and are now attached to the districts of Gurwal and hu mann A great proportion of the surface is above the line of perpetual conscistion and no interval of four months without n fall of snow is a rare occurrence The population estimated at 10 000 consists almost wholly of Bhootens, ninest perfect Tibetians; art some are said to be the descendants of Mogul Tartura left by Tamour They were formerly all Buddhists of the Lama sect but since then many have partially adopted the Hindoo religion emplaying both Brahmins and Lamas They have no distinction of caste but still tribes and alleges will not intermarry. They manopolire the trade in this quarter between Hindortan and Tibet. The name Bhutant is retained to slistinguish it from Bootan the country of the Deb Raja. The enuntry of Bhote in this direction may be said to com mence at the village of Jelam lat. 30° % N., lon 79° 51 L., as the inhabitants are able to continue in their houses throughout the whole year at the values below

After passing Jelam opwards, nil access and passage is prevented by the snow from October to May dur ling which interval the in, her Bhooteavilla, ea nre entirely desorted On tine 27th June 1818 spring had just commenced in this quarter where the productions of the lower hills are replaced by express hazed and hirch trees; the bushes, conditing principally of gooseherry, currant a dwarf species of express and juniper with dog-roses red and white The anly grains that ripen are juspine (peculiar

to Bhote, and resembling French wheat), cheena (the panicum miliaccum) and awa and jawa, two species of barley. As the spots adapted for cultivation in Bhutant are few, the villages are necessarily small in size and much dispersed: yet the climate is much warmer than might have been expected from its elevation At Gamsalı, lat. 30° 44', about the end of June, Fahrenheit thermometer in the shade ranged during the hottest time of the day from 60° to 75°. and at daylight from 45° to 50°. After the middle of August none of the inhabitants are suffered to ascend the tops of the surrounding mountains, or to use fire-arms near the villages, such incidents being known from experience to occasion a fall of snow from above, and a frost below, both tending to injure the ripening crops.

Besides the countries we call Tibet and Bootan, the Bhooteas every where between the Cali and the Teesta occupy the alpine region adjacent to the snowy peaks of Himalaya, on both sides of the mountains, which tract is by the natives of the south termed Bhote, and the inhabitants Bhooteas According to native accounts the Bhooteas neglect agriculture, chiefly practising commence, and a life of monkish austerity, occasionally but unwillingly wielding the Their principal support prosword. ceeds from the produce of their mines, and of the numerous flocks of sheep, goats, and cattle, the quantity of grain raised being quite inconsiderable With respect to their complexion, it has been remarked by Dr Francis Buchanan, that the Bhooteas he saw at Catmandoo (the capital of Nepaul) from the elevated regions of Mustung, Kutı, Lassa, and Digarcheh, were all fully as black as the natives of Canton or Ava

Prior to the Nepaulese war this tract paid tribute to the Gorkhas, and its inhabitants were kept in a miserable state of slavery and oppression. The genuine Bhooteas here are certainly of Tartar origin, and such is their own opinion; indeed the migra-

tion is so recent, that the natives of Niti still enjoy from the Chinese government, as Tartars, certain immutities from duties paid by other tra-In language and personal appearance there is also a striking resemblance, and although they no longer intermarry, yet the Bhooteas do not hesitate to eat and drink with the Tartars. Their religions are nearly the same, except that the former have adopted several Hindoo superstitions, still retaining a great veneration for their lamas Until conquered by the Gorkhas, bulls and cows were annually sacrificed in great numbers: but since that event, buffaloes and the chowry cattle have been substituted. The Bhooteas, however, by the other hill tribes are still considered cow-killers, and, as such, outcasts of the worst description — (Trail, F. Buchanan, &c)

BHUTKOT PEAK,—A mountain peak m Northern Hindostan, eightcen miles N N.W from Almora; lat. 290 49' N., lon 79° 29' E, 9,133 feet above the level of the sea.

BHYNTUREE — A native fortified post in Northern Hindostan, kingdom of Nepaul, four miles east of the Caliriver, lat 29° 35′ N, lon 80° 23′ E, 5,615 feet above the level of the sea.

BHYSOUDA.—A small town in the province of Malwa, near the frontier of Harrowty, which in 1820 contained 2,400 inhabitants.

BIANA (Byana) —A town in the province of Agra belonging to the Bhurtpoor Raja, situated on the Ban Gunga river, fifty miles W S.W from the city of Agra; lat 26° 57′ N., lon 77° 8′. E. Biana preceded Agra as the capital of the province, Secunder Lodi having kept lns court here while Agra was a mere village, and it is frequently mentioned by the Emperor Baber in his memoirs It was first conquered by the Mahomedans A.D. 1197. The town is still considerable, and contains many large stone houses, and the ridge tof the hill, at the foot of which it is situated,

is correct with the remains of buildings, among which is a fort containing a high pullar, coopucuous at a great distance. The bazar of Modern Biana is large and in 1820 ahead signs of reviving commerce and an active population. The for infications also on the neighbouring hill had then been just removated and attengiated with new works of masonry.—(Abul Fazel, Hunter Ful latton 5 e)

BIEKTHATT.—A town in the provance of Ben, all attained on the right bank of the libagrant or Cossimbazar river further down named the Hoogh 19 On the opposite bank there is a building occupied as o college of By regges.—[Fullarion 6].

BILANEAR (Bicasle, or Bokanair )

—A Rojpoot principality la the Aj meer province, of which it occupies the centre and situated principally between the tweety-seventh and twen ty ninth degrees of north jatitude Like all other states in this waste of moving sand its innuts are difficult to settle vast tracts being claimed and rejected by all parties as political cir cumstances happen to support or oppose their pretensions. To the corth
it is bounded by the great Ajmeer desert and the Bhotty country to the south by the Joudpoor and Jey poor dominions; on the east it has the British district of Hurriann and the Shekawatty country and on the west Jesselmere and the great desert into which it merges Considering their local peculiarities and the total absence of streams, rivers and lakes, It is o curious fact that the Ilindoos of Bicanere should particularly object to the eating of fish, as sinful

The coontry is rather elevated but the surface fiet and the sod o light-brown sand that absorbs the rain as soo as it falls wells are coo sequently indispensable are lined with brick, and from 100 to 200 feet deep Each family has a cistern for the preservation of rain water With the exception of a few villages on the esstern frontier the crops are very precarnous, sod greatly depen

dent on the periodical rams. Beju rah and other kinds of Indian pulso are almost the only produce the in habitants trusting in a great measure for a supply of provisions to the nei hbouring provinces. Horses and bullocks of an inferior breed are nearly the sole exports: the imports ore coarse and fine rice sugar, opium and indigo The first articles are usually brought from Lahore by the way of Rujchur and Chooroo Salt is procured from Sambher; wheat from the Jeypoor country; spices copper and coarso cloth by the road of Jesselmere. The chief stronghold is the city of Bicancre; but Chooroo Raighaom and Baludra are reckon ed strong places by the natives.

The Bicancre Rays is a libstore by caste, and of the same fomily with the Joudpoor chief the chier branch haring established itself at Joudnoor and the jomor at Buennere. He is the least important of the five ilai pootana princes but it does not anpear that he ever paid tribute to the Maharattas, for which he was probably indebted to the distance and sterility of his principality in 1809 his revenue amounted to only five iacks of rupees per annum but as his troops are paid by assignments of land, he is enabled to maintain 2 000 liorso and 8 000 foot, with thirty five meces of ordnance lis first from tier town towards the Shekawutty country is Chooroo which may rank as the second in importance cultivators are mostly Jouts, some converted to the Mahomedan fauth and some not In the Lord's Prayer as given in the Bicancre language twenty ploo words out of thirty two were identified by the missiocories or radically the same with those in the Hindostney and Bengalese specurrens

In 1808 these miserable territories were layaded by five different armles when the Bienarec chief as a measure of defeoce filled up all the wells withou ten miles of his capital and trusted for deliverance to the desolation that surrounded him. Next year, so his distress, be carnestly, solited.

the favourable mediation of the British government with his enemy the Joudpoor Raja; but he was informed in reply, that although the governor in council entertained a high sense of the friendly attention paid to the British envoy (Mr. Elphinstone) while passing through the Bicancre country, they could not deviate from their system of non-interference in the affairs of other states, which constituted a fundamental maxim of their general policy. Although apparently sufficiently employed in the defence of his own dominions against the aggressions of more powerful neighbours, the reigning chief has made several external conquests; amongst others, Bhatneer, the Bhatty capital, of which in 1810 he still retained possession; his existence as an independent prince was further secured by his admission, in 1818, within the pale of British confederacy and protection; and having never before paid any tribute, he was on this oceasion only required to defray the expense of any British troops he might solicit.

In 1818 the army under General Arnoldreduced several fortified places in the Bicanere territory, occupied by persons in a state of rebellion against the authority of the Raja, who, according to the stipulations of the treaty, plud all the expenses of the detuchment —(Public AIS Documents, Elphinstone, Prinsep, George Thomas, Metealfe, &c)

Bicaser  $-\Lambda$  fortified town in the province of Ajmeer, situated about 260 miles W. by S. from Dellu; lat 27° 57' N., Ion 73° 2' D. It stands within a tract of more than ordinary desolution, but owing to its contrast with the surrounding accan of sind, presente genternally an appearance of resputerace that closer inspection closes net jurify. Unden ten yards of the wall the country is no waste 18 the with a tract of Arabet, but on the combern wie there is somethins the looks like a north soller. The tic tresistable and pleasing walk ice is a vell of fire vater, innection

ately under the fort where the Raja resides, 300 feet deep, and from fitteen to twenty in diameter; four buckets, each drawn by a pair of bullocks, are worked at once, and when a bucket is thrown down, the noise made by its striking the water is like the report of a great gun

Bicancre is surrounded by a fine wall, strengthened with many round towers, and crowned with the usual Indian battlements. It contains some elevated houses and some temples, one of which has a lofty spire, and at one corner there is a high showy citadel. The town is distinguished by the whiteness of its buildings and the absence of trees, which give most Indian cities the appearance of woods rather than inhabited places; most of the dwellings are mere huts, with mud walls painted red. The fort is a confused assemblage of towers and battlements, overtopped by houses crowded together, in extent it is about a quarter of a mile square, encompassed by a wall thirty feet high, and a good dry ditch By the natives it is reckoued a place of considerable strength, but its chief security is the scarcity of water in the surrounding country. In the Raja's service are usually several Europeans of different nations, who reside within the fort. The native inhubitants wear loose clothes, of white cutton or mushin, like the Hindostanies, but are distinguishable by their Rajnoot features and remarkable turban, rising high on the head like a mitre —(Liphinstone, G. Thomas, 11th Reg. &c.)

Bidgerent a (Vijayaghar). — A ruinous fortress in the province of All diabad, district of Mizepoor, fifty miles S from Benares; lat. 21° 57′ N, lon 83° 10′ E. Bidgeghur was formerly the principal stronghold of the Benares Rujas, and was taken by the British in 1781, diamenth revolt of Cheet Singh, and hance the revolt of Cheet Singh, and hance count of the mechanical, partly on second of the misslubrity—(I) der, Kennell', 5.)

Brunt 13 - A town to the private of Delhi, thirtien rate & E. feet

Paniput; Ist. 29° 3" N., Ion. 77° 6' E.

Bitavacta (Fijegenagera).—A lilindoo city of great fame and antiquity in the promise of Hecispoor, named in the Canarese Annagoondy, and occasionally Alpans the cursures being sometimes applied to the city and at others only to certain por tions lat. 15° 14 K., lon. 76° 37° 1..., twenty-sine miles N. Wrom Rellary The remains of the city occupies both aides of the Toombudders; and it is to the division on the south-rast of the river that the came of Ripasague is usually applied, while that on the north west bank is called Annagoondr

The spot selected for the erection of this famous capital is a very singular one. It is a plain enclosed by and encumbered with stupendous masses of gracite which in some places swell up from the surface to the form and magnitude of fulls, and In others present detached blocks of various forms piled over one ano ther io all sorts of fantestical combinations, occasionally surrounding little isolated vallies, and elsewhere obstructing all passage except through the narrow-winding defiles which soparate the fragments. The commu pications from street to street, and in some cases the streets also follow the mazes of these chasms, and le one quarter the principal thoroughfare is under o noturally covered passage formed by the rocks the oneient the encient battlements, turrets and gateways are still to o high state of preservation; the main streets poved with immense flags of gracite, ore inter sected at intervals by aqueducts; and tanks ond wells are excavated in the rock Temples choultries, and many other edifices public end private, of the purest style of Hiodoo architecture and great dimensions are seen perched on the most conspicuous emicence of the naked rock or ranged in long lines on the plale The walls, pillars, arches, and even the flat roofs and beams of all these structores ore composed of the grante which is so

abundant on the spot cut loto such enormous masses that It is deficult to imagine how a people ignorant of mechanics could have tran ported them to their present positions. Some blocks are from tweive to lifteen feet broad, and thick in proportion; and though of unequal bulk and various shapes are universally well cut fitted to each other with the greatest nicety and display ot this day an exterio justre surpassing that of most build ings of twenty years standing owing to this superiority of minterial and the cyclopean style of their masonry that the rules of Buanagur so far excel in extent and grandeur those of any other aocient city purely lin doo from liurdwar to Cone Como-

The Toombuddra where it sepa rates Annagoondy from Bijanagur le about one-third of a mile broad with a rapid irregularly winding course among the granite hills, and much in terrupted by detached rocks rising above its surface sommunted by on image of the hull Nundy an open portico, or choultry or some other religious edifice At the principal ferry there is a picturesque group of temples and a huge figure of i loonimane, the greantie monkey, carred in barso relievo; on the eastern promontory similar sculptures obound among the rules Opposite to the upper portion of the Bijanagur section of the town the river contracts greatly and was formerly traversed by a stone bridge

Bijanagur Proper is enclosed part jy by natural barrers ond partly by strong stone walls on the south ond cast and by the Toombuddra on the north and west, encomposing o cir cumference of ot least cight miles i but a large portion of this area is encumbered by inoccessible acclustre. There is a continued succession of pared streets now nearly unliabated for three miles from the Toombuddra ferry to Humpia ocat the western extremity; and the oppearance of the rulns about Com lapoor in the south west Indicate that they also were once influed that they also were once influed.

within the city boundaries. At Humpa there is a magnificent temple dedicated to Mahadeva, standing in the midst of a vast area, surrounded by the cells for the devotees, and having a pyramidical portico facing the east of ten stories, and about 160 feet in height This edifice terminates a noble street about ninety feet wide, stretching east and west nearly parallel to the Toombuddra (from which it is separated by rows of venerable trees) to another temple near its opposite extremity, with an image of the bull Nundy, twelve feet high, carved out of the rock The temple of the destroyer (Mahadeva) is well endowed, and attended by numerous Biahmins, and the street itself is lined by a row of handsome stone buildings, decorated with sculptures, and intended for the accommodation of pilgrims during the annual festival.

Between Humpa and Camlapoor there intervenes a ridge of lofty rugged rocks, traversed by a steep causeway, and studded with pagodas. The most remarkable are the great temple of Krishna, and one of smaller dimensions dedicated to Ganesa, but containing a colossal granite image of that deity, sixteen feet high by ten in brendth. Beyond this is the fort entrance, a kind of inner city, containing the remains of four palaces, all within view of each other, built at different periods, and by different The temple of Rama is distinguished by its pillars of black hornblende which support the porticoes, and are covered with mythological sculptures of the minutest elegance. There are also some columns of the same material in a building near the river at Annagoondy.

But the most extraordinary of all the religious edifices, in respect to elaborate workmanship, dimensions, and freshness of condition, is the group dedicated to Wittoba (an incarnation of Vishnu) near the centre of the city, which has sustained no injury from time, although ransacked, and in parts dilapidated by Mahomedan rancour. They consist, besides

the principal temple, of four subordinate buildings or choultries, and several lesser pagodas, the whole contained in an area of about 400 by 200 feet, environed by cells, and entered through a painted pyramidical The columns are clustered with figures of the singh (lion), supporting the entablature, and, like the ceiling, covered with various sculptures, but the greatest curiosity is a rath, or native chariot, in which the image of the god is exposed on ho-It is formed, wheels and all, enthely of granite, is complete in all its parts, and delicately fimshed, but probably was never intended for locomotion.

The site of Annagoondy, on the opposite bank of the Toombuddra, resembles that of Bijanagur approach to the city on this side is by a defile several miles in length. winding among the rocks, in some spots so narrow as barely to permit the passage of loaded cattle, formerly fortified at certain points, and closed by a gate There are also the rcmains of another barrier gateway at a short distance beyond the city walls, and thence a passage under these lofty massive gateways still entire, before the centile of the place is reached. A similat line of fortification appears to have been partially extended between this division of the city and the river, for three other gateways must be passed in descending to the Toombuddra. extent of Annagoondy from north to south is about a mile and a half; which space, like the site of Bijanagur, comprehends many fine religious edifices, sculptures of the Hirdoo pantheon in relievo, and other architectural vestiges, but with the exception of a small village between the second and third gateway, built of stones collected from the ruins, it is wholly uninhabited. Near to this village is a temple of Krishna, at which worship is still performed, and which in 1820 was iindergoing a thorough repair, at the expense of the reigning raja, who sometimes resides in a miserable hovel in

Its variety, his principal habitation being at Camispoor. In one of the runs near the Toominuldes a specimeo of a painted exting after the lodism manuer is to be seen, the colours of which are still remarkable vivid.

The building of this meteopoles was been A D 1436 and completed In 1343 by Aka Huershor and Bucca Harryhur, two brothers, the first of whom reigned until 1350 and the last until 1378 Their priest and prime minister was the learned Visikava Acharva. It was first named Vidranagura, but ofterwards \ uevanarara, the city of victory. The Chols (Tanjore), the Chera, and the Pandian (Madura) dynastics were all conquered by Yurangh Rais and Arribus Ilais of Busnagur in the period between 1490 and 1515 kingdom was then called Bisnagur and Namines in old Puroness mans and comprehended the two Carnatics above and below the glisuts when visited by Cresar Frederick who described the city as lisving a circuit of twents four miles, and containing within its walls many bills and magodis.

A state of perpetual war aubsisted between the Mahomedan sovereigns of the Decean and this Ilundon empire which at last terminated its esistence, In A.D 15G1 the four Mishomedan Decemy Lines of Ahmednurgur Bejapoor Golconda and Beeder combined and totally discomfitted Itam Rajz, the reigning sovereign of Bijanagur on the plains of Telhcotta, and ofterwards ad wanted on the capital which they took and so completely sacked that at was deserted by lils successor, who retired to Pennaconda, About 1603 the Sree Rung Raycel or royal house of Bijanagur become extinct at least no more is heard of it sobsequent to that era. Of the modern nominal rajas some details will be found under the article Annagoondy The latter are said for many years to have kept and still continuo to keen on exact register of all the revolutions in the Decean and south of India in the

vain hope of being by some future turn of the wheel reinstated in their ancient possessions — (I ullarion, 11 ills Terubia Scott &c)

RIFREY (Rijst).—A principlity (named also Klungtaghaut) beyond the Inuits of Nurthern Lindostan, and confining on Assam, the possessions of which are situated on both sales of the Brahmquitra, and consut partly of independent teritory, and partly of lauds within the limits of British jurusticello. Bynco or klungtaghaut is situated to the north of the great river and Howeraghaut to the south bordering on the Garrawa.

Bunce is a very extensive beautiful and were it cultivated would be a most valuable estate Much of the level country is inundated but there is also a great extent of land fit for the cultivation of transplanted rice. A considerable number of villages are consequently permanent onl liste plantations of betel-net and super-case; but of the cultivators many are migrotory and on the least despute withdraw to the con ternmous territories of Bootan and Assem Howecochout the other the vision to the south of the Brahmaputra, la a still more valueble estate being but partially flooded and con taining much excellent soil sinted for the production of summer rice wheat barley mustard-reed julso betel sugar-cane and mulberry trees. It does not appear however that any sikworms ore reared The vil lages are stationary and much peater than is usual in Bengal and near the lidls where the streams are copious and perennal some of the land returns popully two crops of transplanted rice.

After the Assam country declined to its late anarchical condition many natures withdrew to Howeraghout, and many more although they held loads in Assam brought their families to the British side of the river, where they rented as much ground as sufficed for a house and garden to this natural way to the them.

dren were deposited, while the men risked themselves and cattle in the Assumese territory, rendy for a retreat in case of annoyance

In consequence of their remote situation and the general vildness of the country, the history of the cytutes in this quarter was long but imperfectly known, even to the public functionaries at Runghaar; and so long as the Bijnee Raja paul the eustomary tribute, no inquiry was made as to the state of the country, or even to ascertain the original nature of its connexion with the Mognl cmperor, to whose authority the British government had succeeded. The notion so long prevalent, that the fort of Bynee with a considerable tract of the eircumjacent country lies beyond the Bengal houndary, was subsequently found to be quite erroncous, the Bynee Raja having air evident interest in curtailing the extent of British influence. In the early surveys, Bijnee and Bid jugong, although entirely distinct, were confounded under the name of Bootan Bijnee, and the Bynee estates were carried as far as the frontiers of Cooch Bahar. 1785 the collector of Rungpoor was instructed to settle with the Rajas of Bijnee and Bidyagong for a certain payment in money, instead of the customary present of elephants, by which a loss was annually sustained, and 2,000 rupees were ultimately accepted as a compensation In 1790 a succeeding and over-zealous collector prevailed on the raja to angment his tribute to 3,000 rupees but the increase was rejected by the British government, which ordered the additional 1,000 rupees to be restored to the raja, who was enutled, if he chose, to resume his payment in elephants

The peculiar circumstances of Binee appear to have been first brought to the notice of government about A D 1791, in which year Mr Dauglas, the commissioner in Cooch Bahar, reported that Havindia Nariain, the zemindar of Bijnee, had been assassinated, and that he had directed the Naib of Rangamatty, in conjunction

with the late zemudar's devan, to take temporary charge of the property. Before an answer could arrive, the eommissioner was informed by the Deb Ruja of Bootan that he had nominated Mahmdra Narram (related to the definict) to the vacant throne, the friendship between him (the Deb Raja) and the Honourable East-India Company rendering his appointment quite the same as if it had been made nt Calcutta He was soon apprized, however, that so precipitate and informal a proceeding could on no account be sanctioned; but in the mean time Malandra Narram having got a party of Bootunners from one of the Deb Raja's governors, entered Bynee, and there committed a variety outrages. At this time the only connexion that subsisted between Bootan and Bynee consisted of a sort of exchange of the productions of the two cauntries, which the Bootan functionaries were pleased to describe as the payment of a tribute, the advantage being considerably in their

The result of the investigation was, that the Bengal government determined that the right of investiture to the zemindarry belonged to them; but as the candidate brought forward by the Deb Raja appeared to have the best founded pretensions, his choice was confirmed, and his protégé nominated to the succession

The Bynee chief also holds lands in Assam, but the British government assert the right of investiture to his own hereditary zemindarry. In 1809 the two divisions of Bijnee Proper and Howeraghaut were estimated to contain 32,400 ploughs, each of which ought, on an average, to have paid the raja five rupees per annum, besides customs, duties, forests, fishings, pastures, and all manner of illicit and irregular exactions; yet his poverty was such that he was accustomed once in three years to raise some additional money by absolute begging, which however conveys no degrading idea to a Hindoo formerly paid his tribute in elephants, but as few survived, and were soldom

of a good size a value was put on the nomber and the amoun obore-mentioned taken in money The Bootso tribute la principally pald in dried fi li One half of his rents are paid in coarse cotton cloth weven by the females of the tenantry on which the rais suffers great les llis affairs, as may be supple ed are estremely ill-managed and hes property plundered by seedy retainers from the south and the west who harass the cultivators by unju t ex actions and run the commerce by their inquitous monopolics. Being one of the blacet chief of the Cooch tribe almost every cultivator under him i called a rajbun-il; but they are divided into two kinds the Blisket or worshippers of hrishna and the Corami who eat pork and unutterable food and openly abandon themselves to strong drink. Haja Rolit Narrain reaned in 1609 and was reckoned the seventh from the founder of the family -(S's er I Irclause, Hade, Turner &c)

Burger .- The camtal of the abovementioned priocipality situated twen er five miles ent from Goalpara in Bengal; lat. 20' 20' \... lon 80' 47 The fort or castle of Reprec is defended by a brick wall, and is 320 cubits long by 100 broad and in the form of a parallelogram. On the outside is a ditch and strong hedge of the prickly lumboo and in each face there is a gate ; but in 1800 there were not any doors by which the gate might be shut The area is divided into so outer and inner sportment in which the rajas females dwell It is also surrounded by a brick wall which encludes a small brick hoose erected by a servant from Dacen : but un to the date obovementioned the raja had never entered it, leat it should fall and kill bim There are also a few small brick temples for household gods and about one buodred thatched huts

Thosown of Bijnee where the raja resides and from whence he derives his tulo is described as a sort of neutral ground. To the Linghish the reja saya it belones to Booton and to the Blootoneners he represents it as Rinil hypoperty so that although the last a guard of Booteas, an I some across some leg rubably represents as Brathle time officers of neither government interfere at B pines. Here the last several to be a second to be a second to last long lastless persons especially a certain Mahomedan jemedar whose men under the name of Buskindures (Il hising throwers), rawaged Assam and made I avoe in that unfortuousto and besotted counter.

The reigning raja in 1800 had a four wheeled carriage constructed after the I propent fishion and also a superb palanonin brables some glass He kept twu male elephents for the accommodation of his deits and four female nnes on which he ocea lonally rode but which were more frequently employed to entel wild ones for sale lile band of music consumed of two drums, one file and ore houtboy of the nativo fishlon. Best les other servants, he had fifty male and seventy female alares. The detail of his manner of hiting may be green acconvering an lice of the mode of life and customs of a native prioce unadulterated by European loter COURSE

The rays was then (1809) thirty years of age and had been taught in read and write the polito chalcet of He had only two when an I Dengal two conculdace. He naually rose about nonn, and occupied nne hour in cleaning himself out anothing tobreco At one o clock his officera were admitted into a hut near the gate in the outer apartments and recented audieocc sented on the haro ground while the raja sat on a low atool and was rubbed with oil which unction occupied an bour lie then pra)ed for a short time ofter which he went to the interior to ent auch food as his ount, in whose affection he could coulde had prepared for This employed another hour, ond was succeeded by a short map which occupied about the same space of time

After this the Bynce potentate

3 K

was accustomed to emerge, and make his appearance in a large hit, where any pundit who happened to be at hand detailed to him the news and scandal of the day, or read some noctry to him in the sulgar tongue. At sunset he again prayed, and then the pundits, his officers, or any faections person disposed to be pleasant, talked to bim uptil midnight, After this he retired to the female apartments to cat and talk with them until daylight, for he had been so alarmed by the fate of his uncle and predecessor, that through the whole night he never ventured to sleep. Once a month he took the air in his carriage, or on an elephant, or horsehack, or in a palanquin, but he never ventured beyond the hounds of his estate, nor had he ever been visited by any person of a rank approaching to his own -(F. Buchanan, &c)

Bisonr (Bajawer).—A small subdivision of the Sewad province, situated principally between the thirtyfourth and thirty-fifth degrees of north latitude By Abul Fazel, in 1582, it is described as follows: "Bijore is in length twenty-five coss, and in breadth from five to ten coss. On the east lies Sewad, on the north Kenore and Cashgur, on the south Beekram, and on the west Guznoorgul. The air of this district resembles that of Sewad, excepting that the heat and cold are rather more severely felt here It has only three roads. one leading to Hindostan called Danishcote, and two that go to Cabul, one of which is named Summej, and the other Guznoorgul Danishcote is the best road Adjoining to Byore, and confined by the mountains of Cabul and Sinde, is a desert measuring in length thirty coss, and in breadth twenty-five coss"

The modern district of Bijore is an undulating plain, about twenty-five miles from east to west, and twelve from north to south, and resembles the plain of Peshawer, which it equals in fertility, the principal produce being wheat The two chief towns, Bijore (or Bajour), and Ma-

wagye, each contain about 1,000 houses. The contiguous forests are so thick as to evelude the sun and almost the rain. Byore belongs to the Afghan tribe of Turcolani, but it has also other inhabitants, the upper hills being peopled by Caffries, the lower by Hindikees, and the plain by a mixture of all nations under the general denomination of Roadbaurees. The town of Byore stands in lat 31° 47′ N., lon. 71° 14′ E, fifty-five miles N N W. from Peshawer.

A tradition long existed, that this district had at one period been inbainted by a certain tribe who claimed desecut from the army of Alexander the Great, but the inquiries of Mr. Elphinstone, in 1809, did not tend to confirm the rumour, although their neighbours the Castries, in the mountains north of Byore, present many The reported points of semblance colony was celebrated by the adjacent Asintics for their beauty and Enropean complexion, their worshipping of idols, drinking wine out of silver cups and vases, using chairs and tables, and speaking a language unintelligible to their neighbours. The Emperor Baber says in his Memoirs (about A D. 1520), that as the men of Bijore were rebels to Islam, and followed the usages and eustoms of the infidels, even the name of Islam being extirpated among them, he put them all to the sword, and made their wives and ehildren prisoners; but he does not mention what other religion or superstition they followed —(Abul Fazel, Elphinstone, Baber, &c)

Bikun —A town in the province of Allahabad, forty-five miles S S.E from Guahor, lat 25° 46′ N, lon. 78° 30′ E

BILLETON —A rocky sterile island in the eastern seas, situated about the third degree of north latitude, between Sumatra and Borneo In length it may be estimated at fifty miles, by forty-five the average breadth Iron ore, generally a scarce fossil in all tropical countries, is here abundant, and the metal procured

from it is said to be of an exce lent quarty Some of it is manufactored on the spot leto mails and tool for exportations and it is from hence that the Malaya procure wuch of their iron and steel. To Init, after tle conquest of Paculane the new sultan coled this idend to the life tach but it does not appear to have ever been taken power ion of The armed crusers stationed in these seas, and the re-estable shment of the Hatch notherly in Bil eten in con junction with the attentiones catered into with the William of I in re and Ilhin had, prior to 18 Y greatly redoced the extent of piezes in this part of the archipelago....(Leasford

Billowers — A small district in the preuse of Cundana, estending alos, the south bank of the bone river, and bounded on the est ly the semidary of slamow in libby. The principal towns or rather tillages are Contarree and limala, and the whole tract is comprehended within the pale of little it protection.

littes (lidress) - A large town in the prosince of Ninkus belon-ing to Sin ha altusted on the cat si fe of the Betwa near its junction with the river Bess, thirty two miles \ E. from Hopaul; lat \$3° 33' \ lon 77° \$5 E. It is surrounded by a stone wall, and in 1800 contained 5,000 houses Bilish was first conquered by the Mahomedana in A D 1230 and again bi 129 The sdys cent country is celebrated all over India for the excellent quality of the tubacco it produces which is eagerly bon lit up and exported. It belones to bindin and in 1817 was rented far 40 000 rupees; in 1821 after the restoration of tranquillity it yielded two and a half lacks of runees.---(Hunter, Malcolm &c)

Bixa —A town on the Island of Sumbhawa aituated at the east end and comprehending uoder its juris-

dution the straits of Sapy, the whole of Maryerny and the I land of Goo norg Api. The Birna language extends ever the extern distinct of Sar-haws and the western perion of the I land was denominated Flora by the rarly I ortogone navealing.

Bustinaram filline/spatiene/—
A small seaport town in the north
ern curara, slattern miles N.N.
from liasgawatam lat 17° 87° N,
ion N3° 34° L. A con inderable trade
is carried on from hence in natise
eraft and the traces of a Datch fort
still reusam. A few interable i asopean how a stand near the beach,
and a temple in the declivity of a
mountain that bounds the town to
the south in 1810 an oil Datch
functionary continued in charge of
the factory. Al silaries [12].

BINGRADINO (Insterese) - 4 large town in the prosince of Agraestuated on the west bank of the Jumes thirty fire miles \ \ II from the entr of A-ray lat 37° 34 %. vana algu fice a grove of tulil trees and the place is famous for hasing been the scene of the youthful sports of his has to whom many temples still ext ting were dedicated of there are remarkable for their attle of architecture and the great cruciform 1 agods is certainly one of the most claborate and massy works of Brahminical superstition Besides these there are acveral ascred pools, distinguished by the names of Radha byams and Jeyncha where the pil grims perform their ablations and wash nway their sine A flight of steps leading to the riser is much revered as having been the spot where hashan defeated a sement of large dimensions ; and o cadanila tree. ny the place where he used to sit and play on the flate the marks of which are still perceptible among the branches. Different parts of the woods are pointed out as the limints of krishna Hadha onel the milk maids and others as the residence of ancient Illinioo azints onil ages but are now, as they probably were formerly the dens of religious men

dicants (chobees), existing in filth and idleness.—(Ward, Turner, Fullanton, &c.)

BINSUR TEMPLE—A small math or temple in Northern Hindostan, thirteen miles S by E from Serinagur; lat. 30° 4′ N., lon. 78° 40′ E

BINTANG.—An island (thus named by Europeans) lying off the south-eastern extremity of Malacca, about the first degree of north latitude, surrounded by innumerable small rocky isles and islets. In length it may be estimated at thirty-five miles, by eighteen the average breadth. The chief town is Rhio, formerly a port of considerable trade.

BIRBHOOM (Virabhumi, the land of heroes).—A district in the province of Bengal, situated on the northwestern extremity, about the twenty-fourth degree of north latitude. To the north it is bounded by the district of Boglipoor, on the south by Burdwan and the Jungle Mahals; to the east it has Rajeshahy, and on the west Boglipoor and the Jungle Mahals. By Abul Fazel, in 1582, it is named Sırcar Madarun, and ın 1814 it was estimated to contain 7,000 square miles, a considerable portion of it hilly, jungly, and thinly inhabited.

The most important articles produced in this district are rice, sugar, and silk. Coal has been discovered of so good a quality that it now supplies the Calcutta forges, and is carried to sea as ship stock. Iron ore is also found, not in yeins, but in strata mixed with clay, whence it It is very rich in the metal, is dug but cannot compete in cheapness with European iron, as was proved from an experiment instituted by government in 1814 The cultivation and population of Birblioom are gradually increasing . but the absence of navigable streams is a great impediment to the extension of its commerce. Roads and bridges are consequently more attended to, mostly kept in order by the government convicts. The number of native iron forges in Birbhoom and Boglipoor, together

with the supply required for Moorshedabad and the adjacent towns, renders the demand for fuel more considerable than usual in Bengal; but the extent of forest throughout the province is immense, and its power of reproduction rapid. In Birbhoom, besides the coal, there are large forests lying close to the forges, which occasion the greatest consumption.

When first acquired by the British, this was the largest Mahomedan zemindary in the province, and was originally conferred on Assud Ullah, who was allowed to settle here about the time of Shere Shah, for the political purpose of guarding the frontier of the west against the incursions of the barbarous Hindoo tribes of Jeharcund A warlike Mahomedan militia were entertained as a standing army, with suitable territorial allotments, under a principal landholder of the same faith. In some respects it corresponded with the ancient military fiels of Europe, certain lands being exempted from rent, and solely appropriated to the maintenance of the troops. This privilege was resumed by Cossim Ah in 1763, and under existing circumstauces is become still more unneces-So late as 1814 an arrangement was made with the ghautwalls, or petty hill chiefs, of the western jungles, to secure their own abstinence from plundering, and also their assistance towards the suppression of robberies perpetrated by others. Highway depredations are frequent, elucity committed on Hindoo pilgruns journeying through the forests to the sanctuary at Baidyanath, where there is a celebrated temple dedicated to Siva, and it is probable that many of these robberies are nocompanied by murders, the knowledge of which never reaches the police officers. The head-quarters of the judicial establishment are at Soory, which is the residence of the In 1801 the population of Birbhoom was estimated at 700,000, in the proportion of thirty Hindoos to one Mahomedan -(J. Grant, Police Reports Colebrooke Pullarion
1) Courbell Cowell &c )

Biacua —A small town in the province of Allahabad principality of Dutrah thirty-two miles NN 1 from the town of Dutrah 1 int. 26° 7 N., Ion. 78° 23 F

BIRMANGYOROOO,—A full fort in the territories of the My ore Raja simuted about ten miles W by S from the tows of Sera

Bisano.—A small Island in the Eastern seas twenty miles in circumference lying off the aorth-castera estremity of Celebes list, 2° \(\nu\_\text{s}\), lon 125° 5 E.

BISBANGHAUT—A pa s or road over a range of mountains near Ad jighne leading from Cellinger to Pao nah It is a mile in length, and of very difficult ascent fur smillery or wheel cel carriager

Bissoure (Functi) .- A town in the province of Labore situated on the north west bank of the Ravey here about 120 yards broad at the lowest and very rapid being so near the hiller lat 32 5' \, ioo 74 5' F., forty-two miles > \ In from Amtit sir From Belaspoor fertile vallies thou h not wide extend to Bissolre where high hills commence which extend with little laterruption to Cashmere. Io 1783 this town was fortified and commanded the entrance to the hills, but at that date both town and district were tributary to the Jamboe Rajpoots as they are at present to Rajs Runjeet Singh of La-hore—(Foster &)

Bissolir (fuerah).—A town in the province of Delha, thirty-one miles west from Barelly [at % 10]. No 78 46 E. During the early relans of the Mogal emperors Bissolie floorashed and its prosperity contained under the Robblishs, but it is now in comparison waste and desolate. Serval of the family of Mahamed Ala, the Robblish founder, are burned here.

Bissunroos (Plahnapura) — An ancient town in the province of Ben gal seventy-seven miles N W from Calcutta; lat 23° 4 N lon 87°25'

E. This place is situated in a tract of ferruginous soil which rives here about thirty feet above the alluvial cangetle plains, and continues with the a lincent hills It is still a considerable town and much frequested as a mart I y the inhabitants of the junele mahala and Hamghur districts to productions of the plains. The old fort where the Itajs resides has been a work of consulerable atreogth and magnificence as la proved by the remains of mersy stone gateways pa godse, and other decayed buildings within its ramparts For about eight miles to the cost the country is covered with a thick palass jungle. Formerly Basuapoor was the chief town of a large and accient zemindary, in 1784 containing 1,256 square miles; but a small portion now remains to the Itals acarly the whole having been sold or attached for unliquidated arrears,-(Fullartun J Great 4c)

BITOBAH,—A village in the provace and distract of Allahabad anuated on the right load of the Ganges about stay salles south from Juckaow where the Jolat magnitrate for the Euttelpoor division of the zilleli usually resides

Birrooa.—A town is the province of Allainshad alse miles N by N from Cawnpoor Threplace has been selected for the residence of Bajerow, ex Penhws of the Malaratte. The British etril station was in 1820 removed from hence to Cawopore and the poble buildings appropriated for the accommodation of binnelf and followers, and others erected for the same purpose.—(\*\* Juliarian 4;\*\*)

Biswas (Fines).—A towo in the Oude territories forty three miles sorth from Lucknow ! Int. 27° 28 K , Ion 80° L' E

## BLACK PAOODA, -- See KANABAK

BLACKWOOD & HADSOES.—A new harbour samed after Sir II Blackwand lately discovered on the coast of Coromaudel situated to the sorth of Point Poondy, and sheltered from the eastward by the Armegon shoal. It is about forty-six miles from Madras roads, and bears from the flag-staff at Fort Geoige about N 50° E. The surf is here so moderate, that for four or five days in the week a ship's yawl may land with safety, and it is not at any time so violent as on the adjacent coasts. During the N E. monsoon the sea breaks high on the Armegon shoal, and consequently renders the anchoiage within comparatively smooth —(Maxfield, &c.)

BLAMBANGAN—A small division in the island of Java, situated at the eastern extremity, which down to a comparatively late period was subject to the Balinese, and chiefly inhabited by that people. In A D. 1588 Thomas Cavendish, the circumnavigator, touched at Blambangan.—(Crawfurd, &c)

BLELLING (or Boleeling).—A principal town in the Island of Bally, the Raja of which having permitted his troops to attack, in 1814, a British post at Banywangi, in Java (where they were routed), an expedition then proceeding to Celebes under General Nightingale, was ordered to call at Bally and exact satisfaction. The expedition terminated without the necessity of proceeding to hostilities by the submission of the Raja but a British garrison continued to occupuly for some time the town and crattan (or citadel) of Blelling—(Thorn, Crawfurd, &c)

Bo (or Hod).—A cluster of small islands in the Eastern seas, lying E.S E from the southern extremity of Gilolo They are inhabited, and supplies of cocoa-nuts, salt, and dried fish may be procured here

Boad (Bodha)—A large fenced village in the province of Orissa, situated on the south side of the Malianuddy river, which at this place in the month of October is one mile and a half broad, lat. 20° 32′ N, lon 84° 10′ E, 124 miles west from Cuttack The face of the country in this neighbourhood is mountainous, in-

terspersed with valleys from four to sixteen miles in circumference. The villages are fenced with hamboos to protect the inhabitants and their cattle from wild beasts, and in the fields the women are seen holding the plough, while the female children drive the oxen. The Boad estate commands one of the principal passes into the Cuttack district, and the best road to Nagpoor and Gurrah Mundlah is through Boad

This is an extensive zemindary, reaching almost to Goomsur, through one of the wildest tracts of woods (abounding with teak) and mountains in India, scantily inhabited by savage Gonds, who acknowledge subordination to the Raja, but pay no revenue. He had been expelled by the Berar Mahrattas who garrisoned his fort, but he was restored by the British, and his money assessment, on account of themise able condition of his country, reduced to 2,000 rupees—(Roughsedge, 1st Reg, &c)

Boadsoos (or Biagoos).—See Bon-

Bobelna.—A small town in the province of Allahabad, seventeen miles S by W. from Jansi; lat 25° 15' N, lon 78°24'E

Bobile —A town and zemindary in the northein Circars, thirty-five degrees W.N W. from Cicacole, lat. 18<sup>8</sup> 25', lon 83° 31' E. In 1757 the first in rank of the polygars of this country was Rangaroo of Bobilee. His fort stood about sixty miles N.E of Vizagapatam, close to the mountains, the dependent zemindary being about twenty square nules There had long been a deadly hatred between this polygar and Vizeram Rauze, an adjacent polygar, whose person, how much soever he feared his power, Rangaroo held in the utmost contempt, as of low extraction, and of no note Vizeram Rauze persuaded the French commander M. Bussy to espouse his side of the quariel, and the latter not foreseeing the terrible event to which he was proceeding, determined to reduce the

whole country, and to expel the poly gar and likefamily

A polygar, best ies his other towns and forts, has always one situated in the most difficult part of his country, which is intended for the last refuge for him clf and all his blood singular construction of this fort is adequate to oll the intentions of de fence among a people maned to cannon or the means of regular battery Its outline is a re-ular square which rerely exceeds 200 yards; w round tower is raised at each of the angles, and a square projection in the middle of each of the sides. The healt of the wall is generally twenty-two fert, but the ramport within only twelve which is likewise its breadth at the top although it is much broader of the bottom. The whole is of tem pered clay raised in distinct layers, of which each is left exposed to the sun until thoroughly hardened before the next is applied. The parapet rises ten feet above the rampart and is only three feet thick. It is indented five feet down from the top In inter stices are inches while, which are three feet asunder A foot above the bet tom of these interstices and battlements runs a line of round hoice onother two feet lower, and a third two feet from the rampart. These holes are usually formed with pipes of baked clay, and serve for the em ployment of fire-arms arrows and lances The interstices are for the freer use of these orang Instead of loop-holes, which cannot be inserted or cut in the clay

The towers of the square projection in the middle hove the same parapet as the rest of the well and in two of the projections in the opposite sides of the fort are gateways of which the entrence is not in front but on one side from whence it is contained through helf the mass, and then turns by a right angle into the place. On any alarm the whole passage is choked up with trees, and the outside surrounded to some distance with a strong bed of their branules. The rampart and parapet is covered by a sebe of strong thately supported.

by posts; the eves of this shed pro-This shed fect over the battlement affords shelter to those on the ram part, and guards it against the sun and rain An area of 500 yards or more, in every direction round the fort, is preserved clear of which the circumference joins the high wood, which is kept thick three or four miles in breadth, sround this centre Few of these forts permit more than one path through the woods entrance of the path from without is defended by a woll exactly similar in construction and strength to one of the sides of the fort having its round towers at the ends and the square prejection in the middle

From notural sugacity they never raise this redoubt on the edge of the wood but at the bottom of a recess eleared on purpose and on each aide of the recess raise a breast-work of earth, or a hedge from whence to gall the approach. The path admits of only three men a-breast winds continually is every where commond ed by breast-works in the thicket and lies in its course several redoubts similar to that of the entrance and like that, floaked by breast-works on each hand. Such were the defences of Bobilee which are given at length as a specimen of all polygar forts; ngainst which M Bussy marched with 750 Enropenns of whom 2.0 were horse four field-pleees and 11,000 peons and seposs' the army of Vizeram Rouze who commonded them in person

The attock commenced at dor break on the 24th of January 1757, with the field-pieces against the four towers and by nino o'clock several of the battlements were broken All the leading parties of the fone divisions theo odvanced at the same time with scaling ladders but, after much endeovour for an honr not a mon had been able to get on tho parapet and many had follen wounded. Other porties followed with little success until all were so fotlgued that n cessation was ordered, during which the field pieces having beaten down more of the parapet gave the second

attack greater advantage; but the ardour of the defence increased with the danger. The garrison fought with the indignant ferocity of wild beasts defending their dens and families, and several of them stood as in defiance on the top of the battlements, and endeavoured to grapple with the first ascendants, hoping, with them, to twist the ladders down, and this failing, stabbed with their lances; but being wholly exposed, were easily shot by aim from the rear of the escalade. The assailants admired, for no European had seen such exeess of courage in the natives of Hindostan, and continually offered quarter, which was always answered by menace and intention of death. Not a man had gained the rampart at two in the afternoon, and another cessation of attack ensued. On this Rangaroo assembled the principal men, and told them there was no hopes of maintaining the fort, and that it was immediately necessary to perserve their wives and children from the violation of the Europeans, and the still more ignominious authority of Vizeram Rauze.

A number called without distinction were allotted to the work. They proceeded every man with his lance, a torch, and his poinard, to the habitations in the middle of the fort, to which they set fire indiscriminately, plying the flame with straw prepared with pitch or brimstone, and every man stabbed, without remorse, the woman or child, whichsoever attempted to escape the flame and suffocation. The massacre being finished, those who accomplished it returned like men agitated by the furies, to die themselves on the walls

Mr. Law, who commanded one of the divisions, observed, while looking at the conflagration, that the number of defenders was considerably diminished, and advanced again to the After several ladders had failed, a few grenadiers got over the parapet, and maintained their footing in the tower, until they obtained more secure possession. Rangaroo hastening to the defence of the tower, was

killed by a musket ball. His fall inereased the desperation of lns adherents, who crowding to revenge his death, left other parts of the rampart bare. The other divisions of the French troops having advanced, numbers on all sides got over the parapet without opposition; nevertheless none of the defenders quitted the rampart, or would accept quarter, but each advancing against, or struggling with, an adversary, would resign his poinard only with death.

The slaughter of the conflict being over, another much more dreadful presented itself in the area below-The transport of victory lost all its joy; all gazed on each other with silent astonishment and remorse, and the fiercest could not refuse a tear to the destruction spread before them. Four of the soldiers of Rangaroo, on seeing him fall, concealed themselves in an unfrequented part of the fort until night was far advanced, when they dropped down from the walls, and speaking the same language, passed unsuspected through the quar-They conters of Vizeram Rauze. cealed themselves in the thicket, and the third night after, two of them crawled into the tent of Vizeram Rauze, and stabbed him in thirty-two places, and were immediately cut to Had they failed, the other two remaining in the jungle were bound by the same oath to perform the deed, or perish in the attempt.-(Orme, &c)

Bodur —A village of considerable extent in the province of Candeish, about forty miles travelling distance S S W. from Boorhanpoor. It is of considerable extent, but in 1819 was in a very decayed condition —(Fullarton, &c)

Bodytunrayadroog —A stupendous fortified mountain in the Barramahal province, situated about six miles west from Cavrypatain.—(Fullarton, &c.)

Boggan -A town in the province of Bahar, situated on the east side of the Gundluck liver, about 120 ndes N.N W from Paton; Ist, \$7° 4 N., Ion. 84° IS L. A great tract of country to the north of thi place is atil covered with primeral forests from which excellent timber for ahly building is procured, and floated down the Gondock and Ganges to Calcutts.

Rossaian —A town in the province of Bengal, shi treet of Rogil poor 130 miles \ W from Moor shedshad; lat. 24° 53° \ lon 86° 52° L.

Bonneta (or Baghelerad) - A district in the province of Gund wana, but during the reign of Aureng zebe annexed by edict to the province of Allahabad although it never was actually aphdued by his forces. The produce of the country is wheat, barley and different Liods of peac, and the Inhabitants possess large flocks of esttle and sheen. There is, however but little cultivation, the natives scarcely raising grain enough for thrirown subsistence A portion of this territory is tributary to the British government and the whole la under its protection The princirol towns are Bandoogur and Muc-Londabad,

Boctstoon (Bhazelpoor), Adatrict la the prosince of Bahar, where it is altuated between the twenty fourth and twenty seath degrees of north latitude, occupying the south eastern corner of that province, toge-ther with a small section from Bengal On the oorth it is bounded by the districts of Tirhoot and Purneah on the south by Ramghur and Bir bhoom t to the east it has Purnenh and Moorshedshid; and to the west Bahar and Ramghur Its greatest length, from the boundaries of Bir bloom on the Duarnes to that of Tirhoot on the Tilaw is about 133 miles in a N.A W and S S E. direc tion and its greatest breadth crossing the above line at right angles, la about eighty miles. By traring the boun daries on Major Rennel's map, Dr F Rochanan estimated Its contents ot about 8,22, square miles.

In 1784 this district then denominated Mongble contained in all its dimensions 8.270 square miles of which only 2.417 were in the Boglipoor division on both sides of tho Gances and the whole territorial outline still continues very onratisfactory, except where final decisions of the courts of jortice I are deter mined the disputed boundaries of tho different remiodaries. The modern cupital is astuated towards one of Ita extremities and the whole section which is beyond the capital towards the north is separated from it by the Cancer which is attended with much loconvenience and some danger

The help of Boelmoor in a few parts compose regular chains of con anderable length to most parts there being passages, at very about inter vals through which a traveller might penetrate without any great ascent that in the most hilly pacts these apertures have been allowed by tho natives to be choked up with trees to protect their stron holds in former times. In the great closter near Italamahal the bills notwithstanding the ruggedness of the soil are toler ably well occupied In other clusters the hills are entirely waste. Many parts of the western cluster would admit of cultivation, and some have been tilled by the mountaineers; but the encouragement of the latter is very daubtful policy and the lababi tants of the piain will on no account cultivate the hills lest the number of their birth should be suspected whole of these clusters and even the lulis of Rajamahal compose, lo the opinion of the natives, a part of the hilly tracts there is a consider oble extent of swelling ground divid ed Into two portions, that exempted from the influence of the Ganges. ond that liable to be affected by its floods

The streams that flow into the Ganges from the south alde differ greatly from those to the north of that arrer Although the chancels of some of them ore of great width, none of them in this district are at

any time navigable, except in the eastern corner, where, during the floods, the water of the Ganges filling the lower part of their beds, renders them penetrable for small boats. Even the largest of them, having channels from 200 to 400 yards broad, are in general fordable throughout the rainy season, at which period, however, several of them are deep enough to assist in floating down bamboos and timber.

In the dry season, it is chiefly near their sources that these rivers contain any visible stream, and then each of the small branches appears to contain a greater quantity of water, than the vast channel worn by the united force of these torrents, when swollen by the periodical rains In spring the widest channels appear perfectly dry sand, but by digging a foot or two deep, good water may at all times be procured, and this subteirancous water has in some cases a sort of current, as canals dug across the channel collect a small stream Above Monghir the Ganges forms the boundary between Boglipoor and Tuhoot. The principal rivers south of the Ganges, are the Keyul, the Mauia, the Ulayi, the Nagini (female serpent), the Augiana, which last river having been impregnated by Pavana (Eolus) the god of the winds, produced Hunimaun (Pan), the prince of monkies (Satyri), and the prime minister and companion of the great Rama (Bac-The others are the Nacti, the Buglidar (tigei-catcher), the Ghorghat, the Mohané, the Baruya, the Bilasi, the Dobce, and the Mooteejharna, or pearl stream, which falls down a precipice four miles south from Sicrygully.

The pieces of stagnant water may be divided into jeels, that contain water throughout the year, and the chaongre, which dry up during the cold season. Some of the jeels are evidently the old channels of large rivers, which at both ends have lost all communication with the stream, but are so filled with water during the periodical rains, that even in spring they do not become dry. The

principal jeels, however, are low lands, which collect a great quantity of water from floods and torrents, and never become dry. The most conspicuous of these is Domjala, south from Rajamalial, which in the rainy season is seven and a half miles long by three and a half broad, and in the dry season four imles by one and a half.

Certain places of the fourth, or northern intermediate division, are found covered with carbonate of soda, called by the natives kurwa mati, and collected occasionally by the washermen of the vicinity. The most remarkable spot is in Hebipoor, about ten miles west of Pointy, on the edge of the plain inundated by the Ganges, and extends about fifty yards in one direction, by thirty in the other During the flood, this place is completely inundated by the Ganges for three or four days, but in the month of October the saline matter begins to effloresce on the surface, which is covered with short grass. washermen scrape the surface, and beat the saline matter from among the roots, which operation may be repeated, but in the rainy season, even when the spot is not covered with water, no saline matter is proemable By digging to a very small depth clear water is obtained, notwithstanding the saline nature of the surface

South winds are very uncommon in Boglipoor, east and west winds being most prevalent for a great portion of the year. The former begin about the middle of June, and the latter about the middle of February, so that the cast winds last double the time of those from the west, but they blow with less violence, many remarkable deviations, however, take place. The winters are less cold than in Purneah, and the heats of spring, when the winds are westerly, very severe, these winds being hot and parchingly dry, and the hills are no where of a sufficient height to reduce the temperature of the atmosphere

In this district there is a great variety of surface, but, on the whole, the portions of it fit for the plough appear rich, and capable of lemg rendered productive. A considerable extent is perspend by m re tock totally tocapable of cultivation; and a still greater space is covered with fragments of tock of various since On the lulls three masers are so large and nomerous, that could the plough be used, on account of the declient the astore of the ground would render its agency impracticable. It has been estimated that in woods thickets of turbes and descried villages which have become intally all I there are 1 73) square miles of land sufficiently level for the plouds, and that there are 1.140 square miles of hills that are covered with woods Including the ground covered with tamarished therefore there are in all for forests and thickets almost 3 100 senare milest he far the greater part of which is kept, owing to various causes In a very stunted condition. The The glipoor by some gentlemen but it has not thriven. In many parts of the southern central division from ore has been found but generally in such small marks that it would out answer for European manufacture The most noted hot snrm- Is at beetacoond, near the town of Vlonghir, and there is another at Bhurks six miles south from Sectacoond frest hat spring is at Bheemhan I about screnteen miles south from Bhurks in which on the 21st March 1810, the thermometer stood at 144 I ahienheit t but there are ouny others of various temperatures

The rent free lands in this histrict are very considerable and ab tract greatly from the revenue as it is instally the best soil and situated in the above populous parts of the country. Another burthen has tended to reduce the recurse of the large territory to an inagnificant sum which is the assignment of lands to invalid soldiers as part of their subsistence and a reward for their estinces. It has however been found after an enormous expendature that the expectation of rendering this a confort redetation of rendering this a comfort redering this a comfort

able provision for the reteran was fallacion and the plan has been most lud clously atundenced. For the firture the local le will be rewarded with money which is much better auted to their habits and infirmities, less expensive and more easily regulated Tho whole land purchased I v government on account of localide smounts to 231 000 Calcutta begut which may be converted into three semindaries. The exteting semindars notwithstanding the indulgence that has been sheen them in the revenue assertment, in 1810 had not tho least confidence in the perpetual actilement made in 1701 and had recourse to every stratagem to conceal their profits, which where any pains had been taken to cultivate the land was profatly enormous lo 1814 the jumma or land assessment to the revenue amounted to only 3,83,016 rupees and the ablarry or tax on spiritnous liquors, to 44, CD rupres

The most destructive of the wild quadrapeds, or rather of the wild four landed anumals is the Ilunimann in species of laboon), an aniand held so sacred by the Handoos that it is reckoned almost as great a sin to kill a cow ps one of this gemust such an action le reckoned ex tiemely unlucky and the same evil fortune attends its bones which If bu ried under a house render its owner and Inhabitants unfortunate discovery of such bones and the ascertaining that no such are concealed where the erection of a house is contemplated forms one of the nets of the Jyoti b or astronomical philosophera of India. It is probably owing to this opprehension of all luck that no natire will neknowledge his having seen a dead hunimann for it can scarcely be supposed that the animals conceal their dead, or innny of the natures behere. The short tailed monkey (ra tuya) ia also common but being leak sacred le not permitted to tako such lilicities with the crop as his long tailed brother the hummann is Indulged in t his bones, however ore equally unlucky and persons who have long frequented the woods, will no more allow that they have seen a dead ratuya than a dead hummaun.

The black bear is found in the woods, and does little harm, although they occasionally kill a man; but they rarely attack cattle. Another species is called by the natives the hard bear (because it may be beaten very much without being killed) These animals live in pairs or families, and subsist on flogs, white ants, and other insects, which they dig up, but they have never been detected digging up graves, or cating dead carcases, as is reported by the natives.

The drains on population in this district are not great; yet after so long a peace, and with so much unoccupied territory, the increase of inhabitants is not so great as might have been expected. In 1810 the total number of Mahomedans within the limits of the jurisdiction were estimated by Dr Francis Buchanan at 460,000, the Hindoos at 1,559,900, making a total for the whole district of 2,019,900 persons The Monghir and Surjegurry pergunnahs are over-flowing with inhabitants, yet the surplus cannot be persuaded to settle in the adjacent wastes of Mallepoor. The following are the principal towns, besides Rajamahal, which contains 25,000 inhabitants.

	Houses
Boglipoor	5,000
Champanagur	1,500
Nathnagur	
Serasin	
Surjegurry	500
Arjungunge	500
Caligunge	600
Atapoor	500
Colgong	400

Besides Monghir and Oudanulla there are the remains of a considerable number of blick and mud fortresses, some of which, belonging to the Cunsickpoor and Ghiddore families, were destroyed by Capt Brooke, who was sent to reduce the chiefs to subordination during the government of Mr. Hastings The best-looking modern edifices are the indigo factories Real slaves of the male sex are here called nufur, and their wo-

men laundies; they may be sold in whatever manner the master chooses; but they are not often brought to market, and are all either of the Dhanak or Rawani castes. The slaves licre are in general industrious, seldom run away, and are rarely beaten. Prostitutes are few in number, and mostly of the Mahomedan religion The general character of the inhabitants of the district is far superior to that of the south-eastern natives of Bengal; and one magistrate, in his report to government, declares that, in comparison with the people of Backergunge, they may be termed saints.

Boglipoor is a remarkable thoroughfare for travellers, both by land and water, who expend a great deal of money in the purchase of necessaries, such as rice, pulse, salt, oil, seasoning, fire-wood, tobaceo, and betel. Upon an average, it may be estimated that one hundred boats stop daily at Rajamalial, besides those at Pointy, Colgong, Sultangunge, Surjegurry, Boglipoor, and Monghii; while by land multitudes of pilgi ims, troops, and European travellers are continually passing The East-India Company's dealings, however, in this district are inconsiderable, consisting of a little silk, Boglipoor cloth, and saltpetre.

A substance which naturalists include among the clays, but called khari by the natives, is very generally diffused through the hills, when perfect, it is a matter resembling chalk, but it is not calcareous, women in many parts, eat it when breeding, as in Bengal they eat baked clay, and some of it, for this purpose, is exported to Moorshedabad when taught to write, rub it with water into a white liquid, with which they form letters on a black board; and native painters and gilders cover with this liquid the wooden work on which they are about to operate.

The mountaineers within the Boglipoor jurisdiction are supposed to occupy a space of about 1,600 square miles, and are exempted from all taxes, and the ordinary course of the law. An enormous establishment of nearly 2,500 men is retained to cherk this handful of burbarians who are besides bribed by annual pen sions, to abstain from the commission of outrages, such as robbery and morder The rays or chiefs, who receive pensinos of ten supers per month from government and some of the nails or deputies are of the rank of Singhs; the remainder of the naibe, and all the majors, who are pensioned at the rate of two rupees per month are of the rank of Majhi. The land which appears to be the property of the cultivators is tilled for two years, and then abandoned for five or sla In the low lands that are ploaghed they raise the same ar ticles as on the hills, with the addi tion of rapesced and seraming; they collect wild yams, and besides cows for milk and labour they rest awine goats, fawls, and pigcons, for esting Vany still retaio a soperatitious wor ship of their own but a great number of the wealthlest have fallen under the spuritual doounlass of a low caste of Brahming, who have instruct ed them to worship Durgs and say prayers before a bheel tree Both seses are much addicted to intoxica tion and the amount of the govern ment pensions is generally spent in inquorat Boglipoor the chiefs return ing to the hills as bare of money as they came The exports of the mountaineers consist of grain Inditrated clay timber firewood charconl was and cotton; their imports are cloths fron, copper brass and bell metal wares rice fish cattle, oil spices and salt From the time of the Nahomedan

aron the time of the Vanoncian Invasion until the Hillish obtained possession, the greater part of this district oppears to have been in o constant state of marchy Some of the original tribes seen never to have been subdited by the Himloo fullowers of the Brahuma and It is only lately that many have put themselves under the guidance of the sacred order even under the swoy of Sultan Shuja when the Mugul empire still flourished in full vigour, and when they there or the sacred when they then they tribe of the sacred when they tribe of the sacred when they then they tribe of the sacred when they tribe they are the sacred when they are they are the sacred when they are they are the sacred when they are the

the district, some portions of the plains were subject to petty chiefs, who contemned his authority and Increantly aguated the country by their incuratons and refractory halate. Ungul officers of rank commonly resided at Hajamahal Bogil poor, and Monghir and the first still continues a favourite place of residence with the Vlahomedans Cossim Ah after his quarrel with tho I nglish, dwelt for some time at Monghir and intended to secure his independeace by a line of fortifications crected at Oodanulla The farcing of these by Vlajor Adams, in 1763, dissinated this vision t but the turbu lence of the chiefs of the laterine la creased and Captalos Brooke and Brown were for several years em played in a miserable warfare with these tribes; but the forces employed were never of such strength as to bring the matter to a conclusion At length Capt. Brown of course with the assent of government by enor mons concession ladiced the discontented to become quiet and his concessions were confirmed by Mr Cleveland the cold functionary who succeeded him in authority over tho wilder parts of the district. The resuit was a rulnnus settlement and establishment which still forms part of the Boglipoor ecocomy and which In the omnion of competent judges (Dr Francis Buchanan and Mr Sisson) has produced but little ultimate benefit those bills in which there is no establishment of the kind (chautwallor) having continued as tranquil or those into which that establish ment was introduced In 1814 the cor orate establishiarat of the Boglingor hills consisted of thirteen sirilars or chiefs, thirty neibs or deputies and 400 manibis. The pendon of a sirder is ten cupees; of o mub three and of a manihi two cupees per mooth Although the great estent and phy sical composition of this district nocessarily tend to weaken the cootrol of the magistrate vet in 1815 few crimes of magnitude occurred the most noted being a murder perpetrated among the bills, on a woman

by her husband; who confessed the erime, and attempted to justify it on the plea that she was a bad housewife, and neglected her domestie duties. The Boglipoor district, although not so populous as some others, is of such extent that it is difficult for the magistrate to exercise an efficient control, some of the tannalis, or pohee stations, being 100 miles distant from head-quarters.—(F. Buchanan, Sisson, J Shakespear, Tennant, &c.)

Bogliroon.—The modern capital of the above district, situated in lat. 25° 13′ N, lon 86° 58′ E, 110 nules N.W. from Moorshedabad. town has a mean appearance, although placed in a beautiful situation The European houses and Muliomedan mosques are ornamental, but the town consists of scattered hazars wretchedly built, and, owing to the declivities, inconveniently placed. In 1810, the total number of houses was estimated at 5,000, inhabited by about 30,000 persons, a majority Mahomedans, who have still a college here, but in a state of great decay is also a small Roman Catholic church here, and about fifty Christians of that church, half of them the descendants of Portuguese, the rest native converts, who in other respects retain their own dress and manners. 1810 the priest was a native of Milan, sent by the Societas de Propagande Fide, who had also charge of the Purnea flock of Papists. are two very singular round towers (the Padoka) about a mile NW. from the town, supposed to be of The Raja of Jeypoor, Jain origin in whose dominions the Jain sect abounds, considers them so holy, that he has erected a building to shelter such of his subjects as visit them Near Goganullah, one stage from hence, is a monument resembling a pagoda, erected to the memory of Mr Cleveland by the officers and zemındars of the jungleterry of Boglıpoor, as a mark of gratitude for his mild and conciliatory conduct -(F. Buchanan, Fullarton, &c)

Bogroon.-A small town in the

province of Delhi, situated between two branches of the Ganges, twelve miles south from Hurdwar, lat. 29° 48' N., lon. 78° 9' E.

Bogwangola (Bhagavan Gola)— A large inland town in the province of Boglipoor, eight miles N.E. from the city of Moorshedabad, lat 24° 21' N., lon. 88° 29' E. This is a very busy emporium for the inland navigation, having sufficient water at all sections, and from hence the capital of the district is chiefly supplied with gruin. The town, which is entirely built of bamboos, mats, and thatch, has been removed more than once on account of the encroachments of the Ginges, and exhibits more the appearance of a temporary fair or encampment, than of a solid commerend mart carrying on a most extensive traffic —(Colonel Colebrooke, &c)

Bohnagur —A small town in the Bengal province, district of Mymansingh, seventy-one miles N by E. from Dacca; lat. 24° 43′ N, lon. 90° 40′ E

## BOMBAY,

A small island, formerly comprehended in the Mogul province of Aurungabad, but now the seat of the principal British settlement on the west coast of India, lat 18° 56' N. lor 72° 57' E This island is formed hy two unequal ranges of whinstone rocks, running nearly parallel to and at the distance of about three miles from each other The western range of hills is little more than five miles long, the eastern, exclusive of Colapba, may exceed eight in length. At their northern and southern extremities they are united by two belts of sand, now forming a kind of stone, rising but a few feet above the level. of the sea These natural boundaries were formerly breached in several places, where they admitted the sea, and, according to Fryer's account of Bombay in A D 1681, about 40,000 acres of good land were then overflowed It appears also that the Goner river, which rises among the hills

of Salsette and disembornes Itself loto the channel between that Island and Bombay, when awollen by floods used to enter the breaches at the northern catremty and after traversing the whole extent of the lat ter discharge Itself Into til e ocean In fact Bombay originally was nothing but a group of small I lands, well numerous back waters, producing rank vegetation, at one time dry and at another overflowed by the sea So unwholesome in consequence was the regetation reckoned, that the older travellers agreed la ollotting not more than three years for the average duration of life at this presidency

The fart of Bombay stan is oo the south eastern extremity of the island on a narrow oerk of land formed by Back Bay on the western side and by the harbour on the eastern Worlee aluses are at the north end of the Island a distance of nearly aix miles from the fort Formerly a cocos-nut would not only corered the explanade but the fort also down to the channel between Bombay and Colabba. At that remote period of time Malim was the principal town on the Island and thosew houses of the present town theo in calstenee. were interspersed among the coconthat trees, with the exception of those built on Dungarce Hill adjoining the harbour which oppears to have been then occupied by fishermen When the fortifications were erected but sery little more land was cleared of the eccor-nut trees beyon I what was absolutely indispensable. Icar ing the space within the hedy of the fort and without its walls, up to the very glack o cocoa-nut grove from time to time and by various means, the esplanade was gradually cleared of trees to within 600 yards distance of the fort but cadjan huts were still tolerated until the close of 1802 when they were also removed. the following year the great fire happened within the fort sine the explanada was extended to 800 yards.

By this time the more wealthy in habitanta had built houses in a de tached irregular manner throughant

the cocoa-nut woods contiguous to the e planade; ond the Dungaree was also built on to the extent of two miles on I unwards from the fort tho little vacant ground remaining had lo consequence risen in so enormous price. In this state of things the suf ferers by the fire and the indigent from the embanade bad oo alternathe but to resort to the Honouralde Company a calt batty ground scarcely recovered from the sea neither had government any ground to give in eachange for the valuable land taken when extending the explanade All these causes combined, serve to occount for what is called the oew tawn of Bombay being built in such o low muddy unwholesome tract of land which during the wet monionn has the appearance of a shallow lake many of the houses being then sensrated from each other ly water so that the inhabitants suffer from the Inundation and Its offices draing seven or eight months of the year At all agreens the ground floor of many of its houses are on a level with high-water mark, some below and but few actually above it at full spring tilles. Much also of the rain woter that falls on the old town and thoesplanade passes through the new town and thence across the breach hullow to the slulees at Worke Under these circumstances, tho

surface of the Island is so circum sembed rocky and uneven (except where a considerable part is over finned by the sea), that it does not roduce a authorency of grain in the year to supply its population for one week; set each spot that will admit of tillage is brought under cultivation of some sort or planted with cocoanut trees The vellant that coming nicates between Bench Candy and oregrove has prevented the ocean from making a breach through the centre. This substantial work with amaller ones of the same construc tion have preserved the low lands of the island from being mundated by the spring tides which but for them would have destroyed all but the bar ren lutis Although the see be now

excluded, the rain water still collects in the lower parts of the island, where the surface is said to be twelve feet under high water mark, and during the rains forms an unwholesome swamp. In 1805 Mr Duncan completed a vellard, or causeway, across the narrow arm of the sea that separated Bombay from the contiguous island of Salsette: an operation of infinite utility to the farmers and gardeners who supply the markets, but which is said to have had a prejudicial effect on the harbour.

The fortifications of Bombay have been improved, but are considered too extensive, and would require a numerous garrison Towards the sea they are extremely strong, but on the land side do not offer the same resistance; and to an enemy landed, and capable of making regular approaches, it must surrender. The town within the walls was built by the Portuguese, and even the houses that have been since built are of a similar constitution, cased in wood, with wooden pillars supporting wooden verandas, shut up with venetian blinds, the roofs sloped and covered with tiles; the consequence of which is, that Bombay bears no external resemblance to the other presidencies. The floors are planked with wood.

There are three government residencies at Bombay. The one within the walls of the fort, although large and convenient, is little used except for holding councils, public courts, and despatching business, of a dismal aspect, looking like a stadthouse in a German free city At Malabar point, eight miles from the town, is a cottage in a beautiful situation, on a rocky, woody promontory, and actually washed by the sea spray; here the governor resides during the hot weather The third and principal is Pareil, about six miles from Bombay, it a short distance from the eastern shore of the island. The interior of the house is very handsome, having a fine staircase, and two noble 100ms, one over the other, about eighty feet long, and very handsomely furnished The lower of these, used as a dining-room, is said to have been an old desecrated church belonging to a Jesuits' college, which had fallen into the hands of a Parsee, from whom it was purchased by the government about sixty years ago.

The northern portion of the fort is inhabited by Parsee families, who are not remarkably cleanly in their domestic concerns, nor in the streets where they dwell. The view from the fort is extremely beautiful towards the bay, which is here and there broken by islands, many covered with trees, while the lofty and currously shaped hills of the tableland on the continent form a stilking background. The sca is on three sides of the fort, and on the fourth is the esplanade, at the back of which is the black town anidst cocoa-nut trees. Substantial buildings now extend to very nearly three miles from the fort.

Bombay appears for many years to have been left to itself, and individuals were permitted to occupy what land they pleased, not was there any system or regulation established for the security of the public In A.D 1707 the greater revenue part of the present limits of the fort had become private property, but, by purchases and exchanges between that date and 1759, it became again the property of the Company, yet was subsequently transferred to private persons It is certainly an extraoldinaly fact that the principal, if not the whole of the landed pioperty which the Company now possesses within the walls of Bombay, has been recently acquired by purchase, having, within the memory of many persons still alive, bought it of individuals, who were always considered to be meiely the Company's The property thus tenants at will. acquired to the Company by puichase and exchanges cost, since 1760, altogether about 7,37,927 rupces.

The buildings within the walls of the fort, including the barracks, aisenal, and docks, may be valued at one crore five lacks of impecs; the rent of bonner will in the fat in 1817 amountel to \$ 7,300 mores include, the Company a property The great price given for ground within the fort which i lails et erra te the Inikhnes carry I on in every last of the lancement country the commodiant and easts ferrils duelling constructed by men of the nature, and the immediate share and warrammer be ongir 1 than street and I unevente, furn the strongest evidence of the I in peace of ground within the fitter of libertur and that it might nagl to the 100 co meas per arre for the report of the police which upon # 1 14 smare iard would sichl Chien, er er

here screwed into fifty feet, or one European market tlie Bombay is an excellent market to procure gums and drugs of all sorts, Moelia eoffee, barilla, cornelians, agates, and Surat cotton goods. The external commerce of Bombay in 1815-16, exclusive of the Company's, amounted to, total imports 3,06,02,230 rupees, total exports 2,67,24,749 rupees, since which it has probably mereased at least one-fourth. With the luxuries or conveniences of European production the shops were very indifferently supplied, even so late as 1820, at which date very few European tradesmen were settled at Bombay.

In 1814 the Company's marine at Bombay consisted of eighteen armed cruizers, besides armed boats, advice boats, and other craft, but since then great additions and improvements have taken place. The maintenance of this force was originally rendered necessary by the swarms of pirates that infested the western coasts of India from the shores of the Persian Gulf to Goa, and who were distinguished, more especially those of the more northerly tracts, by their cunning, courage, and ferocity. nautical banditti have haunted these regions since the time of Alexander the Great, and probably longer, and, although for the present suppressed, would soon relapse into their old practices were the pressure that keeps them under removed.

Within a century the population of Bombay has increased more than tenfold In 1716 it was estimated at 16,000 souls, in 1816 the result of a census made by government gave the following numbers, which may be depended on. 112.

1,840
0 400
11,500
200
28 000
103,800
13,150

Total..... 161,550

The number of houses was then 20,786, or about eight persons to a house. The above statement does not include the temporary sojourners and floating population, resorting to the island for transitory and commencial purposes, but not making it their permanent residence. The aggregate of these was computed by Mr. Warden, in 1814, at 60,000 persons, and by the missionaries, in 1816, at from 60,000 to 75,000 persons annually. The floating population above alluded to, consists of Carnatas, Ghauties, Carvas, Maharattas, Aralis, Persians, Goa Portuguese, Parsees, and a large proportion of scafaring men. The number of erimes committed by this miseellaneous population is remarkably small, in May 1821 there were only ninety-three prisoners of every description, and of these only twentyfour were under enminal charges

Among the Europeans the ruge for eountry houses prevails as generally as at Madras, and is attended with the same inconveniences, all business being necessarily transacted in the fort. The generality of the country houses are comfortable, and even elegant, and though not so splended as those of Calcutta and Madras, are equally well adapted to the elimate, and enjoy more beautiful views. Some of the rich natives have houses of great extent, the children of the family continuing to live under the same roof, even after they are married. lower classes have small huts, mostly of elay, covered with a mat made of palmira leaves Their wages are a great deal higher than in Bengal, but food is dearer; palanquin bearers receive seven and eight rupees each per The only English church is month. in the fort. The Portuguese and Armenian churches are more numerous, both within and without the walls, but of the native Christians in Bombay by far the greater number are usually termed Portuguese, and ficquent Portuguese elupels Besides these religious edifices there are three or four synagogues, with mosques and Hindoo temples. The largest of these is in the Black

Town, one rule and a 1 alf from the fur, and is ded cated to the worst a of Morsia Dest.

The Armenians form a part of there ex tern societies of Chri tuns who lifer to point of faith dieltime and worship, both from the Greek and Latin churches, and have shown an inviolable attachment in the equiliers and in incisons of their ancreators, under the securest trials of oppore son. They are not numerous in Bowlas, lest form a very respectachurch with in the fort. They are oc canonally al sted by one of the forta two archie hop win are subject to the Latriarch of Lehr lasin liv far the greater proportion of these arch bishops are titular prelates whose chief duty is the tuition of their nu merous churches dispersed over the en tern world. Berides the church at Bombay they late will in the limits of their society elurches at bura, Bussora, Barded and Bushire

The Parser Inhaliant sporsess near Is the whole of the hian! and weem to have perfectly domesticated there select in their new abode a nee their eand lon from Persia by the Mahomedans. They are an artise loyal body of men and contribute greatly to the prasperity of the settlement In general they are a tall comely race athletle and well-firmed and much fairer than the natives of thindostan ; but the females are more remarkable for their chartity than cleanliness. The girls are delicate an I picasin but the I dom of south soon disappears. and before twenty they grow coarse and masculine in a far greater degree than either the Hindoos or Mahnmedans. In every Furnpean house of trado there is a Parace pattner who usually supplies the largest portion of the rapital. They wear an Aslatic dress but they cut and drink like the I nalish In the morning and evening they crowd to the emlanade to my their adoration by prostration to the suo on these occasions however, the females in not appear but they still go to the well for water

Mu t of the original Parsee cut-

toms continue unaltered particularly their mode of sept liner which is no follows. The lody of the definet le deposited in a culm kiest buildin even at the top along fifty for feet In diameter, and twenty fire in he It filled up so il to within fire feet of et e top, excepting a well fifteen feet In diameter in the centre, the part so filed bein terrared with a shalit declusty tawards the well Ten euren lar genoves three laches deep are round found the well the first at the di tance of four the second at the dutance of ten feet from the well. Grones of the like depth and height and four feet distant from each otler at the outer part of the circle are car ned stra ht from the wall to the well communicating with the circular once to carry of the water The tumb ly this meant is disided into three cir eles or partitions, the outer for the men the middle for the women the inner for the children. There they are respectively placed, wrapped loosely. In a piece of cloth, and left to be despored by the sulturnet which is soon done as numbers of these birds are always seen watching and hover In, round the clumeldiouses for their prey The friends of the de ceased or the person who has charge of the tomi come at the proper time and throw the hones into their receptable, the well in the centre from the bottom of the well tulterranean passacre lead to remove the bones and prevent the well from being filled. Men of large property build one of the above sort for them selves. The public tombs are five in number but not all lo use and are attuated about three unless north westerly from Bombay furt. wreas.
The markets of Bombsy cannot be expected in equal those of Calcutta, but in variety and qualities of those of Calcutta, but in variety and qualities of those of Vladra. The bazar mutton is hard as I lean but when well fed and taken

care of, is as good as the English, kid is always good, and poultry abundant, but not good unless fed for the The fish are excellent, but purpose the larger kinds not plentiful bumbelo resembles our large sandeel, and after being diled in the sun, is usually eaten at breakfast with a dish of rice, butter, and split-pease coloured with turmeric, and named The prawns are uncomkedgeree monly fine. The island is too small to furnish much game, but the redlegged partridge is not uncommon, and snipes are sometimes The flogs here are large, and are eaten by the Chinese and Portuguese The common and sweet potatoe are very good at Bomhay. but the vegetable for which Bombay is celebrated all over the east is the onion. tatoes are now produced in this quarter of India in the greatest abundance, although so recently intioduced, the Bombay market is supplied with this root from Gujerat, and also with some cheese, which is hard and ill-flavoured The buffaloe furnishes milk and butter, and occasionally beef. but Europeans in general are prejudiced against it.

There is a great difference in the character and habits in society of the natives of our capitals and those of the interior, indeed a person who has resided solely at Bombay cannot have an intimate knowledge respecting the habits and manners of the natives of the distant provinces of India Not many years ago a Hindoo widow at Bonibay wanted to binn herself along with her husband's corpse, which being pievented, she applied to the governor, who refused permission, upon which she crossed the harbour to the Maharatta shore. and there performed the sacrifice The European society is here less numerous, and the salaries of the public servants smaller, than at the two other presidencies: economy is consequently more attended to, but the style of living is frequently elegant, and always comfortable and abun-The position of Bombay apparently ought to be healthy, but it

is said to be the reverse, the liver complaint being more frequent and fatal here than in any other part of Exposure to the land breeze which sets in every evening is frequently followed by a fever, moderate living, and cautiously avoiding all sorts of extremes, is found by experience most conducive to longevity rary society has been for many years established at Bombay similar to that of Bengal, and in 1825 no less than three English newspapers and one native newspapei weie published weekly. Many charitable and religious institutions have also been established.

As a place of consequence Bombay owes its origin to the Portuguese, to whom it was ceded in A.D 1530, having been before a dependency on a chief residing at Tanna in Salsette. On account of its fine harbour, a fort was erected by that nation, but the vicinity of Goa, the Poituguese capital of the Indies, prevented its becoming in their hands a station of Two derivations are importance. assigned to the name, one from the Portuguese, Bom Bahia (a good bay), and the other from the Hindoo goddess Bomba Devi.

This island was ceded to Charles the Second in June 1661, as part of Queen Catherine's fortune, and in March 1662 a fleet of five men of war, commanded by the Earl of Marlborough, was despatched with 500 troops under Su Abraham Shipman, and arrived at Bombay on the 18th September 1662, but the Poituguese governor evaded the cession. The English admiral demanded Bombay and its dependencies, comprehending Salsette and Tanna, while the Portuguese interpreted the treaty to signify Bombay only. The troops were removed to the Island of Anjediva, where the mortality was so great that the surviving commanding office, Mr Cooke, was glad to accept the island of Bombay on any terms, and to this place they were transferred in February 1664-5, the survivors mustering only 119 rank and file. Such was the manspicious

commencement of this inferwards flourishing settlement which in the han is of the P vinguese had remained almost a desert. All Cooke may be considered the first I in his governor of Homilary 1 on the th Nor 1566 he was succeeded by Yr C crease Lates.

It was soon discovered that his Marcety had made an unprofitable negression and that the l'ast in ha Company were much injured by the trade carried on hy persons in tho king a service who sold I uropean good for which they pal I no freight In convequence of these and other remone the king on the 27th of March 1664, he letters-patent trans-ferred the Island of Bombay from the crows to the Ea t Isdia Company, in free ond common soccage as the manor of east Greenwich, on the payment of the anoual tent of £10 in gold on the 30th of September of each year. The revenue of the Island shortly after the ecosion was estimated at 42 423 per anaum

bir Gerrave I ucas died the 21st of March 1667 and was succeeded by the deputy covernor, Capt Henry Geary At the commencement of the government Mr Cooke the first go versor endeavoured to assemble a force of Salsette assisted by the Jesuits, is order to re-establish bloself ot Bombay; but Ineffectually the first governor proving also the first rebel. In 1667-8 the revenue had increased to £0 490; the garrison was 230 men of which number ninets three were English; the rest Lor tuguese French and natives. the 23d of September 1669 Bombay was taken possession of for the East ladia Company by Sir George Oxen den the Company a chlef governor, and the troops were transferred from the Klag s to the Company s service along with the arms ordinance and stores Sir George ilied in 1663 and was succeeded by Mr Gerald Auguer as chief at Surat, and governor of Bonibas which place continued ex tremely unhealthy and much molest e I by the depredations of the Maharatta pirates. In 1679-3 a strong Dutch fleet appeared off Bombay and

created much alarm; but after reconsorting it fisoppeared without making one attack. In the ancered larg year there were 100 pleers of cannon mounted on the fortifications as I the partieon consisted of 400 regulars of which the greater aumberwere Topasses and 300 milital la 1676 letter-patent were obtained from the ling to establish a most at Dombay, at which they were em powed to coin rupees, pice, and build rooks.

Mr Aumer died in 1677 and was succeeded at Hombay by Mr Henry Oxenden. At this period Bombay contlaced of little commercial or political importance which proceeded in part from the vigorous government of Auren, zebe, then on the throne of Delhl and the rising power of the Malarattas oader the martial Sernice to 16.0 the bland of Henery was occupied by the trongs of Serojee onil the beginning of next year the soland of Henrry was taken posses mural the Bombay government act daring to oppose either although kept from their proximity is a constant state of plarm 1s 1641 Mr John Chill the brother of Sir Josiali Child, was appointed greatent af Snrat one of the justor counsellers being appointed to act an deputy goversor of Bombay In 1683-1 In consequence of the capture of Ilan tum by the Dutch, the Court of Directors constituted Bombay on in dependent I nglish settlement and the seat of the power and trade of

On the 23d December 1633 Copt Richard Argain who commonded the Company a garrison availated by I magn Thompson and others selzed on 3lr Ward, the deputy governor ond such members of the council or addressed to him on da sasumed the government. The garrison consisting of 1501 n, this solutions on 200 Topasses were joined by the Inhibitanta of the hishind, who elected Copt. Kegwing governor ond declarid they would nally acknowledge the Amg a sauthority, ofthough during the

the I nglish nation in the Lost Indies

interval between the acquisition of the island and this date, the East-India Company had expended £300,000 at Bombay, on fortifications and unprovements In 1684-5, Capt. Kegwin negociated a treaty with Raja Sambajee, from whom he recovered 12,000 pagodas due to the Company, and on the 19th November 1684, he surrendered the Island to Su Thomas Grantham, on condition of a general pardon to hunself and adherents. He had not, it afterwards appeared, embezzled any of the Company's money in the fort, which was restored to them entire, but had subsisted during his rebellion on the fiscal iesources of the Island.

In 1686 the seat of government was ordered to be transferred from Surat to Bombay, and Sir John Child dying next year, the office of president devolved on Mr. Harris, then a prisoner at Surat, but liberated by the Mogul government next year. In 1688-9 the Siddee's fleet (the Mogul admiral's) invaded Bombay, and got possession of Mahim, Mazagong, and Sion, and kept the governor and garrison besieged in the castle. An order was soon after obtained from Aurengzebe, directing the Siddee to withdraw his troops, but the evacuation did not take place until the 22d June 1690, when the lands belonging to the Portuguese Jesuits were seized, they having been active in promoting the views of the Siddee during the invasion. In 1691-2 the population of Bombay was much reduced by the plague, so that of the civil servants only three remained alive. In 1694 Sir John Gayer arrived as governor at Bombay, which he found in a most disastrous state, principally cansed by the depredations of the English phates on the Mogul trading

ships, Aurengzebe insisting that all the loss sustained by his subjects should be made good by the East-India Company. These phates, in 1698, possessed two frigates of thirty guns, cruizing off Cape Comorin under Capt Kidd, who was afterwards taken and hanged; one of fifty guns, one of forty, and one of thirty guns, off the Malabai coast.

In 1698 Sir Nicholas Waite was appointed resident at Surat, on the part of the new, or English East-India Company, and in 1700, by his intrigues, procured the imprisonment of Sir John Gayer and Mr Colt, the old or London Company's servants. At this time, Bombay was in a very weakly condition, and under constant alaim of invasion from the Mahalattas, Arabs, and Portuguese 1702-3 it was again visited by the plague, which carried off many hundieds of the natives, and reduced the garrison to seventy-six men 1708, the rival Companies having united, Sir Nicholas Waite was dismissed, but Sir John Gayer, the legitimate governor, still continuing in confinement at Surat, Mr. Aislabie. was appointed, and such was the continued feebleness of the settlement, that the Bombay government this year declined receiving an envoy from the King of Persia, for fear he should observe the weakness of the place, both by sea and land. the junction of the lival East-India Companies Mr. Bruce's authentic narrative concludes, and no documents have as yet been discovered to fill up the intervening period until AD 1748, from which date the following governors have occupied the chair, but the necessity of condensation does not peimit the inscition of historical details.

Sir John Valcolm
At present Bombay rules the whole
north-western coavt of India, and its
influence is filt lolong the shores of
Persia and Arahia. The territorial
povessions under its immediate Justidiction received in 1818 on immense
sugmentation by the extinction of
the late Peshwaship and now compreh and the following important ond
populous collectorsics etz

South of Bombay
Darwar Southern Concao
Candeish Poona,

Northern Concan North of Bombay Alumedahad, Surat, and

Karra Broach Besides these the whole of Gujerat is more or less tributary and both Cutch and Cattywar pay for subsidiary forces. The natives of the obove districts are among the most intelligent and industrious of Himdostan and from hence large quantities of cotton and cotton goods have long been exported The British provinces being interspersed by the territories of numerous petty untive states, it is difficult to define with precision the superficial extent onder its direct control but in the present circumstances of Hindoston the distinction is of little importance and the bonds of connexion must leevetably be down closer every year until nt last all discrimination will become onnecessary In 1813 the nanoal revenue of the Bombay presidency amounted to 64,20,569 rupees in 1874 to I 62 06,000 rupees

The Bomboy native army although the fewest in number is the most nacion of the three presidences scoops having been disciplined towards the close of the seventeenth century. One hundred from Bomboy and 460 from Tellucherry joined the

1827 Madras army in 1747 and a company of Bombay schoys were present at The the bat la or route of Plasses lowest height taken is five feet three inches, and the over uge heralit is only fire feet five melies but the men are active, patient, steady and capable of supporting great fatigue on a slen der diet From its origin to the present day, the Bombay army has been composed of all sects and castes Mahomedans Hindoos, Jews Haj noots, Coolies Borahs Miliarattas Ac. Possibly it is owing to this inter mixture that the Bambay sepoys have olyays been prompt to volunteer for any distant expedition while it goes against the grain with the Bengal and Aladray native soldiers But this is not their only merit, for they are patient under privations brave in action and faithful to their employers exhibiting in the last respect in me morrous example to the acroys of the other presidencies

A court of judicature is held of Bombay, which has lately been ussimilated to those of Calcutta ond ond numerous religious, churitable and literary institutions linve ulso been established within the last ten years The distance from Calcutta to Bombay by the post road is 1,308 miles, which has been done by express in thirteen days and n half and it would be easy now to arrange telegraphic stations that would communicate intelligence within n fraction of that time but the increased celerity could only be of importance during the exigencies of some dangerous hostility Travelling distanco from Calcutta 1,308 miles from Dellu 065, from Hyderabad 480 from Madris 770 from Poona ninety-cight from Seringapatam 620 and from Surat 177 miles - (Lord Valentia

Bruce, Lacut Hawkins, Waiden, M. Graham, Fullarton, Public Documents, &c)

Bombra —A pergunnal in the province of Gundwana, seventy miles E by S from Simbhulpoor. In 1818 it was dependent on Nagpoor, and in a state of great desolation, the land assessment, notwithstanding its extent, being only 1,050 Sumbhulpoor impees.

Boyoni.—A small town and ghurry in the province of Allahabad, thirty-three miles SW from Jeitpoor, lat 25° 10′N, lon 79° 4′E

BOWRAUZPOLLAM —A town in the Carnatic, fifty inites from Madras, lat 13° 25' N, lon 79° 30' E.

Bonaa.—A small island in the eastern seas, twenty-five miles in circumference, lying off the noith-west extremity of Ceram, lat. 80 S, lon. 128° 5' E.

BONARATTE—A small island in the eastern seas due south of Saleyer, principally inhilited by Buggesses, who in 1822 possessed fifty trading prows. On this island and Calawa (a small one in the neighbourhood), fifty years ago the Buggess sovereign was said to have had an establishment for the education of dancing girls.

Bonawasi —A town in the Canara province, division of Soonda, forty-seven inites north from Bednore, lat 14° 32′ N., lon 75° 8′ E. This place is noted by Ptolemy, and is said to have had a dynasty of kings who ruled 1,450 years before the Christian era —(F. Buchanan, &c.)

Boss—A wild unknown country thus named, situated east of Assam, and due north of Ava, adjacent to Yiman in China, and between the latitudes of 26° and 27° N, and 96° and 97° E lon—The chaef branch of the Iraw dv as supposed to pass through this district

Bosciner (Vanaghui, a troody province of Hyderabid, occupying

the tract north-east of the capital, and bounded on the south by the Mussy river. It is rather in a better condition with regard to agriculture and population than the residue of the Nizam's territories, and contains a considerable number of small towns and villages. The town of Bongheer stands in lat 17° 28' N, lon. 79° 10' E, twenty-five miles E N.E from Hyderabad.

Bontain —A small district in the island of Celebes, situated at the The bay of southern extremity Bontain (lat 5° 33' S, lon 119° 47' E), is described by Capt. Carteret as large and capacious, and safe anchorage for ships during both mon-On the coast of this bay are several small towns, that named Bontain lies to the north, and had then a small palisadoed fort. Wood, water, and fiesh provisions, fowls, fruit, and rice, may be procured here in abundance; and the woods swarm with wild hogs, the Malioniedans abstaining from such unclean The tides here are very niregular. commonly it is but once high water and once low water in twentyfour hours, the difference seldom exceeding six feet —(Stavorinus, IVulcocke, Sc)

Bons (or Boni) —A principality in the island of Celebes, extending twenty leagues along the western shore of the Gulf of Bony, from the river Churana to the rivei Salinico. This gulf, or arm of the sea, is by the natives called Sewa, by Enropeans Buggess Bay, and deeply indents the island of Celebes to the To the north of Bony, along the bottom of the bay, the country is well inhabited, and ubounds in sago, cassia, and pearls Near the bottom of the gulf, at the river Loo, hont-building is carried on , ilso some traffic in gold, sago, cassia, and pearls. The inhabitants along the coast fish for biche de mer, which they carry to Magassar and sell to the On the east side of the bay the country is not so well inhubited, its navy ation being extremely

hazardous to vessels of burthen on necount of the numberless shouls and small racky reletant contains.

This is the proper country of the Buggesses (named also Buals and Bongmesel, who have always been noted as o very superior race to the generality of the I astern islanders in courage enterprize and intellect. They are the universal carriers of the archipelago and have been long noted for the farness of their deal ings and the magnitude of their speculations more especially the Wadjo or Tuadio tribe and when trade is mentioned it may generally be con sidered as having reference to this race of Buggesser, Let in covigntion onli the srt of ship-building they have remained stationary for o great length of time; the early voyagers describing their prows and equipments Many of exactly of ther exist now these proas ore lost at sea few taken by pirates as they defend them selves to the last extremity They were formerly also noted for filelity as well or cours e and like the Swiss in Lurone were employed os mercenaries in forcin ormles which capacity they served in Siain Cambodia, and threu hout the Islands

The federal government of Bony consists of eight states each governed by its own hereditary despot, the executive power being vest ed in one of their number selected from the rest The office of presi dent has long been elective in the family of the Prince of Bontualish even now little more than a consi derable village The chiefs in the Buggess language are named Arunand the president Arunga but he can do nothing without the consent of the other members of the electoral college and is not entrusted with the care of the public treasury The individuals composing the comp rd of seven hold also executive offices and chonse the prime minister through whose agency justice is administered and decrees issued in the name of the king and people of Bony Any individual of the provi

leged families even a female or in fant may be elected into the coun cil and ultimotely to the amreme government Such is the constitution of Bony which may be considered or the prototype of all the principalities in Celebes of which the Buggess may be reckoned the original language. On the sea-coast It is much mixed with Malay, and Is to he found nure only among tho tribes of the interior and in oncient The nighabet consists of twenty two letters; the form of the character is peculiar but resembles the Butta and Tagala. The koran has been translated into the Buggess language and they also possess tradulonal songs ond romances in that dialect

According to Stavorinus the first monarch of the Buggesses offirmed by them to be of celestral origin in stituted the code of laws which is still observed I'nrly in the seventeenth century they were compelled by the Macassars to adopt the Ma honicdan but we have no account of their prior religion or superati tions Ilaja Polacen o powerful prince who died in A D 1796, lind rendered himself paramount over all the other native tribes and nearly Independent of the Dutch this date o regular succession of princes and queens took pince until 18.3 when Young Polacea died and was succeeded by his sister Arung Datoo In 1814 in consequence of the Insulting conduct of the Buny Il 132 he was attacked by the British nemy under General Aughtingale and defeated with much slaughter his camp and residence being stormed, ond himself ultimately deposed 1820 the capital of Bony was taken by the Dutch apparently without resistance. (Stororinus Forrest Leyden, Crawfurd Raffles, Thorn Se)

Boosooan,—A small island in the castern seas, lying off the south end of the island of Basseelun and having a small hummock in the northern extremity which is woody but inhabated Bool.—One of the souther most of the Philippines, situated about the tenth degree of N. latitude In length it may be estimated at thirty-five miles, by thirty the average breadth.

BOOLACOOMBA —A district subject to the Dutch, situated at the southern extremity of the island of Cele-The land is fertile in rice, abounds in game, and has extensive forests; but the timber is not well adapted for the construction houses During the west monsoon the anchorage before Boolacoomba 1s dangerous for ships, small vessels, however, can run into the river Kalikongaung Near the mouth of this river stands the Dutch pallisadoed fort Carolina, which in 1810 was captured by a party of 100 men landed from the Cornwallis, next day they were unexpectedly attacked by a numerous body of confederated natives, good fighters, both by sea and land, and with difficulty managed to epulse them. (Stavor inus, Thorn. Sc)

BOONDRE (Bundi) —A principality of Rajpootana, situated at the southeastern extremity. The Boondee Ra-- ja is of the Hara tribe, and was formerly a power of consequence, but by the loss of the greater part of his territories, which were formed into the distinct government of Kotah, under one of the Raja's own family, his revenue was greatly reduced and boundanes circumscribed Prior to 1818 this principality was bounded on the south and east by the Chumbul, on the west hy the pergunnah of Jehajghur, on the north by certain parts of Jeypoor and the partially independent state of Ooniara The present Boondee frontier confines, with that of Kotah, about five miles north-west of the Chumbul The whole, in peaceable times, was supposed capable of yielding six lacks of tupees per annum, but in 1817 more than half was usurped by Sındıa and Holcar, so that not more than 60,000 rupees came into the Boondee treasury, besides one lack assigned to the Raja's relations and military re-

tainers, while the peasantry were impoverished by the endless exactions extorted from them by every chieftain who had sufficient power. These sufferings were in a great measure brought on the Raja and his subjects on account of the services rendered by them in 1804 to Colonel Monson and his army during their disastrous ietieat; in return for which, at the pacification in 1805, he was abandoned by the British government to the tender mercies of the Maharattas. Though late, his reward came at last: for by the arrangements of 1818 he was released from all foreign intruders, and received so considerable an addition of territory, including the town of Patun (altogether about 2,500 square miles), as stamped him an efficient member of the general federation of Hindostan, under the protection of the British government. –(Tod, Malcolm, Hunter, &c)

Boonder —A city in Rajpootana, or Ajmeer, the capital of the abovementioned principality; lat 25° 28' N., long 75° 30' E It consists of two parts, Old Boondee and New Boondee New Boondee is enclosed by a high stone wall, extending up the acclivity behind it, and connected with the fortifications on the cliff above, it is built of stone, and most of the houses are two stories high. The natural situation of Boondec, its air of antiquity and numerous temples, its spacious chowk and magnificent fountains, together with the lake at the north-east quarter, combine to render it an interesting city, and for picturesque effect, the great street opening up to the palace is, of its kind, almost without a parallel the lower extremity stands the great temple dedicated to Krishna, covered with groups in relievo, and close by is the figure of a horse cut in stone, and still higher a stone elephant, as laige as life, raised on a pedestal, rows of grote que shops, lining each side of the avenue, extend to the hill, on which the palace, with its turreted windows and battlements, is seen in its full dimensions. It is elevated to

a height of perhaps 402 feet possils appeared in the perpendicular tech but principally is so it parts of a sescore; the appearance of this ed face, when stewed from without the walls is not less strikly.

Oid Boondee is situated to the west of the present town covers a con iderable surface and contains also some fine fountains and parrelas ; but It Is m a state of general decay and almost descried by his promise tion. The pass if tou h the bills to the north of Boomlee la prarly seven mdes in length and at the mo t con tracted point is defended by there di tinci barrier gatewayet between these atraights the I life espand inte successive any bullenies of terrark ab'e beauty in the la las of which a series of artificial lakes have been formed communicating with each other on I apported I's a great dam raised in the garge of the pa immedutely above Boondee in one of these amy bithestres the Hais fas a summer-hoose and garden with some Hiodog tourder at a other buildings Acar the secon I gatewor le the an esent cemetery of the famile contain ing several handsome chiterres highly finished with figures of elephants in combat caparisoned horses &c in very bold relief; and adjoining the gate on the Boondee side is a pa-lace called the Book Mahai built on a terrace that atretches from bill to hill and forming the embankment of the great lake which during the rainy season pours a cataract lato the deep pool below, (Fullaries &c)

Bosona —A town the head of a pergunnah in the province of Val wa belonging to the principality of Banasara and stutisted on the left bank of the Mhye ricer name miles A b. by N from that town 1st 23° SN lon. 74 40° b. It stands on the high road to Pertaubghur —(Mal cols, fc)

BOORANAZZ PEAK.—A mountain peak in Northern Ilindoostan, thirty miles N E. from Serinagues lat 30° 24 N., lon 79° 15′ E; 8 611 feet obove the level of the sea

Bosnava.—A town in it e Delti persister forty few rice \ from the enty of Deltig lat. 20 Hr \, Lon 77"

Breamsprois (Bertargura) The second capital of the Candes h pensince situated on a fre plan on il e porth west lank of the Turters lat glal r . lon 70" 14 1. About fifteen rules to the " In Is a fance of I Ile shat orporate Caulci h from lic-The i one of the largest ar ! sent built entire in the Recent most of the houses but built of leach. and mone three at ence high with nest facales, framed in wood as at Onjern and prospendly spored with tiles. The Landson'e t portion of Boothanpour are the market-three, a source of consileral te extent and a street called the 11st Berare 1 st there are many other wile and re-it far atreets, pared wall atone Top tee here is a clear and beentiful tiream. but of no great brea lib, and ea lie fundal le in the dry season On a hi h lank close to the tiver are the sums of the fort an I place of Its ancient suvereigns, now only re markable for the great space they cover the shapeless o asses of benken masonry and the court-pards choked up with weeds an I rank segetation The vicinity of Hoothanpour for some distance le blewise strewed with the rides of Valomedan tombs mosques and chapeles yet the city taken sa o whole la remarkably devoid of architectural interest. most the only public edifice worthy of observation is the Jumma Mus jeed a fine pile of masonry con structed of grey stone in a style pe culiar to this quarter of ludin with an extended façade supported on low archest two handsome octago noi minars with o grand terraco and reservoic in front but destitute of cupoles which form the thetinetho feature of the marque in almost eyers other part of Hindortan

Boorlingpoin is abundantly supplied with water brought from four miles distance by aqueducts, and distributed through every street, the strenn being conveyed at a certiin depth below the pavement, and the water drawn up through apeitures by means of lenther buckets attached to a windless. This is the headquarters of a singular sect of Mahomedans numed Bohrah, whose mouliah or cluef priest resides at Su-They distinguish their own sect by the name of Ismacehala, deriving their origin from one of the followers of Mahomed who flourished in the age succeeding that of the prophet, from whose native country, they assert, they originally came, via Gujerat. The Bolirihs are the great nierchants in this quarter of Hudostan, as the Parsees are at Bomlias, and here occupy about 500 of the best houses, heing the most wealthy of the commercial class They are of a goodly exterior, with Arab physiognomies, and wear a sort of Arahian costume About two miles from the city they have a small mosque, with extensive cemetries adjoining, crowded with tombs

This city, along with the rest of the province, was acquired by the Maharattas about A D 1760, during the viceroyalty of Islam Klinn, since which period it has been progressively decaying, and in 1816 every village in its neighbourhood was in ruins, owing to the unceasing incuisions of Bheels and Pindarries It was captured by a British army in 1803, but restored to Dowlet Row Sindia, with whom it still remains. The grapes grown in the vicinity of Boorhanpour and Asscerghur (where they are in great profusion) surpass those of Malwa, and are probably the most delicious in India. Travelling distance from Oojem 154 miles; from Nagpoor 256; from Poona 288; from Bombay 240, from Agra 508, and from Calcutta by Nagpoor 978 miles - (Fullarton, Hunter, Sutherland, &c)

Boono -An island in the eastern

sens, situated between the third and faurth degrees of south latitude, and the 126th und 127th of east longi-In length it may be estimated nt seventy-five unles, by thirty-eight miles the average breadth. principal Datch settlement on this island is Fort Desence, situated in a mairly plan on the SE of Cajelli or Booro Bay, where ships are under slichter during both monsoons, while the land winds which presal at night fucilitate their departure, on which account it is much frequented by South Sea whalers Wood, water, linffilloes, rice, ii profusion of tropical fruits, sago, and the liest eageputty oil (the trees aliounding), may be procured here, as also various sorts of calmet, dye, and aromatic woods, which the Chinese junks come in search of A portion of the inhalutunts are Maliomedans, and possess a mosque; but the interior is peopled by the aboriginal Horaforas, who have dispersed among the mountainous jungles, subsisting on sago, wild truits, and the produce of the chace. The south of Booro was formerly much infested by the mon-headed Papuas of New Gumen -(Forrest, La Billardiere, Bougamville, Stavorinus, Thorn, &c)

Boos AH —A town in the province of Bengal, district of Jessoic, fifty miles W by S from Dacea, lat 23° 31' N., lon. 89° 39' E

## BOOTAN.

This country on the west is sepainted from the Raja of Sikkim's territories by the course of the eastern branch of the Teesta, from whence it stretches easterly to an undefined To the north it is divided from Tibet by the Himalaya mountans, and to the south it is bounded by Bengal, and a number of jude tubes scattered along the northern . side of the Biahmaputra In its greatest dimensions it may be estimated at 250 miles in length, by nincty the average breadth term Bhote is applied by the Hindoos

not only to the country named Boo tan by I propeans but nl-o to the tract extending along and lumedistely adjoining both siles of the Himalaya in which sen e it is wery exten ire region occupying the while mountainnus si are from Cashmere to Chion. In the present article however the word Bootan Is restrict ed to the country of the Itel Italy comprehended withothe limits above specified and the name of Booten ners confined to ble subject. In or der to distingui le them from the more expanded tribe of libootens (Hholyas), olthough in a peet man ners and religion, there is so entire o resemblance as to leve little doubt of their descent from the same on

The northern portion of this province presents nothing to the view but the mn t mis hapen bregularities; some mountains covered with per petual snow others with perennial verdere and rich with abundant forests of large un I long trees Al mo t every mountain has a rapid tor rent at its lese and many of the most elerated have populous villages nmidst orchards and other planta tions. In its external appearance it is the reverse of Tibet which is a level table-land. The mountainnus boundary of Bootan towards Titet forms part of the great chain which geographers term Mount Imau or Limodus and of which frequent men tion is made in the mythological tales of the Brahmins by the name of Ilsmalaya At the base of the hills to wards the Bennal frontier is a plain of about twenty-five miles in breadth choked up with the most luxurant vegetation and which from its la optitude to supply the wants or fa cilitate the functions of human life was for a long time properly conshiltred as belon,ing to neither Tho exhalations orising from the multitude of springs which the vlesnity of the mountains give rise to ore col lected and confined by the woods and generate o most pestilential ot mosphere The trees are large and the forests abound with elephants

and shinocero eve but the buman named is much del a ed in form size and strength The character of Bootsa exhibits

every device of variation for at the time the inhabitants of I consider nec cantlous of expo ing themselves to an nimost vertical sun, those of Ghas sa feel all the rigours of winter and are rhilled by never-melting snows; set these places are within slaht of each other Where the climate Is temperate almost every faroural le aspect of the mountains coate ! with the smallest quantity of soil is clear ed, on I a lapted for cultivation by being cut Into Incisontal beds country obout le with excellent lime stone but the natives oppear tinacquainted with its uses for a ricultural purposes The season of the rains about Tossendon the countal is remarkably moderates there are frequent showers but none of those heavy torrents which accompany tho SW monsoon in Beneal, in the billy tracts of Bonton strawberries ra pherries, and blackberries are found growing will and there are nisonpile peach pear and mineral trees. The forests abound with a variety of handrome thiber trees such as the a h tirch, numble yew pine and fir but an ank trees. The fir is often seen er ht and ten feet in girth The turnlys of Booton are remarkably good being large free from fibres and very sweet. The heat fruits ore oranges penches opri cots pomegranates and sulmita 1 or the purposes of nariculture the Bootanners communet water ocross the chasms in the mountains through the holinw trunks of trees In this country o large proportion of the field labour is performed by females who plant and weed and on them eventually the task falls of applying the sickle and brandishing the that In all these labortous offices they are exposed to the Inclemencies of the weather and to many other gries our

Wild onimals ore not numerous in Bootan but monkeys of a larga and handsome kind abound being held

hardships

sacred by the Bhootens as well as hy the Hudgos. The species of horse indigenous to Booton is called Tanynn, or Tangun, from Tangust'han, the general appellation of the assemhinge of mountains that constitutes Bootan Proper, the breed being 4together confined within its limits They are usually tharteen hands high, and remarkable for their symmetry and just proportions. They are in general distinguished by a tendency to pichald, those of one colour bring They are short-hodied, clean Innhed, and although deep in the chest, extremely active. Accustomed among their untive mountains to struggle against opposition, they seem to inherit this spirit as a principle of their nature, and hence have acquired naming Europeans a character of heing headstrong and ungovernable, though in reality it proceeds from an excess of eagurness to

perform their task.

A carayan despatched by the Deb Ray visits annually the Runghoor district, bringing the coarse woollen munufactures of Bootan, Tibet cowtails, becs'-wax, walnuts, wory, musk, gold-dust, silver in ingots, some Clunese silks, tea, paper, and knives, besides the Tanyan horses that earry These adventures are the goods. entirely on account of the Deb Raja, to whom the goods belong, having been mostly received in kind in payment of the revenues; but the sum total in a national point of view is quite insignificant. The returns usually consist of English woollens, indigo, dired fish, quicksilver, cloves, nutmegs, meense, sandal-wood, sheet and wrought copper, tin, ginnowdei, otter-skins, rhinoceros' horns and hides, cotton cloth, coral, and swine. The aggregate amount of the whole seldom exceeds 30,000 rupees, of which indigo alone engrosses half The privilege of thus the value sending a caravan into Bootan Proper has never been conceded even to the Bengalese, by this jealous and timid government, but the latter are allowed an unrestricted trade in the low country, through which they drive

up many swine to the mountains. Small as this trade formerly was, it 14 and to have lutterly declined, ulthough the licasy duties formerly leand on the Bootan imports were abolished by Lord Cornwallis Itseems probable, however, that this magmilicant traffic, so eagerly sought after lis the British authorities, both at home and abroad, has not so much actually declined as taken a different threction. The presents sent by the Deb Ruja to Calentia in 1772, when ufraid of lus cars, consisted of slicets ot gilt copper, stimped with the black engle of the Russian armoral, tulents of gold and silver, and bulses of gold-dust; hags of genume musk, narrow woollen cloths, the mannfacture of Tibet; and silks from The narramee, n hase silver Cluna com struck in Cooch Bahar, about tenpence in value, is current throughout Bootan, where there are local prejudices against a mint.

The military weapons of the Bootauners are a bow and arrow, a short straight sword, and a faulchion reflected like a pruning knife. In war they use arrows tainted with a poison proeured from a plant as yet unknown to Europeans In appearance it is an inspissated vegetable juice, much resembling crude opium Their matchlocks are very contemptible, and of no use but in such weather as will admit of the primings taking fire in an open pan. They are desterous in the management of the sword and shield, and excel in archery; they have wall pieces, but no cannon strong jenlousy of all intercourse with Hindostan has long prevailed throughout this region, which has not been diminished by the recent progress of the Butish arms, among mountains viluely had never been conquered, or even scriously invaded by any of the Maliomedan powers.

In person there is a remarkable dissimilarity between the feeble-bodied, meck-spirited natives of Bengal, and their active and Herculcan neighbours the mountaineers of Bootan, many of whom are six feet in height A strong similarity of feature per-

They are also frequently engrated on rocks in large and deep characters, and sometimes rendered legible on the sides of hills by means of stones fixed in the carth of so large a size as to be legible at a considerable distance. In the per formance of any religious daty, the Bootun functionaries admit of no interription whotever which steletores has always proved a source of infinite delay and inconcenience to the Itritish diplomatists who have had but sinces to transact with them.

The Delt Italy, who resides at Tasaru ion is usually considered in he the supreme head of the province but in strets sense he is only the accular governor the legitimate tovereign being the Diarum Iinja, a

supposed incarnation of the deity; but as this sacred person never interferes in lay affairs, he is only known to foreigners through the trausactions of his deputy the Deb Raja. are said to be eighteen passes from the low countries to the mountains; some of the most important are placed under the control of officers named subalis, the extent of whose power is uncertain. In the hot and rainy season the subah usually resides at a fortress among the mountains, but in the cold season he descends to the lower hills, and often visits the plains, either to enforce obedience or to invade the neighbouring states, on which occasions their attacks exhibit a combination of cowardice, perfidy, and the most fiend-like cruelty. Both the lower hilly country and the plain belonging to Bootan are partitioned into small domains, each having a distinct officer for the collection of the revenue, and the superintendence of the police. Some of these are chiefs of the subdued communities, for no genuine Bhootea has settled in these parts; others are native Bootanners of the mountains The hereditary chiefs pay a fixed revenue, while the Bootan officers collect the land tax on account of government.

The Deb Raja's authority is best established in the plain, and in the country adjacent to the line of road leading from Bengal to Tassisudon the capital; for with the country to the east and west we are but little acquainted. The principal towns are Tassisudon, Poonakha, Wandipoor, Ghassa, and Murichom. The nearest governor to the Sikkim frontier is the subah of Dellamcotta, next to lum the subah of Luckidwar, then the subah of Buxedwar; and east from the Gudhadar river is the subah of Burradwar. The next governor towards the cast is the subah of Repudwar, who has under him a jungly district named Raymana, bounded on the east by the Sonkosh, and still further east is the subah of Cherang, a place at the head of a pass, four dnys' journey from Cutchnbarry The country between the Sonkosh and the

Ayi belongs to a tributary, and beyond the river last mentioned the Bijnee territories commence. In A.D. 1820 the Deb Raja claimed a principal portion of the lands of Maraghaut, occupied by the Raja of Cooch Bahar, which, after investigation, were declared by the British government to belong to Bootan.

In ancient Brahminical legends the denomination of the country we call Bootan is Madra, but respecting its early history we have no record or The first intercourse of tradition. its government with the British nation happened in 1772, in which year the Deb Raja suddenly invaded the principality of Cooch Bahar, and meeting with little opposition from the natives, rapidly gained possession of the country. This was decidedly the first instance of hostility between the two states, and it had proceeded to the last extremity before the government of Bengal, which had hitherto derived no benefit from the contested territory, was apprized of what had befallen it. The invaders were casily driven back by two battalions of native infantry, and next year pursued by a detachment under Capt. John Jones into their own territorics, where the fortress of Dellamcotta was taken by storm. This exploit greatly alarmed the Bootan Raja for his own safety, and induced him to apply to the Teshoo Lama, through whose mediation a peace was subsequently arranged. the defeat and flight of the Bootanners in 1772, Durp Deo, the clucf of Bykantpoor, who had joined them, sent a messenger from the jungles, to which he had fled, begging to be restored to his estate, in consideration of which he engaged to pay a tribute of 25,000 rupces per annum in place of 10,000 rupces, which had hitherto been his stipulated payment. terms were accordingly acceded to, and the zemindar was put in possession, not only of his former estate. but also of what had been alienated by the Bootanners

The present possessions of Bootan to the south-west are separated from

the Bengal districts by the river Teesta, as far south as Gopulgunge a village setuated on the eartern bank of that river To the south of this point the British territories cross the Teesta, and intermix with these of Bootao in a most irregular manner, the boundary line in this quarter being altogether imaginary Portions of terntory belonging to each state are completely in ulated by the possessions of the other, ar exemt lifted in the extensive tract named Phula cotta, which her to the west of the Teesta, and is completely surrounded by the Bengalese semin lary of By kantpoor without any intelligible or even perceptible land-marky retention of Phulscotts, however, is attended with such lucrative advantages to the sulah of Dellamcotta and the local officers, that no hopes are entertained of being able to effect its purchase of exchange for some other space of a dequate value

The I uropean reader will acarrely believe that along the whole line of British frontier from the Sutuleje to the Brahmsputra, there exi to, and always has exleted, a regular and persevering system of cocronchment on the British possessions which al though frequently detected and baf fled, has in many Instances proved successful. In shese attempts no nation has proceeded more prosperously than the Bootanners, whose encroschments have not been con fined to that part of the boundary west of Cooch Bahar although it began there The line of frontive east of the Sonkosh to the confines of Assum has been still more aubjected to their intruvious, as in this quarter they have managed to appropriate to themselves the large catale of Bulsagoog Immediately adjacent to Bijnee where their interference as will be seen under that head was still more irregular The Bidyagong estate was obliged originally to deliver annually forty elephants to the British government which last as the feudal auperior had the sole right of nomi nating to the auccession It is true that the Bulyagong chief gave the

Regianoers yearly about 400 rupees worth of cotton clothe and dried fish; but this was done merely to conciliate the good-will of a tribe which from Ity position we always able to harast his estate The Bootan government never darrel to dispute thosovereignty of the estate with the Mogula from whom the delivery of the goods abovementioned was kept a prof sund secret The Deb Itaja, while the attention of the British presidency was directed elsewhere got possession of the Bul sagong semindary and some years after, when the circumstances of the care were reported it war determined to forego all claim to on object that appeared of such trivial Importance During the correspondence that took place before that resolution was defi nitively adopted the Deb Ilaja on being required to produce his docu ments replied that It was not caretomary for the Bootanners in be regulated by writings, but by possess slon

In 1815 Ki hen khant Bos a na tivo acent was deputed to lasea by the Hengal government to negociato some boundary arrangements with the Deb Raja but could not get any fur ther than Bootan where he remained above a year On his return he gave in a report of his journey and description of the country he had visited, which document, however threw lit tlo or no laht on the hi tory of this singular country although it is most perticular in recording the monthly wages paid to the government servants. In 1816 the oilvance of tho Chinese forces towards Nepaul ex cited a considerable sensation at the court of the Deb Hals where it was ascribed to the intrigues and misrepresentations of the Gorkhar and the Deb expressed his hopes of assistance in case he incurred the dupleasure of the Chinese govern ment by refusing to act against the These amierble professions British however were probably elicited by tho existing stote of affairs in Bootan where in consequence of some dif ference between the Dhorma, or at i ritual and the Deh or seculor lloja, supposed incarnation of the deity; but as this sacred person never interferes in lay affairs, he is only known to foreigners through the transactions of his deputy the Deb Raja There are said to be eighteen passes from the low countries to the mountains; some of the most important are placed under the control of officers named subahs, the extent of whose power is uncertain. In the hot and rainy season the subah usually resides at a fortress among the mountains; but in the cold season he descends to the lower hills, and often visits the plains, either to enforce obedience or to invade the neighbouring states, on which occasions their attacks exhibit a combination of cowardice, perfidy, and the most fiend-like cruelty. Both the lower hilly country and the plain belonging to Bootan are partitioned into small domains, each having a distinct officer for the collection of the revenue, and the superintendence Some of these are of the police. chiefs of the subdued communities, for no genuine Bhootea has settled in these parts; others are native Bootanners of the mountains The hereditary chiefs pay a fixed revenue, while the Bootan officers collect the land tax on account of government.

The Deb Raja's authority is best established in the plain, and in the country adjacent to the line of road leading from Bengal to Tassisudon the capital; for with the country to the east and west we are but little acquainted The principal towns are Tassisudon, Poonakha, Wandipoor, Ghassa, and Murichom. The nearest governor to the Sikkiin frontier is the subah of Dellamcottn, next to him the subah of Luckidwar; then the subali of Buxedwar; and east from the Gudhadar river is the subah of Burradwar. The next governor towards the east is the subah of Repudwar, who has under him a jungly district named Raymana, bounded on the east by the Sonkosh, and still further cast is the subali of Cherang, a place at the head of a pass, four days' journey from Cutchubarry The country between the Sonkosh and the

Ayi belongs to a tributary, and beyond the river last mentioned the Bijnee territories commence. In A.D. 1820 the Deb Raja claimed a principal portion of the lands of Maraghaut, occupied by the Raja of Cooch Bahar, which, after investigation, were declared by the British government to belong to Bootan.

In ancient Brahminical legends the denomination of the country we call Bootan is Madra, but respecting its early history we have no record or The first intercourse of tradition. its government with the British nation happened in 1772, in which year the Deb Raja suddenly invaded the principality of Cooch Bahar, meeting with little opposition from the natives, rapidly gained possession This was decidedly of the country. the first instance of hostility between the two states, and it had proceeded to the last extremity before the government of Bengal, which had hitherto derived no benefit from the contested territory, was applized of The invaders what had befallen it were easily driven back by two battalions of native infantry, and next year pursued by a detachment under Capt. John Jones into their own territories, where the fortress of Dellamcotta was taken by storm exploit greatly alarmed the Bootan Raja for his own safety, and induced him to apply to the Teshoo Lama, through whose mediation a peace was subsequently arranged. After the defeat and flight of the Bootanners in 1772, Durp Deo, the chief of Bykantpoor, who had joined them, sent a messenger from the jungles, to which he had fled, begging to be restored to his estate, in consideration of which he engaged to pay a tribute of 25,000 rupees per annum in place of 10,000 rupees, which had littler to been his stipulated payment. These terms were accordingly acceded to, and the zemindar was put in possession, not only of his former estate, but also of what had been alienated by the Bootanners.

The present possessions of Bootan to the south-west are separated from

the Bengal districts by the river Teesta, as far south as Gopaulgunge a sillage situated on the exitern lank of that river To the south of this point the British territories cross the Teesta, and lotermis with those of Bootso in a most irregular manner, the boundary line in this quarter being altogether imaginary l'ortions. of territory belonging to each state are completely insulated i y the possessions of the other, as exemplified io the extensive tract named Phulacotta, which her to the west of the Teenta, and is completely surrounded by the Bengulese semindary of By knotpoor without any intelligible or even perceptible land-marks retention of Phulacotta, however, is attended with such incrative adean tages to the subsh of Dellamcotta and the local officers, that no hopes are entertained of being able to effect its purchase or exchange fue some other space of adequato value

The European reader will scarcely believe, that along the whole line of British frontier, from the Sutuleje to the Brahmsputra, there esi to and always has existed, a regular and persevering system of encroschment on the British possessions which af though frequently detected and baf fled, has in many instances proved successfui in these attempts, no nation has proceeded more prospecously than the Bootsners whose encroachments hase not been con fined to that part of the boundary west of Cooch Bahar although it began there. The ime of frontler east of the Soukosh to the conlines of Assam has been still more subjected to their lotrusions as in this quarter they have managed to approprinte to themselves the large estate of Bidyagoog Immediately adjacent to Bijnee where their interference as will be seen under that hend was still more irregular The Bulyagong estats was obliged originally to deliver annually forty elephants to the British government, which last as the feudal superior, had the sole right of nom: nating to the succession It is true that the Budyagong chief gave the

Bontanners yearly about 400 supers worth of cotton cloths and diled lish; but this was done merely to conclusto the good-will of a tribe which from its position was always able to harass The Bootan government his citate never desed to dispute the sovereignty of the estate with the Mogula from whom the delivery of the goods abovementioned was kept a profound secret The Deb itsia, while the attention of the British presidency was directed clienhere got possession of the Bul racong rentindary and some years after, when the circumstances of the case were reported it was determined to forego all claim to an object that appeared of such trisial importance During the correspondence that took place before that resolution was definhisely adopted the Deb Ilaja on being required to produce his does ments replied that it was not cur tomary for the Bootanners to be regulated by writings, but by possessioo

Io 1810 Richen khant Bos a na tive agent was deputed to i.acen by the Bengui government to negociato some boundary arrangements with thu Deb Raje but coold not get any fur ther than Bootan where he remained above a year Oo his return he gave in a report of his journey and description of the country he had violted, which document however threw lit tle or no light on the lilstory of this singular country, although it is most particular in recording the monthly wages paid to the government ser TRITE In 1816 the advance of the Chinese forces towards Nepaul ex cited a considerable sensation at the court of the Deb ilais where it was ascribed to the intrigues and misrepresentations of the Gorkhas, and the Deb expressed his hopes of assistance, in case he incurred the displeneure of the Chinese govern ment by refusing to art against the British These amienble professions however were probably chested by the existing state of affairs in Bootan where in consequence of some dif ference between the Dharmn or spi ritual and the Deb or secular Iloia T 2

the deposition of the latter was contemplated, and a civil war expected. To prevent this extremity the Deb Raia declared he would resign the reins of government, after the approaching month of June, to Lama Sree Tap, who before had disputed with him the succession to the office of Deb Raja, and had been deposed after having actually assumed that dignity, but the sincerity of these protestations was much questioned, and it was not generally supposed that he would actually perform what he had professed in the moment of danger. In the event of a contest, one party will endeavour to conciliate the favour of the British, the other that of the Chinese, whose direct authority will probably be ultimately established throughout Bootan, as it has been in Tibet.—(Capt Turner, F. Buchanan, Sisson, Public MS. Documents, D. Scott, Kishen Khant Bos, &c.)

BOOTON.—An island in the eastern seas, lying off the south-eastern extremity of Celebes, about the fifth degree of south latitude. In length it may be estimated at eighty-five miles, by twenty the average breadth. It is separated from the island of Pangansane by a strait which is passable for square-rigged vessels.

This island is high and woody, but well cultivated, producing rice, maize, yams, a variety of tropical fruits, and abundance of the wild bread-fruit tree, the kernel of which is indigestible Fowls, goats, buffaloes, and fish may also be procured. The inhabitants are ugly and of short stature, their religion the Maliomedan, and language (on the sea-coast) the Malay. The Dutch had formerly a settlement in the bay of Booton, where they sent annually an officer, named the extirpator, to inspect the woods and destroy the clove trees. On the east-side Booton is indented by a bay called Dwaal, or Mistake Bay, by the Dutch, into which, if a ship be drifted by the currents, she cannot get out again until the west monsoon sets in, and even then it is difficult.

A Dutch governor going to Banda, was detained in this vexatious state for a whole year.—(Stavornus, Labillardière, Forrest, Bougainville, &c)

(Bhupala, a lord or king /—The capital of a small independent Mahomedan principality in the province of Malwa, which forms the exact boundary of the old Hindoo province of Malwa, one gate being within its boundaries, and the other in Gundwana; lat 23° 17' N, lon. 77º 30' E, 100 miles E from Oojein. It has the possessions of Sindia and of Kotah to the north, the territories of Sindia to the east; the Nerbudda to the south, and the districts of Sindia and Holcar to the west. surrounding country is an uneven jungly tract, but the soil is generally fertile, especially in the vallies, and it is well watered by numerous streams of which the Betwa is the most considerable. In 1820 the whole principality contained 1,571 jaghire and khyrat (charity), and 2,559 khalsa or crown villages, of which last 714 were uninhabited. In 1819 the gross revenue of Bopaul amounted to nine lacks of rupees, but it was expected to reach twenty lacks in 1824.

The town of Bopaul is surrounded by a stone wall, but presents a ruinous appearance, notwithstanding it is the residence of the Nabob Foundar On the outside is a suburb equally decayed, and on the southwest a gliurry or native fortification, built on the solid rock, with a stone wall and square towers, but all much dilapidated. Under the south-west angle of this fort is a large tank, formed by an embankment at the confluence of several streams, one mile and a half in breadth, and extending to the west four miles and a half, whence issues the river Bess. the east of the city there is a smaller tank having two dams across, extending in length about two miles from north to south, the source of the small river Patra.

The town and territory of Bopaul are occupied by a colony of Patans,

## BORNEO.

(Varuni.)

The largest of the Asiatic isles, extending from the seventh parallel of north, to the fourth parallel of south latitude, and from the 109th to the 118th of east longitude. The kingdom of Borneo, or Burni, by Europeans termed Borneo proper, having been the first state visited by them, may have given rise to the erroneous application of the name to the whole island, which by the native inhabitants, and throughout the eastern archipelago, is universally termed Pulo Klemantan. It is of a solid, compact, egg-like figure, and not so deeply indented by arms of the sca as the Eastern islands generally are, yet it possesses many spacious bays and harbours, and is surrounded by muddy shores, and numberless isles and rocky islets, many of the latter not larger than a common European house. In length it may be estimated 750 miles, by 350 the average breadth, giving a superficial area of 262,500 square miles

The interior of this island being still wholly unexplored, we are compelled to trust to the maccurate communications of the ignorant natives to Europeans formerly settled at the different factories, or occasionally visiting the sea-coast on trading voy-This species of information is ages obviously not entitled to much attention, from a concurrence of testimony, however, we may infer, than in general, for above thirty miles inland, it continues marshy and alluvial, interspersed with small hills, almost covered with jungle, but to a certain degree cultivated. Further inland it becomes mountainous, and is covered with forests, swarming with wild animals, and producing that species of large apc, named by Malays orang outang, or man of the woods These mountains are said to stretch in ranges running north and south, between which rivers flow, and extensive lakes stagnate. If we may credit Malay accounts, this central tract is also partially inhabited, as they assert that many of the articles, both of traffic and subsistence, sold on the sea-coast to Europeans, are brought from a distance of twenty days up the country.

The rivers of Borneo best known to Europeans are those of Banjarmassin, Passir, and Borneo proper, which were ascertained to be navigable for boats above fifty miles from their junction with the sca; but they have never been ascended higher by Europeans, and rarely even by the resident Malays. In a country drenched by the solstitual rains there are probably many other streams and rivers, but of a short course, and seldom navigable, which is an additional obstacle to the exploring of the interior, to those interposed by the Mahomedan natives of the coast, who endeavour to monopolize the traffie by preventing all communication between the inland natives and the Chinese or Europeans.

The climate of the northern portion of Borneo much resembles that of Ceylon, being from the abundance of verdure always cool, and not subject to the hot land winds that prevail on the coast of Coromandel. is watered also by numerous fine streams, several of which fall into the bay of Malloodoo without bars. this quarter are the high mountain and large lake of Keeneebaloo, near to which live the wild Idaan, named also Maroots, Horaforas or Alforeze, and Dayaks. According to native accounts the lake of Keeneebaloo is 100 miles in circumference, and its waters (which are represented to be of a whitish colour) from five to six fathoms deep On the main-land of the north coast, opposite to Balambangan and Banguey, are forests of tall timber without underwood, and free-stone is also found in abundance. Here are large flocks of cattle named lisang, and flocks of deer and wild hogs feed in the plans without fear of the tiger. The country produces, when properly cultivated, all sorts of tropical fruits, grains, and vegetables, but the climate has hitherto proved very destructive to European consti-

tutions.

The courts of this island are notsecond by a number of petty Mai omedan states some of which are sali to be of lone duration. The re ident population of these is a mixture el Malays, Japanese, Burrese , and Macauser, a few Arabian ani some converted alterranals They have in all pare been a appacious treatherous race much a idicted to piracy, with whom lutopeans have never yet been able to retal's h a accure intercoutse. A considerable number of Chinese are siwass found among them; and it is a remarkatic fact that their nuarmed and unprotected junks trade without difficulty, along a coast so fatal to lastopeans, yet their cargoes are valuable, and their vessels defenceless. The in terior is chiefly occupied by the agricultural tribes named Dayaks, acry few of whom have no set embraced the Mahomedan religion a that of the Dayake is but intic understood al though some of their usages have at tracted attention from their sings larity In many places the possess sions of these Dayaks extend quite to the sea-shore, more expressly on the eastern coast within the straits of Marantar There are also comi detable colonles of Chinese settled along the principal rivers in the interior where in some Instances they appear to have established a sort The isfly central of independence mountaion of Borneo are represented as occupied by tribes of Ponamy who like the Bedshs of Ceylon, are said to exist in the very rudest stage of savage life. At present the muritime states are cluefly the following erz. I Borneo Proper, 2 Coti J. Pas air 4 Banjarmassin, 5 Matten G Pontiana, 7 Sambas. The chiefs or rajus of these paratical states posters each one or more strong-holds, from which, with the assistance of a pesti lential climate they have frequently repulsed European troops with severe Oo the north coast of Borneo

Oo the north coast of Borneo about Malloodoo Bay, is a conmder able territory, the sovereignty of which has been iong claimed by the

Soologs, just which along with the Blacent I lamle of Balambon-on, &c. was regularly erded to the Briti h, and at different person's assumed without any organition from the Sul tan of Borney Proper Although powering a fertile and and lengated la sarious small rivers gunsin from the luterior, it still remains nearly in a sts c of nature and almost oninhabited; yet it is said to communieate by land carriage of about fifty miles with the great lakes of the interior in the tiemity of the gold-gro-ducing formations bhould any settlement be increaster made on this coast. which appears to be British property it enght to be fixed on a territorial and not on a commercial basis, for all the latter have failed There has been a colony of Cambodiana one thousand in number established in Borneo for above fifty years.

Some notices have been received of ruins of temples and dilapidated cities lo llorneo, and of the existence of inacreptione in characters unintelligible to the Chinese Vislays and Daraka : but the information is quite inconcin elee. and it still remains uncertain whether this island had ever attained a higher degree of civilization than it at present exhibits. That Hornro wavyi sated many centuries ago by the Chinere and Japanese is well establish cily but wisether it was ever (until recently) permanently colonized by elther of these nations is not sailsfactorily ascertained. Porcelain jars, plates, wases and earthen titenuls the manufacture of China and Japan are frequently discovered in different parts of the country; and such is the reneration to which these articles are held that a single antique jar has been known to be purchased by the Dayaks of the interior for u sum little short of £200 sterling; these are prized my the supposed depositories of the athes of their ancestors by the unecoverted Doyaks, and oppear to be their sole objects of seneration, for at present they know not the use of priests Images, temples or even of brick, mortar and stones

In the province of I necedow, up

the great river Lawai, and nearly in the centre of Borneo, according to Malay information, there are twentyfour tribes of different appellations, whose bodies are not tattooed, and six that have this distinguishing mark; a tribe like the Papua negioes; and another as fair as the Chinese, and, like them, wearing trowsers. natives call their island Klemantan. or Quallamontan; and the names of many of the rivers, mountains, and districts, greatly resemble those of the Ultia Gangetic provinces When the Portuguese first visited this island, in A D. 1530, they found the Mahomedan religion regularly established on the sea-coast.

Borneo has long been known to abound in gold, principally in alluvial deposits, from whence it is procured by the natives and Chinese, but most effectually by the latter, who carry on their operations principally in a territory situated between Sanibass and Pontiana, named Montradak, from the chief mining village, situated inland two days' journey by water The whole tract here specified is alluvial, being intersected by numerous rivers flowing from the interior, of considerable size. The Chinese population in this division have been estimated at 36,000, including 4,000 women of a mixed breed; of this number 6,000 work the mines, while the rest are occupied in trade and agriculture. They are almost independent of the native chiefs, paying a tax to the Sambass Raja, in whose territories the mines are, of about 4,000 Spanish dollars per annum. The mines usually consist of longitudinal excavations, following the course of the mineral strata, and of very superficial depth, seldom exceeding sixteen fect; the auriferous earth is washed every thirty-five days, in which space of time a mine wrought by 200 labourers will yield from 250 to 500 ounces of the precious metal The annual produce of the great mines of Montredak have been estimated at 88,362 ounces of gold, and the total number of Chinese in or near the gold districts at 200,000

persons. Antimony is found accumulated in large masses or mountains at Sadang and Sarawa, from whence it is exported to Singapoor in large quantities; indeed the supply appears mexhaustible.

Borneo is the only island of the Eastern archipelago in which the diamond is found, and principally limited to the territories of the Banjarmassin and Pontiana chiefs. The most productive mines are at a place named Landak, from which the diamonds of Borneo are designated to distinguish them from those of Hindostan: and it is remarkable that the same alluvial tract is also the richest in gold. These mines appear to have been long wrought by the Dayaks, or abouginal savages, but probably with little skill or industry; and even now diamonds are little prized by the Chinese, the resident Buggess merchants being the great traffickers in these gems. In 1815 the petty chief of Mattan possessed one of the largest diamonds in the world, obtained about a century ago in the mines of Landak; in the rough state it weighed 367 carats, equal to 1831 when cut and polished, only eleven carats and a half less than the Emperor of Russia's diamond, and forty-six carats and three quarters heavier than the Pitt diamond; its real value is £269,378, which is £34,822 less than the Russian, but £119,773 more than the Pitt diamond. It is reported since the above date to have fallen into the hands of the ambitious chief of Pontiana.

The inhabitants of the interior, or aborigines, have received various appellations, in the south and west Dayaks, in the north Idaan, and in the east Tiroon, but they appear in every respect to resemble the Horaforas, or Alforcse, of the Dutch and The latter are indi-Portuguesc. genous in nearly all the eastern isles, and are sometimes found in the same island with the Papuas, or oriental negroes, but the latter have never yct been discovered by Europeans in Bornco. The Dayaks arc often lighter in colour than the Mahomedans of

the sea-coast, ond centrality excel them in strength and activity; they are divided into a great twiety of tribes lodependent of each other and vary and in dislert, but they have a general resemblance in language customs and manners. Europeans lave, or yet had few opportunities of lavestigating the condition of the Dayaka, as the Valay and Buggers traders, who olone frequent the interior, can give little account of the country beyond the datance of one place from monther and the articles of traffic to be procured at the different marts.

In oppearance the Dayaks are handsomer and fairer than the Valsys, of o more alender make with higher forcheads and noses; their hair long strait, and course ond generally cut close round their heads They wear o small wrapper round their loins ond frequently tattoo their bodies. Their houses are wooden erections of such a site as to contain several families. rometimes amounting to 100 persons. They cultivate rice colicet gold dust and diamonds, and trade in rattans, dammer, and the other products of their forests. In their diet they are subject to few restrictions hogs rats, sunkes ood all kinds of vermin, being equally welcome. Their arms are o sample or blow-pipe, and polioned arrows, and a large heavy Loife Few are acquainted with fire-arms except in the immediate vicinity of the Mising states Their riches consust in the number of jars, gonge porcelato cups and saucers, &e ; but the first are most valued some from super stutuous motues as high as 1,000 dollars As subjects they are industrious, particularly disposed to agricultore and so docile that in many parts o handful of Maleys tyrannizo over thousands of these peaceful cul tivators of the teli

In their manners the most singular feators is the necessity imposed on every person of some time in his life instruing his hands to froman blood, no person being premitted to marry until he can show the skull of a man ho has alau, litered it is not necessary, however that this trophy

should be the result of his own prowcas on the contrary, the head hun ter proceeds with his party to the vi cinity of another tribe, where he lies in ambush notil he can surprise some unsuspecting wretch, whose head is immediately chopped off Occasionally they pounce on a solitary fisherman who is in like meoner decapi He then returns to tated forthwith the village in triomph Is joy fully re ceived and the head hung up over the door When o death occurs tho corne is reduced to ashes and a slavo killed, in order that he may act in the same capacity in the next world Rich men purchase slaves when they are cheap to have them of hand in The heads they case of emergency preserve with great care, and sometimes consult in divination The reit grous orrather superathrous opinions connected with these barbarous practices are not yet correctly understood.

As may be approved the practice of head-stealing so universal with these petty tribes, must enuse endless wars and fouds among them; but the men are stimulated by the con tumely they experience both from tho females and their more fortunato comrades, if they cannot perpetrate a murder and carry off the head Mr Burn relates that he saw n person who had the reputation of having obtained cleven heads while his son although only a lad, had obtained When o married woman com muts adoltery, the husband in order to wipe of the disgrace kills oce, two, or three of his slaves ond sometimes also beats his wife, or if he can procure a head, he may quit her and get another Io short, no transaction of importance appears to take place In which the possession of a human head is not coosidered a necessary element.

The Binjoos may be considered as the same race with the Dayaks Idean, and Horsfora, with their manners somewhat diversified by the cature of their pursuits which are those of a maritime life. They are in reality o kind of sea gipsies or itlacenat fish crimes, who live to small covered

boats, and enjoy a perpetual summer on the Indian ocean, shifting to leeward from island to island, with the variations of the monsoon. In some of their customs this singular race resemble the natives of the Maldives, like whom they annually perform a sacrifice to the god of evil, by launching a small bark loaded with the sins and trespasses of the people, which are imagined to be transferred to the unfortunate crew that may be so unlucky as to meet with it.

The Biajoos on the north-west coast are more civilized than the others, and while the English colony at Balambangan existed, used to supply it with rice, fowls, and other pro-By the Malays they are named Oranglaut, or men of the sea. These fishing Biajoos have boats of about five tons, with whole families on board, who catch sea slugs in seven and eight fathoms water. They also dive for it; the best, which is the black sort, being only found in deep water, some of the weight of half a pound each. They are sold to the Chinese at the rate of five dollars per picul, or 133½ pounds. Some Biajoos dwell close to the sea on the islands scattered round Borneo, and at the mouths of the rivers, where their houses are raised on posts Many of this sedentary class have become converts to the Mahomedan religion

On the north-east coast is a savage people named Orang Tidong, or Tiroon, supposed to be another variety These reside up of the Biajoo race. the river, and fit out vessels to cruize among the Philippines, and on the north-eastern seas of Borneo They are a hardy race, and subsist mostly on sago during their voyages Malays of Magindanao affect to despise them, but when they meet among the Philippines, which are their common prey, they do not molest cach other. These are described as occasional eaters of human flesh. Their boats are small and the planks being merely sewed together, they can easily take them to pieces and carry them overland when cooped up in any bay by the Spanish guarda costas. Their conduct to their prisoners is cruel in the extreme, often mutilating the strongest, or leaving them to perish on some desert sand-They sell a great deal of sago to the Sooloo islanders, who afterwards dispose of it to the Chinese There remains another class of Biajoos, who wander about Celebes, Borneo, and the Philippines, and who are composed of a medley of different nations; such as Chinese with long plasted hair; Javanese with bare throats, plucked beards, and whiskers; and Macassars with black shining teeth. They are said mostly to follow the Maliomedan and Chinese religions.

Comparing the condition of this island, in civilization and cultivation, with other parts of India, the population of which is better known, although of so immense a size, we cannot assign it a greater number of inhabitants than from three to four millions; not including in the estiorang outangs, which mate the some authors assert is also a cook-The inhabitants of the ing animal north coast have a tradition that their country was once subject to China, and in modern times it has become a grand receptacle for the surplus population of that overflowing empire. In 1818 the Dutch commissioners at Pontiana put forth claims to the whole of the island, which, if admitted, would in addition to Java, which they have long possessed, and Sumatra, which they acquired by treaty in 1823, give them dominion over three of the largest islands in the world, besides two-thirds of Timor and Ceram. In 1824 the Chinese gold miners at Sinkawang were in a state of insurrection against the Dutch, who at the commencement were unsuccessful, and obliged to evacuate that portion of the coast. date all the Dutch establishments on the west coast of Borneo depended on the residencies of Pontiana and Sambass, or on the subordinate residencies of Mampava and Landak; the chief of which was to bear the title of Resident on the west coast of

Bonneo Mr Muller who was employed by the Batavian government (about 1823), surveyed the whole north-western creat of the Island and also fixed many lamportant geographical points of the Interior; but many of these surveys were subsequently lost an consequence of his having been murdered by the natives—(Forrest, Bulryspile Leeden, Higfes Crawfurd Hunt Stacorinas, Illuscote, Labore & S. La

Boanto Paorta (pronounced Bru war .-- A Malay kingdom on the north west coast of Borneo and the most evalued portion of the island. The sea-coast of this state extends about 700 miles, with a depth of territory inland of from 100 to 150 miles. To the west it confines on Sambas at Tajong Data, lat 3' N., lon 110° 36' L to the cast it is bounded by the tract claimed by the Soulogs marked by the mouth of the Sandakan river in lat 5° 50' \. lon 118" 15 E. To the south Bor neo Proper has various savage tribes such as the Layan the Dusum, the Marit and the Tatao To this print cipality also belong the following is-Meiswell, Ban,ucy, Balands to lambangan Balabak, and Babullan, among which are several fice har bours.

The most importent rivers on the oorth-west coast are those of Reyung and Batava, which lead to Sibeta the capital of the Kayan, the most powerful of the oneoaverred tribes in this quarter of the Island Tha others are the Mahor and thet of Borneo which is navigable for vessels of 300 tens twenty miles obovo sts juection with the sea. On the north-eastern coast is the Sandskao, or China Batangun rure.

The interior of the Bornean dominions present extensive chains of nouotains the most remarkable of which named Keenechaloo in lat 6° oorth, owing to his great elevation is visible from both sides of the uland, which is here comparatively narrow The geology of Borneo Froper as far as huropean kowledge.

goes, is primitive and destitute of the trap formations so common in the Sunda chain; nether lare any valcanoes been discovered within the limits of this kingdom. Further west between the second and third degrees of north latitude the district of Sarawak and has nioka abound in gold, and the semi-metals authomy and aine in the hayan country from and in are found and even wrought by the nutters.

The land animals of this territory huherto discovered are the elephant. thinoceres and leopard, but not the royal tiger; the bear horse buffalo, ox, hop dog cat, duck and common The three animals first men tioned are only found in a single cor ner of this vast island, the districts of Ungsang and Paltne : nor are they to be found in the archipelago fur ther east. The home the goat and the dog have been imported and domesticated, and the range of the first Is still limited to the districts of Pan damn and Tampasok between the fifth and aixth degrees of north lati tude The ox and hog are natives of the forest, and the jungles of Bor neo furnish an endless variety of tho ane and monkey tribes some of them nearly approaching the human form The seas yield the turtle pearl oyster mother-of-pearl oyster, and the hiche de mer, or esculent sea alux the land rice ango black penper camphor chnamon, bees wax, and many woods, useful and ornamental.

Besides the Malaya ond other Mahomedans, Borneo Proper is inhabited or rather infested by numerous tribes of barbaron savagea differring fo dialect, and carrying on an incessant warfare A small district, or even a village, here constitute a nation desiring nought hot the heads of its neathours. The races of most note are the following—the Nislays, Socioog, Biajoo Dannin, Illianos, Andayans Bisayans Birauta, Andemuts, Tutungs, Kyajoos Kajans, Dayaka Tatuos, Ananowuts and Melandos. The unconverted tribes, in mooters and eustoms beer a close

resemblance to each other. They wear only one piece of cotton or bark eloth round their loins, and usually nothing else, but the Kayan warriors oceasionally wear also bear and leopard skin coats and eaps. Then arms consist of a blow-pipe for discharging poisoned arrows, swords, spears, and long shields At the chief town of the Kayan, who in the scale of Bornese greatness are a powerful people, some cannon and muskets are to be found. Some of the tribes are mischievous and ferocious, others less so, a few moffensive, and even industrious; but in one ruling passion they are unanimous, viz the pleasure of cutting off human heads, and then hoarding them as a family treasure. The origin of this practice, so universal among all the savage tribes from Bengal to the extremity of Papua, has not yet been traced, or its motives satisfactorily explained Some of these tribes dwell in miserable huts covered with leaves, but the majority in houses of immense size, capable of accommodating from 50 to 200 persons; security from hostile attacks being apparently the object. Indeed the Bornean savages are far from the lowest stage of social existence, for they have all some knowledge of agriculture, and several understand even the smelting and manufacture of metals. They do not appear to have any system of religious belief, nor any gods, idols, priests, or temples, but apparently ahundance of superstitious fears None of the native Bornese tribes have any alphabet, which is remarkable, considering how universal alphabetical symbols are in all the other large islands, and argues a permanent inferiority, originating probably from its geographical figure, Borneo, like Africa, being a solid mass, without indenture by gulfs, bays, or inland scas

In Borneo Proper the ruling and most envilved race is the Malay, yet, with all their converts to the Arabian faith, they are said not to compose more than the tenth part of the

whole population. The Malayan emigration to this island is supposed to have taken place about the middle The king of the thin teenth century is designated by the Hindoo title of rada (raja), with the epithet of langdi per tuan (he who loids it), but his despotism is modified by select ministers who form his council, and from thirty to forty hereditary pangerans or nobles. This principality is generally reckoned of some duration, as it is alluded to in the annals or legends of Malaeca as a proud and independent state. One proof of its antiquity is the high veneration for the prince's authority, found in all ancient Malay states, but in very few of recent origin —(Singapoor Chronicle, Forrest, Crawfuid, &c.)

Bonneo Town.—This place is situated on the north-west coast of the island, ten miles up a river of the same name; lat 4° 56′ N, lon. 114° 44′ E. The river is navigable for ships of builthen above the town, but the mouth is narrow, and has a bar, over which there is scarcely seventeen feet water at high tide. Up to the town the water is salt, and the flood runs at the rate of four nules per hour. In the middle there is six fathoms water, and here the Chinese junks he moored, head and stern.

The houses of Borneo are built on each side of the river on posts, and are ascended to on stairs and ladders. It resembles Venice in having small water channels instead of streets. All the traffie is transacted on board of boats, which float up and down the river with the tide, and are in gcneral managed by women. This city has long carried on a trade with China, the Sooloo Isles, the Philippines, the Straits of Malacca, the west coast of Borneo, and with the small principalities on the east side of the Malay peninsula. For some time past the China trade has been interrupted, but when in activity, two junks came from the province of Nanking, two from Limpo, two from

Amoy one from Canton and two I ortuguese reviets from Mara. The Intercorne between Bornes and Manilla was also formerly brak I but of late years on account of the pervailing anarchy has declined like thing anarchy has declined like thing anarchy has declined like thing anarchy has declined like was conducted chiefly in Bornese leasts, who made the vouse from one place to the other is seen day. At present I y far the too t con is detail to commerce is that with hun groot, which in It acceptaged forty

PROWL. Last century there was an Figh h factory here but for a number of years past Foropeans have denoted from visiting this city, on account of its sident and anarchical govern ments but apparently the trade mint The he now with safety renewed commodities best adapted to this market are the following sea, Brits h and lodies cotton and weolien fa bries onum for the astire and Chi nese markets, with fron, arms, and ammunition. The staple native exports are fiae exceptor pepper (copul to 0,000 piculs), tortoisciliell, escu ient roots, sea slue mother of pearl shells, pearls, aren woods for dyerar for perfumer and for ship-building To these exports may be added tens, wrought and raw sile nanklas camphor, and casus Imported in the first instance from China. The Chinese traders construct their own junks here at a remarkably moderate ex pense per ton. The teak tree is not produced here; but a senety of ex cellent and dorable woods fit for all the purposes of avval architecture (more especially the camplior tree), are found ie abundance.

In October 18 v. a prow belonging chirances to the king of Bornea Proper above cardinal pe 200 tons burtheo, arrived et Slogaburtheous cassisting of the Orang Fard fro Kaya hayoag or lord of Kayong, the ambasator and a suite of between 200 oad 300 persons who linded with much lastbarie apleo dour At that timo there were six landout of the management of the proper to the prope

Bowal.—A small village in the province of Bengal, district of Dacca Jelalpoor, twenty miles N by E from the city of Dacca; lat 23° 57' N, lon. 90° 23' E The country surrounding this hamlet swarms with game of all sorts, among which may be enumerated elephants, tigers, leopards, bears, buffaloes, wild bears, deer of many varieties, foxes, hares, jackals, tiger-cats, and of the feathered tribes floricans (the otis houbara of Linnæus), peacocks, the domestic fowl in a wild state, different kinds of partridges, snipes, quail, wild ducks, teal, and wild pigeons.

BRAHMAPUTRA RIVER.—(Brahma-putra, son or offspring of Brahma) -For many years past this river, on the authority of Major Rennell and Capt. Turner, has been supposed to be a continuation of the Sanpoo of Tibet, but recent discoveries have tended to bring this conjecture into disrepute, at least so far as refers to the eastern branch, or Luhit, the course of which has been traced until it diminishes to a shallow rocky stream, broken by rapids, among the range of mountains that bound Assam to the north-east. It has also been ascertained that Brahmacoond is not its source. Some geographers, however, expect that a connexion between the Brahmaputra and Sanpoo will still be established by means of the Dihong or western branch; but this appears improbable, both from the inconsiderable size of the Dihong at the furthest point to which it has been explored, and the mountainous chain (apparently a prolongation of the Himalaya) which seems to extend without interruption eastward far beyond the longitude of the

Dihong. The question, however, will not remain much longer undecided, and it would be lost time at present to balance probabilities; for further information therefore respecting the upper course of this river the reader may examine the articles Assam and Sanpoo, what follows having principally reference to its lower course.

Proceeding west, the Brahmaputra reaches Goalpara, formerly the frontier town, where its expanse is magnificent and the scenery grand; but the water is extremely dirty, and the surface during the floods covered with a dusky foam, intermixed with logs of wood, vast floats of reeds, and a great variety of dead bodies, especially of men, deer, and cattle, which are scarcely less offensive to the senses than the half-burned human carcasses on the banks of the

sacred Ganges.

Having quitted Assam, the Brahmaputra rushes to the notice of Europeans in the Rungpoor district with increased volume, a channel at least a mile broad, and when not encumbered with islands, continues in many places nearly the same width; but in many places these subdivide the channel into many parts and enlarge its size, so that from bank to bank there is often a distance of five During the dry season in this part of its course, the water no where fills its channel, even where narrowest, in the wet season, except where there are a few scattered hills, the river everywhere overflows its banks, and in many parts deluges an extent of from twenty to thirty miles, insulating such small hills as are in the vicinity.

In the Rungpoor district the rise of the Brahmaputra usually commences in April, and in the beginning of May increases still further. This may be partly owing to the melting of the snow in the mountains; but in general the swelling of the river and the inundation are chiefly affected by the rains in the immediate neighbourhood. A few fair days always diminish its size, and it never rises much except after very heavy rain.

The randity and bulk of the rirer continuo gradually to increase, and it attains its greatest elevation about the beginning of August towards the end of which it subsides, and the current loses much of lts force The inundation contracts at the same time and although the viver rises once or twice in bentember and the beginning of October It has never been known in these months to pa # the bounds of its regular channel Withla the limits of Bengal the Brah maputra is not fordable at any sea son but its novigation is rendered difficult by the great number of sand banks and the trunks of trees half buried in its bed. Within the British territories the oumberless Islands and channels are undergoing incessant changes, and the like mutations may be expected to contione

After entering Bengal the Brah manutra makes a circuit round tho western point of the Garrow moun tains and then altering its course to the south in the Dacen province is loined by the Bleens which although not the tenth part of its magnitude, most unacconotably absorbs its name and communicates its own to the huge mass of water, until they intermix with those of the Ganges near the Bay of Bengal. In 1800 the Brahmaputra threatened by a change of sts course to carry away all the vieinlty of Dewangunge, and perhaps to force his current into the Astroro jeels in the Rajeshahy district, which would very much disturb the modern geography of Bengal by aubmerging o vast extent of surface, while its old

bed would become o morass

any of the sea. The union of these
two mighty rivers below Luckspoor
now forms a guil interspeesed with
many islands, soun equal in piete to the

Isloof Wight The bore which is a sudden and abrupt influx of the ide into a riser or narrow strait, prevails in the principal branch of the Ganges and in the Megna; but the Hooghly river, and the passaces between the islands and sandbanks situated in the guil, formed by the confluence of the Ganges and Brahmaputra, are more suiters to it then other rivers.

Notwithstanding the great magni tude of the latter It was unknown in Purope until 1765 as a capital river of in hat nor did it ever among the Ilindoos attnin the same reputation for sanctity or conciliate the same interest, as its female neighbour the Ganger Among the Ilindoor of Nepaul the name Brahmsputra is said to be applied to the Sanpoo; and In Assam although the term is known the great river, or at least that eleawot teswedtuos gainaut nortron Bengal, is more commonly called a unit. The name first mentioned signifies son or offspring of Brahma, the creator of the world, and its vast bulk in a figurative sense might en title it to that appellation; but such is not the derivation of Iliadoo my thologists. According to these sages it ones its origin to an intrigue whilely took place between Brahma and Omegha, the wife of a holy man named Santons the particulars of which on account of their extravagant sodecency do not admit of parration Since the expulsion of the Bur

mese from Assam It has been found eligible to establish steam-boats on the Brahmoputra, and in 1826 the Court of Directors authorized the construction of machinery for two steamers of twenty five harse power each and drawing only three feet It was soon discovered that. owing to peculiar circumstances, these inventions were much more wanted on the Brahmaputra than even the Ganges, as on the first there is not only a vast space to be traversed and a still more rapid current to be overcome, but it is also wholly with out the favourable wind which for so mony months in the year blows against the stream of the Ganges

During the rains the prevailing wind along the Brahmaputra is quite adverse, being in the same direction with the stream, at least beyond the point of Dhombree, where it takes an easterly direction. The difficulty of tracking is also much greater along the Brahmaputra than the Ganges, as the continual traffic along the latter, and the uninterrupted occurrence of villages and cultivation, have made a regular road along its banks ; whereas the channel of the Brahmaputia is bounded through very considerable intervals by dense and inhospitable jungles. One mile per day in such situations, and under such circumstances, is a fan average rate of advance; and a voyage from Dacea to Rungpoor, the former capital of Assam, has been found fully equal in duration to a voyage to Europe. Steam-boats will be able to overcome many obstacles that oppose the progress of common boats which they can drag up the river, carrying supplies of stores, troops, and functionaries -(F. Buchanan, Capt. Turner, Rennell, Public Journals, &c)

Brala.—A small island lying off the eastern coast of Malacca; lat. 4° 55′ N, lon. 103° 40′ E.

Bramadeo (Brahma Deva) -A sacred spot on the west bank of the Goggra, in the great Saul forest at the foot of the Kumaon mountains, province of Delhi, about seventy-five miles N.E from the town of Bareily. The river Goggra here penetrates the great northern barrier, and enters the plans of Rohilcund. sublimity of scenery it yields nothing to the Ganges at Hurdwar, although the landscape has less expanse, and is of a wilder and darker character. The Goggra here rushes in a deep and beautiful rapid through a narrow ravine confined by precipitous mountains, over a bcd of white pebbles, reflecting from its surface the vivid green hue of the primeval woods that overshadow it.

Bramadeo, however, has not been so fortunate as Hurdwar in attracting the notice of superstition, for one sacred peepul tree, with a small stone basement built round its trunk, is not only the sole temple, but almost the only memorial of time or humanity to be found here. The most direct thoroughfare between Barerly, and the British stations of Chumpawut and Lohoo ghaut, in Kumaon, is by this sequestered spot, in consequence of which a small commissatiat dépôt was soon after its conquest established here, and a pathway five feet widc opened through the hills, which although steep and difficult, is still practicable to foot passengers during the greater part of the year. More recently the dépôt has been withdrawn, the jungle has re-spread to the margin of the river, and the spot abandoned to the wild beasts, its prior inhabitants — (Fullarton, &c)

Brambanan —A village in the island of Java, province of Mataram, between the two native capitals of Suiacarta and Yugyacarta, and three miles NNE. from the latter, lat. 7° 49′ S, lon. 110° 25′ E.

At this place are many extraordinary remains of Hindoo images, temples, and inscriptions, and more especially of the remarkable group named the "thousand temples," which occupies an oblong area of 600 feet by 550, and consists of four rows of small temples, enclosing in the centre a great edifice sixty feet The temples are pyramidical buildings, all of the same character, covered with a profusion of sculpture, and consisting of large blocks of hewn stone. Each of the small temples contained an image of Buddha, and in the great centre one, divided into several apartments, Siva figures, or some of his attributes To the whole group there are four entrances, facing the cardinal points of the compass, each guarded by two gigantic statues representing warders, which measure, in a knecking posture, not less than nine and a half fect high by eleven in girth.

The constructors of Brambanan evidently possessed the art of turning an eliptical arch and vault, but a

circular arch or sault le no where found among the rure. Ther Is prestiles by a premiar elector in a maly In every gran ores ter lata wild every sin to tem 'ex and the everl sofilty and the labour exerted to complete them, are descrain, of silmiration The walls are covered with Incorrect is on smeats in also and lu socieliero per uni ont la lecco er and server y any the farts theal or a's ord excert the der es there select. Beasett — A large and rulnous city to the province of Confern the earl tal of the above the trict situated on an emiscance on the banks of the Nerbudda twents fire miles frontise entrance i tal 21° 46° N. Ion 73° 14 F. It is said to derive its appel lation from the limited saint, de-

votes, or denugod Bhriou, and aught

properly to be written Bhrigu Khetra, or Bhrigupura, the town or place of Bhrigu. It is also thought to have been the Barygaza of the ancients, and when it surrendered to the Emperor Aeber, in 1572, still continued a port of great trade. It is mentioned by Sidi Ali in AD 1554.

The houses are here built like those at Surat and Cambay, the streets generally narrow and dirty, and in the vicinity are many dilapidated mosques and mansoleums. Being situated in a fertile country, it is plentifully supplied with provisions and game, and the Nerbudda, which washes its southern wall, abounds with earp and other fish A considerable traffic is carried on with Surat and Bombay, principally in raw cotton, grain, and seeds of all sorts, in boats with large lateen sails. In 1812 the population by actual enumeration was found to be, Hindoos 19,836, Mahomedans 9,888, Parsees 2,992, total 32,716 persons Since the above period, however, it has probably much declined, as in 1824 it is described as a poor, dilapidated, hot and unhealthy place The Neibudda here is two miles across at ebb tide, but very shallow, and admits only vessels of small burthen beyond the bar at Tunkaria breeze sometimes comes up with the flowing tide, but is not always to be depended on. The climate of Gujerat, and of the other provinces under the Bombay presidency, Poona perhaps excepted, are more generally unfavourable to the preservation of European health and strength than those of the other two presidencies.

In 1807 there were twenty-five nats or societies in Broach, of the Banyan caste, comprehending 5,261 individuals of both sexes. At this place there is a pinjrapole, or hospital for animals, supported by donations from the Hindoo inhabitants. Every marriage and mercantile transaction is taxed for the pinjrapole, by which above £1,000 is raised annually; a great proportion of which is absorbed into the coffers of the managers The only expensive am-

mals it at present contains are mileh eows, which repay the expense of their keeping. It was formerly reported that beggars were hired by the managers, that the lice and similar insects might feed on them, but in 1824 the officiating Brahmins declared this to be a calumny, in as much as every animal whatever was fed on vegetable food.

By the treaty concluded with the Peshwa and the combined Maharatta powers in June 1782, the city and pergunnah of Broach were ceded to the East-India Company; but next month of the same year they were made over to Madhajee Sindia, ostensibly as a recompense for his humane treatment of the British prisoners and hostages who surrendered at Wuigaum; but in reality for his assistance in bringing about the pacification, which at that period, on account of Hyder's invasion of the Carnatic, was most urgently wanted. In 1772 Broach was besieged by an army from Bombay, commanded by Gen. Wedderburne (Loid Loughboiough's brother), who was killed under the walls, but a few days after the general's death, although then a place of considerable strength, it was taken by After the death of Madhajee Sindia, it devolved to his nephew and successor, Dowlet Row Sindia, from whom it was taken in 1803, and has ever since remained with the British government. Ti avelling distance fi om Bombay, 221 miles, from Oojein, 266, and from Poona, 287 miles — (Drummond, Wilford, Moore, Rennell, Romer, &c.)

Brooang Pass (or Burendo)—A pass through the Himalaya mountains, near the course of the Sutuleje, 15,095 feet above the level of the sea, lat 31° 23′ N., lon 78° 12′ E. The country in this neighbourhood is extremely rugged, and the population thinly scattered, in villages situated at a great distance from each other; they are, however, in general large, and the houses (built of stone and wood, and sometimes slated) spacious. The people are described as

dark in their complexions and dirty in their halits, but their temples are said to be of a superior description —(Licut Gerard 'te')

Benonana.—A village in the province of Sinde situated on the road from Byderabad to Luckputhunder, about twenty four miles to the north of the latter; int 24° 10 \, n lon 63° 2° E. This place stonds on the edge of the Ruon and during the dry season is abandoned by the unhabitants.—(Masfield &c)

Bunnoon —A town in the province of Ajmeer belonging to the Jeypoor Raja fifteen mies distant from his capital in 18°0 it was said to contain 2 000 houses

Breeksone,-A town in the province of Benenl district of Birbhoom seven miles from the ruins of the nn eient city of Nagore. At this place is the most comous hot springs met with in this quarter of the Vindhian range its waters forming a running stream of considerable size it is also the hottest, as in January 1810 it raised a thermometer immersed to 152' Fahrenheit. The water exhales a strong sulphureous smell and reservoirs have been built to receive them A street of above 100 damma tive panodas has been raised along the margin with the usual picturesque occompaniment of venerable burget trees, and a host of officiating Brahmion - (Tullarion &c )

Buchone.—A town in the province of Aliahabad twenty-seven miles W by S from Calliojer; lat 25° 2' N, ion 80° 7 E

BOCKAN for Bhukhn?—A small town in the province of Labore frequently the residence of the hakm or governor of the Losa district aits oted within a few miles of the ladius; let. 31° 38 N lon 70° 40′ E.—(El-phinatoce, for)

Boeratourn (or Il schulghar)— A towo cod small fort in the province of Malwa, attented on the north bank of the Nerbadda lat 22° 15' N, lon 76° 21 E Breksam.—A town in the province of Rahar, district of Tirhoot thirtytwo miles north from Putna; lat 26° 4 N., long 8.2° 10° L.

Bickbau.—A town in the province of Onde district of Goruckpoor at trated on the hinks of the Buckrai jeel or Lackshmisar lake the theme of a popular and indecent illudostana song; twenty three miles north west from Goruckpoor, lat 267 4 N., ion 8.9 10 E

Branninea —A fortified post in Northern lindoston twenty-air miles > by W from Almora, lat 30° A., lon 70° 31 F., 8,212 fret above the level of the sea

Brdatoov (Budaran) —A town in the province of Delhi divited of Barcili twenty-anne miles south west from Barcily int 29° 4 × 10n 76° 58° E. It was first congarced by the Mahomedans in A D 1201 when it was in a flourishing condition; and it is mentioned by Abul I asel in the in alluttes of Aeber, as a place of eelbility but its importione has long ceased and it is remarkable only for its antionits.

Benonal Aya, - Remarkable rums lo the province and district of Bahar situated a few hundred varia west of the Nilajan river to a plain of great extent about five miles from Caya Proper They now consist of confused heans of brick and stone which ex hibit some traces of having been once regularly arranged; but immense quantitles of the materials hove been removed and the remainder are olmost shoncless The building here called the temple of Buddha is a lofty brick edifice resembling of a distance a huge glass-house and now so honey combed with age as to excite surpriso that It continues creet. Buddha Gaya was probably at one time the centre of a religion and capital of a powerful king but the sect of Buddha in this neighbourhood may be considered as completely extinct, yet a few persons come occasionally from distant coun three to visit its monuments most remarkable modern edifice is a consent of Sanyassics

u 2

properly to be written Bhrigu Khetra, or Bhrigupinra, the town or place of Bhrigu. It is also thought to have been the Barygaza of the ancients, and when it surrendered to the Emperor Acbei, in 1572, still continued a port of great trade. It is mentioned by Sidi Ali in A.D. 1554.

The houses are here built like those at Surat and Cambay, the streets generally narrow and dirty, and in the vicinity are many dilapidated mosques and mausoleums Being situated in a fertile country, it is plentifully supplied with provisions and game, and the Nerhudda, which washes its southern wall, abounds with carp and other fish A considerable traffic is carried on with Surat and Bombay, principally in raw cotton, grain, and seeds of all sorts, in boats with large lateen sails In 1812 the population by actual enumeration was found to be, Hindoos 19,836; Mahomedans 9,888; Paisces 2,992, total 32,716 persons Since the above period, however, it has probably much declined, as in 1824 it is described as a poor, dilapidated, hot and unhealthy place The Nerbudda here is two miles across at ebb tide, but very shallow, and admits only vessels of small birthen beyond the bar at Tunkaria biecze sometimes comes up with the flowing tide, but is not always to be depended on. The chmate of Gujerat, and of the other provinces under the Bombay presidency, Poona perhaps excepted, are more generally unfavourable to the preservation of European health and strength than those of the other two presidencies.

In 1807 there were twenty-five nats or societies in Broach, of the Banyan caste, comprehending 5,261 individuals of both sexes. At this place there is a pinjrapole, or hospital for animals, supported by donations from the Hindoo inhabitants Every marriage and mercantile transaction is taxed for the pinjrapole, by which above £1,000 is raised annually; a great proportion of which is absorbed into the coffers of the managers The only expensive ani-

mals it at present contains are milch cows, which repay the expense of their keeping. It was formerly reported that beggars were hired by the managers, that the lice and similar insects might feed on them; but in 1824 the officiating Brahmins declared this to be a calumny, in as much as every animal whatever was fed on vegetable food.

By the treaty concluded with the Pesliva and the combined Maharatta powers in June 1782, the city and pergunnah of Broach were ceded to the East-India Company; but next month of the same year they were made over to Madhajee Sindia, ostensibly as a recompense for his humane treatment of the British prisoners and hostages who surrendered at Wuigaum; but in reality for his assistance in bringing about the pacification, which at that period, on account of Hyder's invasion of the Carnatic, was most urgently wanted. In 1772 Broach was besieged by an army from Bombay, commanded by Gen. Wedderburne (Lord Loughborough's brother), who was killed under the walls; but a few days after the general's death, although then a place of considerable strength, it was taken by After the death of Madhajee Sindia, it devolved to his nephew and successor, Dowlet Row Sindia, from whom it was taken in 1803, and has ever since remained with the British government. Travelling distance from Bombay, 221 miles, from Oojem, 266, and from Poona, 287 miles — (Drummond, Wilford, Moore, Rennell,Romer, &c.)

Brooms Pass (or Burendo).—A pass through the Himalaya mountains, near the course of the Sutuleje, 15,095 feet above the level of the sca, lat. 31° 23′ N, lon. 78° 12′ E. The country in this neighbourhood is extremely rugged, and the population thinly scattered, in villages situated at a great distance from each other; they are, however, in general large, and the houses (built of stone and wood, and sometimes slated) spacious. The people are described as

dark in their complexions and dirty in their halits but their temples are sald to be of a superior description —{Lieut Gerard, ic}

Butonano.—A village in the province of Sande situated on the road from Hydershad to Luckputbunder, about twenty four miles to the north of the latter; lat 21 10° N., lon CO' 2° E. This place stands on the edge of the Bunn and during the dry sea son is abundoned by the inhabitants. —(Magnéd, dr)

Bonnoon —A town in the province of Ajmeer belonging to the Jeppoor Raja, fifteen miles distant from his capital In 15°0 it was said to contain 2 000 houses.

Beccursons .- A town in the province of Bengal district of Bubboom seven miles from the rulns of the an cient city of Nagore. At this place Is the most copious liot springs met with in this quarter of the Vindhian range its waters forming a running stream of considerable are; it is also the hottest, as in January 1819 st raised a thermometer immersed to 152 Fahrenhelt. The water exhales a strong sulphurcous smell and reservmrs have been built to receive them A street of above 100 dimion tive pagodas has been raised along the margin with the usual picturesque accompaniment of venerable burget trees, and a host of officiating

Buenone.—A town in the province of Allahabad twenty-seven miles W by 8 from Callinjer, lat 25° 2' N, lon 80° 7 E.

Brahmins .- (Tullarion &c)

BOCKAR (or Bhukker).—A small town in the province of Lahore, frequently the residence of the halim or governor of the Leia district situ oted within a few miles of the ladus int. 31° 38 N lon 70° 40′ E.—(El phintine de)

BOCKATOHOR (or Il schulghur)— A town and small fort in the province of Malwa situoted on the north bank of the Norbudda int 22° 15' N, lon 70° 21 E Breknam.—A town in the province of Bihar, district of Tirhoot thirty two miles north from Patna; lat 26° 4 Na long 85° 10′ k

Bernan.—A town in the province of Onruchoor at toated on the banks of the Buckrail jeel, or Lackstimuser lake the theme of a popular and indecent if indostany song; twent, three miles north west from Coruckpoor lat 20° 4 N. Jon 83° 10° L.

Bedangher—A fortified post in Narthern Lindouten twenty-six miles A by W from Almora, lat 30° \ lon. 70° 31 E., 8,242 feet above the level of the sea

Benavoor (Budaran).—A town in the province of Delhi, district of Blarelly twenty-nine miles south west from Barelly lat 84 N 10m 75° 83 E. It was first conquered by the Mahomedans in A D 1203, when it was in a floatinating conductor and it is mentioned by Abul Fazel in the institutes of Actor, as a place of celebrity; but its Importance has long ceased, and it is remarkable only for its antiquity.

Bennia LATA. - Hemnrhoble mins In the province and district of Baliar situated a few hundred varies west of the Vilajan river in a plain of great extent, about five miles from Cayn Proper They now consist of confused heaps of brick and stone which exbibit some traces of having been once regularly arranged but immense quan titles of the materials have been re moved and the remainder are almost shapeless The boilding here called the temple of Buddha is o lofty brick edifice, resembling at o distonce a huge glass-house and now so honey combed with age os to excite surprise that it continues erec. Buddho Gnya was probably at one time the centre of a religion and capital of o powerful Ling; but the sect of Buddho in this neighbourhood may be coosidered as completely extinct yet n few persons come occasionally from distant coun tries to visit its monuments. The most remarkable modern edifice is n convent of Sanyassies.

On the terrace behind the temple a peepul tree is growing which the orthodox suppose to have been planted by Brahma, the Buddhists, on the contrary, assert that it was planted by Dugdha Kamını, kıng of Sınglıal Dwipa, 414 years before the birth of our Saviour, and 125 before the building of the temple, and that it is placed exactly in the centre of The tree in 1812 was in the earth full vigour, and appeared to be about 100 years of age, but a similar one may have existed in the same place when the temple was entire, a circular elevation of brick has been raised round its 100t, in various concentric circles, and on one end of these has been placed a confused heap of images and carved fragments of stone, taken from the runs. Indeed the number of images scattered about this place, for fifteen or twenty miles, in all directions, is almost incredible; yet they all appear to have originally belonged to the great temple or its vicinity, which seems to have been the grand quarry for the whole, and carried from thence to different Many of these images are now worshipped by the Brahminical Hindoos, and many of the attributes of their gods have apparently the same origin; but this people, with all their religious zeal, are most unaccountably careless in many respects, worshipping males under female names, and unequivocal images of Buddha, as an orthodox deity. Besides inscriptions establishing the Buddhist origin of many of these images, they may be distinguished by the enormous size and distension of their ears, and also by a mark on the palm of the hand and soles of the feet, which is supposed to resemble the lotus flower .- (F. Buchanan, Fullarton, &c)

Buddegaum (Buddhagrama).—A town in the province of Agra, district of Narwar, with a stone ghurry. In 1820 it belonged to Sindia, and contained about 1,000 houses

Buddoo (Buddha)—A village in the Lahore province, formerly tributary to the Raja of Jamboe, sixty-one miles N. by E. from Amritsir, lat. 22° 26' N, lon. 75° E. An annual fair is held here on the 5th April.

Buddruck (Vadarica)—A town in the province of Orissa, situated on the noith bank of the Cewali or Solundee river, which at one season of the year is fordable here, and at another 300 yards broad; lat. 21° 7′ N., lon. 86° 26′ E, thirty-eight miles S.S W. from Balasore. From this part of Orissa come most of the people termed in Calcutta Balasore bearers—(1st Register, &c)

BUDGERUDGE (Bhuyabhuy).—A small town in the province of Bengal, situated on the cast side of the Hooghly, ten miles below Calcutta in a straight line, but almost double that number following the windings of the river; lat. 22° 29' N, lon 88° 20' E

During the reign of Seraje ud Dowlali, the last independent nabob of Bengal, this station had a separate fortiess, which on the 29th of Dccember 1756 was besieged in form, and a breach effected, by the forces under Admiral Watson and Colonel Clive, who intended a general assault before day break. During the night, however, it was most informally stormed by a sailor named Strahan. who happening to get drunk, wandered up to the breach and fixed a pistol at some of the garrison: who not doubting but he was followed by the whole army, fled out by the opposite side, and left him in possession of the This little fort is still in existence, and may be traced, but with difficulty, its area being so choked up with grass jungle as to be scarcely accessible A more exotic and useful structure at Budgebudge in 1820 was a good English tavern, the only one on the banks of the Hooghly except at Calcutta.—(Ives, Fullarton, &c)

Budgeroons.—Three small islets in the Eastern seas in the straits of Salayr, off the southern extremity of Celebes The passage is between the southernmost and central one, and is about a mile broad.

Bronau Duocaa — A mountain peak in Northern Hindorian, righteen nuice S.W. from Almora; lat 227 20 N., ion 70° 20° L.; 8,50\_ feet above the level of the sex.

Binxawra -A town in the 170vince of lalwa thirty-one miles north from 1)har which in 1820 contained "I houses Lat. 23° 2 \ lon 7C" 17 E. It is the head of a pergunnah of the same name which at the above date comprehen led 1.0 sillages, and a population of 71,119 persons there villages twenty two belonged to the Dhar renervality; the rest to twelve Rajpoot families tributary to that clust but each Independent within his owo limits The town of Bodnawar ly surrounded by a mad wall in ba i repeat and there is also a fort where the Mundlovce resides. In 1520 the town and district afford ed a revenue of 02.271 rupees whileh was on the rice as the villages were floors hing and population ineres ing. - ( Valeriu, 4r )

Bennaroon.—A town in the provioce of Aurungalad twenty-six miles E. of the city of Aurungalad plat. 19° 54 N., Ion 75° 77 E.

Burda Rives (blades excelles)—This river has its source lo a hilly district of the Mysore province not far from the frontiers of Coorg from whence it flows lo a ontherly direct slow until it joins the Tuogariver; their juoction forming the Tungahiludes or Toombude area.

Becano — An Island about fifty miles in circumference lying off the south-eastern coast of Sumaira lat 5° 20′ S<sub>n</sub> Ion 102° 2. / E There is no fresh water to be had on the east aide of this island

## BUGGESSES .- See BONT GOD CELEBES

Boosoo.—A small town in the province of Ajmeer of Ajmeer and S W from Jeypoor lot. 25° 50′ N, lot 75° 15° E This place is sur rounded by groves of the tora palm o rare sight in these lohospitable places yet the soil does not appear radically bad and woter is found not far from the surface

Bi char.—A petty lordship (one of twelle) in Northern Hindottan attuated in the tract between the Su talege and Jumma; bounded on the west 1 y the Hindrer salley, and to the rast and south by Support in contains the fost of Haj-bins, Aj man, jur, Tural Lukchapupoor and Thurco Mahaudra Sin, A who reigned in Hil7, prior to the Hintli conquest paid the Gorkhas a tribute of 2000 rupercy per annum; but having by like conduct during the war for fested all claim for the restuntion of his territories, a certain portion was retained to compensate for the expense incurred.—(I feet Rose I alii MIS December 67)

Reavan —A small town and ghur ry in the province of Allahand twen ty-five miles 5 h. from Teary; lat. 24° 22 \ lon 70° D E.

Beawasa.—A town in the province of Candeldi, eighty-seven miles west from Boorhanpoor; lat. 21° 21 b., ion 74° 56 b. In this it belanced in Holest and contained 300 houses.—(Vetherland 6c)

ilettrazoso - A di trict in the isiand of Java which according to a census token ly the Briti h govern ment in 1815 contained 76,312 per sons of which number 2 633 were Chinese It then occupied an area of 2 411 square miles The village of Buitenzore the country residence of the governor of Java, at ands in lat. Go 30' 5., lon 100' 50' E., tinrty-alx miles travelling distoore south from Batavia. Being placed at the base of the blue mountains, the oir here is cool and healthy, but invalids suffer from the profusion of rain which falls here almost every evening .- (Tharn, Raf Act Ge )

BLIANA.—A town in the province of Gujerst division of Jutwor autooted on the hanks of the Runn which here to the month of December is in mony places merely most sand, and in others an extensive sheet of shollow water lat 23° 5 N, lon 71° 50′ L

BULDEAH .-- A town in the pro-

wall, and containing a gliurry or native fortification, ten inites N.N.W. from Turrote.

Bui indshirm (the lofty city).—A town in the Delhi province, forty-one miles SE from the city of Delhi; lat. 28° 25′ N, lon. 77° 43′ E.

Bulluah.—A town in the province of Oude, district of Goruekpoor, forty-two miles S E. from the town of Goruekpoor; lat. 26° 45′ N., lon. 83° 19′ E

Bullun —A small district in Mysore, situated about lat. 13° N. above the western glauts, partly comprehended in the British jurisdiction of Canaia, and partly within the territories of the Mysore Raja The external appearance of the three divisions of Bullum, Coorg, and Bednote nearly resemble each other, being all composed of high hills and deep vallies. The mountains are mostly bare, but the ravines are covered with jungle, and in many places by primeval forests, inhabited by a great valiety of wild animals In fact, although nominally under subjection to the former sovereigns of Mysore, it never was effectually conquered until military roads were made through it by the Duke of Wellington, in 1801-2 The duration of the rains, which commence about the middle of May and continue until November, give rise to a multitude of rivers, which flow in various directions the whole The waters that descend from these elevated regions to the westward, proceed to the Indian ocean through the provinces of Malabar Bullum contains no and Canara town, or even village of any consequence.

Bullumghum —A town and fortress in the province of Delhi, twenty-one miles south from the city of Delhi, lat 28° 23′ N, lon 77° 10′ E. The fort has high brick walls, strengthened with a deep ditch and high mud bastions. Within is a small crowded, but tolerable well-built town, with narrow streets, tall houses, and many temples. The raja has a neat palace built round a small court. with a marble fountain in the centre. The Bullumghur chief holds a considetable territory as feudatory to the British government, on condition of maintaining a body of troops to assist the police, and repress all meursions of the Mewatties and other predatory tribes. The family and most of the people are Jauts. 1819 the late Raja of Bullumghur died, leaving an infant son; in consequence of which the management of this small principality was entrusted by the British government to Raja Kooar Singh, the great uncle of the deceased Raja

Bulnawrour —A town in the province of Oude, forty-two miles N. from Fyzabad, lat. 27° 24′ N., lon. 82° 4′ E.

Bulsaur —A large and populous scaport on the high road to Bombay, forty-five miles S by W from Surat; lat 20°36′N, lon 73°5′E. A considerable trade is carried on in grain, jaggry, and timber The manufactures consist mostly of coarse doties, baftaes, and ginghams The principal produce of the pergunnah is rice and sugar-cane; but there is still a large proportion of waste and unoccupied land.—(Morrison, &e)

Bulsun.—A petty chiefship in Northern Hindostan, situated between the Sutuleje and Jumna, on the left bank of the Girce river, whence it extends castward to the frontiers of Joobul, by which it is also bounded to the south, to the north it joins Koteghur Lat 31°5′ N., lon 77°28′ E, forty-two miles N by E from Nahan

BULTEIRA GHAUT—A ghaut on the Nerbudda liver, province of Malwa, fordable in March The river here is wide but shallow, and on its south bank stands the small village of Bulteira In this neighboulhood there are many other folds formerly well known to the Pindaries—(Malcolm, &e)

Bulu China (named from a species of bamboo).—A small native state

on the east coast of Sumstra: subor direte to Delli, altusted un a mer of the same name, flowing almost paral-lel with the Dellieurer In 1423 this village contained only endity houses, but there were many others scatter ed along the river lunks of which Soonghal was the largest and most commercial. Further inland the Hat tas and the harantaran tribes are no mercus, and Inda trous cultirators. The exports are pepper (rai ed t e the Battas) gami ir tobacco and slaves; the imports are small quantities of every thier but more especially num and cotton goods. A traffic is also carried on quite across Sumstra to Sinkel on the opposite shore The country is naturally rich and productive but, except on the banks of the rivers, scantly populated Maisy here is reckoned rich who posserves 2 000 dollars .- ( Inderson, &c )

REMARKE—A good-suced form in the promise of Ajmore smarted at the foot of a range of hills injected miles south from Nuscerabal; Ist 20% N, bon 32% SL. On an adjoining rock is a hitteoid castle with some trees round its base, which are very ornamental in this parched country.

Benation (I maintered) — A decayed town in the province of Oriera district of Cattack situated some miles west of the great Jumpton will be to the control and about e, hitera miles By W from the town of Cuttack. The temple of Vindadevo (or bure) at this place is said to surpass in dimensions the pageds at Jumpton surface with the place is and to surpass and runns of an ancest city are dispersed throughout the neighbouring jungles — (Fullarton, fc)

BUNCHANO —A town in the leternor of Siar stuncted on the Velding river, which flows south into the Menon and in 1820 contained about 4 000 inhabitants mostly Chinese it is supposed to be the Banxang of the Lettres édifantes

Buncusion,—A coonderable town in the laterier of Siam, above

Rishhal situated at the junction of the Mellong with the Sussian trees, which here comes from the north in 1848 it contained about \$2000 in habitan 4,-4160 fe )

Benedicated framed native fort in Northern Ibn lotten, twenty-three miles north of Almora; Ist. 21 527 % fon 70° G h., and 40%3 feet above the level of the 1822.

Berdana.—Atomoin the province of Cundwana dominions of Nag poor situated on the Wine Gun, a tree, 67-feet above the ferel of the sea

Illepharet vo file country of the Randfelp.—A large division of the Allahabad pronner situated principally between the turning-fourth and tentify-such degrees of north last tunds. On the north it has the sizer Jumans on the south parts of Berra and Valway on the cast Bayliciand, and on the west Sinda's territories it extends from 77° 45 to 81° 31 E., and from 21° 7 to 9° 20° N., and contains along ther 23,817 miles, with a population of 2 400 000 persons. The recomptains of that tract ex-

tend in continuous ranges parallel to each other, each successfuly but-trealing a table lond one above the other, and here designated by the name of glaute The first of these ranges is called the Bundhruchal for (Indhia) mountoins which com mence of Lesoghur and make a cir cultous sweep until they approach tho Congres at Suraj, bur und Rajamahal. The plains of Bundlecund resemble a you bay of the ocean, formed by natural barriers and crowned with for-The progressive elevation from the Jumn's is towards the open of the bay but the lighest sum mit does not exceed 2 000 feet above the level of the sea The second range called the Panno ghauts, runs parallel in the Vindhyachol prethe third named the Bandair is the most elevated portion of the pro-Altico

The principal rivers are the hen Desan, and Betwa. Large artificial

reservoirs, such as the lakes of Burwa Sangor, Arjal, Birsangur, Nandanwar, Bomori, Jhatara, Gurrah, and Blund These are immense piles ot masonry, in some instances constructed to stop the current of a stream, in order to raise it to a higher level and force it to expand for the purposes of irrigation. There are not any forests in this district, the most valuable productions of the hills (besides diamonds) being bamboos, iron, drugs, gums, the chironia nut, and catechu or terra japonica. The diamond mines are situated in the table-land near Panna, and are the exclusive property of the Panna Raja; but no gems of superior quality have been discovered for many years past. A coarse cotton cloth dyed red is the principal manufacture, at Calpee sugar-candy and paper, and at Jhansi a caipet manufactory. coarse kind of sacking is woven along the banks of the Betwa, and at Chatterpoor, which supplies wrappers for the merchandize passing from the

The soil of Bundlecund exhibits every variety, from the rich black loam to the sterile conkar. The valleys and low lands are generally of the first, and when properly watered, produce in abundance almost every grain and plant of Hindostan more barren tracts millet, panic, and paspelum are grown, but even these inferior sorts, in times of scarcity, are not attainable by the poorer classes, with whom the fruit of the bassia latifolia, sometimes mixed with the deleterious bark of the katbal tiec. is the wretched, and almost poisonous substitute. In 1815, according to the returns made to the Marquis of Hastings, the district of Bundlecund contained 21,18,991 small begas in cultivation, which yielded a revenue of 29,01,510 rupees, or about one rupee There were also six annas per bega 8,94,387 begas fit for cultivation

There are not any remarkable buildings now extant, but some remarkable ruins, such as those at Mahoba, Cajram, near Rajanagur, at Malhan above the hills, near Jodh-

poor; and at Sirswaghur, near Saleya, on the Pohawaj. Among the natural euriosities may be reckoned the subterraneous cavern near Chittracote; another in the hills near Bijawer, the cataract of Bedhak, near Calyanghur; and of the rivers, Paisum, Bhagi, and Ranj rivers; but the objects most deserving of notice are certainly the hill forts of Callinjer and Ajyghur

The principal Hindoo religious establishment is at Chittracote, on the Paisuni river, and there are Jain temples at Schawal and Kandalpoor; but the most singular is at Panna, founded by an enthusiast named Jee Sauheb, who declared himself to be the Imaum Mchedi mentioned in the koran, to which Jee Sauheb's book, named the Kulzam, is intended to be a sort of appendix. His followers, naired also Dhamians, are to be found in the Punjab, in Gujerat, Delhi, Lucknow, Benares, Mathura, Fyzebad, Nagpoor, and Hyderabad: but Panna is their Mecca The pecuhar dialect called Bundlecundy is spoken in a tract lying due west of Allahabad, and along the banks of the Jumna from Meno to Calpee It is a Sanscrit derivative, and meets the Malwa on the west, the Biui on the north, and the Maharatta on the south

The principal towns of Bundlecund are Banda, the head-quarters of magistrate, Callinger, Teary, Jyhtpoor, Chatterpoor, Jhansi, Dulteen, and Bejaoui. The British possessions extend along the line of the river Jumna, from the Allahabad district to that of Etaweh, and from the Jumna southward to the frontier of They contain the native states 4,685 square miles, including the pergunnah of Koonch, and have a population of about 700,000 inhabi-The states of the native chiefs or raiss of Bundlecund occupy the remainder of the space, under different chiefs, protected by the British government. These small principalitics are numerous, and some of them extensive. For the convenience of fiscal and political arrangements

BURTWALLA —A town in the province of Canara fifteen miles L. from Mangalore Lat 12° of N., lon. 74° u0' 1

Rewest.—An I land about eighteen miles in creumference lying of Pullok institut in Magandanae; last 7° 14 Å lon 124° 28 L. On the 12th of beptember 1778, this lained was celed in Capt Thomas Forrest by the sultan and government of Magindanao, the grant being written in

Spanish by a native of Pampanga, once a slave, but who obtained his liberty by turning Mahomedan Bunwoot is covered with tall trees, clear of underwood, and at the date of the grant was uninhabited There are few springs, but many ponds of fresh rain water, and the interior abounds with wild hogs, monkeys, guanas and small snakes about eighteen inches long. In this state it probably remains, as it never was taken possession of.—
(Forvest, &c)

Buragong.—A small town in the province of Agra, fifteen miles S by E from Jaloun Lat 25° 58′ N., lon 79° 20′ E

Burdaiwud —A small town in the province of Malwa, belonging to Ghuffoor Khan, which in 1820 contained 400 houses, nine miles and a half N.N.W. from Khachrode.

BURDCE —A town in the province of Gundwana, situated on the south bank of the Sone liver, here a very diminutive stream, thirty-eight miles S from the city of Mirzapoor 24° 36' N., lon 82° 27' E The Burdee fort is of stone, and stands on a high abrupt hill washed by the There is another small fort Goput. not far off, named Bhoparee Burdee Raja's territories are much intermixed with those of the British government, and in some parts are tolerably well cultivated, but in the vicinity of the chief town the surrounding country has a most desolate aspect -(J B Blunt, &c.)

Bundwan (Vanhdaman, productive)—A district in the province of Bengal, situated between the 22d and 24th degrees of north latitude. On the north it is bounded by Buboom and Rajeshaliy, on the south by Midnapoor and Hooghly, and on the west by Midnapoor and Ramghui. In 1784 this district contained 5,174 square miles, according to Major Rennell's mensuration; but it has since undergone various modifications, which have so greatly reduced its dimensions, that in 1814 Mr.

Bailey computed its area at only 2,400 square miles

Along with the other ceded lands it became subject to the British government so early as 1760, since which it has thriven so prosperously, that, in proportion to its extent, it may safely be considered as the most productive and populous territory of India It is environed by the jungles of Midnapoor, Pachete, and Bilboom, appearing like a garden surrounded The most valuable by a wilderness. articles are: sugai, indigo, pawn, cotton, tobacco, and mulberry trees, all of which have progressively increased in quantity. Many of the principal zemindars reside in Calcutta, and have then estates managed by agents. There are a considerable number of native meichants, who deal in tobacco, salt, grain, and cloth, and commerce has been greatly facilitated by the opening of three grand roads from the interior, Buidwan, although so opulent, not having the advantage of inland navigation, like most of the adjoining districts.

The original zemindary of estate, known by the name of Buidwan, came to the present family about A D 1722, and in 1790 paid a yearly ient to government of £400,000, but at present no property of any magnitude belongs to the raja, except the zemındary, greatly curtailed, and scarcely yielding him more than five per cent. on the land tax. The other chief, the Raja of Bissunpoor, has nothing left but his title, a great proportion of his estate having been sold for arrears of revenue, and the rest usually continuing under attachment from the same cause There are few villages here in which there is not a school where children are taught to read and write, but there are no regular schools for instruction in the Hindoo or Mahomedan law. most learned professors of the first are procured from the district of Nuddea, on the opposite side of the Hooghly, from whence and from Benares the other stations are also supplied. The Mahomedans bear a considerable proportion to the mass of

the Inhabitants, and receive their edia cation in the common branches from the village schoolmasters

In 1814 Me Bayley, then judge and magnitude of Burdwan endeavoured in ascertain with an approach to accursey the exact number of iolis bitante withia his jurisdiction prosecution of this undertaking the proprietors of every village were fur nished through the police officers of each du mon, with a form in the Ben galese language in which to in ert the total number of dwelling houses in each village, and the proportion respectively occupied by Mahomedans These papers were and lindoos. accordingly circulated, and after being thus prepared were attested by the proprietor or his agent and also by some of the most respectable village occupants no refuctance to commu meating information appearing on the part of any of these individuals. The result of these statements, when col lected and examined tended to establish the following facts, ea that in 1814 the Burdwan district contalord 262,631 dwelling-houses of which 218 153 were occupied by Hindoor and 43 781 by Mahomedane and nl iowing five persons and a half to each house that the total population of Burdwan amounted to 1 411 487 per FOD4

In 1814 the area of the Burdwan district as it then existed comprehended 2 400 English square mdes, giving on overa o of 600 persons per square mile The total population of England in 1611 gave on average of nearly 200 inhabitants to the square mile; but oo examining the county of Lancaster exclusively with an area of 1,800 square miles it then contained 856 000 inhabitants or 476 to the square miles and in the census of 1821 the proportion was above 500 persons (1) B Bayley Grant Colebrooke, &c )

Borowan .- A town in the provioce of Bengal the capital of the preceding district and head quarters of the government catablishment sixty mdes NNW from Calcutta.

lat 23 1 . A., ion 87° 57' F In 1814, when its elecumitances were Investigated by Mr Bayley, 7,631 houses were found inhabited by Ilin doos, and 2154 by Vahomedans, total 0,005; which, at the rate of five and a half persons to each dwel ling gave a total population of \$3,)27 persons The Burdwas rola lias a palace (a vast heavy pilo of hulldings) here where he usually resides, and also spacious gardens laid out after the native fashion; but with o sort of summer house fitted up after the English manner by the side of a marnificent tank .- (Il' B Bayley, Fullarton, (c)

Besch NOAR .- A town in the 11r derabad province, minety-seven iniles I from Ellore, iat 15° J V lon 61º 4 L.

Bears, Ooe of the Philippine fales Ising due south of I uzon lat 13° N., Ion. 123° 1 la extreme length it may be estimated at forty three miles, but the average breadth does not exceed nine Although this island is situated in the very centre of the Philippines and so near the great bland of I uson and its en pital Isudia yet in 177 it was possessed by a colony of piratical the Sprainrds not having been ablo to dislodge them Burras is sur rounded with rocks and shouls to u considerable distance. - (Forrest, fr )

Beavecoun .- A town in the province of Gujerat fifty-eight miles N from Ahmedabad; lat 23° 52' lon 79 30' E

Bus one -A small town surround ed by a strong wall and possessing a stone gharry, in the province of Malwo and pergunnah of Gungrar; lat 23° 47 N, lon 70° 52 L In 1820 this place contained 300 houses, and belonged to Zahm Singh of hotah. (Malcolm, &c)

Bunrunren .-- A town in the prorince of Ajmeer which in 1820 con tained 400 houses; five totles N by E from Neemutch

Bunnarcon,-A town of consi-

derable extent, population, and commerce in the Northern Circurs, district of Ganjam, twenty-one miles travelling distance S.W from the town of Ganiam The bazar is about three quarters of a mile in length, composed of good tiled shops; and there is besides an excellent street entirely occupied by weavers, and distinguished by the red colour of their huts. architecture of the Hindoo temples here (of which there are several) is peculiar, each temple being composed of a group of low buildings, in some instances detached, in others joined; but each with a sort of graduated pyramidical roof, terminating in an ornamented conical cupola. Juggernauth is the incarnation worshipped. When it became necessary to remove the government establishment from Ganjam, in consequence of its extreme unhealthmess they were transferred to this place, and cantonments erected on a high spot in the vicinity. —(Fullarton, &c)

Burrishor —A town in the province of Bengal, the modern capital of the Backergunge district, seventy-two miles S from Dacea; lat. 22° 46′ N, lon 90° 17′ E. It stands on the point of an oblong island, formed by the broad branches of the great Ganges, which here presents an immense expanse of water, and a wonderful facility of inland navigation.

Burnounda.—A small town in the province of Allahabad, thirty-seven miles S from Banda, lat. 25° 3′ N., lon 80° 37′ E.

Burseah —A town in the province of Malwa, twenty-four miles N from Bopaul; lat 23° 40′ N., lon. 77° 31′ E. This is the cusba or head of a pergunnah of the same name, nearly thirty miles in length and twenty in breadth; and in 1820 contained 315 villages, yielding the proprietor, the Raja of Dhar, a revenue of 77,445 rupees. The Salunkce Rajpoots occupy a tract in Burseah, extending along the right bank of the Parbutty; but the villages were in ruins, and the land covered with jungle. In 1817 this place was the principal

cantonment of Kurreem Khan, the Pindarry, in 1820 it was subject to the Raja of Dhar, but farmed to Bopaul, and contained 3,000 houses; but the surrounding country was thinly inhabited.—(Malcolm, &c.)

Burtapoor (Bharatpura). — A town in the province of Oude, 100 miles N by E. from Lucknow; lat. 28° 15' N, lon. 80° 53' E

Burudda (or Jaitwar) —A district extending along the south-western coast of the Gujerat peninsula, and situated principally between the twenty-eighth and twenty-ninth de-The coungrees of north latitude try, which is still known by the name of Burudda, and which composes the present territory of the Rana of Poorbunder, is bounded on the north by the Serteeannee river, which falls into the Meeannee by Hallaui the east it has the Burndda hills, and on the west the sea At present the chief towns are Poorbunder, Navyee, Bunder, and Meeannee, and there still exist the rums of a town named Ghoomty, the debris of which continue to attract the devotion and excite the curiosity of the Hindoos. The surface of the country is in general flat; the soil light earth mixed with rock, and not very 11ch want of wood, so common throughout the Gujerat peninsula, is equally felt here, and the water is in many places brackish By the conditions of Colonel Walker's arrangement in 1807, the chieftains of Poorbunder of Burndda were bound to pay the Guicowar an annual tribute of 30,000 rupees, which is quite as much as the district could afford.—(Walker, Publıc MS Documents, &c.)

Burwa.—A village in the province of Orissa, district of Cuttack, about thirty-nine miles travelling distance N by E from the city of Cuttack. A mile and a half to the south-west of this place there is a fine Mogul bridge of three arches, ornamented with four open square towers or pavilions, thrown across a small stream named the Narussua On the other side of the village, distant about a

mile to the ferre of the horsons a consideral le river crossed in decked lusts—(Fileries, Ir)

Brawait.-A town and semindary In the tensione of Haber di toct of Hamphur 240 miles 11 \ 11 from is totally named Harry Ba h and It the head-quirters of the llam but protocal rospe of sepore In lett the terntories of Hurry Hars Sabr were overron and competed to the util bourn, lists of agoois, and not being supported by his immediate autorior the lists of Chuta Age toor be was obliged to sul mit to the invader whose troops kent noticeson several years but retreated on learning the opproach of a British detachment under Colonel Jones Concering this to be a favourable opportunity, the Itags of Chuta \a. roor determined to attempt its reconquest that he stood not the least chance of success had not the lin tuh commander and the magnitrate of Hamelura hand the Harvahelief in aubmit on the assurance of per lie was in conseronal safety mence induced to trust lum elf in the hands of the raise officers who two days afterwards sent blm under exent to Isleute within a taile of which place he was taken out of his relanqueen and put to death in enld blood by the party guarding, who had been selected for this atrocious purpose. On this occasion no indired inquiry was instituted nor did it come to the knowledge of the Bengal government until 1807 so lmperfectly was this portion of our Eastern dominions aubdied or even explored .- (Roughsed r &r)

BONNMARY.—A large fown further phatures of Candelsh the residence of Helpa Blohun Singh lat, 22°4 N loo 74°58 E. It waurrounded with o double wall having o ditch to the outer one and encloung a gharry and palace, the latter alx atories high that the place generally fas na ruinous condition. The flur wannee district extends along the south bank of the Nerbudds and

ever be can My estimated at anty face males in levels by forty fire in levelsh a great proportion of which I contend with jumple and in a complete state of devolation; but of this space it is better that of devolation; but of this space it is better that it is completely a corrulerable strict. The tell colond of this elevated tract, interpreted with many pleasant valley comprehends the diamons of Bonts and Versaller which former ir contained criting two flowishing tunns and villeges; but of there to 15 0 only the vettiges remained, and the grous review of the large distinct amounted to only 16 000 research. (Molecole, 6:1)

Breakts (Barchar) - 1 proch pality lo northern lindostan occu tounded on two sides for the Sutulois and Jumps and extending exstward until it meets the district of linween and north including hunawur beand the snow y mountains of Himalara. It is named also Rishur, Res seer Biser and Itesansa, and in 1813 contained the foll wing subdistingut. 1st. hunswur : 2d the tract that in cludes Hampoor (the carital), and beran which tteetchet along the val ley of the Sutuleje with the smaller elene and raylnes that Irain into ite 3d, the valley of the Palour with all the terntory on its left bank, includ lo Sambracote Sowur Teckur and many other smaller sallies Dosau Is also one of the great divisions of Bussher to which state likewise the Tartar pergunnals of Hangarang belon\_s

The division that includes the glen of the l'abur river is by far the most productive as the Buwsher territoure but the upper part of that glen and of some others that converge into it on the north is generally lauren and savage, but for a distance of lifteen or iterity males above llacengodh, the Pabur runs comparatively through a level valley containing much corn load as does also the valley of Sambracote. The Natur and Teckur are next in firrithty, and also contain less or which is worked ond ex

ported to the Seik countries. The tract named Chohaia, or Swara, consists of paddy or low rice-lands, already cultivated to the utmost, and some ridges of invincible sterility. Besides the districts above-named, the Bussaher Raja exercises a sort of feudal superiority over several of the adjacent petty states, who purchase protection or forbearance with an annual tribute.

The staple commodities of Bussaher, are sheep, wool, cattle, ghee, and iron, some grain, tobacco, opium, and musk. The fruits are apples, bad pears, apricots, peaches, wild grapes, currants, and the eatable seeds of the From the grapes they pine cone procure a sort of strong liquor, much used by those who can afford to purchase it Their woollen cloths are of an excellent fabric, their wool being of a superior quality, besides much imported from Tibet With these materials they weave blankets of different sizes and fineness, cloth for trowsers, fine webs for waistbands and plaids, a sort of well-napped cloth named Seik cloth, and for the black bonnets which the natives wear as a covering for the head They also manufacture a small quantity of shawl wool, occasionally mixed with that of the sheep The trade of Bussaher, owing to its geographical position, has always been considerable, being an entrepôt between Hindostan and Tibet. from the first, sugar, cotton, cloths, small quantities of iron and brass ware, and indigo, the returns are iron, blankets, opium, a little tobacco, bang, and turmeric exports to Tibet and the Chinese territories, are grain to the more barren tracts, ghee, iron, opium, tobacco and wooden cups for tea, besides being the thoroughfare for all the commodities from the plains, such as sugar, sugar-candy, cotton cloths of various degrees of fineness, and in-The returns from the north are almost entirely wool, both shawl and the common sort, salt, a little tea, Chinese silks, musk, and boray. Prior to 1815, during the Gorkha sway, a great proportion of the traffic

with Tibet and Chinese Tartary passed through the Lahore province, the best roads being then through Chamba and Jellamookhee to Amitsir, and the next through Cooloo, by its capital Stanpoor.

This principality was subdued about 1810 by the Gorkhas under Ummer Singh Thappa, and remained subject to that nation until 1814, when it was freed by the efforts of the British arms, without any active co-operation on the part of the government or its inhabitants, in consequence of which a tribute of 1,500 rupees per annum was imposed. In 1816 its total revenue was estimated at 80,000 rupees per annum Of the population no rational estimate can be formed, but it is known to be scanty, and the climate for a considerable poition of the year in many tracts precludes cultivation.

Ooghur Singh, the late Raja of Bussaher, was only twelve days old at the death of his father and predeccssor Rooder Singli During his long minority the affairs of government were conducted by the Ranny mother, assisted by three viziers (whose functions are hereditary), the principal distinguished by the title In 1816, the reigning of Mokhtai raja being a minor, the principality was governed by a regency established under the authority of the British government: which, however, did not interfere with the internal administration of the country —(James Fraser, Lieut Ross, Sir D Ochterlony, Public MS. Documents, &c)

Busseah —A small town in the province of Bahar, district of Ramghui, 210 miles W N W. from Calcutta, lat 22° 58′ N., lon 85° 11′ E

Bussee—A town in the province of Ajmeer, principality of Jeypoor, about eighteen miles SW. from the city of Jeypoor. This town presents a striking and picturesque appearance to the traveller, owing to its white pagodas within, and old stone pavilions without—(Fullarton, &c.)

Bussee —A town in the province of Delhi, four miles north from Sillind, lat. 30° 37′ N., lon. 76° 25′ E

Bertan feell nedance).-A town and district in il e province of Count wans 170 miles from Ganjarit fat. 19 11 \ lon to 21 In vale tract has as jet been very haper feetly investigated, its difficult access and unhealths christe presenting no attractions to travellers while its poverty holds out to temptation to fiscal or n 1 1 sty rapecter The frountame of Butar and Luronde are branches of the great rune that runs north and south parallel to the lay of Beneal in the rear of Lutiack and the northern Circars. Herre (Bate a deeling) — A town in the protince of Oude distict of Goricpoor, forty nules west from the town of Correspoor; lat 27°4 > 100 p. 41°4

Biswator —One of the Calamano lides belonging to the Philippines situated about the tacilth degree of north latitude. In length, it may be estimated at 60% niles. By thurteen the axers e breadth.

Bi restras Isiano,—A lon greea bland in the harbour of Bombay al tuated between the islands of Ca runja and Sal ette

Butlet. — A native fortification in Northern Unidestau, twenty-cipht miles south of Serina urr lat 20° ab' N., Ion 78° 44 L.

Buront (Butout) — A small subdition of the Oude province which is within the British limits although the village of Butool from schence the name originates be within those of the Gorkins In 1802 a consi detable portion of the lands belooged to the Palpah Raja, and were tolerably well cultivated, principally by emigrants from the Oude territories, but on the cession of Gornepoor to the British this inigiation ceased, and the tide turned the opposite way. In 1812 the value of Butool and Sheoraj were assumed at 40,000 rupices per annum

The village of Butool is situated at the base of the hills on the west bank of the Tenny, lat. 27° 37' N., lon. 8.3° 31' E, sixty-four miles north from the town of Gornepoor It stands on the plun, and is the only place so circumstanced that was left to the Gorkhas west of the Gunduck by the treaty of 1815. In reality it is a most undesirable possession, for it stands in the recess of a mountain, and is so destructively unhealthy, that nohody remains there during the rainy season. Besides this, during the discussions preceding the treaty, it was clearly established that the town of Butool had never belonged to the Nabob of Oude, of course the British, who only succeeded to the just rights of that prince, had no claims to its pos-The Butool Raja formerly possessed extensive dominions among the hills, where he was known as the Raja of Palpa, but of these and his dignity he was stripped by the Gorkhas of Nepaul, when the wheel rose and rendered them predominant — (Ahmuty, Routledge, &c)

Butur —A Batta district in the island of Sumatra, situated inland from the bay of Tapanooly sists of the space between Silindung and Toba, an elevated tract of country apparently thirty miles long by twenty broad, bounded on the northeast by Toba, on the north-west by a range of lofty mountains running east and west, on the south-west by Silindang, and on the south-east by a broken hilly tract, extending southward to the hill of Angkola. whole plain is free from wood, and in 1822 presented a wide field of verdure, with detached straw huts and patches of mountain rice -(Burton and Ward, &c)

Bunan (Bagsar).—A town and fortress in the province of Bahar, district of Shahabad, situated on the east side of the Ganges, fifty-eight unles ENE, from Benares. The fort is constructed on a small mound of conker soil, which here projects into the river, and no where from hence to the sea does the Ganges flow through so confined a channel. The works are kept in good repair, and garrisoned by Sepoy invalids.

A celebrated victory was gained here in October 1764 by the Butish forces under Major (afterwards Sir Hector) Munro, over the united arnues of Shipa ud Dowlah and Cossini Klian The first consisted of 856 Europeans and 6,215 seposs, whom eighty-seven Europeans and 712 sepays were killed and wounded. The combined army was computed at 40,000 men, 2,000 of whom are supposed to have been slain in the bat-The fight of the allies was so tumultuous that they did not stop at Buxar, but hastened to a nullah beyond it, which being full, many were drowned and slaughtered in attempting to pass. The plunder was great, as they left their tents standing, and their whole train of artillery, consisting of 133 pieces, of various sizes was taken. A native historian (Gholaum Hossem) describes the camp of, the two chiefs while advancing in the following terms. " a bridge of boats being thrown over the Ganges, the allied aimies began their march, in numbers not to be reckoned, but, from the ignorance of their commanders and want of discipline, murdering and plundering each other was not an army, but rather a moving nation" Travelling distance from Benares seventy nules, from Calcutta by Moorshedabad 485 miles, by Birboom 408 miles - (Gholaum Hossein, Fullarton, Rennell, &c)

Buxedwar (Bakshedwara)—Arcmarkable pass leading from the belt of low land that separates Cooch Bahai from Bootan, lat 26° 52′ N, lon 89° 38′ E., eighty miles north by east from the town of Rungpoor in Bengal Buxedwar is a spot of great

natural strength and being a frontler station in this quarter has also been rendered strong by art In 1743 the village consisted of ten or twelve hoo es, invisible until the mament of entrance It stands on a second ta ble of levelled rock upon which there is very little soil jet it is covered with verdure in consequence of Its sheltered position surrounded on three sides by lefty moontains and open only to the south where the prospect looks down on Ben-al. The country coming from the south con tinues flat to the foot of the Buxed war hill The ascent to Santarabary is easy but the road afterwards becomes abrupt and precipitous; yet the hills are covered with trees to their summits At Santarabary are extensive orange groves and raspberry bushes are found in the jun les. - (Cant Turner &c)

RUXWAIL—A town in the province of Allahabid twenty milesnorth-west from lightsh ; lat. 24° lo \, lon 70° 16° E.

Boxyarvar (Bakilegasi) — A town in the province of Bengal district of Disseption eights four miles N F from Moorphedabad

Brortt.—A town and small per gunnah in the province of Bergal ninety five miles north from Moor shedabad; lat. 22° 32° N., lon 85° 10° E.

BYGONBAGON (Facenthe Bari).—A town in the province of Bengal distract of Mymunsingh attented on the west side of the Brohmspatra seventy five miles north by east from Dacca lat 24° 46° N., Ion 10° E This place was the head-quarters of the district for sime time, after its formation but at present the actual residence of the judgo ond inagistrate is at Nussembad eight miles further south. In 1821 it contained one in digo factory.

Broank.—A towo in the Hydera had province, forty nine miles north from Cummumant 1at 17°57' N., Ion 80°24 E

Rysaches (Initegiar) - Ytown In the province of Conclusion, seven ty fire miles b W from Sumt hal mort lat 20' 15 \ lon, 82" 55 1 This place formerly belonged to Chands, and the country still bears that name, although they subsequent ly became separate governments. In 1794 it contained 300 thatched and tiled houses and was considered by the Valurattas to whom it then belonged as a strong place. It had then nature fort on the north west aide under the cat face of which runs the hobregue a stream that afterwards joins the " siny or llaumgunga. At the obove dato Byraghur was a place of some traffic, principally in cotton from the interior which was carried to the sea-coast of the northern circurs and exchanged for salt betel and cocoa-nuts.-(J Il Illust de)

Resaults —A large village in the province of Ajnicer instrict of Har rowty which in 16°0 contained 1,200 lahalutonts; fire nules west from Dilanpoor

BYRANCHAUT.—A town in the province of Outle, situated not the west side of the Go., "ta, thurty-six males E from I neknow I Lt. 27° 6' N., lon. 81° 21 E.

Braatis.—A pass in northern I in dostan thirty-even miles east by north from Annu and 7,599 feet obove the level of the sea; lot 30° 3.5' N ion 77° 55 L.

BYBRIA.—A town in the province of Malwa, sixteen miles from Oojeio In 1820 it had a gnod bazar ond contained obout 1 000 houses.—(Moleola, de)

BYTUBWE (Initiately) Riven.—A river of Cuttack, which ranks accorded offer the Mohoouddy It rises in the mountainous region of Chuta Nagpoor in the province of Balar and after a course of between 740 and 400 miles and receiving various contributary attents joins the Bay of Bingal a little to the north of Point Palmyras.—(Fullarion &c)

C

Cabo -A rocky promontory at the western extremity of the island of Gon, opposite to the fort of Alguarda, and the site of the ancient Portuguese church and monastery of Nostra Senhora del Cabo. This spot commands a magnificent view of the harbour of Goa on the one side, and on the other the bay of Marmagra, studded with islets and white monastic buildings. There are also several large convents between this point and Panjim, or new Goa, while the intermediate country presents one continued grove of cocou-nut trecs.—(Fullarion,  $\delta c$ )

## CABUL

The kingdom of Cabil, while flouushing, comprehended the greater part of Afghamstan, but at present it is difficult to establish its limits, or even its existence. Assuming its extent as described by Mr. Elphinstone in 1809, we find it bounded on the east by Hindostan (where it possessed Cashmere, and some tracts on the left bank of the Indus, on the south it may be roughly considered (including tributary countries) as bounded by the sca, on the west a desert extends along the whole fiontier, its northern limit is marked by the mountains of the Eastern Cauchsus According to the nomenclature of the latest maps, it includes Afghanistan and Segistan, with part of Khorasan and Mekran, Bulk, with Tokarıstan and Kılan, Caffristan, Cabul, Candahar, Sinde, and Cashmere, together with a portion of Lahore, and the greater part of Mooltan total population of these extensive regions, in 1809, was estimated by Mr Elphinstone at fourteen millions, in the following proportions, viz

rians, Juts, &c) ..... \$ 3,700,000 Miscellaneous tribes ..... 300,000

Total ... 14,000,000

With respect to its geography, the modern province of Cabul (occasionally named Zabulistan) is divided into two parts, separated by a ridge of very high mountains, usually covered with snow, which runs from east to west from the neighbourhood Gluzm to that of Deenkote Distant as the time is, however, so little has it been explored, that the best description of this romantic country, the cradle of so many of the conquerors of Hundostan, is that given by the Emperor Baber, in his personal memoirs, where he treats of his adventures from AD. 1500 to 1510. The northern tract is named Lughmanat, the southern Bungishat, each having one or more considerable streams intersecting their whole The valley of the Cabul rileugth. ver separates the southern projection of the Hindoo Cosh, from the Solman mountains on the south; the interval having the appearance of a breach in a continued cliain once formed by these ridges The brench between them is in some places twenty-five miles wide. This valley towards the east is occupied by hills that stretch from mountain to mountam, but with inferior elevation. West of these hills is Jellalabad, and still further west the surface rises so much, that although Gundamak be in a valley with respect to the southern projection, or to the lofty eminences of Soliman, it is on a mountain when compared to Jellalabad The Cabul river flows through the centre of this space, and into its basin all the vallies in this quarter of Hindoo Cosh open

The aspect of Cabul is highly diversified, being an aggregate of snowy mountains, moderate sized hills, and extensive plains and forests; but from the city of Cabul to the Indus there is an invariable deficiency of wood. The principal towns are Cabul, Peshawer (the modern capital), and Ghizni The central districts about the first, possessing few Indian commodities, receive sugar and cotton cloths, mostly from Peshawer, whither they send leather, non, and tobacco To Candahar are exported iron, leather,

and lamp oil, whence the returns ore made in sundry manufactures of Persis and Europe The Tortiars of Bokbers bring to Cabul the horses of Turkstan furs, and hides the latter resembling those in Europe termed Bolyar; the proceeds are invested in lodigo and other productions of Ilindostan

In A.D 997, when Cabul was Invaded by Schnetaght the first sove respool the Ghizni dynasty, the east ern section of the province although west of the Indus was still occupied by Illindoos subject to a prince of that religion named Jypal, whose capatal was named Batinds, and whose domimoos extended in a north west direction to I u himanat, and in a south-east line from Cashmere to Mooltan The whole was finally subdoed by Sukao Mahmood about A D 1008 and its subsequent history will be found under the articles Ghizal and Afghanistat In modern times Cabul attracted attention in 1809 when the French projected the lavasion of Handostan through the Afghan dominions to consteract which, Mr Elphinstone was sent to Peshawer by the Bengal government and con cluded arrangements which completely neotralized the projected expedi In 1826 Cabul was partitioned amongst the sons of the lote Vizier Futten Khop who were olways of variance, Elphinstone, Forster Rennell &c)

Castl—A city of Afghanistan the cautial of the Cabul province; lat. \$4° 10′ N lon 60° 18′ E. By Abul Focel, in 1582 it is described as follows "Cabul is a very encent and beautiful city, of which Fushing is said to be the founder There are double walls of considerable strength, on the south-cart side of a smoll hill maned Shah Cabul From early satiguity Cabul and Condahar have been recknood the gates of lindostan; one affording cotrace from Tooraun the other from Iran

The modern city of Cobul is the capital, and usually the residence of the Durrany sovereigns of Afghanis-

It stands in a plain simudently watered, and interspersed with walled It is divided by the Cabul villages ence, and in its vicinity has mony groves and gardens, especially on the north and west The most pleasing spot is the tumb of the Emperor Baber, which stoods on the top of a hill over the city, commonding a noblo The town is compact and TIPE handsome, but not of great magni tude It is enclosed on three sides by a semicircle of law blik, protected on the top by a wall of little strength Oo the east there is an opening forprincipal road enters by a gate after passing over the virer on o bridge The Balla Iliesar, which stands on that portion of the hill north of tho entrance is a kind of citadel, contain ing the king a palace and there is also an upper citadel used as a state prison

Ale Merdon khan o celebrated Mogul sovereign of Jehongir's reign crected in the centre four spacious bazara, two stones high nrehed over and supplied with fountains now choked up with fifth Owing to the frequency of earthquakes, most of the other buildings are of wood. Tho bazars are well sopplied and the town while the sent of government was an emporum of considerable trade, frequently erowded with Us-beck Tartars resembling to feature the Chinese and Majos but with a horsher expression licro is olso to be found o colony of Arrocolons captured by Nodir Shah during his Turk ish campaigns. Mony Hindoos fre-quent Cobul mostly from Peshawer and as by their industry they cootribute greatly to its prosperity, they ere carefully cherished by the Afghan government.

This chy heirg lower thon Ghlznl, and more enclosed by hith does not suffer so much from extreme cold, the winter not being severe, while it is steader than the winter of Log land; but, on the hot ofter hand the heat of summer is much more intense. The climate and scenery of Cabul have been celebrated by mony poets

x 2

of Persia and Hindostan, who extol the beauty and abundance of its flowers and fruits, the latter of which, when dried, are transported to the remotest parts of India. Travelling distance from Delhi, 839 miles; from Agra, 976; from Lucknow, 1,118; and from Calcutta, 1,815 miles—(Elphinstone, Foster, Reunell, &e)

CABYNA—A small island about twenty-one miles in length by fifteen in breadth, lying due south of the eastern limb of Celebes; lat. 5° 18′, S, lon. 121° 53′ E.

CACHAR (or Hairumbo). — The province of Cachar, or more properly Harrumbo, hes within lat 24° to 27° N, and from 92° to 94° E., comprehending an area of about 140 miles from north to south, and about 100 from east to west; on the north it is bounded by the Brahmaputra river and kingdom of Assam; on the west by the territory of Gentiah, on the south by Silliet and Tipera; while eastward it extends to the small principality of Munipoor. The ancient and peculiar distinctive name of this territory is Hairumbo, although the inhabitants are described as Cacha-The province comprehends two divisions, that of Cachar Proper, which borders on Bengal, and that of Dharmapoor, which lies north of the main ridge of mountains, which are difficult to pass. The ancient capital of Hairumbo was Grobarge, situated about lat 25° 45' N, and twenty miles north from Cospoor, the modern capital It is separated from Silhet by the Dullasery nullah and the Soorma or Barak river

The principal rivers of Hairumbo are the Capili and the Barak, both of which spring in the eastern mountains, and ultimately join the Megna, carrying with them the waters of nearly all the smaller streams. The tract of country lying under the mountains abounds with bogs and marshes, and during the rainy season presents several large sheets of water. The mountains are covered with forest trees, long glass jungles and occasionally bamboos. The northern

mountains are a branch of these, called the Garrow mountains, those in the south and south-east are a contimuation of the Tipera hills, which after stretching northward as far as Cospoor, turn abruptly to the west until they meet the Brahmaputra. The height of these hills is from 600 to 1,000 feet; but the faces of some of them towards the west being precipitous, many small waterfalls are seen. Through these mountains there are said to be three passes, practicable at all seasons of the year: two leading to Dharmapoor, and the third to Cospoor. So savage and maccessible a country requires few artificial fortifications, yet there are said to be some redoubts and stockades About forty miles to the south-east of Cospoor are the Bhavani inountains, through there is a pass leading which to Munipoor and the kingdom of

This country being much overrun with jungle, there is a great want of This, however, as practicable roads. far as commerce is concerned, is compensated by the internal navigation the Barak affords, along which the British troops and stores always moved in boats. The breadth of this river varies in different parts of its course, at Tilyn it is 150 yards broad, but where the road from Attingah to Acquee closses it, only seventy In the dry season it is fordable in many places, but soon after the commencement of the rains it rises rapidly, and has then thirty to forty feet depth of water. At Ilchar, near Doodputlee, a number of broken rocks reach across the channel, and during the div season cause rapids; but in the rains they are covered with twenty feet of water. The Barak begins to rise so carly as February, but meeting no check from the Megna, runs off immediately, so that there is no permanent inundation until the beginning of June, after which the country remains almost implacticable for an army until November, indeed, from the middle of that month until the end of February is the only fit season for military operations.

The population of liarumber le scants in proportion to its area; one estimate probably much expressed. states it at MO Ood families. The ment normious tract is in the lettl eventry adjacent to 1) armspoor and in the parts most continues to Bergal. The resenues of Halronden were for merly estimated at one lack of tupets per annum but in 1417 had dwindled down to 30 000 papers. Among other source of resence to the Carlor Rais are the produce of certain sait rate, which not only farm he quen isty equal to the wants of the principainte but also a surplus for exporta-The other exports con at of commodities the indisenous products of the country such as the course silk named Moon, and Tuser, wat, cotton thinker, limestone and from ore which last they have not yet learned the art to fuse and consert into a metalise state

The inhabitants of both seves are strong and robust with continuous more of a Chinese than Ben aleve aspect and in complexion fairer than the latters they have no peculiar written character having lorrowed that of Bengul se well as its laneaure The original Halrumbian dialect to said to have been mone allabie, but it may be said to be now estinct such of the inhabitants as ean real apply themselves principally to the iegendary and mythological poems of Bengal The Cacharies are a nu meroos tribe who are scattered over this quarter of Asia, although the name is usually limited to the petty state of Cachar which although fer tile is tldnty inhabited, and much overgrown with jungle Before the reign of Harl Chandra about A 1) 1780 the distinction of caste was unknows , but during his reign the brak minical system of religion was introduced and of course the sacerdatal superiority Durga the wife of hive, is the unnernal object of adoration under various characters but more especially under that of Cale a destructive female energy, whom they are said occasionally to propitiate with human sacrifices; the guardian drive however, of Halrombo is said

in ter Hamelan ira. Cather was first intaded I'r the Barmese in 1774 daring the reign of Phemisians lest their troops being seized with the invele fever a discuse fatally known in the Heinh army the detachment was di persed cut off to detail or pers led by di case seemdesped ton from Asa was more successful the Italy being so butimidated that bee dee the payment of a sum of money he engaged to semi a mailen an I also a trre with the roots bound in the native clay as an on equipocal track of subjugation It is erelal le that the flurmere soon after cracuated this neproftalle country, as ne do not hear of them until 1410 when they a son interfered with the affairs of Cacher having previously placed Margeet on the throne as a tributery In 1410 they summoned I lm to Asa but declining compliance limpoor was esptared by the Bir mese, and Marject returing into Cachar with 5 000 fillowers expelled Gorand Chandra (who had in his ser rice Cumbheer blight the brother of Marreet who betrayed him), who fled into the Post h territories. Chootsect (the brother of Maricet and Gumbbeer bin, h) afterwards ex pelied all the others and governed Cacher for five years, in then find ing himself quite unable to control his own suljects or resist the Bur mese he nilered to place Cachar under the British protection which was conceded; but before the treaty could be concluded he (Marjeet) was expelled by Gumbheer Bingh and retired to Silber The negociation was renewed with Gumbheer Sing but after much evasion he withheld his consent even when a Burmese invasion was impending confiding in the natural difficulties of his country and believing that he would always be sure of the all of the Briti h govern ment It was then determined to restore the legitimate raja Govini Chandra, the descendant of Rais Arishna Chandra, who had governed Cachar for forty years, and ostign pensions to the Munippor brothers.

Marjeet and Gumbheer Singh, the last of whom, on the advance of the Burmese, in January 1824, fled into Silhet. A British detachment now penetrated the Cachar province, and after several sharp actions, expelled the Burmese, who subsequently at the treaty of Yandaboo, relinquished all pretensions to the province, or any right of interference, its Raja then became wholly dependent on British protection, for which he agreed to pay a tribute of 10,000 rupees per aunum.—(Friend to India, Public Journals, Symes, &c.)

CACHAR.—A town of India beyond the Ganges, province of Tunquin, of which it is said to be the modern capital. It stands on the river Tunquin, about 120 miles from its mouth.

CAFFRISTAN —An elevated region to the north of the Cabul dominions, which occupies a great part of the Hindoo Cosh mountains, and a portion of those of Beloot Taugh On the north-east it is bounded by Cashgar, on the north by Badukshan, and on the north-west by Koondooz, in Bulk. On the west it has Inderaub and Khost, also in Bulk, and the Cohistan of Cabul; on the east it extends for a great distance towards the north of Cashmere, where its boundary is not distinctly ascertained. There is a curve which is observed from the south of Hindoo Cosh, which rises over Bijore. This projection, with the nearest portion of Hindoo Cosh and some of the neighbouring branches, is inhabited by the Siaposh, or black-wearing Caffres. The ascent to their country leads along frightful precipices, and through deep and narrow chasms, where the traveller is endangered by the rocky fragments that roll down from above, either loosened by the wind and rain, or by the goats and other wild animals that browze on the overlianging cliffs. Caffres inhabit narrow, but rieli and pleasant spots, producing abundance of grapes, and for the most part surmounted by snowy pcaks. The Caffre country extends beyond the western angle formed by the curve, and the ridge that proceeds to the west, until it disappears among the Paropamisan mountains

The whole alpine region of Caffristan consists of snowy mountains, deep pine forests, with small but fertile valleys, which produce large quantities of grapes, both wild and cultivated, and furnish pasture for sheep and cattle, while the hills subsist numerous flocks of goats. Grain, as an article of food, is inferior both in quantity and importance, the commonest kinds being wheat and millet. The roads are only fit for foot tratravellers, and are often interrupted by rivers and torrents, which are crossed either on stationary wooden bridges, or by bridges swinging on ropes made of the pliant withes of some tree. The villages are built on the slopes of hills, so that the roof of one house forms the path leading The valleys are to the one above it. said to be well-peopled. that of the Camojee tribe, containing ten villages, had one named Camdesh consisting of 500 houses.

This people are named Caffres or infidels by their Mahomedan neighbours, and their country Caffristan; but among themselves have no general name for their own nation, being divided into many tribes, each having its peculiar designation. Mahomedans call one division black infidels, and another white infidels: but both epithets are taken from their dress, the Caffres being noted for their fairness, and the beauty of Those of the their complexion largest division wear a sort of vest of black goat skins, while the lesser There are dress in white cotton. several dialects among the Caffres, which have many words in common, all having a near connexion with the Sanscrit, which derivation renders their conjectured Greek origin extremely improbable, neither do their traditions furnish any satisfactory ac-The most count of their origin eredible is, that they were expelled by the Maliomedans from the neighbourhood of Candahar, at which era they are said to have consisted of

four tribes, named Camore, little Star and Comple. The three first are reported to have become constrict to the Vishomedan reigion; while the last, addering to its ancient to emprated from their nature courty. One peculiarity amon, the Caffres rangement of numbers is that they count by scores lostead of hundreds, and that their thousand which the call hy the Pervian and Afghan name; on its of 400 or their woore.

Be their neighbours, the Af. hone. the Caffres are said to believe in one Cod named by the sillacere of Lam desh, Imra. and by those of Tac-Loor Darang but ther also worship many idola, which they are renerent erest men of former days, who to terrede with the Deity lo fatour of their rotaries; in this respect consending with the Jame and Buddhists. The idols are of stone or wood, and always represent men or women, mounted or on foot the Caffre rantheon, however is not of difficult secres in Camdesh nno of the larrest villa-et a principal fuhabitant remouned for his hospitality and g wid cheer during his infesting erected a statue to himself which on his decease was as much worshopped as any of the more ancient gods in his tribe senerated. This facility of der fication must answent the agercaste number of gods but many must be confined to particular localities and tribes accordingly the gods of Camdesh appear quito different from those of Tsokooe although there is one common to both The chief ends or deified heroes of Cam leals are 1st. Bulicesh (probably Bhaneas or Brechus); 2d. Mani, who ex pelled I oosh or the evil principle from the world 1d Urrum: 4th Purson: 5th Geesh: 6th seven brothere having the appellation of Poro dik who were created from a golden tree, and had golden bodies 7th seven golden brothers of the same description 8th Koomsee by Mahomedans called the wife of Adam; 9th Dessaunce the wife of Gresht 10th Dolice ; 11th Sunjoo (probably the sun): 12th Ashtee

On the other hand the code of Tackooe are Maunie (perhaps Mani beforementioned) Marraut Morra socre and Inderjee (probable the Ilmion deitr Indra); and ide these names, many of their rates have a Handon ekaracter : but their enting leef and aprinkling with blood, even that of cour, cappot be reconciled with the Brahminical relation at though fire be a recol lie at every ceremony, ar I some of these idols have a resent fance to the lineam or emblem of hera. The Caffres have a herediary priesthood but their influence is not errat. They detect f. h which from the inland and mountainous nature of their country, they can but seldom have an monortunity of seeings but they hold no other anumal Imputer carine industrumente to beef mution and the fich of bears. There feet hale are often accommanical with a sacrifice and siwars with a fruit but many of their other caremonies have no connection with reheson. A wife is procured by pur chase from the father which sometimes amounts to twenty cows. The females are not concealed Adultery is not much tenrolated although there is a punishment coacted for it Herldes their wites, the rich inhabi tants of Calinstan liste male and female slaves, who are also Laffres for in their wars with the Mahomedans they take no prisoners. Some of these slaves are captured in battle from hostile takes tothers from tribes with which they are at peace; but the greater proportion belong to their own tribe it being quite common for nowerful men to sesso on el sidren. and rither sell them to the Mahomedans, or retain them for their own service. A person who loses his relations is soon made a slave Afghans purchase Caffres for slaves and some are made presences by the Insephrei tribe on the borders of Caffristan ; but the trade between tho two countrice is in other respects The captives ore generally triffing females who are much sought after on account of the remorkable beauty of their nation

The civil and political government of the Caffres is almost wholly unknown. It is uncertain whether or not there are any magistrates, the probability is that there are none, and that the public business is carried on by the chief men of each tribe, where the law of retaliation is firmly established They have no honorary titles, but have borrowed that of khan from the Afghans. Their property consists mostly of cattle and slaves. In 1810, at the village of Camdesh, one rich man possessed 800 goats, 300 oxen, and eight families of slaves. Among the black-wearing Caffres, the dress of the lower classes consists of four goat skins, two forming a vest, and the other two a sort of petticoat, with the hair outside. Until they have slain a Mahomedan they go bareheaded, shave their heads except a long tuft on the crown, and wear beards four or five inches long The dress of the women differs little from that of the men, except that their hair is plaited on the top of their heads, with a small cap over it, round which is a turban They have also silver ornaments, and many cowry shells. Both sexes have earrings, rings round their necks, and bracelets, sometimes of silver, but more frequently of pewter or brass The Caffre funerals differ in many respects from those of other nations When an individual dies he is dressed in his best clothes, extended on a bed, and his weapons placed beside him. After being carried about for some time by his relations, the male dancing and singing, and the female lamenting, he is shut up in a coffin and deposited in the open air under the shade of trees, or some other appropriate situation.

The Caffre dwelling-houses are generally of wood, and they have others where they keep their cheeses, clarified butter, winc, and vinegar. In every house there is a wooden bench fixed to the wall with a low back to it, and there are stools shaped like drums, but smaller in the middle than at the ends. Partly owing to

their dress and partly to custom, the Caffies cannot sit like other Asiatics, so that when forced to sit on the ground they are compelled to stretch out their legs like Europeans. The stools are made of wicker-work, and they have also beds constructed of wood and thongs of neat's leather. Their food is usually cheese, butter, and milk, with bread, or a sort of suet pudding; but they also eat flesh, which they prefer half raw. Their fruits are walnuts, grapes, apples, almonds, and a sort of wild apricot. Both sexes are said to drink wine to great excess, of this they have three kinds, red, white, and dark-coloured, besides a sort of a jelly consistence, and very strong. They drink during meals, and when elevated become quarrelsome. They are all exceedingly hospitable, hunt but little, their favourite amusement being dancing, which is prosecuted with great vehemence by all ages and sexes instruments are a pipe and tabor, their music quick, wild, and varied.

One of the most distinguishing characteristics of the nation, is their unceasing war with the neighbouring Mahomedans. The latter frequently invade their territories in small parties, and carry off slaves, but about 1780 a species of general crusade against them was undertaken. The Khan of Badukshan, one of the princes of Cashgar, the Padshah (king) of Cooner, the Bauz of Buore, and several Yusephzei Khans, having confederated, formed a junction in the heart of the Caffre country, but they were unable to retain possession, and compelled to evacuate with considerable loss. The Caffre weapons are a bow about four and a half feet long with a leathern string, and light arrows of reed with barbed heads, which they sometimes poison. They wear a dagger on the right side and a sharp knife on the left, along with which they earry a flint, and tinder made of bark They have also begun to learn the use of swords and fire-arms from their Afghan neigh-Sometimes they attack their enemy openly, but their usual mode

Is he ambu h and surprise On many occasions they give no quarter lint their chief ginty is the destruction of a Mahamalan as until a soune Caure has performed this exident he la perciuled from variou prisileres. There customs in this respect and some others greatly resemble those of the Carron mountaineers on the portheeastern frontler of Beneal soleran dancer in the festivals of a minaut each man wears a turtun into which a lone feather is stuck for every Mahamedan he has slain; the number of bells which he is an thoused to west round his was t lie also regulated in the same catso. A Caffre wim has not killed his mao w not permuted durin, the dance to flouresh his are above his brad. buch as have the good buck to kill a Mahomedan are to ned and concratulated by their neighbours, and have afternants a right to wear a little red woollen can, or cockade tred to his head those who have also many may erect a high pole before their doors, in which are holes to receive a pin for every lahomedan the owner has destroyed, and a ring for each he has wounded It is said however that notwithstanding the inveteracy of their fiatred they sometimes conclude a truce or perce with the Mahomedans accompanied by strance ceremonles.

Such are the principal details that have reached us of the manners and customs of these Asiatle Caffres? but or the information comes to or through the medium of the neith bouring Mahomedans at once the objects and parrators of the ollered barbantles at must be received with considerable allowance for exaggeration more especially or the same authorities inform us that the Caf fres ore in general a harmless, affec tionate warm-hearted people who although quick and passionate are easily appeared and naturally gay and sociable and kind even to Mahomedans whom they odmlt or guests to abare their hospitality By old Mahomedan writers this tract is frequently termed Kuttore, and the ca-

colulor of Timour to the mountains of hattare is particularly related by Sherifolia From his partialse it accounts that Timour first proceeded from Radokihan to haunk or hba well the furthest or most exstern of the passes lealing through the Handen Losh mountains late the recoince of Cabul In order to at the at the fortress of hutter he eroused several sances of high moun tains rising one above the other. some of them covered with snow The forters was sugated at the foot of the further rance hasles a river of great depth and ray lday close un der ha walls and I Johnstone Se )

Caseas livres —The Camphylis non Lambali is a condierable stream four rulles up at of Ambalia in the Dribl province towards building, out is falle into the Dresh leating on the Casear which is the common sirilation of the cast and north west divisions of Illin Instan according to a passage in the commontanes on the Aclas—Ill Jefon § 7).

Cautear (Caloler) — A small principality (named by Abul Farel Ghabiner) in northern Hundostan situated on both banks of the Sututicip the exputal of which Belaspoor atan is in lat 31° 14 N., Ion 76° 47° E., pecurity miles N.E. from I udeana. Its chief is also frequently named the Belaspoor Unia.

named the Belaspoor Ilaia, In 1803 the nos counns of Cabloro were reduced to the caultal and per gunnah of Tuhawat the rest hasing been sessed by the Ilindoor Ilaja, Subsequently, by the as Istance of the Corkhas Raja Mahachond of Cablore recovered all the twelve lords slips and restored the principality to nearly its former magnitude; but in 1807 Ilunjeet Single of Lahore again stripped him of a large portion of his territory During the Sepaulese war the country of lielsmoor was left en tirely at the mercy of the British army when General Ochterinny of fered terms to the Califore Itaja, who had adhered to the Gorkhas with ex emplary fidelity which he joy fully accepted, and having ever since per

formed his new duties with punctuality, has been exempted from tri-In 1816, Cahlore possessed on the east of the Sutuleie (the only tract guaranteed by the British government) the forts of Ruttunghur, Bahadurghur, Futtehpoor, Taem, The revenues beyond and Mookur the Sutuleje were estimated at 32,000 rupees, east of it 28,000, making a total of 60,000 rupees The inhabitants of this little principality are of a more martial disposition than those of Hindoor and Baghul. Every Cahlorian zemindar possesses a sword, and almost every village contains some fire-arms -(Lieut. Ross, Public MS. Documents, &c)

Cailas Mountains —This lidge of high mountains is situated about the 31st degree of north latitude, slanting to the north-west and south-east, and almost parallel to the Himalaya, but its eastern and western limits are unknown. West from lake Manasarovara for about two hundred miles, the separation is very distinctly marked by the course of the Sutuleje, the intervening space, from thirty to forty miles in breadth, being the valley through which that river flows to the north-west, until it winds to the south, and penetrates the Himalaya at lat 32° north. It has been thought by some that the northern ridge is distinguished by the name of Cailas, while the southern retains that of Himalaya, but the mountaineers make no such distinction They, as well as the dwellers on the plans, appear to call every high place crowned with snow, Callas, and apply it equally to the southern and to the northern rıdge

It is probable that the Cailas range is little, if at all, loftice than the Himalaya, but behind the surface evidently declines, as the waters there have a northerly course through Tartary towards the icy sea of Asia A lofty peak on the north-west, covered with never-melting snow, is supposed to be the favourite throne of Siva, who must find it rather a cool seat at any season of the year.

Some mountain torrents rise in the Cailas range, and disembogue into the Rawan Hrad lake. The principal of these are the Siva Gunga, the Gauri Ganga, the Dharchan Gadra, and the Catyayani.

The portion of Tibet between the Cailas and Himalaya mountains appears to be a sort of oblong tableland, yet studded with irregular hills and ridges, some covered with everlasting snow, others only partially concealed, but the whole bare of verdure, rocky and barren The intervening vallies are of a better description, and afford, during the height of summer and beginning of autumn, pasturage to the flocks of the inhabitants, who, with the exception of a few gylums (monks) and their associates, seem to be migratory, as on the approach of winter they seek refuge with their cattle in a milder climate During the whole summer the heat is such as to admit of their raising a small quantity of grain, but not sufficient even for the few inhabitants of this desolate region; which on the other hand is rich in gold, and probably other metals, and steams with springs, hot, saline, calcareous, and sulphurous This tract also includes the two holy lakes of Manasarovara, and Rawan's Hrad, and with the Hindoos the whole is sacred ground, on account of its sterile soil, horrible climate, and difficult access.

CAITHAL —A town in the province of Delhi, which in 1817 was the principal town and residence of the Seik chief Bylal Singh, lat 29° 49′ N. It is mentioned as one of the marches of Timour on his route from Samana to Delhi.—(Captain Hodgson, &c)

Cajori River —A large branch of the Mahanuddy river, which separates at Cuttack, and terminates principally in the Alankar, which is deep and narrow, and pursues a singularly winding course, until it is lost amidst a variety of lesser ramifications. About half way between Cuttack and the sea the Cajori sends off a large

branch which after dividing doubling on itself and again branching out into a july rinth of fantactical intri encies enters the sea at last in a broad chaonel, about forty mi'ce north of the black popoda, under the appellation of the Del-nuddy Annther large stream leaves the Mahanuddy opposite to Curtack, and after wards separates into three principal streams the Bhargals Data and houndes which flow south focusing a little to the cast The last enters the are between the black rapods and Juggernauth The two first unliving again into one channel discharge their waters loto the Chills late called by different names at different stages of their coone and finally the Harehunds During the heavy runs of 1417, the waters of the Cajori rose eighteen feet in one night overtopping the general level of the town and station at least six feet. Sim ling fe)

Calmanter lists.—A number of small island in the eastern seast belonging to the l'Mingdiare situated half way between "findoro and the island of Palsann about the twelith degree of north latitude. The two largest are named Busargon and Calamaine the last leding about twenty-littee miles long by fire in breadth. The cosst around three islands is atterweed with numberless ahoals rocks and fragments of islets, that tender the navigation dangerous.

CALAMORE—A town in the provace of Labore where the emperor Acher on the death of his father Humayoon, io 1559 was first proclaimed. Let 32°1 N., ion. 74°53 E., thirty nules north from Amittar

CALANTAN.—A petty state on the cast crast of the Visiny pennuls, extending from the river Bavut to that of Banara, where it borders on Patna. It comprehends fifty multimate of 50 000 inhabitants besider Lineae It exports gold tim ond perper; the second to the amount of 4,000 pruis and the last to 12,000 incuis annually.

Besides those Chinese who are other wise occupied it is said that within the three states of Pahang Tringanu and Calantan 13 000 are engaged to working the gold miner from which they extract to the valor of 420 000 dollars yearly A great portion of this goes to bingspoor, and another across the mountains to Persang an i Malacca. (Singapore Chronelle 4c)

CALBUCKNETCHURA—A fortress occupying the summit of a hish mountain in the presence of Brigapon, about twenty three miles travelling dutance west of Brigam. It was acquired from the I rishwa, and in Ikid was partisoned by a small party of British sepoys. At the base of the mountain stands the hamilet of Patin.—(Fallorton §c)

CALAYAN.—A small island in the ca tern seas one of the Thilippines twenty-three miles in circumference, intusted due north of the large island of Luron or Luçonia.

CALTEROA (Calbarga)—A town in the practice of Receder the rapidal of a dutrict, pituated 107 miles west from the city of Hydrahad; lat 17° 19° %, loo., 26° 50° 1 This is now a place of intile note inst was famous in ancient times in time per the capital both of o limidoo and Nahomedian sovereight. Bajas of Calberga are mentioned as independent princers when the Directo was intraded by Aliah and Deen in A 11° 1290; and when the founder of the Blasmeter of yansty recreed this standard of rebelion in 1747, this was his capital (Excitata, Sect.), 60°).

## CALCUTTA (Calicata)

This city is attested about 100 miles from the sex, on the rast alde of the western branch of the Ganger, or Calcuta rure, host by the matres the Bhagrathi and true Ganges and contidered by them previously holy Fort Wilsam its citatial stands in lat. 22° 23 N., ion 88° 29 L

The locality of this cupital is not fortunate, for it has extensive muddy lukes, and un unmense forest close to it, and was at first deemed scarcely less unhealthy than Butavia, which it resembled in being placed in it flat and marshy country. The English, it lms been remurked, are more mattentive to the local advantages of situation than the French, who have always, in India, selected lietter stations for founding their foreign settlements. The jungle has since been cleared away to a certain distance, the streets properly drained, and the nonds filled up, by which a vust surface of stagnant water has been removed; but the air of the town is still much affected by the vicinity of the Sunder-At high water the river is here a full mile in breadth, but during the ebb-tide the opposite shore exposes a long range of dry sandbanks. On approaching Calcutta from the sea the stranger is much struck with the mugnificence of its appearance; the elegant villas on each side of the river, the government botanical gardens, the spires of the churches and temples, and the strong and regular citadel of Fort William

In AD 1717 it exhibited a very different appearance The present town was then a village appertaining to the district of Nudden, the houses of which were scattered about in clusters of ten or twelve each, and the inhabitants chiefly husbandmen A forest existed to the south of Champaul Ghaut, which was afterwards removed by degrees Between Kidderpoor and the forest were two villages, whose inhabitants were invited to settle in Calcutta by the ancient family of the Seats, who were at that time merchants of great note, and very instrumental in bringing Calcutta into the form of a town Fort William and the esplanade are the site where this forest and the two villages abovementioned stood In 1717 there was a straggling village consisting of small houses, surrounded by puddles of water, where now stand the elegant houses of Chowringhee, and Calcutta may at this period be described as

extending to Chitnoor bridge, but the intervening space consisted of ground covered with jungle. In 1742 a ditch was dug round a considerable portion of Culcutta, to prevent the incursions of the Maharattas; and it appears from Orme's History of the War in Bengul, that at the time of its capture by Seruje ud Dowlah, in 1756, there were about seventy houses in the town helonging to the English. What are now called the explanade, the site of Fort William, and Chowringlice, were so lute us 1756 a complete jungle, interspersed with lints, and small pieces of grazing and arable land.

The modern town of Calcutta extends along the east side of the river above six unles, but the bread h varies much at different places. The esplanade between the town and Fort William leaves a grand opening, along the horder of which is placed the new government house, erected by the Murquis Wellesley, and continued on a line with this edifice is a range of inagnificent houses, ornamented with spacious verandas. Chowringhec, fornicily a collection of native liuts, is now an entire village of palaces, and extends for a considerable distance into the country The architecture of the houses is Grecian, which does not appear adapted for the country or climate, the pillars of the verandalis being too elevated to keep out the sun during the moining and evening, while in the wet season it is deluged with ram Perhaps a more confined Hindoo style of building, although less ornamental, might be found of The princimore practical comfort. pal square extends about 500 yards each way, and contains in the centre an extensive tank, surrounded by a handsome wall and railing, and having a gradation of steps to the bottom, which is sixty feet from the top of its banks A range of indifferent-looking houses, known by the name of the Writers' Buildings, occupies one side The famous black of the square hole no longer exists, it having been taken down in 1818 with all that remained of the old fort, to make room

for some new Improvements when its substantial soli lity was perticulatly remarked; but this conso : latson is probably the most effect of time being generally apparent in all old

bulldin s of lon, duration

The government house I the most remarkable pul lie edifice in Calcutta. The lower story forms a ru tie havement with arcades to the building which is Ionic On the north al le there is a fight of steps under whilch earninges drive to the entrance and on the south alle there is a circular col mnade with a dome. The four wings one at each corner of the hudding are connected with it by circular ya sages so long as to secure their enjoying the air all round from whatever quarter the wind I lown These wings contain all the private opartment t and in the north-en t corner is the council mam decorated like the other pul lie rooms with pur The centre of the building contains two uncommonly fine rooms; the lowest is pased with dark grey marble, and supported by dorse columns chunamed resembling mar life Above this hall hathe hall-room floored with dark puls hed wood and supported by Innic pillars rooms are lighted by a profu ion of cut-class in tree suspended from a juinted ceiling which having been destroyed by the white ante was replaced by a plain white ceili g with gilt mouldings

Besides the government hou e tho other public building tare a town-hall. a court of justice and two churches of the established religion and one for the Scotch Presbyterian worship, which is a very handsome edilice : there ore also churches for the Por tuguese Catholics, another of the Creek permation an Armenian church many small Hundoo pa odas, Mahomedan mosques, and a Seik temple The hospitol and gaol are to the south of the town The botame garden is beautifully aitmated on the west bank of the river, and gives the name of Gorden Reach to o bend of the Hooghly Above the garden there is an extensive teak plantation,

which is not a pative of this mer of India, let which appears to three well There are teveral private dock yanlı egyo ite to Calentia, and others above and be'ow it on the western lunk of the river

The black town exten is along the eirer to the north and exhibits a striking contract to the portion in halated by I properate I creams who have only seen the latter, which is prob bly the case with a great many n lenduals have little conception of the remain les of this externally mag nafcent ests. The streets here are generally narrow litty and impared the house of two stories are of brick with flit terraced roofet but the great majority are mud cottages covered with small tiles, with si le walls of mate and lamboos, an lother com lu diemateriale the whole swarming with posulate n within and without Fires, as may be inferred from the con struction are of frequent occurrence lest do not in the lea t affect the Lu roycan quarter, which from the mode of building is quite incombustible Althon, brick, morter and wood are not scarre in Calcutta, jet the money sunk in building a house is very con alerable and being a perishalle commodite requiring constant repair house-rent is proportionally high. The white anta are also so ratil and silent in their destructive overation that sometimes every beam in a house may be completely excavated internally while outside it

appears perfectly sound Fort William stands on the banks of the river about a quarter of o milo below the town and is supersor to atrenath and regularity to any for tress in Indu It is of an octagon form five of the sides being regular while the forms of the other three next the river are according to local eircumstances As im approved by land is to be opprehended on this side, the riser coming up to the glo civ it was merely necessary to guard against attack by water, by prosiding a great superiority of fire, which pur pose has been ottomed by giving the estadel towards the water the form

of a large salient angle, the faces of which enfilade the course of the river. From these faces the guns continue to bear upon the objects until they approach very near to the city, when they would receive the fire of the batteries parallel to the river. This part is likewise defended by adjoining bastions, and a counterscarp that covers them.

The five regular sides are towards the land, the hastions here have all very salient orillous, behind which are retired circular flanks, extremely spacious, and an inverse double flank at the height of the berme double flank would be an excellent defence, and would retard the passages of the ditch, as from its form it cannot be enfiladed The orillon preserves it from the effect of ricochet shot, and it is not to be seen from any parallel The berme opposite to the curtain serves as a road to it, and contributes to the defence of the diteh like a fausse-braye

The ditch is dry with a cunette in the middle, which receives the water of the ditch by means of two sluices that are commanded by the fort. The counterscarp and covered way are excellent; every curtain is covered by a large half-moon, without flanks, bonnet, or redoubt; but the faces each mount thirteen pieces of heavy artillery, thus giving to the defence of these ravelins a fire of twenty-six guns. The demi-bastions, which terminate the five regular fronts on each side, are covered by a counterguard, of which the faces, like the half-moons, are pierced with thirteen embrasures. These counterguards are connected with two redoubts, constructed in the place of arms of the adjacent re-entering angles; the whole is faced and palisadoed with care, kept in admirable condition, and capable of making a vigorous defence against any army, however formidable. The advanced works are executed on an extensive scale, and the angles of the half-moons being extremely acute. project a great way, so as to be in view of each other beyond the flanked angle of the polygon, and capable of

taking the trenches in the rear at an early period of the approach.

This citadel was commenced by Lord Clive soon after the battle of Plassey, and was intended by him to be complete in every respect; but it has since been discovered, that it is erected on too extensive a scale to answer the purpose for which it was intended, that of a tenable post m cuse of extremity, as the number of troops required to gurrison it properly would be able to keep the field. It is canable of containing 15,000 men, and the works are so extensive that 10,000 would be required to dcfend them efficiently, and from first to last have cost the East-India Company two millions sterling. The works are very little raised above the level of the surrounding country, and of course do not make an imposing appearance, nor are they even perceptible until This excites closely approached. grent surprise in natives coming from the interior, who always associate the iden of strength with that of clevation, and usually mistake the barracks for the fort, which, however, only contains buildings that are absolutely nccessary, such as the residence of the commandant, quarters for the officers and troops, and the arsenal. The interior of the fort is perfectly open, presenting to the view large grass plots and gravel walks, kept cool by rows of trees, and in the finest order intermixed with piles of balls, bombshells, and cannon. Each gate has a house over it, destined for the residence of commandants of corps, and the principal staff officers of the gar-Between the fort and town an extensive level space intervenes, called the esplanade.

The garrison is usually composed of one or two European regiments, one of artillery with artificers, and workmen for the arsenal. The native corps, amounting to about 4,000 men, are generally cantoned at Barrackpoor, fifteen miles higher up the river, and supply about 1,200 monthly to perform the duty of the fort. The wells in the different outworks of Fort Wilham, some of which are five hun-

ilred yards from the river, during the hot season become so Ivacklib, as to be mint for cultiary purposes or for washing; government has in contaquence formed an immense recevoir occupyin, one of the battom, to be filled when required with rank water

Until 1814, It had aleans been a commonly received opinion that the soil in the vicinity of Calcutta was particularly moist and full of springer but the reverse was proved in that year as after boring to the depth of 140 feet no springs of any description were perceptible in 1817, while deepening a tank facing the corner of I splanade How, numerous maser trunks of trees were discovered. shout sisty feet under the surface, standing in an erect position with the mots and branches diverging; and similar phenomena occurred in 18" while deepening the great tank on the Chowringhee road, Iluring the boring operations above-men tioned, a this stratoni of coal and I lue clay was reached, fifty three feet below the surface, facts all trudy, to Prove a great accumulation of alluvial The arknowledged improve ment of the china e is and about Calcutta of late years may be airth ed to the attention paid by the police to a general system of drainage and to the cutting of broad straight rus ly through the contiguous woods in the direction of the prevaling winds which act as rentilators and purify the air If some less swampy production could be substituted in the neighbourhood for rice, perhaps a still greater degree of salubrity might be attsined The runy season at Calcutta usually begins about the 12th of June and ends about the 14th of October

Calcutto possesses the odvantage of on excellent soland navigation, for regs imports being transported with wonderful facility, on the Gonges and its subsidiary streams, to the north western quarters of Illindostan while the valuable productions of the interior are received by the same chasacles. The quonity of merchandizoat all times deposited in Colcutto is coormous, ond the amount of practices.

live crintal employed in the govern ment funds loans to individuals lo ternal and external trade latery large The formerly tim! I lin loo new lends morey na respondentia, on distant toya, es, treates la speculations to seniote parts of the world ensures as an underwiter and erects Ind co works in different parts of the protrailing on I is own capital with much greater fingality than a lumperan, and exclusive of hi property enjoys the most perfect toleration of his religion Besides the government lank there are also three private banks established in Calcutta which circulate to a considerable amount; an ! one of these has branches in the Italeslishy district with offices at liau leah, Moorshedahad, and Nattore It may be computed that the paper circulation is Bengal, from these d f ferent sources, recreds a crore of supers, or one milion sterling.

There are three artificial canals la the elciplin of Lalcutta and it is highly desirable that the water com munication while the upper provioces should be uninterrupted, without pauling through the unbealths and dangerous thannels of the hunderbundet but owing to the difficulties that beset hydraulie operations la Bengal no featible plan has at yet been devi ed to keep it permanently open Through these canals and along the various streams of flowing water inoumerable small craft dally arrive from the Interior, loaded with the produce oad manufactures of their respective countries, while the shipping collected opposite to the town presents o magnificent spectacle The over lo many places reaches olmost to the base of the houses and the people descend by fights of steps built of brick masonry Owing to the tustom of throwing dead bodies Into It the water is sufficiently dirty; yet it is resorted to in crowds by the natives for the purposes of ablution The rapidity of the tides up and down causes a constant circulation both of air and water, and tends to prevent the deleterious ef

fects which would otherwise result from a body of water containing such putrid infusions, were it in the slightest degree stagnant, or even torpid In 1826, besides the in its motions government steam-vessel the Enterprize, there was the Diana and the Comet of twenty-four horse power, fitted up as packets to proceed up and down the river with passengers, effecting in three weeks what used to occupy as many months. Besides these were two armed government steam-boats getting ready, and one for deepening the river.

There have been various opinions regarding the population of Calcutta, but it does not appear that any very correct census has yet been taken. In 1752 Mr Holwell estimated the number of houses within the Company's bounds at 51,132, and the constant inhabitants at 409,056 persons, without reckoning the multitude daily coming and going. 1802 the police magistrates reckoned the population of Calcutta at 600,000, in 1810 Sir Henry Russell. the chief judge, computed the population of the town and its environs at one million, and General Kyd the population of the city alone at between 400,000 and 500,000 inhabi-The adjacent country is also tants so densely peopled, that in 1802 the police magistrates were of opinion that Calcutta, with a circuit of twenty-miles, comprehended 2,225,000 In 1819 the School Society estimated the native population of Calcutta at 750,000. yet in 1822 we have the following details.

The returns of the population given for the four divisions are: Christians 13,138, Mahomcdans 48,162, Hindoos 118,203, Chinese 414—total 179,917 It has been ascertained that the extent of Calcutta from the Maharatta ditch at the northern extremity, to the eireular road at the southern circuit of Chowringhee, is not more than four miles and a-half, and that its average bicadth is only one mile and a-half. The lower or south division of the town, which comprizes Chowringhee,

is but thinly peopled, the European houses being widely dispersed, but the portion named Colingah is chiefly inhabited by natives The divisions between Durramtollah and the Bhow bazai has a denser population, as it eomprehends the most thickly inhabited European quarter, besides a great many Creole christians northern section between the Bhow and Mutchua bazars certainly swarms with population, but the upper division to the north of the Mutchua Bazar is comparatively thinly covered with houses, presenting towards the north and east extensive gardens, large tanks, and rumous habitations. The number of persons entering the town daily from the suburbs and across the river, has been estimated by stationary peons and sircals placed to count them, at 100,000. Upon the whole, therefore, in June 1822, it appeared to be the opinion of the magistrates from the returns laid before them, that taking the resident population at about 200,000 persons, and those entering the town daily at 100,000, the sum total (300,000) would give a tolerably accurate approximation to the real number

By some strange arrangement in the above calculation, the population of the suburbs of Calcutta appears to be excluded and separated from that of the town, a process which, if adopted in England, would reduce London to a very moderate number, nor was the simple expedient of counting the houses resorted to. So long ago as 1798 these amounted by enumeration to 78,760, and there is no reason to suppose they have since decreased. A great number of the adult sojourners in Calcutta leave their families in the adjacent villages, so that the proportion of children within the body of the town is iemarkably small

The Calcutta society is numerous, gay, and convivial, and the fêtes given by the Governors-general splended and well arranged Each of the principal officers of government have also their public days for the reception of their friends, independent of which

not a day passes particularly drular, the colds exacts whitest certral large dinner parties of from theiry to forty Bestler the public robertytion assembles, there are refect exerting meetings at regular intervals moder the partie of constructiones, accurate the partie of constructiones, accurate the parties of construction, and other assurements. There is the wise a handwerse new theater, supported prescriptly by ansatzate; but although the performances only the place once a fortinght they are often but thinly attended. Public concerts have also of late been very much in voger and, I be the treater are partie.

supported by amoreur talent It is neval to rise oute to enjoy the enot air of the moraing, which is par ticularly pleasant before mortise. He talt ove and two a med is talen which is ralled tiffn, after which many petite to fed for two or three hours. The d oner is commenty after paneet which precessarily keeps the guests up till selfel bt. The tiands greets up till seldel ht are executers and second in great profamone and as the heat of the el mare does not which of their being beid great part leat fast thrown out to the parish does and the lieds of prey The lower seders of Portuguese, to whom store they emild be serviceable. carnot consume the whole; and the religious [rejudices of the native ser wants prevent their tarting any ford prepared by persons not of their caste or tellipion. To this elecum atance is to be attributed the amazing flocks of crows kites, and ruliness which, undisturbed by man han together in ameral ic society and almore cover the houses and gerdens in their profession of scaveneer the Lites and crows are asslated during the day by the vorscious stock ad jutant and after aunset by parish dogs, foxes, and jeckale which then emerge from the junder, and with their howing make night hideous

The wines chiefly drank are Maderra and claret; the first, which is excellent, during dinner the latter afterwards. The claret being me dicated for the voyage, is by some considered too strong, and both sorts

(more expectally Mahlim which is titled in the country) linear great d next from the configuity of much rain, which lengest so directling, a flaceur as to explicit undicald is As a general reality the latest imperincularett is always the less!

The Calcutta market supplies a great variety of game such as surper wild ducks, trel and deferrnt species ed the ortoles tribe the whole com parathely cheap. The wild wenton is much inferior to that of Britain but the park or stall-fed is equally good The harr is a tery poor erro ture and defices in many qualities from that of Levland bein deficient in size stremets, and environment on observation also applicable to the Bengel for which is every war a contempalide animal. The tables of the gentlemen in Calcutta are distinprinted by an infinite emitty of de-belous fruits procured at a moderate expense such as placeapples plantains marries printles or shal-sicks, melone of all sorts, evengre, costerd opples guita peaches to which of late wests strasberries of European and leschers, loguets and whampers of Chinese orlein have been added. But the grand luxury of Calcutta is the mangacula h (an named from its a dearing d sing the manger season) the ta to and flatour of which can never be sufficiently extelled By the nations they are named taparal or profitent finds falsbeer lated by Furnecune to thes Linen their resembling a class of religious penitents who ought never to share

The usual recele of shitting in Ledcutta is in palanquine but many recociteren have corrieges aday ted to the elimate and the hered of horses I y the government at a land importation has been greatly improved. It is universally the practice to drive out betacen somet and dinner and as it becomes dark accessits with torches go out and meet their masters and run before the carrie, es with autonialing austiness and for awanderi il length of time I to stull the cuttum except at public places, or very formal executing parties. For the gentlemen to dress in short white cotton jackets, which are well suited to the heat of the climate, but on ceremonious occasions in coats of English broadcloth

The British inhabitants stationary in Calcutta and scattered through the provinces, are generally hospitable in the highest degree, and most liberal where their assistance is wanted When an officer of respectability dies, in either service, leaving a wife or children, a subscription is immediately commenced, which in every instance has proved generous, and not unfrequently lias conferred on the parties a degree of affluence that the life of the parent or husband could not for many years have accomplished. Their zeal for the promotion of religion, science, and literature, will be best estimated, after perusal of the following list of learned and benevolent institutions established by them and the government in Calcutta and the upper proyince, within the last half century.

The Asiatic Society was planned by Sir Wni Jones on the outward voyage from England, and formed into a regular institution on the 15th January 1784. Its principal object is to concentrate in one focus the valuable knowledge that may be occasionally attained of Asia, or at least to preserve many little tracts and essays, the writers of which might not think them of sufficient importance for separate publication. From this period may be dated the commencement of all accurate information rcgarding India in general, and Hindostan in particular, which even at the present day is but imperfectly understood by European readers cently a medical and a phrenological society have been established, which publish their works periodically. the other learned and benevolent institutions are so numerous in Calcutta and the provinces that nothing more than their names can be given.

The college of Fort William, for finishing the education of the civil servants commenced at Haileybury, the Government Sanscrit College, the

Madrissa or Government Malromedan College, the Vidalaya or Anglo-Indian College, the Benares College, the Agra College, the Government schools at Chinsura and Benares, the free school at Cawnpoor, the school at Aimeer, the Boglipoor School, the Calcutta Grammar School, the Armenian Academy, the Benevolent Institution, the Parental Academic Institution, the School for Trades, the Committee of Public Instruction, the School-Book Society, the Female Juvenile Society, the Ladies' Society for Native Female Education, the Institution for the Instruction of Indigent Children at Serampoor, the United Charity and Free School.

The religious and charitable institutions are: the Auxiliary Bible Society, the Bible Association, the Committee of the Church Missionary Society, the Church Missionary Association, the Diocesan Committee for promoting Christian Knowledge, the Auxiliary Missionary Society, the Bishop's College, the Bethel Union, the Seaman's Friend Society, the Military Orphan Society, the Military Widows' Fund, Lord Clive's Fund, the King's Military Fund, the Marine Pension Fund. the Civil Fund, the Mariners' and General Widows' Fund, the Presidency General Hospital, the Native Hospital, the Hospital for Native Lunatics, the Government Establishment for Vaccination, the School for Native Doctors, the Charitable Fund for the Relief of Distressed Europeans, the European Female Orphan Society

In 1825 the following newspapers were published in Calcutta, viz "The John Bull," "the Bengal Harcarrah and Scotsinan," daily papers, "the Government Gazette," and "the India Gazette," twice a week, and "the Bengal Weekly Messenger," published on Sunday. The native newspapers then were the "Merat ul Akbar," the "Jami Jehan Nama," "the Sungbaud Cowmuddy," and "the Sumochar Chundrica," all weckly, the two first in Persian, and the two last in Bengalesc. In 1826 two

additional Bengalese weekly new pa pera were added to those latter ex isting

The government grants a princely allowance to their civil acreants; but large as at le it does not always suffice for the expenses of the junlors, many of whom on their arrival set up an estravagant catable liment of horses carriages no lacerants and thereby involve themselves in embar ra unents at a very early period of their lives. To support this profuse mode of laing they are obliged to borrow from their deann generally a monied pathe who seeks the ad vancement of his family through the influence of his delivers whose estr sagance and dissipation he encou rages until their difficulties are al most inextricable. While the civi lun remains in an inferior situation the debt to the dewan continues to accumulate and when higher appoint roents are at length reached, quires jears to clear off the incum brances of his juvenile thoughtlessness. Of late these responsible a tuations have been rendered of still more difficult attainment, by the determination of government to regard extravagance as an essential drawback from the claims of all can didates for offices of trust Those who are incarable of exercising self denial at the commencement of there career, have only themselves to blame if they are dealed that confi dence in the strength and integrity of their characters which every one seeking important public trusts ought to possess a nor can the government sacrifice the duty It owes to the people through any consideration for the interest of incautious servants Instances of this species of Insanity (for it deserves no other name) are now rare compared with what they were at an earlier period of the British ocquisitions; and notwithstanding the multiplied temptations a very great majority of those who or rive at the higher stations whell, escape the contagion and are distin guished by the most unsulfied inte-

grity of character Whenever a

desistion has occurred it may have stally be traced to the improdence of the young man on his first arrival, and his solvequent slavery to his deman

Calcuits is in every point of view a new city almost as much so with regard to its native genuty as in its Puropean population. The great matter familit, who now contribute to its splendour aren's ery recent origin andeed, scarcels ten could be name! who powered wealth before it end of the laghst power it having been accumulated under our averelenty, chiefly in one vertice and entirely through our protection.

The Buil h merelants are a merous and re pectable body of men many of whom have acquired large fortunes by their industry and enterprite and conduce ex entitly to the pro perily of the province Here they diplay alternative in their man ner of twins wil lum equalled in other parts of the world; and their nets of charity and manufacenet to persons in do trew, and penerody as it follows are towards each other have per laisen never been surrased.

The Armenians were formerly a numerous and affluent class of foreign traders but latterly this nation has rather been on the decline Tho number of Greek merchants is not convideral le whereas the Portuguese houses of agency rank next. In point of number, to the linglish. A very considerable number of the progeny of that notion resido in Calcutta and ita con irons and have approximated very closely to the natives in man ners and appearance Amoog the sarrous classes of money changers no mention is made of the Jews few of whom for many centories have settled in Illindostage and Calcutta is, probably the only very opulent town that is almost wholly without them The practices and occupa tions they follow in I urope are here engrossed by the native Sirkara, ban yant and writers who ore golte a match for any Jew The abops of these petty traffirkers olthough bet ter than their houses are mean and

disagreeable; the European shops are singularly splendid. Some of the native traders have made or inherited large fortunes, and the public apartments of a few are furnished the European fashion, with elegant chandchers, pier glasses, couches, chests of drawers, writingdesks, and two or three hundred chairs, while in the other rooms the images of their gods are seen decorated with gilding, red paint, and precious stones. Some have taken to the drinking of tea, some keep English coaches and equipages, and one individual was noted for having also an English coachman.

Without being attached to some department of the service, or trained up to some mechanical trade. there is little hope of prosperity to a young man migrating on chance Here all the inferior from Europe. situations of clerks, overseers, &c. are necessarily occupied by the natives, and it is by these gradations in Europe, that young men rise to opulence in the commercial world It is scarcely in the power, even of a governor-general, to assist a person of respectable connexions who does not belong to the service, or one of the liberal professions; and, although the climate of the province is not essentially improved, Europeans are now much better acquainted with the means of counteracting its effects, and deaths are far from being so frequent as formerly. Regularity of living, avoiding too much exposure to the sun, and all extremes, even of abstinence, are much more practised by the modern inhabitants than they were by the earlier adventurers, vacancies consequently in any line or trade are of much rarer occurrence.

It is in Calcutta that the effect of the intercourse between Europeans and the natives is in any degree visible, as there alone an indistinct sort of link may be discerned between the rulers and the people. The lowest and poorest Europeans, and the native-born Christians and Portuguese, do in some slight degree, mix with the natives in their ordinary conceins

and amusements, just sufficient to produce a very inconsiderable change in their manners and character. The establishment of the supreme court, and the intercourse between the natives and the lowest officers of that court, must be considered another cause of the same nature; but by these causes their morals have not been in the slightest respect improved; on the contrary, they have learned all the mean arts of European chicanery, imposture, and litigiousness, in addition to their aboriginal stock, without acquiring a particle of plain dealing, firmness, independence of spirit, or useful knowledge. appear to imbibe only those principles of the European character which tend to impair the mildness and simplicity of their own; and whenever, in the behaviour of the natives, insolence, ill-nature, coarseness, brutality, or drunkenness (qualities hostile to their national character) are observed, the change may be invariably traced to their intercourse with low Europeans.

The supreme court of judicature in Calcutta consists of a chief justice and two puisne judges, nominated to their situations in India by the king. Its cognizance extends to all British subjects, that is, natives, or the descendants of natives of the British isles in India, and to all inliabitants within the parochial limits of Calcutta, as enclosed by the Maharatta ditch, beyond which, however, the suburbs now extend. In suits to which the natives are parties, the judges are enjoined by act of parliament to respect the usages of the country; in matters of inheritance or contract, the rule of decision is to be the law acknowledged by the litigant parties. Should only one of the parties be a Mahomedan or Hindoo, it is to be the law acknowledged by the defendant. Criminal offences are tried by a jury consisting exclusively of British subjects; in trials of a civil nature, the judge decides both the law and the fact. The supreme court also tries criminal charges against the government servants, and civil suits

in which the government or its ser

wants are concerned

Little morality is learned in a court of ju tice; and notwithstanding the seventy of the police and of the I ogla h laws, it appears probable that the grounds of the nature inhalstnote are worse in Calcutta than in the ; rosincial districts. This is not to be arentuted solely to the cire population and indiscriminate society of the capital but in part to the supreme court, every native connected with which appearing to have his morals contamioated by the intimacy mentioning this erd it is not inten ied in the remotest degree to attribute it to any indicidual or body of men or to speak with disrespect of the In stitution itself, but merely to men tion a fact, which has probably been remarked by every Judge who ever sat on the bench. Within the last forty years the natives have attained a sort of legal knowledge as it is usually denominated consisting of a skill in the arts of collusion lotrigue, subor nation and perjury which enables them to perplex and baffle the magni-trate with infinite facility

But notwithstanding the term tations to which the natives are exposed, it is surprising how soldom thefte and burglaries are committed on the property of Europeans who seldom in Bengal take any precautions to prevent their occurrence. In some families thirty or forty domestics, many of them natives of distant proviaces, sleep all night within the enclosure, or in the passages and versudas no the house, where every door is open ond detection almost impossible. Owing to their extreme timidity they acidon venture to rob openly or on a large scale preferring a more indirect and complicated system of small plifering and eliesting.

Besides the supreme court, Calcutta is the head-quarters of a court of oppeal and circuit, which comprehends the following district erz Burdwen the Jungle Viahels Midnopoor, Cut tack, Jessore Nuddes, Hooghly and the twent; four pergumahs.—(Public

Documents MS and printed, Sir Hen-

ry Steachey Lord I alentia Fullation, Tennant Milhurn Harrington M Cenham Major Rennell Se)

CALACOTLAN.—A trum in the prosince of Travancore 116 miles N W from Cape Comoring lat 9° 11 N., ion, 26° W.L.

CALIABRIE-A sillage in the prorince of Value, aituated on the ricer hipen, five miles north from the city of Oosrin. This place is remarkable for a lofty, heavy and whimsical structure, called the water-palace, built on an incider eminence in the chonnel of the Sipra. This edifice of which several very inaccurate and exagrerated descriptions have been given (believed to have been constructed by the Viahomedan kings of Vialwa) is entirely devold of architectural attractions. and its quadrangular tank of masonry in the bed of the Sipra, including a terrace and two square parilions with a low arched bridge of communication, in no respect corresponds with the fanciful pictures that have been given of them ( bullartes, Se )

CALICUT (Calacods) .- A subdivi-alon of the Valabor province extend ing along the sea-coast between the parallels of 10° and 12° north lat. and one of the principal countries of that extraordinary Hindoo race the Nales, the Calicut Haja (the Zamorin of I oropeant) being one of their most respected chiefs. By his own tribe and the other natives, he is styled the Temuri Reja. All the orales of the family are called Tamburans and the females Tamboretties. All the children of every Tamburetti are entitled to these appellations, and rise accordsug to seniority to the highest dignities that belong to the family These ladies are generally impregnoted by Nambournes (Brahmins) and sometimes by the higher rank of Naira: but the sacred character of the Aemburies always insures them a preference. They live in the houses of their brothere, and never have any intercourse with their imsbands, which would be reckened scaudalous.

The oldest mon of the founty by

the female line is the Tamuri Raja, or Zamorin, and is regularly crowned. He pretends to be of higher rank than the Brahmins, and inferior only to the invisible gods, which pretensions are admitted by his subjects, but held to be absurd and abominable by the Brahmins, who treat him as a sudra. The Zamorin, although of a caste inferior to the Cochin Raja, and possessed of less extensive dominions, was commonly reckoned of equal 1 ank, which is attributed to the supenor prowess of his people In 1767, when Hyder invaded Malabar, the Cochin Raja quietly submitted to pay tribute, while the pride of the Zamorin refused any kind of submission, and after an unavailing resistance, being made prisoner, set fire to the house in which he was confined, and burned along with it. Several of his personal attendants, who were accidently excluded when he shut the door, afterwards threw themselves into the flames and perished with their master  $-(F. Buchanan, \S c.)$ 

Calicut —A town in the province of Malabar, of which it was the former capital, 103 miles SW. from Seringapatain; lat 11° 15' N., Ion. 75° 50' E The Portuguese, under Vasco de Gama, arrived at Calient on the 18th of May, A D. 1498, ten months and two days after their departure from Lisbon In 1509 Don Fernando Continho, marechal of Portugal, attacked Calicut with 3,000 troops, but was slam in the assault, and his army repulsed with much slaughter. In 1766 it was invaded and conquered by Hyder, who enlarged and improved the fort; but Tippoo afterwards destroyed both fort and town, removing the inhabitants to Nellura, which he called Furruckabad, being, like all the Mahomedans of India, a great changer of the old Pagan names Fifteen months after this compulsory nugration the English conquered the province, and the inhabitants returned with great joy to their old residence. The town in 1800 contained above 5,000 houses, and was rapidly improving; the inhabitants, chiefly Moplays, named Chulias among the Eastern Islands. The principal exports are pepper, teak, sandal-wood, cardamoms, cour, cordage, and wax. Travelling distance from Seringapatam, 129 miles southwest.—(F Buchanan, Wilks, Bruce, Rennell, & c)

CALICOOTE.—A town in the northern circars, twenty-one miles N from Ganjam; lat. 19° 23' N., lon. 85° 11' E

Calingapatam —A small seaport in the northern circars, sixteen miles E from Cicacole; lat. 18° 15′ N, lon. 85° 11′ E. In 1820 this place consisted of about thirty cottages, clustered round the master-attendant's bungalow, yet there is a European burying-ground here, and small coasting vessels are still built and repaired in mud docks The river Paddair joins the sea near Calingapatam, by a debouchure almost a mile wide, which is with difficulty forded.—(Fullarton, &c)

Callacoil —A town in the Carnatic division of Marawa, sixty miles S S W from Tanjore; lat 9° 55′ N., lon. 78° 54′ E.

CALLACAUD.—A town in the Carnatic, district of Tinnevelly, thirty-ninc miles N. by E from Cape Comorin; lat. 8° 36′ N., lon. 77° 53′ E.

Callao —An island in the Eastern scas lying opposite to the coast of Coclun-China, and about eight miles east of a considerable river, on the banks of which stands the town of Faifoo, and not far from the harbour of Turon, lat. 15° 53' N. In length it may be estimated at five miles by This is a two the average breadth. picturesque island of considerable altitude, one of the mountains execcding 1,400 feet, but it is only inhabited on the south-west coast, where there is a beautiful spot of about 200 acres, covered with neat houses, temples, clusters of trees, and small hillocks covered with shrubs—(Staunton, Sc)

Caltianti (Calyani)—A strong hilly country, extending along the scu-

coast of the Aurungabad province opposite to the Island of Bombay bounded on the east by the western chants. The principal towns are Cal. hance, Bassein, Pona ell Chowl Ha japoor Dassgong and Albart the largest streams, the Tanja, Cailay the Bhaguan and Savatra conquered from the Peshwa the towns were described on large and well-peopled | in 1820 however the rdispes were generally small thinly scattered and of a poor appearance consisting principally of clusters of (Public MS Documents Fullarion. de)

CALLANT,—The capital of the above district, situated in the province of Annunghad on the south side of the Cadas ricer, thirty files N.E from Romlary i it. 197 35 %, loo 737 15 E. This ton a satisfaced many sieges during the wars beta een the Megula and Maharattor, and is surrounded by runs of verrous sorts. It is notwithstanding all its vicusationer, still a populous town and carrier on some traffic to eccon-nuts oil course clothe brass and carriter ware.—(All Creater, Remuell, §c)

CALLIANY (Calyon).—A small dutaison of the province of Beeder bounded on the north by the Tierna river and on the cast by the Beeder dustret. The time of Calhany, from which it derives its name stands in lat. 179 50 No. 100 775 E 3, thirty five miles west from the city of Reeder.

CALLIANOSOG (Calyanadurga)

—A town so the Bala, hant ceded districts forty-two miles S by E from Bellary; lat. 13° 42° N., lon 77° 17° E

CALLINGTR (Calenglera).—A. form ond fortrees in the Allahabad provence, distract of Bundeleund; but 25° 0° N° ion 50° 25° F. By Abul Fazel in 1882 r. is described as follows: "Callinger is a stone fort, situated on a loily mountain. Here is on shollowed Kalibitroop eighteen enthis in height at the distance of twenty

cors from the fort husbandmen sometimes find small diamonds, and in the neighbourhood is an hon mine

The summit of the table-land of Callinger is ot least 1,000 feet in eleand the base of the mountain covers aboro ten miles in circumference At the foot of the northern front of the hill stands the town which in 1820 a as still of considerable size althmigh of a rumous exterior and unfortified The walled plain comprehends tho whole summit of the full, and con tained the public buildings the quar ters for the garrison and several large tanks, slways filled with water Thi plan or interior plateau is almost fire miles in circumference, and com pletely encompassed by a wall of Vianomedan construction, at some places clerated above the level of the sum mit and others on a level with it the great body of this immense mural rampart is composed of rough uncut and unplastered stones and its con struction must have required both great time and labour The fortress of Collager resembles in its astuation that of Gustion but surpasses it both in aise and strength it ans taken by the British in 1810 after a bloody siege and in 1820 a party of sappers and miners a ere sent there from Cal cotto to destroy the a orks and dismantle the fortress

CALOWS —See CAULORE CALVER —See KALVER

CALTESTEE. A pennoula, or neck of land while extends almost asty miles along the west coast of Ceylon and during the north-east monsoon becomes an island. The surface is level, the soil sandy ond evered asth eocon-nut trees, the fruit of a hield is here the clief orticle of food. The population is considerable, and c smill trade in the export of sold fish and fish roes is curried on to Columbo from whenco rice is brought in large cances made from the truck of a single tree brought from the continent.—Confuser feel

CALSI,—A large village in North ern Hindostan, situated four miles above the confluence of the Tonse and Jumna, within the mountains of Jaunsar, of which district it is the capital; lat. 30° 31′ N. It is also a mart of tiade between the mountaineers and people of the plains.—(Capt. Hodgson, &c.)

CALTURA—A town and small fort in the island of Ceylon, twenty-six miles south from Columbo; lat. 6°34' N., lon. 79°53' E. Here, as at every village on the west coast of Ceylon, arrack is distilled from the juice of the palmira and cocoa-nut trees, and is an article of considerable traffic. The travelling distance from Columbo is twenty-eight miles, by an inland navigation consisting of rivers connected by canals.—(Cordiner, & c.)

CALYGONG HILLS —A range of hills in the Deccan, which separate the Gundwana province from that of Candeish, and situated between the Tuptee and Nerbudda rivers.

CALYMERE POINT.—A promontory on the sea-coast of the Carnatic, district of Tinnevelly, near to which some pagodas are visible from the sea, lat 10° 18′ N., lon. 79° 56′ E.

CAMAO —A town in the province of Cambodia, near to its southern extremity, mostly inhabited by Cochin Chinese; lat. 8° 50′ N, lon. 104° 56′ E.

CAMBAY (Cambaja).—An ancient city in the province of Gujerat, situated at the upper part of the Gulf of Cambay, and mentioned by Marco Polo about A D 1295 Lat. 220 21' N., lon. 72º 48' E. Near the town the tides rush with much turbulence, and rise and fall forty feet, so that at high water ships can anchor near the town, but at low water the channel becomes dry, and vessels must lie in the mud until it returns. When Ahmedabad flourished as the capital of an opulent and independent state, Cambay was its sea-port, and experienced great commercial prosperity; but it decayed with its metropolis, and is now much reduced. Hindoo and Mahomedan edifices, however, are still to be seen, and the

ruins of many more, especially of the Jain sect, which appears at one period to have been predominant in this neighbourhood. In a Jain subterranean temple at Cambay, in 1780, there were two massy statues of their deities, one white and the other black. The inscription on the first intimated that it was the image of Parswanatha, a Jain deity, or rather deified saint, carved and consecrated in the reign of the Emperor Acher, A.D. 1602. The black one had merely the date inscribed, with the names of the two Banyans who brought it there.

The surrounding country is pleasant, and when properly cultivated, yields ample returns of wheat and Hindostany grains, indigo, cotton, and oil seeds, but it has been long managed in an indolent and slovenly It is said that in the city and adjacent country there were formerly 50,000 wells and tanks; but the inhabitants, to prevent the Maharatta armies encamping in their vicinity, drained most of the tanks, and filled many of the wells up. Cambay formerly exported fabrics of silk, chintz, gold stuffs, cornelian štones, and indigo; but these manuhave gradually dwindled factures away, and the staples now are wheat and other grains to Bombay. silversmiths here still emboss very Their process is to fill the meatly. cup, watch-case, box, or other vessel with gum-lac, after which they punch with a small chisel the figures of flowers, elephants, and such different varieties of birds and animals as are required. The Persian language was formerly spoken here in great purity, on account of the number of emigrants who settled here during the civil wars of Persia, and also many of Nadir Shah's soldiers, who deserted and retired with their plunder to Cambay. In 1780 this city and territory were governed by a native prince named Mohmaun Khan, who paid a heavy tribute to the Maharattas, whose Pesliwa exercised a divided jurisdiction, both civil and criminal. Since the fall of that potentate these rights have devolved

to the British government, to whom the present nabob pays tribute and arknowledges his subordination -(Lorder Drawmond, Hufford, Public 168. Documents, I lmore, Maliet, Rennell, Se)

CAMPAY (Gulf of) -A milf on the north-west coast of India, which penetrates about 150 miles into the province of Gujerat. The tides in this arm of the sea run with amazing velocity, and ot low water leave the hottom of the gulf dry from lat 220 TN to Combay town. No versel attempts to go above Gongway in one tide from Jombover for if they cannot get into Cambay ereck they must return to Gongway, which is five leagues distant. In many places the current is so rapid that if o shim takes the ground she immediately unsets, and in all probability the whole crew perish It is supposed the depth of water in this gulf has beenprogressively decreasing for more than two centuries Fifteen miles east of Cambay city the bed of the gulf is reduced to six miles in breadth, and la dry at chb-tide but the crossine either on home or foot is dan gerous, the tide rushing furiously in, like the bore in the Calcutta river. (Elmere Drummond, &c)

CAMBING,-A small Island obout thirty miles so circumference, hing off the north coast of Timor between the eighth and outh degrees of south iatıtude

CAMBODIA (Camboja),-A conotry of India beyond the Ganges, extend ing from Cape St James in the Chien sea, to near the same parallel in the Gulf of Siam, thus compreheoding the whole peninsule of Cambodia. In the interior, and clong the great nver of Cambodia, it stretches much further reaching as far north as lat. 149 The whole coast from Campo point the southern extremity, up to the Cape Linut of the Europeans, is an unioterrupted archipelago of beautiful islands, which appear like the tops of a chair of monotains, some above 1.000 feet high, extending

along the coast of Cambodia, while the continent is low alluvial land. without hill or elevation Among these islets the tides, which are strong and irregular, rise to unusual heights for such latitudes, in some places A mud flat com above fifteen feet menees at Cambodia point, and gradually increases in breadth from tho iand noted it terminates at the mouth of the Donnai river where it spreads out to sea for above four leagues. the southern extremity of Asia here sinking loto the ocean by very alow gradatioov.

The Cambodia river is said to have its source from a lake within the Chi neso province of 3 onan, and to be navigable for boats before it enters Laos between the twenty-secood and twenty-third degrees of north lath It is evidently one of the tude. largest rivers of Asia, with a course (if the above conjecture be correct) of 1,500 miles including windings; but it probably does not deliver to the ocean so large a body of water as the Ganges. It flows through the territories of Laos and Cambodia, loining the sea by three mouths about Let 10° N

The regetable productions of this province are the same as those of the neighbourneg countries of Siam and The colouring motter named comboge derives its mano from hence being the concrete resinous juice of certain trees found here of a superior quality, but produced likewise in other parts of India At present the exportable commodities ore gamboge, cardamoms eagle-wood areea, ivory sticklar, bides, horny, bones dried fish dye-woods, and timber for domestic and noval purposes The quantity of teak wood, however, is very small ; the sort most used for ship and house-building and the artil lery, is called in the native language sao, and is strong and durable, but its botopical character has not yet been ascertained A bord block wood oamed que, of large dimensions, and surceptible of a fine polish, is much used in cabinet work. This provioce ulso yields the Portuguese rose-wood,

which the Chinese export in considerable quantities. The Chinese and Macno Portuguese carry on a small traffic, importing silk goods, china, and incovered ware, tea, sweetmeats, tin and tutenague, and exporting dried fish and the articles above-enumerated in 1cturn. Chintiban is one of the principal trading ports of Cambodia, and a considerable emporium for cardamoms and pepper. It stands a short distance inland, up a river only navigable for small boats. Cancao, or Athien, on the frontier of Cochin Clima, is the next mart of importance, and is also situated up a river which cannot be ascended by large vessels.

The Khomen language is used by a nation of that name who reside on the banks of the Mekon, or river of Cambu Cha't, or Cambodia. Khomen are reekoned an ancient and learned people, and were formerly subdued by the T'hay J'hay, or ancient Siamese race. The modern T'hay, or Siamese, still denominate the Palı character Nangou Khom, or the Khomen letter, from this nation. They are not, however, supposed to have existed as a polished people so carly as the Law (Laos), but are beheved to have derived their origin from the warlike race of mountaineers named Kho, the Gucos of the The name of Portuguese historians. Camboja is often mentioned in the Ramayuna and other ancient Hindoo poems, where its horses are celebrated, but the designation probably refers to Cambay in Guierat, as an intercourse is described as then subsisting between Camboja and Oude, the capital of the great Rama

With the present condition of the interior we are still but little acquainted, and its religion can be only conjectured. Surrounded on all sides by nations professing the doctrines of Buddha, the majority of the inhabitants are also probably votaries of the same prophet. The accounts we have of the mountaineers assimilate them to the savage aborigines found all over the continent of India, where the Hindoo and Mahomedan religions have not penetrated, or made any

lasting impression. The most numerous portion of the inhabitants on the sea-coast are native Cambodians, but the Anam, or Cochin Chinese, compose the governing class. The alterigines to the west of the great river, and bordering on Laos, are termed Mew.

In A.D. 1590 the king of Cambodia sent a mission to the governor of the Philippines, begging his assistance against the king of Siam. In 1820 this province was divided into three parts: one tributary to Siam, another to Cochin China, and a third inde-The two first-named divinendent. sions comprehend all the sea-coast; the third is several days' journey up the great river Cambodia. Its capital, named Panompin, is said to be populous, and inhabited besides natives by a considerable number of genuine Chinese. In 1819 the king of Cochin China interdicted to foreigners all direct commerce with his portion of Cambodia, having proclaimed Saigon the emporium of that province, and of all the southern divisions of Cochin China — (Singapoor Chronicle, Leyden, Lient. White, Crawfund, Staunton, De Bissachere, & c.)

Cambodia.—A town of India beyond the Ganges, the ancient capital of the preceding province, but now in a decayed condition; lat. 13° N., lon. 104° 35' E By the Birmans it is named Lowaick, and stands on the river of Cambodia or Mekon, about 150 miles from the sea It does not appear to have been visited since the time of the Portuguese ascendancy, and before the fervour of their missionaries had abated —See also Pa-NOMPIN, the name of the modern capital,

CAMIGTEN.—A small island, one of the Philippines, about ten miles in length by four the average breadth, situated due north of the Luzon. There is some trade carried on here for wax, gold, cocoa-nuts, and cassia.

CAMLAPOOR.—A town in the province of Bejapoor contiguous to the ruins of Bijanagur, of which it pro-

bably at one period formed an integral part t the fortified pass through the mountains, which was the larrier of that ancient city, lying elecut two miles to the south of Lamispoors lat 15" 11" \" lon 76" 48 1. Nest to this place there are two magnifi cent Ilindoo temples, greatly re-sembling the principal pagedas of Bijanagur; also e mud fort with a ditch and glace, which has been a place of some strength but is now no longer occurled The traveller from the north observes here for the first time the mud cotts es pointed with alternate stripes of red end white according to the prevaling practice in the villages south of the Arisina. The old itaja of ilyanagur resides principally at Camispoor .-(Fullarion, 3c)

Carras—A trading town on the north coast of Sumatra principality of Siak, mentioned by the early Portuguese writers and still one of the most floorability Bilaly settlements in the straits of Valacca. Its principal export in Singapoor is cofficially the samually increasing Bome part is grown in the neighbourhood, but much the largest proportion is throught down from the mountains of Mennicabow where it was culturated for the first time about fifteen years ago.—(Singapoor Chronicle 9rc)

CAMPOULY.—A small vallage with o fino tank and temple attented at the foot of the great Bhore ghaut in the province of Aurungabad division of Callinnee, about forty-eight miles E S.E. from Bombsy

Camsoor (Camseps the aspect of desire).—This was formerly on extensive Hindoo geographical division, extending from the never Korotoya where it juned the ancient langdom of Matsya, to the Dekkor basini, a river of Assam which enters the Brahmaputra a short distance to the east of the castern Kamakhya, said to be fourteen days' journey by water above Jorhaut, lately the modern expital On the north Camroop extended to the first range of Rootan hills the southern boundary was

where the Lukhya river separates from the Brahmaputra where it ad joineri the country called Bauges (Bengal). According to this description Campon juvides a large division of Arsam (which still retains the name), locluded the whole of the mostern divisions of Bungpoor and Banganastry, a portion of the big monday distinct and Sither together

with Munipoor, Gentish and Cachar The early history of this region is involved in obscurity, but it has the reputation of having been in early times a sort of Paphian land tho seat of promiscuous picasures t which description the loose manners of its modern inhabitants as may be seen under the erticle Ruoppoor, tend strongly to justify Besides this, a misterious swe hangs over it as having been the grand source of tho Tantra system of mame the doctrines of which permit mony indulgences to new converts and enable the Brah mins to share sensual gratifications, from which they would otherwise ba excluded The Tantras chiefly 10culcute the worship of mascible fomale spirits whose hostility is to be eppeased by bloody sacrifices to be eaten afterwards in consequence of which the Tantras are held in great estimation by the Brahmins of Beo gai Jadoo, or witcheraft, is sunposed to be still generally understood by the old women, who are employed by the young to seeme the offection of their paramours.

At present however the Brah mins of this region ore not considered very profound ennjurors elthough formerly held in great estimation for their knowledge of the black art There are still some preteoders, and rich people sometimes give five and six rupces for casting out n devil. In some divisions of Campoon few have of late been affected to this way. owing it is said to the great importstion of learned men from the south . in others the facility with which the demon allows himself to be expelled is attributed to ins heing of o low caste. The bites of serpents are cured to the name of Bishahari and

the small-pox in that of Sitola, but other diseases and devils are removed in that of Kamakhya, and occasionally of the old goddess of the Teesta river.

In the north-eastern extremity beyond Rangamatty the temples are miserable huts, and few are sufficiently high to admit any thing larger than a goat or a pig. The only two of celebrity in the neighbourhood are Kamakhya, and one at Haldola dedicated to Rama, both of which have endowments in land. Among the natives of Camroop the village gods are the principal objects of worship, as by offering sacrifices they have an excuse for eating meat. By the purer tribes of Bengal the household gods are more followed, and most of them have also salgrams. The houses of such persons may be discriminated from those of the aborigmes by their having in the vicinity a rude heap of earth for receiving the sacred stone

(the salgram) on festivals.

The chief object of worship and vencration among the Mahomedans, in which they are joined by many Hindoos, is Ismael Gazi, a conquering saint, who first reduced the country to the faith of the Koran. lies buried at Goraghaut, but several precious relics are said to have been builed in Camroop, over which monuments have been erected. holy person issued three orders to the zemindars and to the officers employed under them in the collection of the revenue; 1stly, never to sleep in bedsteads, 2dly, not to beat the inhabitants; and 3dly, not to suffer milk to be adulterated with water. At present the two last are very generally disregarded, and the first evaded, which is done by sleeping on a bed with a bottom of plank, it being supposed that the saint's prohibition was confined to a bedstead with a bottom of cords.

Although Camioop is considered by the natives as very distinct from Bengal, and although all its original tribes have features indicative of a common origin with the Chinese, and the more eastern races of the ancient continent, yet the language of Bengal, in different stages of purity, prevails almost universally. lects differ very considerably at short distances, and are teckoned six in number. There is great reason, however, to believe that it is not the original language of Camroop, and that it did not make any great progress till of late. It does not appear, however, that the ancient Hindoos had any record of a kingdom intervening between Camroop and Assam. The modern Hindoos are of opinion that Camroop is bounded by Chin, by which, however, is probably meant the country between Hindostan and China According to Abul Fazel, the Chinese empire is the Mahachin of the Hindoos. Until quite recently, the Buman empire of Ava in fact scparated Camroop from

the Chinese empire.

This ancient province was, invaded by Mahomed Bukhtyar Khilyee, in A.D. 1204, immediately after the Mahomedan conquest of Bengal; but after losing nearly the whole of his army, he was compelled to retreat. From the prodigious ruins of public works still extant, and the magnificent public roads that had been constructed, it is probable that this remote corner of India in ancient times enjoyed a superior form of government to any that it has since expe-Between the date last-mentioned and the reign of Acber, the Musulmauns of Bengal made many attempts to accomplish the subjugation of Camroop, but were invariably frustrated. The mode of defence adopted by the princes of the country, when attacked, was to retire with their families and effects into the jungles, until the violence of the lains, the inundation of the country, and the pestilential effects of an unwholesome climate, compelled the invaders to capitulate, or to attempt a de-At length, about structive retreat A D. 1603, towards the conclusion of Acber's reign, the Moguls took permanent possession of the western portion of Camioop, which they partitioned in four divisions, viz.

Ostrocul, Dalhlacul, Bengal Bhumi, the name of Canara to the division

and Camroop Proper

An officer, with the title of nabols. conunued to reside at Rangamatty with some troops ; but it seems to have been the wish of the Delhi sovereigns to encourage the growth of reeds and forests, to serve as a bound ary against the locurations of the Assamese and henceforward the tributo paid by the nauve chiefs in this quar ter was little more than nominal Left to themselves the petty chiefs would have been entirely unlater rupted in the process of cutting each other a throats and reducing the country to a desert, if they had not been assisted in the task by the Bootanners who subdued several, and continued advancing until they were met by the gipantic power of the Company which suppressed all treal invasions .- (F Buchanan, Ge)

CAMUTAER.—A town in the northern Circars, district of Guntoor for ty-seren miles north from Angoli; lat. 15° 56 \, lon 79° 55' E.

## CANARA

A large province on the west coast of India, extending from the 12th to the 15th degrees of north latitude To the north it has Cos and the district of Gunduck lo Bejapoor; to the south the Malabar province on the east Mysore and the Bala haut ceded terntones and on the west the aca It extends 180 miles along the seacoast, and in 1807, according to Mr Thackers, contained 4 622 square miles below the ghauts, 2 758 (including Bilghy, Soonds, and boopsh) above the ghauts making a total of 7.380 square miles of wild, rocky and uneven country The tract disuncoushed in our maps as the province of Canara, by a fatality unex ampled in history aeither is nor ever was known by that usme to the ncople of the country or of any part of India. Voyagers and Mahomedan strangers finding that It was a dependency on the Lingdom of Conara, ood probably that the officers of government spoke that language, gave

called by the natives Tulava, which name however applies more particidarly to the country north of the river Chan lenghlei Canara le a cor runtion of Caroata the table-lan l above the ghants. The British province thus named is composed of the mantime countries of Tulava Haira. and the adjacent parts of Malabar, and the Hindoo Kankana (the Con can). It was transferred to the Bri tuh government in 1709 and now forms one of the collectorshins under the Madras presidency, but in geogra phical description is usually distan guished as north and south Canara under which heads further topogra physi details will be found In this province the western ghants

lo some places approach near to the seat to others branches of rocky hills stretch from the ghants towards the sea, occupying great part of the surface. The village lands however are well cultivated with nee especially those through which a ruce runs, or an arm of the sea; but where there is no Inland pavigation Im provement is backward. The rugged surface of the country renders it nocessary to transport the produce on the heads of the personary bullocks being seldom used The chinate ond aml of Canara are much like those of Malabar The rams set in about the middle of May I fall beaviest, with aqualla of wind in July and continue to the ead of September during which acason all trade is interrupted Sluns guit the coast and insurences ara vold until the end of September on shore during the Interval, work of every port is executed within doors, and burgains and accounts are settled. As in Malabar, the natives here live mostly every man under his own tree but in the loterior there ore some villages, peopled chiefly by Brahmus and shopkeepers. The roads in Canara are passable though inferior to the military highways in Malabar but they are less necessary as the trade is greatly conveyed by water the population and cultivation following the courses of the rivers.

As the natives do not require roads, it would be oppressive to compel the inhabitants to make them, as governmentalone would benefit by their construction, in facilitating the progress of troops, stores, and travellers

The soil of Canara is red and gravelly on the high grounds, sandy near the sea, and in valleys well adapted for the cultivation of rice; but it is the chmate rather than the soil that renders the province so productive. The crops are usually watered by the rains, but streams are sometimes dammed up to preserve the water for the late crops. The land is divided into two classes: the first is capable of producing two, or even three crops of rice, the second a crop of rice and one of some other coarser grain; the third a crop of rice only. Manure is scarce, and the incessant wet and want of good pasture so deteriorate the cattle, that they are not much taller than long-legged goats cultivators sow and plant rice from May to July, and reap from September to December inclusive of good land requires by computation eighty-eight seer of seed, and may produce 1,269 seers There are cocoa-nut gardens in Canara, but not so many as in Malabar, tice being justly thought the surest and most valuable Some sandy ground production along the beach and banks of rivers is, when not too wet, peculiarly adapted for the growth of cocoa-nuts. In such situations the trees are planted either in a scattered manner, or in regular gardens, where they have been left untaxed, and ought to remain so. When a proprietor plants a garden, he usually manages it himself, letting off a few trees to a toddy drawer, who pays a pagoda annually for ten, twelve, or fifteen trees. Good trees are said to yield from fifty to one hundred nuts annually, in four crops; weak trees less than fifty nuts Betel and pepper are produced above the western ghauts, where the soil and climate are more fitted for their production than in Malabar

The greater proportion of the lands in Canara are private property, and ori-

ginal inscriptions on stone and copper establish the antiquity of the institution These consist of the donations of ancient princes to pagodas, &c., granting the land-tax accruing from certain lands and villages, and thus transferring it from the treasury to the individual specified; but the property in the soil was not conferred, because not claimed or possessed by the sovereign. In instances where the absolute property in the soil is granted, the deed of gift expressly mentions the prior purchase of the right These inscriptions on stone and copper are found in every part of Canara, and in every pagoda, and complete investigation of them would tend to illustrate the ancient history of Canara, perhaps of India. The different princes of Bednore, Bijanagur, and even of Mysore, seem never to have questioned the general rights of the people, although arbitrary assessments, and particular acts of oppression, may have rendered private estates of less value The culture bestowed by the land-owners on then estates, proves that they always confided in the justness of their title; and in fact that they have been chiefly rendered valuable by the pains devoted to their improvement. Land is frequently pledged, and is, generally speaking, deeply encumbered usual practice of pledging land renders its sale less common, but, notwithstanding the aversion felt to the total alienation of their patimony, there are many instances of its actual sale On these occasions it usually brings from eight to twelve years' purchase money on the clear rent; but the inequality of the land-tax, and the distance from great towns cause the value to vary, and to render it in some places not salcable The land-tax is heavier than in the northern parts of Malabai, and the soil is more completely cultivated, which is probably the cause of the comparatively higher price of land in Malabar.

The lands are leased to tenants at will, or fixed tenants The proprietors have power to turn out or raise

the reats of the first, but it is reldem done The rent lies between one quar ter and one half of the gross produce Hands and stock are scarce and as the country gets more populous rents will probably rise. The fixed tenants are a kind of sub-proprietors and are in some respects more independent than the proprietors from whom they hold. The great differ-ence between the laids in the Visia bar and Canara provinces, an I those of the other British districts in the south of India, is that there they are verted In communities, liere in individuals The adlaces above the western chants are like corporations communities municipalities or republics possessing the whole of the lands, subject to certain contributions to the sovereign who draws the whole land rent the government exacted the whole land rent from Valabar and Canara the present proprictors would not be

common but individual tenan s. The reot at present received by the proprietors from fixed tenants and tenants at will is estimated to be generally about one half of the gross produce the government tax being about sixty per cent of the landlord s rent, and thirty per cent. of the gross produce. With respect to landed tenores and the proportions which tho landlord's and the government share bear to the whole produce it is very difficult for the collector, assisted by o complete stoff of native revenue of ficers to come to any satisfactory conclusion. If the collector enmot ascertain this point with occuracy notwithstanding his daily intercourse with the cultivators it cannot be expected to be effected by a deputed itmerant who calls in an individual to be reterrogated which person comes prepared with a series of stones the offipring of his own genius for Insention In Canara the village accountant keeps a statement of the public revenue, but the peasant seldom keeps an account of his own profits and expenses he therefore rarely can tell what they have been ond if he be desired to guess, he will answer most guardedly especially

when he is led into the tent for the purpose of being questioned and magnify his losses and dealinsh his gain. On entering a field with him is it the same exageration of loss and absence of guin, which are juscel before the Orical Inquire in so strong a point of view that he is surprised to find the worthy man alter and lo good case under such horrible cir cumstances.

In a country so rocky and uneven as Canara where cattle are not only scarce but can seldom be employed: where every spot before it can be cultivated, must first be levelled with great labour by the hand of man tho expense of the first preparation of waste land must have been so creat that It never would have been at tempted unless the revenue assessment had been moderate. But even sfier the land is brought into cultiva tion, if it be neglected for a few years, it is soon broken by ileen culhes, formed by the torrents which In this fall during the monsoon province, and also in Malabar, the proprietor of land bestown on his little spot all that minote labour and ottention which is so important to Iodian husbandry Lach man lives on his estate and the oratness of the culture and of the enclosures shews the ardour with which the proprietor improves and embellulies his ground In countries similar to Canara in climate menners and institutions thosrguments and examples adduced by Arthur Young in farour of largo farms do not apply because there is a want of stock and general poverty which of present Leeps farms small; but even ofter stock has accumulated the Hindoo system of on equal chviaton among coherrs will always have a teodency to keep them small present in one district only of this province, this subdivision is so ex treme that the petty estates execed 22 000 in number some of them sleiding only one forom of rent.

In 1807 Cannra was supposed to contain 576,640 persons of which number the Brahmina were computed at 98,610 This great proportion of

Brahmins has probably conduced to the superior civilization of the province. The Jains are also more numerous than in the adjacent districts. The slaves resemble those of Malabar, and the Christians are numerous, but they are said to be of an inferior description to those in Travancore. Prior to the acquisition of this province by the Company, the population was much reduced in consequence of wars and internal fends, the destruction of many principal towns by Tippoo Sultan, and his sending above 60,000 Christian captives into Mysore, from whence but a small number ever returned. The country was consequently found in a state of desolation, with large tracts of unclaimed waste, overgrown with jungle, especially in the vicinity of the

This territory will probably never be a manufacturing country, because it produces none of the raw materials necessary to render it such, and because the heavy rains, which last so great a part of the year, are insurmountable obstacles to all operations which require to be carried on in the open air under a clear sky. But the same rains that deny it manufactures, give it a succession of never-failing crops of rice, and render it the granary of Arabia, Goa, Bombay, and Malabar, which would still continue to receive their supplies from lience, were even a heavy duty laid on exportation. A duty of this description would compel the rich Arabian (for there is no other depôt) who can afford to eat the rice of Canaia, to contribute to the revenue of the province, nor would the amount exported be affected by a considerable impost, although it would by any interference of the civil power. The rise of price does not much alaim these traders, but the uncertainty of getting the article at all, which the intervention of the magistrate always occasions, would effectually drive the traders from its ports. Even if some apprehension of famine be occasioned by a great exportation, this ought not to be restrained until certain symptoms

of scarcity appear, and even then the export to the other provinces under the British government ought never to be either prohibited or limited. The officers of government are generally more hable, in their zeal for the people under their immediate protection, to forbid exportation before necessity calls for so strong a measure than the grain merchants to export too much; and by a free export the hardships of scarcity would be equally shared by the common subjects of the British empire.

When an embargo on grain is laid

in Canara, the market there will be

either overstocked or much bette stocked than at Madras, so that the people of Canara may be surfeiting themselves with food, while their fel low subjects at the presidency are starving, and the lives of the people at the latter may be sacrificed to the groundless fears of the local authorities in Canara. Although even famine should be a certain conse quence of great exportation from Canara to Madras, the government must act for the general benefit of al their subjects, and it is the same thing to the sovereign whether his subjects die of hunger in Madras or Canata. Suppose a squadron of ships at sea to run short of water, and it happened through any accident that one had abundance: the commander would act very unjustly if he did not compe that ship to share her store with the others, in like manner the government ought to make the plenty of one assist the deficiencies of another, and a free communication is almost certain of preventing the extremities of dearth. In some particular cases government is justified in interfering to prohibit exportation to foreign states, but never to their own provinces, and all their public functionaries and inferior officers should be forbidden at all intermeddling, whatever, with bazars, markets, exports, and imports. The land customs in Canara bear hard on the people, and ought to be abolished, and a frontici duty, of necessary, substituted. A trifling revenue is raised by a toll on ferries, which ought to be suppressed, for, as in India nohody travels for pleasure it is a tax on indistry. The shork in dunes are trifing in amount and vesations in the collection, anil ought to be craved while the passes should be kept in good order to encourage the merchants, who bring lowe sandal and other upland articles, and take away sale.

The province of Canara continued undisturbed under a llindon dinasty until 1763 when it was subdued by Hyder On his taking possession it was a highly improved country filled with indostrious inhabitants, who eo 10) ed greater odvantages than their neighbours shove the ghauts. The amsil estates ioto which it was then subdivided were considered the octoal property of the holders and tha assessment was fised and moderate. In 1799, it was transferred to the British authority, and has ever since continued a solitary example of tranquillity of an easy ond regular realization of the revenue and of cenerai prosperity. This has been attributed to the nature of the tenures by which the lands are held to the moderate revenue exacted and to its local attuation whilele is advantageous for the disposal of lts produce Since the cession a great improvement has been exhibited among the people to dress mode of living and other per sonal comforts; the aggregate revenue has increased and is realized with singular punctuality notwith standing the nomberless estates from which it is collected The total pubhe revenue collected in the Conara district from the 12th July 1816 to the 11th July 1817, was 718,083 pagodas.

The atrocties which were formerly as common in Visibar and Caosta ore now much less frequent. The rebellions in Malabar were not so moch objects of police as earl wars, which burned with a smothered famo many years after the country devolved to the Brutsh canara has been quet ever since it was acquired because Major Munro took incassires to secure traoquility when the country

was first subshed. The police of Canara has since been excellent and compared with the former state of there countries the property and persons of the people ore secure of which fact they are ot length convinced. The collectors of the rerenue ought to soperintend the police but should not be too much hur thened with minute ordinances, which only tend to distract their attention from objects of greater importance. The judges would then be relieved from the vexatious and tedious duty of the criminal department and would have more time and a less harassed mind to strend to the decision of civil suits, which ore certainly more difficult and perhaps as impor tant, as the investigation of thefts ond robberies. If the decision of civil suits he delayed property becomes less valuable and the defsications of the revenue proportionally greater As there is no immediate preency for the decision of civil auta they are sometimes postponed by the judges but the courts of circuit come round and keep the district judge so on the alert in the criminal departments that the civil Judicature is liable to become e secondary consideration - [ Thackeray Wills Munro, I Buchanan, Hodson &c)

CANARA NORTH -The northero strains of the Conara province is al tusted between the 13th and 15th degrees of north letitude and was for merly partitioned into the three small sections of Cundapoor Onore said On learing Devakara the Ancola. Karnata country begins which ex tends below the ghauts and occupies all the deliles leading up to the moun The portion of the Hindoo hankena (Conean) comprehended in this division forming the Ancola section is larger than either of the departments into which Ilaga is subdivided All the country from Onore melashe es far as Goukarna le called I Iman and is said to have been for merly onder the authority of Ravaea. Ling of Lanca or Ceylon

North Canara produces sandal-

VOL. 1

wood trees, sugar-canes, teak, wild cinnamon, and nutmegs, pepper, and cut or terra japonica, the mimosa catechu growing spontaneously on all the hills of North Canara 1800, the unmber of teak-trees cut down each year amounted to 3,000. About Beiluin are many groves of the calouhyllum monthyllum, from the seed of which the common lamp oil is expressed The sen-const 15 principally occupied by Brahmm houses, the interior by villages of the Buntar caste, but it is not customary for the inhabitants to congregate in A few shops are collected together in one spot, but the other natives of what is called a village are scattered about on their farms. cording to the Abbé Dubois, between Tellichery and Onore there are no less than five different nations, who, though intermingled from time immemorial, still preserve their distinct languages, character, and national spirit.

Batticolla is principally in the Haiga country, and the most common farmers are a kind of Brahmins named Haiga, after the country, and a low caste of Hindoos, named Halepecas The Comarapeca are a tribe of Concan descent, apparently sudras of pure buth, all soldiers and cultivators, with a strong inclination to robbery. From the long prevailing anarchy they became so imprously ferocious, that they compelled many Brahmins to adopt their caste and customs A Brahmin of this division, who had written a nariative of the capture of Seringapatam, although he knew it happened on a Saturday, yet, because Saturday was an unlucky day, altered it to a Monday, as it now stands in his history Such disci epancies, therefore, in Hindoo chronology, must not be considered by the antiquary as any proof either of ignorance or error.—(F. Buchanan, Sc)

CANARA, SOUTH—The southern division of the province is situated between the 12th and 14th degrees of north latitude. The country to the

north of the river Chandraghiri, where Malabar ends, is called Tulnva by the Hindoos, and South Canara by the The soil of Tulava grows British. worse for grain as it recedes from the sen, but to judge from appearances, its occupiers are richer than those of Malubar, who are probably in easier circumstances than those above the ghants. The universal city of poverty in India, and the care with which every thing is concealed, render it very difficult to ascertain the real eircumstances of the cultivator. A good slave sells for about ten pagodas, or four guineas; free men of low caste, if they be in debt or trouble, sometimes sell their sisters' children, for they have no authority over their own progeny, who belong to their maternal uncles. In the northern parts of South Canara there are two castes, called Bacadura and Batadura, both slaves, with exactly the same customs; yet each disputes for preeminence, and will not eat or intermarry with the other. The Brahmins of Tulava, like the Namburies (Bialimins) of Malabar, pretend that the country was created expressly for their use by Parasu Raina, and that they are the only persons entitled to be called proprietors of the soil

Along the sea-coast from Cavai to Urigara, the inhabitants are principally Moplays (Mahomedans), who now possess the sea-coast as the Naus do the interior. Although the Nairs are more numerous than the Moplays, yet during Tippoo's reign, when not protected by government, they were obliged to skulk in the woods, and all such as could be catched were circumcized. This mode of conversion, however involuntary, is perfectly effectual, and the convert becomes a good Mahomedan, as otherwise he would have no caste at all; and although the doctrine of caste be no part of the Mussulman faith, yet it has been generally adopted by the lower ranks of Mahomedans in

The chief towns in this division of the Canara province are. Mangalore, Barcelore, and Calliampoor, there me no interes of importance but very mount ain stream. The larguage of Tolars or North Carrier I are strong recombinate in that of Mala we and the united observers are the sarrier giant in the larmage of Tulata there is a great admitter of world from a I the countries containing the fee nouthern notions of lark are Telmen, Makarathen, harritana, Gajura, and Ilyanda. In Tulasa the exact Squakrama is loose by which AD 1900 corresponds with 1722. The year lo solar.

lie, cheat, commit adultery, or murder. The fines are given to the god, that is to say, to the priest. They are scattered throughout Hindostan, but at present they are no where comparatively numerous except in South Canara.

The Jams have two sorts of temples: one covered with a roof, named Busty; the other an open area ealled Betta, which signifies a hill. In the Betta temples the only image of a saint is that of Gomuta Raya, said while on earth to have been a powerful king. His images are naked, and always of a colossal size The one at Curculla is made of a single piece of granite, the extreme dimensions of which above ground are thirtyeight feet in height, and ten feet in thickness. An inscription on it indicates that it was constructed in the year A.D. 1431.

Travancore, Malabar, and South Canara (or Tulava) alone escaped Mahomedan eonquest, until the two latter were invaded by Hyder A.D. 1765-6.—(F. Buchanan, &c.)

CANANORE (Canura).—A town on the sea-coast of the Malabar province; lat 11° 42′ N., lon. 75° 27′ E. place was purchased from the Dutch by the ancestor of the Biby, or female sovereign, who is a Moplay (Mahomedan) Prior to this, their family were of little consequence, but having acquired a fortress, considered by the Nairs impregnable, they became powerful, and were looked up to as the head of the Moplays of Malabar. The succession goes on in the female line, according to the custom of the country, under which system the Biby's son will have no claim to the sovereignty, the heir apparent being the son of his neice, who is the daughter of his sister. The territory of this female sovereign on the continent, in 1800, paid 14,000 rupees of land tax to the British government, which also receives all the customs of her port Most of the Laccadives are also subject to her authority but they are wretched islands, producing no grain, nor any thing beyond cocon-nuts, betel-nut and plantains. At the above date the Biby possessed several vessels, with which she traded to Arabia, Bengal, and Sumatra.

The town of Cananore hes at the bottom of a small bay, one of the best on this coast, and contains several good houses helonging to Mahomedan merchants. The people here have httle or no eommunication with the Maldives, although the sultan and his ıslanders are also Moplays. The small division attached to Cananore extends no where more than two miles from the glacis of the fort, and the surface of the whole is high and uneven. In 1800, the number of houses in Cananore and the district of Cherical was 10,386, and of slaves there were 4,670, mostly of the Poliar and Pariah castes; but a great proportion of the cultivation is carried on by hired men. A trade is carried on from hence with Bengal, Arabia, Sumatra, and Surat, from which quarters horses, almonds, picce goods, sugar, opium, silk, benzoin, and camphor, are imported; the exports are principally pepper, cai damoms, sandal-wood, coir and shark fins. So early as A.D. 1505 the Portuguese had a fort at Cananore -(F. Buchanan, Bruce, &c)

Cancao — A town in Cambodia, which in 1820 was the frontier of the Cochin Chinese dominions. Lat. 11° N, Ion. 104° E. This is a port of considerable commerce, although situated on a river not navigable for large vessels.

CANCOUPA.—A town and small district in the Mysore territories, twenty-one miles N. by W. from Chitteldroog. Lat. 14° 30′ N, lon 76° 23′ E.

CANDAHAR (Gandhara).—In rank this is the second province of the Afghan empire, and by Abul Fazel in 1582 is described as follows. "Circar Candahar is situated in the second climate. The length from Kelat Bujaseh is 300 coss, and it measures in breadth from Sinde to Furreh 260 coss. On the east lies Sinde, on the west Gour and Ghourgistan, on the south, Sewee, and on the west, Fur-

rch and Caloul) on the north west it is bounded by Ghurneen. The wheat of Candahar is very white and is act to a distance as a great rarity. In the riculty of Candahar town ace the rules of a great city, the native place of the Ghorian suitane. Between Hee mund and Caodahar is attualed the well known city of Viejmund uncertoocd in old a tronmuncial tables.

This prosince hasing in recent times been little explored Its modern boundaries are quite una certained and many of the stations mentioned by Abul Lazel hare quite disappeared from the mans, Compared with other quarters of Afghanistan, it is a hot climate no snow falling in winter and the small quantity of ice formed dissolring with the mid-day sun summer temperature la great winds not you und or the fatal simoom unknown | yet the climate on the whole has been noted for its sa-North-ea t of the capital Candshar has the sepect of a desert, and except small portions contiguous to inhabited places no cul tration le reen The buildings from o searcity of timber are constructed, as in Cabul of ann-burned bricks, and corered with a flat roof of the same material The country immediately round the city is well cultirated and fertile ; fur ther south it is poor, and deteriorates so much as it estends west that fur many days march towards the left bank of the Helmund river it is a complete desert

This quarter of Afghanistan hay log been sarely visited by Luropeans. our Information respecting its produce and inhabitants is very deficient A natire traveller of 170a (Seid Mustapha), among other productions nien tions wheat rice jource gram pease and seeds of different sorts dates, al moods and our of roses. The cultivators he overts are Vogula and Af ghams, and the vernacular longuage the Pushtoo Among the inhahitanta he reckons a considerable number of Hindoos (partly Kanoje Brahmins) both settled in the town as traffickers ond cultivating the fields and gardens In the secunty Like the rest of Af

gliantstan the country is thinky nee pled a consideral le portion of the natives still leading a pastoral and migratory life The principal domestie animala are camels an I dogs the last a superine breed for courage strength, and sagacity. Among the wild unimals uce tigers buffaloes deer, and antelopes With respect to religion a great majority of the laha-Intents are Mahomedans of the Soons reroussion, and the country abounds with mosauce, in which Scul Mustathe asserts both Hindoos and Mussulmans worship and in other respects oearly assimilate Candahar han in general been considered as an integrat part of the Persian empire, but it was with some intervals, almost two centuries aulicet to the Delhi emperors, until finally wrested from them by Sadir Shah On the death of that hold had man it became subfeet to Ahmed Shah Abdall, the Af than chief of Cabul an I has ever since remained attached to that state though with a very fluctuating degree of obedience. Srid Musionia, LI plinifose, Lorster, fe)

CAMBARAE—A fortified town in Afhanistan, the capital of the Can dahar province; lat "6" II" \ [on 0"2" \ ] By Abull are! in 10" it is described as follows — Landshar is the capital of this circar; it has two forts "The heet its very accreant the cold temperate cacept in the months of December and January when water freeze. Heecare flowers and frums in abundance"

According to one tradition Canilahar was founded by Lohrasp a Per sinn monarch of great antiquity, but whose own existence is worse than doubtful; while another ascribes it with more probability to Secunder Zulkurnem (Alexander the Great) The ancient city stood until the predominance of the Ghillies when Shall Huseeur founded o new city moder tho name of Husternahad Vader Shah destroyed the old fortress and ottempted once more to alter the arte of the tuwn for which purpose he built Naderabad Ahmed Shah found

ed the present city in 1753, and also gave it a new name: but the natives still retain the old one of Candahar. During that sovereign's reign it was the Durrany capital, but his son Timour Shah transferred the seat of government to Cabul, whence it was subsequently transferred to Peshawer. The surrounding country is level, and naturally fertile; and being irrigated both by conduits and wells, and industriously cultivated, the production of grain is abundant. The gardens contain vegetables, and excellent fruits and melons, eucumbers, &c. are raised in the fields. Madder, assafætida, lucerne, and clover are plentiful, and the Candahar tobaeco has long had an excellent reputation.

The form of Candahar is an oblong square, and as it was built at once on a fixed plan, is very regular. long and broad bazars meet in the iniddle of the town, and at their point of junction is a circular space, about forty-five yards in diameter, covered with a dome, into which all the four streets lead The central space, called Chassoo, is surrounded by shops, and here proclamations are read, and the bodies of criminals exposed. The town is plentifully supplied by two canals with water drawn from the Urgundaub, and erossed in different places by little bridges. From these canals lateral conduits are carried, above and below ground, to almost every street in the town.

Candaliar is divided into many quarters, each occupied by one of the numerous tribes, the aggregate of which composes its population, in 1809 estimated at 100,000 persons Almost every Durrany chief has a house here, some of which are said to be large and elegant, and there are besides many large caravanseiais and mosques, but none of the last handsome except one near the palace, in the vicinity of which stands the toinb of Ahmed Shah. This is not a large edifice, but has a handsome enpola, elegantly painted, gilt, and ornamented, and held in such veneration by the Durrames, that it is a sacred asylum for fugitives. Although, from the

regularity of its plan, Candahar is superior to most European cities, it is far from magnificent, being for the most part built of brick, in many instances cemented with mud. Among the commonalty the Hindoos have the best dwellings. Contrary to what is the ease m other cities of Afghanistan, a great proportion of the inhabitants are genuine Afghans; of these the greater number are Duiranies. The other residents are Tajiks, Eimauks, Hindoos, Persians, Seistanies, and Balooches, with a few Usbecs, Arabs, and Armenians. Among the stationary population are a few Jews, but it has been frequently observed that this race is never numerous where Hindoos have settled as brokers and money-changers.

While the Persian and Mogul empires flourished, Candahar was a frontier city, and an object of much competition, being frequently lost and won, until 1638, when it was betrayed to the Emperor Jehangir by the Persian governor Ali Merdan Khan. On the decline of both empires, it was for a short time possessed by native Afghan chiefs, but in 1737, Nadir Shah having deposed Thamas Mirza, entered Afghanistan with a large army, and captured Candahar from the Ghiljee chief Hossem Khan, after a siege, from first to last, of eighteen months. On Nadir's assassination it was acquired by Ahmed Shah Abdalli, and during his life-time continued the capital of the Duriany empire. Travelling distance from Delhi by Cabul 1,071 miles; from Agia 1,208; and from Calcutta 2,047 miles —(Elphnstone, Forster, Seid Mustapha, &c.)

CANDALIA —A poor village in the province of Aurungabad, with a tolerable bazar and government bungalow, and an inn kept by a Portuguese, situated on the road from Bombay to Poona, distant from the last forty-two travelling miles. This place stands on the verge of the Bhoic ghant, and in the neighbourhood there is a cataract which flows the whole year, descending in four successive falls, about 1,200 feet, into a valley of ample

depth and consilerable gloom down which he stream afterwords win le to jun the sea a carly opposite in Tansiah under the name of the Calliance river. On a holl above this water fall and close to the great preciples, Mr. Flynintone cerecie a host where ho spent great part of each cold season.

## CNNDF158 (Khandesa)

A province of the Decean situated principally between the twentleth and twenty-second degrees of north lati To the north It is separated from Malua by the course of the Nerbuddes to the south it has Aurungabed and Berart on the east are the provinces of Gundwans and Reand on the west Gujerat limits have never been accurately defixed but it may be roughly estimated at 210 miles in length by eighty the overage breadth. Candel h was one of the small souhaha formed during the reign of Action from conquests made south of the Serlanda. It then occupied the space between Malwa on the north Berar on the cest ; and Ahmednug-ur afterwards Aarungsbad, on the west and south t but being a new acquiltion Its boundaries have since greatly finctuated lly Abul Fazel in 1682 It is described as fol

The Sonbah of Dandees. This soubal was originally named Khon desh but on the conquest of the for trees of Ascer the name was changed to Dandees. It is annated in the second elimate. In length from Poor gong which jons Ilindia to Selung bordering on the territory of Alimed august it incastices seventy five cost and the breadth from Jamood, which

confines it towards Berar and Pall joining to Vidwa Is fifty cost. It is boun led in the north west by Visiwa, hainch confines it in the south; on the cast her Berart an I on the north large mountains. The soutshief han desh contains thirty-two mathair greated 12/47 072 tungris."

Such were the ancient Mocul limits

of this proxuce t but in a report ly Mr I sphinstone, A 11 18 1 more accurate geographical boundaties are as ined of which the following are the principal Candelsh is bounded on the north br the hatpoors, or In judgee range of mountaines on the sooth by the Chandore fort range and the Adjuntee glaut. On the south west it is limited by the bys dree commonly called the ghauts ot the termination of which south of the Tuptee Is the hilly tract of the The plain of Landersh descends towards the Tuptce from the bills on the north an I south the east it is bounded by bindia a and the Nizam & territories on the Berar plane. On the west the plain along the Tupter stretches without interruntion from the hills to the sent but It is separated from the rich country about burst by a thirk sod extrasire jungle

Although Interspersed with law harren hills, a large proportion of Cander h le remarkal ly fertile being watered by cor lour atteams, on many of which expensive embankments have been constructed. In 1820 some portions of land remained in good cultivation, and others, recent y abandoned, conveyed a high notion of their ancient frutfilness, and capability of renovation But a large proportion of the surface at that alste was covered with jungle, awarming with tigera among the ruins of former sillages. This scene of desolation was most conspictions in the districts north of the Tuntee. which ot so remnte period yielded n large revenue but in 18 'O oversprend The anwith an poinhaluted forest tural beauties of Candersh Proper are murh enhanced by the number of limple rivulets, hardly ever dev, that

flow down from the table-land and

fall into the Tuptee.

The decline of Candeish may be dated from 1802, when it was ravaged by Jeswunt Row Holcar; next year it was diepopulated by famine, and its rum aterwards more slowly, but effectually, consummated by the Peshwa's officers. The Bheels now withdrew to their fastnesses, and made predatory incursions; the Pindarmes annually devastated the plains; while various insurgent bands of Arabs, having established themselves in strong-holds and ghurries, infested all the country in their vicinity. After the British conquest in 1818 the Arabs were expelled, and the plundering horse extirpated; but the Bheels of the Satpoora range (which, although not more than 1500 feet high, have a difficult access and pestilential climate) continued to give much trouble, and were only brought under by cutting off their supplies, and pensioning the rulers to restrain the excesses of their subjects. same plan was followed with the Bheels of the Chandore range, and with the Bheels and Coolies of Baglana, and after a short interval suc-Under such circumstances, ceeded. it may readily be supposed that there is no want of waste land in this province, where it is granted on most favourable terms to cultivators and speculators; but it will require a long period of time to restore to prosperity a territory that has been so thoroughly depopulated. The existing villages are for the most part built of mud, and protected by a miserable wall and fort of the same material, without ditch or outwork.

This is one of the original Maharatta provinces, and so remarkably strong by art and nature, that formerly twenty fortresses could be counted in sight, within one day's maich Prior to the British conquest in 1818 a considerable portion of it was possessed by the Holear family, having, like the adjacent soubahdary of Malwa, been partitioned between Sindia, Holear, and the Peshwa, to whose share the British government suc-

ceeded by conquest, and to large sections from the others by treaties and exchanges. The chief rivers are the Nerbudda and Tuptee, the principal towns, Boorhanpoor, Aseerghur, Hindia, Nundoorbar, and Gaul-

Among the hills, and along the courses of the Tuptee and Nerbudda, many Bheel Bhilla tribes are to be found, whose chiefs formerly commanded most of the passes. Blieels also possess the eastern portion of the ghaut range, and all the spurs and branches that usue from thence towards the south as far east They likewise spread Poona over the plains to the east, more especially north of the Godavery, and are even discovered in the neighbourhood of the Wurda. On the north they extend beyond the Tuptee and Neibudda, and are numerous in the Malwa and Gujerat jungles, and in all the eastern quarter of Gujerat. But it is in the wild tract stretching along the left bank of the Nerbudda, from the plains of Ncmaur to those of Gujerat, amidst the Satpoora, Adjuntee, and Baglana congeries of hills, that they have been least disturbed, and it is here we may expect to find their peculiar usages in the purest preservation. They are a jungle people, differing from the other inhabitants in manners and appearance, and by some conjectured to have been the autochthones, or indigenæ, of Central Hmdostan. Towards the west in Gujerat they meet the Coolies, and towards the south-east in Gundwana they come in contact with the Gonds; but the discrepancies that distinguish those tribes from each other respectively, and collectively from the low castes of Hindoos, have never been clearly ascertained

The Bheels and Gonds almost universally inhabit the interior, where they cultivate little, being naturally averse to agriculture, and addicted to hunting and rapine; the Cooles are found mostly, but not exclusively, on or near the sea-coast, as fishers and pirates, but, on the whole, more

cardized than the two other tribes Their common points of resemblance seem to be an asersion to regular in dustry, and a pronents to thering and roldery, in which they are so expert, that they were formerly employed by the native chiefs to desolate the lands of their adversaries. lo person the Bheris are small, dark complexioned men rearly in a state of nakedness constantly armed with n how and arrow and in many ere cumstances closely resembling the mountaineers of Boglmoor in the llahar province. The pore Bheels trace their descent from Rainouts. and in some tracts are distinguished by the term Bhdlalas. They are subdivided into an endiess spricty of tribes and families, each living under Its own Nail. In religion they are said to be Hindoos of the Brahminical persuacion-jet they bury their dead a marked distinction; and in feeding are addicted to many impure practices for they eat beef not pork and drink aparits of every ele-ceiption hear Adjuntee and sinning the Salpoora muse are many converted Mahomedao Bheels, who know little more of their new religion besond its name. Their language does not differ essentially from the rude dialerts used by the pessantry of the surrounding country From a census taken lo 1800 of the lilicel popula tion of the Vindhya range there did not appear to be more than alx to a square mile

Early in the fifteenth century Candeath was coverned by independent sovereigns claiming descent from the khaliff Omar and resident of Ascer ghur, their capital; but towards the close of that century it was completely subdued, and annexed to the Mogul empire In recent times and more especially when the Maharatta power began to totter, the greater part of Cendelsh had been usurped by Arab colonists, who infact with out any premeditated scheme were in a fair way of becoming persmount in Illadostan having olready all tho petty chiefs whom they served as mercenaries more or less under their

clomination. All of Ilnicar's possessions in Candens, having been coled to the British in 1818, and the Arab colonists continoing refractory ofter every other class had subsultted its subjugation was regulativ under Lortunately the Arabs had made a tyranniral use of their usurped nuthority, so that the great mass of the people were eager for theirex rul ion while the Araba were unt sufficiently nomerous to resist effec tually; get they dil real t for the alternative offered them was re-trans portation to their own country to which they appear to have had an extreme although not altogether ain gular repugnance borce wat te sorted to and the last body of Arabs aurrendered in December 1818; but mans of the libed chiefs trusting to their monotains and Jungly recesses continued refractory little these fastnesses they were pursued by vn rious British officers who expelled them from den after den and about the end of 1410 terminated this ho rathing and unwholesome warfare,-(Cinhastone Briegs Vislecim Fulfarton, Abul Fatel I remep Se)

Campeian (District of) - A British collectorate in the Recean, con sisting of various portions of the province of Candersh acquired during the Maharatta war of IKIK but inter mingled with villages belonging to bindia Holcar the Nisam and others. That this district is espable of great improvement, is evident from the dilapidated remains of more than 100 substantially built dams and aqueducts constructed for the purposes of irrigation which at a small expense might be again rendered arallable. It never recorered from the devastation of Jeswunt flow linksar's troops to 1802-3 and the subsequent famino of 1603-4 the Peshwa a destructivo farming system the Incursions of the Pindarnes and the ravages of the Bheels To these apparently suffi cient causes of ruln may be added the number of tigers with which the country absolutely awarmed auxty having been killed in one month; and 346

the destructive epidemie which swept off many thousands in 1821.

It was not until the beginning of 1819 that Aumulnair fell, or that Candeish could be said to be in our possession, when a vast extent of unreclaimed jungle was discovered, nearly onehalf of the villages having been deserted, and abandoned to the beasts of the forest. In 1820 the total jumma was 16,88,718 rupecs, but the net revenue realized amounted to The inhabionly 7,99,049 rupces tants, evelusive of villages, belonging to the chiefs above-mentioned, were then estimated by Mr Chaplin at 417,976 persons Capt. Briggs describes the agricultural classes as peaceable and moffensive, but timid and helpless, and ground to the earth by the multiplied calamities they had experienced — (Chaplin, Briggs, Elphinstone, &c.)

CANDELYE —A small village in Ceylon, nincteen miles S W. from Timeomalee, which in 1818 contained only sixteen families. The great tank here is about four miles in circumference, and is one of the best specimens of native exertion in Ceylon. The embankment is one mile and a third long, twenty feet in height, and at the base 150 feet wide, but at the above date it only served to water one paddy field —(Davy, &c.)

## THE KINGDOM OF CANDY.

The central and mountainous provinces of the island of Ceylon, until AD 1815, formed the dominions of the king of Candy, which have been roughly estimated at 12,360 square miles The rugged and maccessible nature of the territory, the insalubrity of the kingdom, and hostility of the Candians, have, until very recently, prevented any accurate survey even of the tracts under the immediate control of the British government passes on the western side, that lead through the mountains to the interior, are steep and difficult, and formerly were little known, even to the natives. After ascending the moun-

tains and penetrating through the boundary forests, the country presents few traces of cultivation; and proceeding onwards towards the eentre, the elevation increases, and the woods and mountains that separate the different eorles become more steen and impervious, it was in the midst of these fastnesses that the native dynasty so long preserved its independence against a succession of foreign invaders, and retained possession, under a sort of feudal constitution, of above two-thirds of the whole island. The ascent on the west side is more gradual, and the surface less covered with jungle, stagnant water, and putrid vegetation, it has accordingly been found much less destructive to the health of European troops than the eastern route to the interior.

Under the old Candian dynasty, these dominions were subdivided into dissavonies and ratties, the first equivalent to provinces, the latter to counties. The following is a list of each, according to the old arrangement:

Dissavonies.

Nuarakalawea Wellassey.
The Seven Corles
The Four Corles
The Three Corles
Saffragam.
Ouva.
Wellassey.
Tamankadada
Matelé
Walapai é.
Udapalaté.

Rattres.

Doombera Udunuara.
Hawassea Patoowe.
Toompané.
Yatenuara

The whole of the Candian provinces, with the exception of the plains round Anurodburro, present a constant interchange of steep mountains and deep vallies. The excessive thickness of the woods that cover the face of the country causes heavy fogs and unwholesome damps to prevail, every evening the fogs full with the close of day, and are not again dissipated until the sun has acquired great strength. The valles are in general marshy, full of springs, and excellently adapted for the rearing of cattle and the cultivation of rice The high range of mountains that extend across the

Candian territory seems to divide the island into two different elimotes, by breaking the force and regularity of the monations. As may be inferred from the nature of its surface, the central region is ill odapted for inter and navieation for although many rivers or rother mountain torrents, intersect it they are deering the roise (with the exception of the Malareth Ginga) so ropid in their course and rocky in their chonnels as not to per mut the passing of boats while to the opposite season they are mostly dried in

The agriculture of Ceylon like that of the south of India is divided into the dry and the wet the first being chiefly practised on the aides of hills and on plains where there is no command of water; the last consists wholly of rice, and is carried on wherever sufficient water can be procured for the purposes of urnation In the low countries the paddy fields ore flat and extensive but among the mountaies they are merely a success sion of terraces, in each of which the crop may be seen in different stages of its growth in some, just regetat ing in others full grown inpening and fit for the sickle.

By the proclamation of General Browning in 1818 the general orservment on the entire paddy lands of the Caedian provinces was fixed or one-tenth of the onnual produce to be delivered by the cultivator at convenient storehouses to cuch pro-

vince.

There is every reason to believe that the Candians and Cingalese (or Ceylonese) were originally one peo ple, differing only in local and politi cal circumstances the first hoving always been secinded omong the woody mountains, and interdicted all communion with strangers while tho other was overspread with colonies from distant and hostile nations longuage religion and modes of bie they are essentially the same, but the Candians oro fairer stouter less polished in their manners and owing to their wearing o beard of a more ferocious aspect The upper classes

have long been pre-eminent, even omong lankson nations, for cruelty and perfidy and the lower orders when occasion offered have been sufficiently prone to imitate their superiors yet there is scarcely a doubt that the muld system of government and equod distribution of justice they are now experiencing will gradually render them as icoffensivo as their brethren on the sea-coast.

Until 1815 the intercourse between the two classes was almost as com pletely cut off as between the most anyage and inveterate tribes of North America. While the royal form of government lasted the king was the sole proprietor of the lands occupied by his subjects whose dependence was of the most abject description, olthough the monarchy was in somo respects elective The Line of Candy an 1800 was a nativo of the Carnatic by o female branch but by no means the nearest heir having been brought in by the influence of the prince mi nister, or chief adigar In theory, the constitution was the purest despottem, but in practice an oristocracy, the combination of a few chiefs gene rolly orranging the succession. the lower classes the Lings were venerated as desties, and worshipped with the bisest adulation although most of them oppear to have been despicable tyrants Tho nobility and courtiers do not sprear to bave been deficient in ocuteness and capacity for business to the conducting of which they always displayed such a proceess to satisfue falsehood cunmpg and political finesse, us to ren der treaties or engagements with them o mere wasto of time and paper and the court Itself a perfect hothed of faction conspiracy and rebellion,

The Candisa's of the Interior recely congregate into populous communities. Candy the metropolis may be called a large village but the king dom contains no other the ontyres preferring either small honders or desaded dwellings Each little district compreheads within itself overy article of necessity linxures such as satt saft ish, and tobacco are august

348

plied by itmerant Malabais or Moor-The higher ranks use various curries, and eat eggs, fowls, game, and different kinds of animal food; but beef they reject with abhorrence. Those who have a great deal of leisure, amuse themselves with cardplaying (which they appear to have learned from the Portuguese), or in listening to wonderful stories, poetry, With respect to general and music. civilization they are inferior to the Cingalese, who are at least on a parwith the common Hindoos of the continent, while their upper classes, in conrtesy and polish, are not inferior to the most wily Maharatta Brah-Indeed, it is probable that the modern Candians are much the same as they were 300 years ago, when first visited by the Portuguese, at which erathere is every reason to believe their manners had continued unchanged for an indefinite number of preceding centuries.

The Candians and Cingalese appear entirely ignorant of mathematics and geometry, and even of arithmetic their knowledge is very limited. They have figures of their own to represent numbers, but for the purposes of business have adopted the Hindoo system of notation. Their weights and measures are most maccurate, one of their modes of estimating distance being the place between two spots from whence a loud holloa may be heard. Four of these make a gow, and five gows a day's journey, or from twenty-five to thirty The silver coin or token in circulation, called a riddy, is merely a bit of silver bent into the form of a fish-hook, and worth about sixpence. Being accustomed to make their purchases in the way of baiter, metallic money is but little used by the central Cingalese, of which fact an idea may be formed from the circumstance that the whole revenue in specie of the late king did not exceed £1,500 sterling.

The Cingalese are tolerably expert at casting figures of brass and copper, of which a favourable specimen is still extant at Candy, in a figure of Buddha. Ores of iron and manganese are the only ones that have been discovered in Ceylon. Their blacksmiths can make gun-barrels, and even gun-locks, which, although coarsc, are quite serviceable. Their hones, composed of kapetia, resin, and corundum, reduced to an impalpable powder, are particularly good art of manufacturing gunpowder is generally understood, but shews little refinement, no attempt being made to granulate it, so that they are obliged to use it in a state of very coarse powder or dust. The radical of the Cingalese language is the Sansent, and like the Javanese it is said to have three distinct dialects, one for addressing majesty, one for rchgious purposes, and another for daily intercourse They write neatly and expeditionsly with a sharp-pointed iron stile, on the leaf of the talipot palm, colouring the characters afterwards by rubbing them with a mixture of lamp-black and gum. The subjects of their manuscripts are chiefly theology, poetry, history, medicine, and astrology. The first year of Sakka corresponds with 621 of Buddha, and with AD 78 of our era. In 1811, when Capt. Canning was at Rangoon, a sacerdotal mission to the Burmese sovercign of Ava arrived there from Candy, both nations professing the same doctrines; yet the king of the country last-mentioned was himself (as his ancestors had always been) of the Brahminical persuasion.

When the Portuguese arrived in Ceylon, they are said to have found it occupied by only two classes of inhabitants, the Bedahs in the northeast, and the Cingalese in the southwest, but it is probable that even then the Carnatic races had obtained a footing, as there is no tradition extant that the Cingalese ever inhabited the parts about Jafnapatam. The most singular portion of the Ceylon population is the Bedahs or Vaddahs, who inhabit the inmost recesses of Their descent has never the forest been traced, and they appear to differ so much from the other natives, that, like the Bheels, Gonds, Coolies, and

Boglipoor savages of Hindorina they have been considered aboriginal They are scattered over the woods In different parts of the Island, but are most numerous in the province of Butan north-cast of Candy where they subust by hunting deer and other wild animals, and on the fruits that grow spontaneously oround them for they never cultivate the carth They sleen on trees or onder them, and clumb un like monkies when alarmed A few of the less wild truffic with the Candiana, giving lvory honey, wax, and deer, in exchange for cloth fron, and knives; but the untained race named the Rambah Bedahs are more seldom seen even by secident, than the most timid of the wild animals

Although the Candian nation was governed in a most arbitrary manner, yet its customs and prejudices were shared and respected by their monarchs and they were justly proud of being exempt from a foreign soke. In the number and extravaesnee of their titles the kines of Candy sield ed to no eastern potentate, and, like the emperors of China, they were viewed by their subjects with a mystenous reverence. There were generally two adigars or ministers and it was a maxim of state policy to oppoint them from different factions. The next lo rank were the deseaves, or superintendents of corles and also the principal military command ers. Much the greatest proportion of the king's revenue grose from con tributions levied irregularly by his officers two or three times a year, and consisting of precious stones, wory cloth, corn, fruit, honey, wax, arms, &r &c.

In A D 1798 the ling of Candy died and the chief adigat raused to the throno a young nativo of the Carnatic to the projudice of Mootoo Swamy and other candudates of the royal race In 1803 n war enaued of a most destructive nature (from the pestilential chimate) to the British troops engaged wheth lasted with different vicusitudes until 1804, when a tact cessation of hostilities took place without any regular treaty.

such a document being considered no additional security for its permanence In 1815 what foreign violence could not accomplish was effected by the Insanceruelty of the Ling which ren dered him so detested by all classes of his subjects, that they implored the assistance of the Ilritish government to drive the monster from the throne In consequence of resterated supplientlans, in February 1815 a British army entered the Candian territories. and the king fled from his capital pursued by his own troops and subjects by whom he was captured, plandered and reviled in achieving this long protracted conquest the resistance in a military point of view was trifing and principally aroso from the indesembably rugged surface of a country intersected by mona taux, jungles, and morasses Indeed, under existing encumetances, the ex pedition could not have been under taken without the concurring wishes of the chiefs and people without whose aid and acquiescence it could not have been commenced far less brought to a successful Issue without the sacrifice of a shocle life The peace of Ceylon now appeared

Imperturiable even the climate in diested an improvement, the mor tality among the Luropeans haring decreased most remarkably But the calm was of short duration, for in the course of two years no lasurrec-tion was exerted by the turbulent ambition of a few discontented chiefs, and kept alive by their permelous in fluence over a people habituated to the most implicit obedience for lo fact no charge or accusation was ever brought against the administration of the British government. In Septem ber 1817 Intelligence was recented that a pretender to the throne (o native of the seven cories who had been a Buddhist priest), with two old and six young priests, had taken up his abode in the jungles of Wellasee Mild and conciliatory measures were tried at first but found unavailing and when vigorous exertions were resorted to the usual afflictions from disease and climate were experienced

Protected by their wilds and fastnesses, the insurgents persevered obstinately in their rebellion, and involved the British nation in an immense expenditure of blood and treasure, until the conclusion of 1819, at which date active operations had entuely ceased in the Candian territories. The old system, which greatly impeded all efforts towards unchoration, being abrogated by the rebellion, the interior of Ceylon was placed under the same political circumstances as the maritime provinces, and subject to the ilirect management of the British government, which had previously shared it with the native For three centuries the topography of Candy had been a matter of romance and conjecture; but during the last revolt every mountain, forest, brake, den, chasm and ravine were scoured in search of the enemy, who had hitherto considered their native thickets imperious to a European soldier .- (Davy, Public Documents, Percival, Cordiner, Knox, Ma-Jor Johnston, Harington, & c.)

CANDY —The ancient capital of the Candian principality, or empire as the Dutch called it, is situated in Iat 7° 17' N, lon 80° 36' E, about eighty miles direct distance N.E. from Columbo, and 95° SW. from Trincomalee. The travelling distance from Candy to Columbo through the three and four corles is eighty-five miles. Three miles from Candy, the Mahavilly Gunga, which almost surrounds it, is crossed at a ferry, where the river is two-thirds the size of the Thames at Richmond, its course rapid and banks finely wooded The climate is cool, averaging the whole year round about 74° Fahrenheit

Candy, the Maha Neura, or great city of the Cingalese, stands in the district of Yatineuia, about 1,467 feet above the level of the sea, at the head and widest part of an extensive valley Being situated on the margin of an artificial lake, and surrounded by wooded hills varying in height from 200 to 2,000 feet, the scenery is

beautiful and romantic, but as a military position a worse one could The houses scarcely be selected that compose the only strect are all of clay, one story, and, with the exception of a few chiefs' dwellings, all thatched. The principal edifices, if they deserve such an appellation, are the pulace and different temples. The first occupies a considerable extent of ground; the last are numerous, every royul residence having its orthodox number of temples One of these contains the Dalada, or sacred tooth of Buddha, now in British custody, and (according to natives) their only legitimate ilocument of enfeofment, its possession entitling the holder to the government of the kingdom. Indeed, the capture of this holy grinder was by them considered of infinitely greater importance than any event that occurred during the late war. When taken by a British detachment in 1803, it was found to be a miserably shabby place of one long street. and in 1819 the total population of Candy was thought not to exceed 3,000 persons -(Davy, Major Johnston, &c)

CANE, OF KEANE RIVER.—Sec KEN RIVER.

CANNIA.—Hot springs in the island of Ceylon, situated in a low ground abounding with quartz, about seven miles from Trincomalee. When the thermometer in the air was 77°, the temperature of two was 101°, one 86°, another 107°, one 88°, one 105°, and one 91°. In the last, when examined by Dr. Davy, there were two or three small fish. The temperature of these wells is said to be liable to fluctuation, the hottest having been found so high as 110°. The whole are enclosed by a brick wall thirtysix feet long by sixteen broad. When analyzed nothing extraordinaly could be detected, except a slight trace of common salt, with a little carbonic acid gas and azote, the specific gravity being the same as that of distilled water. It is probable that all the wells are supplied from the same source, and that their temperatures

depend on the quantity of water thecharged into them .- (Dary, &c)

CANOON -A town to the Agra province, situated about eighty miles | S | from the city of Delhi; lat. 28° 18 N., lon 7.0° 61' E. On opproachin Canoon by the Helli road, the oppearance of the desert com mences. Three miles to the east of it ore sand hills at first covered with bushes but afterwards degenerating to maked piles of loose sand rung one above the other like waves of the sen and morked by the wood on tho surface like drifted snow went the soil becomes more and more and until it ends in the great descrit Ten miles beyond Canoon (which in 1804 was occupied by a detachment) in that direction is the limit of tho British dependencies in this quarter after which the Rappoot district of Shekawutty commences - (Llphia stone Ge)

Caraoony.—A small subdivision of the Gindwaon province bounded on the south by Sohn-croor, and intersected by the Sane river and its contributers stream, trooks and rinkts. It contains no towns of the leat importance Lake those of mony other tracts of this large and barbarous province its actinidates and cultivators had tribute occasionally extorted from them by the Maharattas.

CARTALBAROY.—A town in the low country north west of Cooch Bahar subject to Bootan; lat 20° 37' N, loo 89° 12' E

CANTON—A scaport town in the empire of China to which the European traffic has hitherto been exclusively coofined lat 23°7 N., ion 113° 14 E

The city stands on the eavtern bank of the Peklang river, which flows from the Interior in onavigable stream of 300 miles to this town, where it is rather broader than the Thames at London bridge and from hence falls ofter an odditional course of eighty miles into the soothern

sea of China, near its junction with which it takes among foreigners, the name of Rocca Tierry. The town is surrounded by walls obout five miles in circumference on which a few cannon are mounted but the whole of its fortifications with o view in defence, ore in every respect deeps cable and only serve to prevent the attrusion of Luropeans

Although Canton is attucted nearly in the same parallel of latitude with Calcutta, yet there is coosiderable difference in their temperature the former being much the coolest and requiring fires during the winter months. The suburbs moy be frequeoted by Europeans, but they ore not permitted to enter the gates of the Tartar city; which however, io its orclintecture and exterior appearonce entirely resembles the suburbs The streets of Canton are very narrow pared with little round stones and flagged close to the sides of the houses. The front of every house is a shop and those of particular streets are laid out for the supply of atrangers Clima-street (named by the scamen Hog lane) being appropriat ed to Europeans; and here the productions of almost every part of the globe are to be found One of the shap-keepers is always to be found sitting on the counter, writing with o camel s-bair brush, or calculating with his swonnen on which tostru ment a Chinese will perform operations in numbers with as much celerity as the most expert European nrithmetician. This part of Canton being much frequented by the senmen every ortifice is used by the Chinese retailers to ottract their ottention, each of them hoving an English name for bluself painted on the outside of his shop besides o onmber of advertisements composed for them by the sailors in their own peculiar idiom The latter, it may be supposed ore often duped by their Chinese friends, who have in general pleked up ofew sea phrases by which the scamen ore reduced to enter their shops t but they sult each other ex tremely well of the Chioese dealers

possess an imperturbable command of temper, laugh heartily at their jokes without understanding them, and humour the seamen in all their sallies

The foreign factories extend for a considerable way along the banks of the river, at the distance of about one hundred yards. They are named by the Chinese hongs, and resemble long courts, or closes, without a thotoughfare, which generally contain four or five separate houses. are built on a broad quay, and have a broad parade in front. This promenade is railed in, and is generally called Respondentia Walk; and here the European meichants, commanders, and officers of the ships, meet after dinner and enjoy the cool of The English hong, or the evening factory, far surpasses the others in elegance and extent, and before each the national flag is seen flying. neighbourhood of the factories is occupied with warehouses for the reception of European goods, or of Chinese productions, until they are shipped In 1822, during a dreadful conflagration that took place at Canton, the British factories and above ten thousand other houses were destroyed, on which occasion the East-India Company's loss was estimated at half a million sterling, three-fifths in woollens.

For the space of four or five miles opposite to Canton, the river resembles an extensive floating city, consisting of boats and vessels ranged parallel to each other, leaving a narrow passage for vessels to pass and In these the owners reside repass with their families, the latter of whom in the course of their lives but rarely visit the shore. The Chinese junks that trade to Batavia and the Eastern islands, lie in the centre of the river, moored head and stern, many of them of very large dimensions present these junks are almost entirely built at Bankok, in Siam parts under water are constructed of common timber, but the upper parts of teak, and iron bolts are used in fixing the frame and planking.

seams are neatly caulked with oakum made of the bamboo, and the bottom payed with a kind of rozin named dammer and quick-lime The bow is flat like the stern, but much smaller, having no keel or eutwater, and the stern has an immense channel or chamber, in which the rudder receives protection from the sea. The masts (of a single spar each), are from two to four in number, and of very unequal dimensions, the mainmast being greatly larger than any of the rest; and there is only a single square sail made of split bamboos on each mast, extended by yards, also of bamboo. There is only one deck, but the entire hold is subdivided into little cabins or compartments, well caulked and secured, to contain the goods, and afford accommodation to each adventurer. A considerable loss of stowage is of course sustained, but the Chinese exports generally contain a considerable value in a small bulk. Pumps are unknown or not made use of The cables are of twisted rattans, the anchors of iron-wood, having the flukes occasionally tipped with iron; the standing and running rigging are either of rattan or of coir, the fibre of the cocoa-nut husk, the whole to a seaman's eye presenting a most singular and grotesque ap-pearance. The deck exhibits the form of a crescent, the extremities being disproportionately high and unwieldy, conveying the idea that a sudden gust of wind would upset the huge tub, and, indeed, except before the wind, they are quite unmanageable, and require a crew of at least forty men to every hundred tons. Sometimes no less than fifty men are employed at once on board one of the largest in managing the helm; and besides the crew they take on board a crowd of passengers A junk bound from Amoy to Batavia, about 1,000 tons burthen, foundered at sea in 1822; her cargo, including erew and passengers, amounted to 1,600 persons, of whom 200 were saved by a British country trader.

Besides the defective construction of these junks, the Chinese are en-

tirely ignorant of natigation as a science and even of any practical useful knowledge. They keep no reckoning and take no of servations of the heavenly bother the latitude and longitude of places being quite unknown to them; neither do they make any allowance for winds, cur rents or leesay. These companies are divided into twenty-four part and secording to I'u i lalde are made lo Japan from whence they prolably ocquired their knowledge of its man petie influence Their sounce, how ever being always undertaken during a favourable monsoon, they set that head of their junk towards the quar ter they are bound to and blunder on with much less dams e than might be expected During the north-east monsoon they sail to Manilla, Banca and Batavia exporting besides goods o great number of their surplus population and return to Amoy and Canton with that from the south west.

The slupe and vessels of the Chinese notwints an ing their inner fections are greatly superior in construction, see and stutty to those of every alter Aslate people whe have not had the example or neutroneous for their own vessels that perform distant voja, est is there if the Portuguese call them some; the Indian sisanders was lang and we name them junks, as corruption of the word jung which means a large vessel in several lan guages of the I attern archipelago in contradisticution to boats or ca-

nock.

Almost the whole foreign commerce of Chua is conducted from the two martime provinces of Content and Folken but much the largest stare of the trade to the Eastern isles is carried on from the last. The most pumerous largest and rachest junks sail from Foklen which produces also nearly the whole of the black ten that is exported to foreign countries. The principal port of export is Iliamen which Europeans name Amoy or more sarrectly Em

mni from the name of the island that forms its excellent and capacious harbour At this place the security merchants are three in mumber, who axact from the adventurers to the Lastern archipelago a duty of six per cent, on axports and five per cent on imports. This commercial fater course has existed from the remotest antiquity and has always been most beneficial to both parties, more especially to China where a demand for the peculiar productions of the siles seems completely interwaven with the liabits manners and religious ceremonies of that singular nation, whose industry we constantly find directed either to of sects of mere neces lty or for the gratification of their semual appetites for it perer summer the character of intellectoal enterprise

Canton le abont fifteen miles above Whampos, in which distance there are fire chop or custom houses where boats are examined. The head tentiff, named by the mariners John Tuck, regulates the emperor's duties, respecting which the importer remains ignorant as they are paid by the our chaser of the goods which are generally weighted and carried off immedistely on landing The cargoes are weighed with I nglish weights of fifty Instead of fifty six pounds and after wards reduced to Chinese catties by multiplying by three and dividing by four and then converted to piculs by disiding the product by one hundred A picul weighs 1331 pounds English and a catty one pound and one-third English but the Chinese weights are generally inaccurate and must be attended to All goods in China are bought by weight even articles of food such as milk fawls hogs &c. The long measure is the cubit of fourteen inches and three A tacl is equal to 5709 quarters decimal troy weight; and in the Fast-India Company's accounts tha tnel of sliver is reckoned at six shill ings and eight pence sterling

The Chinese measure a ship from the centre of the fore-most to the centre of the misen most for the length, and close abaft the mainmast from outside, taking the extreme for the breadth: the length is then multiplied by the breadth, and divided by ten, the result being, according to their ideas, the mensuration of the ship. At the customhouse the ships that arrive are classed under three denominations, first, second, and third rates, and ships, however small, pay as third-rates. which is a heavy charge on the small vessels that frequent the port; nor is the duty augmented on ships exceeding the size of what they term firstrates The proportions are

cubits long cubits broad.

1st rates ..... 74 ......... 23

2d do ..... 71 ......22 to 23

3d do. 65 to 71 .....20 to 22

The duties on ships of the smallest class amount, on an average, to about 4,000 dollars, and not a great deal more is exacted for ships of Small country larger dimensions. ships frequently lie off Linting Foia, or large bay, until some of the large China ships from Europe, which have always spare room, come in sight, when they tranship their eargoes, which is usually earried up to Canton for one per cent, by which expedient the duties, customs, and measurement of the slup, as well as the emperor's present, are saved.

The monopoly of all foreign trade by the policy of the Chinese government is consigned to a limited number of merchants, seldom exceeding eight, but occasionally more 1793 they were twelve, in 1808, All foreign cargoes pass through the hands of these meichants, who are commonly men of large property, and by them also the return cargoes are furnished them the East-India Company's supercargoes transact the concerns of their employers, they dispose of the goods imported, and purchase the commodities that compose the home-At the close of the ward cargo season they are generally indebted above half a million sterling to the Company, and have besides, property in their hands belonging to the Company and other British subjects, the aggregate of which has been estimated at two millions sterling.

The whole establishment of the East-India Company here consists of twelve supercargoes and eight wri-The latter have a small annual allowance and a free table, and they succeed in rotation to the situations of the former, who have also a free table, and annually divide among themselves, in shares proportioned to their seniority, a sum falling short of £80,000 sterling. This arises from a per-centage on the import and export cargoes, producing to the chief on an average of £8,600 per annum, and to the first, second, and third members of the select committee, above £7,100. The senior supercaigo has about £6,000 per annum, and the juniors in proportion, declining on a graduated scale, but none of the supercargoes have less than £1,500 per annum. Having, in addition to this, the accommodation of a free house and table, they may be considered as the best paid services in the world. The services to be performed for this liberal remuneration, consist in a residence for three or four months every year at Canton, during the season of intercourse with the hong or security merchants, to whom they deliver the imported goods, and receive the teas and other return produce. When the business of the season is finished, the ships loaded, and despatched to England, they retrie to Macao for the rest of the year, where they remain until the opening of the ensuing season. they have scarcely any thing to do, and are cooped up within a space not exceeding two or three miles, with scareely any society but what is The numformed among themselves ber of writers sent to China by the East-India Company, from 1821 to 1825 melusive, was six, or one per The expense of the Eastannum. India Company's establishment at Canton, computed on an average of the four years preceding 1823, was £90,858, the other expenses attending the China trade in China and

to the dignity of a science In like manner, fish-maws, shark-fins, and dried sea-slug, are imported in large quantities, and fetch high prices

From Bombay and the Malabar coast cotton, opium, pepper, sandalwood, putchick, shark-fins, libanum, elcphants' teeth, rhinoceros' horns, pearls, cornelians, and beads, are im-From the straits of Malacca and adjacent countries tin, pepper, betel-nut, rattans, sea-slug, and birds'-The principal articles imported by the East-India Company are broad-cloths, long ells, camblets, silver, lead, and tin. The probity, punctuality, and credit of the East-India Company and their agents, is known to be such by the Chinese, that their goods are taken away, as to quantity and quality, for what they are declared in the invoice, and the bales with their mark pass in trade without examination, through many hands, and over an immense extent of country, and are never opened until they reach the shop of the person who sells for actual consumption. Various miscellaneous articles are imported also as private trade by the officers and commanders of the Company's ships, such as lead, skins and furs, cochineal, window glass, clocks and watches, from forty shillings to the highest prices, fine cutlery, hardware, looking-glasses, and coral From the Eastern archipelago, besides the commodities already enumerated, rice, vegetable oils, cotton, tobacco, indigo, gold, tin, ivory, catechu, benzoin, pepper, cloves, mace, nutmegs, camphor, dry fish, and tortoise-shell.

The principal exports from Canton are tea, chinaware, gold in bars, sugar, sugar-candy, rhubaib, China root, snake root, sassaparilla, leather, tutenage, Japan copper, varnished and lacquered ware, drugs, leaf gold, utensls made of white and red copper, castiron, silk, raw and wrought, thread, nankins, mother-of-pearl, gamboge, quicksilver, allum, dammer, red lead, vermilion, furniture, toys, and a great variety of drugs Nankins are made of Chinese cotton, in a particular province of the same name, and are

exclusively a Chinese manufacture. The new teas seldom reach Canton before the month of November The Russians are excluded from the seaports of China, because a trade is carried on with them on the frontier of Siberia at Kiatcha, and the Chinese do not admit of two places of trade with the same nation

The glass beads and buttons worn by persons of rank in China are chiefly made at Venice, one of the feeble remnants of the great and almost exclusive trade which the Venetians once carried on with the East. The inhabitants of China make much use of spectacles, which are made at Canton: but the artists do not seem to understand the principle of optics, so as to form the eye-glasses of such convexities or concavities as to rectify the various defects of vision, but leave their customers to find out what suits them best. The Canton lapidaries cut diamonds, and their artists are extremely expert in imi-They mend, and even make watches, copy paintings, and colour drawings, with great success. also make coarse silk stockings, and have long been celebrated for the toys known by the name of balancers and tumblers. They generally assay their gold at Canton with touchneedles, by which, it is said, they can detect so small a difference as one two-hundredth part of the mixture.

Provisions and refreshments of all sorts are abundant here, and generally of an excellent quality, nor is the price exorbitant Every description of vivres, dead or alive, is sold by weight. It is a curious fact, that the Chinese make no use of milk, either in its liquid, or in the shape of curds, Among the delibutter, or cheese cacies, however, of a Chinese market, horse-flesh, dogs, cats, hawks, and owls are to be seen; and at table bow-wow (dog) pies liave frequently been caten by Europeans, instead of muced quack quack (duck) pics, and picased them mightily The country is well supplied with fish from the numberless canals and rivers, and

the inhabitants breed elso gold end silver fish which are kept in large stock ponds as well as in glass and choose space.

chion vaces. The lower orders of Chinese who engage as servants to humpeans, are extremely ready in acquiring a smittering of the l'nglish language and fertile in inventions in making themselves intelligible to their employers. All the business at Capton with I is ropeans is transacted in a jargon of the English language. The sounds of such letters or H D R and X, are utterly unknown and unpronounceable in China. Instead of there they substitute some other let ter such as I for R which occasions a Chinese vender of nee to after for sale in I nainh what is usually a very unmarketable commodity The com mon Chinese salutation la "bon, poo tle literal meaning of which 14" well not well The name Mandarm is unknown among the Chinese Tungulnese and Cochin Chinese the word used by oil these nations for a person to authority being much Mandarin Is a Portuguese word derived from the verb mandar to com mand. No correct estimate of the population of Canton has ever been formed but it is known to be very great

The intercourse between Purope and China by the way of the Cape of Good Hope began in A D 1.17. when Emaouel Ling of Portugal sent a fleet of eight ships to China with oo ambassador who was conveyed to Pekin and obtoloed permission to establish a trado at Canton About 1634 some ships from England visited Canton but made a most insuspicious commencement for o rupture, and battle immediately took place peace being afterwards restored the mesunderstanding was ottributed to the treachery of the Portuguese. In 1617 the Court of Directors in their letter to their a ent of Bantam in Java, desiro him to send home hy their ships 100 pounds of the best tey (ten) he could get but the first importation of tea is supposed to have taken place in 1000 when two

cannuters, containing 1431 pounds, were received by thowny of Hantam for it does not appear any direct Intercourse then exi ted with China. In A I) 1678 the Company Imported 4713 pounds of tea; but so large a quantity seems to hore glutted the market, for the imports of ten for the all subsequent years amounted io all to only 410 pounds purchased mostly of Surat and Madens 1650 we find the first natice of a ship sent direct by the I sat India Company to China. In 1700 there were three ports open for the reception of Lali h vessels, res I lmpo, Amor, and Conton. Since that period the Ilritish commerce with Canton has progressively increased though it has occasionally niet with tempo cary interruptions of no serious im portance and nothing approaching to a state of actual worfare buch on crent with a nation whose political institutions are remarkable among those of Asiatic nations, or indeed any other for the uncommon share of tranquality they are found by long experience capable of maintaining and for the security they affurd to life and property is highly to be deprecated, and every stimulant from mercantile or military rapacity to bring on such a catastrophe ou, most streouously to be resisted by the British nation

ing emperor in 1827
The impered this of the reigning

The imperiol title of the reigning emperor is 1 uen hwuy meaning an original ossembloge of natural beauties (the Canton pronunciation is une-fel). Immediately after his access

sion it was changed to Taou Kwang, which was fixed as the national designation, as the Chinese term it, or the imperial title of his present majesty. Taou means "eternal reason, or perfect good government," Kwang, "light, lustre, or glory," so that Taou Kwang may be rendered "reason illustrious"—(Staunton, Barrow, Crawfurd, Davis, Milburn, Elmore, Dr. J. Johnson, Macpherson, Quarterly Review, &c.)

CAPALUAN —A small island, one of the Philippines, lying due south of the island of Luzon, distant four miles; lat 13°50′ N. In length it may be estimated at fourteen miles, by five the average breadth

CAP AND BUTTON ISLES.—Two small isles in the straits of Sunda, the first lying in lat. 5° 58′ S, lon. 105° 48′ E; the second in lat. 5° 49′ S, and lon. 105° 48′ E. They appear to have originated from a subaqueous volcano, and the last contains two caverns where the edible bird's-nests, so much prized by the Chinese, are found—(Staunton, § c)

Carur Sungum —A Brahmin village in the province of Bejapoor, district of Noorgool, situated near the Sungum, or junction of the rivers Krishna and Malpoorba, and conspicuous from its white buildings. The Sungum is covered with low jungle, and the ferry across the Krishna, usually frequented by travellers from Poona to Bellary, is at the Toonghree gliaut, immediately below where the great channel of the Krishna is about half a mile wide —(Fullarton, &c.)

CARAMASSA RIVER (the destruction of pious works)—A small river that separates the province of Bahar from that of Benares On crossing this river from Bahar, the Bengal officers were formerly considered as having quitted the Company's territories, and received a batta or additional rate of pay, to defray the increased expenses to which they were subjected by their greater distance from the prewere forbidden even to touch the waters of the Caramnassa, but the inhabitants on its banks claim an exemption, which is admitted by the other Hindoos, although their aversion to the Caramnassa continues as strong as ever. By the contact alone of its baleful waves, devotees suppose they lose the fruit and efficacy of their religious austerities and pilgrimages, and they always cross its waters with the greatest caution. Major Rennell thinks it is the Commenases of Arrian—(Wilford, Forster, &c)

CARAMPOONDY.—A town in the northern circars, division of Palnaud, fifty-five miles west by north from Guntoor; lat 16° 24′ N., lon 79° 42′ E.

Carang Assem.—A town in the island of Bally, situated on the west side of the straits of Lombook; lat. 8° 28′ S., lon 115° 25′ E This place stands at the foot of the peak of Bally, in a populous and well cultivated country, and is the most considerable town on the island. The anchorage is also good, and refreshments abundant.

Caranja Isie (or Oorun)—An island in the province of Aui ungabad, between Bombay and main land, from which it is separated by a very narrow strait, lat 86° 56′ N, lon 72° 52′ E, five miles east from Bombay. To this island, which by the natives is named Oorun, convicts are sent from Bombay, and employed in cleaning tanks, repairing embankments, and keeping the roads in order. In 1813 the revenues of this small island amounted to 90,795 rupees, the charges to 15,662 rupees

Carculla—An open town in the province of Canara, which in 1800 contained above 200 houses, twenty-seven miles north by east from Mangalore. Lat 13° 16' N, lon. 75° 3' E. Near this place are the ruins of the palace of the Byrash Wodcars (or chiefs) the most powerful of the former Jain rajas of Tulava or south

ern seas, about thirty miles in circum ference; jing off the west coast of Bornee, between the first and second degrees of somb lamude. This island is high and woody with a peak in the mid lie generally cloud capped. It is inhabited.

Castion Java.—A small island in the rattern seas, about twenty miles in circumference surrounded by a cluster of smaller onesy lat 5 4 5 5 ton 110° Lb. This is a high woody island with a bill in the center where ships anchoring may procure wood and water. The Ilatch formerly kept up a small establish ment here under a testdent and officer a guard which is probably astill continued to percent they it and officer in the control of the first hand of the control of the first hand of the control of th

CARINOVA -Two Islands thus named situated in the straits of Nafaceas lat 1° 5 % fon 103° 70' F There isles are well assumed to rive a strong naral power the enimmend of the strate jet in 1819 they were uninhibited and still covered with primeral forests. The northern see tion of the larger island is mountain our but the southern, which occu mes three-fourths of the whole is low ond swamms The soil of the I stile Carimon is hard clay on a substratum of rock; yet some of the trees especially the lammerlant attain o considerable size Ti e only harbour lies In the north-east quarter of the lar gest island and is occasionally frequented by Mislay and Buggess prows -(Ibbetson &c)

Cari,—A small vallege in the provace of Aurungabod about thirty
males N V from Poona and opposite
to the fort of Loghur near to which
are some remerkable mythological
excanations or cave temples. The
chain of halls here runs cast and west,
but the excanated one protrudes at
right angles and the chief cave fronts
due west. Bendes the great cavern
there is o aute of spariments stranged
in two tiers of stories a rude unfinished work more resembling a nataral cavity than a cave temple and
also water ensisters out in the rock

The temple is arched, and supported he pillars with figures sculptured, representing elephants with riders for capitals. The length of the great ca vern is 1. Wheet and the breadth fotty The ribs of the roof are tunber and consequently cannot be supposed of equal age with the excavations; they are still clean ond in good reprir 'So figures of the desty are to be foun I while the parous nor any visible of ject of derution except the mystic unfirella; but the walls of the restibule are covered with cary ings in alto rel ero of clephants of hu man figures of both sexes and of Bud dhe whose symbols predominate throughout The Carli temples are considered by Mr. I rakine to be de-cideally Buddhist there being no vestiges in any of them of the list hankar of twenty four salnts of the John Without attending to this circumstance the two classes of temples are in danger of being confounded owing to the near resemblance of the lma, ex to the figures of Buddha as represented by his sect. The grand cavern here is stell in high prevervation is a fine specimen of the vaulted Buddhist cathedral and would make a unbid temple for my religion .- (Lord la lentia Tullarion Leskine M Gra

dam de) Carnatrayaga - A village in northern Hundostan, district of Gurwal situated at the confluence of the Ala cananda with the Pindar river lat 30° 16 No lon 70° 12'1 , thirty miles east by north from Seringur 2, 60 feet above the level of the sea. is one of the five prayagas or holy junctions, mentioned in the shastras and considered the third in respect to religious Importance In 1809 tho village consisted only of six or eight houses with o math or shrine la which the Image of Raya Carna was placed-(Raper, de)

## (Carnalaca)

A large province in the south of India, denominated the Carnatic by Europeans, and comprehending the former dominions and dependencies of the Arcot Nabobs, and extending from the eighth to the sixteenth degrees of noith latitude. The northern boundary commences at the southern frontier of the Guntoor circal, defined by the small river Gundigama, which falls into the sea at Montapilly. From hence it stretches south to Cape Comorin a distance of 560 miles, but with unequal breadth, the average being about seventy-five miles.

The division south of the river Coleroon is called the Southern Carnatic, and was rather tributary to the nabobs of Arcot than a substantive possession. Prior to the British sovereignty it was occupied by numberless rajas, poligars, and other petty chieftains, and partitioned into the districts of Tinnevelly, Madura, Marawa, the poligars' territory, and part of Trichinopoly and Tanjore The principal towns are Tanjore, Trichinopoly, Madura, Tranquebar, Negapatam, Tinnevelly, and Nagore

The central Carnatic extends from the Coleroon to the Pennar river, and contained the residue of Trichinopoly, and the subdivisions of Volconda, Palamcotta, Ginjee, Wandiwash, Conjee, Vellore, Chingleput, Chandgherry, Serdamilly, and a section of Nellore; the chief towns being Madras, Pondicherry, Arcot, Wallajabad, Vellore, Conjeveram, Chingleput, Ginjee, Pulicat, Chandgherry, and Nellore.

The Northern Carnatic extends from the river Pennar to the river Gundigama and the Guntoor circar, and included the remainder of Nellore, Angole, and some smaller sections, the chief towns being Angole, Carwaree, and Saumgaum In ancient times this last tract formed part of the Hindoo geographical division of Andlira, which reached to the Godavery, and the sovereigns of which, about the beginning of the Christian era, were very powerful in India

The principal rivers are the Panaur, Palaur (aur and aroo signifying river), Cavery, and Vaygaroo, all of which have their sources in the table-

land above the ghants. The vast height of these mountains, and their great extent, not only fix the boundaries of the two Carnatics above and below the ghauts, but by stopping the course of the winds, likewise divide the seasons The climate of the lower Carnatic may be considered one of the hottest in India, for although somewhat relieved on the coast by the prevalence of the sea and land breezes, yet at the distance of ten or twelve miles inland the sea breeze airives late in the evening, and much heated by passing over the intervening tract. It is common in May, June, and July, to have occasional showers, and at some period of that time to have three or four days of heavy rain, which cools the air, and allows the cultivation of dry grain to be prosecuted; the weather in July, though hot, is cloudy, with strong westerly

The soil of the Carnatic near the sea is composed of sand and loam, sparingly intermixed with the remains of marine animals. The inland parts contain hills of syemite, with a very small proportion of feltspar, the whole soil of the province appearing to consist of the debris of disintegrated syenite mountains According to local cucumstances, it is either a loam mixed with sand and gravel, and strongly impregnated with iron, or in low and wet places, a stiff red loam mixed with vegetable earth and fine sand, on eminences it is sand and gravel; it also contains much common salt, which in dry weather appears on the surface as a saline efflorescence. Near to Madras the soil is a heavy, sterile, salt loam; along the sea-coast and for some miles inland, at certain depths, marine productions, such as oyster and cockle-shells, are found. Trees will not thrive in the saline soil near Madras, which, however, does not extend further than the mount called Little St Thomas, from whence to Vellore the surface is saidy, and nearly as poor as in the neighbourhood of Madras, but more free from saline impregnation.

The general division of the country

to into hi is and low larder in the first all kinds of small gram being cultivated in the lat rice lo with di trictuas have not the advantage of being traversed by con a lerable tracts or in parts where water cannot be convered from these to the adjacent fields tanks are constructed which being filled during the periodical rame furnish water for the rice fel ledanne the dry season. Some of these are of great extent and were originally maile by enclosing low and deep spots of ground with a strong mound of earth a others of less magnitude for theuse of temples villages, organdens, are of e quadrangular form lined with stone and descending by regular steps from the margin to the bottom. Ita. gy is the small grain most cultivated. ne it meete a ready market every where among the poorer classes, whose chief aubsistence it is Is only cultivated in small quantities, the soil not being rich enough for tho cane a and Indizo is also cultivated The cotton but not for exportation chiefly raised is the common dwarf kind (the gorrypium kerbeceum) famines and scarcifles are much more frequent in the Carnatic and south of India than in the Bengal provinces

but less so than formerly The only trees that grow spon taneously on the barren spots of this province are the common bread tree (melia azadirochta), and the robinla mitis an Emt Indian tree of lofty growth which flourishes equally on the and hills of the Carnetic and on the muddy banks of the Gonges. The river water, after the rains is reckuped the best for irrigation, and next to It the tank water; that drawn from wells is called ealt by the notives, al though the quantity of real munate of soda held in solution be very smoll Springs lesoing from the surface are scarcely ever seen on the plains, but are frequent on the mountains and billy parts

In the towns and villages along the principal inph roods are choultries in the nouse longuage charact from whence the Finghish word is derived; the smaller ones are single aquare

rooms open towards the street when the roof is supported by stout aguar olilars ; in the walls are excavation I w lamps, fast an windows The larg shoultres are han home and exten sice had large, erected and endowe ly the munificence of a prince th generously or desire of fame of som rich individual or not uncommonly in the performance of some religiou yow A Brahmin reddes near who furnishes the traveller with food wa ter and a mat to be on and contigu ous is a tank or well for the pilgrim to perform their ablations. I ver where within forty or fifty miles suc preful structures are common, having been erected by rich merebonts of that city; but are generally kept ! so dirty n condition as to be disguit ing to I proposes; the adjacent tan or pond is equally filthy for althoug the natives appear less espable of

sepporting thirst than I uropean

they are perfectly indifferent as t

the purity of the liquid which the There are few districts can exhib so many large temples and other pul he monuments of former wealth an civilization as the Carnotle, when however almost all the large temple are built after the same model large area, commonly of a squar form le enclosed by a wall fifteen o twenty feet high, in the centre which stands the temple which as lotended to be concealed from publ view, is seldom raised above the aurounding wall; in the middle of or or mere sliles of the wall is o gatewe over which a high tower is built no designed for defence but as a histo rical monement of the god to who it is dedicated symbolizing his attr butes, and representing his adventure Formerly there were on asteolship number of forts and fortresses through out the Carnatic, mostly of a aguer form | but they are now, in cours quence of the long internal tranqui lity, rapidly crumbling to pieces t be the netural strength of the podtler selected for their construction wi ever continue and point out to fi tute e ca the alte of meny an extin stronghold, famous in military story. Towns and villages in an open plain are but of a day's duration compared with fortresses, especially if the latter derive any share of their importance from the natural strength of their local situation

The great mass of population in this extensive province profess the Hindoo Brahminical doctrines, the Mahomedans in comparison being thinly scattered over the country, except at the nabob's court, and in a few other places. In 1785 there were reckoned above 20,000 Christians of the Roman Catholic persuasion, and the Christians of all denominations probably amount to more than double that number. At present, in the Carnatic, a large proportion of the Brahmins follow secular professions, and almost entirely fill the subordinate revenue and judicial offices, besides acting as messengers and keepers of choultries Much of the land is rented by them, but, like the Jews, they seldom put their hands to actual labour, and never hold the plough, having their farms cultivated by slaves of the inferior Sudra castes, and the Punchum Bundam, who, although the most industrious labourers in the country, are for the most part Indeed, so sensible was Hyslaves, der of their value, that during his ininvasions this was the caste he principally endeavoured to carry away. There are a few Mahomedan farmers who possess slaves, but the most numerous class of farmers is composed of Sudras, some of whom possess slaves, but many of them perform all agricultural operations with their own hands

A great majority of Brahmins in the lower Carnatic are of the Smartial sect, who are votaries of Siva and followers of Sankara Acharya. Throughout both Carnatics, except at Madras, the Brahmins appropriate a particular quarter of the town to themselves, and generally that which is best fortified. A Sudra is not permitted to dwell in the same street with a Brahmin, while he exacts the same deference from a Whalliaru Pa-

riar, and other low castes, who are expelled to wretched huts in the suburbs Indeed, notwithstanding the great resort of Europeans and other foreigners to the Carnatic, the genume Hindoo manners are retained by a vast majority of the inhabitants in wonderful purity. If any person leave the smoke of his own tobacco at Madras, and goes to the nearest Hindoo village, not a mile in the country, he is as much removed from European customs and manners as if he were in the centre of Hindostan

The first irruption of the Mahomedans into the Carnatic was in A D. 1310, while Allah ud Deen, the scourge of the Hindoos, reigned on the Delhi throne, on which occasion he defeated Belal Deo, the Hindoo sovereign of Carnata. After this period occasional tribute was exacted by the Deccany princes, and subsequently by the Mogul emperors, but actual possession does not appear to have been taken until the conclusion of Aurengzebe's reign, in the commencement of the eighteenth century. In 1717 Nizam ul Mulk obtained the Mogul conquests in the Deccan and south of India, which from that date were severed from the Delhi throne.

In 1743 Anwar ud Deen was appointed Nabob of the Carnatic, and of its capital Arcot, by Nizam ul Mulk, then soubandar of the Deccan: and in 1754, after a well-fought contest between the different claimants, aided respectively by the French and English East-India Companies, his son, Mahomed Ali, was left in possession of that portion of the Carnatic recovered for him by the British In 1763 it was again surrendered to the Nabob Mahomed Ali, after having been a second time wrested from the French and their allies, the war having lasted with little cessation for fifteen years; and finally, in 1783, the British had to re-conquer it from Hyder and his son Tippoo

Mahomed Alı died in 1795, and was succeeded by his son Oomdut ul Omra, who died in 1801. Azım ul Omra was then raised to the throne,

the province of Arcot the pollams of Chittoer and the divisions of Sativaid Tioocrelly and Madura By the conditions of the treaty the nabob reserved to himself a clear annual revenue of from two to three lacks of pagodas unencumbered by any charge the British government undertaking to support an efficient civil and military establishment liberal settlement was also provided for the other branches of Nahomed Ali a family; and the British govern ment undertook to investigate and adjust the real and fictitious claims advanced against his estate for the liquidation of which a fund amount ing to 340 000 parodas annually was appropriated Commissioners at home and abroad with odequate establishments, were in consequence appointed, and the Carnatic debte have been under scruttoy ever lince 1805; but owleg to the perplexed natore of the reventigation and the nomber of forged documents produced it has not yet been concluded Up to the 6th December

The cuttom of usurious loans Puropeans to native princes has le been reprobated by the Best h verpment and its sanction withhe being convinced that nothing cui more effectually restrain the rules practice, than a ateady determinat on the part of the Court of Directo and of their government in India result every arrangement howe apecions which might be proposed their haudation

On the transfer of the province above narrated it was subdired into the following collectorates, wh comprehend also a few sections fr the upper Carnatle res.

1 Nellore and Angole includ part of the western poliams or zen

2 The northern division of Acc Including Sativard Pulicat Coong dy in the Barramahal, part of B ghaut and the western pollams zemiodanes,

3 Chingleput, or the jaglure.

The southern division of Are Including Cudalore and Pondleher

5 Trichmopoly 6 Tanjore

7 Madura including Dindigul Manapar pollums Rammad, and S vagunge partly in the Carnatie partly in the Mysore

8 Tinnevelly in the southern Carnatic.—(F Buchanan, Heyne, 5th Report, Sn T. Munro, Sn J. Malcolm, J. Grant, Reunell, Fra. Paolo, &c.)

Carnicobar Islr — The most

northerly of the Nicobar Islands, in

the Bay of Bengal, lat. 9° 8' N, lon. 92° 53' E. This island is low, of a

round figure, about forty miles in

circumference, and appears at a dis-

tance to be entirely covered with trees. The soil is a black kind of clay, and marshy, but produces with little care most of the tropical fruits, such as pine-apples, plantains, eocoa-nuts, excellent yanis, and a root named enclice. The only quadrupeds are liogs, dogs, large rats, and guanos. There is a great plenty of tunber, and some of it remarkably large. The natives require money for their provisions, and also expect knives, handkerchiefs, and other useful articles as presents. Ships calling here may obtain pigs, fowls, cocoa-nuts, betelnut, papaws, plantains, limes, and Snakes abound, and a shaddocks

species of ginger grows wild in the

woods.

The natives are low in stature, but well-made, and surprisingly active They are copper-coloured, with a cast of the Malay; the females are extremely ugly. They are naturally gay and lively, and drink arrack, when they can get it, in large quantities. Many of them speak broken English, mixed with Portuguese. Their hogs are fat, being fed on cocoa-nuts, which is the universal food for man, beast, Their houses resemble and fowl. bee-hives raised on posts, and are built on the beach, fifteen and twenty together The entry is through a trap-door below. They have no manufactures of any kind, procuring clothing and other articles from ships in barter for cocoa-nuts, live-stock, and fruit.

When a man dies, all his goods are burned with him, which prevents disputes among his heirs. On this occasion his wife must conform to custom, by having a joint cut off from one of her fingers, and if she declines

the amputation she must submit to have a deep notch cut in one of the nosts of her house Their religion is imperfectly understood, but seems to have no affinity with that of any of the circumpacent nations. A perfect equality appears to subsist among them; the more aged are respected, but exercise no cocreive authority. About A D. 1760 the Danes formed a settlement in Carnicobar, to which. they conveyed a number of cannon from Tranquebar, and named New Denmark; but the pestilential nature of the climate, after the death of missionary after missionary, compelled them to abandon it -(G. Hamilton, Lord Valentia, Haensel, &c.)

Canoon.—A town in the province of Coimbatoor, situated on the north side of the Amaravati river, and not far from the Cavery, fifty-two miles W. by N. from Trichinopoly; lat. 10° 53' N, lon. 78° 4' E. At a little distance from the town is a neat fort, with a large temple, the spire over the gateway of which is eighty-eight feet high, length at the base sixtyfour feet, breadth fifty-two feet pagoda was destroyed by mines when besieged by Colonel Long in 1781. The supply of water in the Amaravati does not last the whole year, so that in some seasons there is only one crop of rice This river was the ancient boundary between the dominions of Mysore and Trichinopoly; and this conterminal position under the security of a strong foit, and the command of a rich district, rendered it an emporium of great commercial resort. It was taken during the Carnatic wars of 1760, and probably before that event no European troops had ever advanced so far west inland. It is seventy-four miles from the western ghauts, and thirty from the Pilny mountains,—(F. Buchanan, A. H. Hamilton, Orme, &c)

Carramungalum—A village situated in one of the wildest and most beautiful regions of the Barramahal, with a cluster of antique Hindoo buildings on the adjacent rocks;

about twenty two unless travelling distance south-east from Ryscotta,—
(Fullarion of )

CARAR—A considerable town in the province of Bejapoor, ra, htysik miles S by F from Poopas lat 12° 20° N., Ion 74° 22° L. Year the centre are two papolas, of great height and elegant workmanilip and also a small fort I rom hence to Satara is a plea ant valley intersect ell by many atrenus and well peoplei and cultivated — (Voor, †c)

CARRIANS (Karmes or Kareen) -This word appears to ho used as an appellation for the simple abongs nsi tribes spread over India east lo the Ganges noil more especially Martahan Tenasserim, of Fegu, the British proxinces south of Ron goon and Sum, few being found north of Prome in Pegn Although comprehended under the general name of Carrians, some of them differ from each other as much as they do from the Burmese; and fo what they differ from the huyn tribe, except as to degree of englization bas not yet been discriminated They are most numerous in Pegu where during the occupation of that province by the British they composed one-third of the inhabitants south of Prome Their language is inlied with that of the district in which they reside; but it is said to be essentially an original tongue. Carrians of the Galadzet fulls are on Innocent but hideous-looking race of mountaineers, from the practice that prevails of tattooing their faces capecually the females who monage (it is said intentionally) to render them seives such objects of horror and disgust that none but o Carrian cao approach them

They are a simple, rude people, speaking of usinet language and en tertaining rude ootlons of religion Their villages form a select commo oity, from which they exclude oil other sects ond they never resule in a city lotermingle, or marry with strangers. They profess and strietly observe inversal peace, not engaging.

In war, or taking may part in contests for idomaine; a system that necessarily places them in subjection to the ruling power of the day. They are consequently mere slaves of the soil living in wretched isamiets sneed and oppressed by the Borness who con sider them an inferior race. They are exempted from the payment of land ins and other imports the while being compounded for by the pay ment of a heavy poil, or rather family tax. They are however exempt from the conscription laws onl are ever called out on military service.

The Carnans olthough the quiet cet, most timorous and thermiess people in the world possess strong ood robust frames greatly excelling In these respects both the Burmese and Pegners who are not deficient The cultivation in Pegu and the south ern provinces of Ava is almost entirely left to them, and they onnually furnish large quantities of grain to the public arrenals. I lke the Bur mese they are fond of ardent spirits. and generally speaking will do more for a glass of rum or arrack than for a sum of money They have tra ditional maxims of jurispendence for the internal government of their little commonliles but are without any One of them on being written laws interrogated, admitted their state of gnorance and assigned as a reason that God once wrote lile laws and commands on the thin of o buffalo and called up all the nations of the earth to come and taken capy which they all obeyed except the Carnans who had no lelvore, -(Symes Lieut Lowe Snodgrass, Crawfard, &c)

CARBURIA —A town in the province of Berny, forty five miles S by E from Ellichpoor Lat 20° 33' N lon 77° 44 E

CARTASURA,—The runs of o town in Java which towards the end of the seventeenth century was the capital of the Island the sent of government having been removed to this place by the Boosohoonon in AD 1696 from Matriam In 1742 Cartasura was in its turn phandoned and the seat of

government fixed at Solo or Sura Lat. 7° 35' S, lon 110° 45' E, six miles W. from Solo —(Crawfurd, &c)

CARTINAAD (or Cadutinada )-A small district in the Malabar province, the raja of which in 1800 resided at It is tolerably well cul-Cutiporam tivated, and is naturally a rich country, but does not produce grain sufficient for the sustenance of its inhabitants. The higher parts of the hills are overgrown with wood, which the Nairs formerly encouraged, as affording them protection against invaders. Among the hills which form the lower portions of the ghauts in Cartinaad, and other northern districts of Malayayar, are certain spots that natu-

rally produce cardamoms

The female Nairs in this part of the country, while children, go through the ceremony of marriage with Nambouries and Nairs, but here, as well as in the south, the man and wife A Nair here is not never cohabit. astonished when asked who his father is, and a man has as much certainty that the children born in his house are his own, as a European husband has; yet such is the perversity of custom, that he would be considered as unnatural, were he to have as much affection for his own children as for those of his sister, which he may perhaps never have seen In 1761 the Bombay presidency concluded a treaty with the chief of this country for the purchase of pepper, 19 which document he is styled King of Cartenaddu — (F. Buchanan, Treaties, &c )

Carwar -A town in the province of Canara, fifty-five miles S by E Lat. 14° 50' N, lon. 74° from Goa This was formerly a noted scat of European commerce, the English East-India Company having had a factory here so early as 1663, but during Tippoo's reign the place went to total ruin It stands in that portion of the Concan comprehended by British judicial arrangements in the district of Canara The dialect of the Concan is used by the natives of

Carwar in their own houses, having been long subject to Bejapoor, most of them can also speak the Maharatta.—(F Buchanan, &c.)

## CASHMERE.

(Casmira).

The valley of Cashmere is comprehended between the 34th and 35th degrees of north latitude, and surrounded by lofty mountains which separate it from Little Tibet on the north; from Ladack on the east; from Lahore on the south; and Puckely on the west. On the north-west a branch of the Speen, or White Caffrees, approaches Cashmere The valley is of an elliptic form, and widens gradually to Islamabad, where the breadth is about forty miles, which is continued with little variation to the town of Sompre, whence the mountains, by a regular inclination to the westward, come to a point, and separate Cashmere from Muzifferabad. Including the surrounding mountains, Cashmere may be estimated at 110 miles in length by sixty the extreme breadth; the figure, a The limits of Cashmere broad oval towards the west, adjoining Muzifferabad, are terminated by a low thick wood, the edge of which is skirted by a rivulet, and on the other side rises a chain of lofty mountains stretching to the north and south. There are seven passes into the province, four from the south, one from the west, and the remaining two from the north That of Bember is the best, but that of Muzifferabad is the most frequented By Abul Fazel, in 1582, Cashmere is described as follows:

" The soubah of Cashmere is situated partly in the third and partly in the fourth climate. It is composed of Cashmere, Bember, Sewad, Bijorc, Candahar, and Zabulistan (Cabul) Formerly it had Ghizni, but now it has Cabul for its capital. The length from Kimberdine to Kishengunge is 120 coss, and the breadth from ten to twenty-five coss. On the

east hes Peeristan and the river Chl naub on the south-cast Bankul and the mountains of Jummon and the north-east great Tibet on the west Puckoh and Aushengunge; un thu south west the territory of Gucker ond on tho north-west Little Tibet It is encompassed an oll sides by lofty mountains There are twenty-six roads into Iliodustm but thuso of Bember and Puckoli are the best being passable for horses,

The whole of Cashmere represents n garden in pernetuol spring and the fortifications with which na toro has furnished it are of astonish ing height. The water is remarkably good and the entoracts magnificent. It rains and snows here at the same season as in Tartory and Persio and during the periodical rains in Ilin dostun light showers also foll here The Isnd is partly marshy the rest well watered by streams and lokes Vinlets roses, narcussuses and in numerable other flowers grow wild Earthquakes are very frequent an which account the houses are built of wood The inhabitants subsist cinefly on rice, fresh and dried fish and regetables and they drink wine Thahorses are small but hardy they breed notther camela nor elephants both being unsoited to the nature of the enuntry In their cities and towns are neither snokes scorpions our other venomous reptiles but the country in general lice. Most of the trade of the country is carried on by water but great bur thens ore olso transported on men s shoulders

"The Cashmerians have a lon guage of their own but their books sre written in the Sooscrit toogue although the characters be sometimes Cashmerian They write chiefly upon tooz which is the bark of a tree. The Mahamedans are partly Sannies and others are of the sects of Ali ond Noorbukshay There are mony delightful singers but they wont voricty The Hindoos regard the wbole of Cashmere as huly land forty-five pisces are dedicated to Sivo sixty four to Vishou three to Brahmo,

and twenty two to Durga the wife of Says In 700 places the figures of snakes are carved which thay also

worship

" Although government formerly was said to take only a third of tho produce of the sail yet in fact tha husbandmon was not left in the en invment of nearly one-third Mistesty (Acher) has now communded that the crops shall be equally di yided between the husbsodmon and the state There ore but few troops in Cashmere the nativa standing arm being only 4,892 cavalry and 92 400 Infantre

" The meients divided Cashmere into two ports, calling the eastern dirition Meraje and the western Camrage. In the history of Cash mere it is said that in the early sges of the world all Cashmere except the mountains, was covered with water and then named Suttrair Sutty Is one of the names of Sivas wife ond air signifies o reservoir In tho year of the Huera 948 (A D 1541) Mirza ligder was sent against Cash mere by the Emperor liumoroon and by the help of some of the natives ennouered the whole of that Such is the description of this couo

try given as it existed 246 years ago sinen which perind it has probably in

every respect greatly retrograded The lower range of hills that sur round Cashmere are of maderato height and covered with trees and verdure affording excellent posturage for oil surts of cuttle and wild gram nivorous onimals and containing none of the larger and more ferocious car nivornus quadrupeda, such us linus and ugers Beyond this range are mountains of more stupendans elevation whose snow-clad tops soaring above the clouds and fogs appear perpetually bright and tominaus By ascending from the plans up the mountains my degree of cold may he attained From these mauatains fine innumerable casesdes ood rive lets which the sohsbitsnts conduct through their rice fields for the pur poses of Irrigatino, and in their course form small lakes and canals, the junction of which afterwards creates streams navigable for boats of burthen, even within the limits of Cashmere, and increasing as they flow southward, at last form the Jhylum or Hydaspes, one of the largest rivers that fertilize Hindostan. these mountains are many iomantic valleys, the inhabitants of which have scarcely any communication those of the plains, and on account of their poverty and maccessible residence, have never been subjugated by any of the conquerors that have devastated Cashniere The religion of these primitive tubes is unknown, but it is probably some modification of the Brahminical of Buddhist tenets

The valley of Cashmere is celcbrated throughout Asia for the romantic beauty of its situation, the fertility of its soil, and the temperature of its atmosphere It is gcnerally of a level surface, and being copiously watered, yields abundant crops of rice, which is the common food of the inhabitants The facility of procuring water insures the crop against the injuries of a drought, and the mildness of the climate against the scorching rays of the sun. Near the base of one of the surrounding hills, where the land is higher, wheat, barley, and various other grains are cultivated In this province are found most of the plants, fruits, flowers, and forest trees common to Europe, particularly the apple, pear, plum, apricot, and nut trees, and abundance of grapes; and in the gardens are many kitchen herbs peculiai to cold countries. A superior sort of saffron is cultivated in the plains, and iron of an excellent quality is found in the mountains. The sengerah, or water nut, which grows in the lakes, forms a considerable portion of the food of the lower classes lakes are spread over the country, and there is a tradition which appearances tend to confirm, that the Cashmere valley was once the bed of a large lake By Hindoo historians the draining of these waters is ascribed to the Muni, or saint, Casyapa,

the son of Marichi, the son of Brahma (the Cashef or Casheb of the Mahomedans) which he effected by opening a passage for the Hydaspes through the mountains of Baiamouleh, which might possibly also have happened from some natural convulsion. Besides this river, which traverses the province from east to west, there are numberless mountain streams supplied by the rains, which fall with great violence from June to October, forming many cascades and small cataracts, which are precipitated into the valley, where the periodical name are described as only descend-

ing in gentle showers

The wealth and fame of Cashmere have greatly arisen from the manufacture of shawls, the wool of which is not the growth of the country, but brought from the high table-land of Tibet, where alone the shawl goat producing it will thrive. Neither the Delhi emperors, who made various attempts to introduce this species of goat into upper Hindostan, nor the sovereigns of Persia, whose dominions were still more favourably situated, have ever succeeded in procuring wool of an equally fine quality The Persian with that of Tibet. shawl, from the wool of Kerman, comes nearer the Cashmere shawl This raw material than the English. of the Cashmere shawlas rather a down than a wool, being protected by the exterior coarse hair. originally of a dark grey colour, and is bleached in Cashmere by the help of a preparation of rice flour. That from Rodauk is the best, and the price in Cashmere is from ten to twenty-rupees per turruk, a weight supposed equal to twelve pounds, and the whitest is most in demand It is difficult to fix, with any accuracy, the number of shawls manufactured The number of looms in the year employed, each occupying three men, is said to be 16,000. Supposing, on an average, five shawls of all descriptions made at each sliop or loom annually, the total would amount to 80,000, which is probably not very remote from the truth.

The Cashmenans also fabricate the best writing paper of the East which was formerly an article of extensive traffic as were also its iscouered ware cutlery and sugar | but trade of all sorts is now in a very langual state. A wise resembling Madeira is manufactured in this province and a spirituous liquor is also distriled from the grape American in Labore the Seik capital is at present the grand emporium for the shawls and saffron of La hmere; but in 1819 a manufacture of the first with wool Imported direct from Tibet was established by an enterpriring nativo merchant la the city of Belhi, About twenty years ago Ilussan merchants penetrated from the north Into Cashmere with their goods by the route of are long and narrow and moved with paddles. The country being much intersected by streams nasigable for small seachs might greatly beacht by such o commodious laternal converance under a better government but of this there is at present but little prospect.

In the time of Aurengreise the revenue collected (probably the elear revenue) ta Cashmere was three and a quarter lacks of rupees per anaum; ia 1783 the Afghan governor, on the part of the Cabul sovereign extorted above twenty lacks Io 1807 the gross revenue was sald to be 46 of 300 rupees, or about half a million ster hing Since that date the province hos been in such a state of moccame nearchy that it is impossible to form nov rational estimate of its revenue The governor of Cashmere, while under the Cabul king had ennatontly at his disposal a force of 5 400 horse oad 3,200 foot but the Afghon sol there serving in Cashmere have always degenerated and become effeminate luxurious and rebellious The native Cathmerians of the volley in all ages have been reckoned altoge ther unfit for soldiers

The mountains surrounding thus provides are lababited by tribes which formerly acknowledged a sort of dependence on the Africas but scarrely

ony thing is known about them Besules their alpine districts the chiefs hold land in the salley, which hove probably been given them to strength en the fersour of their loyalty and secure their obedience They farmish some troops to the governor ord when he is strong enough to enforce parment they sield him some revenue On the north of Cashmere is a chief whom the natives dignify with the title of lials of I title Tibet of which however he probably possesses but a smell portion The lofty mountains between Cashmere and Ladock have been but little explored but carasaas of merchasts pass regularly between the two cities bringing shawl-wool from the latter and offering to an adventurous Lutopean well versed lo the native languages as obvious opportunity of tracing the course of the Indus closer to its sources than has yet been attempted la foct the terra incognite of this river now lies between Ladack and Gortope direct di tance of about 310 miles but much more following the course of the stream

The natives of Cashmere are a stout well-formed people and their complexions what in France or Spain would be termen brugette are naturally gay and lively eager is the pursuit of wealth accounted much more scute and latriguing than the natives of Hadostan generally, and proverbally liars. They are also much addicted to literature poetry and drinking and the commonalty remarkably ingeatous la colonet work and other fabrications Their lon guage is of Sament oneia modified by time and the latroduction of some foreign phrases to a specimen of the Lord s Prayer examined by the missionories twenty five words out of thirty two were found to be radi cally the same with those occurring in the Bengalese and Ilindostocy specimens some of them however considerably oftered Their songs are composed in Persie which they consider more hormoslous lo anpearance they have not the allehtest resemblance to their Tartatisa neigh

YOL. I

bours, who are an ugly race; on the contrary, the Cashmerian females have been long celebrated for their beauty and four complexions, and much sought after for wives and concubines by the Mogul nobility of Delhi. though extremely fertile and productive, the country is not thickly inhabited, on account of the deplorable government, or rather anarchy, to which it has been so long subjected. The aggregate is probably under 600,000; nor could any thing approaching this number be assigned, but for the great population, probably much exaggerated, said to be contained in the capital. By the Hindoos all Cashmere is reckoned holy land, and abounds with miraculous fountains: but although evidently sprung from a Hindoo stock, at present the Arabian faith greatly predominates

It is probable the Buddhist doctrines were current here before the introduction of the Brahmmcal. may be conjectured that the mhabitants of Cashmere had originally an idolatrous system of their own, to which they superadded a few ill-defined gods and ceremonics borrowed from the Brahmins of the plains; that they were for a short time converted to Buddhism by their Tartar neighbours, and finally to the doctrine of the Vedas by the Brahmins, to which they have since adhered, adoration being almost exclusively addressed to Siva, and his Sacti Sultan Baber, in his memoirs, mentions a curious fact, which seems to throw some light on the ancient history and geography of Cashmere. He tells us that the hilly country along the upper course of the Sinde, or Hindus, was formerly inhabited by a race of men named Kas, and he supposes that from a corruption of the name the country of Cashmere was so called, as being the country of the Kas, the denomination mir or mere being still umted with the names of several geographical divisions, such as Jesselmere, Almeer, &c

According to tradition, the valley of Cashmere was drained and colonized by Casyapa, about 2,666 years

before the commencement of the Christian era, from which date there is a regular chronological table of kings, down to its conquest by the The period of this Mahomedans. subjugation, however, is uncertain, but it was attacked and ravaged by the Mahmood of Ghizni so early as A.D. 1012. It was afterwards governed in a long succession by a race of Tartar princes of the Chug, or Chagatay tribe, until 1586, when it was subdued by Acber, and continued subject to the Moguls of Delhi until the time of Ahmed Shah Abdali of Cabal, to which kingdom, until recently, it continued annexed. When the short-lived dynasty of the Abdalis began to totter, the governor of Cashmere was one of the first to claim the title, as he had long performed the functions of an independent prince Accordingly, in 1809, Mahomed Azim Khan, the soubahdar of the province, threw off the yoke, and set the power of his legitimate sovereign at defiance. In 1816 a powerful army from Cabul attempted its recovery, but, owing to treachery, was compelled to retreat with damage and disgrace. In 1819, Runjeet Singh of Lahore despatched an army against it under the command of Dewan Chund, which effected the conquest of the city of Cashmere, and some portions of the country in its immediate vicinity. But he does not seem to have retained it long, as in 1820 two persons arrived at Delhi, charged by the chief of Cashmere, Mahomed Azım Khan, with overtures for a treaty of alliance, and earnestly requesting that Cashmere might be taken under the protection of the British govern-This proposal, however, like many others from various parts of India, was not assented to —(Elphinstone, Forster, Wilson, Abul Fazel, Bernier, Moorcroft, &c)

Cashmere (or Sermagur) — The capital of the Cashmere province, situated in lat 33° 23′ N, lon 74° 47′ E By Abul Fazel, in 1582, it is described as follows "Sermagur, the capital of Cashmere, is four fursungs

In length The lust-mentioned one is dry during a great part of the year and tho Mar is sometimes so shallow that boats eaonet pass through. This city has for ages been to a flourabing state and here shows are manufactured and other foe woollen stuffe. On the cast side of the city is a high hill called the mountain of Solimon, and adjoining are two iskes, which are

niwars full. Tho modern town of Cashmere was formerly known by the orme of bemagur but now by that of the province. It extends about three miles on each aldoof the Jhylum or ilydasnes over which there are four or five wooden bridges, and it occurres in some part of its breadth which is unequal about two miles blany of the houses are two and three stories hab, slightly boilt of brick and mor tar with a large lateribletinge of the ber On the wooden roof a covering of earth is laid which contributes to the warmth of the house during the winter and in summer is planted with flowers. The streets are narrow, and choked un with the filth of the inhahi tants who are unclean to a proserb neither are there any buildings worthy of remark. The governor resides in a fortress named Shereghur occupy ing the south-castern quarter of the enty The advantages this enty enjoys of a mild salabrious air, and a mer flowlog through he centre are much alloyed by its confined construction and the catreme fithings of the ncopie There are covered floating baths ranged along the sides of the DACE

The lake of Casimore provincially named the Dall has long been echibrated for its beauties. It stretches from the north-east quarter of the city in an oval circumference of five or six miles and joins the Jinjumby a narrow chonnel near the autoris. The northern view of the lake is ter minated at the distance of twelvo miles by a detached range of mountains that slope from the centre to each ongle; on all from the base a spacious plain preserved in constant verdure of uncross streams extends

with an easy declivity in the sorface of the water in the centre of the plan as it approaches the lake one of the Delhl emperors, probably shah Jehao, contracted a spacious garden named Shalunar Tho nomerous small islands in the lake have the effect of ornamenting the secency.

Bernler, who suited this country in 103, travelling in the autte of the Emperor Aurengrabe gives a most intresting and romantic description of this city; but since the dismemberment of Cashmere from the Mogal capiler it has sofficed many dians ters. Nowinhitanding however these causes of decay it was high the natives in 1809 reckoned to contain from 1.0 000 to 200 000 inhitants and considered the largest and most populous city in the Afthan dominions, —(Foreter Reusell Abul Latel Bernler Lephinton fee)

CASSAY .- A province of India beyoui the Ganges, astuated about the twenty-fourth degree of north late tude. On the north it is bounded by Cachar and Assam, on the south by Ara west of the henduem rivers on the west it has the Beomil thetricts of Tipers and Subret and on the east the hathl or Casl Shan and upper course of the hendrem river I aropeans it is called Meek by us well as Cassay but neither of these names is used by the natures of the country who call themselves Mostay Bengalese call them Muggaloos which by I aropeans has been turned into Meckley and applied to the country hathl or Can is the name given to this people by the flamans, which has been taken for the name of the coun try and corrupted into Cassay The capital town is Munipoor a term frequently used to denote the whole province, under which head further information will be found.

The Cassayers have n soltness of coordenance much more resembling the natives of Hindoston than the Birmans with whom they hove very tittle affinity either in manners or op-pearance. Many of these people taken prisoners in the wars ore now settled

<sup>2 . 2</sup> 

in the neighbourhood of the Birman capital, where they exercise their superior skill and ingenuity in different branches of handicraft work invaded by the British in 1824, the province was found in a most desolate and depopulated state, and fast relapsing into barbarism, as well from the oppressive government of the Burmese, as from their own never-ending intestine feuds The Moitays or Cassayers are worshippers of Vishnu; yet their language is said to be radically different from the Sanscrit Their country may be considered the extreme limit of the Brahminical Hindoo sect to the eastward, as from thence the prevalence of the Buddhist doctrine in some shape is universal

Formerly the gunsmiths of the Birman empire were all Cassayers, but their musquets and matchlocks were very defective. They are much superior in horsemanship to the natives of Ava, and on that account were the only cavalry employed with the Burmese armies, which consisted almost wholly of infantry. The music of the Cassayers, like the genuine airs (such as the boatmen's songs) of Bengal, is remarkably pleasant to a European

In the year 1754, when Alompra, the Burmese monarch, left the city of Ava to relieve Prome, he despatched a body of troops across the Kenduem to chastise the Cassayers, who had hitherto enjoyed only a temporary independence, when the contests of the Bu man and Pegu states left them no leisure to enforce obedience were always ready to revolt, and as quickly reduced to submission Cassay raja, then residing at Munipoor, sued for peace, which was concluded on advantagous terms for the Birmans, and, as was the custoin, a young man and young woman of the raja's kindred were delivered as hostages.

In 1757 Alompia again attacked the Cassayers, but was prevented completing their conquest by the revolt of the Peguers In 1765 Shembuan, the son of Alompia, invaded the Cassay country, and obtained a considerable booty, but appears to

have intended nothing beyond a predatory excursion; but in 1774 he sent a formidable force against the Cassayers, which after a long and obstinate battle, took Munipoor, the raja having withdrawn to the Corrun hills, five days' journey north-west from that place From this date Cassay remained subject to Ava until 1824, when the Burmese were expelled from Munipoor by a British detachment, and the territory was subsequently rendered wholly independent by the treaty of Yandaboo in 1825 — (Symes, F. Buchanan, &c.)

CATINDUANES ISLE—One of the Philippines, situated off the east coast of Luzon, lat 15° N, lon. 124° 30′ E In length it may be estimated at thirty-six miles, by twenty the average breadth.

(Cashtamandır) -Catmandoo The capital of Nepaul, and modern residence of the Gorkha Raja, which, according to barometrical measurement, stands 4,784 feet above the level of the Bengal plans, lat. 27° 42' N., lon 85' E This place is situated on the east side of the Bishenmutty, along which it extends about a mile; but its breadth in general does not exceed half a mile, and seldom more than a quarter of a The name by which it is distinguished in ancient books is Goongoolpatan; the Newars call it Yendaise, and the Parbutties, or mountaineers, Cashtipoor: a name, it is said, derived from its numerous wooden temples, which are the common mandirs or mandibs occasionally met with in other quarters of Besides these there are many brick temples with three or four sloping roofs. Near the palace is the shrine of Tulasi Bhavani, who conjointly with Gorakhanath is the tutelar deity of the reigning family There is no image, the deity being represented by a Yantra, or cabalistical figure, and in order to impress the multitude with awe, no person is permitted to approach the shine except the Raja, the Ranny, their spiritual guide, and the officiating priest.

The houses so Laimandoo are of brick or tile with pitched or pent roofs towards the street. They are two three and four stories, but all roofs without exception of a mean appearance; even the raje a boile although large being but a sorry building. The streets are as narrow, and orarly as filiphy as those at Be nares. The number of houses has been estimated at 5,000 and the total popularion at 20 000 persons.

The most remarkable mountain seen from hence is that of 1hailme distant about thirty four geographical miles. According to calculation this mountain is "0140 feet above the stations of Samister and the Queen s Garriens acar Catmandoo which latter are 4,500 feet above the ierei of the sea. Another mountain searly in the position of one hy Gen hukeatrick named Cale Bhai rava, has an elevation of 18 CG. feet aliove Catmandon or 23 if. fret above the level of the sea. linth these mountain and others in their vicinity are visible from Patna ; tho first at a distance of 16" geographic cal miles the second of lad reourn graphical miles Nountains in this direction still more remote are seen in the north-cast guarter, at the prodigious distance of 195 geographical miles from I stna. In the neighbour hood of Catmendoo the summit of Mount Chandrager in 7,657 feet above the city, or 8 460 above the ievel of the seat Mount Palchoo above the level of the sea. At Cat mandoo in December and January, the barometer is 25° 28 the thermometer being 52° Fahrenheit first seidom alters so much as onetentis and a half in the course of the day wor during the whole season so much as two-tenths for the same hoor of the day - (Colebrooke, F Buchanan Kirkpatrick, &c )

CATTYWAS OR KATTYWAS (Catticad).—This oppoliation is frequently splied by the antives to the wholo Guzerat pennsula sithough in fact it only occupies a portion of the

laterior, distinguished into four divi is Punchai s 2d Bansawar 3d Aing 4th khooman Cattywar proper is bounded on the north by Jhallawar : on the south by Babreenwar; on tho east by Gocivarat and on the west hy Soret The northern tracts are of unequal surface; the southern in the acighbourhood of Bairceawar (which may be said aiso to belong to Cattywar), junciy and woody a fence of division in the Gujerattee language is o very common termination of the sames of districts in this quarter which syliable is frequently changed into var and war, as Catty war for Cattivad

The soil and appearance of this district are variable but generally the first is of a sandy sature much mixed with a reddish coloured rock of which last substance the hills are composed These although not joing are aumerous, and being deficient of trees contribute to give the surface a barreo and repuisive a pect grate produce is confinct to the coarser sorts among which basarry and joary are abundant and excel ient; to which may be added a second or after crup of wheat avail able in Pebruary by the as istance of irrigation from wells The horses reared in this territory are reckoned the best breeds of the peninsula, and the Catties themselves give o preference to that from the Chotcela hill In some parts of Cattywar wood and fuel are so scarce, that frequently the inhabitants of a village are expelled merciy for the sake of the fire-wood procurable from their dwellings

I like all other oations the Lattice are desirous of awesting an oaceing, heroic and miscatious origin. Their traditions ascend to the conclusions of the Dwaper Yug when the five Pasidoos by bad luck or foul play at hazard, were compelled to quit their native country and remain in secret calle for twieve years. After aeven years perceptionation they arrived at Derat, or Dholka where they were discovered by the spies of their enemy Durphodun. To oblige them to

emerge from their concealment, and thereby to forfeit the pledge they had given to remain secret, Carna, the offspring of the sun, and prime minister to Durjhodun, suggested the stratagem of making a predatory attack on the cattle of Berat, which would compel every true Rappoot warrior to quit the fortifications to 1 ecover them. But for so base a manœuvre Rajpoots could not be employed, which difficulty Carna removed by striking his rod on the ground; the rod opened and out issued a man, who being produced from wood was named Cat. On this newly created being devolved the task of stealing the cattle, and to reconcile him to the enterprize, Carna informed him that the gods would never reckon the commission of a robbery criminal in him or his descendants, more especially, when the property abstracted consisted of cattle Carna the Catties always speak with great veneration, and continue to worship the sun his father, inscribing the image of that luminary on every written document they have occasion to execute.

The same traditions state that the abougines of the country were Aheers and Babreeas before the arrival of the Catties, who wandered about with their flocks for many years on the great pastoral wastes, and lost no opportunity of robbing their About 260 years ago neighbours they became stationary at Sudamra, Guddra, and Budlee, within which limits they were long confined of their subsequent acquisitions have been made during the decline of the Mogul empire So late as 1807 they still followed their vocation of thieves and robbers, which designations they openly assumed. As a tribe the Catties are difficult to class. In 1812 the three principal families were the Tratchee, the Trowa, and the Walla, and they are much intermixed with the aboriginal Aheers or herdsmen. The Catties are not, and indeed never were, numerous, their habits and enstoms being unfavourable to an increase of numbers.

The Catties are distinguished by two general appellations: Shakarjut, the descendants of a Walla Rappoot and Catty female; and the Oortca, or descendants of the genuine Cattics. The Aheers and Babreeas may be classed with the latter, for in Cattywar the prejudices of caste have but little influence. The Catties may marry any number of wives, but usually restrict themselves to two. male Catties are said to be athletic men, and the Cattriyanies, or female Catties, proverbully graceful and beautiful. They worship the sun, but have only one temple, situated near Thaun, their religious zeal being moderate and their superstition great. All the higher classes practise female infanticide, which, although so repeatedly asserted to have been abolished in 1807, has never for a day been suspended. The treaty, in fact, turned out a mere dead letter, not one instance of punishment for the crime having occurred; and so far from this being a proof of its diminution, it is quite the contrary, the British political agent with the petty states of Cattywar in 1820 having declared that not more than 100 females born since the treaty were then in ex-At that date there were 137 1stence chiefs tributary to the British government, besides others who were not-

Coerced by the strong arm of the British government, this turbulent district has, ever since Col. Walker's march in 1807, much against the inclination of its inhabitants, enjoyed a sort of compulsory peace. have frequently evinced a strong desire to resume their old habits of robbery and depredation, for which purpose they believe they were born; but the pressure from above has always proved too ponderous to heave up. In 1820 a sort of partial insurrection, consisting of 900 Komaun Catties, joined by a number of roving Sindeans, captured the fort and village of Meeteealee, where they were attacked by a British detachment, and ultimately all their chiefs taken or destroyed —(Walker, Macmurdo, Ballantine, Drummond, &c)

CAUNTOUR (Khanpura) .- A district to the province of Allahobad, consisting of cessions to the British government from the Aabob of Onda, and mostly comprehended within the Dosb of the Ganges and Jumoo between the twenty-sixth and twen ty-seventh degrees of north latitude. On the north It is bounded by the Etowah district; on the south by the river Jumnat to the east it hos the Nabob of Gode a reserved territories, and on the west the river Gon ges. The Counpoor division is a seg ment of the vost plom extending from the Bay of Bengal to the north ern mountoies and its soil is not only arable but when properly eof tivoted highly productive. In the neighbourhood of the town and cantonments agreelture has profited by the stimulus of a European market ond high prices Indian corn har ley, and wheat are there cultivated; ond turmps cabbages and other Enropean regetables during the season ore to great abundance not only in the gardens of the officers but in fields belonging to nativo farmers. Grapes peaches and a variety of fruits hove long been supplied by the Europeans Sugar-canes and other crops flourish in great fuxuriance but the cultivation ly frequently separated by the intervention of extendre wastes quite or capable of being rendered productive

In 1814 the district of Cawnpoor was recorded as containing 3 430 vil lages and 2,946,315 cutche begas of when 1 788 745 were cultivated, 134 189 fit for cultivation and 1,043,381 begas wholly unproductive. The government demand in ropers was 27,20,297, which was realized so that the ossessment to the public revenue oppeared to be nearly 1; ru peca per bega. It was found, from experience that on the first trem rula settlement of 1808 Caunpoor was over-assessed and suffered much in coosequence.

No estimate opproaching to accuracy has ever been made of the populotion of this district, but from the vast extent of land under tillage

the number of inhabitants must be very great; and that they are not so prono to commit depredations as some of the more southern and cast ern districts, is proved by o feet stated by the polico superintendent, that within the first six months of 1812 not o single jostance of gang robbery had occurred within the li mits of the Caunpoor jurisdiction. This is the more surprising when it is considered that the town of Caunpoor is one of the greatest thorough fares of inland commerce, as wdi appear from the following stotement of the large sum paid into the Caun poor treasury on occount of daties received of the custom-house 1812 omounting to 4,58 000 rupces, and in 1813 to 4,85,000 rapees Besides Canopoor the capital tho chief towns ore Resoulabad Jaugemow and Acherpoor .- (The Alarquis of Hastings, Tennont Guthrie, Ren nell, de )

CAUNTOON-A town in the provioce of Allahabad the capital of the preceding district, situated on the west side of the Ganges, forty five miles S W from Laucknow lat 26° 30' N., lon 80° 13 E. The Gonges here is still a ooble stream, being onparently above o mile broad but in the dry season shallow sod divided by large sand-banks A brigado of troops is usually cantoned here it being considered the chief military station in the ceded prorinces. The officers find their own quarters, which connet of commodious bungalows built without ony regularity for obove six miles olong the Ganges. Each hongalow has a space of ground at tached neatly lold out and plonted. with generally the addition of o kitchen garden the whole invariably surrounded by a high mud wall as a defence against thieves, cattle and other concyances ood by this dusty mod protection the proprietor's view is frequently lunited Indeed tho external aspect of this important station is most arld, dreary and repulsive more especially during the dry season, when the sun is obscured by clouds of dust, and the atmosphere heated almost to suffocation. The history of the country affords many instances of buttles lost and won according to the direction of the dust, the windward position giving such a decided advantage.

The public magnines stand at the north-west extremity, protected by a slight entrenchment; and on the banks of the Ganges, a little further in that direction, is the old town of Campoor, which probably never was a place of any note A new town, however, has sprung round the cantoninents, which, whether considered with reference to its size or commereml opinience, may justly claim the rank of a city. The chowk, or principal street, nearly parallel with the military lines, is composed of wellbuilt brick houses, two or three stories high, with wooden balconies in front; but the rest of the town is straggling and mean Caunpoor contams but few religious edifices, and these principally mosques, there being no Christian church here. The most imposing European structures are the gaol, assembly-room, and custom-The shops are large, and the house. articles they contain are sometimes as cheap as in Calcutta, while the mere necessaries of life are fifty per eent cheaper. Being quite a modern town, Caunpoor has no vestiges of antiquity to shew — (Fullarton, Tennant, Lord Valentia, &c.)

CAVAI —A small Moplay town in the Malabar province, thirty miles N N.W. from Tellicherry, Int 30° G' N., lon 75° 17' E

CAVERY RIVER (Caveri)—This is the most useful river in the south of India, for above the ghauts it fertilizes the Mysore, while the Carnatic below owes its agricultural wealth to the water it distributes. It rises in the Coorg country, near the coast of Malabar, passes through Mysore, Coimbatoor, and the lower Carnatic, and after a winding course (enclosing a delta of great extent), falls into the sea through various mouths, in the province of Tanjore. For the first

and principal supply of water in the month of May, it depends on the rain of the western ghant mountains. Its tributary streams collect the waters of the Mysore in June and July, and during the latter months of the year it is again filled by the monsoon rains on the coast of Coromandel.

The folls of the Cavery are near the ancient city of Giinga Raya, on the island of Swana Samudra, and opposite to Trichinopoly, it again separates into two hranches, forming the island of Seringham. thirteen iniles to the eastward of this last point of separation, the branches again approach, but the northern branch is here twenty feet lower than the southern, and is permitted to run waste to the sea under the name of The southern branch, the Coleroon retaining the name of Cavery, has heen led through a variety of channels by the skill and industry of the Hindoos, to irrigate the Tanjore province, and is the cause of its extraordinary fertility. Near the east end of Scringham, an immense mound is formed, to prevent the waters of the Cavery descending into the Coleroon. The coming of the floods from the interior is every where eelebrated with festivities by the natives of the Carnatic, who consider the river as one of their most beneficent deities.

This valuable river is no where navigable for large vessels low down as Trichinopoly, the only boats, or rather coracles, m use, are errenlar wicker baskets covered with Indes, similar to those employed on the Krishna and Toombudra. On some of its northern branches, near their junction with the sea, still ruder contrivances are resorted to, such as a raft of twigs floating on inverted carthern pots, but throughout the southern portion of the Tanjore district the rivers are provided with flat-bottomed boats. — (Wilks, Fullarion, Heync, &c)

CAVERYPAUK.—A town in the Cainatic, enclosed with an old mud wall, fifty-seven miles W.S.W. from Ma-

drang lat 12"53" \. ion 79" 31" E. liere is a great cray or tank about eight miles long by three broad which fertilizes a consideral le tract of com try This is perhaps the mo t mag pificent of all the great works coo atrusted in the south of In he for the parposes of irrigation Theem lunkment by which it is supported is a mound of earth thirty feet high faced on the side next the tank with large atonce and thickly planted on the outside with palmira trees. The town of Caverypank is but a meanly built place and the adjoining fort which appears at one time to have been a place of some attength, is now a ruin choked up with trees Panaur opposite to Caverypatam, is generally fordable; but after heavy rains becomes a farlous and impa sable torrent -(I allarton I lincha men de)

## CLII BF

A large island in the Lastern seas of a most extraordinary shape, separated from Biorness by the stants of Siacasar It extends from lat 2° N to nearly C S, and from 110° to 123° L ion 3 but the coast is so deeply indented by three is a that it is sid ficult to form an extinate of its actual surface; making allow since however for the irre-ularity of its figure Celebra must be studied at 500 miles in length by 120 miles the acceptive and the giving an area of about 75 000 equate miles

This islaml by the natives and Malara is called Vertree Oran Bugges or Buggesiman a country and sometimes Janua Marcasar It is situated between the great island of Borneo on the west; the I lands of Gioloo, lody Ceram and Amboyna to the caut to the south hes balayer, separated by a narrow strait, named by the Butch the Bod croons Further to this worth here I load Sambiaway to the north here I load see and the Island of Sangir to the north-least to the orange and the sangir to the north-least to the orange.

A deep gulf rum late the Island from the south called Sewa by the nativer and Buggees Bay by the English There is also a deep inden ture in tion north-cast, called Tominie Bay, which penetrates so far that it forms an Islamus, and with Tolo Bay on life rat, divides the Island into four peninvilas Celebectias three rivers of a bitch the Chinman is the most

considerable. It rises in the Wadjo country, runs through Bom, and disembognes by several mouths in the gulf of Sewa. European ships can ascend this river a considerable way over a muddy bottom, and it is navigable for prows inland to a fresh water lake. The second is the river Boli, with three fathoms water over its bar, whieli discharges itself after a winding course at Boh, on the north-coast. The third falls into the sea on the west-coast, a considerable distance south of Macassar. Along the whole of the south coast small rivers navigable for five or six miles inland are very frequent. There are not any aseertained volcanoes in the southern divisions of Celebes, but some arc said to exist in the northern.

In 1820 the civilized inhabitants of Celebes consisted of four or five distinet nations, speaking different languages; viz. the Buggesses, the Macassars, the Mandars, the Kuih, and the Manado. The Buggess race are by far the most considerable, being subdivided into various tribes united by a common dialect and similar institutions, and of these tribes, the Wadjo, or Tuwadjo is by far the most distinguished for commerce and mari-The centre of the time enterprize island to the northward is said to be inhabited by the Turajas or Horaforas, who are considered the abori-

In the south-western limb the principal languages are the Macassar and Buggess. The first comprehends the petty states of Booncoomba, Bontain, Tarabaya, Goak, Manos, and Ligere; the second is much more general, and extends from Boni to Luwu, including the four great principalities of Luwu, (Looboc of the Dutch), Boni, Wadjo, and Soping. In Mandhar and its vicinity the Mandharese language is spoken The appearance of the southern limb indicates a former state of superior cultivation and prosperity, and it is still the most populous portion of the island, the climate being compara-The Dutch have tively salubrious. long possessed several small forts on

the bays of Tolo and Tomine, but do not appear ever to have explored the country in their vicinity. The two states of Bom and Macassar have at different periods exercised paramount authority over the smaller communities, and their history comprehends all that is interesting in that of Celebes.

The tribes of Celebes are now the most considerable and enterprizing navigators of the Eastern islands, and among these the most distinguished are the Buggesses of Wadjo. The principal import is eotton from the adjaeent islands, which is re-exported after being mannfactured into Buggess cloth, which is in constant demand throughout the Easternarchipelago; the other articles are bird's-nests, sea slugs, shark fins, tortoise-shell, agar-wood, hides, &c. for the Chinese market, to which they are transported by the junks that visit Celebes annually; gold is also found, but in smaller quantities than at Borneo The principal traffickers are the Wadjoos, parties of whom are settled in every seaport of consequence from Acheen to Manilla, and who also usually compose the crews of the Buggess prows. Some of these Wadjoo cargoes, consisting of opium, gold, and cloths, have been valued at 50,000 Spanish dollars The gold of Celebes is generally procured, as in Sumatra, from the beds of invers and torrents. There are many springs issuing from the crevices of rocks, that bring some little gold along with the water, which filtering through a vessel bottomed with sand, leaves the metal behind; these might be worth exploring. Monopohes here are among the legitimate fiseal resources, the eluef of Luwu monopolizes brass, the raja of Soping, betel-leaf; the raja of Sedendring, salt and opium. The teak tree is only found in a few spots of Celebes; the largest forest is in the district of Mario, where the natives assert it was originally planted from imported seed. The tiger and leopard, which abound in the more western islands, are not to be found in Celebes.

The states of this island exhibit the

singular anomaly in politics of elective monarchies limited by aristoers cies, which are themselves limited by subordinate ones; Indeed, they seem to be a sort of aristocratical federations of the petty lords or tyrants of villages the chief hip of which is sometimes electivo from the whole body int more generally from a par ticular family The prince is chosen from the royal stock by a certain number of counsellors who also posaces the prerogative of subsequently removing bim These counsellors are themselves selected from particu lar families and without their concurrence the prince can execute oo public measure; they have also charge of the public treasure and also nomi nate the prince and in fact appear to have practically tried the experiment with how little power a suvereign cao conduct the affairs of government

When war occurs the prioce can not in person command the armies but the usages of the country permit, on such an event, his temporary reargustion when a regent acceeds proclaimally to the highest rank to be laid down when the exigence has nassed away Women and minors are eligible in every department ; but some variation is observable in different realms. In Bonl the prince is elected by seven hereditary counsel lors; in Goak, by ten of whom the nemo minister is one being lunielf oppointed by the other nine. In the exercise of his functions however. he possesses very extraordinary pow ers for be can remove the prince himself and call on the counsellers to elect another The Inferior provincial chiefs named crains are established by the government

Among the warlko nations of Colebes the women take on active parin all the concerns of life, and are very frequently raised to the throno in the electivo mooarchiest in fact, thereofs hardly o actato in which women at one period or onother have not saton the throne and it may be remarked that the practice is most frequent where the society is the most turbulent. 16 A.D. 1714 Batear Toja was elected queen of Boni, and from affection yielded the grown to her brother, who being deposed for incapacity she was re-chosen and a second time resigned the erown to her bro-In 1814 the sovereign of the Buggesa state of Lown was the wife of the king of Soping another petty fluggess prince; but the latter neser presumed to interfere in the affairs of Luwe which were entirely managed by his wife At the same date, the wife of a Macarrar chief was independent sovereign of the little state of Lipulasi. The arrangement of the provinces under European authority is purely feudal the Butch consider ing themselves sole proprietors of the soil which they distribute at picature.

This great Island is the centre from whence that peculiar description of ercese-wearing nations of the Lastern archipelago appears to have emanat-The alphabet of Celebes consists of enhacen consonsots and five rowels regulated by the peculiar classification of the Sumerit alphabet, which is rejected in that of Java. The two prevailing languages are the Buggers and Macassar, both simple in their structure and of a soft vocalle articulation even beyond tho Mslay Like the hawl of the Javanese the Buggesses are said to have an ancient and recondito language but thisdoes not appear to be as yetfully ascertained they also possess tales and romances founded on national traditions translations from the Malayac and Javaneso romances historical legends and Arabie works on law and religion, all feeble childish and con temptible. The Buggess language has nevertheless, much influenced the neighbouring tongues and dislects, such es the Sumbhowa, Floris, Timore, Booton and Salayer

The natives of Celebes do not oppear to have ony treatise on accence philosophy, or astronomy; but they are acquainted with Jupiter, the Piel adea, Strius, Orsoo, Antares and the Great Bear by which luminanes they navigate their prows. The Macassars use Mahomedan names for their months, the Buggesses divide their year of 365 days into twelve months, beginning on the 16th May, an arrangement which has probably been introduced since the arrival of Mahomedans, for they do not appear to have had any era prior to the piopagation of the Arabian faith, since which they employ the Hejira.

The most ancient state of which tradition makes mention in Celebes is that of Luwu or Luliu (probably the Looboe of the Dutch), situated near the bottom of the bay of Boni. The Galigas, or historical romances, are filled with the exploits of Sawiia Gading, the first chief of the Luwu country, who is said to have extended his dominions to the Straits of Malacca Next to Luwu, the empire of Goak has the greatest claim to antiquity, and a period is mentioned when its influence extended to Acheen, Manilla, Sooloo, Ternate, and the Moluccas

No information has as yet been procured of any intercourse between this island and Hindostan and China, prior to the introduction of the Mahomedan religion, neither are any monuments or inscriptions found tending to establish the former prevalence of the Brahminical mytho-The best informed natives, however, assert then descent from Hindoos, and the names of their ancient divinities (Batara, or Avatara, Gooroo, Varuna, &c.) indicate an intimate relation at some period, and it is still probable that Hindoo vestiges will be discovered after the island has been more completely ex-Batara Gooroo, a Javanese local name of Siva, is described as the first of their kings

In A.D 1512, when the Poituguese first visited Celebes, they found but few Mahomedans, and it was not until the expiration of a century that the faith of Mahomed was generally established. The principal agents in the conversion were natives of various Malay states in Silmatra and the peninsula, and the most renowned was Khatib Tungal, a native of Me-

nancabow. At present the Mahomedan tenets are professed in all the civilized tracts of Celebes, where the Koran is of course the standard, both of law and religion. According to the records of Macassai, it was introduced there by Khatib Tungal, about A D. 1603 Nearly all the inhabitants of the southern limb are now Mahomedans; but of the others only a small proportion are said to be yet converted

This island appears to have been known to Magellan and Pigafetta under the name of Celebi, and the Portuguese early obtained a settlement near Macassar, from whence they were expelled by the Dutch, in AD. 1660. In consequence of the increasing stiength and civilization of the state of Boni and the Buggesses during the last half of the eighteenth century, the power of the Dutch had been much on the decline, and in 1811 the Dutch authority in Celebes was transferred to the British by a conquest and capitulation with the French governor-general of the Dutch colonies in India, but on the return of tranquillity the British authorities quitted Celebes, and in 1816 it was once more restored to the Dutch. (Forrest, Stavorinus and Notes, Raffles, Crawfurd, Leyden, Marsden, &c)

CERA ISLE —A small island about twenty miles in circumference, lying off the west side of Timorlaut Isle, lon 131° 50′ E.

CERAM ISLE—A large island in the Eastern seas, extending from the 128th to the 130th degrees of east longitude, and situated principally between the third and fourth degrees of south latitude. In length it may be estimated at 185 miles, by thirty miles the average breadth, giving an area of 5,550 square miles.

A chain of very high mountains parallel in their direction runs from east to west, the valleys between which present every sign of a vigorous vegetation. The highest peak of these mountains appears to be 7,000 feet above the level of the sca The peninsula of Hoewamoehil, or

Dr Dacy le of opision that the whale of Cesion with a very few ex ceptions consists of promitive rock of many varieties yet the species are very few and not well defined. The most prevailing species is grante or gnels; the more limited quarte rock, harn-blende rock and dalamito rock The varieties of granute and secia are lanumerable t the limestone is mostly confined to Jaffaspatam; and the whole Island is surrounded by an unsaterrupted chala of sand stone rock There are no volcanoes la Cerlos nor any vestiges that suggest the idea of their prior exis-

tence.

Owing to its climate, Ceylon abounds with perennial mountain streams, rivulets, and rivers, but the latter are much more numerous on the western than the eastern side. principal are the Mahavilly Gunga, the Calany Gunga, the Caloo Gunga, and the Welleway Gunga, by which the whole mountainous district is drained; but except the first none of them are navigable, even for small barges, more than fifteen miles from the shore. The Mahavilly (Mahavalı) is by far the largest, and is navigable inland nearly as far as Candy, where it is interrupted by a ridge of The Calany Gunga is next in magnitude to the Maliavilly, and probably in importance surpasses it.

The north and west coast from Point Pedro to Columbo is flat, and much indented with inlets from the sea; the largest extends almost quite across the island, forming the penin-The sea by sula of Jaffnapatam. which Ceylon is surrounded is practicable for large ships from Point Pcdro north to Trincomalce, Batticalo, Point de Galle and Columbo; but from these to Manaar and Jaffnapatam, commerce must be carried on in vessels not exceeding 100 tons, and even the greater part of their cargoes must be unshipped while passing the The principal Manaar channels. harbours for large ships are Trincomalee and Point de Galle; the inferior ones are Batticalo, Barbareen, Matura and Caltura, on 'the south and east; and on the west, Negumbo, Chilaw, Calpenteen, Manaar, Point Pedro. The tides about Ceylon rise only three feet in perpendicular height.

Over most of the island, and more especially the maritime provinces, the S.W. and N.E. monsoons prevail with some variations, the first usually from the end of April to the beginning of November; the second is of shorter duration, being comprised between November and March. The S.W. wind is more general all over the island, as both at Columbo and Trincomalee it blows for five months in succession, whereas at Columbo

the N.E. is chiefly confined to December and January; the consequence is, that at Columbo the period of variable winds is longer than at Trincomalce Among the mountains of the interior, the winds are greatly modified by local circumstances, and according to their proximity to the east or west coast. The highest and most central liave peculiarities of their own; thus at Badulla, in Upper Ouva, the wind for three-fourths of the year is from the NE, and in the months of June, July, and August, is variable.

Owing to its intertropical position the quantity of rain that falls in Ceylon is very great, probably about three times that of England less frequent, the showers are much licavier while they last, a fall of two and three inches being not uncommon in twenty-four hours, and in one instance three and one-fifth inclies of rain fell at Columbo in twelve hours. In consequence of this redundant moisture, the western coast of Ccylon looks constantly fresh and green, exciting the admiration of strangers from the parched plains of the Carnatic. Among the mountains the variety is greater, but on an average less falls on the eastern than the western side. lofty mountainous ridge often acts as a line of demarkation, one side of which is drenched with rain, while the other is broiling under an unclouded sun. At Candy eighty-four inches of rain fell in 1819, which is probably about the average of the alpine region

With respect to heat no tropical country is more favoured than Ceylon, its warmest weather, owing to its insular position, being quite temperate when compared to the scorching heats of India Along the sea-coast the mean annual temperature may be stated at 80°, and the extreme range of the thermometer from 68° to 90°; the medium range between 75° and The climate of the mountains 85°. is usually cooler than might be expected, but its vicissitudes greater. At Candy, which is 1,467 feet above the level of the sea, the mean annual temperature is about 73°. In March

1819, on the top of Namina Cools Candy, 5,548 feet high, at eight o clock A.M. Dr. Davy found the temperature of a pot of water to be 53°, that of the air being 57° Dew is not common except in the inw plant and valles of the interior, where musts also form of so extraor dinary a density that when viewed from the summit of a mountain they resemble lakes of rast extent and The lofty amees as ercat depth may be supposed enter the region of the clouds; which during the whola of the south west monsoon concent Adam a Peak Thunder storms are very frequent, but as they cool the air and seldom do any mischief they are highly acceptable, both to man and beast. Indeed the birds never aing so sweetly nor are their notes heard to such advantage; as between the loudest peals of thunder

Within the limits of Cerion all degrees of salubrity are expendenced; the best on the south west coast, and on the high central mountains; the worst in the low wooded country between the mountains and the sea in all directions, except towards tho south west coast; the middle degrees on the lower hills and on the north castern shores of the island But instances of occasional losalulinty occur especially in the Condian country that do not admit of any explication Particular spots and districts, that have been remarkably healthy for many years, suddenly chonge their character and without any apparent cause become extremely postilential after which they gradually ossume their former salobeity

The soils of Ceylon oppear to be derived from the decomposition of guess grante, or clay, fron-atone the principal ingredient of the three being quarts, in the form of sand or gravel and decomposed fishpar is the state of elay, cambined with different proportions of oxide of law Quartz in most inthonces is the predominating substance, and in many constitutes mine-tenths of the whole It is use ally supposed that in tropleal chimates, where vegetation is luxuriants and wood where vegetation is luxuriants and

abundant, the soil must consist of much regetable matter t such, how ever is not the fact in Ceylon where the natural solis seldom contato more than three per cent of vegetable matter The best and most produc tive earths of Ceylon are, a brown ionm resulting from the decomposi tion of gness or grante exceeding in felspar; or a reddish loam originating from the decomposition of clay from-The worst soils are those where quartz pre iominates proceed ing from the disintegration of quartz rock t or of granite and gneiss con taining a very large proportion of quartz It seems extraordinary that lo an Island the foundations of which are calesreous, there should be so lit tie calcareous matter and so large n proportion of silvenus motter in the

The soil of the emesmon gardens re the neighbourhood of Columbo is nemarkable instance of the alterous kind. In many parts the surface of the pround where the cumamon plant fourness is as white as snow; this is pure quartz and A few inches below the surface, where the roots penetrate the rand, is of a grey colour, a specimen of which thoroughly dred was found by Dr Bayy to consist of

It may appear surprising that the cinnomon plant should succeed best in so poor a soil; but other circumstances considered it admits of ex-The garden is nearly on planation a level with the lake of Columbo, and well sheltered; the cimato is damp; showers ore frequent, and the temperature high and remarkobly equable. Indeed, io Ceylon the succession of seasons that varies the year of the temperate zone is un known : for excepting by o change of wind, and the transitions from wet to dry weather the perpetual summer it experiences can scarcely be said to be even diversified

The seeds of all European plants

degenerate so rapidly, that a fresh importation is necessary almost every year; but some of the indigenous plants, such as the cocoa-nut, flourish with singular vigour. The best trees, producing about fifty nuts per annum, are found in a sandy soil, so close to the sea that their roots are actually washed by the surge of the ocean, towards which they bend their heads. Cocoa-nut oil obtained by pressure, copies (the kernel sliced and dried), and corr (the fibres of the husk), are articles of exportation, as are also betel-nut and tobacco Besides these staples, Ceylon produces a great variety of the finest sorts of wood used for cabinet work, and tropical fruits in the most profuse abundance

The principal cinnamon gardens are in the vicinity of Columbo, and occupy a tract of country about twelve miles in circumference Others of a smaller size are situated at Negumbo, Caltura, Point de Galle, and Matura, extending along the southwest coast. No cinnamon trees are found west of Chilaw, or east of Tengalle, and are equally unknown about Trincomalee and Jaffnapatam, where the climate is dry and sultry. Within the confined space where it flourishes the climate is moist, and rain falls almost every day. wild state the tree, (which is the laurus cinnamomum or cooi undoo of the Cingalese) grows to the height of above twenty feet, but in the gardens they are not permitted to rise above ten, and present the appearance of numerous shoots from the same They look beautiful, but the root fragrance of the cinnamon forests is not near so great as strangers have been led to imagine, the blossoms having very little smell, and the wood, when deprived of the bark, none at all

Ceylon possesses a great variety of animals, at the head of which the elephant may be placed, but the royal tiger, wolf, and antelope, all common on the continent, are inknown here. Of twenty different kinds of snakes examined by Di. Davy, sixteen were found to be harm-

less, although a great majority had the character of being venomous The carawalla, tucpolonga, the cobra de capello, and another, are the four poisonous snakes, and all of the coluber genus; but it is the bite of the two last only that is most dangerous Indeed, the leeches of Ceylon, though less dreaded, are niuch more troublesome than the whole snake tribe It is not certain that any medicine has yet been discovered that in the slightest degree promotes the recovery of a person bitten by snakes.

This island has long been remarkable for its richness in gems, and poverty with respect to the useful It is equally so for the number of rare animals it affords, and for the small number of the ordinary species. The only metallic ores hitherto found in Ceylon are those of iron and manganese; the first being generally diffused and tolerably abun-It has also been asserted that gold and mercury occur somewhere in Ceylon, but there is every reason to believe the statement unfounded. The precious metals are rarely discovered in their native rock, but only in alluvial grounds and the beds of The island contains every variety of quartz, such as rock crystal, amethyst, rose-quartz, and cat's-The first is abundant, of various colours, both massive and crystallized, of good quality, and in large masses The natives use it instead of glass for the lenses of spectacles, and also for ornamental purposes and statuary. Beautiful specimens of amethyst are found in the alluvial ground of Suffragam and the Seven Corles, and the finest cat's-eyes in the granitic alluvion of Suffragam and Matura. Prase (a variety of quartz) is of rare occurrence, and cluefly among the shore pebbles of Trincomalee

There is reason to believe that chalcedony exists in the interior, fragments having been found and used as gun-fints. The topaz is commonly white, blue, or yellowish white, and usually passes under the name of the

white or water supphire. Tourmalme Is rare; the emerald is not found oor probably the beryl The com mon garnet is very plentifully dis-seminated through the guelss in every part of the country, but the precious carnet occurs in few spots. The cinnamon-stonels found in few places elnef iv in the Moture district. The zircon family is abundant, and sold under various denominations such as topazes, tourmalines hyacinthis Inferior rubies and imperfect dismonds for the ruby family Ceylon has long been celebrated Four species of it, the chryso-beryl occur mostly in the of luvial of guelss or granutic rock, in the substance of which they oppear to hove originally ery stallized

Ceston abounds in rivers and springs remarkable for their purity. but not in mioeral or medicinal waters The first circumstance rasy be attrabuted to the mountainous unture of theisland the second to its geological Neither are the salme structure productions numerous. In certain cares of the interior natre, nitrate of lime sulphate of magnesin, and nlum are found Twenty two of these caves have been recorded but the manufacture of gunpowder being prolabited by the British government, they are now much neglected. Were the salt lakes of Vahagam Pattoo scientifically managed, they might be made to yield salt sufficient for the supply of oil India, and large quan tities of magnesia might be extracted from the residual brines while the preparation of the wood-ash necesearly would tend to destroy the juncte with which the district is overspread diminish the insalubrity of the air and check the mercase of wild anmals hostile to agriculture.

The grand article of unportation to Cogion is nee the value of which frequently exceeds half the omount of the whole goods exported and the next in consequence is cotton cloth jet the soil of the usland is capable of producing o redundant quantity of the finest cotton. Hemp is raised obundantly the sandy soil of the many the sandy soil of the many consequences.

ritime provinces being well adapted for its cultivation The cultivation of the sugar-cane nn a large scale has been twice attempted ond each time failed From the toddy of tho cocoa nut tree prrack is distilled by the common still in the same man ner as brandy from wine From 400 gallons of toddy fifty gallons of ar rack are drawe equal in strength to brandy twenty-five London under proof which when rectified produces half the quantity of strong spirit. Compared with Bengal rum Ceylon arrack is admitted to be the most wholesome liquor and it is thirty per cent cheaper In 1813 the total per cent cheaper value of exports from Ceylon was 2411040 rix-dollars (eleven and a half to the pound sterling) of imports 6,378 739 rix-dollars; but of this last two-thirds was tice, It having been n year of scarcity The total tonnage of all descriptions belonging to the Island was estimated at 8,000 tons

The public revenue of Ceylon moy he divided into two branches rione derived from certain productions of the Island reserved by government to the fiscal resources; the other, such imports os the land-tax, taxes on property, taxes on consumption and capitation taxes. Of the reserved productions emnamon is the most important, but of the net profits no official document has recently been published; the pearl fishery which lo 1814 Melded £61,000 the fishery of chank shells (a species of large bacelnum sawed into female ornaments for the wrists &c.), and madder root. The taking of elephants for racely so lucrative to the Dutch is no longer considered of any im portance the value of the animal government share of the erop differs so greatly or from one-tenth to onehalf and is received in kind, 1812 it omounted to 513174 rix dollars No grants of land are per mitted to be made by government to British subjects, or to European set tiers on the island Salt is one of the most productive sources of re-2 c

venue, and promises to yield a conside able augmentation. In 1812 the total amount of the public annual revenue of every description was 3.028.446 mx dollars (£263,343), thetotal expenses to 3,339,726 rix dollars: deficit 371,280 rix dollars. The establishment of civil servants, forty in number, fill a gradation of offices to which salaries are attached of from £500 to £3,000 per annum, and after a residence of twelve years are entitled to retire on pensions of from £400 to £700 per annum

The ancient population of Ceylon cannot now be satisfactorily ascertained, but there is no reason to suppose it ever was so great as at present, although some large ruins indicate that particular tracts were formerly more thickly inhabited. According to a census made by the collectors of districts in 1814 the whole population of the British possessions amounted to about 475,883 persons. Dr. Davy, in 1819, estimated the inhabitants of the Candian provinces at 300,000 persons, but when the total desolation of many of the districts through which he travelled is considered, that number probably exceeds the reality. On the other hand, it may be admitted that the population of the maritime provinces have increased, so that if we compute the total population of the island at 700,000 persons, it will be as near an approximation as can at present be attained.

The great body of the natives may be divided into three classes, each nearly equal in number; the Cingalese (or Ceylonesc), the Candians, and The first occupy the the Malabars. southern half of the island, from Dondra head to the confines of Baticalo on the cast, and to the river Chilaw on the west The coasts further north are occupied by the Malabars, while the Candians are enclosed in the central regions. Moodelliars and higher orders of Ceylonese profess Christianity, and have adopted many European customs, restricting themselves to one wife, and marrying according to the

forms of the Dutch church. A considerable number of the lower orders continue votaries of Buddha, and many have been converted to the faith of Mahomed; but it may be safely asserted that half of the whole Ceylonese (not including the Candians) openly profess Christianity, one poi tion according to the doctrines of the reformed church of Holland, the other following those of Rome; both equally ill-instructed and ig-The Cingalese have a language and written character of their own; but, owing to the mixed composition of the society, it is necessary that all public proclamations be issued in the Ceylonese, Malabar, Dutch,

and English languages.

Caste prevails among the unconverted Cingalese as among the Brahminical Hindoos, both acknowledging four principal ones similar in name and functions, but the distinctions among the first are very loosely ad-The Gattaroo tribe of hered to. outcasts are the descendants of certaın ındıviduals whose ancestors were expelled society by the king for the infamy of their conduct. The sentence pronounced against them by his majesty, however terrific in Ceylon, would not be considered any great hardship in England: "Let the criminal be exempted from paying taxes and performing scrvices, and be hencefoi wai d considered a Gattaioo." The Rhodees were made outcasts for continuing to eat beef after it was prohibited

The proper name of this island is Singhala, from which the term Ceylon is probably derived by the Hindoos on the continent it is named Lanca, and by the Arabians Scrindib. also named Taprobane, which possibly originates from Tapoo Ravana, the island of Ravan, a demon sovereign in the remote times of Hindoo an-The strange mythological poem named the Ramayuna, nairates the conquest of Ceylon and destruction of Ravan, by Rama king of Oudc, assisted by an army of gigantic monkics, which appears to indicate an intercourse between this island and

Upper Hindorian. The first meri han of the Hindoos presenthron h Oojela In Malwa of a hich we know the position list as according to that position lanca falls to the west of the present bland the Brahmins are of opinion that Legion hal once a much ereater extent and appearances between it and the Maldires tend to The name of the instify the belief rner Mahavilly Guoga probably onemated from Bale another famous hero of Hindoo romance from whom the relebrated rules at Valiavalipusram on the Coromandel coast are devicanted

The hi torical records of Ceston (if they deserve the name) are merely traditionary tales or mythological tomances very mloote at to the early and fabulons ares bus scanty in proportion as the verge of authentie history is approached. Prior to the arrival of the Paringuese in A 13 150. little is known of the bistory of Ceylon, and that little apocryphal. At that early date the l'ortaguese commander Almerda found the Island already harassed by forcemera from Atabia, and he persuaded the Cingalese king reading at Columbo to pay him a tribute of comamon on condition of assisting against these intruders. The 1603 the Butch Erst arrived and in 1632 they sent a strong armament to set in concert with the King of Candy against the Portuguese whom after a long and sanguinary struggle in 16.6 they completely subdued and expelled Then began a new series of wars between the Dutch and the Candian monarchs, who were frequently reduced to the last extremity; but protected by their mountains jungles and climate they always escaped subjugation while the Dutch retained possession of the maritime provinces to cooreguence of the revolutionary war, a British fleet and army were despatched against the latter in 1706 and their cooquest effected with the entire acquiescence of his Coodist majesty who expected great advontages but only exchanged a weak neighbour for a nowerful one.

The anbequent bletorical details belong to the kingdom of Candy where the wars of 1803 and 1815 are allud ed to, in which last year with the entire consent of the natives the con nitest of that state was finally effected. In 1817 a most expensive and harasaing rebellion I cake out in the central provinces which lasted notil the end of 1810 since which mainterrupted peace has prevailed and various improvements, fiscal judicial and com mercial have been executed. In 1821 the export of cinnamon was opened to all purchasers (having previously been restricted to the Last India Company) from the government stores. where pullic auctions were ordered to be held every mouth Ceylon has been fortunate to having been ruled ever alnce its conquest by a succession of able and zeulous governors; the Larl of Cuildford Sic Thomas Malt land and General Brownrige who In 1810 was succeeded by General Barnes - Dr Dary Bertolocci Cordiser, kans Buchman Percent, Sir Il ni Jones de)

CHACKY (Chali) .- A town or rather a cluster of small hamlets, in the province of Baliar 102 miles 5 E. from Patna ; lat. 24" 33 ., lon 86" 23 P It stands in an elevated undu lating tract of country near the top of the Bettlah gliant. A steep and stony pass seven miles long and the usual thoron\_hiere between this high region and the north-castern plains. For some time after the reduction of the jungleterry of Bo, hpoor, Chacky was the head-quarters of a British force a small anome redoubt still remains, dinnified with the name of Fort Hastings - (Fullarion, &c)

Chachoraa — A fortified village in the province of Malwa, dutilet of heeclewara, which appears at some forner period to have been a large and flourishing place

Cinonina for Schaing)—A town in the largelom of Ava once its capital altuated on the west bank of the lrawaily opposite to the capital; let. 21° 45′ N., len. 90° 58 E. This was formerly the grand emportum to which

cotton was brought, and being cleaned, embarked for the China market. was sent up the Irawady in boats cairying about 36,000 pounds, and reached the frontiers of Yunan in from The latter part thirty to forty days. of the passage is described as difficult and dangerous, owing to the increased rapidity of the stream over a rocky channel. Namdojee Praw, the second monarch of the reigning family, removed the seat of government from Monchaboo to Chagaing, on account of the purity of the air and beauty of the scenery. In 1826 it was found surrounded by a brick wall, and very populous. I It still continues a place of great religious resort, on account of its numerous pagodas. It is also the principal manufactóry of idols, which being hewn out of an adjacent quarry of fine alabaster, are sculptured here and afterwards transported to the remotest corner of the Burmese empire. The largest exceed the human size, and cost from £12 to £13 sterling; but some diminutive Gaudmas may be had for six or seven shillings. neighbourhood also there was formerly a manufactory of enormous rockets, in which branch of pyrotechny the Bu mans take great delight, and are particularly skilful — (Symes, Cox, Trant, Snodgrass, &c.)

CHAGEE.—Atown in the Balaghaut ceded districts, twenty-one miles north-west from Adon; lat. 15° 49' N., lon. 77° 4' E.

CHALAIN MEW —A town in the kingdom of Ava situated on the Aeng road, from Shembegewn on the Irawady to Amherst island in Arracan. It is the capital of a Birman district, and before the British invasion contained 10,000 inhabitants, but during the confusion of that period was destroyed by marauding parties from the Burmese armies Round it (in 1826) were the remains of a lofty brick wall (a rare sight in Ava), fifty feet high without and thirty within, supported by slight abutments, and only three and a half feet thick. To these walls the natives assign an antiquity of 1,500 years - (Trant, &c)

CHALOO —A yıllage in Tibet, situ-7 ated midway between two lakes; lat. 28° 20' N., lon. 89° 25' E., sixty miles. S.S.E. from Teshoo Loomboo. These lakes are frequented by multitudes of migratory birds, such as geese, ducks, teal and storks, which on the approach of winter take their flight to milder regions. Produgious numbers of saurasses, the largest of the crane kind, are seen here at certain seasons of the year, and great quantities of their eggs are collected on the banks. One of the lakes is much venerated by the Bootanners, who fancy it to be a favourite haunt of their deities The vicinity, though a table-land of great elevation, produces a dwarfish wheat of the lammas kind, and to the north there is a plain impregnated with a saline substance resembling natron, and called by the natives of Hindostan, where it is also found in great abundance, soojee-mutty.—(Capt. S. Turner, &c.)

CHALCKAUN — The quarter of Hindostan in which this tract is situated had until lately been so imperfectly explored, that the whole space comprehended under this head was supposed to be an uninhabited sandy desert, and marked as such in the best The recent extension of the British frontier in Gujerat has unsettled that opinion, it having been ascertained that the country, although of an and and barren aspect, is not absolute sahara in the African sense of the word, and that although the soil be in general sandy, and destitute of vegetation, yet it contains some cultivated spots, and is interspersed with petty chiefships and stationary tribes, which were probably never even tributary to the Patan or Mogul empires. The tract, however, appears, in the vague geography of Abul Fazel, to have been included in the large soubah or province of Mooltan, and division of Tatta. To the north it is bounded by Ameer; on the south it is separated from Cutch by a great salt morass named the Runn; to the east it has the province of Gujerat; and to the

nest the territors of Ende — It Is si trated principally between the twenty fourth—un I—twenty billi—degrees of north Islatu le

The desert properly speakers here etween I arkur, the borders of Sin le in I the Looran river. It commences on the north west frontier of Lutch n a fist sanly runn but soon asumes the thull or fully appearance which it retains beyond Amereote Throughout il is space there are wells cattered the vicinity of which is frequented by Wandhi, or horder of henherds, with their Pocks. In sarions parts there are forts erected by the Simle government to keep the communication open and also as leputs for their ters are. The best of these are named I lan hur Meethl and Balliari. Throughout the thall or randfull descrit, water is only ; tocured from wells, some above one hundred pards deeps. Occasionally pools of water are formed among the cleantians but thei are of serv trannent daration ; Indeed it la surpri ing

is finind in this quarter Throu hout the whole of the thull (sand-hill ) an i dhat (habital le pote) the south-west monsoon to expen caced but the rame are seasts and bre-ular Io summer the heat es in tence but in unner the air blowing over the sandy expanse is arid and chilly to the feelings In different parts exten ire bushy junales are found which afford shelter to the flocks Having never been explored by any I propess, our information respecting the interior continues defeethe. According to native testimony there are streams of water towards the north descending from the hills of Rajpootona but they are unable to reach the sea, being absorbed on thrir

low a country to destitute of moi⊷

ture, can steld so much parturage as

way by the thirsty soil of the devert. The proprietors or occupants of this portion of the desert are hispocial of the Sodha tribe who redde, when stationary in wretched hats later traxed with different tribes of Mohomedans and Sundeans. The Sodhriv are classed among the Hundons; but are

remarkable for the marriage of their dan-hiere with Mahomedam creey toes of healt rank of that faith in the alucent countries baring Fod! a where who are exertly you he after on account of their beauty an I talents. In level the female Codhan are so luchly extremed that a Cather computer his riches I v the number of his dan diters and relower in the brith of a female infant; while in the ner abouting protinces of Cutch and Cuttywar the Jharejasmo techniquelydestray their female imperny The ennounce of this deman I is, that pimps and mer curies from natable and raise up ler the exerci characters of charons (lurde) an I religious men licants are seen prowling through the wandle and barels of the jurery desert seeking wives and concubines for their em rlot tta

Such is the tract in the north of Cu th commonly conducted a part of the preat detert and named by ancient Valonoscian writers (halfit kaun but from what derivative un howen I toccupier the space lettween Grijerat and the frontiers of Sin led received by Lungerst, are per feetly will known and cent multi-tracted by Lungerst, are per feetly will known and ten funtly tracted by the natures an Inotistic standing it has received the name of desert strictly speaking it is not me at I possesses inhabitants and producer grained Varsoward &r.)

On attained—An cleared mount and peak of the Himslays near the confines of Tifiet and Bootan exit matel but without having been said factorily ascertained at 2,000 feet in lies, bit 1st 25°4 A., Ion 85°25 E., 125 miles V from the town of Cooch Bahar, in the Hengaldwirkt of Hungpoor

CHAMASCOCKOA.—A town in the province of Aurungahad, fifty six miles E by A from Loona; lat 18° 40 N., lon 74° 15 Г

CHANKA for Champa).—An extensive district in the province of Labore, attuated to the north of Your poor, on both sides of the river Its vey According to mainte authorities.

a long ridge of mountains, covered with perpetual snow, separates from the great Himalaya chain neai the source of the Beyah, and extending to the south-east, passes near Kangra, then crosses the Ravey, and finally bends north-west towards Cash-This ridge, called Pariyat, in general forms the south-eastern boundary of Chamba; but on its southern side the chief also possesses a tract called Rillo, said to have a communication with Cashmere The exact site of the town of Chamba has not yet been ascertained, but the latest maps place it in lat 32° 17′ N, lon.  $76^{\circ}$  5' E , 100 miles N.E. from Amritsir.

CHAMPA.—Sce SIAMPA.—(F. Bu-chanan, &c)

CHAMPANAGUR. — A considerable town in the province of Bahar, district of Boglipoor, three miles west from the town of Boglipoor, lat 25° 14' N., lon. 86° 55' E In 1809, including Lakshmigunge, it contained 1,500 houses, mostly occupied by weavers. At this place there is a monument of a Mahomedan saint, of some note and great size; for it is said to equal what his length and stature were when alive, which, on this authority, must have been nine cubits. great dimensions were probably bestowed on the saint from his having been placed among the Jams, whose gods are remarkably long -(F. Buchanan, &c.)

CHANDA (chandra, the moon).— An extensive district in the province of Gundwana, at present comprehended in the reserved territories of the Nagpoor raja In extreme length Chanda Proper is about eighty geographical miles from north to south, and extreme breadth from east to west about sixty geographical miles, but the area does not amount to more than 3,380 square miles northern and western parts are very similar to those of Deoghur, but rather more covered with jungle the east and south are mountainous and woody tracts, occupied by Gond

zemindars, and adjoining to Choteesghur and Bustar

When invaded by the Maharattas the rajas of Chanda were Gonds, who paid tribute to the Mogul throne of Delhi. After some fighting, the foit of Chanda was delivered up to Ragonee Bhoonsla the First, in 1749, by Raja Neel Khant Sah's treacherons Before the war of 1803 this country was in a flourishing condition, and the traffic with the seacoast considerable. Great quantities of salt were then imported, and cottons were sent in return, while coarse cloths were sent to Berar, from whence they ultimately found their way to Bombay and Arabia. The population and commerce, owing to foreign wars and internal convulsions, have since greatly declined. In 1817 the suburbs of Chanda were sacked, and all the cattle of the circumjacent villages swept away, this was followed by a rebellion of the Gond zemindars, during which the country suffered much from their depredations. Famine and cholera raged one year, and in 1822 and 1823 great numbers of cattle were destroyed by disease. In 1818 the collections of this district amounted to 2,33,037 rupees, in 1824, to 3,67,391 rupees, the population, to 306,996 persons. During the leign of Aurengzebe this remote division of Gundwana was named, and annexed by edict to the Mogul empire, although scarcely penetiated by the imperial forces -(Jenkins, Captain Crawfurd, Captain Blunt, &c.)

CHANDA (or Toork Chanda)—A populous and strongly fortified town in the province of Gundwana, eighty miles S. from the city of Nagpoor; lat 20°4′N, lon 79°22′E. This large town, equal in size to Nagpoor, is situated between two small livers, the Eeree and Jerpati, which unite at the distance of half a mile from its southern extremity. At the northern extremity is a deep and extensive tank, beyond which are some hills commanding the fortifications. Within the walls, equi-distant from the northern and southern faces, stands

a catadel named the Bala hills; the rest of the interior consists of strag gling streets, detached houses, gar deny and plantations. The walls of Chanda are six miles in carcumfercore and from fifteen to twenty feet high, are built of cut free-stone, we'l cemented and flanked by round towers caracious enough for the largest guns Of these when besieged there were citity on the works; and the gerri son of whom only a few were Alahs, amounted to 2 000 men. It was taken by assalt on the 20th May ISIN the breach being so large and the ascent so ency as to admit of a horse artillery gun being run up; of the garnion about 400 perished, but the British loss was very small principally occa sioned by fail ne and execuse heat the thermometer during the attack having riven to 140° ln the sun Amon, the fugither who escaped was a Gond raje, in whose palace (as It is called) considerable property was found a mone the rest nine lacks of rupces, du, up a few days after the storm. Agrest variety of Luropean manufactures were also found espeeralls glass water and some pictures; for this ancient cardtal being con I dered the enadel of the kinedom had become the grand repository of all that was rare and valoable. the town of Chanda contained 5 000 housest in 1804, 4 200 : an 11n 1+2... only 2 100 houses. (Illacker, Jen kur ge)

CHANDANNEE (or Chianance) -A district in the province of Jahore, which in 1783 had a district attached to it, yielding a lack of supers revenue to its petty prince who was him self dependent on the chief of Jam boe The town of Chandahnee Is al tunted In 1st. 33° 21' \ lon 70° C' F., about seventy six miles S by E from Cashmere city, and to 1783 was a ocat and populous town. It stands on the brow of a full at the foot of which, oo the eastern aide runso rapid stream crossed on two stout fir beams one of which reaches from the shore to an insulated rock in the centre, and the other from the rock

to the opposite shore At Dammomonlee in this district there is an uncommonly beautiful and fertile valley—(Fortice, 4c)

CHAPOTROWA — A consilerable town In the produce of Bengal, do that of Houghly, fifth-five miles Wey From Calcutta; ist 22° 42' N, 100 87° 44 L. In 1814 the number of Inhabitants amounted to 18145 persons.—CJ B Bardey 5°)

CHAROTERAGUE (Chardennege re I-A French settlement in the province of Bengal situated on the and lank of the river Houghly. about sistern miles direct distance abore Calentia ; lat 22 49 1 1 lon hy 2" I. The poution of this town Is to every respect better than that of Calcuttat the territory originally at tached to it extended two miles along the neer and one Inland. In 1k14 so enumeration was made of the house and inhabitants when the former were found to amount to 8441, and the latter to 41,377 per some the resence for the preceding year to 7 154 runces While under the British government the foreign artilements of Chandernagore, Chin sura, and Scrampoor swarmed with receivers of stolen mode who pur cha ed the stolen property clandesthely imported from the British districts and on account of the facili tice afforded in this species of traffic their actilements were resorted to hy various classes of native blackless cheats swindlers, hawkers pedlars and fraudulent pawnhrol era

On the 23d March 1737, Chaoder magore was taken by the forces under Admiral Watton and Colonnel Circ. Admiral Watton and Colonnel Circ. Alm is a subject on board the ships ergaged. It has sheer remained unfortified and has been taken possession of by the British government without opposition on the commencement of lossifistics with France. On the 4th December 1816 this actile ment was delivered over to Monslear Dayot the government of local street of the Perench government to Leceive charge, ofter lawing been (with the except

tion of a few months in 1802) twenty-three years occupied by British troops and functionaries. — (W B Bayley, J. Shakespear, Ives, Rennell, &c)

CHANDEREE (or Chindaree) .large district in the province of Malwa, where it occupies an extent of country in the north-east corner, ninety miles from east to west, and seventy from north to south. towns of most note are Raghooghur, Seronge, Khimlassa, and Eesaughur; and the principal rivers the Sinde and Betwa. In 1820 it produced a revenue of five lacks of rupees to its zemindar, Raja Murdan Singh, a tributary to Dowlet Row Sindia town of Chanderee, whence the name of the district originates, is described as a strong hill-fort with an extensive pettah, both undergoing a rapid decay, lat. 24° 32′ N, lon 78° 10′ E; forty-eight miles NNE. from Seronge.—(Malcolm, &c.)

CHANDODE.—A large town belonging to the Guicowar in Gujerat, the head of a pergunnah, much intersected with ravines and watercourses, thirty-five miles E N E from Broach; lat. 22° 1′ N., lon 20° 40′ E. It stands on the north bank of the Nerbudda, and is held in considerable veneration by the Hindoos as a place of sanctity.

CHANDOKEE.—A district in the province of Mooltan, subject to the Ameers of Sinde, situated about the twenty-seventh degree of north latitude, and during the floods completely insulated by the Indus, the Larkhanu, and the Arul rivers, forming an island of a triangular shape, which is reckoned the most productive portion of the province, and in 1813 was said to yield eight lacks of rupees per annum

CHANDORE —A fortified town of considerable size in the province of Candeish, into which it commands one of the best passes, eighty-five miles W.N.W. from Aurungabad, lat 20° 19′ N, lon 74° 19′ E. The fortress of Chandore commands one

of the best passes on the range of hills on which it stands. The hill or rock actually forms the fort, which is naturally strong, being quite maccessible every where but at the gateway, where alone it is fortified by art, and there is but one entrance of any kind Notwithstanding this formidable position, it surrendered by capitulation after a feeble resistance in 1804, to a detachment under Colonel Wallace, and during the war of 1818, in consequence of the severe example made by Sir Thomas Hislop at Talneic, the native commandant on the part of Holear, sent to notify his intention of giving up the place without opposition. After passing Chandore, marching north towards the Tuptec, the country is very wild, and occupied by a half-civilized race of Bheels After crossing the Tupand Patans tee, the road to Oojein passes over mountains to Chooly Mheshwar, on the Neibudda.—(Maharatta Papers, &c.)

CHANDRAGIRI (the moon mountam)—A large square fort in the Malabar province, thirty miles south from Mangalore, situated on the south side of a river of the same name, which is the northern boundary of Malayala or Malabar The country on the south side is called by the natives Tulava, lat. 12°28'N, lon. 75° 7' E.

CHANGAMA —A town in the Salem province, seventy-five miles W by N. from Pondieherry, lat. 12°18'N, lon. 78° 50' E This town contains a lofty pagoda, and gives its name to a winding pass of no difficulty, which leads eastward through the chain of mountains dividing the Carnatic from the Barramahal. It stands on the Carnatic side of the pass —(Fullarton, &c)

CHANDSIR—A small town in the British portion of the Candeish province, situated on the Eena river, eight miles E by S. from Naundoor.

CHANTIBUN (or Chantibond)—A province in India beyond the Ganges, formerly a part of the kingdom of

Cambodia, but in the "I belianced to beam having leen conquered by Pistack, the Chinese societies of beam. This is a monatament country near the head of the gulf, forming the eastern boundary of beam towards Cambodia, from which the separated by a radge of mountains. At a short distance from the seasonast there is one of great cleration united Bambusey, from which an exten we slew of the province may be laid.

The principal exports are pepper tienzum, lac, lyory aguilla-wood thinocetos horas, hides of oven buf falnes deer &c., and gems of inferior quality The forests also abound with execulent timber All the produce le carried to Bankok the capital of Sum direct foreign commerce being prohibited The population consists of Chinese Cochin Chinese Cambodiant and Sameses but much the greater proportion are said to be Chinese who engrous the wealth and traffic. In 18"I there were also from 200 to 300 native Christians who like those of Siam were under the care of Joseph Florens a french priest and bishop of Metellopolis, The governor at that date was a Chi nest .- (Finlayton, Se)

CHANTIAN—A town of considerable commerce in the gulf of \$1 am the capital of the above province situated about fire miles up a small race, inlast 12º 45' N. Jon 102° 15 E. It is un emporatus for carda moma and perper cultivated by a resident Chinese population; imittle Stamese exclude all strangers,—(crass/ard, &c)

Charauna.—A town or station in Tibet ar Southern Tratary, 5fty miles N E from Cangoniti; 1st 31° 27' N Ion 70° 33 F This place is the residence of a Chunese zoom poong ar governor who collects the tribute in the neighbourhood, and is said to possess a fartress capable of containing 1,000 men.—(Jomes Fra zer, 5c)

CHARMANAGLI (or Soornomucky)
RIVER - A considerable atream that

rises in the mountains above Chand gbriss, in the northern si tract of Accordant after traversing the plains over a broad sandy feed falls into the two of Hengal

CHARKATRA for Karry).— I town in the province of Candenh, district of Hindra six rules 11 by 1 from Hindrah 1 lat 22° 27 %, for 77° 4

Chawan,—A town with a small square glurry in the province of Camiesth, do treet of Bugwaneca, six ty-seven miles 1 from Booran-toors lat 22° w \ lon 70° 57 k.

Chass.—A small town in the protince of Bergal district of the Junglo Mahale, a linated on the new Bernices road, within four miles of the western boundary of the above di trict and that of flam, hur

CHATAFFAAMAAH —A hill in the province of Valalar 11 mg abruptly from the abuth bank of the Bepoor treer, and about from miles to the caturari of the tillage of Bepoore, where the heady hullo or Fandoo Coolies (antient cares or cemetenes respecting the construction of which there 1 no record) are particularly numerous.—(Babugten je)

CHAPPA—A small tunn in the province of Bengal district of the Jungle Mahala, 104 nuice from Col cuttan lat 237-20 Ng lon 57° In

Cuttoo.—A town in the Ajancer province twenty-four travelling miles 5.5 F from the cuty of Ajmeer; last \$2^3 B N\_n ion 7 \(^24^7 L\) This has been a consulcable place, but is now so much decayed and the walls so displayed that it is almost an upon tawn.—(\*\*Longrom \$6^0\$).

CHATTERSHUE —A tawn in the Agra province south of the Chumbul, twenty as miles east by south from Gushort let 20° 10° Å lon. 78° 25 Å

Chatteross ((Nottrapura) — A inwn in the province of Allahabad situated below the ghants, about 17th miles W.S.W. from the city of Allainhad; lat 24°50′ N., lnn. 70°3. E. It was founded while Bundelcund was ruled by its native chiefs, by Raja Chuttersal, and was occasionally his place of residence, which rendered it flourishing, and a sort of mart between Mirzapoor and the Deccan. From this city, and from the diamond mines of Pannah, almost the whole sayer duties were levied, as there was then no other mercantile town of magnitude in Bundelcund, but, in consequence of the altered condition of Hindostan, it has since greatly decayed. It still, however, manufactures considerable quantities of coarse cotton wrapper, with which it supplies the merchandize passing to and from the Deccan. -(MSS., Ironside, Rennell, Franklin, Sc.)

CHATTOOR.—A town in the Carnatic province, district of Madura, 112 miles N. by E. from Cape Comorin; lat. 9° 41′ N., lon. 78° 1′ E.

CHATTRA (Kshetra).—A town and place of pilgrimage in Nepaul, eightytwo miles N. by W from Purnea, in Bengal; lat. 26° 53' N., lon. 87° 4' E Near to this place is the temple of Varaha Kshetra, dedicated to Vishnu in the form of a boar, where holy persons of the Hindoo faith sometimes bury themselves alive, on which occasions they are supposed to be inspired with the gift of prophecy—
(F. Buchanan, &c)

CHAUKER —A large district in the province of Mooltan, intersected by the Indus, and situated between the twenty-fifth and twenty-sixth degrees of north latitude. It belongs to the Ameers of Sinde, but respecting the condition of its interior nothing is known, except that the soil is saidy and indifferently cultivated. The chief town is named Haulla.

CHAUKNA.—A town in the province of Aurungabad, nineteen miles N. from Poona; lat. 18° 43′ N., lon. 74° 3′ E.

Chaunchra.—A town in the Malwa province, forty-two miles west from Seronge; lat. 24°8′ N., lon. 77°3′ E.

Chayenpoor.—A tract of country in Northern Hindostan, formed into a district by the Gorkhas of Nepaul a short time prior to 1809, under the jurisdiction of a subah, who resides at the town of Chayenpoor. hilly parts of Sikkim, as far as had been subdued, and a portion of Tibet bordering on the Arun river, were annexed to the Chayenpoor subaliship, which is bounded by the Sinklaya, Arun, and Kausiki on the west, and to the east was formerly bounded by the Teesta; but since the last Nepaulese war all the conquests made by that people from the Sikkim Raja, east of the Mutchee river, and a line drawn from thence to the hills, having been restored to him, this district may be considered as terminating at the boundaries last specified. It consists altogether of lofty mountains, rising in many parts to the most tremendous alps, thinly inhabited, and producing little revenue to the government. The forts venue to the government. or stations are Chayenpoor, the capital, Changgeya, and Hidang, a large place towards the frontiers of Tibet, from whence salt (carried on sheep), gold, silver, musk, niusk-deer skins, cowtails or chownes, blankets, boinx, Chinese silks, and medicinal herbs, are imported. The goods sent noith from Chayenpoor are rice, wheat, oil, butter, iron, copper, cotton cloth, broad-cloth, catechu, myrobalans, planks of the dhupi, pepper, mdigo, tobacco, hides, otter fur, sugar-candy, extract of sugar-cane, and occasionally some pearls. In the western portion of Chayenpoor the most numerous tribe is the Kirauts, next to these the Limboos, then the Magar, then the Khas tribe, and lastly the Rajpoots. Within its limits there are also some Murmis, and towards the north some Bhooteas.)—F. Buchanan, &c.)

CHALENPOOR.—A fortified town in Nepaul, the capital of the preceding district, 110 miles north from Purneah, and five from the Arun river; lat. 27° 18' N., lon. 87° E

CHEDUBA ISLE .- An island in the

Bay of Bengal Ising off the cos t of Arracant lat. 15' 45 %, lon 93' 11' In lele the most westerbr of a chustre. and of a moderate bei ht with several hummocks on it a length thirty miles by about ten in irreadih It to lest m few miles distant from the mun land and between the two there le said to be a good harbour; but I ke the Arracan giver It has the disadvantage of a Ice shore Both Chedula and the adjacent ides are inhalated and for merly cargoes of rice could be pro-The Interior channel cured here is annually natigated by many Bur mere trading boats but does not afford a sale passage for vessels of buethen Limessone Is found here, and the soil appears well adapted for the culturation of cutton are also exported

This laind was taken from the Burmers in 1824 by a Birthin detachment with the love of two killed and thirty wounded and was found to contain only ten paras or small villages. It was hoped that it would have praved a u rida acquassion by furnishing supplies to the army but with the exception of a few buildoes, no advantage resulted from the captore, and it proved the grave of its garrison. It has not yet been any veych—(Syner, Jahove Trant &c.)

CHTCOANCE.—A small town in the province of Candeish pergunnah of Cundwah surrounded by a mud wall, and defended by a small glurry In 1820 it contained 200 houses.—(Malcolm &c)

Cheeraarra.—A town in the Mal wa province aituated on the north bank of the Nerbudda river, fifty two miles S by W from Ropaul; lot 22° 33' N., ion 77° 20' E

Circeaon.—A large town in the province of Bains district of Sarun, situated below Chupra to which it is almost joiced by a continued line of villages.—(Fullarion, &c.)

CHEESARANY (or Cheesaghurry).—A fortress in the Nepaulese territories considered of great importance by the Gorkhas as the southern key

of the Necaul radicy t lat 27° 33' No. lon. 84° 80' 1. bome years ago this fort was small and out of repur but siere the commencement of the disouter with the Brilish povernment & has been enlarged and strengthened t but It is erroneously placed, as an averifant me ht go round it and get so ligh shore as completely to com mand It By the Gorkhau It le considered a sort of fortorn hone. there being a practical le road from hence the whole way to Catmandoo uncontructed by fortifications name is derived from a spring of cold water, which, according to barome trical observations is 5,818 feet above the plains of Bengal At Cheesapany there le a regular custom house established where the imposts and duties on articles of traffic from the British and Oudo territories are leried. (Abdel Russool, Kirlpatrick. Calcbrooks fr)

CRETARESET — A large village in the province of Ajmer, perganah of Jawad, belonging to Sindia, to whom in 1920 it hielded with fourteen other subordinate villages a revenue of 6,450 rupees.—(Walcolm, fc)

CHERTEL—A town in the Gujerat penintula, et, his three miles N E from Din Head; lat 21° 42° N., lon 71° D'E

Citis rooa,—A large ruined town in the province of Candeish suuged on the Agnee ever on the high road from Bham, hur to Charwah in Sin dia'a territory in 1820 it was quite deserted.—( Vancois & 6)

CREKORZE for Therad.—A town In the province of Bejspoor, district of the Northern Concan. Shortly after the appearance of the cholera at this place in 18°0 the Catholic Christian Schermen quarrelled with their vicar because he would not permit them to perform certain superstitious pranka (such as shancing franticly in a circle, daring which the dancers are sprinkled with coloured water), to proplinte the delty supposed to preside over this malady

The judge prohibited such practices, but the Cooly Christians continued refractory, and laid a dead body at the door of the court of justice. They also petitioned that a Hindoo priest might be formally authorized to perform the marriage ceremony among them, but the judge declined interfering, and recommended the appointment of a new vicar-general to prevent total apostacy—(Babington, Public MS. Documents, &c.)

CHENDWASSA—A small decayed town in the province of Malwa, the cusba or head of a pergunnah of forty villages, belonging to Holcar's district of Rampoora, from which it lies south eighteen miles, lat 24° 13′ N., lon. 75° 32′ E—(Malcolm, &c)

CHEPAL.—A small town in Northern Hindostan, ten miles N E from the Chur station, lat. 30° 56′ N., lon. 77° 35′ E.

CHERIAGHAUT (or bit d passage) — A strong pass in the Nepaul territories, about seven miles from Beechiaco, but commanded by two hills. The road from hence to Hethaura is very good for loaded cattle, and might be easily rendered fit for carts.

CHERIBON (in Java) — See Sheri-

CHERICAL.—At present a small subdivision of the Malabar province, situated about the twelfth degree of north latitude, which formerly gave its name to an extensive tract of country then subject to the Cherical Rajas

CHEROOTER —A district in the province of Gujerat, extending along the west side of the river Mahy, belonging to the Guicowar and the British government. The principal towns are Cambay, Pitland, Ballasinore, and Beerpoor; but the name as distinctive of a geographical subdivision is now almost obsolete.

CHETROLE.—A town in the province of Cutch, twenty miles N by W from Malha. Lat. 23° 12′ N, lon. 70° 48′ E

CHICACOLE.—(See CICACOLE.)

- CHICANHUALLY.—A large square town in the Mysore, strongly fortified with mud walls, cavalies at the angles, and in the centre a square citadel, fortified in the same manner. Lat 13° 25' N, lon 76° 40' E, sixty-seven miles N. from Seringapatam — (F. Buchanan, &c)

CHICA BALAPOOR —A town in the Mysore Raja's territories, also named Chinabalabaram, thirty-six nules N by E. from Bangalore. Lat. 13° 26′ N, lon. 77° 47′ E Sugar-candy is made here equal to that of China, and the clayed sugar is very white and fine; but the art being a secret, it is sold so dear, that the Chinese sugar-candy can be purchased cheaper at Seringapatam than this can be on the very spot where it is produced —(F Buchanan, &c)

CHICAMOGLOOR—A town in the Mysore territories, eighty-five miles N W. from Seringapatam Lat 13° 18' N, lon 75° 54' E

CHICHACOTTA (Chichacata) — A small town situated in the poition of the plain belonging to Bootan, nineteen miles N from Cooch Bahai, lat. 26° 85' N, lon 89° 43' E ing the supture that took place in A D 1772, Chichacotta was taken by a Bengal detachment from the Bootanners, after having been defended with more obstinacy and personal courage than they usually display; but with matchlocks, sabres, and bows, they could not long contend with firelocks, discipline, and artil-It was restored to them on the conclusion of the war, and is still, though small, the principal town on this frontier.

CHICHEROWLY.—A fortified town in the province of Delhi, twenty-two miles N N.W. from Saharunpoor, which was taken possession of in 1818, by a detachment under Brigadier-general Arnold, the chief, Jodh Singh Kulsia, and his people having been refractory Lat 30° 15′ N, lon. 77° 21′.

CHICKLEE —Atown in the province of Malwa, eleven miles W S.W. from

homes - ( Maleria, Sr )

CHICKOORY (Chicari) - 1 const deralde town with an extensive basar, in the province of Hejppoot, facult My miles & from Meritch; lat. 163 2) N. lon. 74" 44 P This place is pleasantly situated in the midst of an aumhitheatre of hills, and interserted by a rivulet which forms a cascade within the town the neighbourhood of which is noted for producing grapes of an extraordinary size. At present a belongs to the Colspoor Raja. (Fullarton, Moor, &c)

CnicutoAn.-A small town be longing to I lolear in the province of Malwa situated on the north bank of the Nerbudda fourteen sales S F of Hooksee and twents-one miles west of Bancancer : lat 22° 8' Na lon 74° 50 E In 1820 it contained 100 houses enclosed by a mud wall and a small runous churry ( Malcolm &c)

CHILAW .- A small town in Cerlon situated on a peninsulo formed by two branches of the river; lat 7° 33 N., lon. 79° 40' E., forty-five miles north from Columbo fishery is occasionally carried on here but much inferior to that of Condatchy llay yet one year it yielded n revenue of 40 000 preod is The coast from Chilaw to Negombo is flat, sandy and open with little cultiva tion.-(Cordiner Se)

Chilka I akr .- This lake sensrates the five Northern Circars tounrds the sea from the province of Cuttack In length at may be es timated at thirty-live miles, by eacht the average breadth is very shallow contains many unhabited islands but towards the north end is much broken ento narrow channels wlading among Its general low swampy islands depth is about four feet and a half, and the greatest six feet but it is considered to be rapidly filling up It oppears to have been an operation of the sea on a send; shore tha elevation of which was little obove the level of the country within the beach, and native traditions fix this event

Onjest, which in 1820 continued 200 about the third century of the Chris frances finthe & W it is bounded for a side of mountains which ex tends from the Slahanulle in the Conducty firet, and encloses the Sorthern Circare towards the In terior: It consequently forms a pa s on each safe into the provence of Cottack, and the southern half pre eents a discrety of oljects, moun Vicaci tains Islands, and forcets from the sea It has the appearance of a deep lay, the slip of land which separates them not being visible Title is a mere neck of sand less than a mile and penetrated by several channels. In If an engineer officer was deputed to examine these and to report on the practicability of removing the bar that threatened to present the ingress and egress of the sen, and thereby injure the government salt manufactures on its hanks obtained by solar evaporation, to the amount of 200 000 maunds annually

The Chillia lake is navigated by large flat-bottomed hoxes called part dy hoats forty five feet long seven deep and five wide with perpen dicular sides, converging by sharp angles to a point at each extremity North of Paloor the Clidka expands to a magnificent sheet of water, in terapersed with a few rocky Islands consisting of line rounded blocks of a highly indurated perphyritie gra-nite piled on each other in the wildest confusion onl most fantastic shapes The Islands and banks oro studded with small hamlets and fisheries by dams and wicker baskets are largely carned on for salting and exportation to the Interior The salt is entirely procured by evaporation without the shahtest aid from fire The banks, and even the naked souls abound with flocks of natelopes, and birds of the crane family - (Stirling Fullarion Renaelt Public MS Documents Upton, Ge ]

Cu uter.-A small territory in Northern Ilundoston subject to the Nepaulese, attuated partly on the plains and partly on the bills bordering the king of Oude a dominions.

about ninety-five miles N N E. from Lucknow. The chief's house is situated on a hill, where it is surrounded by 200 huts and houses.

CHILKANA.—A town in the province of Delhi, eight miles N N.W from Saliarunpoor. Lat. 30° 5′ N., lon 77° 27′ E.

CHILKAUREE.—A town in the Gujerat province, 102 miles E N E. from Ahmedabad; lat 23° 25' N, lon. 74° 13' E.

CHILKEAH.—A town in the province of Delhi, district of Bareily, forty-two miles NE from Moradabad; lat. 29° 24' N, lon. 79° 5' E. This neighbourhood is celebrated for its bamboos, which though small are remarkably tough, and seem to gain consistence and soundness from a certain degree of frost. The same is said also as to the plantains. The inhabitants in this neighbourhood have yellow unhealthy skins, a dull fierce look, ragged and scanty clothing, swords, and shields, as in the other part of this inhospitable belt (the Terriani), the place is nevertheless of importance, being one of the principal marts of trade with Kumaon, and through that district with Tibet and Tartary. At certain seasons of the year a great many temporary huts are erected for the accommodation of traders, and here English cloths and Eastern shawls are seen exposed for sale in huts not better than pigstyes. When the unhealthy season returns all these are abandoned and rot to picces.

CHILMARRY (Chalamari).—A town in the province of Bengal, district of Rungpoor, situated on the banks of the great Brahmaputra, about 130 miles N. by W. from Dacca; 25° 25′ N, lon. 88° 42′ E This is a place of considerable resort, which in 1810 contained about 400 houses, and was the usual residence of the commissioner of Cooch Bahar; but it is principally remarkable for its vicinity to Varuni Chur. This is an extensive sandbank in the bed of the river, where Hindoo pilgrims in great

numbers assemble during a certain festival, and, as is customary on these occasions, transact much commercial business. In ordinary years about 60,000 are said to meet; but the number increases to 100,000 when the festival happens on a Wednesday, on which event devotees arrive even from Benaies and Juggernauth.—
(F. Buchanan, &c.)

Chillambaram —A considerable town in the Carnatic, situated on the sea-coast three miles south from Portonovo, and thirty-six miles south of Pondicherry; lat 11° 28' N., lon. 79° 47′ E. At a short distance to the south the river Coleroon discharges itself into the sea by three sandy outlets, two of great expanse. Ferry boats are established on two during the south-west monsoon, when the parent river, the Cavery, overflows, but the middle branch is fordable at all seasons In 1820 there was an extensive indigo concern carried on at Chillambaram, and the islands on the Coleroon were covered with the indigo plant—(Fullarton, &c.)

CHILLAMBARAM PAGODAS. -- Hindoo temples in the Carnatic, adjacent to the town of Chillambaram above described. There are four pyramidical gateways, facing respectively the four cardinal points, all much in the same style of architecture, and covered with antique sculptures. whole structure extends 1,332 fcet in one direction, and 936 in another, and besides the principal sanctuary contains a spacious tank, numerous choultries, and subordinate temples, which last are all neatly roofed with copper. The interior ceilings of these also are fantastically decorated with mythological paintings; but Sivapati is the principal object of worship. The whole of the architecture has a more ancient appearance than that of Tanjore or Ramisseram.—(Fullarton, Sonnerat, Lord Valentia, &c)

CHINACHIN.—A large scattered place in the Nepaulese dominions, the houses of which are built of brick

and stone with flat roofs; lat 29'13 N. lon. 61" 15 E., 160 miles \ by E. from Lucknow liere are two temples dedicated to Siva one named Chandranath, and the other Bhairs ranath. Merchants from the south repair here to purchase horses, hringing up with them metals, spices, and cloth, and carrying down con-talls salt horses, a kind of wooilen cloth, mediranal herbe and musk In the markets according to native accounts, many sheep and gosts are exposed to sale bearing loads of salt muck medicinal herist and a seed named barl yal thera to the vicinity are some of the cattie whose talia form the chownes, and they are very numerous In the hilly parts. Of these exitie there are said to be three species the chowry, the looloo and the jhogo the two last having talls boshy from the root; the chowry sort being the most valuable,-(F Buckenen, &c)

CRIMAFATAM —An open town in the Alysore dominons, which in A D 1800 contained about 1 000 houses, with a handsome stone fort at a little dutance; it, 13° 36° No. 10n. 77° 17° E., thirty nine miles 1.—E. from Sernogypatam.—(F. Hackenen, &c.)

Chixaca (or Acceines) .- This river has its source in the southern decil vity of the limaleys mountains near the south-east corner of Cashmere in the alpine district of hishtewar from whence it flows in a south-west eriy direction untii it umtea with tho Jhyium, or Hydaspes at Tremmoo Chauty lat, 30° 55' N This is the largest of the Punjab streams Vizierabad Ghaut fifty miles north from Lahore, on the Jist of July 1809, it measured one mile three furlongs and twenty perches across was fourteen feet deep, with a current of about five miles per hour but at the same place in the dry season Its channel does not exceed 300 yards There is not any ascertained ford to the south of the hills ; but It Is easily crossed at the points where the banks are law and the bed wide. there being only a short distance in the centre to swim over The banks

above the ghants are low and well wooded but the trees so small that timber for boat-inviding la floated down from the hills 150 miles further up where it is abundant

The ancient Ilundoo name of this tiver is Chandrahhage of Chandra santa and it is considered to be tho Ita junction Arraines of Alexander with the Jhylum is effected with considerable noise and violence, which ercumstance is noticed both by the listorians of Alexander and Timour The course of the Chinauh from the anowy mountains to Vittenda chaut where combined with the Jhylam It unites with the Indus, may, including windings, be estimated at 650 miles. -(Rennell Mac Cartney Milford, ac )

CRINCITE for Chang! BAY.—As a pactous bay and hashour in Cochin China, completely sheltered from all winds but only accessible to large exe cle or high water; lat, 13° 50° \(^{1}\) At the liead of this bay the city of Quin-nong is altunted.

CHINCHOON .- A small town in the provioce of Aurungalad situated on the road from Bombay to Poons, and about ten mies \N W from that city; lat. 18° 37' \, lon 73° 56' } It is picauntiy situated on the banks uf a giver and is sand to contain 5,000 inhabitants Including 300 Brahmin families But it is principally remarkable on the residence of Chintaman Deo whom a great proportion of the Valuratta nation believe to be an Incarnation of their favourite deity Goonputty The present (in 1820) Is the eighth in descent from the first, and they take alternately the name of Chintamun Dee and Narrain Dee The Brahmins relate that each Deo on his death has been burned, and Invariably a small image of Goon putty has miraculously risen from the ashes which is piaced in a tomb and worshipped Although the Deo be an incarnation of Goonputty, he per forms poojs (worship) to his other self in the form of a statue; for the latter, the Braismins say, Is the greatest, the Intensity of his power not being diminished by the incarnation.

This Deo is er officio a dewannah, or fool; but the term fool does not in this instance, as in most others, give the best translation of the word. He is totally unmindful and ignorant of worldly affairs; unable (the Brahmins say) to hold conversation beyond the proposition, reply, and rejoinder, and then in a childish blubbering manner In other respects his ordinary occupations do not materially differ from those of other men; for he eats, drinks, takes wives to himself, &e like other In 1809 the Deo was a Brahmins boy twelve years old, and in 1820, when Chinchoor was visited by Mr. Fullation, the same individual was the existing divinity. His palace is an enormous pile of building near the Moota liver, on the banks of The floors which the town stands. of this edifice are spread over with the sacred cow-dung, and the apartments crowded with sleek, shining, Near the and well-fed Brahmins palace are the tombs of former Deos, which are so many small temples, enclosed and planted round with trees, and communicating by steps with the river. Here goes on the business of worship In one place women are seen pouring oil, water, and milk over the images of the gods; in another, children decking themselves with flowers Heicpilgrims and devotees performing their ablutions, and there priests chanting portions of the sacied poems: the whole proceeding with the most listless indolence and apathy. - (Lord Valentia, Moor, M. Graham, &c)

Chingleput (or the jaghtre)—
The ancient acquisitions of the EastIndia Company in the Carnatic porvince formerly denominated the jaghire, now form the collectorate of
Chingleput. To the north it is
bounded by the Nellore district, on
the south by the southern division of
Aicot; on the east it has the bay of
Bengal, and on the west the northern
and southern Arcot districts. The

space originally termed the jaghire extends northward to the Pulicat lake, southwards to Allumparva, and westward to Conjeveram, being about 108 miles along shore, and forty-seven inland in the widest part, containing altogether 2,440 square miles

The soil of this district is in most parts indifferent. Rocks, or large detached masses of granite, project in the fields, and almost every where the country is overrun with low prickly bushes; yet the palmyra thrives without trouble, and is both cheap and abundant The tarr or fermented juice, and the jagary or inspissated juice of the tree (the borassus flabelliformis) are much esteemed, and could the latter be converted to sugar or to a palatable spirituous liquor, the barren plains of the Cainatic might be rendered productive Bamboos are very scarce, and sell for three times their cost in Calcutta, but recently the inhabitants have been encouraged to plant them round their houses At Sri Permaturu there is a tank equal to the watering of 2,500 acres.

The tract of territory named the Jaghire was obtained in 1750 and 1763 from the nabob of Arcot, in return for services rendered to him and to his father by the Company, and was rented to the nabob on renewed leases until 1780, when the Madras presidency assumed the direct management. This district was twice invaded by Hyder Ali, in 1768 and in 1780, when he ravaged it with fire and sword so effectually, that at the termination of the latter war, in 1784, hardly any other signs were left in many parts of the country of its ever having been inhabited than the bones of the massacred, and the naked walls of the houses, choultries, and temples that had been destroyed. the havoc of war succeeded a destructive famine; and the emigration, from these combined causes, nearly completed the depopulation of the coun-In 1790 the jagliire was divided into two collectorships; but in 1791 was united again, under the management of Mr. Place, who continued until 1799 during wideli period it gradu ally improved Annual village settlements continued to be made until 1802 when the permanent assessment took place the lands having previously been divided into sixty one estates sold to individuals, and bearing an assessment of from 2,000 to 5 000 pegodas. In f817 the total gross collection of the public revenue in all its branches amounted to 413 034 pagodas; and in 1802 according to the returns made to government by the collectors, the total population amounted to 163 120 persons. Beaides Madras, the principal towns are Chingleput and Conferenam - (1 Buchnann Isfik Report, Pennell, I abbe Mb Documents, Je)

Luirginer (Singkalapetta) -The espital of the preceding district acquated on a stream that falls into the Palaur half a mile west of the town lat, 12º 46 \ lon 60° 1 ... thirty-eight miles 6 5.W from Va den. Clangleput lies in a small sal jey confined on all sides by fulls and nearly half covered by the waters of a beautiful artificial lake. The town without the walls is little better than n large village but the fort is on im mense work and has been of great strength, though now decayed and the ramparts overgrown by pecpul trees and creepers and garrisoned by a few invalids It encloses various buildings, and is overtopped by the hattlements of an inner fort where in the ridns of a palace the public fuoctionsnes of the station hold their coorts and offices. In A D 1751 the French took Chingleput ; but it was retakeo in 1752 by Capt Clive after a short slege .- (Tullorion, Orme &c)

Crist.—A large village in North ern Hindortan, district of Kunawar contignous to which are several others 10,000 feet above the level of the sea, at which enormous elevation grapes are found in the greatest perfection, eighteen different varieties being cultivated in Kunawar. In the vicinity of this place there is much cultivated land oud many luxurant vine; and Opposite are the huge Kel. I.

Ralldang peaks.—( Wesses Gerards,

CHINNOCS.—A small town in the province of Reeder secenty miles & from Warangol; lat 16° of W, ion 70° by E.

CHINACHA (Chinchara) - A Dutch settlement in the province of Bengal, rituated on the west side of the Hooghly, eighteen miles direct distance from Calcutta; lat 22 82 1. ion 85° 25' 1 The first factory of the Dutrh I set Imba Company was erected here in 1636 and the site on the whole is much preferable to that of Calcutta, In 1769 Chinsura was blockeded by the \abob nf Bengal a forces to compel the payment of ar tenra of duties although the province was then actually possessed by the Inglish Fast Indu Company 1814 the total revenues of Lhinsura and Barnsgore amounted to 17,099 Pupees.

Schools were established at Chinsura and in its sicisfity with the view of instructing native children in read in, writing and arithmetic in tho Bengalese language on an improved and economical system. In 1814 the total number of thildren on the books of fifteen village schools was 1 0-0. and the number of those who regularly nttended 801 The greater propor tion of the teachers were Brahmins the remainder of the writer enste A few of the more advanced boys were taught I nglish chiefly as o reward for their proficiency in their own lan guage and general good conduct ; but it is very descrable that this braoch of edocation should be more directly encouraged, so that the English lan guage may occupy the place of the Persian (also o foreign language) in public courts and documents and bring the conquerors and the conquered to a closer community of interests and ideas - (Starorinus, Rennell May Se)

Chinaayapatan / Chin Roya Po lam)—A town in the Visore raja a terntories thirty-seven miles N by W from Seringapatam, lat 12° 2° N ion 76° 29 E.

2 D

CHIPULA PEAK.—A mountain peak in Northern Hindostan, fifty miles NE. from Almora, and eight NW. from the Cali river; lat. 29° 56′ N, lon 80° 24′ E., 13,257 feet above the level of the sea.

CHIRALEEA.—A small town in the province of Ajmeer, district of Harrowty, in the valley of Neony, which in 1820 contained about 1,000 inhabitants.

CHIRCARI.—A town in the province of Allahabad, sixteen miles N.E. from Jeitpoor; lat. 25° 26' N., lon 79° 43' E.

CHIRGONG —A town in the province of Allahabad, sixteen miles N.E. from Jansi; lat. 25° 34′ N., lon 78° 41′ E

CHIRING — A fortified post in Northern Hindostan, thirty-nine miles ESE from Serinagur, lat. 30° 6'N, lon. 79° 24' E.

CHITLONG.—A small town in Northern Hindostan, situated in a small valley named Lahong Nepaul, which formerly belonged to the rajah of Lalita Patan; lat. 27° 38′ N., lon. 84° 49′ E. In 1790 it contained a few well-built brick and tiled houses, of two and three stories, and was principally inhabited by Newars. The winters here are never severe, and at that season the fields produce a crop of wheat, while in summer they yield one of rice.—(Kirkpatrick, &c.)

CHITORE —See ODEYPOOR Principality.

CHITOUNG—A town in the kingdom of Pegu situated on the east side of a river of the same name, about a mile in breadth, to the west of which the country is flat. In the neighbourhood are a few straggling villages, and the country generally is but thinly inhabited.—(Carey, Jun)

Chitowa.—A small town in the province of Delhi, thirty-three miles south from Saharunpoor; lat. 29° 33′ N., lon 77° 39′ E.

CHITTAGONG (Chaturgiama)—A district in the province of Bengal, of

which it occupies the south-eastern extremity. To the north it is bounded by the Tipera district; on the south, by Arracan; to the east it has the Burmese empire; and on the west In length it may be estimatthe sea ed at about 120 miles, by twenty-five the average breadth. In 1784 this district was estimated to contain about 2,987 square miles of unproductive hilly country and plain arable land, in the proportion of two to one, and was originally subdivided into four moderately large, and 140 very small pergunnahs, partitioned among 1,400 landholders This distribution originated in consequence of the whole district having formerly been assigned for the militia, or garrison troops, constantly maintained here for protection against the incursions of the Mughs of Arracan; these in process of time became zemindaries, when the military establishment ceased to be necessary. The islands of Hattia, Sundeep, and Bameeny, although separated from Chittagong by large arms of the sea, frequently impassable during stormy weather, are subordinate to the jurisdiction of its magistrate. Throughout this district the rainy season sets in earlier, and continues later, than in most other parts of the Bengal province, and sometimes is not over until the middle of November.

The Chittagong liver has been surveyed, but has not been found sufficiently deep for ships of any considerable burthen; and although there are a great many openings on the seacoast between that and the Arracan river, yet after a strict survey, it has been found that their mouths are all choked up by sand-banks, so as only to admit ships of very small draft of water over the bar. One opening, about forty miles south of Islamabad, leads into a commodious harbour behind the island of Kutubdea, where there is water for a ship of any size; but its mouth is so surrounded with shoals and sand-banks for a considerable way out to sca, and the whole upper part of the bay of Bengal is so full of mascertained dangers, that it is

probable the Kutulules harbone would never become of practical othery to

ships of large hurthen

In 1814 it was aveeramed that the southern portion of Chittagong towards the Nani was not so mountainous or impervious a country ne hod been supposed. The names put down in Visjor Rennell's map are not those of villages hot vallees there not being any villages or small towns between Islamabad and Ra-The Bengalese here live in detached houses; but at stated times once or twice a week nesemble in open market places to buy and sell what is wanted and occasionally a hockster's shon may be met with Between the different ranges of inile there are many plane an [ salles, susceptille of great improvement, of which description are the plans of Chuckareah Ramoo and Gurrancals the fast estimated at ten pules extent each way having the river Call windme through it. Until about 1783 the cultivators of this portion of Chitagong were all Bengalere Hindoor, but after the conquest of Arracan in that year by the llurme-e a large migration of Mughs into the British territories took place some few of whom adopted agricultural pursuits; but the majority became petty traders to wood gurjan oil, cotton cloths cotton bamboo mate and similar commodities; while others settled as mechanics, canoe builders, cutters of wood for ship placks and erooked timber for knees In this tract the soil is so fertile that very little labour fosures redundant crops, Io 1814 the Moch population actiled within twelve miles of flemoo was very numerous and et that deto Cose s Bazar alone contained 800 Mugh huts all inhabited by that race who were very submissive to thu ex patriated chiefs and priests cesiding among them

Remote from the sea-coast the interior of Chittagong has a billy surface, at present much covered with jungle, but there is reason to suppose, adapted for the cultivation of coffee pepper and the valuable spaces of

the East; but owing to its recular mountainous and macitime inpography, the district generally is exposed to several disadvantages incidental to The landed proprieita situation tors whose estates he along the sea shore are compelled to gused them scainst the invasions of that element a while those of the interior, being subject to inundations from the moun tain torrents are obliged to observe similar precautions and in reality the exertions of the inhabitants to present their crops is deserving of commendation At the time of the decennial fand settlement the waste famile were excluded from the settlement his encumstances peculiar to the di trict but when cleared they all become liable to the public revenue tanded property here is fue the most part distributed into very small portions among oumerous proprictors occasioning everlasting disputes respecting boundaries. Exclu aire of the Vingh settlers the total pumber of inhabitants in 1801 was estimated at 1,200 000; but this oppears a large number when the limit ed area and physical circumstances of the di trict are considered. The Valiamedans here exceed the flindoes in the proportion of three to two, but so little bigotted are they that many have a lopted the Brahmsolcal doctrines of caste and purity; and it is remothable also that al though Chitia ong was so long pos-sessed by the adherents of Buddha in 1601 it scarcely contained one Buddist of hereditary growth.

Dudding of introducty growth.

The eastern limits of this district have never jet been accurately explored and reman to this day per feetly undefined. The total width between the heari rivee on the seasonst out the Zhenushum on the sudo of Ars is 124 miles cast and west, one-half of which is watered by rivee of Ars is 124 miles cast and west, one-half of which is watered by rivee and the sudo space of the property of the prope

these wilds is increased by low hills, adjacent on the west to the Mugh mountains of Major Rennell, where a ledge of rocks stops the further ascent of the Karnaphuli river, and These tribes occasions waterfalls. (named Tripura, Joomea, and Chakma) cultivate cotton and rice, and rear hogs, goats, and poultry, which they exchange with the Bengalese for salt, iron, earthenware, and fish; but they do not appear to have aggregated into numerous societies, or to have any dependence on a general chief of their respective nations. East of these rivers is a fine valley watered by the Karnaphuli, or Earring river, and further east a chain of low hills, thinly occupied by a Mugh

population

Atits mouth the Karnaphulı (named by Europeans the Chittagong river) forms a safe harbour, but so deeply embayed, that during the south-west monsoon ships get to sea with great difficulty. At Patarghaut, the ferry from Islamabad towards the south, its channel is about a mile wide; at Korilliya Pahar (or hill), it diminishes to about 200 yards, but the tide continues to flow upwards strongly. East from the Korilliya Pahar is a fine valley called Rungamya, cultivated by Bengalese, although some portions still belong to the hereditary chief of the Mughs; but beyond this valley no Bengalese have settled, the low hills there being occupied by rude independent tribes, including Mughs, whose chief in 1798 also possessed land as a zemindar within the British limits. In the vicinity of these Mugh hamlets small plots of land are cleared, on which plantain trees, ginger, betel-leaf, sugar-cane, cotton, indigo, tobacco, and capsicums are raised. These are their permanent places of abode, but at their Jooms they have temporary villages, changed every year, and only occupied during the season of culti-In the permanent villages (or paras), the houses are forty feet long by twenty broad, raised on posts twelve feet from the ground, and ascended by a notched stick, but on the

whole much more comfortable than the slight huts of the Bengalese peasantry. The tract, however, notwithstanding the natural richness of the soil, is thinly inhabited, and produces little; the chief's revenue being derived from a poll tax.

These Mughs seem to be the remains of the first colony from Arracan that occupied Tripura, on the re-conquest of that territory from The men have the Mahomedans. adopted the Bengalese dress, but tlie females retain that of Arracan and Ava. They eat every thing, and with any body, but do not intermarry with strangers. Although their rivers and morasses swaim with fish, they have never acquired the art of catching them, and are consequently obliged to employ Bengalese The Blue Mountain is fishermen named Meindaun by the Mughs, and Munipahar by the Bengalese A peak! rises to the height of between 5,000 and 6,000 feet above the level of the sea; but at Baikal, where a spur from it crosses the Karnaphuli, the ridge is not above 700 feet in height

This district possesses the advantage of having an accessible scaport, its capital, Islamabad, being extremely well situated for external commerce, as well as for the construction of ships of large dimensions, and of these a considerable number are built annually, both of imported timber and of that indigenous to the country. The exports consist chiefly of timber, planks, canvas, coarse cloths, stockings, umbrellas, and on the sea-coast the government has a large establishment for the manufacture of salt considerable profit accrues also to the sovereign from the elephants caught in the forest, which are of an excellent quality, and particularly well suited both for the camp and the The best are received from the contractor on certain conditions, and agreeably to a fixed standard of neight, the remainder he sells on his own account, and are dispersed all over Hindostan. Chittagong is much resorted to by the European residents in Bengal, on account of the benefirul effects especiented from the sal lubrity of its clumate set air on I salt-mater lustifing presenting in this respect a remarkable contrast to the more southern province of Arracan jet with the exception of a denier population and superior cuitiration possessed by the first the physical tricumstances of the two are very much the same

About twenty miles to the north of Islamabad there is a remarkable hot-well asmed Sects coond the gr zeous exhalations on the surface of which may be loftamed by the application of fire and like all other unusus Institutal phenomens, is held sacred by the Ilindoos Nauf which until the conquest of Arracan, formed the extreme southern boundary of the Bengal presi dence to this quarter, is above seventy miles to the south of Islamshad the seat of the provincial government and residence of the British magistrate. It is not assignise as it becomes very shallow a few miles above Teakneuf, a village situated at its function with the sea. The hanks of this river cootinue for the most part covered with jungle interspersed with scaoty spots of cultivation, and a few wretched hamlets where dwell the poorer classes of herdsmen, and families of rosing hunters, who eatch. tame and occusionally cat wild elephants, the aborigines of these fo-rests. The incereant alarm and devastation caused formerly by its being a frontier situation and the signity of the Mugha and Burmese, have retained these tribes to e half-savage state; but they, as well as the hill people named Choomens, will ac quire settled and milustrious babits when protected from external violence ond ollowed to possess, undisturbed any moderate portion of the

Chittagong at ia probable originally belonged to the extensive Independent, and barbarous kingdom of Tripura; but being a frontier province, where the two religions of Brahma ond Buddho came in contact, it was sometimes governed by acctances of one

doctrine and sometimes by those of theather There is reason to believo It was taken from both about the begunning of the elateenth century by the Alghan kings of Bengal and after wards during the wars between the Mogula and Afghans reverted to the Boddhists of Arracan It was ve Ited by the Portugueso so early as A 1) 1881, who were influenced by the then Itais of Arracan to settle in considera ble numbers and from thence in con function with the Mucha or Arracan ers, infested and desolated the south eastern quarter of Bengal, which, distant as the period is has not recovered Its population or agriculture.

In 1634 during the reign of the I'mperor blank Jehro, Makat Ray, one of the Mugh chiefs who held Chittagong subordinate to the Arracan Rajo, having incurred his displea sore and amorrhending an attack, sought the Mogul sovereign a protection This is the earliest notice of the superiority of this territory having been acquired by the Delhi sovereign nor was it taken possession of until 1666 yet long prior to this date in 1592, it is regularly enumerated by Abul Fazel as an integral portion of the Mogui dominions. In 1668 bhasta khan the soubabilar of Bengal, equipped a powerful fleet at Dacca despatched it down the Megna river. under the command of Omeid Ahan who having previously conquered the Island of bundeep proceeded against this country and laid slege to the capital Although strongly fortified and rontuning according to Mahomedan historians, 1,023 cannon of different calibres, it made but a feeble resistance; and on its surrender a new name (Islamabad) having been im posed, it was with the district per manently ottached to the Mogul empire

At o ery early period this province of tracted the notice of the English East-India Company, who in 1686 proposed to remove their factory from Hooghly to Chittagoog, and there establish by compulsion o strong fortified residence in 1089, during a rupture with the Emperor Aureng.

zebe, an English fleet appeared off Chittagong, with the intention of effecting its conquest. but owing to indecision nothing was done; nor would the result have answered the Company's expectations had the object contemplated been accomplished. In A.D 1760 it was finally ceded to the East-India Company by the Nabob Jaffeir Ali Khan

In 1795 his Burmese Majesty. learning that three of his rebellious subjects and their adherents, or robbers as he called them, had taken refuge in Chittagong, without any previous communication marched a body of 5,000 troops across the frontier in pursuit of them; but their progress was soon arrested by a detachment from the Bengal army, and after a protracted negotiation, they were induced to withdraw amicably within their own boundaries. From this period an incessant migration of Mughs from Arracan commenced, which also became the asylum of all the adjacent insurgent chiefs from the Burmese dominions, especially a leader named King-ber-ring, whose followers were estimated at 3,000 men. The situation of the fugitive Mughs was in many respects very deplorable. They had fled from Arracan, to escape the unrelenting and undistinguishing fury of the Burmese, into the pestiferous jungles of Chittagong, where they erected temporary huts, and endeavoured to prolong their miserable existence Here they were assailed by the rebel King-ber-ring, and compelled to join his party or fly. Those who fled, were urged by the pangs of hunger to seize the victuals of the Bitish cultivators, and were in consequence attacked by the troops stationed to protect the latter. With a view to ameliorate their condition, the Bengal government cndeavoured to settle them on the lands of a hill chiefly in the back parts of Chittagong, but great difficulty attended the arrangement. These refugee Mughs, from a national hatred to the Burmese, still continued clandestinely to join the insurgents, and thereby justified the Ava sovereign in asserting, that the British government

had organized a den of rebels for the molestation of the Burmese territories: yet it was wholly beyond the power of the first to eradicate the insurgents, so long as they remained secluded in the remote and unwholesome hills and jungles, seven days' journey from the sea-coast, where after repeated defeats they were always surc to find an maccessible asylum. Compared with these Mughs, the Bengaiese are small, weak-bodied men; whereas the Arracaners are strong, muscular, and active, and inured to hardships. The Bengalese also being unarmed and naturally pacific, made no resistance to the Mugh marauders, who were, however, easily discomfited by a few regular sepoys under na-The above recrimitive officers. nations between the two governments continued without intermission from 1795 until 1824, when hostilities commenced, which ended the dispute by the expulsion of the Burmese from the province of Arracan, and the restoration of the Mughs to their native country. — (J. Grant, F. Buchanan, Stewart, Public MS. Documents, Pcchel, Ker, Morgan, &c)

CHITTAPFT.—A small town in the Carnatic, seventy-eight miles S.W. from Madras, lat. 12°56′ N., lon. 79°26′ E. During the Carnatic wars of the last century this was a fortress of considerable importance, even in that land of fortresses, and sustained many sieges It was finally taken by Col. Coote, after the battle of Wandewash, and made but a slight resistance.—(Orme, &c.)

CHITTELDROOG (Chitra Durga).—A town and fortress in the Mysore Raja's dominions, and the capital of a district; lat 14° 4' N., lon 76° 30′ E By the natives it is named Sitala Durga, which signifies the spotted castle, and also Chatracal, which means the umbrella rock. The fortress stands on a cluster of rocky hills forming the extremity of the Chitteldroog ridge, the height of the most elevated peak probably not exceeding 800 feet The pettali which stretches along the base of the droog on the noith-east, is en-

closed by runparts of granite, very solul and well cut ofthough now in some parts dilaphilated, with round towers at intervals a spaceous dirch scarated from the rock, and o regular wale-spirad glacis. The town within is not of great size or population, but the principal street is remarkably spaenus.

Scarcely elevated above thorictish is the lower fort, a separate enclosure, containing the former poligar spalace now occupied by the British comman dant; a reservoir supplied from a mag nificeot tank above with a perpetual stream of fine water, which it distra butes to all parts of the town; a well (or bowly), and other onelent structurer besides the bunealows of the officers Ascending the droog from hence under six successive gateway s at different heights and traversing an endless labymath of fortifications, all of solid masonry winding pregularly up from rock to rock to the summit guarding every accessible point, and forming enclosure within enclosure lo the usual strie of the fortified rocks In the south of India of which Chitteldroog is probably the most claborate specimen extant. The ascent is partly by steps and partly by almost superficial notches, cut in the steep and smooth surface of the rock, and scaled with great difficulty. The more exposed points are growned with bat terres and the fort contains two beautiful tanks of water, various temples and other Ifindoo structures and n deep magazine well sunk in the rock, as a denot for chee

Chitichdroog owes its strength not so much to its elevation as to the steepness of the acclivity on which It stands and such is the intricacy of the works that an enemy minht he master of the outer wolls and yet not materially odvanced towards tho reduction of the droop On the other hand, this very complexity ren ders the place more liable to partial surprises. Thorulns of the buildings in which General Motthews and other English prisoners were con fined in 1783, are still pointed out to strangers. Although actually within

the Mysore rays a territories Clift teldroog is constantly occupied by a British garrison as it connects the great southern into of telence extending from Vadars to the Vidabor coast with the more advanced line of fortification in the Balaghaut ceded territories.

In a dell among the mountons, at a short distance to the west of Chit teldroog there is a currous suite of dark subterranean apartments, which appear to have been excavated then completed with majorry and after wards stuccoed They have proba bly been the habitations of devotees who from the verious mythological symbols scottered about would oppear to have been worshippers of biva. Almost every village, however In this neighbouthood has o peculiar delty of its own, most of them with destructive propensules. The untives proplime their good offices by putting an iron hook through the skin under their shoulder-blades, by which they ore suspended on high to a moveable transverse beam, like the yard of a ship and thus swung round for o cansiderable time, sometimes one at each end The country round Chit teldrooz was nearly depopulated by the repeated ravages it sustained dur the last Mysore war of 1709, but is now much recovered The fortress la famous above all étations in India for the great variety and excellence of its fruits including the apple, orange, and nectarine. Fullorion. (c)

Cntyroon Chadur).—Atown and small pollam or estate on the western frootter of the Carnatic, eighty two miles west from Madran; int 13° 15' N, Ion 70° 10° E These polloms cume into the possession of the British government in 1801, and the poligars were expelled in 1804, the londs having been permanently assessed in 1802. The country of Chittoor and the western poligars is very strong being placed between the range of hills that bound the Balaghant out o second duan, approaching within a few miles of the seq near to the lake

of Pulicat. These form an irregular concave sweep, of varied elevation, stretching to within a short distance of Madras—(5th Report, Wilks, &c.)

CHITTRA.—A town surrounded by jungles in the province of Bahar, district of Ramghur, where it is the head station of the judge and magistrate; lat 24° 10′ N, lon. 84° 50′ E., 110 miles N by W. from Calcutta.

CHITTROO —A small town in the province of Bahar, district of Ramghur, situated on the new Benares road, 214 miles N.W. from Calcutta. From this place the road ascends to the crest of the Toolkee hill, which is the most elevated point between Calcutta and Benares, and commands an extensive prospect of the Hazary Baugh table-land, and the rugged tracts to the south and eastward On the summit of the hill, close to the road, there is a telegraphic signalpost, part of the telegraphic line of communication recently established between Calcutta and Chunar.—(Fullarton, &c)

CHITWAY (Setava).—A town in the province of Malabar, situated on the sea-coast, thirty-nine miles N by W from Cochin; lat 10° 31' N., lon 76° 5′ E This place stands on an island twenty-seven miles long, and in some places five broad, named Chitway by Europeans, and by the natives Manapuram. It consists of two sections, Shetuvai and Alipuram. and is separated from the continent by inlets of salt water, which form the northern part of an excellent inland navigation. The soil of this island is generally poor, and although the whole may be considered as a plain, the rice fields are small in proportion to the elevated land that rises a few feet above the level of the sea. The shores of the island are covered with cocoa-nut palms, from the produce of which the revenue is chiefly derived, and the whole in 1800 was rented by the British government to the Cochin raja for 30,000 rupees per annum, but he possesses no legal jurisdiction over the inhabitants A slave here,

when thirty years old, costs about 100 fanams, or £2 14s 7d; with a wife the price is double Children sell for fifteen to forty-six fanams, or from 8s 2½d. to 21s. 10d.—(F. Buchanan, &c.)

CHOGDAH—A town in the province of Bengal, district of Nuddea, situated on the east bank of the Hooghly river, about thirty-four miles above Calcutta; lat 23° 3′ N, lon. 88° 38′ E This spot was formerly noted for the voluntary drownings of the Hindoos; but latterly the expiation has become a mere ceremony, seldom leading to any fatal result.

CHOKEEGHUR—A town in the province of Malwa, and circar of Raisseen, situated on the top of a hill two miles north of Chynpoor Barree. In 1820 it was the head of a pergunnah belonging to the Nabob of Bopaul, lat 23° 5′ N., lon. 78° 15′ E.—(Malcolm, &c)

CHOLER —A small town in the province of Malwa, about seven miles almost due north of Mheyshur, lat 22°9′N, lon. 75°48′E It was formerly a large town, but Aliah Bhye having fixed her residence at Mheyshur, it soon decayed, and in 1820 contained only 175 houses It is also named Cholee Mheyshur —(Malcolm, &c.)

Chooasee —A fortified native station in the province of Lahore, principality of Sukaid, sixteen miles west from Rampoor in Bussaher, and five miles north from the Sutuleje; lat. 31° 25′ N, lon 77° 20′ E; 10,744 feet above the level of the sea.

Choobzee Chang.—A town or station in Tibet, twenty-three miles N.E. from Chaprung, lat 31° 34′ N, lon 79° 58′ E.

Choomphoon. — A considerable town in Siam, on the road from Ligor to Bankok, situated on the right bank of a river of the same name. In 1826 it was stockaded, and said to contain 8,000 inhabitants. It was formerly the entrepôt of a valuable commerce with Tenasserim, but on the conquest of that province by the

Rurmese it was converted into a ministry post where a force was established in watch the kidnipping incursions of the flarmese.—(Leaf, 4c)

CHOORE,—Asmall town and ghur ry in the province of Agra ten miles west of Jaloun; let 20 10' \, lon. 79°29' L.

CHOOROO .- A town in the province of Ajmeer, principality of Bi-canere in which it ranks after the capital lat, 28° 12" \ lon. 74° 3. Les 107 miles W by \ from the rity of Bicanere This place is a mile and a half in escumierence, without Including the suburbs, and being altoated among naked sand-hills external appearance is imposing. The walk and houses are constructed of a lime-stone so purely white as to give every thing composed of it an ex tremely nest appearance but this material is very soft, and gradually crumbles to a white powder sometimes mixed with shells | Large beds of this calcarcous sulutance are found in many parts of the 1]meer desert, which, advancing west from Chaorno heres es insterility Chooroo is reckoned the second town in the Breanere dominions : but its chief is rather a dependent than a subject of the Bicancre raise. In 1817 It was plundered by one of Vicer Liban's sirders and in 1818 was visited by a British detachment the governor Purth Singh laving abandoned it the day before. It was subsequently transferred to the Bicanere raja but so averse were the inhabitants to this arrangement, that they threatened to emigrate to the Jeypoor roja s ter ritories .- (Elphinstone, &c)

Chanener.—A large village in the province of Ajmeer, district of flar enviry situated about seven index 5 W from the Violundra pass for 1820 it contained about 1,000 inhabitants — (Vf &c)

CHOTERIGHER (or thirty-it forts) -A large district in the province of Gundwana, at present the most cast em possession of the Sappoor Naheratter. By the Vlahomedans it was formerly denominated Jeharcund but the name properly applies to the whole province rather than to any particular subdivision The form of the country, excluding hurande and Bustar approaches nearly to an avail the longest dismeter lying north and south Choter-ghur is of great ex tent, being 200 indes in length, and every where surrounded by hills. The range near Langee to the west, the mountains of Omerkuntur to the north and those near Eugonyalt to the north-rast are the most woody and inaccessible Sonakhan to the south-east is also strong from the closeness of the hambon jungle and auddenness of the ascents in the centre this district is open and level. or at most slightly itindulated separated from the Briti h newly ac quired dependencies of birgoojah and Sumblishoor, by the Sirgoojah and hoorba ranges of hills, following the course of the flatsoo river from Omerkuntne to within ten miles of the Mishamuddy river

Under the Bhoonslas this province was long managed as a distinct appanage successively of Beembalee, Moodhalee Vectolee, and Appa Sa-The government lands occupy the centre, and are surrounded by tributary zemindars The propertions there bear to each other has not yet been ascertained, but the first are generally most open and best cultirated t the latter Indeed, with the exception of hawnrdah and Pon duris, are not more than one-fourth under tillage In Choteesehur tanka are numerous, particularly at lint tunpoor, Ryepoor, Dhumdab &c., where, besides assisting the rico cultivation, they have been made to strengthen the fortified places in their vicinity, being mostly artificial excavations, some of them surrounded

with masonry.

The moral character of the inhabitants of this district appeared to Col. Agnew to be superior to that met with in most parts of India. Murders are rare, and in most parts originate from jealousy or suspicion of witchcraft, both causes universally considered sufficient to justify the perpetration of the erime. In witcheraft, spells, and incantations, all classes here are-firm believers, and many tragical consequences ensue from these base superstitions. This difficult art, however, is supposed in Choteesghur to be possessed almost exclusively by old women, some of whom bring themselves to believe that they actually are possessed of the power and knowledge imputed to them, although the confession of such an accomplishment subjects them to expulsion from their castes, eruel treatment, and occasionally to immediate death usual process to ascertain their genuineness is to tie them in a bag and throw them into the water, when if they sink they are considered innocent; if they float, guilty.

There are two very wild tribes to be found in the hills north of Choteesghur, one of which, named the Binderewas, reside in the hilly and woody country near Ruttunpoor, more especially in the Koorba and Sirgoojah hills; but they are so rarely seen by the other inhabitants, that their existence has been called in question. They are described as being equally destitute of religion and clothes, houses or huts, seeking shelter in the jungle like wild beasts, feeding on the fruit of the mowah and taindoo trees; yet they are said to enlitvate small patches of coarse According to native reports, grains they destroy and eat their relations, when too old to move about, and also such travellers as they can catch. The other tribe are the Pandeons, who are less wild than the Bindere-

was, and free from all suspicion of cannibalism. Both have distinct dialects, unintelligible to the more civilized inhabitants Within the limits of this district there is a class of Mahomedans, who make bracelets and dye cloths, distinguished by the name of Toorkarees, who, notwithstanding their profession of the Arabian faith, are said to worship Hindoo idols, and to besmear their houses with cow-dung The females, in particular, of this tribe are strict observers of all the Hindoo rites and ceremonies, and reject Maliomed and his doctrines.

The ancient history of Chotecsghur is little known; it seems probable however that it was once in a more flourishing condition than it at present exhibits An old record still existing, details the names of many villages long extinct, and the ruins of Sinpoor on the right bank of the Malianuddy, twenty miles north of Aring (said to have been the capital of the very ancient Hindoo dynasty of Byram Deo in Kuwurdah), and the ruins of many temples and buildings scattered over the country, indicate a former state of prosperity, and a more numerous population. province was for ages under the sway of a family of Ashwapati, of Rajbungsi princes, one of whom, named Kullean Singh, was seized and carried to Delhi by the imperial army that entered the country in pursuit of the Ranny of Gurra Kultanjee near Jubbulpoor. During his captivity lie agreed to become tributary to the emperor: notwithstanding which submission, until its final conquest by the Maharattas about 1752, this country seems to have been generally exempt from all foreign control, and its original institutions to have remained unaltered. The revenue collections of the modern district of Choteesghur, in 1818-19, under the British system, amounted to 331,470 rupees; in 1824 to 385,840 rupees.—(Jenkins, Agnew, &c.)

Choudan's Country. -- An extremely mountamous country in

Northern Hindostan within the British limits, and consisting of a kind to Doab between the fork of the Lair and Doubler rivers about lat. 70° \u03b2, and for 10° 40° for, lorder in, on the \u03b2rpailese territories cast of the Col.

Cherk.—An socient town on the sea-coast of Arrungabad, thirts makes 6 by L. from Bombay; ist 16° 31 N., lon. 73° 2° L. This was a place of considerable importance during the Bhamence dyna ty of the Decrao, being mentioned as such ty Fernata.

CHOCKOROT — A small town in Northern Hindostan eighteen miles S.E. from Sermagury lat 22° 23 N. Ion. 7n° 54 E.

CHOTRACHER -A town and strong fortress to the prosince of Gund wans, situated at the northern ca tremity of the Maisden hill about fifty miles by by S from Hossenalad on the Serbudia. To Visy IRIN this place was explained by General Wat son's detachment; and in November the Gonds who appear during the interval to have grown into favour with themselves, made a very spirited attempt to retake it, but were repulsed with moch elsophter Lat. 2" 45 Sa lon. 747 64 In This fortrest was acquired by the Asspoor state from the I oons Maharattas in 1700, being necessary for the secure occunation of the valley of the her بدليلسا

Chowal.—A district in the north eastern quarter of the Gujerat province situated between the 23d and 25th degrees of porth lathade. The chief towns are Vasuana, Berlapoor, and Munna; and the principal river, the Rooperse

CHRISTIS NS .- SCC SOUTH CANARA

Guowas.—A town in the Gu jerat penimola therty miles F by N from Wankaneer This piace is situated on an eminence and surrounded by n high stone wall with square towers in o ruinous state

Chowka,-A village lotheprovince

of Antungstoni, which gives its name to a leastful juss through the hile, ten miles > 1... of the city of Antungated.

Chrant Font.—A fort or peak in the promee of Lahore, division of bothant, situated on the right bank of the buttlefe 10.744 feet above the level of the year lat. 31 25 %, ton 75° 23 E.—(Hedgron and Herbert Se)

Coren -A serall d'atnet or valier in the north-west corner of the la hore province, about the 34th degree of north istitude bounded on the north and west by the indus, and on the south by the Churcheen river This territory and adjacent di trict named liararch contains many fertile plains inhabited by Hindoos that have been converted to the Mahomedan religion an insmed Goolers Amongst three also are many turbulent Afghans of various tribes, who are in fact the masters of the country Within the geographical limits of Chuch, but beyond those of the valley are the towns of Attock and Ilusion Near Attack the plain of Chuch is well cultivated principally with wheat; further tast the country is of a wary surface generally dry and barren and cut up by deep ravines; but approaching the eastern border is the besotiful valley of Horseln Abdaul, - (Elphinstone Se)

Checkowat—A town in the province of ladore sixty-right miles P from the Indus; let 33° 4 N<sub>2</sub> ion 72° 31 h

CHURA—A eastle in Bootan near to which is a chain bridge of a remortable construction stretched over
the river Tchintchieu; lst. 27 107
N, lon 807 31 E., forty nules south
from Taulsudon The fortress of
Chuka is a large building placed on
clerated ground, with only one entrance to the interior, built of stone
with walls of o produgious thickness.
The notives know no records to cer
fify when the chain bridge was creet
ed, but are generally of opinion that
it was fabricated by the devate, or
it was fabricated by the devate, or

demigod, Tehupchal. The adjacent country abounds with strawbernes, which are seldom eaten by the genuine Bootanners. Here are also many well-known British plants, such as docks, nettles, primroses, and dog-roses—a refreshing sight to the eye of a parched European.—(Turner, &c.)

CHUMBUL RIVER.—This river has its source in the province of Malwa, in the hills about four miles S.E of Haussulpoor, and two miles W. of Burgoonda, whence it flows almost due north, passing many villages to near Peplowda, where it receives the Chumlee, and subsequently the Wangeyree river, near Omernee. Proceeding thence, in almost the same direction, it approaches Tall, where it takes a sweep N W. round the fortress of Nagutwarra, from whence it runs with a winding course, receiving many contributory streams, until it falls into the Jumna about twentyfive miles below Etaweli The length of its course, including windings, may be estimated at 500 miles. The nominal source of the Chumbul is in part of the Vindhya range, nine miles S.W. of the cantonment at Mhow, but this portion is dry in the hot season. The current is in most parts gentle, its bed rocky, and its course through Malwa much obstructed by shallows; but after entering Harrowtee by an opening in the Mokundra range it becomes a fine and deep stream. This river is often named the Sumbul, and is supposed by Major Rennell to be the Sambus of Arrian; Major Wilford derives the name from charmanawati, abounding in hides —(Malcolm. Hunter, Rennell, &c)

Chumpaneer (Chapaner) —A large subdivision of the Gujerat province situated between the twenty-second and twenty-fourth degrees of north latitude, and bounded towards the east by the Malwa province. It has two large boundary rivers, the Nerbudda and Mahy, and is traversed by many lesser streams. The greater portion is now subordinate either to

the British government or the Guicowar, but it also contains several petty native chicfs, such as the Rajas of Soonth and Lunawara.

CHUMPANEER (or Powanghur).— The ancient capital of the above district, situated sixty miles N.E from Broach; lat. 22° 31' N, lon 73° 41' E. Chumpaneer, or Pavanghudd, is a large mountain, or rather rock, rising out of the bosom of Gujerat, one of the most level provinces of Hindostan. It stands about twenty-two miles N.E. from Baroda in a straight line, and, except a few hillocks, in comparison it stands alone, frowning over the south-eastern quarter of the The height, by a rough estidistrict. mate, may be about 2,500 feet above the plain, and on some sides it appears nearly perpendicular. It is visible ten miles south of Baroda. and also from the minaret of the Jumma Muspid (mosque) at Ahmedabad, at least seventy miles distant. At the northern base are the remains of an ancient city, the ruins of which extend several miles on each side of the mountain, but are at present covered with jungle, the abode of tigers and wild Bheels. The mountain above is strengthened by two forts, the upper by the natives deemed impregnable.

Chumpaneer is supposed to have been the capital of a Hindoo principality long before the Mahomedan invasion, and was taken in 889 of the Hijera by Mahmood, the seventh king of western Gujerat, after a siege, or rather blockade (the natives say) of twelve years. It was subsequently captured by the emperor Hoomayun in A.D. 1534, and is described by Abul Fazel, in 1582, as even then surrounded by extensive Hindoo and On the decline Maliomedan ruins of the Mogul empire Chumpaneer fell into the hands of the Maharattas, and in 1803, along with the adjacent territory, was possessed by Sindia; from whom, notwithstanding its formidable position, it was easily captured in 1803, and with the same In 1812 facility restored in 1804.

the tuwn or pettah contained only And haven of which such has been te down not more than half were taliabetal The Buele who in this tract appear to be the aborisines of the country meal remarkably more Coveration haven, had but little in termistare with strangers. In natice estimation the dignity of this fortress I very erray and so summely im person are the a fracent perty states of Language and boomth of having been from all antiquity appendance to that towtring ca tle contamine the endless Cali their tutglare destr. that they perer consider themselves wholly independent of the anthonty that has actual per see son of the erneralde bill- (files St. Reg. 1c)

## CHENTARUM-See SARLY

Chintart (Campareli) - A town in Northen Ilm to tan, the warient capital of the humaon province 107 travelling mi et \ leg f. from great to lon. In Si IL From liv vicinity to the Cali error it is sometimes named hari hurson. Chum names atmode in a consideral ic valley of irregular surface intersidy well cultivated in terraced fields, after the fashlon of the hills. In 1410 the town consists of always sixty stone houses with a wooden frame in front as at Almora To the cast lan slogular groupe of dumnutive Hindon templer but of very curious and elaborate workmanthip and abound ing with minute sculpture now much mutilated done (as ly sald) by the Robillahy when they invaded Ku There is also a small modern temple dedicated to \armanh (the lord of serpents), who appears by proxy in the form of a small mound of clay; and pear to thir armbol are the rmns of the ancient fort of Chumpawot At this place the natives show the remains of a mol herry tree of remarkable are and dimensions (thirty three feet in cir cumference), with the existence of which they considered the fate of the province to be involved in proof of which, they allege that part of it fell to the ground in the invarion of hu many by the listle in the invarion, de )

Luress (or Chundalehar) -A town and fortress in the province of Allahaland de trier of Juannour altuatol on the south al le of the Gances almost accentered miles in a atrai be direction S M. from Benares ; lat 2. 0 \. lon +2"&1 } The futteres is alterated on a fine atone rock accord hundred feet high that rives abruntly from the tlain and advances some de tance Into the river. The princi nal defences const t of a sincle stone rarapet with towers built slone the maren of the precipitous rider The town stands to the eastward of the fort contains many stone houses. so I le distant from the Enropean buncalows in 1619 a commodiour building was erected for the recention of Telmbuckler Dalnelis the notes rions mernal and minister of the ex-Peakes and in the neighbourhood are acteral bandsome Malsomedan Lambe.

In A.D 1330 Change was the cosulence of Shere hhan the Afchant. who expelled the empetur Hoomanin from Himlerton; and in 1575 it was taken ly the Mogula after a siege of de months in 1763, this fatters after revulues a micht attack of the Bestich troops, was some time afterwards delivered up without a sleer and hav ever since remained under the Bengal government Travelling distance from Calcutta by Moorshes daha 1 374 miles, by Beerthoom 400 miles - [ I'allarton Lord Valentia ( holaum Housen Ferialta &c)

Chewbatt (Chandala)—A small district in the province of Gindwana kundrid on the north by the Sone river and formerly separated from the British districts by the trice Boker. The natives of this province cell themselves Chundalls and are a (no-duont) tribe of Hajnoots the usual residence of whose chief in A D 1794 was at Rajeginir twenty miles went of Beejeeghur. This country became tributary to the Benares lisjas in the days of Bulwant Singh, who fint conquered its for it had

not ever been thoroughly subdued by the Moguls, although by Aurengzebe formally annexed to the soubalt of Allahabad. This territory is very thinly inhabited, and in many parts The road a complete wilderness. south from the British dominions is over a number of small hills, with scarcely the vestige of a habitation, there being few permanent villages, the inhabitants making a practice of changing their habitations very frequently. The natives of these hills are named Karwar, and are a very savage tribe, divided into many sects, acknowledging subordination to a vassal of the Burder rajas, who reside at Buddery.—(J. B. Blunt, &c)

Chunderbuduni —A mountain in Northern Hindostan, eleven miles N W. from Seimagur, lat. 30° 19′ N, lon 78° 37′ E. Its summit is 7,661 feet above the level of the sea.

Chundraroon —A subdivision of the Sumbhulpoor district in the province of Gundwana, conquered by the Nagpoor Maharattas about A.D. 1750, but now subject to the British government In 1818 it was in a sad state of desolation, and overrun by immense herds of wild buffaloes.—
(Roughsedge, &c)

Chundlah —A town in the province of Allahabad, twenty-eight miles SSW. from Banda; lat 25° 4′ N., Ion 80° 10′ E

CHUNDLYE —A small town in the province of Ajmcei, principality of Jeypoor, about nineteen miles south from the city of Jeypoor.—(MS, &c)

Chundowsy —A town in the province of Delhi, district of Bareily, which before the cossion of Robilcund to the British government was the grand salt mart of the province; lat. 28° 26′ N., lon 78° 38′ E, forty miles W. by N from Bareily.

Chupparah —A considerable town in the province of Gundwana, situated on the Wynegunga river, ninety-five miles N.N E. from the city of Nagpoor; lat. 22° 24′ N., lon. 79° 58′

E. It was ceded along with the district to the British government in 1818.

CHIPPRA —A town and pergunnah belonging to Meer Khan in the province of Malwa, thirty-four miles N. by W. from Raghooghur, lat. 24° 39' N., lon. 49° E.

Chuprah —A town in the province of Bahar, district of Sarun, of which it is the capital, situated on the north side of the Ganges, thirtytwo miles W.N W. from Patna; lat. 25° 46′ N., lon. 84° 46′ E This is a town of little breadth, but extending along the Ganges for nearly In 1817 it contained 8,700 families, which at five persons to a family would give 43,500 inha-In the vicinity of Chuprah the Kharwa tribe are numerous. They occasionally fish and carry the palangum, but are mostly agricultural. They migrate from hence to Calcutta, Patna, and Benaies, and at the fort are distinguished by the name of Patna bearers, while in their own country they are mostly labourers of the soil. Although domesticated here, their original country is said to be in the neighbourhood of an old fortress called Khayra, in Chuta Nagpoor. According to strict Hindoo notions they are an impure tribe, although they have abandoned many customs to which they are addicted in their original country.—(F. Buchanan, &c.)

CHUR (or Choor) MOUNTAIN .-A remarkable peak in Northern Hindostan, division of Sirmore; lat. 30° 52' N, lon 77° 28' E, elevation above the sea 12,149 feet. This is the loftiest mountain south of the great Himalaya, between the Sutulejc and Jumna, where it may be seen towering above the others Its elevation is such, that it tuins and separates the waters of Hindostan. Those that rise on the southern and eastern face are sent to join the Pabur and the Guree, the Tonse and the Jumna, and ultimately find their way to the Bay of Bengal, while those

that flow from the northern and west ern vapoures, proceed in the Sutu leje and Indos, and cambined with the last disembogue into the Arabian ocean.—(Jar Frair Hodgen and Herbert, &c)

CRLEAK—A town in the province of Bengal, district of Places Jelel poor situated on the Issumitty river thirteen miles SW from the city of Dacea. Vear this place there is an extensive tract of inundated country named the Churan Jet.

Curr.—A town in the province of Delhi twenty-one miles end from Sirhind lat. 30° 37' N., Ion. 76° 4a E

Curra Magrono [Little log poor ]—A large semindary in the province of Bahar utuated at the southern extremity and now lacor porated with the district of Ramghur It is bounded on the south-read and west by the sucient Ilindoo province of Gundwana, and never was completely subjusted by the Nahomedana, although its rajis were feduced to the condition of tributaries by the Mogul vicerous of Rengal 1 yet they were little interfered with 30 long as their contributions were punctually pand

Chuta Augnoor is an extensive hilly tract (not mountainous), and much covered with forest; formerly instered with great care by its chiefs, as a protection ogainst invasion from without a indeed the nature of the country is such as would render it extremely difficult either to penetrate or subdue, on account of the un healthy jungles so deleterious to troops not born on the spot chains of mountains run enst and west some are continuous for many miles, others interrupted, and the highest does not exceed 6 000 feet above the level of the sea lise much Part of Chuta Nagpoor and af the Ramehar district may be considered as table-land but the surface unduintes is intersected by deep ravines and partially covered with jungle thirdy interspersed with villages

These tructs are quite inland, being distant from 300 to 400 miles from the sea. The plains in some parts are very extensive, expanding for many miles without interruption. Those of Chuts Nagpoor are culti vated with different kinds of pulse. wheat, barley cotton, a little sugar cane, and some exculents The soil In many parts is of a reddish colour, and extremely productive, more especially of cotton, and regulres little plaughing or preparation. The acand having many springs, throughout the year produce rien in abundance I ike other hilly tracts this semindary contains the sources of many streams; but they do not attain any considerable size until they quit its limits Beneath the surface Iron ore is found in abundance, but this useful metal can be imported from Fu rore on such moderate terms, that its collection and fusion on the spot present no encouragement to the spe-The impervious fastnesses culator here coneral many atrance tribewho even at this late era of Ilindoo predeminance have not yet become converts to the Brahminiral doctrines and are consequently classed by the priests among the abominable, The khetaun the keeri and the Dhanggar still compose the bulk of the inhabitants, and some of these ore said not to speak the I lindi lan guaze The Dhangear are still im nure unconverted mlechchas or barburnans This territory contains a large proportion of the Coln and Lurka Cole tribes more especially in the pergunnah of Tampr and the tracts situated near the hills that separate it from Singboom, where there were disturbances in 1822 The Tamar female Coles possess some wearing apparel but those of the Lurka Coles go entirely naked except a small piece of cloth. They appear to be lilindoes but of the most de-graded castes The principal towns or rather villages are Burwa and Maharajeguage, but the country in general is very thinly populated For many years subsequent to the British conquest, the Chuta Nagpoor rajas, of the Sahi family, assumed and exercised independent powers, and Raja Deonauth Sahi appears rather to have been recognized as a tributary, than a zemindar holding lands hable to revenue 1807 no decree of the Ramghur court of justice, disagreeable to the raja or his dewan, had any effect in his territories except backed by a detachment, but in that year Raja Govindnauth Sahi Deo consented to the introduction of a systematic police, but it was perfectly evident, during the negociation, that he had no real intention of carrying them into effect. The late and present Nagpoor chiefs have adhered with singular perseverance to the resolution of holding no personal intercourse of communication with the British functionaries, preserving towards them, and all other Europeans, the most rigid invisibility. The consequence of this has been that the lives and properties have been at the mercy of an unprincipled dewan, who, without any personal interest in the district, considered it his duty to frustrate every measure, civil or military, of the British government -

In this manner the raja, or lather his ministers, continuing to manifest the utmost contumacy and systematic resistance to all the orders of government, a small force was at last, in 1809, marched into his country, under the command of Major E Roughsedge · on the approach of which the raja quitted his capital, Maharajegunge, with much perturbation, and fled into the neighbouring jungles, where he endeavoured to preserve his hereditary invisibility, and resisted all persuasions to return. Letters being despatched to him, he withdrew further into the jungles of Singboom, where he remained so maccessible, that a private messenger was detained twenty miles distance from his actual residence six days, and then sent with (probably) a fabricated rcply, for it never could be ascertained that the letters ever actually reached his hands. By this expedition the country was brought under proper subordination; but, of course, with a great diminution of the raja's authority, and the total annihilation of his dewan's. Indeed, prior to this event, the Chuta Nagpoor zemindary. had been held on easier terms than any other portion of the British dominions in Hindostan. In 1805 it was calculated that the raja realized from his tenants 160,000 rupees per annum, while the land-tax he paid was only 13,000 rupees per annum. With the surplus he usually supported an armed rabble of 2,000 men; and the population, if well-disposed, might furnish 20,000 more.

This subdivision of the Bahar province is designated by the term *chuta*, to distinguish it from the other Nagpoor, possessed by the Bhoonslah Maharatta family; and the name (Nagpoor) indicates, that in the opinion of the natives the territory contains diamonds—(Roughsedge, Colvin, Sealey, Col Broughton, &c)

CHYNTOON BAREE—A considerable town in the province of Malwa, district of Raisseen, belonging to the Bopaul nabob, situated in a mountainous country, forty-eight miles E. by S from the city of Bopaul, lat. 23° 2′ N, lon. 78° 15′ E.

CICACOLE (Chicacula).—The largest of the northern Circars, now comprehended in the modern district of Ganjam, of which it forms the larg-It formerly contained est portion about 1,600 miles of superficial measure, exclusive of that portion of country situated along the great ridge of boundary mountains to the west. The climate of the northern circars (of which Cicacole occupies so large a space), with a general conformity to that of Hindostan, has, from local position and other circumstances, some peculiarities in each of the three seasons The periodical rains usually set in about the middle of June, with a westerly wind, in moderate showers, until the end of August, which month concludes the small grain harvest; from this time the rain continues in great abundance until the

## THE NORTHERN CIRCARS

A large province extending along the west side of the tay of thregal from the fifteenth to the twentieth degrees of north latitude. The sea bound is it to the east along a coast of 470 miles from Moutapilly its aouthern extremity to Malonil on 2 g.

YAL I

the borders of the Chilka lake. It is divided from the Hyderahad provinces by a range of small detached hills, extending to the banks of the Godavery; and to the north of that river separated from Gundwana by a continued range of mountains, almost impassable for a horse or wheeled carriage, to the northwestern extremity of the eircars at Goomsur. From hence the chain of hills curves to the eastward. and with the Chilka lake forms a barrier of fifty miles to the north, except a tongue of land between that lake and the sea Towards the south the small river Gundegama, which empties itself at Moutapilly, separates the circars from Ongole and the Carnatic below the gliants. The area or superficial contents, as originally acquired by the British government, may be estimated at 17,000 geographical square miles, of which (in 1784) one-fifth was estimated to be in cultivation or fallow, two-fifths in pasture, and the remainder woods, water, towns, barren hills, or a sandy waste, three miles in breadth, bordering the whole extent of the seacoast

The grand divisions of the Northern Circars are naturally five, principally marked by rivers running from the hills on the western frontier. These divisions are Guntoor or Mortizabad; Condapilly or Mustaphabad, Ellore, Rajamundry, and Ciracole, anciently named Calinga The sea-coast of this province is not equally exposed to the violence of the north-east monsoon as that of the more southern shores on the same side of the bay. From Point Calymere to Ongole the Carnatic sea-coast lies nearly in a straight line from north to south, and is therefore in the direct course of the periodical storms which sweep across the bay of Bengal, but above Ongole the winding of the coast is from south-west to north-east, so that the land here lies almost parallel with the monsoon. Thus it happens that while the country between Madras and the ghauts is deluged by torrents of rain, the Circurs feel little

more of its influence than they derive from the occasional clouds blown in by the daily sea-breeze. Proceeding further north, the rains of this quarter of the year become milder, until in Cuttack the season approximates to that of Bengal; the NE. monsoon towards the bay becoming almost a land wind, bringing cold weather from the northern mountains, but accompanied with very little moisture.

The general climate of this region, to the north of the Godavery, has been described under the article Cicacole: to the south of that river, for the first two months strong sontherly gales prevail along shore, which together with the sea breezes moderate the heat; but the baleful influence of the former, acquired by blowing over the salt marshes on the sea-coast, is injurious to animal life, and destructive to ve-During the succeeding month until the rains, the wind coming from the west over a parched loose soil of great extent, uninterrupted by any continued chain of hills, and along the broad, sandy, and , almost dry bed of the Krishna, becomes so intolerably hot near the mouth of that river as to raise the thermometer, sometimes for an entire week, to 110°, and even in other parts it has been known to stand at 112° at eight o'clock in the evening, and at midnight to as high as 108°. Neither wood nor glass is capable of bearing this heat for any length of time, the latter, such as shades and globe lanterns, erack and fly to pieces, the former warps and shrinks so much that the nails fall out of the doors and tables. Another pecuharity of the climate is the noxious state of the air in all the hilly regions throughout the different seasons of vegetation, which occasions the distemper called the hill tever. This has been attributed to many causes, but it is probably owing to the grossness of an atmosphere fat with fogs, and surcharged with the exhalations of a luxuriant soil pent up in vallies, having the free circulation impeded by the surrounding lungles and forests

From Coringa to Ganjam the coast, as viewed from the sea appears moun talnous, and from Coringa southwards low flat end sandy The sama ground seldam yields more than one erop of grain annually but there being plenty of water, it is generally a heavy one. There ere many small rivers running townrds the sea di vided artificially into esnale and af terwards ennducted into tanks and reservents. The principal quadrupeds are sheen and the larger species of herned estile and the neighbouring sen with its mimerous islets, abounds with every species of Indian fish The Circurs are exceedingly productive of grain and formerly, during the north-easterly monsoon, were the granary of Madras, in like manner na Lanjore was reckoned on during the south-west monsoon Fruits roots end green esculents are scarce and raised with difficulty south of the Godavery, and even to the north of that fiver caine it is supposed to the influence of the sea sir and cotton are produced, and of the latter a great deal is brought from the interior hay salt and tebacco (the latter excellent) are exported The forests of Ilnjamundry from the commencement of the hills nlong tha banks of the Godavery to Pelconsha vield abundance of large teak trees.

Plain lengeloth which forms the groundwork of the best printed ca-licoes in Europe is wrought in tho island of Nagore and palempores at Masslipatam courser cloths to the north and south of the Godavery The mushus of Cleacale the woollen carpets of Ellore, and the silks of Borhampoer are rather objects of euriesity than considerable in quan tity The raw mik is all imported Ships of 500 tens have been constructed at Corner and Narsonoer the two principal months of the Godavery, and chove 50 000 tons of small native eraft are employed in tha coasting trade principally with Madras. The exports to Europe are chiefly fine cotten fabrics. The ar

ticles transported inland by the stinerant traders are salt, pieco-goods copper, and raw ailk from Bengal; the returns cotton and wheat large proportion of the East India Company's investment of piece goods se provided in these Circurs. female population generally prepare the thread sell the produce of their acch a work to the weaver end nutchase a new stock of cotton fac tha next week The females also of decayed families who from the secluded teneur of their lives have little charge of employment derive from this source a support for their feeble existence, which it is to be hoped no machinery will ever endanger considerable quantity of the cotton thus used is raised on the spot tho rest brought from the Central Decean in exchange for salt

The native inhabitants of the five Northern Circura exclusive of a few Mahomedana dispersed through the different towns, are wholly liladoos and according to returns maile to the Madras government in 1800 were estimated at 2,00 481 persons They are composed of the options the Teings and the Oena, Oriz or Onssa. formerly separated by the Godavery but greatly intermixed since their union They speak and write different dislects and have rites, customs end characteristical traits perfectly distinguishable from each other Tho four great eastes or subdivisions are common to both but the Oorias nre supposed to deviate less from engion Institutions than the others. Brahmios as elsewhere enjoy undisnuted pre-emmence It is probable that many of the poligars and zemindars were descendants of ancient Hindoo chiefs and public officers who had usurped lands The Velmas were an oboriginal race of Telingana The Rachewara appear to have been descendants of e pure Rajpoot colony from Upper Ilm dustan The Wernes were the off arring of the Gujaputty dynasty of Orasa Lines but the whole of the above tribes offect the Raincet manners and pretend to be of the mar 2 r 2

tinl caste. The remainder are hasbandmen, cowherds, weavers, together with the artificers hereafter enumerated, and maintained by the

greater villages

Geographically considered, a village here is a tract of country comprising some hundred or some thousand acres of arable or waste land, politically viewed it resembles a township or corporation. Its proper establishment of officers and servants consists of the following descriptions:

1. The potal or head inhabitant, who has a general superintendence of the affairs of the village, settles disputes, attends to the police, and collects the revenue within his vil-

lage

2. The talin and totic: the duty of the first consists in gaining information of crimes and offences, and in escorting and protecting travellers from one village to another; the duties of the last appear confined immediately to the village, where he guards the crops and assists in measuring them

3 The boundary man, who preserves the limits of the village, or gives evidence respecting them in

matters of dispute

4. The curnum, or village accountant.

5. The superintendent of the tanks and water-courses, who distributes the water therefrom for the purposes of agriculture

6 The Brahmin, who performs the

village worship

7 The schoolmaster, who is seen teaching the children to read and write on the sand

8 The calendar Brahmin, or astrologer, who proclaims the lucky and unpropitious periods for sowing and reaping

9 The smith and caipenter, who manufacture the implements of agriculture, and build the dwelling of

the cultivator.

10 The potman or potter, the washerman, the barber, the cow-keeper, who tends the cattle, the doctor; the dancing-gul, who attends

nt rejorcings; the musician; and the

poet

These officers and servants generally constitute the establishment of a Hindoo village In addition to the portion of land appropriated to the pagoda establishment, to the local officers of the government, and to the village servants, they were each entitled to certain small shares or perquisites from the crops of the villngers. Under this simple form of government the inhabitants lived from time immemorial. The boundaries of villages have been but soldom altered; and although villages have been often injured, and even desolated by war, firmine, and disease, the same name, the same limits, and even the same families have continued for ages The inhabitants give themselves no trouble about the breaking up and division of kingdoms; while the village remains entire, they care not to what sovereign it is transferred, or to what dynasty it devolves, its internal economy remaining the same

The towns and villages in this province consist of mud huts and houses, yet the peasantry are not, on the whole, incommodiously lodged temples, tanks, and other great works are few and insignificant, when compared with those of the south; and the roads, with the exception of Bengal, where they are not required, probably the worst in India Wheeled carriages are consequently scarcely used for the commerce of the interior, and the communication from place to place at certain seasons is extremely difficult, even for loaded cattle, especially over the black soil of Guntoor and the swamps of the northern districts The numerous streams, rivers, and crecks that intersect the country (as in Malabar) from east to west, without bridges or proper ferry boats, are a great impediment to inland traffic, and a never-ceasing annoyance to the traveller, for whose accommodation a palmyra catamaran is the usual expedient The coss here is about equal to two miles English

The five northern Circars, when acquired by the East-India Company,

consisted of zemindary and havelly land. The first are situated in the hill country of the western frontier, and olsa in the plains between these hills and the sea The full remin secure in their woody and un wholesome heights and enrouraged by the hope of on eventual orylam in the dominions of the Airam and Viznoor rain have often furnished examples of successful depredation ond unpumshed revolt When the province devolved to the British they were for the most part in a very le regular state of subjection to the Nizam and not only the forms, but the remembrance of evil outhority. acemed to have been lost With respect to the invelly lands which compose a large proportion of these Circurs they consisted of the demesno or household lands of the sovereign, tracts near to towns resumed by the Mahomedany and oppropriated for the peculiar support of their namerom garrisons and establishments Long before nur nequition of the country priente property in land if it ever prevailed in these districts had for many years ceased to exist If the roots ever po sevied power to sell their lands it must have been at o very remote period for not only has this power remained inclaimed by ony ryot from Actlore to Gnulam but there has not been discovered o single deed of the sale of landed property by individuals in ony of the provioces throughout Tehngans In AD 1541 the Mussulmouns

under Vahomed Khan Leslikeree of the Bhamenee empire of Beeder broke into the Northern Circurs, and con quered Condapilly Nine years after words they subdued oll the Guntoor and Masulipatam districts but their reduction, to a European sense ap-pears to have been little more than nominal as they were again con quered from the Hindoo princes of Orisin in 1571, during the reign of Ibrahim Cuttob Shah of Hyderabad or Golcoods. In 1787 these provinces, nloog with the Lingdom of Hyderabad fell under the dominion of Aurengrebe but in 1724 were

ogan set ered from the Mogul empre by Atzm at I Mulk, who himediately took netural and real possession, collected the receive, on dixed a cut) and military establishment. He was succeeded by his third son Salabut Jung who being greatly indebted for his elevation to the latin ses and all latary support of the Prench Last Indian Company rewarded their services in 17.0 by o grant of the district of Condairs or Guntnor and soon after creded the other Circars

The capture of Masulipatam in 17:9 by the Bruish army under Co lonel Forde having deprived the French of all real power these terri tories reverted to the \izam with the exception of the ocknowledged dependencies of the town and for trees of Masulipatam which were retained by the Ingbili Last India Deprised of French suc-Company cour Salabut Jung was soon super seded in his outhority by his brother Airon Ali. In 1765 Lord Chre obtuned from the Mogul (Shah Allum) n grant of four of the Northern Cir care namely, Cicaçole Rajamundry I liore and Condapilly, which in the following year was confirmed by a trenty with the Niram The remaining circor of Guntoor was of that time possessed by Baznici Jung the \uzson s brother, who brid it in inglise It was contagently stopu lated for in the treets with the Ni Jung who died in 1782 but It did not actually come under British in rediction until 1788 From this period until 1823 n pesticush was paid onnually to the Aizam on occount of the Northern Circurs, omounting to 0,30,630 rupees but in that year tha whole was finally redeemed by the payment to the Nizam of £1,200 000 sterling.

The Joral odministration of the Northero Circars was continued in der the management of the natives ontal 1769 when provincial chiefs ond conceils were opponited and this mode of government continued until 1794 During this period the power of the zemendars was very great, and of the zemendars was very great, and

in 1777 it was calculated that the number of armed men maintained by them amounted to 41,000. In 1794 a change in the internal government of this province took place, which was followed by the punishment of the great zemindar of Vizianagrum, and the restoration of such zemindars as had been unjustly deprived of their lands by that family. The progress, however, of improvement continued to be very slow compared with other districts similarly situated, although considerable amelioration has taken place in the fiscal department. The system of a permanent assessment was introduced and established in the Northern Circars during the years 1802 and 1804, when the province was divided into five regular jurisdictions or collectorates, viz Ganjam, Vizagapatam, Rajamundry, Masulinatam, and Guntoor; but recently these have been incorporated with each other, and reduced to two districts, of large dimensions and uncertain form. - (Jas. Grant, 5th Report, Fullarton, White, Rennell, R. Grant, &c)

CLAFF'S ISTES (or Cocoa Isles)—A number of very small islands lying off the south-western extremity of Java; lat. 7° 5′ S., lon 105° 25′ N. These islets are uninhabited, and only occasionally resorted to by the Malays for the sake of the edible bird'snests found among them.

CLOORGOWAN.—A town in the province of Delhi, situated on the confines of the Hurrianna district and Bhatty country; lat 28°9′ N., lon. 75°6′ E., twenty miles N.W. from Hissar.

COCHIN (Cach'hi, a morass)—A small principality on the Malabar coast, intersected by the tenth degree of north latitude, having the Malabar province on the north, Travancore on the south, Dindigul on the east, and the sea on the west. A section of this territory, equal to about 745 square miles, is attached to the district of Malabar, and subject to the British code of Indian laws; but the residue is under the indepen-

dent jurisdiction of the raja. The whole area probably exceeds 2,500

square nules.

In the northern parts of this conntry, about Pargunuru and Sinhcary, the rice grounds are narrow valleys, well watered by perennial streams, which enable the cultivators to raise two crops annually. Their houses are buried in groves of palms, mangoes, jacks, and plantains, that 'skirt the bottom of the little hills. Above are woods of forest trees, which, although not so stately as those of Chittagong, are very fine, and free from rattans and climbers The teak and viti (a black wood) abound in these forests; but most of the large trees have been cut, and no care has been taken to encourage their reproduction, or to cheek the growth of useless timber. Towards Cacadu the hills are lower, and covered with grass instead of trees, but searcely any portion of them is cultivated, although the soil appears good and the pasture excellent.

In the Cochin forests nearly the same sort of trees grow as in those of The jackwood, in general Malabar. demand for cubinet work, is small, and mostly used for boxes and house building. The erambo or iron wood is too heavy for common use and is seldom felled. The black wood is large and of fine dimensions, but rendered unmarketable by the practice of cutting it into short logs, for the convenience of having them more easily dragged to water carriage by elephants, during which process they are much bruised and splintered. The poon of Cochin is small and inferior to that of the Malabar province, as is also the Cochin teak, with respect to the essential oil, which is the grand preservative of iron from corrosion; indeed, the difference may casily be perceived by burning a piece of cach. In the division of Chittoor there are extensive teak forests: but as the Chittoor river falls into the Pamany, it must be floated through the British territories to the sea-port of Paniany, in South Malabar. The free transit of this timber was of great importares in the ray a interest just per ministen to float the Children timber to the sea was not expected by the Horslay government (about 1814) without infinite discussions and the point was reals general feet the tria at last by the personering exteriors of Major John Murro then resident at Lockbu. The Cochin Rejs maintained his independence to a much later period
than most of the other lindoo
praces. He was first compelled to gay
tribute by Tippoo, which he still does
to the British government. Visits
Tamburan, rajs of Cochin, died of the
anali-pox in 1787, and was succeeded
by hit younger brother Verulum Tam
buran. In 1791, by the asalstance of
the British government he was enabled

to throw of the Mysors joke and transfer his allegance to the British Presions to the Transacree wars of 1007 the Cockin raja was tributary for that persion of his decisions which had been recompered for him from Types, and it then gaid alto perhera standing of our lack of repress but this state always or treatment abcided pertiality to the I recent muon, and at length consented an unprevaled not perposite on was against the Hillink, which was extinguished with lattle tree the gand his tribute

ידיותו לנס, שלב מו ליוורים בינים Atomit the some de e (1403) it was document that I's rat Achem the drawn of Lorbin hallern so setter permeter of the commotions in this courter of India, and had closely con federated with the terretters and am I thous design of Transporter was the Coebin raja himself altogether exempted from the empleion of hash, enormared thedren street feets that his guilt readuly perer controlal on lat and the propositioner were in all literational exceed by his regimence and imbers'up, which fer ereted his percentled the enic nat riots falsicated and conducted within the walls of his own soluce. The Lashin dream on two trans with his treacherous machine tops, imused ate-Is confessed the whole and acknow ledged the elemency with which he had been treated | Ite was in come quener ordered to repair to Hombay but in the course of his journey destated to Trichoor; from whence, however, he wa removed, and transported to safety to his phimate dertimution.

To prevent the sotherity and reconcrete of this chieftain bring grain durered against his affice, by the new treaty concluded in 1810, the surrender of his fortrester, arms and mil tary storre was stipulated and also the reduction and reformation of his military cutablishment; but the good effects expected from this arrengement were frestrated by the continued discentions between the raja and his new sleam, hoonjee hishen Vierance, who was supposed to be influenced by persons hostile to the British government. The dewan was in consequence removed from that high office, and the duties of it undertaken by the British resident until a fit successor could be found. This was, however, no easy task, for the country was divided into factions inveterate against each other; nor did any of the principal men possess sufficient character or abilities to qualify them for so important a task, in a minicipality full of foreign, discontented, and turbulent persons Such a state of anarchy, added to the very bad description of the revenue servants, required strong and vigorous coercion, the powers necessary for which, if confided to a dewan, would have been, as they had been, grossly abused, nothing therefore remained but the temporary interposition of the representative of the British go-This arrangement was vernment. most carnestly sohested by the raja, who alleged that nothing else could restore subordination to his authority, economy in the expenditure, or tranquility in the country. With respect to himself, his life he said had been passed in reading the shastras, and that it was now so fast veiging to its termination, that he was unable to attend to business, while his heir had the opposite defect of being too young and mexperienced. Under these circumstances, he was of opinion that in committing his principality to the temporary care of the British government, he did an act of justice to his subjects, while he gratified his own wishes

The resident in consequence stood forth as dewan, until the raja should be relieved from his embarrassments, and commenced by recommending that the Cochin tribute should be reduced from 2,76,037 to 2,40,000 rupees, the resources of the country being unequal to the liquidation of the larger sum, while the debt due to the British government for arrears of subsidy amounted to 5,22,437 rupees Various reforms were also effected in the collection of the revenue and current expenses, of which last the reli-

gions establishments proved the heaviest and most troublesome to arrange. In 1814 consulerable difficulty was experienced in realizing the revenues on account of the refractory conduct of the Christian inhabitants, who paid scarcely any revenue to the man, and refused to recognize his anthonty. Prior to this date native Christian judges had been appointed to all the comts of justice in Cochin and Travancore, for the protection of the Christian natives against the hostility of the Nair public functionaries -(Col. John Muuro, F Buchanan, C. Buchanan, J. Fell, &c.)

Cocnin.—This city, from which the above principality originally derived its name, has long ceased to form any part of the Cochin dominons: lat 9°51° N, lon 76° 17' E In A D. 1503 Albuquerque obtained leave to erect a fortress at Cochin, which was the first possessed in India by the Portuguese. In 1663 it was taken by the Dutch, who converted the cathedral into a warchouse, and while they remained in possession, it was inhabited by Jew, Hindoo, and Mahomedan merchants, and carried on an extensive commerce The intercourse with Arabia was very great, and Venetian zequins brought from Egypt were in common circulation, while many of the Arab ships made two voyages annually A considerable traffic is still carried on with Surat, Bombay, the Malabur coast, and Canara, and also with Arabia, China, and the Eastern Isles The chief exports are pepper, cardamoms, teakwood, sandal-wood, cocoa-nuts, corr, cordage, cassia, and fish maws Shipbuilding is carried on to a considerable extent, and the ports on the Arabian and Persian Gulfs are from hence supplied with timber for repairing their different craft. In 1821 two twenty-four gun ships for his Majesty's service were on the stocks

The Roman Catholic bishop of Cochin now resides at Coilan His diocese begins south of Cochin, extends towards Negapatam, includes the whole island of Ceylon, and comprehends altogether above 100 churches Heldes the Catholics there ore at Cochin a considerable population of Protestants, the remains of the Butch colons to lies ond all the I properns settled in India, the Dutch have the ment of having greatly promoted the die commetion of Chri tismity wher ever they gained a settlement their time clergymen presided over di tricis an l'maile annual vi a ations but all reli fore an l'achniastic institu tions have been neglected since the tran ference of the country to the liminh in 1807 the population of Jews In Lochun and Its vicinits was as follows -white Jews "23: Uark Jens 720; at places in the country 546 total in Thereas. ## COCHIN CHINA

A kingdom situated in the south castern extremity of Asia usually distinguished by the name of India beyond the Ganger and extending alon, the sea of China, from the lift to the 18th degree of north latitude The empire of Cochin China wilch acquired its existing form about the commencement of the present cen tury comprehends all Cochin China and Tunquin, and the largest porsion of Cambodia with the little state of Sampa. It extends from Cambodin Point in lat. 8° 30' V., to the corthern confines of Tunquin about lat 23° A and from 10. and 100 cart To the north It has the Chinese provinces of Canton, Quangel and Yu nan : and to the west Luos and Siam It is bounded in every other direction by the China sea and the gulfa of Tunquin and Siam The dominions of Cochin China do not appear in any part to come in actual contact with those of Ara although the Bur mese have settlements on the upper course of the great river Cambodia. before it enters Tunquin, but the ter

ritory of Lantan a subdivision of

The Coclun Chinese empire, as may be inferred from the above deactipation is of a very irregular shape In 15 4 It might be con idered as ili tributed under three di tinct goremment res that of Tunquin, subdulided Into fifteen trainers; Cochin China proper, containing nine; and Cambodia containing six prosinces Tunquin is the largest and most populous. Cochin China le but a narrow strm of land extending along the coast benuned in by moun tune schlomesceedingtwenty lengues in breadth and on the west generally bounded by the Laos territories

The principal rivers are the han-Lan the Cambodis the Falson the Tunquin or Dannal and the time : Int Cothin Chur Itself has no tirer of any magnitude for the line though broad is shellow and of a very short course. Its estuary lines ever, forms a very fine harbour accessible in the north west mensoon to ships of 200 tone but in the onposite mon con it is shut The long valles through which these reters flow are comparatively, the mn t fer the an I populous divisions of the empire t the remainder consists most ly of primitivo mountains with nar row saliles intersening and is proportionally tidaly inhabited and un roductive The promontory named Cape St James (Int 10 16 \ lon 1070 4. 1 ) is the commencement of a chain of mountains that extends olong the sex-coast to the north as far as the gulf of Cochin and being the first high land seen to the south is an excellent land mark for the en trance of the Donnai river on the north side of which it is satisfied Between Cope St James and the Bay of Turon Lochin China possesses olac excellent harbours, occessible with every wind, and offering complete profection

The commerce of Coclin China is regulated by the monsoons the vessels being land up until the return of the periodical favourable winds. The cliner commercial parts are Salgon. Faifoe, Hue, and Cachao. The last is the capital of Tunquin, and before the subjugation of that kingdom was a place of great trade. The Chinese craft and shipping that visit Cochin China annually has been estimated at 20,000 tons. Some of the native trading vessels are so constructed that the component parts may be separated from each other, and placed under cover, and some, even so large as eighty tons, have the timbers merely covered with matting or basket-work.

The low-lands in Cochin China produce rice, areca, betel-leaf, tobacco, coarse cinnamon, cotton, and sugar, the last of which may be considered the staple commodity of the country. Gold-dust, aguilla-wood, pepper, wax, honey, and ivory, are brought down from the mountains by the inhabitants. There are two species of rice, that which requires inundation, and mountain rice. The rainy season takes place in September, October, and November. The lands are capable of producing two crops of rice per annum, one reaped in April, the other in October. Fruits of various kinds, such as oranges, bananas, figs, pine-apples, guavas, and pomegranates, are abundantly produced in all parts of the country In the forests of Cochin China are ebony, cedars, mimosas, walnuts, teak, iron wood, poon, and most other trees that grow in India, besides sticklac and gamboge

Sugar is the most valuable production, and is principally raised and manufactured in the central districts, by the industry of the natives, without the assistance of the Chinese, as is the case in Siam. In 1822 the whole exportation was estimated at 30,000 piculs, mostly sent to China. It is packed in matting sacks, containing rather more than 150 pounds each, which must be bored with a piercer to guard against fraud. Raw silk is also an article of considerable importance, both in Cochin China and Tunquin, and it has been conjectured that above 120,000 pounds are exported. In quality it is rather better

than the Bengal silk, not of the Company's filature, but the shortness of the skein renders it unsuitable for The true cinna-British machinery. mon is produced in the central mountains of Cochin China, and in 1822 about 266,000 pounds appeared exportable. It goes principally to China, where it is more highly valued than any other quality; but, on account of the slovenly manner in which it is prepared, it does not suit the European market. Another exclusive product of the central portion of the kingdom, where it is extensively cultivated, is tea—a coarse and cheap commodity, selling by retail for about three-halfpence per pound. The indigo plant grows about Saigon in great profusion, but its produce is brought to market in a liquid state, the natives not being acquainted with the granulating process; it consequently soon becomes unfit for use. Gold dust is found in their rivers. and their mines abound with ore of The commodities the purest sort received from China in return for its exports, are silk, porcelain, medical drugs, a large supply of paper, principally for religious purposes, and some fine teas From the Malay countries, pepper, cloves, nutmegs, sandal-wood, and tin, are received, and from Hindostan, opium and salt-In 1822 the European imports consisted of broad-cloths, a few cotton goods, with fire-arms, and unwrought iron. The consumption of opium has been estimated at 150 chests per annum, two-thirds for Tunguin, and the other third for Cochin China and Cambodia the establishment of Singapoor, the whole quantity was obtained indirectly from Canton. At the above date, the whole army, estimated at forty thousand men, was clothed in British woollens, consisting chiefly of strong coarse scarlet broad-cloth, a small quantity of yellow and green of the same quality, and a few serges and Some woollens of a finer camblets quality are also purchased for the winter diesses of the higher orders. From Canton and Singapoor the

junks now import small a continents of fine and heavy cotton goods; but chlotzer and other coloured cotton goods, with the exception of hand herchiefs, are not exteemed by the Cochin Chanese, win prefer their own coarse cotton goods to those of lim dostan which they fully equal in texture

Notwebstanding their acquired skill in the casting of canoon and manufacture of ammundion the Cochin-Chinese have sever been able to supply themselves with small arms, which have at all times been imported from Europe; and notwithstanding the spearent cheapness of the native iron it can still be afforded better and cheapner from I order. In 1610 one krench ably sopplied the king with ten thousand stand of arms, jet they are always in demand and yield a

profit to the importer

The foreign trade of ther empire is almost exclusively with China that to Sum being inconsiderable, and with Furenean nations still smaller lo 1800 the latter, owing to the in same especity of the government, and the extortion of its officers wat reduced to the lowest stage of depression. Sugar the staple article was then very scarce; and the supply of raw silk was also extremely scanty The Cochin Chlorse, like the Siamere are prohibited from going abroad so that all their foreign trade is carried on by natives of the countries with which they have intercourse Some however, procure special licenses to go abroad and in this manner a few visit China, and lately the European ports in the atraits of Malaces and more especially Singapoor carry on a considerable international traffic within their own limits, and from their hardiness, activity, and liabits of obedience, appear singularly well sulted to become expert mari The Chineso trade is chiefly carried on to Cachar en Tunquin Saigon in Cambodia, and Tailo and lioo in Cockin China; they also trade with some minor ports, such os Pungtae, Yatrang Fuyln, Samchao, Quinnyon, and Quanger The coast

ing trale is outsily active, but the express countst mostly of dried fish, bidth ale mer pickled pork, and other articles of little value a large portion of every sease's tomage bring monopolisted for the convergence of the lang a stores and troopy. The domestic commerce is managed by formales, who perform brides all the lalornous drudgery, such as awayesting the soil. The Chinese who are dispersed over the country participate in all the larger necessatile transactions, beddes which they are the butchers, tailors pediars confection cres, bankers and more changers.

The Cochin Chinese in their form of government (av in their other institutions) imitate the Chinese; but they are far behind them in the ad ministration of their law, as well as in mental capacity and industry. The only rank is official dirided into two great classes the card and the miletary The forms are regular, and the manner of conducting business prompt and methodical and in no other Asiatic country are Laropeso merchants admitted on more enty and liberal terms all foreign traders having in 1818 been placed on a complete equality Four of the principal seaports are open to Furopean com merce where all resids poy a rated measurement doty are exempted from all import duties or inspection of cargoes and pay a small export duty on a few articles only like the Malay practice, neither the sesereign nor his officers are themselves traders nor are there any royal monopolies or rights of preemption All these salutary regu lations however, are rendered almost nugatory by the insatiable rapacity of the public functionaries di cipined In extortion from the lowest peon up

to the emperor
France is the only country that
has as yet oroided herself of the new
regulations in favour of European
commerce four abjust from that country having visited Lockin China between 1818 and 1822 These imported fire-arms, Iron, copper, wool-

lens, curiosities for the court, and all received full cargoes of sugar, besides considerable quantities of raw silk. In the course of time it is possible that an indirect trade with China may be conducted through this country, which lies in the direct trading route, and the Chinese often are much in want of return cargoes. By this channel an intercourse might be kept up with every part of China, from Hainan isle to the Yellow sea, whence teas and raw silks might be received, without the hampering exactions of Canton.

Until a few centuries after the Christian era, Cochin China formed a part of the Chinese empire, and consequently the appearance of the natives, many of the customs, the written language, the religious opinions and ceremonies, are still retained by them The countenances of the peasants are lively and intelligent, and the women, who appear more numerous than the men, are actively employed in the works of husbandiy In some of the provinces of China women are condemned to the degrading and laborious task of dragging the plough; in Cochin China it is likewise their fate to be doomed to these occupations, that require the most persevering indus-In towns the women serve as agents and brokers to mcrchants from foreign countries, and act with remarkable fidelity Both sexes are generally coarse-featured, and their colour nearly as deep as that of the Malays, and the universal practice of chewing betel with other ingiedients, by reddening the hips and blackening the teeth, gives them a most unseemly appearance made palatable with salt and pepper, furnishes their principal meals, animal food being but sparingly used small breed of cattle supply but little milk. but, like the Chinese, they seldom use this article, not even as food for their young children, nor is it customary to milk any animal Both here as in many parts of China, fresh eggs are rejected, a preference equal to one-third in price being given

to such as have become addled, and those that contain young in all stages are still more esteemed, and were always among the presents sent by the king to the British mission. This is one of the countries where the elephant is used as food, and rather Buffaloe 1s considered a dainty preferred to other beef, but its consumption is almost confined exclusively to the Chinese population. During the famines caused by the civil wais that so long desolated this country, it is said human flesh was sold in the public markets of the capital.

The better class of Cochin Chinese wear, next the skin, yests and tiowsers of slight silk or cotton. Turbans are frequently worn by the men, and hats sometimes by the women, shoes are not used by either The men usually wear then han twisted into a knot and fixed on the crown of the head, which was the ancient fashion among the Chincse, who now wear only a small lock of han behind The handles of the officers' swords are of silver, and generally well finished, but all arts and inanufactures decay, owing to the insecurity of property. The particulai branch of the arts in which the Cochin Chinese most excel is that of naval architecture. Their pleasure rowgallies are remarkably fine vessels, and are sometimes composed of five single planks, each extending from one extremity to the other. The edges are morticed, kept tight by wooden pins, and bound firm by twisted fibres of the bamboos without ribs or timbers of any kind. Their foreign traders are built on the same plan as the Chinese junks 1825 the sovereign had increased his regular navy to eleven sail of square-11gged vessels, mostly commanded and navigated by Chinese.

The Anam language is that of Cochin China and Tunquin It is represented by the missionaries to be also generally used in Siampa and Cambodia The Anam language and nation are often denominated Juan by the Malays and Siamese. It is

sumple, original and monosellable. und line neither genders numbers. nor cases, moods tenses nor con ingations; all of which are supplied in particles and the juxtaposition of words as in other monney llaine lan guages Conversation la a species of chaunt or recitative as in Chinese, which has a very ludicrous effect on on unaccustome I car the Intensition or occent being very similar to that All lionerer, in this of China kingdom who pretend to any preemioence in learning greatly affect the Clone e Interature and character

The religion of Corbin ( bluz le & modification of the walch extended dnetrines of Buldha hut more eim ple than that which is popularly practised in China. The natives are extremely superstitions, and their deroponal exercises like those of the Chinese ore more frequently per formed to avert an ideal cut than with the hope of ottoming a positive good. Besides the spontaneous of ferings that Individuals make on in rious occasion, a vearly contribu tion is leried by the government, an ! paid for the support of a certain number of monsiteries in which the priests invoke the deity for the pubhe welfare In 1820 the French mls monaries estimated but apparently without any rational data the total population of the empire at six uni tions of persons which number in cluded 70 000 Christians all Homan Cotholies

The oneient history of Cochin China is very little known lint the accounts ore tolerably authentic from A D 1774 when the reigning family were expelled from Quinnong the capital by three brothers who di sided the country among them. The eldest brother was o wealthy mer chant the second o geogral officer ond the third o priest When the revolt took place, the young prince Caung Shang with the queen and his family by the ossistance of a French missionary named Adran esesped into o forest where for some time they lay concealed After varions unsuccessful ottempts against

the suspects he was compelled to fir first to Pulowal an unblusheted I land in the gulf of Sum an I after words to Sum from whence he was also expelled. The mu innary Airan in the mean time proceeded with his eldest unde child to I rance in endearout in procure a sutance, which was fru trated by the breaking out of the creolitium.

the revolution Caung Shang, after remaining two years on the I land of Polowal, feed ing on roots and enduring many hard hips ventured to land out ble nun country in 1700 from whence he at la t managed to expel the successors of the nrightal unirpers and ofter wards effected the conquest of Tun In 1707 and 1794 with the as I tance of the mis jonery Adran who had returned from Furone he began many Improvement , seklom ottempted in Asiatic governments He established o manufactors of salt petre; spenel roal of communes tion on lencouraged cultuotion; he distributed life land forces Into regu lar regiments and retal li lied mili tary schools, where the officers were instructed in the science of projectiles and gunnery by I propen numbers, and Adran translated into the Chi nese language a system of military tocties In the course of two years he constructed at least 100 large gun boats or row gallies fire lu rery ond a frigate on the model of a huronean vessel lie cause la avstem ni naval tactics to be introduced and had his officers instructed in the use of alg-He also undertook to reform the existing system of jurisprinlence and sent missions into the moun tainons districts, to investigate their condition and advance their citaliza He openly declared his great veneration for the Christian religion which his tolerated, and indeed all others in his dominions ofthough he adhered in practice to the ancient faith of his country In 11) 1800 Adran the infesionary died and was interred with oll the pomp and ceremomes prescribed by the Cochin Chinese doctrines,

Three attempts were made by the

East-India Company to open an intercourse with Cochin China: one in 1778 by Mr. Hastings, one in 1804 by an envoy from Canton, and one in 1822 under Mr. Crawfurd; but the whole proved unsuccessful The political system of this country, like that of all the countries of India beyoud the Ganges, is one of extreme caution, and aversion to any intimate connexion with strangers. Shung, the restorer of the dynasty, in 1806 was in his fiftieth year, but the period of his decease has not been ascertained. In 1821 the reigning sovereign's name (who died soon after) was Ming-ming, that of his predecessor Kealung At that date there were only two Frenchmen at court, and they were on the eve of embarkation for Europe, having latterly been much neglected. In 1821 a kind of demi-official mission was despatched from Saigon to the sovereign of the Burmese, being probably the first regular external diplomatic relation (except with China) ever entered into by this monarchy The pretensions of China to the kingdom of Tunquin, formerly tributary to that empire, are incessantly to be guarded against, but while the Cochin Chinese maintain their present (comparatively) formidable army of 40,000 disciplined men, they have little to fear from any of their immediate neighbours, who, besides the Chinese, are the Siamese and the wild tribes of the interior,-(Barrow, Crawfurd, Singapoor Chronicle, Lieut. White, Staunton, Leyden, De Bussachere, &c.)

COCKLEY —A village on the northeastern coast of Ceylon, situated near a considerable liver, about thirtyeight miles N.N W. from Trincomalee, lat. 9° N, lon 80° 58′ E.

Coco ISLES—Two small islands in the bay of Bengal, lying due north of the Andamans, and situated about lat 14° N, lon 93° E The largest may be about eight miles in circumference, and they both abound with cocoa-nut trees, from which they derive their name They do not appear to have been ever inhabited.

Cocoa Isles.—A cluster of very small isles lying off the west coast of Sumatra: lat. 3° 2′ N, lon. 96° 10′ E.

COCONADA.—A village on the scacoast of the Northern Circars, district of Rajamundry, situated on the bank of the little river Eliseram, and communicating by a ferry with the Ditch settlement of Jaganaepooram on the opposite side. This spot is the usual residence of the collector and magistrate of the Rajamindry district, and it is distant from the town of that name about thirty road miles to the east—(Fullarton, &c.)

Coef —A town in the province of Agra, district of Alighur, from which fortress it is two miles distant S. by E., and connected by a fine avenue of trees, lat. 27° 54' N, lon 78° E. When Abul Fazel wrote, in A D. 1582, Coel was a place of importance, and it is still a large open busy town, the head-quarters of the civil authorities attached to the Alighur district. The only remarkable building is the great mosque, built on an elcvated spot in the centre of the town, and commanding from its minars an extensive view of the adjacent At this place there is part counti y of a minar, about twenty feet in diameter and thirty-five high, which by the inscription appears to have been built in the reign of Niisser ud Deen, A.D. 1254, Hijera 652. It is conjectured to have been built by some of the early Mahomedan conquerors on the ruins of a Hindoo temple — (Fullarton, Ewer, &c.)

Collonda—A large district in the Hyderabad province, situated to the west of Golconda, about the seventeenth degree of north latitude, but respecting the interior of which, and the Nizam's dominions generally, very little is known The town of Colconda stands in lat 16° 51′ N., lon. 77° 50′ E, about fifty-seven miles S.W from Hyderabad.

Collle —A town in the province of Bahar, district of Tirhoot, forty-

eight miles & by E. from Patna; lat 26° Lo N., lon. 20° 40' L.

## Command (Crimatery)

A small province in the south of Indra, situated above the he tern chant mountains, at sit the clearnth degree of north latitule To the north it is bounded by the Masore territories on the south 13 flinds gul; on the east it has ralem and Trichinopoly; and on the west the prosince of Malabar Under this collectors e are included the distribute of Carror, "atimargolum, and Baraporam and the whole prosure may be reckoned from north in south fifty miles ler about forty-fire from east to The table land, or rather the erneral height of the low country in Combatoor for it is much endufated. is about 900 feet above the level of the rea; and toward Tinnevelly it fal a to between 400 and w00 feet : lut to the northward it shoots up to a producious clevation the humbe-tarine bill (lat 11° % \ lot 77° PO' 1.) being reckuned by Colonel Lambion "," it's feet above the level of the ocean and some of the Sec gherry mountains are still h giver About forty miles due west from Da raporam there is an opening in the western ghaut chain of mountains named the Palighautcherry pass which to in width at its cavtern ex tremity acren miles and in length at least thirty-one miles. This pass is funnel-slaped being more than dou ble the width at the end which opens towerds the Malabar coast as cont pared with the end contiguous to the Combatoor district It is nearly on e level with the lands on either side of the ghauts so that there is a free passage for the oorth west and south west winds from the Malabar coast.

Combatoor is watered by several rivers t the most considerable is the

Cavery, which is filled by both men toons; by the W In June July and Appost t and by the north-cast in October, Sevember and December In December and January the ther enometer ranges from G" to 60" in the shade in May from 70° to 07°, get the climate le pleasant. Towards the end of January and in I chemary the dens fall heavily, and near thu mountains the morning logs continue until nine o clock to March rain to very incommon an lupon the whole Coimbateor elimate may be described as healthy yet at certain seasons the liels lands are dangerous. The soil Is generally dry; but in the vicinity of the hi is, and also to some of the southern portions there is much low marshy ground; and akhough the territory may in general terms be ralled an open country it to in many parts disernified with woods, waster, and junctes. I rom its great elevatio the soil of Colmbatnor is generally dry and well adapted for the dry grain enitivation I veryt along the tract immediately facing the Pallchantcherry pass the low country of tle Combitone dutnet le still more completely sheltered than the My sore from the violence of the south west monmon and the interrening wall of the ghaut mountains forms a more distinct boundary between the twn FERNITE.

In North Coimintoor near Mufu and Coleagula the cultivation is equal to war in india and con late chiefly of rice Felds untered from large reservoirs. but they are not on so grand a scale as in the Masore and many are now In rules The summit of the Eastern glisut mountains are liere from 1,300 to 2 000 feet above the level of the upper country which although beautiful aed fertile is thinly lehalnted, and produces little serviceable timber In this mountainous tract there are two rains reasons the first to the month fol lowing the vermal equinox; the second lasts the two months before and the two mooths after the autumnal The people in the neigh equinos bourhood consider the ox as a living god, who gives them their bread, and in every village there are one or two bulls to whom weekly or monthly worship is performed, and when one of them dies he is builed with gient ceremony. From Candhully to Mahally, in North Coimbatoor, much of the country has been formerly cultivated, but is now waste. The strata of the ghauts in this quarter i un north and south, and are vertical, but the rock being much broken by fissures, it is little used for building.

Near to the town of Coimbatoor the soil is generally good, and tolerably clear of rocks and stones Hedge row enclosures, formed of the milk plant, prickly pear, and other tropical shrubs, are general, and are seen intersecting fields now overgrown with jungle The rows of Parkinsonia in the vicinity of the towns are likewise a great embellish-The bagait or gardens are ment watered by machines called capilly and yatam, and reservoirs are also common, but in the neighbourhood of Dai aporam irrigation is performed by means of canals filled from the Amaravatı river Taking the whole province, however, in the aggregate, the average of the wet cultivation amounts to little more than three per cent. of the total agriculture Cotton is an article of considerable cultivation both above and below the ghauts, and almost in every soil One species of the gossypium is an annual, and the other a triennial plant, of which the last is much superior in quality, although not so heavy in the There is also a third sort resembling the Brazil, which is raised both for ornament and for the sacred threads of the Brahmins With encouragement, the produce of cotton might be greatly augmented and the quality improved Throughout Coimbatoor there are earths impregnated with muriatic salts, and others with nitrates, which have occasionally been converted into culmary salt and This earth seems to contuin nitre ready formed, as no potash is added to it during the process by the manufacturers. Most of the well water also has a saline taste

1818 a mine or well of aquamatine stones (a variety of beryl) was found out, and worked by the discoverer, Mr Heath, one-half for his own benefit, and the other for that of government.

With respect to the useful arts, the inhabitants of Coimbatoor appear to be as far behind those of Mysore in intelligence, as these last are behind the natives of Madras and Calcutta, yet on the whole they appear to enjoy comparative comfort Indeed there is perhaps no province of India in which the peasantry are so well lodged as in Coimbatoor, although there is a remarkable deficiency of houses of the better order, and in truth of all beyond a cottage of red mud, with a roof of tile or thatch A practice prevails here, not uncommon in the south of India, of ornamenting the areas in front of their temples and choultines with gigantic groups of capalisoned hoises, elephants, and other grotesque figures in various combinations, all formed of cast pottery covered with chunam towns are in general well-built, and some of them, such as Combatoor, Daraporam, Bhavani, and Caroor, large and populous. As in most parts of Bengal where the arts have not been introduced by foreigners, the only one that has attained tolerable perfection is that of weaving. 1817 the gross collection of the public revenue amounted to 6,66,894 pagodas

In ancient times the Coimbatoor province was named Kanjam, and came under the dominion of the Mysore rajas abont 175 years ago now forms one of the collectorates under the Madras presidency, having been acquired by the British government in 1799 In the years 1809, 1810, and 1811, an epidemic fever prevailed, which destroyed a great number of the inhabitants, and threatened to depopulate the whole district, then estimated to contain 596,606 persons. In 1822, according to the returns then made by the collectors under the Madras presidency, the total population of Coimbatoor amounted to

638 199 persons. — (F Buchason Hodgson Fullation Medical Reports, Public MS Documents, &c.)

Comearons .- The capital of the preceding province altooted in lot. 10° 52 V ton 77° 5' E., 112 mlles S by L. from beringapatam place stands high good dry, clear of the Palighatcherry pass, and is tole-rably well built; but the water is considered brackish and supposed by the natives to occasion the cutoncoils diseases that are so common among the poorer closses. There is a mosque here which was built by Tippoo who sometimes resided at Combatoor, which latterly has been the head quarters of a cavalcy regiment Two miles from hence in the oeighbour hood of Pcours both culmary salt and saltpetre are procured by lixi vising the soil and at Topumbetta, fire miles north fron 19 smelted from block sand At Peruro is a celebrated temple dedicated to firs called Vall (high) Chittumbra to distinguish it from another Chittumbra near Pondicherry The tdol is said to have placed itself here many ages ago, but it is only 3 000 years since the temple was erected over it by araja of Madura. The building is highly ornamented after the Hodoo foshion, but the figures are destinte of oll elegance, and some of them indecent Tippoo issued a general order for the destruction of all idolstrous buildings he excepted only this edifice and the temples of Mailcotta and Seringapa-The hereditary chief of Coim batoor is of the Vaylalar tribe tho one existing in 1800 being by his own account the twentieth in descent from the founder of the town The fomily originally paid tribute to the Raja of Madura. In the year 1783 Coimbatoor was taken from Tippoo by the southern army, but restored at the peace in 1784 In the war of 1790 it was early taken po-session of by the British troops but ofterwards besieged by those of Tippoo who were repulsed in on attempt to storm by a weak garrison noder Lieut Chol mers. Subsequently it surrendered YOL I

to Cummer aid Deen Maan, Tippoo's general and the garrison, in breach of the capitulateo, detained prisoners until the generol peace of 1702 Along with the province it was transferred to the British government in A D 1799 Travelling dutance from Madras 306 miles; from Seringspatian 122 miles — (F Buckaron Lirow, Reantl Medical Reports, 5c)

COLARSA.—A small town on the sea-cost of the Aurangabrd province obout ametere miles south from Bom bay fart lat 18° 38 %, lon 77° 6 E 10 1826 a treaty was canclosed with Raspise Augna the chieftain of Colabbo, defining the boundary of that principality, and adjudicating some fiscal claims.—(Public Al's Documents, 5° 6)

Colassa.—This name is also opplied to the narrow promontory im mediately to the south of Bombay from which it is but imperfectly sens rated, and in the maps sometimes distinguished by the name of "Old Woman a Island On this anot there stands a fine in ht house and canton ments for the European troops have The name of also been erected Colabba, however applies more proerly to the southern portion of the island which is connected with the northern by a small causeway, over flowed at spring tides.

Among the his orient records still extant at Bombay is to be found the oncient composition entered into between Sir Gerord Augrer and the Portugueso inhabitonts in 1674 on which document the Company a right to Colabba is founded The oop-nopropriotion of this island to any im proved revenue purpose for so many yours, was not owing to any physical imperfection, but to an opinioo gene rully entertained, that the whole island should be reserved for a military can tonment in consequence of which no altenotion of land took ploce for obove a century with the exception of a small portion of Old Woman a Island, which by o special grant became freebold property in 1746 Many abstractions hovo since taken 2,

place, and the Company have been obliged, in many instances, to re-purchase their own lands at immense prices. In 1805 sixty thousand rupees were paid for eight houses, including a temporary hospital, besides an enormous expenditure for repairs. —(Capt Dichinson, &c.)

Colagaul (or Collegal Pettah) -A town in the province of Coimbatool, thirty-one miles ESE. from Seringapatam; lat. 12° 13' N., lon. 77° 14' E. In 1820 this was a thriving place, and had two streets of large white tiled cottages, uniformly built, and inhabited by weavers.

Colair Lake.—A large fresh-water lake or jeel, situated at the northeastern projecting corner of the Condapilly circar, about five miles south from Ellore, chiefly formed of the overflowings of the Krishna and Godayery rivers, which are from hence conducted into many channels to irrigate the circumjacent territory. bed is of an oval shape, and occupies a natural hollow, into which several streams discharge themselves, the surplus waters being carried off by the river Ooputnair. The breadth of this lake varies from seven to twelve miles, while its extreme length may be estimated at twenty-two miles, covering an area of about twenty-two square miles It comprehends several islands of various dimensions, which disappear as the lake swells, and reappear as the floods subside, when they are in excellent condition for rice, with which they are immediately planted On a failure of the periodical supplies the lake dries up, and dunkable water becomes so scarce that the poorer inhabitants are compelled to migrate, and suffer privations almost equal to a famine — (Orme, 5th Report, J Grant, &c)

COLANGODU -A small town in the south-eastern division of the Malabar province; lat. 10° 42' N, lon 76° 49′ E

Colapor (Calapur).—A small independent Maharatta state in the province of Bejapoor, the territories of which are partly situated below the western ghaut mountains in the Concan, and partly in the elevated land within the ghauts; but all so intermingled with the possessions of other Maharatta chiefs and with those of the British government, that it is quite impossible to discriminate them. Until 1812 the Colapsor chief possessed Malwan and three other fortresses on the sea-coast, which were then ceded to the British go-At present the chief vernment. towns within this principality are Colapoor (the capital), Parnellah,

Mulcapoor, and Culgong

The Colapoor family trace their descent from Sevagee, the founder of the Maharatta empire. According to their traditions Sevajee had two sons, Sambha and Rama; the first of these had also two sons, Sahoo and Sahoo died without issue; Sambha adopted a son, from whom the Colapson rain is descended, who being thus lineal heir of Sevajee in the elder branch, took precedence of the Peshwa, and was addressed by the latter as his superior. Chutter Putter (the reigning raja in 1803) gained a great deal of country by usurpation and conquest, during the confusion in the Peshwa's dominions after the death of Madhoorow, particularly from his neighbours the Putwurden family, although he was only at war with one branch of it (Appah Saheb), but among the Maharattas such aggressions are not thought incompatible with the accustomed relations of peace and amity.

During Purseram Bhow's imprisonment the Colapsor raja seized the opportunity to ravage the possessions of his family (the Putwurdens), and actually plundered some of their principal towns, such as Savanore, Hubely, and Jasgone The latter was the Bhow's capital, where he had expended a large sum in erecting a palace, which the raja burned to the ground and demolished forthwith. When liberated, the old Bhow carried on a war for some time against the raja; but being defeated and taken pusoner in 1799, was, although a

Brahmin, cut to pieces in the presence of his enemy Iliu son, Appah Sabeb, then took the command of the troops animated by the most im placable hatred towards the Culapour chief, declaring he would never for give or forget such on net of strocity, and expressing his willingness to sacrifice all that he had io the world and retire a naked mendicant to Benares if he could only adequately revenge the alanghter of bia father But this satisfactino he was not destined to enjoy, for just when with the assistance of Dowlet Row a regular mfantry he had reduced the fortress of Colspoor to the last ex tremity and was on the eve of ne complishing his wishes, Sindia by secret agreement with his enemy withdrew his tronps and Annuh Saheb unable to prosecute the siege with bis own troops and resources, was compelled to retreat. In 1803 n cessation of bustlities was effected by the Duke of Wellington

In 1804 in consequence of the repeated paracies committed by the Ruja of Colspoor a subjects, his ports were blockaded, ond payment demanded of mooey due to the Com puny ond to the British merchants at Bombay During the time of war, the cruizer statinged on the coost was never of sufficient strength to fight ano of the enemy s privateers, nn whileb occount, to avoid the disgraceful event of her capture General Wellesley recommended a treaty to be entered into with thin raja, which if he ofterwards brake it would afford ample grounds to the British government to get effectually rid of an evil which, in the existing state of its power, was derogatory to its dig nity

About this period, olso, Viswas Row Gbautky and Serjee Ruw Ghautky twa favourites of Sindia and most persevering depredators tank refuge with the Chiapour raja infer their own bandutil had been defeated and dispersed by General Wellesley Tho rearral in consequence addressed a letter in 1804 to the raja infarming hum that he was perfectly swaper of the

family connexion between him and these brothers, ood that it was not the custom of the British government, nor his own wish, to perpetuate enmi ties or to deprive those of an osylum who were inclined to live in peace for which reason he did not call nn the rafa to deliver up the two Ghout kies, as he might be justified in daling At the same time he notified to the rain that or he bad given them an asylum the British government would consider him responsible for their conduct, and that if they again nesembled troops which could only be Intended to disturb the peace of other powers, be (the rain) would be called onon to answer for the injuries they might do, of which encumstance that letter was a friendly untification Thu duke added " It is time that the no tinns of India should enjoy same peace and you may depend upon It that the British government will not suffer it to be wontooly disturbed with impunity "

From the above date the state of Colapsor enjayed comparative tran quility and in 1812 was ogain recued from intestino disorders by tho interference of the British govern ment In 1820 it was considered by Mr Eiphlestone in o state of prospenty, but on the 16th July 1821 the rujn was shut in his own palaco by one of his own allighdurs named Sy nice Basee and died the same evenly lie left on mint son during whose minnrity it was intended the state affairs should be monaged by his mother and the family priest but dissentions sonn arose which again required the intervention of the British In fact the deserdered state of the police and the insuburdinotion of the rula a vossals (over whom in the remnte tracts he bod me enetrol), the number of strong holds nmnog the western ghouts the lawless hobits of the population and the vicinity to Sawuotuarree nil combioed to keep this petty principality in o stote of perpetual combustion In 1827 this rain bimself became refractory which necessaned the advance of a British detachment on the opproach of which

he agreed to disband his numerous levies, and remain quiet as long as he could, being of a most unsettled disposition —(MSS., Malcolm, Male', Elphinstone, &c.)

COLAPOOR. - The capital of the preceding petty state, is situated lat 16° 19' N., lop 74° 25' E, 121 nules south by east from Poona In 1825 it was approached for the first time by a British army, when our soldiers encamped within a short distance of the raja's palace, where they waited until the ratification of the treaty by the raja. The town stands in a valley between a curved lange of hills, that protects it on three sides. The fort does not appear strong, depending principally on the ditch, its main defence being the two hill-forts of Pownghur and Penowlghur, situated on the range of mountains that shuts in the valley, about ten miles noith-west The last is about from Colapoor three and a half miles in eircumferenee, and connected with the first at one point by a neek of land. Both stand on rocks from 250 to 300 feet lugh, from which spring natural ramparts of basalt from thirty to sixty feet perpendicular scarp, surmounted by other defensive works After ascending the bairen rock, the interior presents a neat town, lofty trees, gardens, and fine tanks. — (Public Journals, &c)

Colastry — A zemindary thus named in the Cainatie, in which copper mines are situated To the west lies the Uddegherry jaghire and the eeded districts, to the north the Naidoo country, belonging to the Ven eattygherry raja, and to the eastward the Nellore district The principal mining places are about fifty miles N.W. from Nellore, thirty from the sea. and about forty NE of Cuddapall, Several streams traverse it on their way to the sea, but the general aspeet of the country is barren and uncomfort ible The copper strata are of various density and distance, but the general run of the ore is in layers two inches thick, although they are occasionally found several feet in

thekness The natives assert that diamonds were formerly discovered in the mica slate of the Uddegheiry jaghine. The copper ore is of the sort that Dr. Thomas Thomson calls anhydrous, and the specimen he analyzed yielded an average of fifty percent of pure metal, but others so little as seventeen, and even six per cent.

The countiles in this quarter of Hindostan where copper of es have been discovered, are Colastry, Veneattygherry, Uddegherry, Dupaud, and some other places in the ceded districts, but the richest are in the Colastiy zemindaiy. Dr. Heyne recommends these inines to attention, first, on account of their being only thirty nules from the sea, and within twenty miles of fuel; secondly, on account of a river which is capable of being rendered navigable, thirdly, on account of the particular rock formation, usually rich in metal; and lastly, on account of the intrinsic excellence of the ore.—(Heyne, &c)

Colawassa—A village in the Carnatic province, district of Madura, situated on the southern skut of Tondiman's country, about fifty miles travelling distance N E. from the town of Madura A handsome mausolcum has here been erected over the 1 emains of a Mahomedan saint, on the margin of a fine tank faced with masonry.

Coles —See Orissa Province.

Colesity —A small town in Travancore, nineteen miles west by north from Cape Comoiin, lat. 8° 11' N., lon. 77° 32' E At this place there is a small harbour, protected from the winds by some rocks The Danes formerly had a factory here

Coleroon River — The northern branch of the Cavery, which separates from the other below the island of Seringham, near Trichinopoly, bounds the Tanjore principality to the north, and after a course of about eighty miles falls into the sea at Devicotta. At the point of junction the southern branch is twenty feet higher than the Coleroon, which latter is suffered to run waste to the sea Above Devi-

Consum.—Atown in the prosume of Bengal district of Tiperal seventy three miles S1 from Darra; lat 22 68 \times in 51 from Darra; lat 22 68 \times in 51 from Darra; lat an open summy bafase cosses and other coarse cotton goods of an excellent durable quantity are manufactured remarkable for the weight of the raw material they contain

COLLARASS — A town in the province of Agra district of Narwar exhity toiles north from Seronge lat 25° 14 \ lon 77° 25 F This place is autrouoded by an old stone wall of no strength near to which it o large

null's ar water-course of fine water. The country to the north is jungly and thouly inhibited much of tructed by raviner and exect in the various after the haderiver a large the dry sea son very 11 sugaled with water,—(3788, 60).

Lot on - In that town and rece, off or, and in the Malat penhasila principality of Salen are lar 3° N, but 101° - L. It stands about twenty males from the mouth of the river and is occasionally the rays readence. Prior to the war with the Stanese in 18-2 the inhibitants were reckoned at 1,300 per soon—(Indurer 6c)

Cot of n. — I tuen in the Carnatic province that's ealit miles no t from be lure; lat 14° 31 × lon 70° 26 L

Cott uz . - The modern camtal of Ceylun is sisted on the south west con the C' w \ lon 70° 41 F The first built on a peninsula pre-feeting furn the sea on times ures one oule au I n gurner in circumfeterer It can ists of seven principal ba tlans of different sizes connected by inter renue curtains and defen led by 200 preces of eannon The site is all fut invidated the sea reaching un to two thirds of the works and the rest (except two very narrow causes as a lie-in protected by an exten he lake of fresh water. On the south side tho surf runs on hi h and the share is so rocky that it would be dangerous to approach it; and on the west side. where the sea is smoother it is defended by strong batterles the lastions look towards the senthe other three face the take and com mand the enuseway leading to the fort A projecting rock on which two batterres are placed affords shelter to n small emicircular hay on the north side of the furt but on account of o sand bar only resorte ! to in small eraft The outer road affurds secure anchorage from the h gunning of Oc toher to the end of March, when the wind blows off the land from il o north-cast during the other six months the south west wind blows

on the shore, and the coast (for there is, strictly speaking, no harbour) is not

practicable. The plan of Columbo is regular, and nearly divided into four quarters liy two principal streets, which cross each other, and extend the whole length of the town. The houses are of stone, clay, and lime, and the whole city has more of the European style and appearance than any other The houses are seldom above one story high, and all had glass windows until the arrival of the English, who substituted venetian blinds, the natives of Holland having never been partial to a free circulation of air. Before each house is a large wooden veranda, supported by wooden pillars, to exclude the sun. government house fronts the sea on the north side of the fort, and is a handsome building of two stories The church of Wolfendal, where the Dutch inhabitants attend public worship, stands on the summit of a rising ground in the suburbs, and it is also attended by the Malabar and Cingalese Christians. Beyond the walls is a mud village and bazar, on a space called slave-island (in reality a peninsula projecting into the lake), thus named from having formerly been occupied by the slaves belonging to the Dutch government. The pettah, or outer town, stands a few hundred yards to the eastward of the fort, on which it encroaches, and contains more houses than are within the for-The fort is chiefly occupied by the British, the pettah by the Dutch and Portuguese, and the subuibs, much the most populous part, by the Ceylonese One street is entirely peopled by Mahomedans, here named Lubbies, who follow the occupations of pedlars, tailors, fishermen, and mariners. The aggregate of all descriptions in 1804 was estimated at 50,000 inhabitants, and we have no more recent enumeration. In 1821 the number of Europeans at Columbo capable of serving on juries was only thirty-two.

The west coast of Ceylon is remarkable for an equality of temperature, and humidity of the air, the consequence of which is that at Columbo, unless books and clothes are frequently exposed to the sun, they soon become covered with mildew. and rapidly decay. The average range of the barometer throughout the year may be considered about 29° 9 inches, the highest being 30°, and the lowest But the climate of 29° 7 inches. Columbo on the whole may be reckoned salubrious and temperate, Fahrenheit's theimometer ranging about 80°, and even in the full blaze of a meridian sun, owing to the fresh sea breezes, Europeans find it pleasant to walk and drive about in open car-Indeed the whole scenery riages presents a striking contrast to the plains, withered vegetation, scorching winds, and burning dust of The water within the fort is of a brackish taste, that used by the European establishment being brought from a distance

Although Trincomalce, on account of its haibour and position, be of more intrinsic importance to the nation, Columbo is in every other respect superior, being placed in the centre of the cinnamon country, and possessing a more numerous popula-The harbour is unfortunately nothing more than an open roadstead, and, owing to the course of the monsoons, the inhabitants for a considerable portion of the year are cut öff from all maritime intercourse with the rest of the island. The internal navigation, however, in a lateral direction along the coast, is excellent, and on the rivers and water-courses several hundred flat-bottomed boats are seen, with entire families, who reside permanently on board Nearly all the foreign commerce of Ceylon is concentrated at this port, as is also a large proportion of the coasting traffic. In 1656 the town and fortress of Columbo were taken from the Portuguese by the Dutch, in whose possession it remained until 1796, when it was captured by the British, and subsequently ceded by the peace of Amens. Letters from Columbo to Madras, a distance of

500 mics, are generally conversed in ten, but an express has been frequently accomplished in eight days.— (Lordiner, Percental Mabuen, Listy, fe)

Cousting.—A towa in the province of Agra, beloaging to the Bhurtpoor rays and aituated about ten under seet from his capital int. 27 17 %, ion. 77 14 k. At this place is mo sufactured the sait distinguished by the name of ladumba in Upper limidostan, aliere large quantities are somally coossume! It is extracted from the salme water of exilis in the vicility is usually of a small grain, and preserved in pite.

Consoorseen - A town in the Carnatic province district of Tanjore. twenty-three miles \ L. from the city of Tanjore; ist. 10° .0° ., ion 70 Co k. This was the ancient capital of the Chols race, one of the most ancient Hindoo dynastics of which any traces have been discovered in the southern regions, and from which in later times the whole coast of Cholamundui (Coromandel) has talen its hame There are still remains iodicating its ascient splendour present it is chiefly sobabited by Brah mlos whose habitations appear next, and the district thriving. Some of the tanks and pagodas are very fine; but it is remarkable that almost invariably the outer gate of the pageda is of superior dimensions to the pagoda itself. At this place there is a consecrated pond which possesses every twellth year, the virtue of cleaning all who bathe in it from corporeal and spiritual impurities of though accumulated through many transumerations. When these periods of plenary indulgence arrive, awarms of sinners collect from all points of the compass in order to avail themselves of the fortoaste moment when the efficacy of the puddle is most in tense In 1820 Combooconum was the head-quarter of the zillah court of Tonjore but the collector and magutrate resides at Nagore

Convector (Aumarkholt) - A town in the province of Bengal dis

treet of Rajeshahy altinated a few miles south from the unaln stream of the great Gangetle branch named the Puddah about easty-four miles § L. from Nicorahedalud; int. 25° ", lon 60° li'l The East India Com any have long had here a permanent fariory and commercial redulent for the purchoding of piece-goods and raw sill.

Conceo.—An idead in the cast croscas, slinated between Suminawa and Floris, and the clath and niath degrees of north latinade. In length it may be estimated at thirty-an online, by sisteen the average breadth.

Concara, Care (Lunori)—The southern extremity of what is miscalled the peninsula which notwith atanding its remarkable position never attracted in the shipitest degree the attention of linden geographers ascient or modern; in 18 4 N los 77° 45 I' It is however mentoned under the came of Cope Comari by Marco Polo, in A.D 1995

CONTRA-Atown on the sea coust of the Canara province twelve nules N N W from Onore; lat. 14 23 N, lon 73° 12' F

Covasah — A town in the North ern Circars their miles N N F from Vizapopatant in 17° 50 N., lon 93° 44° This place stands on the sear-side, near the mouth of a small river crowded by a sand-bar, but which affords occasional shelter to the country native craft trading along the coast. The dangerous Santapilly tocks are in the offing.—(Fullarton, & c.)

(Cancana). - A large CONCAN subdivision of the Bejapoor province, of which it occupies the whole seacoast, being confined on the east by the western ghant mountains length it may be estimated at 220 miles, by thirty-five the average breadtli, and includes many fertile tracts producing rice, but its general features present a congeries of steep rocky mountains. Towards the western gliants this country is strong, being crossed by fulls, intersected by ravines, and covered with thick fo-The range of mountains is from 2,000 to 4,000 feet high, on the west abrupt, and of difficult access, and the passes not practicable for wheeled carriages. The table-land to the east is nearly as high as many parts of the ridge, but in general the hills surpass it in elevation from 1,000 to 1,500 feet. This table-land is also strong by nature, being crossed by spurs or cordilleras from the main chain, between which are deep, winding, rugged vallies, choked up with Further east, as we apjungle. proach the Nizam's frontier, the country becomes more level, until it ends in an open plain.

This word by the natives is pronounced Kokun, and applied by them in quite a different sense to what it is by Europeans, for it includes much country lying to the east of the western ghauts In one sense it is synonimous with a hilly mass of country subject to the severity of the southwest monsoon, in contradistinction to des, a plain; but there are exceptions also to this definition. In the Deccan, the seven Concaus of Hindoo mythology are still known, and comprehend the whole of the Parasu Rama Cshetra, or the greater part of the south-western coast, they are named Kerala (Malabar), Tulava, Goverashtra (Goa), Cancana Proper, Kerataha, Varalatta, and Berbera In the British arrangements the southern portion of the Hindoo Concan is inclided in the district of North Canara; but in the Hindoo geography of the west of India, Concan Proper hegins at the river Gangawala, in lat.

14° 37′, where Haiga ends. •

The surface of the country exhibits a gradual declension from the gliauts towards the sea, and is traversed by numerous mountain streams. but no river of magnitude. There are few countries so much broken into small bays and harbours as this 15, with so straight a general outline. This multitude of shallow ports, an uninterrupted view along shore, and an elevated coast, favourable to distant vision, have fitted this tract of country for a region of piracy. The land and sea-breezes on the coast of Concan, as well as on that of Coromandel, blow alternately in twentyfour hours, and divide the day, so that vessels sailing along are obliged to keep within sight of the land, as the land winds are not felt more than forty miles from the shore. country produces all the grains of Malabar, and is particularly noted for the good quality of its hemp; the cocoa-nut here is also superior to that produced inland, and arrives much earlier at maturity.

The Brahmins properly belonging to the Concan are of the Paunsa Gauda, or north of India division; they allege that they are the descendants of the colony on whom the country, after the extirpation of the Khetnes, was bestowed by Parasn Rama, their principal seat seems to have been Goa, called by them Govay, from whence they were expelled by the Portuguese, after which they for the most part became traders is asserted, that a numerous class of Concan Brahmins, named Kurrada, still perpetrate human sacrifices to a certain goddess, who is said to prefer, in that capacity, a Brahmin learned in the Shastras In public situations many of these Kurradas are known and respected as intelligent, charitable, and humane individuals, who most strenuously deny the present existence of the practice The Concan Brahmins, however, are generally

disclaimed by those of the rest of in dia; but they have long composed a large majority of the ruling characters In the Viaharatta empire When a translation of the Lord's Prayer into the Concan language was examined by the missionance, ther found that of thirty two words which it contain ed twenty-five were the same as in the Bengalese and I lindostany tran is tions, besides several Sanserit words.

The lobabitants of this coast from the earliest antiquity hard been not ed for piracy, and in the eighteenth century exercised this vocation on all ships indiscriminately that did not purchase passes The Angria family at one time possessed nearly the whole province and in 16°0 still retained about three lacks of revenue In 1756 they were expelled from several of their principal puratical porta by Admiral Watson and Colonel Clive In more recent times three-fourths of the Concan have been directly subject to the Visharatta Peshwa on whose extinction in 1818 they derolled to the British government and from hence a large proportion of the Bombay arms Is now recruited A large proportion of the inhabitants are conune Hindoos, and the practice of widow-burning is here more common than in any province of ilindostan except Bengal In 1821 the number amounted to fifty; in 1823 to fifty-eight besides those concealed and prevented. At present the whole territory is aubordinate to the Bom hay presidency and subdivided into ern Concan - (Liphinstone, F Bacha nan Orne Danlop &c )

CONCAN NOSTHERN.-A British district in the province of Bejapoor, remarkable with the southern dis trict for the ostonishing number of hill-forts fortified heights, and fortresses which it contained, when conquered by the British in 1818 They were found in a most neg lected condition no expenditure for repairs of walls huildings or reser voirs having taken place for more than twenty years The following

names of some of the principal ones are recorded as the whole will prohably soon be forgotten

Those on the sea coast were Bassem Arnalia helvy, Mahim Sere gaum Tarrapoor (large well-conditioned and close to the sea-shore). Cheeclan Dhanco and Omergong mostly constructed for the protec tion of the coasting trade against pl rates and soon offer the Brits h conquest ordered to be absoluted or demniished

The principal fortified belahts were Gumbheerghur, Bergwat Assewah, Boputghur and Parbhuol varying from 700 to 1 200 feet in perpendi cular height, and of catremely diffi cult access that besides these there were twelve others of no use in a military point of view the greater part of whileh were ordered to be de-

stroved

The priocipal midland forts were Gotowrs Tookmook Goje Vicknt ghor, or Paid Shooly Mulinghur and Asurce The three last were deemed by the natives impregnable but under the British domination become quite useless and were ordered to be destroyed.

The frontier forts situated on the ghants, or Sydershee mountains, were Byramghur Gornekghur, hotulalmr and Sid hur which last commands the Garcedharry pass These ero perpendicular rocks of great height commending different passes, and scarcely accessible indeed, much labour must have been expended in entting ateps into the solid rock by which these fortified beights were ascended and also in provisioning them their immediate neighbourhood from its extreme ruggedness being generally unlahabited From the Duntoors river to the Damaun Gue the northern boundary of the zil lah and o distance of seventy three miles there m an executent road un equalled perhaps for such an extent,

in the whole world The tract ceded to the British government by the trenty of Poons os far north as the Domaun river, con stituting the then northern boundary of the Concan, were annexed to Salsette, and designated the Northern Concan District; the revenue in 1817 was estimated at fifteen lacks of rupees.—(Elphinstone, Capt. Dickenson, &c.)

CONCAN, SOUTHERN -A British district in the province of Bejapoor, which contains about 7,000 square miles, and presenting to a cursory observer little else than bare hills, rocks, lavines, chasms, jungle, and mountains. It is scharated into nine grand divisions or talooks, the northern and southern boundaries of which are some considerable streams, flowing from the mountains to the sca. Each talook yields from 40,000 to 200,000 rupees annually, and is itself composed of smaller subdivisions named mahals, tuppahs, maumlahs, and turuss. In 1821, 2,249 villages were in the sole possession of the British, others were held in conjunction with petty chiefs, and many were mere clusters of thatched mud huts.

The land assessment has remained. with little variation, as it was, and the grain rental has hitherto, according to immemorial usage, and in conformity to the custom of the Concan, been received in kind. In 1821 the estimated official value of the grain was 4,44,691 rupees, and the collector was of opinion that the government did not take more than one-third of the gross produce Rice composes fourfifths of the whole grain production; the remaining fifth consists of naglee, warree, oil grains, &c, but no wheat. Besides these, sugar-canes, turmenc, ginger, dal, &c. are raised. In 1820-21 the population of the Southern Concan was reported to be as follows: Hinda F00 T00

٠	Hindoos	532.183
-	Mahomedans	41.132
	Mhers, Dhers, Chamars,	,,
•-	Maungs, and other	
•	impure castes	57.292

Concan:

1818-19 ...... Rs. 8,27,933 1819-20 ....... 13,20,154 1820-21 ....... 11,64,433 (Elphinstone, Pelly, &c.)

Conchon (Canchana, golden).—A town in the province of Bengal, district of Dinagepoor, eighty-four miles N.N.E from Moorshedabad; lat. 25° 15' N., lon 88° 42' E.

CONDATCHY - A bay in the island of Ceylon, situated about twelve miles south from the island of Manaar, and the most central rendezvous of the boats employed in the pearlfishery. The oyster banks are scattered over a space in the gulf of Mauaar, extending about thirty miles from north to south, and twenty-four from east to west, and the boats with their crews come from Manaar, Jafna, Ramiseram, Nagore, Tutecorin, Travancore, Kilkerry, and other parts on The shape of the the main land. oyster is an imperfect oval, nearly the same as a cockle, about nine inches and a half in circumference, and not good to eat One oyster, including seed pearls, has been known to contain 150, while 100 oysters have been opened without the discovery of one. It is said to attain maturity in eight years, and not to admit of transportation from its native beds. The depth of water is usually from five to seven fathonis; some divers perform the dip in one minute, others in one and one-third, and scarcely any exceed one minute and a half submersion Two millions of oysters have been landed in one day, and one boat has been known to bring 33,000, while another had not 300, the undertaking being much of The pearls are sorted by à lottery being passed through the holes of brass sieves of various diameters pearl-fishery cannot be reckoned on as a regular source of revenue, as the banks become exhausted, and it is interrupted for a series of years, according to circumstances. After a

long Interruption it has been known to yield whose £100 000 for three successive years.—(Perhaer, I erei vol. Labert Sc.)

Counsester (Constant ) .- One of the fire or mel northern Lucier but now, the Pilote for the most part comperhended in the Ma al maiam collectorship In 17+3 the area of the two was estimated at 3,400 square mics, exclusive of the fully region to the west. By the Slahomedens this distaion to exerced Me staphameur, under which appellation le is reconted to these revenue books The river Coputs r which separates the Condapilly Circut from Ellore and Haramondry, lea calt water river, and contributes targely to the resemue of the collectors e, being accress o at flood-tides for boats as far as Colar and containing abundance of & h It also earners off the surplus wa ere from the Co air late and after many windere at last joins the sea fetween Famaldan and ( n lapollam There are dismond mines within the I mits of Cordstally, but for many years they have not produced any profit enter to government or to jents e Individual treat at 1 epoch. Rennell &c )

Cornertty .- The sterent expital of the preceding Livery almosted in lat 16" 77" by lon 60" 33" log first nine sules > 11 from Mavulipatam This place many years are was a hill fortified in the Indian style of con siderable attenuth but now like many other native strong holds, shorn of Its beams and suffered to crumble into ruso It appears to have been first wrested from its natice lindoo princes by the Bhammer savereigns of the Decean about A D 1471, and became possessed by the Briti h sings with the northern Circurs in 1705 Travelling distance from Hyderaliad 142 miles; from Madras 100; from Augnoor 370; and from Seringapatam 141 mies - (J Great, Fernita, Reanell, 6e)

Cornavia (Canadorir).-A town in the northern Circurs fifteen miles

11 by 5 from Ganloor 1 let 16' 13

Consecouser - A small town on the co-cos t of the Comule destiet of Tinnerelly, thirteen miles L. by 5 from Cope Commonny lat. b" 6 %, lon 72" of h.

Coverte (or (alvir),-A town in the produce of Gandages situated letuten a high rocky bill and the south back of the Mahanpilly river 1,033 feet above the level of the sent let 20' 30' \ lon +" 1 F On the aumust of the hill, in 1794, there was a small fat tommting two gons The country a'unt Conkar le much covered with high woods and the town surrounded by bills labelifed be wild Cond mountaineers this be log one of the tracts of the at reighnal Hayas of Cundwara. The frontier of the Bu tar er urter la twelve miles di tant from Cockuir and le entered through the Tillsghaute a sees steep and rugard pass aver the hills -(J H Black, Se)

Court Hives.—This is the most considerable mountain stream between the Teerts and the Load Inters, and is said to have its source close to mountains. Correct with perfectual most if it does not actually penetrate into Thet. It enters Bernal in the defict of Porneab, where it is in the Valbramada which also absorbe its name. In the ran y reason it can be accorded by small bests to a considerable du tance and it is found very useful for the floating down of timber.—If Backanes &c)

Conservant (Canchipara, the coders eight—A considerable town in the Carmule district of Chingle-put forty-eight miles SW from lis dras list 12\*40° N., lat. 70\*41° F. This place is built in a very stra, gling manner and more resembles a connected series of handsome and spacetows tillages, interspersed white extensive gardens and cocoa-mut plan rations, than a town It stands in a valley, and covers a great space of ground being from five to six biles in length, and interably populans

Round the whole town is a boundhedge, chiefly of the agave americana, formerly useful in keeping off the bands of irregular cavalry that follow The small river Wc-Indian armies gawutty, that winds along the western skirts, contributes much to the ferthity of the valley, and there are besides many substantial tanks, the whole having a prosperous appear-The weavers are a numerons class, and the fabrics principally red handkerchiefs, turbans, and cloths adapted for the dresses of the natives.

The main entrance to the great pagoda, dedicated to Siva, is lofty, and resembles in its shape and ornaments that of Tanjore On the left, after passing through it, is a large edifice like a choultry, which the Brahmins assert contains 1,000 pillars, many of them handsomely sculptured, and several of the groups composed with The sides of the considerable skill steps leading up to it are formed of two well-carved clephants drawing a The view from the top of the great gateway is uncommonly fine, consisting of extensive woods, intersected by a large sheet of water, numerous pagodas rising ainidst trees, and a magnificent range of mountains But although this be at a distance the most imposing edifice, it is not the temple most highly venerated, or the most curious in respect to workmanship, in which respects it must yield to the pagoda dedicated to Vishnu Conjee, which, in fact, originally conferred the appellation of Conjeveram. In this last, opposite to the door of the sanctuary, is a remarkable pillar of gilt copper, of modern erection, about a foot in diameter, and the sculptures of a choultry within the area are scarcely surpassed by those of any other Hindoo edifice, either for proportion or delicacy of execution Many smaller pagodas, dedicated to various Brahminical deities, are visible on all sides. and there are whole streets of choultries, with which the adjacent country also abounds — (Fullarton, Lord Valentia, Salt, Heyne, &c)

Contanagur (Cantanagara)—A town in the province of Bengal, district of Dinagcpoor, 112 miles N by E. from Moorshedabad, lat. 25° 44′ N, lon 88° 43′ E. This was formerly a place of some note, as is indicated by the remains of mounds and ramparts still visible; but it is at present only remarkable as containing one of the finest Hindoo temples extant in Bengal, where most of these edifices are of a very inferior construction.

Cooch Bahar (Cuch Vihar) -A small principality, long dependent on the kingdom of Bengal, and attached to the district of Rungpooi, situated at the north-eastern extremity, between the twenty-sixth and twenty-seventh degrees of north latitude This westein division of the ancient kingdom of Camroop, formerly comprehending the whole northern tracts from the Chonkosh river to the Mahananda, and from Ghoraghaut to the monntains of Bootan, extends in extreme length about ninety, and in extreme The mobreadth about sixty miles dern territory of Cooch Bahar forms the boundary of a large postion of the Rungpoor district, and is partitioned into sections and divisions, in a very confused manner The Cooch Bahar raja also possesses some tracts beyond the Mogul limits of Bengal, and not hable to tribute The northcrn extremity of this principality was settled on Siva Singh, of a family from which the rajas were obliged to choose their prime ministers. This portion, as producing an income of 32,000 inpees a year, was called Battrishazary, but the general name given to the whole principality was Bahar, and, to distinguish it from the large province of which Patha is the capital, the term Cooch has been prefixed, although particularly disagreeable to its princes, who, having in modern times set up for Rajbangsies, wish to sink all remembrance of the Cooch tribe.

The nature of this country is entirely the same with that of the adjacent parts of the British dominions,

and the man recreat of the fage a es ates become t the frontier entirely resembles that guranal in the estates which belong to the rale a a cen n dar of Beneal. The countriese be tures the two term nears 1 on a sees good footing there being entre the those whatevers but every le cultianted to a classe on estent that It eridentle I Inten led for contralued purposes. The southern parts in of Cooch Haber lain alon, the tierr Hutlah Is a h Hy log med and ferti e countra ; but to the north of the town of Rahar the country has a most emeral to appearance the land been low and marshs intersperial with thick lingle and many nullaha The seleta inn is course and the group I every where e' oaked im with rank gra a reeds and forms in 1744 the total term orial area was ea cu late I at 1,300 miles

The me t parterus and important to be in this part of the ancient Camand all such liceralers as are under the lefuence of their ellefa, called industrimente's Cooch and Hailur al and the saldiershins and interction a which they themselves have introulla stem en leathbace eta betch cions of vanits the whole being thought low and Impaire Ti a oga mon I exceedingly dus receive to their chief and repected y to their misces, who presend to be of dielee on in and many of whom cherric the Hiedoo law with such purity that In their own territory they are allowed to be real Sudray; but the Hen alese hold them in the utmost bome of the Coorli or contempf Hay'mned chiefs pretent to be de-scended from the labetrice who escaped the massacre of Parava Rama by flying to China.

One inthe named the Pan Cooch remain in a very rule state of society and are still thinly scattered along the north-eastern prits of the llun poor district. Assum and the lower parts of Biotan. By their religion they are permitted to eat while goals ducks sheep deer, buffichess fowls and they sometimes amare peacocks and they sometimes amare peacocks.

the the other hand, they do not ent beef and the cet does cale, from and an kee which are used I women ther of the made tithers. There I kee and rank are of recit the reserve of three of the II choose and approach near to hastegene notions. These think a rean hours the more he can indule hit appearure on which account they acknowledge the emperiority of their he II wite, as being catters of dogs and live?

The Cooch at least all of them who have adopted the Brahminical relation and have trim jushed their imputa practices a sume the titles of Haftanguer or descendants of princes which has also been assumed by several other rade tribes of Camtoop and Clin, such as the Merh and Hapire who, I saleg followed their example in religion, have as omed the same title that although all the Ilafran les are not Louch still by far the greater portion are of that tube. The hisen are the only tribe of Larroop that the Brahmint of Iten a' will admit to be pure Sulras which in see the great power their emices must at one time have posseried t for except the Countrop Brahmine no other person of the sacred order would disch water from the lands of the Looch Bahar tops Harm les, although they are all to perteral willing to admit the disine on in of his family, and his own extraordinary sanctity. This person who reigned in 1607 was considered by the natises as a very mous person for the following reasons: he pail no attention to bu mess but pushed the whole of his time in retirement ant, as was supposed, much of it in prajert be the this, he expended much of his income in supporting persons iledicated to a religious life. while he neglected his temporal duties to the great detriment of his subicciat act he was said to be naturally well-de posed and destruits of tendering justice The natives supposed that the gods had bestowed an extraordinary reward on this prince by endowing him with supernatural vigour; but to I propeans who had intercourse with him he appeared a poor creature, exhausted by drunken-

ness and debauchery.

The proprietor of the pergunnah in 1809 was a descendant of the daughter of Cooch Hajo, claimed a divine origin, and assumed the name of Narayana or Nairam. According to his genealogy, Viswa, the son of Siva, had three sons The two elders were ancestors of the Rajas of Bahar and Bynee; the youngest of the Pangga branch, which, having had many of their domains violently dissevered, retired to the forest, where they fortified themselves with a bamboo jungle, and led a savage kind of lıfe. In 1809 the raja was only eighteen years of age, but called more by his people, to procure the management of his affairs. He never could be induced to dip deeper in literature than to learn to sign his name, although his mother used many endeavours to persuade him, and the collector having once caught him by surprise, gave him suitable admonition. his answer was, that he was a raja, and ought to give himself no sort of trouble He had not even received the usual religious instruction, and cannot, therefore, spend any time in prayer or ceremonies, a usual resource of Hindoo princes He rose about eight against ennui o'clock, passed an hour in cleaning himself and eating; he then went out to kill game, chiefly with poisoned arrows, in the preparation of which he was very skilful; in the afternoon he played at draughts or chess, and then went to bed

Bykantpoor, although a part has been alienated to Bootan, is still a very fine estate, and contains the two whole police divisions of Fakeeigunge and Sanyassigotta, and has been added to Bengal since the acquisition of the dewanny in 1765. The proprietors assert that they are descended from the god Siva, on which account the members of the family assume the title of Dev, and return no salute made to them, by whatever rank. The Cooch tribe still compose by far the greater portion of the original inha-

bitants of Camroop; and one class of that tribe, the Pani Cooch, which has not adopted the Brahminical customs, still preserve a language totally different from the Bengalese. By the latter they are often confounded with the Garrows. The early priesthood of the Cooch tribe were named Kolitas, who maintained a great influence over their rude flocks until the introduction of the Brahmins, who were adopted as spiritual instructors by the principal chiefs, since which the Kolitas have mostly adopted the Hindoo religion, and rank as pure Sudias, yet both they and their chiefs occasionally revert to their old tenets, and return to the guidance of the unconverted members of the ancient priesthood The converted Kolitas adhere to Krishna, and have of late been very successful, especially in Assam, where they have not only converted the sovereigns of the country, but also many ignorant tribes of Rabkas, Garrows, and Mech. lower classes in the north are so extremely indigent, that some years ago it was their custom to dispose of their children for slaves without sciuple, and although this traffic has been suppressed, and provisions are cheap compared with other districts, yet the poverty and wretchedness of a great proportion of the population are extreme.

When the Mahomedans conquered this division they appear to have rendered the office of zemindar heredi-Some of the estates continue to be managed by the raja, some by branches of the family, while others continue to be held by the descendants of different officers, on condition of performing certain duties. In the whole of Cooch Bahar, the maximum of tent fixed by the settlement is much lighter than what the proprictors exact from their tenants, which arises partly from their desire of keeping a low rental lest a new assessment should he made, while they trust for their own profit to private contributions. The high rate of the maximums strengthens their hands, as they can at any time compel a tenant to quit a farm or pay the

maximum, no leases being granted to new settlers and these only give the tenant a right of perpetual proscesson according to the trgulated assessment I armeria the rapa's fem is resided at Blantpoor, where there was little cultivation scattered among wood while all the more southerfu portion of the principal to was mergrown with reads and bushes, ercontared as a defence age nit the Mehomedane On the sirray of the Mogul power, Dharms I al left Bake tpoor artifed at Jelmsory, and began to clear the jungles of the south which are now cultivated; while the spr to among the woods that were formerly cultivated are now neglected and returning to a state of natore The tents are very law probably owing to the vicinity of the Bouten and Sepaulese territones, where there is much we to land, and a large propertion of the tenanta are con taoth charging from the one to the other Among the rude tribes the bor cultivation (which is a marked dutiretion in this greater of Ind's murking the stage of civilention) still subsists, and with this implement it is supposed a men and bit wife ean cultivate as much land as a man with a plough and two over, being about five actes.

The reigning priore, in 1409 named liarindra was said in the the seventeenth in succession of the twesent family, but the early history of the country is much insolved in falle to 15 2, Abul Fazel describes the chief of Cooch as a powerful some reign having Assum and Camroop under his subjection and able to bring into the field 1,000 horse and 100,000 foot. According to the testimony of Vichomedan Instorians during the reign of Actier, about A 1) Cooch Bahar was the sovereign of a territory bounded on the cast by the giver Brahmanutra on the south by Goraghaut on the west by Tichoot and on the north by the orountains of Tibet and Assam flis army they ex agreeated to the number of 100 000 infantry 4,000 cavalry, 700 elephants, and 1,000 war boats Notwithstand-

les this enormous military force, be volontatily became a vaccal to the Imperor Arber which offending his subject and chief men they relicited against him, and compelled him to request assistance from the Mogul emerpor of Ben, at which W 24 readily granted as it afforded an apporturity of exclusing this re-ion, with a tiew to he future subprestion This last event took place in tool, when it was conquered by Meer Jum to who in compliment to his soreteren changed the name of its cepital to Alumgrer Sugger which It did mette good ton Nichometian fanni chim bring then in full bloom, bo de troyed the Hindon temples, broko in preces a celebrated image of Sarajan (bahnu), and converted the son of the rais who was on lad terms lo every other reswith his father pect he administered strict justice to pr be I plumlerers and other uf enders Having completed the conquest and artiful the influte of Looch Behar (which then comprehended a large tract of country) at ten lacks of ru pers anoually, he proceeded to at tempt the conquest of Assam where he falled. Hunne these wars that Luoch princes are autroped to have erected the line of fortification alone the southern frontier which still remains ; but, ble all smiler structures, It pround an ineffectual protection

Along whit the cert of Beneal the Mocul rights to this tract of country devolved on the La t India Company in 176.; but was little noticed antil 1772 when the Cooch Bahar raja ary hed to the collector of lionepoor for amutance agmost the Bootsoners who had reduced him to the last ex tremity and offered through his minister, hater Den to pay an annual tri bute of half his revenor and to render his country again subordinate to Bengal. In deliberating on this offer, the peace and security of the adjacent British territories were more to be tonsidered than any pecuniary advantage to be derived from the new ac quieltion as prior to this period tha Rungpoor district had been much

exposed to incursions from Bootan, it became therefore a matter of duect interest to embrace any opportunity that offered of expelling these marauders, and confining them within the limits of their own mountains. Under this impression the proposals of Nazir Deo were agreed to, and Capt. John Jones was ordered to proceed, with four companies of sepoys and two pieces of cannon, which expedition he conducted with much skill and energy, defeating Dorpo Deo, a rebel and emissary of Bootan, and cantilling the town of Bahar by assault, thereby greatly intimidating the Bootanners, who fled on all sides to the hills, where in 1773 they were pursued by Capt. Jones, who took from them the fortress of Dellamcotta. The Bootan ruja from being the aggressor, now became alaimed for his own safety, and applied to the Teshoo Lama of Tibet, through whose mediation he obtained a peace. In arranging its conditions, great favour was shown to the Bootanners, probably with the view of gaining their friendship, and obtaining commercial advantages, neither of which ever took place.

In 1787 great confusion and rebellion agitated this petty state, which led the Bengal government to institute an inquiry into the causes of these commotions, and also relative to the existing condition of the territory. A commissioner was in consequence deputed in 1789, to take upon himself the exclusive superintendence of the raja's estates, to collect the revenues, pay the annual tribute, and after defraying the current expenditure, retain the surplus for the raja's benefit The latter, then a minor, was at the same time informed that the British government, in assuming the temporary management of his affairs. did not intend either to increase his tribute, or to deprive him of the rights and privileges guaranteed by the treaty of 1772, the object of their interference being to preserve himself and country from the artifices and peculations of ignorant and designing Under this arrangement the Cooch Bahar territories continued

until 1801, when the raja having attuned his majority, the office of commissioner was abolished, and the transaction of revenue matters committed to the collector of Rungpoor. During the above period strict tranquility prevailed, the revenues were collected with regularity, and the property of the state so effectually preserved from the impacity of its own servants, that after defraying the public expenses, civil and religious, on a most liberal scale, a large sum was accumulated for the benefit of the raja and invested in the British funds.

A very different pieture was exhibited when the commissioner was withdrawn. During the raja's minority, the government had entertained hopes that, by study and application to business, he would qualify himself for executing the duties of so important a charge, but these expectations were disappointed, for to a natural or acquired imbeculity the raja added a most violent and outrageous temper, where he could not be resisted, nor did he ever suffer the miseries of his subjects to interfere with or disturb the low and childish pleasures to which he was addicted, Had the mischief been confined to the raja's own territories, a cold and unfeeling policy might perhaps have suggested, that it was not incumbent on the British government to interpose in the affairs of a state, which had been recognized to a certain degree as independent. The effects, however, of the above evils were felt within the limits of the British districts, banditti and other disturbers of the publie peace frequently committing robbery and other outrages, and then sceking a secure asylum for themselves and plunder within the boundaries of Cooch Bahar. Besides this, so far from any surplus revenue being realized, it was with the utmost difficulty the different instalments of the tribute due to Bengal could be liquidated, and the raja hunself had scarcely the means of subsistence, while his public officers were amassing fortunes by embezzlement and extortion.

The Bengal government was fally ten 'lie of the evil that were likely in arree from leavie, il e adedicitration of affairs exclu irely to the rays; but was arcrec on the principles ad good faith to a une the interest management of the principality with out the acquirecence of its chief In officer was in consequence steputed for the impose of communicating with the rain, and of endeavening to obtain his consent to the introductum of the Bengal revenue and fidi eral regulations, with such modificatrone as local circumstances and the dignity of the rais might suggest t but all his efforts to procure the raja a consent were without avail, and he was la coosequence withdrawn. Annther was despited in 1803, with the like had specess, the rais monifesting the otmost repugnance to the proposed arrangements, while his miseraide autorers ordereded the British government as participators of his estorilos. All Interference haw ever, further than remon trauce was abstaceed from until 1417 when the anarchy of this state had a tained such a height that it was no longer possible to po on. As experience forming the administration through the medium of the collector of Hungpoor wa perfectly hopeless, it became indispensably necessary to recreate the office of commissioner nearly on the footiog of 1403 The governor general also addressed the rais, remonetrating stroo, by with him on the neglect of his public duties, and of his Insulting and contumacious conduct towards the officers appointed to ocgociate with him. In addition to three acre of insubordination the rais had the felly to withhold the payment of the customary tribute and not only to musppropriate the allowance fixed for the family of Nazir Dec, but also to usurp the lands allotted for their residence and for that of Dewan Deo in these com motions one of the latter's dependaots was murdered when the rais lostend of facilitating the apprehension of the perpetrators, opposed TOL 1

every classic to the procession of the inquiry

Whatever doubts may exist regardin the rights mutosly understood If the contracting parties to have Leen conveyed to the British government by the words of the third article of the treaty of 1772 as far as relates to the raja a independence within the limits of internal jurniliction the grperal tenor of that treaty placed Cooch Bahar in a state of absoluto dependence on the finish power and the reservation of a molety of the revenues for the rays was sobjected to the cond time of his conti nuing from in his allegisnee to the Last India Company The rays ageneral conduct having been otterly incomment with the duties of subjection and allegrance he might be copaldered as having riolated bis engagements, and consequently forfested his rights of term ornal sovereignty, by directarding the conditions under which they were recognized; but as It would have been too severe to earry the punishment to extremity k was determined to healt the later ference in the interior admiol tration sette's to the degree which might be necessary to preclude the recurrence of any acts of gross outrage or oppression. In fortherance of this object he was ordered to dismiss his dewen and moonshee the appointment of the first-mentioned officer being in future subjected to the approval of the governor-general. To the proposal for the introduction of a sysem of criminal jurisprudence to be administered in I to name but through the agency of the British commissioner the raja gave a conditional CODIENG.

The amanot of tribute paid to the Bregat portunent in 1814 was 62,722 rupees per sonum; but its 62,722 rupees per sonum; but its injudation could never be procured without the greatest difficulty. In 1818 the arrears amounted to 71,500 rupees remaining due by the raja, who, although fully able to discharge them was accusted by such a blind confidence in the forbearsnee of the British government, that he combined to the procurement of the printle government, that he combined to the procurement of the printle government.

nually evaded the settlement, until threatened with instant sequestration, when 60,000 rupees of the money was produced; but he still persevered in endeavouring to clude the payment of the remainder. In 1822 the arrears due had again accumulated to 51,735 rupees. The rajas of Cooch Bahar reckon by the era of their ancestor, Viswa Singh, and suppose that he began to reign about A.D. 1509, which is probably earlier than the reality. — (F. Buchanan, Public MS. Documents, Turner, J. Grant, Stewart, Pierard, &c)

Coolies,—See Gujtrat Province, Many Kaunta, and Baroda.

Coolasgnum (Callasghar). — A town in the Carnatic province, eighty-four miles W.S.W. from Madras; lat. 12° 45′ N., lon 79° 8′ E.

Cooloo.—A district in the province of Lahore, which stretches along the north bank of the Sutuleje, from below Koomharsem to a few miles beyond Rampoor, the capital of Bussaher. The natives say it is separated from Chamba by the Pariyat mountains, and is also watered by the Beyali. The aspect of these hills, which descend abruptly from a lofty height, almost immediately under the snowy cliffs, is peculiarly dieary and barren, presenting nothing but craggy precipices and sharp peaks, projecting through the scanty soil that adheres to the rough brown rocks The only cultivation to be seen is adjacent to the petty forts and villages, enclosed by a wall or hedge, but sheep pasture, in the proper season, is said to be abundant In 1815 some traffie from Tibet passed through Sultanpoor, then designated as the capital of Cooloo, of which state Raja Bickiam Sen was chieftain, but was himself tributary to Runjeet Singh of La-He also had two small barren peaks within the British line east of the Sutuleje, to which, as eventual asylums, he attached a disproportionate importance -(Jas. Fraser, Lieut. Ross, Public MS. Documents, F Buchanan, &c.)

Cooroo.—A town in the province of Orissa, eighty miles S.E. from Sumbhulpoor; lat. 20° 31′ N, lon. 84° 39′ E This is a considerable inland mart, the Berar merchants bringing their cotton to Cooloo, from whence they return with a load of salt to the interior.

Coopang.—A town in the island of Timor, situated on a large bay, twelve miles wide by twenty deep, formed by the island of Semao to the south-west, and a point of Timor to the north, lat. 10° 10' S., lon. 124° This bay is exposed to the westward; but from the beginning of May to the end of October the anchorage is secure, and there is little to apprehend from N.W. winds after the middle of March, or before the middle of November. In the vicinity the upper stone is mostly calcarcous, but the basis appears to be argillaccous

This settlement was formed by the Dutch so early as A.D 1630, but it never attained any prosperity or importance, in fact, their territory never extended five miles beyond Fort Concordia During the revolutionary war that terminated in 1801 the communication with Batavia was interrupted, and the town taken by the British, an insurrection having been raised by the half-caste natives, who massacred some of the garrison, expelled the rest, and set fire to the town. Fort Concordia stands on the south side of the bay, and is usually gairisoned by a few Malays commanded by a serjeant-major. A small foreign commerce is carried on with Batavia, but the peculiar traffic of the port is conducted by the Chinese who are settled in the town, and intermingled with the Malays. Vegetables are high-priced and not good; but cocoa-nuts, limes, bananaes and shaddocks are plentiful. The animal food procurable consists of young karabow or buffalo, pigs, kids, ponltry, and other articles retailed by the Chinese and Malays. The climate here is very destructive to European constitutions, but it is not

so coosidered by the Dutch, probably on account of its being comparatively loss destructive than Batasia.—(Capt Flunders &c.)

Cooso (Coduna) - An ancient Illindoo principality attusted among the western glisuts between the twelfth ood thirteenth degrees of north latitude and at present partly onnesed to the British pravince of Malabar and partly comprehended in the Mysore raid's territories. The Coorga country is considered to ex tend from the Tambacherry pass on the south to the river ifemorutty on the north and presents a succession of hills and valleys, in many places open with some seattered trees nod ahrubs in others wild and woody shounding with all sorts of game wild elephants and other bearts of the firest. The country from Soma warpet to Markeree a distance of mineteen miles is a complete wood and the mountains in the vicinity of the latter are covered with thick forests where soudal ond other valua ble woods are found Bound Mar Leree the bills form an amphithen tre where the different roads enter through gateways across an old line and ditch, estending all slong the tops of the ridges a Coorg rays, before the country was subdued by Hyder having made ahedge and ditch along the whole extent of the eastern boundary of bu dominions. A con siderable tract beyond this line was reckoned neutral and still continues desolate. The Covery has its source in Coorg and the Toombuddra omong These two the Bababooden lulis great streams usuing to the custword, ore obliged by the inclination of the mountains to pursue that course olthough much nearer to the western Indian Ocean The Carery after o a circuitous route finds its way to the biy of Bengal while the Toom budden proceeds north-cast and joins the Krishna

The values here ore cultivated with rice which this region yields esuberantly but the quomity of land under tillage is insignificant when

compared with the extent of surface Cattle are abundant the pasturage being excellent; but the manufactures are almo t limited to the hieractures are almo t limited to the hieracts they wear their cotton cionis being imported. Among the hills and forests are some wild tribes whose complexions are not darker than those of Spannards or Portuguese which may be owing to the cleration of their forests, only to the torrests, of the his torrests of rish that fur so great a portion of they grey prour from the clondy atmo-

pliere The Coorgas are a subdivision of the Nale caste and of martial habits. Itajas of Coorg (named the Vir Ita 124) ore mentioned by Perishto as independent princes so early as A D 1583 and the formly possesses biographical histories of their rajas sinco 1632. For a long time Hyder at tempted in vam to subdue them until a dispute about the auccession arose when he offered his mediation and hy the destruction of one family and captusity of the other, he got noscession of the territory In tho jear 1770, I inga, raju of Coorg died, and Hider excluded Beer Raindra the legal heir, then o minor coofined lilm in a Vivore fortress massacred and expelled many of the Coorgas, and partitioned the country into schires among a number of petty Vishomedan lenders Tippoo had the young raja circumcised and during his captivity the country was a continued scene of devastation and bloodshed occasioned by the discontent and insurrection of the people In 1787 Beer Ranndra made his escope from Periopotom and returned to Coorg, where after a series of years and many vicisitudes he succeeded in expelling the invaders and recovering his hereditary dominions

From this era the constitution of Coorg moy be understood to have commenced on o new foundation, the onecent having been nearly abrogated by the long domination of the Mahemedans and the expulsion of the legitimate londed proprietors By his perseverence Beer Rejindra 2 2 2

restored order, and conciliated the affections of the mass of his people. On his decease, in 1808, he left his dominions by will to his daughter Dewa Amajee, then a child, to the prejudice of his brother Linga Raja, and contrary to the ancient usages and customs of the country, as well as to the texts of the sacred writings. According to the latter, the succession should be first the son, and then, if no son, the son's son, and failing him, the brother of the deceased. In addition to this document, no precedent could be found that any female had ever held the reins of the Coorg sovereignty, although in the contiguous and ancient Hindoo principality of Bednore, a female sovereign

or ranny had always ruled. The infant princess was, however, placed on the throne; but in 1810 the Bengal government received a communication from Linga Raja and the Ranny Dewa Amajee, conjointly intimating that in consequence of the voluntary abdication of the latter, Linga Raja had assumed the permanent administration of In consequence of this intelligence, measures were taken to aseertain the claim possessed by the Linga Raja to the succession, and also the wishes and sentiments of the chief persons belonging to the principality. The resignation of the young ranny at her tender age could not be considered as spontaneous, and the Linga Raja's assumption of the sovereignty could derive no title from the renunciation of an infant. At the same time the British government could not be considered, by a mere testamentary devise of the late raja, to support an order of succession hostile to the laws, prejudices, and wishes of the people, and under the possible contingency of being obliged to employ a military force in prosecution of the object. The result of the investigation was favourable to the claims of the Linga Raja to Coorg, the inhabitants of which were also inclined to the establishment of his pretensions, which were accordingly acquiesced in by the Bengal presidency, and a despatch addressed to him, announcing the determination of the British government to recognize his title to the sovereignty. A provision of nearly two lacks of pagodas (£80,000), which had been vested in the Company's funds at Madras by the late raja, was made in favour of Dewa Amagee and her sisters; and of four lacks of rupees held by the late raja in the Bombay funds, two were secured for the little lanny and her sisters, as a suitable provision, by the eare of the British government. The other two lacks in the Bombay funds appertained to the Soonda Raja and his son.

Like other Nair countries, Coorg possesses few towns, or even villages, of any considerable size and population, the Coorgas preferring their wilds and jungles to the busy hum of Penapatam was formerly the capital, but in more recent times the village of Mercara, twenty-five miles south of Poodicherm, has been the principal residence of the raja's fa-About 1785 Tippoo built a mily. strong fortress within the limits of the district and called it Jafferabad, but it has long since gone to ruin.-(A N. Cole, Public MS Documents, Dirom, F Buchanan, &c)

COORHUT (or Choorhut)—A town in the Allahabad province, thirty miles E.S.E. from Rewah, lat 24° 29' N, lon. 81° 47' E. It is governed by a chief named the Row of Choorhut.

COOSERA (Cusara)—A town in the Bahar district, fifty-four miles S.S E. from Patna; lat. 25°6′ N., lon. 85° 47′ E

COPARA—A fine village in the province of Bejapoor belonging to the Raja of Satara, about twenty-seven miles N. by E. from the town of Satara.

Copaul.—A fortified town in the province of Bejapoor, about twenty-one miles west from the ancient city of Bijanagur, lat. 15°19′ N, lon. 76° 10′ E. This was reckoned one of

COMPRIANT A Place in the pretince of Helphoor, situated on the N I aids of the Recombiner seresteen when I N I., from Phomas Lat 187 N., fon. 747 IV L. It I composed of a number of house, with

stone walls round the gardens, and but for the want of water, which can only be had from the liver, is very defensible. A detacliment of British troops under Captain Staunton, consisting of a detail of the Madras artillery, the second battalion first iegiment of Bombay native infantry, and about 300 auxiliary horse, were attacked here on the 31st Dccember 1817 by the Peshwa's army, estimated at 20,000 horse and several thousand infantry, mostly Arabs. most desperate struggle ensued between this handful of men and Bajerow's whole army, under his personal command, and viewed by him from a height The action commenced a little before noon, and was not over until nine in the evening, during the whole of which time the British troops remained not only without food, but without water. By the evening all the British officers had been either killed or wounded except three, yet the enemy were driven out of every position in the village they attempted to occupy, and by nine o'clock completely desisted from the attack. The next day was passed under arms, the enemy still hovering about the village; but on the 1st of January 1818 the detachment made good its retreat to Seroor, with both the guns and all the The discouraging circumwounded stances under which this action was fought, the ground having been just occupied after a long and fatiguing march, and the troops forced to fight without food or water, gave the defence a character of desperate deteimination scarcely to be equalled in history —(Prinsep, Fitzclarence, Public Journals, &c)

Corsee.—A small town in the province of Bejapoor, district of Ryebaugh, lat 16° 40′ N, lon 74° 50′ E. This was formerly a Mahomedan town of some note, but latterly, under the Peshwa's government, so much oppressed by the Maharatta Brahmins, that most of the faithful withdrew, although the relics of a celebrated Mahomedan saint, Seraje

ud Deen, he interred only one mile east of the town. The river Krishna runs here in an easterly direction, in a bed about 500 yards from bank to bank. This is one of the towns which during the Maharatta sway enjoyed the privilege of killing beef for sale.—(Moor, &c.)

Corundowar.—A small fortified town in the province of Bejapoor, division of Colapoor, belonging to the Putwinden family, situated at the junction of the Panchgunga river with the Krishna.

Cosi River (Kausiki).—This river has its source in the Nepaul hills not far from the city of Catmandoo, from whence it flows in a south-easterly direction to near Chattra, on the lower range of hills, where it winds more to the south, and descends towai ds the British district of Purneah, which it enters twenty miles north of Nauthpoor, by a channel two miles wide, but, except in the height of the rains, almost filled with sandbanks and islands, the latter covered with tamarisks and coarse grass. In the cold season most of the space between the temporary islands becomes dry sand. but there are always streams accessible to boats of 400 or 500 maunds Being near the mountains, the Cosi is very subject to sudden risings and fallings, and in summer the water, even so low as Nauthpooi, retains a considerable degree of coolness. One of its contributary streams, the Arun, is supposed to use north of the great Hinialaya ridge, and to penetrate between its snowy peaks. After entering Bengal, the course of the main trunk of the Cosi is nearly due south, in which direction it flows iintil it joins the Ganges, having performed a journey of 300 miles

This river is said to be the daughter of Kusik Raja, the sovereign of Gadhi, who had besides her a son named Viswamitra. This person was a strenuous worshipper of Para Brahma, or the supreme being, and rejected all invocation of the inferior gods, such as Vishnu and Siva. On

this account, and his austerities he almost attained a power equal to these divinities and created several sorts of grain now in common u c lle also intended to fabricate men of a osture much superior to the poor drive hog creatures who now tread the carth but at the solicitation of the demigods, he den ted when he had only proceeded so far as to form the head from which originated the cocos-nut, as is proved by its strong resemblance in the human counter nance Lausski the daughter, married a Brahmin saint of an iraccio e di position, who became incensed against his wife became she hare him a son of a martial inclination; while his father in-law, the flain hook, ex celled in hoiness and power cording to the Scanda Paran (which, In geographical matters is of the highest mithority) the saint in con-sequence prayed to the gods and had his wife changed into a river. which now flows through Purncah under the name of the Con which is the common name oved by the people who inhabit its banks, but in the sacred dialect it is termed has sikt huch is its myshological origin; but at present it is known to descend from the lower hills of the northern monotains by three cataracts or rather violent rapids, it being aveer tained that canoes can shoot through the lower cataract. (I Buchanan. åc)

Corross (Akarpur).-A town in the prostoce of Cachar of which It is the modern capital aixty four miles east from the town of Sahet In Bengal | lat 21° 40 \ lon. 92° 45 This place stands on the banks of the Madhura, o small elear stream that flows from the adjacent moon tains. Under Hars Chandra, Cospoor flourished and possessed brick and wooden houses; but on fils death about 1811 his successor flaja Govind Chandra, thinking lilmself safe only in proportion of he approximated to the British proxinces removed his court and cabinet to Doodpatlee on the banks of the Boorak, chout twen

ty miles south of Cospoor the latter was in consequence almost descried and has since experienced a most rapif decay in AD 1763 Mr Vereits afterwards governor general undersook a journey extend from Bençal and advanced as far as this place on exertion which more of his successors had sufficient enterprise to limitate

## CONTARS Sec SILBEY

Costingaras - A considerabio town in the province of Bengal about a mile south from Moorshedahad of which capital it may be reckured the port; lat 21° 10° 5, lon 85° 15 1... This is one of the largest iniand trading towns in Bengal and during the rainy season has a pariety and extent of water-carriage probably siminant island is perfectly flat and one bed of sand; but the annual overflow of the riser leaves a deput of smel which enriches this other who largen territory Besides the ther and the loar, this in ular space abounds with the inferior sorts of The have deer partildars floricant, quail and a species of nr toian, with a great diversits of birds far superior in splendour of plumage to the e of I more are found along this spered branch of the Cances and the agostle birds of colder cilmates, such as geese ducks, divers and snipes are also abundant. The town of Commission has long been famous for its allk manufactures and Is noted for its stockings, which are all wire-knitted and esteemed the best in Bengal The quantity of adk consumed here onnually by the natites in carpets, sating and other stuff) is very great and a large quantity of the taw article is also export ed to I prope and to olmost every quarter of Index this being recubarly a silk country probably the next in the world to China

The river that flows past Cosum bazar is named the Bingeratlel and is the lohest branch of the Ganges the others, in Hundoo estimation not possessing the some nancilty. In the ancient Hindoo systems the west of the Bhagirathi river was named the Utter-ran, and Dachshim-ran, and the east of the same river Bhagm.— (Colebrooke, Lord Valentia, Tennant, &c.)

Cossimeotta.—A small town in the Northern Circars, twenty-eight miles travelling distance W. by S. from Vizagapatam; lat. 17° 39′ N, lon. 83° 8′ E. To the north of this place there is a military cantonment, where a small detachment is usually stationed —(Fullarton, &c.)

Cossipoon.—A town in the province of Delhi, district of Barcily, twenty-six miles north from Moradabad, lat. 29°11' N., lon. 78°16' E. This is a place of Hindoo pilgrimage, has several temples, and a very holy, though dirty tank, where the pilgrims bathe. A great trade also passes through this town going north, and some of the inhabitants are wealthy.

COTAMA—A village in the province of Gujerat, principality of Lunawara, situated about ten miles south from the town of Lunawara.—
(MS, &c.)

COTAPORT —An inland village in the Malabar province, division of Cartinaad, fourteen miles S E. from Tellicherry; lat. 11° 42′ N, lon. 75° 44′ E.

COTTAPATAM —A town in the Carnatic province, division of Marawa, fifty-two miles south from Tanjore; lat 9° 59' N, lon. 79° 14' E.

COTELAH —A town in the province of Agra, forty-six miles N N.E. from Jeypoor; lat. 27° 28' N., lon. 76° 2' E.

Cotiote—A small section of the Malabar province, situated due east of Tellicherry, and comprehending about 312 square miles. The face of the country here, like the rest of Malabar, consists of low hills, separated by narrow vallies adapted for the rice cultivation. Approaching the glauts these hills rise to a considerable height, and the soil is every where good. The calamities Cotiofe

suffered at the early stage of its connexion with the British government, were in a great measure owing to its forests, which encouraged the natives to make an ill-judged resistance against the British forces. The quantity of trees, including teak, proeurable here in one year, does not exceed 300 or 400, and no metals have been discovered. Wherever there is any long intermission of cultivation, stately forests arise, but the trees are of little value. In AD. 1800 the number of houses in Cotrote was estimated at 4,087. Among the hills and woods there were then several rude tribes, but the whole number of slaves was only estimated at one hundred.—(F. Buchanan, &c.)

COTTACOTTA.—A town in the Balaghaut ceded territories, fifty-six miles N. from Cuddapah; lat. 15' 21' N., lon. 78° 54' E.

COTTEE —A town in the province of Bahar, district of Bahar, ninety miles S by W. from Patna; lat. 24° 21' N., lon. 84° 40' E.

Coulan (or Quilon) — A seaport town in Travancore, 102 miles N N.W. from Cape Comorin; lat. 8° 53' N, lon 76° 39' E. This is a place of considerable native trade, cotton, pepper, ginger, cardamoms, and other merchandize being usually stored here, where there is also abundance of excellent fish, tortoises, rice of a good quality, bananas, pine apples, and other fruits. In remote times Quilon was a place of considerable note, and is said to have been built AD. 825. The Christian as well as the Hindoo natives of this part of Malabar, commence their era at the period of its foundation; and it is mentioned by Marco Polo, in AD. 1295. Alexis Menezes, first an chbishop of Goa, opened here his first conference with the Christians of St Thomas, when he made them renounce the principles of Nestorius, and embrace the doctrines of the Roman Catholic church, to which they in part continue united The Brahmins here possess a very ancient temple dedicated to Siva, and

the Catholes muster three congregations Between Quilon and Cape Comorns there were reckoned, forty years ago tobe seventy-five Chihalic congregations cattered over the country—(Fra Poolo, &c)

Councurs.—Atown in the hellore district thirteen index N by W from Ongole; lat 15° 48 N., lon 79° 31'E

CRORTALLUM - See TINNETELLY District.

Countrian — A large village in the Balaghaut ceded territories, district of Bellary about ten miles tro relling distance N W from the town of Bellary This place, though own decayed, still covers a considerable space of ground, contains aereral temples and is well fortuned with a ditch, glacis, and mud wall—(Fallarton, 6°c)

Coveraxo (cord, a temple) .-- 1 town oo the sea-coast of the Car notic twenty two miles south from Madras : lat. 12º 40' N., lon 80º 18 This fort, called by the natives Saadet Bunder was built by Anwarud Deen Ahan, within musket-shot of the sea, near the runs of anather belon,ing to the Imperial East-India Company of Ostend whose principal factory was ot Covelong In A.D. 1750 the French got possession of it hy stratagem 10 17.2 it surrendered to Captalo Clive, on coodition that the commundant should be allowed to carry awny his own effects, which proved to be a great many turkies and o quantity of snull commodities he dealt in After the capture of Chingleput the fortifications of Covelong were blown up The sea-shore here affords many beautiful shells .--(Orme Fra. Pools, &c)

Comman —A town in Northern Hindostan within the geographical limats of the Neprolese dominions, aituated on the cast side of the Gog

gra river here named the Karonoli, seventy-five miles north from Jemiah; lat. 13° 16' N , lon 81° 5' E

Cowa-Sec Coza

Cow. Dunos (Cord Durga)—A town and fort in the Bisore rajn a terratories dustrest of Bednore lat 179 75'N lon 75° 11' E Hodalla which less in the neighbourhood, was formerly the residence of a family of poligars, who were hereditary flute-players to the sovereigns of Bijanegur

COYLE —A small town in the province of Agra, district of Agra, situated on in Island formed by the Jumna, clinicto lix right bank, about aix miles below Minthura, and minediately opposite to the sacred Hindoo town of Gokul on the left bank of the river It is conspicuous from the loft utrets and plinnels of its seria and mosques, all ganstrated of the stone of the country.—(Fullorion, fre)

Coxe s Baran A town in tho province of Bengal, district of Chittagong utuated at the mouth of the And over, about nine miles south of Ramoo and near the southern extremity of the district lat. 21° 18' N., lnn 92° 20' E. This is a high clear, and open situation being the termination of what are called tho white eliffs. It has a long and open beach to the sea on the south; on the west bounded by the sea and on the north by the Ramoo plain, and is on the direct road by the see to Teak Nauf No jongle opproaches the station within half a mile and excellent water flows from the springs In the chiffs There is here an elevated and clear spot of ground suffi crent to canton five companies of erpoys; and lo 1816 a custom house towards the Arracan frontier was established here , In 1814 the Mugh population alone amounted to 800 buts. - (Colonel Thomas Morgan, Se)

Carnoanone (Corongalar) — A town on the Malabar coast sixteen index N from the town of Coclini lat 10° 12' N, lon 76° 15 E. This

town formerly belonged to the Dutch, but as they were unable to defend it against Tippoo, they sold it to the Raja of Travancore, which occasioned the first war with that Mysore sultan, commencing in June 1790 It was taken from the raja and dismantled by M. Lally, Tippoo's general, but the Mysorean troops were driven out in 1791.

The Jews assert that they possessed Cranganore so early as A.D 490, in 1505 the Portuguese erected a fortress here, of which the Dutch obtained possession in 1763. The diocese of the Roman Catholic bishop of Cranganore extends from Mount Dilly towards Cochin Most of the inland churches formerly belonging to the Nestorian community are inclinded in it. This see comprehends eighty-nine churches, and is under the domination of Goa.—(Fra. Paolo, Bruce, Dow, C Buchanan, &c)

CREANG—A small town in the Malay peninsula near the southern-most extreme of the Queda principality. The surrounding country produces canes and rattans.

CUDDAPAH (Cripa).—This is the second large division of the Balaghaut territories, ceded by the Nizam in 1800, under which head further statistical details will be found, the particulars noted here having reference to the western portion of the The country from the town of Cuddapah approaching the Krishna is nearly a level, the ascent being rather towards that river. though the surface generally be considerably elevated above the sea-coast. the heat during the months of Anril and May is intense, the mountains appearing to glow with fire rains set in sooner than in the Mysore, but it happens not unfrequently that the district is visited with a drought, as happened in 1807, when many thousand black cattle perished for want of sustenance. The great monsoon rains occur here as on the Coromandel coast, and during their prevalence the country is nearly impassable, from the softness of the soil. In the months of April and May there are frequent thunder storms the corruscations are extremely vivid, and the explosions loud. The chief river is the Pennar, and the principal geographical subdivisions,

1. Cuddapah.

2 Sidout.

3 Gandicotta.

4. Cummum.

5. Dupaud.

6. Gurrumcondah.

7. Punganooi.

Throughout this district during the dry and hot season the water is brackish, but while the rains prevail it is sweet and good, and in particular places it has been remarked to continue so throughout the whole The well water in the low country, where the black cotton soil abounds, is always hard, on account of its passing through calca-Soda is mostly found leous strata in a red ferruginous soil among the Pennaconda hills and the eastern ranges that bound the district, the spots most productive of this alkali being for a considerable part of the year moist and swampy, known by their barren aspect, and the black colour the mould exhibits in the morning. When purest it is collected by the native washermen and used instead of soap, from which cause it has received the name of washerman's earth. In other tracts it is found mixed with common salt, which last is extracted by the tank diggers, and applied to culinary purposes Salt works of this description are found all over the Cuddapah district, the quantity in consequence required from the Coromandel coast is insignificant. Saltpetre also abounds, and may be procured by a very simple The cocoa-nut palm is not reared, nor is the common palmira often seen, the soil and climate not being adapted to them. Cotton is pretty generally cultivated throughout this district, but being rather a precarious crop, can only be ventured on by the wealthier class of ryots; there is consequently no redundance In 1820 the whole for exportation

cultivated dry grain land within the limits of Coddspali was estimated at 1 600 000 acres

The diamond mines of Coddanali lie about seven miles & L. of the town, on both banks of the Pennar nver, which here washes the base of a range of hills expan hing in several directions. The perpendicular height of the highest range n sy he should 1 000 feet above the level of the country which is not greatly elerated sbore the sea. They are said to have been worked for several handred years and occasionally diamonds of a considerable aire have been found : these mines are surrounded for cuft! vated fields, and appear like heaps of stones and puts half filled with rub-The gems are always found enther in alluvial soil or in speks of the latest formation; insecking them, the gravel is washed and optend out, after which the diamonds, generally sery small ones, are ducovered by the sparkle The ground is sented by the collector to speculators, who work it on their own accounts but when sery large diamon le are found, which rarely happens the govern toent claims one-third of the value In 1817 the total gross collection of the nambe revenue in Luddsmin amounted to 759 043 parodar, and the total population, according to the returns made by the collectors to the Madras government in 1802 was 1 034 400 persons - (Heyee Hodg son I ublic MS Documents 4c)

Cenarati—The name of this city is sometimes written hirps as well as Luddapah, but both are corruptions of the Samerit word Copa, which significantly size is the Samerit word Copa, which significantly size is the Samerit word the level of the sea. It stands on the leanks of the Cuddapah river, which has its source in the falls to the south east of the town and has springs of fine water along its whole course The palace where the nabobs of Cuddapah farmerly resided it still to be seen in a mud fort close to the pet that at present converted into a court of justice. Within this fort the pri

son is also situated and generally contains from 600 to 700 prisoners condemned to work in Irons for perimis of from one to fourteen years, according to the nature of their crimes which most community are burglaries and highway robberies. Among the prisoners are persons of all ca tes hiddled together without di tinetion; yet here they fallow strictly the precepts of their eastes respecting diet and pay great respect to Brahmin felons, who however depraved and erhminal, are always treated with more lenity than the others by the prison attendants The untried prisoners and delitors are kept separate but of the latter description there are very few; indeed, all sorts of felons and debtors are so well provided for that their condition is enried by must of their acquantance on the outside of the premuce bentence of death is usually received with perfect unconcern and the delinquent penerally requests to he indulged with some tobacco and a good curry; these lasures he appears to enjoy with much satisfaction, and after having finished bla meal, washed his mouth scrubbed his teeth smoked same tobacco and gono through some trifing ceremomes, he proceeds to receive the exeentlan of his sentence.

Ciddayali was for many years the capital of an independent Patan state which survived the destruction of that Deceany kin, dam's and many old Patan families at lill remain who speak the I lindostany dislect with singular purity. In the adjacent country large quantities of sugar and jagary are made; but it is not a place of much active commerce. Traveling, distance from Madras 163 miles I from Seringapatam 220 and from I) there bad, thirty miles—(Hyme, 21'3 62)

CVAUALARE (Cadalar) — A towo on the sea-coart of the Carnatie province clove to Fort St David and surrers where south from Pondecherry; lat 11<sup>2</sup>4 N Inn 70° 50° F. The slin atton of this town is naturally atrong being enclosed between two arms of

the Panaur river, and it would originally have been a more commodious place for the chief British settlement, being to windward of Madras and Pondicherry, and in the vicinity of The streets of Cuddalore Tanjore are spacious, containing many houses of the better class, and it is altogether one of the most extensive and populous towns in the south of India, The old fort has been long razed to the ground, and the line of the bound which formerly stretched across the isthmus, can now scarcely be traced. North of the Panaur is a suburb called the New Town, containing some handsome European houses, a large Portuguese church, and other buildings of good appear-Beyond this, on the border of a fine lawn opening to the sea, and ornamented with avenues of fine trees, is a large structure, formerly the residence of the chief governor of the British settlements on the Coromandel coast, but in 1820 occupied by the collector.

Cuddalore was taken possession of by Col. Coote's army in 1760, and continued subject to the nabob of Arcot until the destruction of Col. Braithwaite's detachment by Tippoo, when it was compelled to surrender at discretion to the combined armies of the French and Hyder, in April The French greatly strengthened the works, and supplied a powerful garrison under the Marquis de In June 1783 Cuddalore was besieged by the British army commanded by General Stuart, and on the 7th the outworks were stormed, after a desperate resistance, in which the assailants lost 942 killed and wounded, of whom 500 were Europeans, the greatest loss of this description, particularly of officers, that has yet been sustained in any action fought by British troops in India. On the 25th June the garrison assaulted the trenches of the besiegers, but were repulsed, with the loss of 600 killed, wounded, and prisoners. In the conflict two battalions of sepoys fought some of the oldest and best French troops with the bayonet,

and foiled them at that favourite European weapon. Two days after this bloody sally the announcement of peace arrived. During these scenes the neighbourhood of Cuddalore suffered greatly, and became nearly desolate, the villages having been laid in ruins, and the inhabitants either destroyed or compelled to migrate—(Fullarton, Rennell, 5th Report, Bruce, &c)

CUDDAN —A small town in the province of Mooltan, subject to the Ameers of Sinde, situated on the route from Hyderabad to Luckput Bunder, and afterwards to Mandavie, on the gulf of Cutch; lat  $24^{\circ} 25' N_{\bullet}$ , lon. 69° 2' E. Betwixt this place and Luckput Bunder is a plain, over which, in the dry season, there is a good road, but swampy during the The country between Meerpoor and Cuddan is little cultivated. being low marshy ground covered with lye bushes; and the stream of the Goonee becomes so narrow and shoal, that it is not navigable further south for boats of any description.— (Marfield, &c)

Cudywa (Catchwa).—A town in the Allahabad province, eleven miles S E from Korah, lat. 26° 4′ N, lon. 80° 26′ E.

Cullation (Calatur).—A town in the Carnatic province, district of Tinnevelly, 100 miles N E from Cape Comorin; lat. 9° 5′ N, lon. 78° 38′ E

Culloon—A town in the province of Hyderabad, thirty-seven miles E. by N. from Cummumait, lat. 17° 20' N, lon. 80° 44' E.

Colna (Khalana)—A town in the Bengal province, district of Jessore, seventy miles E.N E. from Calcutta; lat. 22° 50′ N, lon. 89°. 32′ E. This was formerly the head-quarters of the Roymungul salt agency

Culna (Khalana).—A town in the province of Bengal, district of Burdwan, situated on the west side of the Hooghly river, forty-seven miles N by W. from Calcutta, lat. 23° 13′ N, lon 88° 21′ E This is the poit of the Burdwan district, and

is a buty populous place. At Ambiocosh near Culta, the raje of Burd wan has a large house built after the nature fusition, close to which he has erected a clowah or learn on a scale of extent and manifecence very unual in this part of Hundon sn.—(Fallarios &c.)

CELPTE.-A town in the province of Bengal, situated on the east bank of the Hooghly river, thirty three miles In a straight line below Calcutta; lat The shores are a led of mud and the banks of the tiver covered close to the water's edge with trees and thick jungle Opposte to the anchorage of the ships which lie about half a mile from the share is a creek, and at its entrance stands the town of Culpee crews of ables tring here suffer dread fully from its extreme unhealthmess, numbers dally falling sacrifices in the pestilential exhalations from the mud and rotten jungle, (Johnson, &c)

Cutte (Camelo).—A town sod fort in the province of Canara, twenty live inlies south by end from Vian galore. This I lace stands on a flighteningla in a salt-sater lake separated from the sea by a spot of sand. The country to the next of Cumly formerly belonged to rajas of the Jain reighting but the last of the Buntar Jain reight was lianged by Tippoo

Cunnotheogo.—A decayed full fort in the Nysore attented on o lafty mountain of saled syenite at a short distance to the \( \) of \( \) andydroog

Cumrenars—A division in the Hydershad provoce, of which it or cupies the eastern extremity where it borders on the British district of Hajamundry. It is but indifferently cultivated and thinly lobabiled yet it contains many disorderly characters who seek refuge among its jungies and fastnesses, from whence they issue in predatory bands, and infest the peaceable cultivators of the ad jucent provinces under British jurisdiction. The town of Cummunait.

from which the tract derives it nome is attnated in lat 17° 10° \, lon, 80° 11 \, fifty-five miles north by west from Condapilly There are also some connederable villages; tout, not withstending its long vicinity to the residence of British functionance this extensive tract of countre (and lasked the Nizsun a domainous generally) remains a sort of teres iveo

CLEMEN.—A hilly subdivision of the Balaghaut ceded territories comprehended in the Cuddapah district, and situated between the fifteenth and sitteenth degrees of north latitude. It contains no river of magnitude nor any remarkable town except Cummun the capital which stands in lat 12 77 %, for 32 m des morth west from Cogole

CEROONAU.—A zemindar'a mud fort in the province of Agra, district of Algebra, which in consequence of the refractory con fuct of the posses or was in 1407 besleged by a Brithbforer and an attempt made in carry it by storm; but the availants were driven lock with great slughter the loca of men and officers exceeding that austanced in many pitch that the state of the gray of the property happens in these cases, lost heart during, the fight and when the morning attrived it was found they had execuated.

Cunowan .- A town belonging to Sinds in the province of Candersh division of Nemsur, which in 1820 contained #00 houses; lat 21° 53 N. ion 76 La La, forty miles north from This place stands Boorhanpoor in so open ploin and is aurrounded by a good mud wall shoot fifteen feet high and has a large tank to the northward whenco fesues a stream that flows to the east. The pergunnah attached to Cundwah comprehends on area of uSO square miles which in 1820 contained 170 villages; but not more than 139 were inhainted. (Afalcoim &c)

Contaun (Caribhum) .- A town in

the northern cuears, forty-two miles north-west from Cicacole, lat. 18° 42' N., lon. 83° 36' E

CURODE —A town in the northern eircars, fifty-two miles east by north from Bustar; lat 19° 38′ N., lon. 83° 16′ E.

CURNOUL (Candanur).—A subdivision of the Balaghaut ceded districts, which formerly composed the territory of an independent Patan principality. It is bounded on the north by the Toombuddra and Krishna livers, in approaching which from the south the country becomes more stony and rocky Close to the lastmentioned river and along its banks are hills, the more clevated of which were formerly fortified, and coustdered places of strength. The black cotton soil is the most prevalent, and the face of the country stony with much jungle, and covered with pulmira trees At Banaganpilly are diamond mincs which were formerly In modern maps this productive territory is named Ghazypooi

The chiefs of Curnoul, or as it is also named Kummeer Nuggur, are of an ancient Afghan family, which originally served under the Bejapoor sovereigns, but afterwards held mihtary appointments under the Mogul emperor, Shah Jehan The jaghne of Curnoul was conferred in AD. 1651 by Aurengzebc, then governor of the imperial territory in the Deccan, on Khizzer Khan (a lineal ancestor of the present nabob). Prior to this the country formed part of the Bijanagur possessions Khizzer Khan was assassinated by his son Daoud Khan Punnee, who being slain in battle in 1715, his body was dragged at the tail of an elephant round the city of Boorhanpoor Leaving no issue, his brothers, Ibrahim Khan and Alı Khan, ruled jointly for six vears, and were succeeded by the son of the latter, named Ibiahim Khan, who rebuilt and strengthened the fort of Curnoul, and after a reign of fourteen years was succeeded by his son Alif Khan. This person filled the throne sixteen years, and was succeeded by his eldest son, Himmut Bahadur Khan, all under the anthority of the Nizam. In 1750 Himmut Bahadur accompanied Nassir Jung on his expedition to the Carnatic, where, in correspondence with M. Dupleix, he confederated with the nabobs of Cuddapah and Shahnoor, and betrayed the cause of Nassir Jung, who was slain by the Cuddapah chief in the battle of Ginjee Himmut Behadui being soon after slain in a skirmish, was succeeded by Minawar Khan, the father of the late chief Ahf Khan.

Some time after his accession the nizam, Salabut Jung, detached a force to assume the Cuinoul territory, but a compromise in money taking place, Munawar Khan was confirmed in the possession of the jaghire, which he quietly occupied until the arrival of Hyder from Mysore, who levied a contribution of one lack of rupces In 1790 Munawar Khun sent a party of horse, under the command of his third son, Ahf Khan, along with the Nizam's atmy, to join Lord Cornwallis at Scingapatam On his return the same year Munawar Khan died, after holding the chicfship forty years, and was succeeded, under the sanction of the Nizam, by Ahf Khan, who took advantage of the absence of his two elder brothers to seize the jaghire, in the possession of which he subsequently maintained himself On the transfer of the country in 1800, the rights of sovercignty exercised by the soubadar of the Deccan became vested in the British government, and these feudal obligations were observed by the Nabob with great accuracy His administration in and precision other respects, however, appear to have been defective, for in 1803 his territories exhibited a most woeful picture of desolation and misrule.

The soil of Curnoul is in general a rich black mould, but at the above date a large proportion had retuined to a state of nature, and was overspread with weeds and jungle. Many of these evils arose from the subdivision of the country into a number of

petty jugheres ossigned his anticlpation in the labobs creditors and slso from the verstions management of the land onder the Nabob s own superintendence which had reduced the principal revenue from twenty in ten lacks of supers per annum 1523 the whole Cornoul country contained 630 villages; the duties on consumption and merchandisa to 1 17.023 rupees spirituous liquors to 44 000; and the pilgrim tax of the temple of Parvati to 18 000 rupces The administration of justice also, was so wholly neglected that the Patans perpetrated the greatest enor mities with Impunity and such was the inveteracy of the hatrel sulmis ting between the heir-apparent and his father that it was reported each of them employed persons to offer opprayers for the destruction of the other

The emership having been held for 1.0 years by a tenure almost independent the Briti h government long unhheld Its Interference Int at length affairs attained such a pitch of onerchy that its interposition became indepensable to maintain the legitl musto succession and restrain the excesses of the \sbob s troops a mistidous Ill-paid rabble On the death of Alif Khan in 1815 the throne was usurped by Muzuffer his his joing. est son; who was expelled by a detachment of Madras troops and Mu nawar filan the lawful heir, substiinted .- (Chaples Marrioti Orme, Fifth Report, Rennell 4e)

Cramer.—The capital of the preceding principility situated on tho south aide of the Toombaddra let 15° 44 h., lon 78° 2° E. The fort is protected by the river Headay (in December almost dry), and the Toom baddra with a width of from 700 to 800 yards on all sides, while the western side is strongly forlified, three of the bastions being fifty feet high and covered to the parapers of the curtain ly a steep glacis. The miscrior is almost entirely covered with stone and much houses, except along the western foee, in 1810 amounting to 1,538 of which 312.

were Inhal sted 100 unoccupied and the remainder abandoned and falling to pieces Towards the south of the fort is the pettah, which is of consideral le extent and contains a numerous population In this, their Hereany metropolls the l'atans ex hibst their onclent manners and fanaticiens in considerable perfection at they make a ment of being Ignorant of every thing except horsemanship and the use of arms regarding all other acquirements as effemmate The late nabolt Alif klian, not un frequently visited the shrine of Miskeen Shah the ancient spiritual di rector of his family On these occa sons he walked to procession barefuot from the fort to the manualeum distant one mile earryleg on his shoulders a leather ing filled with sherber which he distributed to the mob of religions mendicants and rag campline who followed him with shouts of sparobation.

The fortress of Curnoul had been given in ja hise to the ancestors of the present \sboh and from its great strength natural and attificial had never since that time been token by any native power Hyder and Tippoo In the realth of their glory, were content to lesy a tribute by temporary Incursions but never ottempted to areal the fort This circumstance had gli en Muzuffer khan (who usurped the principality in 1814) an idea that it was impregnable, and its gar rison of all descriptions amounted to 4 000 men. It was besleged in furm by a British detachment; the batteries were opened on the 14th December 1815, and next day it surrendered at discretion without the loss of a man to the orsailants. This early capture was attributed to the effect of the bombs among the horse amounting to about 600" the personal property of the chick, who owing to the precontinue taken, and to the Toombudden a being unfordable could not make their escape Traveling distonce from Haderahad 127 miles : from Madeus 279 and from Seringapatam 270 miles,-(Col Afarriolt, Col Thompson, Orme, Rennell, &c )

Curran (Khara).—A town in the province of Allahabad, situated on the S.W. side of the Ganges, forty-five miles NW. from Allahabad; lat. 25° 41' N., lon 81° 16' E The banks of the Ganges here are unusually high and bold, and the site of the ancient city is a tissue of ravines, strewed over with Mussulmaun tombs and heaps of ruins, interspersed with the seattered buildings of the modern town, which still contains a considerable population. The fort stands on the highest part of the bank, and has been a noble piece of masonry. A gateway, and part of the walls, built of enormous blocks of solid freestone, are still in existence In 1582, when Abul Fazel compiled his statistical description of Hindostan, a small errear was attached to Currah, but it has long since merged into the surrounding British districts Currah owes its fame and stately buildings to a celebrated Mahomedan saint named Sheikh Cimaul, who with his son and several of his disciples lies bu-In 1823 his own tomb ried here. was in tolerable repair, but most of the others were gone to ruin.

The country between the Ganges and the Goomty, from Currah to Benares, on the east side, abounds with sujee muttee, a species of earth impregnated with alkali, from one to three inches thick, which is pared off at the conclusion of the rainy season, and sold to the soap manufacturers at Allahabad and Benares.—(Fullarton, Rennell, &c.)

CURRODE.—A populous town in the province of Gujerat, situated on the south bank of the Nerbudda river, about eighteen miles from Surat; lat. 21° 12′ N., lon. 73° 25′ E In 1817 this town and the pergunnah attached, valued at 65,000 rupees annual revenue, were received from the Guicowar in exchange for the division of Bejapoor.

CURRUCKDEAH —A town and zemindary in the province of Bahar, district of Boglipoor, 100 miles S E. from Patna, lat. 25° 8′ N., lon. 86° 13′ E.

CURRUCKPOOR (Kharakpur).—A town and zemindary in the province of Baliar, district of Boglipoor, eighteen miles south from Monghir; lat. 25° 8′ N., lon. 86° 35′ E. Owing to the natural strength of the country, the Curiuckpoor chiefs formerly possessed considerable power, and when at variance with the government used to retire to the narrow vallies among the hills, where they could not be pursued by Mogul horsemen.—(F. Buchanan, &c.)

Currybarry (Carwati) —A large and jungly zemindary east of the Ganges, long attached to Bengal, but not strictly within its geographical It consists of lands on the east side of the Brahmaputra, originally dismembered from the Garrow territories, and it is still almost surrounded by the hills and jungles inhabited by that people, into the defiles of which no regular troops can penetrate. Including the estate of Mechpara, this tract of country stretches from north to south over a space nearly sixty-seven miles in length by twenty-three in breadth. Within the last twenty years it has been greatly infested by the incursions of the Garrows, whose aggressions were probably first occasioned by the frauds and exactions practised on them by the zemindar, the resimption of the sayer, or variable imposts, not having ourginally extended to this quarter. 1813 an arrangement was effected for the abolition of these duties, to suppress the extortions to which their existence subjected the Garrows According to the accounts produced for the adjustment of this elaim, the 7emindai's net receipts on account of these duties amounted to 3,627 rupees per annum, while the whole land rent paid to government for the pergunnalı was only 3,062 rupees, so that after relinquishing the total revenue aceruing to government, a balance of 565 rupees remained annually payable to the proprietor out of the public treasury. In 1812 the Bengal presidency endeavoured to purchase this estate: but, although nearly in a

stoto of natore the proprietor demanded 120 000 rupees. In a tract of such dimensions and so remotely situated, the difficulty and expense of supporting o police establishment is so great, that were it and opposed by political considerations it would be preferable to renounce the sorerepair olitogether—(Public MS Doments &c)

CORRALEE.-A village in northern Hindortan district of Gurwal seventr fire miles N W from Serinagur ; lat. 30° 57' N., loo 78° 21 L place stands on the foot of the Jumnoutes or Buoderpooch mountain three miles from Jumnoutra to which it is the nearest village and in 1817 contained twenty-five substantial houses. By the sides of the Imra and Jumna are several spots of flat ground on which the inhabitants raise grain enough for their substitence nithough snow falls to the end of April and covers the neighbouring peaks at oil seasons .- (Capt Hodge son, Jas Freser, Gc.)

CUSTER (Austh).—A town in the province of Bengri district of Rejeshaly fift; two miles L.S.E. from Moorshedatad lat. 237 4 N., Ion. 829 3 L. Thus is the port of Comer celly and during the teamy season there is a passage past Custee for boats to the Hooghly may.

CUTAGE.—A small town in the provactor of Canora, situated above the western ghants lat. 14° 52° N., ion. 73° 48° E. The Inhabitants of this neighbourhood are mostly lifuga Brah mos a very industrious class of men, who perform all agricultural libours with their own hands.—(F Backenon, 6c)

CoresiGunoava.—Alarge division of Baloochistan, situeted principally between the 27th sod 29th degrees of north latitude. To the north it has the province of Sewiston; on the south that of Siode to the west it has the Brahoolek mountains, and to the east o desert tract that separates it from the river Iodus. The utmost length from north to south may be se

timated ot 120 miles; and in breadth the hisbitable part, at little more than sixty miles,

The chief town in this tract is Gundavo which is not so large as helot, but built with greater regularity, and kept in better order The than of helat with most of his chicis, resorts here to winter to escape the intense cold of the mountains. Gundova la surrounded with a mud wall over the gates of which leading to helat, Cornelile and Shikorpoor, some small swirely are mounted. The next towns lo rack are Dhoder, Blag, and I heree each contouring from 1 000 to 1,600 houses, surrounded by mnd walls ond bastions perforated with loop-holes. The plains cootsio many villages The population of Cutch Gundara consusts mostly of Juts, a people whose manners, apnearance and customs indicate them to have been originally flindage, subsequently coorerted to the Mohomedan reheion. They reside to permanent villages, and cultivate the ediacent soil, the rent of which they pay to their Baloochy and Brahooca chicftsine. There are a few 1 lindoos settled in Gondavo, and in the smaller towns and villages who carry on a trado with the cultivators by barter, ond afterwards transport the grato and other productions to Mckran Cornchie and Sommenny The land is such and loamy but it is a remark-able fact that rice will not grow in this provioce although it produces luxuriant crops of every other description It rains in June, July and Aggust, and also a little to the spring months. The suncom or pestilential wind, blows here during the hot months, and is very destructive even to the natives .- (I offinger, &c)

## CUTCH

(Cach ha a morate)
This provance is pracqually situated between the twenty-third and twenty-fifth degrees of oorth latitude, ond consists of two portioos; one an immense sait morass named the Ruon, and described separately, the other 2 H

VOL L

an irregular hilly tract, completely insulated by the Runn and the sea. On the west, the easternmost branch of the Indus and a barren waste divide Cutch from Sinde; on the east is the gulf of Cutch and the Runn; on the north is the sandy desert; and on the south the Indian ocean. In length it may be estimated at 160 miles from east to west, and, including the Runn, at ninety-five from north to south.

During the rainy season Cutch is wholly insulated by water, and during the fair season by a desert space from four to sixty miles in breadth. While the south-west monsoon prevails the northern frontier is entirely covered with water, generally salt, and no where quite sweet. When the monsoon abates the waters retire, and leave a morass which gradually dries up and yields good pasture. The principal divisions of Cutch on the west are, 1st Ubrassa, and 2d Gurrah, on the north Pawur and Puchum, on the sea-coast Kanthi, and

on the east Wagur.

Almost the whole face of the country near the hills is covered with volcanic matter (a rare substance in Hindostan); the rocks appear to have been split by the action of fire, and their vicinity abounds with specimens of metallie scoria Through the centre of the province from east to west there is a range of moderate sized mountains named the Lakhi, which divides it nearly into two equal parts. This chain is a continuous mass of rock, destitute of soil and water; for although many torrents descend while the monsoon lasts, they entirely fail with the periodical rains. The most remarkable elevations are the mountains named Nunow, or Chigo, and a remarkably flat hill named Warra The anable portion of Cutch consists mostly of vallies between the two ridges of mountains, and other inferior hills, and of the plain stretching from the sea-coast, occasionally interspersed with detached hills. Close to the beach is a high bank of sand, which extends the whole way from the Indus to the gulf of Cutch.

There are not any rivers in Cutch with perennial streams, but many torrents which leave their channels nearly dry when the rains cease. Of these some have springs in their beds, which appear, disappear, and re-appear at certain spots before the channel terminates at the sea-coast, and throughout all Cutch the streams appear to diverge from the centre. Those north of the Lakhi chain flow in that direction until they reach the Bunnee morass, those on the south flow towards the sea: but the whole are unfortunately so brackish, that in the hot season even the cattle reject Wells, however, are numerous, and usually afford good water by digging thirty feet under ground earthquake of 1819 affected, in a remarkable degree, the eastern, and almost deserted channel of the Indus. which it refilled and deepened.

The general soil of the province is a light clay covered to the depth of about five inches with a coarse sand: further down white and yellow clay are found, and beneath a stratum of rock, which being pierced, excellent water is reached. Throughout Wagur the soil is generally more loamy. Cutch may be described as almost destitute of wood. The common Neem, peepul, and babool are met with occasionally about villages; the tamarind, banyan, and mangoe are rare, and the cocoa-nut reared with difficulty even on the sea-coast Date trees are not uncommon, and yield fruit of a good quality. The impregnation of the female tree by the pollen of the male has been practised from time immemorial. Iron ore is found every where, and a species of wood-coal of a tolerably good quality, about twenty feet below the surface. Bituminous earths and ligneous petrifactions also abound. Eighteen miles east of Luckputbunder, near the village of Mhur, there is said to be an extinct volcano, and from another hill in the same vicinity there issues a fountain holding alum strongly in solution, monopolized by the Cutch government

As Cutch does not produce grain sufficient for its own consumption,

mock is imported from Gojerat Na lubar and hinde in return for which cotton is principally exported. The Cutch horse has long been known and purchased by Europeans; the oxen are of a very inferior description, list grats are much esteemed. On the skirts of the Runn and desert the will are la met with. It is naturally an inhabitant of the salt waster, but in the cold season penetrates to the cultivated country, where it eauses much damage. It is thirteen hands hich has a back neck an i belly of a light brown colour with a dark stripe down the ridge of the back; long ears like the domestic ase, but with a more melodious bray and stronger limbs. His general food is the saline grasses of the desert and brackish water ; yet he is never seen lo a bad condition The firsh is said to be toleral le catme but is held i y the natives in great abhorrence

The procipal towns of Cutch are Rhooj Mandaria, Luckputbunder Moondra Anjar hoteser Sangercha hoters Robs, Thera, handhan hy ra Mothara, Howpoor, Adoo: Wandis and Arrialr The Cutch pilots and mariners are noted for their skill and claim the merit of having first tostructed the Arabs lo payration and ship-building; yet they still use the cross staff and keep their dead reckoning as in the days of \ asen de Gama, an I perhaps of hing Solomon The principal sesport is Vandavie from whence shout 30 000 candies of cotton are exported besides cheo and ml in dhin, bles or coasting vessels from 20 to 220 tons and since the suppression of piracy this cum merce has considerably increased

merce has considerably increased in ancient times the protoco of Cutch oppears to have been occupied by pastoral tribes far the knombers, or cultivatars do not appear at any time to have formed on essential portion of the enimunity; and the Chowns although formerly the governing class, are now extinct. The modern illurights are a branch of the great Sinde Summs stock and opsumed the title of Iharejah to distinguish the processor of occlepated cheef

named Jharra whose faith whether Lindoo or Vishomedan is still a mat ter of controversy among the Cutchles The Jharcish's having established their independence, their chief took tho title of Jam, and held to until shout the middle of Actor a reign when hheneur, who had been expelled was reinstated by the Foltan of Cujerat. The reigning How in 1818 was the eleventh to descent from Khengar A Cutch Ibsrejah is half a Mishomedan for he behaves in the horan, worships Mahomedan saints, and airtains from forhidden food. The Mahinmedan fortadilen food tobes mostly of Sindran origin are military or pastoral t but the Meyanna, under ratious appellations are profee-lanelly robbers and need sine

The other dist ion of Jharciaha are limdous as they preserve the lock of heir on their heads do not under to circumcition alutain from the firsh of cattle and adore any thing in the shape of an linage Both classes are a most ignorant, indoient race addicted to strong and fiery honors of which they drink such quanti tice as would destroy a l'oropean Their wives, all procured from other tribes on the contrary are active jeslous and intriguing, holding in contempt their drunken and imbecilo hurbands. Femsle infanticide is uni versally practised. Its date or com mencement remains wholly unknown yet such is the preposterous pride of o modern Jharejali that they consider It a loss of character should their daughter weil any man whatever In 1818 Capt Macimurilo was of opinion that the total number of female Jharejals then slive in the whole province was somewhere about thirty; the whole number of the Jhareigh tribe was then estimated at about 12 000 persons. Even the Vahomedans of Therejah descent assume the privilege of destroying their daughters The Bhattins are o limdoo \ tsh

The Bhattian are o lindoo vails nursio sect of Sindian origin who worship a debrucked opnum-cating Brahmin named Gossenjee Slabaraje whose privileges with the females are unlimited. The Bhattian are not-withstanding, skillful and industrious

merchants, who pursue wealth over Arabia and the west of India, leaving the propagation of their families to such members of their community as choose to take the trouble. Brahmins, both genuine and spurious, are met with in Cutch. Charons, Bhatts, and other tragalla wara (eastes that commit suicide) are numerous the total population, probably onehalf are Mahomedans. Taken in the aggregate, the Cutchies present a disgusting picture of vice, debauchery, and beastliness. They are treacherous to a proverb, and it is a common saying, that if a saint were to drink the water of Cutch, he would instantaneously change his nature language of Cutch is a dialect of the Sanserit, of which many words are retained in purity; but it has no peculiar written character, and is much mixed with Sindy and Gujeratty. translation of the Lord's Prayer into this dialect, was found to contain twenty-four words out of thirty-two radically the same as the Hindostany and Bengalese specimens The Gujeratty is here the language of business, and its character of correspondence

Cutch is mentioned by Abul Fazel, in 1582, as an independent state, but the power of this principality appears to have been at the highest about the middle of the eighteenth century, when Row Dasul is said to have held garrisons in Sinde, Parkur, and Cattywar, which were lost by Row Lacka, who succeeded in A.D. 1751. Row Gore came next, and anarchy prevailed till his death in 1778, when he was succeeded by Raydhun (the father of the late Row Bharmuljee), who became deranged; and Futteh Mahomed, the military commandant, gained the ascendant, and in 1792, expelled Dhosul Rain, but was in his turn, in 1802, ejected by Bhyjee Bawa, brother to Row Raydhun, when he returned to Anjar. All these revolutions (another of which reinstated Futteh Mahomed in Bhooj, which he governed until 1813) were effected by the mercenary troops, consisting of Arabs, Sindics, and Cutch Mahomedans, the Jharejalis appearing to take little interest

in the struggle. Row Bharmuljee then took the lead; but habits of intoxication soon deranged his intellects, and would have precipitated him from the throne, had not the British government been compelled to interfere at that juncture to repress the banditti that issued from the Cutch territories, and laid waste the neighbouring provinces

The present Row (a minor) was elected under the patronage of the British government, and the political agent at Bhool may be reckoned the first member of the regency. In 1821 the national troops consisted of 500 horse and 2,000 militia, besides the contingents of the Jharejahs, which if all collected might approach 20,000 The number of chiefs at that date was about 200, and the whole number of their tribe was guessed at from 10,000 to 12,000 persons other inhabitants of Cutch have been estimated at half a million, of which more than one-third are Mahomedans (mostly Hindoo converts), the remainder Hindoos of the pacific castes. The whole revenue of Cutch does not exceed sixteen lacks of rupees per annum, of which rather more than one-half belongs to the Row; the remainder being assigned to different branches of his family. The Row's ordinary jurisdiction is confined to his own demesne, each Jharejah chief exercising unlimited authority within his own lands. The Row can summon them all to his standard, but must pay them . their annual revenue varies from 100 to 30,000 rupees each.

Cutch has at all times been dependent on Sinde for a large portion of its subsistence, for it is not fertile, water being searce and often salt, the soil either locky or sandy, and the extent cultivated unequal to the support of its own scanty population. It is notwithstanding, at the present period, in as flourishing a condition as it has ever been, in defiance of the devastations caused by the earthquake of 1819, which nearly destroyed Bhooj, greatly injured Anjar, Mandavee and Moondra, and overturned many of the Jharejah forts. This prin-

cipality escaped the ravages of the Mahrattas, twice repelled invasions from Sinde and may he saul to have remained unconquered until 1819, when Bhool was taken by Sir William Keir's ormy by escalade in the course of a few hours and has ever since contained a British garrison iodepeodence maintained by Cutch through o series of centuries, olthough placed between powerful empires is o proof that it was known to contain nothing to gratify ambition or to compensate for the expense of its cooquest which would be aggravated by the time necessary for the reduc tion of the innumerable little fortres ses with which it is studded occount it was to be wished that it could have remaioed a barrier between the British possessions and those of the Ameers of Sinde but Providence decreed otherwise for of oil tho British alliances this is the most lo timate complicated and difficult to dissolve -(Macmurdo Liphinetone Col 1 Haller Public MS Docu ments, &c)

Corcausabay (Cachebers) — A small town in Bootan under tha juris diction of the subah or governor of Cherang o place four data yourney from Cutchubarry to which station this functionary descends during the cold season. The town of Cutchu barry is said to be o mere collection of miserable huts and the sorrounding country, with the exception of a few detached spots, covered with jungle and shandoned to the wild ammals lat 26° 42° N lon 90° 10° B forty-one miles north from Ranga matty

## COTCHWARA-SCO KUTCHWARA

Curraes (Catae).—A large ditreat in the province of Orissa, or tending from the frontiers of Ganjam to the river Subunrecka. 180 miles, with an overage breadth from the aca loland of 110 miles. But the territory of Cuttack Proper is more limited being principally comprised between the river Sollundee with an undefined boundary to the west. What follows, however, may be considered as op-

plicable to the district generally, and in its greatest dimensions in which sense it is bounded on the A.E by Bengal, on the SW by the northern circars; on the east it has the bay of Bengal; and on the west various pett, native states, formerly tributary to the Nagnoor Maharatias. At present Cutteck may be divided into three regions first the marshy Delta second the Mognibundy or central parallel and threly the hilly region or linjurar; the whole comprehending an orea of about 9 000 square miles.

The aspect of the country on the sen-coast, and to the westward for obout twenty miles, is low covered with wood oud totally inundated by the sen ot spring tides and ioto this stoneless expanse of swamp and forest the numerous civers from the Interior ducharge their waters, through many channels resembling to fact although not in figure the Deltas of Bengal and Egypt About twenty miles from the shore the country rises considerably with o dry and fertile soil, form ing the Mogulbundy and about twenty miles further inland it swells into bills, mostly covered with trees some of o remnous nature and others valuable for the purposes of cabinet work and dyeing The wood produced on the sea coast is chiefly the soondry from which wood-oil is extracted and the janual The whole of these forests ore much lofested by wild beasts capecially leopards which during the marches of the British troops to

1803 devoured many of the scotinels. The third or hilly region of Cut tack reaches as far west as Gundwann (in breadth probably 100 miles, and from Midnapoor to Goomsur of least 200 m length), is partitlooed omong sixteen Khetri or Khandait zemindars who have been recognized by the British government as tributary rajaships subdivided 10to many petty de pendent estates held by hereditary Along the hase of the hills officers are twelve more khandaities held by a similar class some of whom pay o light tribute but ore sobject to the British laws and regulations while others are ossessed at the ordinary rate. The greatest height of the hills seen from the Mogulbundy may be about 2,000 feet, their general elevation varies from 300 to 1,200 feet; further inland they are more elevated and regular. They are chiefly of granite formation resembling sandstone, and containing great quantities of imperfectly formed ill-looking garnets. The whole of this hilly region furnishes a great variety of valuable and curious minerals, and iron is extensively diffused on the estates of Dhenkanal, Augol and Mohurbunje.

Cuttack is watered by innumerable streams which swell into rivers of magnitude during the rains, but few of them have any current throughout the year. The principal are the Mahanuddy and its numberless branches, the Brahminy, the Byturini, the Solandy, Kausbans, Burabalang, and the Subanreeka. The embankments or bunds are solid mounds of earth well turfed on each side; the principal ones measure from forty to fifty and sixty feet in breadth, and from eight

to sixteen in height The periodical rains do not commence here so early as in Bengal, and are light in comparison until September, when the rivers rise and overflow their banks; in November the clouds are dispersed and the weather serene The the mometer at any scason of the year is soldom below In February and part of March dense mists are frequent in the morning, continuing until near noon, and followed by clear evenings and nights. Hot winds prevail in April, May, and June, when the summer heats are very oppressive, especially in tents and temporary erections, but this burning season is occasionally re-freshed by tremendous storms of thunder, lightning, and rain Cuttack district is still but imperfectly explored, but what is known exhibits a great variety of produce and soil A valuable manufacture of salt, remarkable for its whiteness and purity, and yielding a revenue of above eighteen lacks of rupees per annum, is carried on along the whole margin of the bay. Further inland

rice of different qualities is raised, with many other varieties of grain, pulse, aromatic roots, spices, dyeing drugs, and sugar-cane; and in the hilly tracts Indian corn and wheat These hills contain several kinds of granite, and also a species of schistus, from which good slates might be In some parts iron ore is found, and in others gold dust is collected from the beds of the mountain When the rivers are filled by the periodical rains, many kinds of valuable timber, including teak, are floated down, but the forests are singularly deleterious, and can only be explored during the months of April and May, when the exhalations, and consequential forest ague, are least noxious. The banks of the rivers are extremely picturesque, and their waters, as well as those of the adjacent sea, abound with fish. Both the flat country and the hills swarm with every species of wild beasts, including many carnivorous and ferocious animals, besides a plentiful assortment of snakes, vermin, and reptiles, with and without stings, fanged and unfanged, innocent and poisonous.

The only collection of houses in this district deserving the name of towns are Cuttack, Balasore, and Juggernauth; the chiefs, cusbalis, or head villages are Buddruck, Soro, Kındrapurı, Asseragsar, Huripoor, and Pipley. The Rajwarra or hilly region, scarcely contains one i espectable village. The Mogulbundy is divided into 150 pergunnalis and 2,361 estates of individuals, which, although highly cultivated, possess but an in-Ricc is the principal different soil article of food, and next to it the palma christi, or castor-oil plant, the oil of which the natives certainly use in their cookery. Gardens (notwithstanding what Abul Fazel says to the contrary) thrive so ill in Cuttack, that even the efforts of European residents have proved unsuccessful, and all the domestic animals are of a very inferior description.

Under the ancient Hindoo government it is probable the raja and pireas of Ingerementh had great in fluence; but the territory appears to have been always much partitioned among petity native chiefs subordinate to no regular head. It was insailed at an early period by the Mahomedane, but never reduced to subjection until conquered by the Maharattasin 1738 nor even then could it be said to be subjugated according to the furopean sense of the word. With them however, it remained until 1803 when it was conquered by the British after a feeble resistance.

Subsequent to the expulsion of the Maharattas considerable tracts of land remained to be settled apper taining to tributary rajas, who professed submission but tendered no trilmite Among these was the Jug gernanth or khoordah Raja (Muck und Den a hor of eighteen), whose claims being resisted fald waste the adjoining country with fire and aword A British army was in consequence collected which after a variety of operations in a most impervious and difficult country argravated by the sancisty of the raja a sacerdotal clia-racter dispersed life army took Aboordalghur an lat length (in 1401) captured his sacred person, which was comesed into camp, while the mhabitante of the adjacent districts came forth and prostrated themsels es before him in humble adoration. The British government then proceeded to investigate the condition of their new acquisitions which were found to be distinguished from those of Bengal by peculiar circumstances, and more especially the unsettled state of the land revenue; the celebrated temple of Juggernauth; the tributary chiefs and the extensive scale on which the river embankments were maintained

The cs\_liteen police stations of the Mogulhandy, including the Raywarra estates of Aul Kunka Kujang Horespoor Marichpoor, and Bisherpoor, with the whole Killajat chlefships, in 18°2 contained 11,115 villages and hamilets and 243,273 houses, which at the average rate of five to a frame

would give ...

The Rajvarra, or divious occupied by the feudal chiefs; fixed tribute of thirty-one. Mandalities or initiaty zeroindars styled rajas and probably not more than one in ten of the actual net produce 1 °0,411

Total Re 14 45,030

The revenue derived from the salt monopoly exceeds the total amount of the land rents paid to the state, and is entirely the creation of the British government. The salt sold within the district socids a net re turn of three lacks and the quantity annually exported to Calcoits and there rubbirly old realizes about Under the heads of fifteen lacks customs sarrable imposts pilgrim tax &c . a further net revenue of one lack per annum is obtained so that the value of Cuttark, after deducting the expenses of management, may be estimated at thirty lacks of rupees

per annum
The tributary estates or zemin dance, to number twenty nine, and all of largo dissections and some amost provinces, yledded in 1813 only 118,037 rupees to the British government; the supposed surplus of clear profit remaining to the land holders was estimated at 655,250 rupees a mere trifle considering the liminensis space from which it is derived. All these tributary zembodars assume the title of raja in their respective territories and admit each other a claim tu that dignity.

also exhibit the insignia, go abroad with the retinue, and observe the forms and state of independent princes, according as their income suffices to cover the expenditure consequent on this assumption. Some of the principal zemindars, to the number of sixteen, are at present exempted from the operation of the British regulations, the remaining thirteen are within the jurisdiction of the laws.

A great outlay is annually necessary in Cuttack for the purpose of keeping the embankments in good order, which in 1814 amounted to 40,514 tupees Some of the principal embankments, more especially that at the town of Cuttack, are indispensable; but the utility of the inferior ones is by no means equivalent to the disbursements they involve. than one-fourth of the circulation of the district is carried on by cowries; copper, one-tenth; gold, one-fortieth; and silver three-fifths Formerly the revenue was calculated in cowries, and annual importations of these shells are still made from the Maldives in return for grain. The pilgrims bring a great deal of bullion, but much also is sent to Calcutta. In 1814 the gross tax on pilgrims to Juggernauth produced 170,000 rupees, but this is not all clear gain, more than half being expended on the current expenses of the temple and its establishment.

In A.D. 1817 the tranquility of Cuttack was greatly disturbed by an insurrection of the Pykes (the ancient militia of the country), instigated by the Khoordah Raja and his minister Juggoobundoo, who, although defeated in every encounter, were enabled by the local difficulties of access, to carry on a protracted warfare for almost two years. These commotions were also in part ascribable to the too hasty introduction of the British revenue and judicial system among a people in no respect prepared for its reception, and notwithstanding the insignificance of the insurgents, and their total destitution of military resources, the loss, from the climate, of men and officers in

this raggamussin war, was enormous and irretrievable. — (Stirling, J. B. Blunt, Richardson, Public MS Documents, the Marquis of Hastings, Fullarton, &c.)

Cuttack.—The capital of the preceding district, situated in lat 20° 27' N., lon 86° 5' E., 251 iniles travelling distance from Calcutta. This town is built on a tongue of land from whence the hilly country is visible, washed by two branches of the Mahanuddy river, which diverge about three miles to the westward of the city, and in the rainy season insulate it. At this time, near the city, the Mahanuddy is two miles from bank to bank, but during the dry season is fordable with less than three feet of water. At this station there are large and solid embankments, mostly faced with cut stone, having a descent of steps to the river, which are essential for the preservation of the town and military can-During the heavy rains tonments. of 1817 the waters of the Cajori rose in one night eighteen feet, as ascertained by careful measurement. This immense volume, about one mile and a half broad and from thirty to forty feet deep, over-topped the general level of the town and station by a height of nearly six feet, and was only restrained from overwhelming them by a solid embankment faced with stone, and supported by buttresses, the work of former govern-

In Sanscrit, the word Catak signifies a royal residence, or seat of empire, and it is still celebrated as Catak Benares, under which title it is mentioned by Ferishta and Abul Fazel. It is said to have been a capital so early as the tenth century; but the fortress of Barabutty was not built until the fourteenth century.

The principal street is remarkably well-built, containing many houses, two and some three stories high, a spacious chowk, and several respectable Mahomedan buildings, such as the Jumma Musjeed, the mosque and octagon shrine of Cuddam Resool,

where a stone from Mecca is exhibit ed bearing an impression of the prophet a foot. The dwellings of the crell establishment partly occupy an open space on the skirts of the city and are partly dispersed over the en virons. The high bank of the Laul baugh is now the aite of l'iropean villas not a atone of the old palace remaining In 18'2 this town con tained 40 000 soliabitants residing in C.512 houses, exclusive of the can tonments, among which are several mandons of stooe formerly belonging to Gosnin and Parwar merchants who engrossed the trade and official employments under the Valiaratts: The fort named Barrabuttee stands about a mile \ \ \ from Cuttack Travelling distance from Nagpoor 492 miles; from Hyderala 1 Gul; from Madras 770 and from Delhi 90 miles - (Sterling, Richardson, Fullarion Rennell Upton, &c)

CETTERAN .- A village in the protince of Belli district of Bareily twenty-eight miles Sla from the town of Harcily; let 250 3" \" lon 79732 In This place is now almost entirely composed of smul houses, but the opproach from the south an i west is remarkable by two of the noblest clumps of trees in Hindortan lo AD 1774 a decisive battle was four ht in this neighbourhood in which Shuja ud Dowlah the labob of Oude with the assistance of a British detachment, defeated the 110hilloha, and cooquered Robilcund as far as the Lolldong russ. Hafez Rehmut their perceipal lender was slain in the action and the Rohiffah's annihilated as an independent nation The field of battle lies about three miles from Cutterah, near a con siderabla oullah, or water-course crossed by a massy bridge of many arches on the opposite side of which, in commemoration of the victory, the Nabob founded the town of Futtelighur .- (Fullarion, Tennani &c)

Corrus Mana.—A remarkable pallar attacted near the small town of Cottub thirteen miles nearly due south from Della Its base is a po

lygon of twenty-seven sides, and rises In a circular form The extersor part is fluted into twenty-seven acmi circular and angular disistens. There are four balconies in the height of the building the first at ninety feet the second at 140 the third at 180. and the fourth at 20'l feet An le regular spiral staircase icada from the bottom to the summit of the minar. which as crowned with a majestic cu pola of red grante The entire height of the pillar is 242 feet. Such was the description of this noble column in A 1) 1794; since then tha cupola has fallen in, the upper part Is considerably dilapidated, and on the east its fall threatens to be necelerated by the roots of a banyan tree This is certainly to be regretted, for the Cuttub Minar Is a structure unrivalled of its kind in Hindostan for its great size materials profusion of ornament and above all for the solidity of its construction, which has enabled it to resist time, atorm, and earthquake without repairs for more than 300 years Two inscriptions state that the pillar was erected In the time of Shums tel Deen Al tumsh who reigned from A.D 1210 to 1271, corresponding with the hehra 607 and 603 and who may be considered as the emperor under whore auspices the column was completed

The town of Cuttub, thus named from possessing the shrine and relies of Cuttub ut liven a eclerated Ma humeslan saint is a place much resorted to by devotees of that faith The late Vogul Shah Allium and many other members of the Imperal family, he also buried here; and the regsing emperor, Actor the Second has olso prepared a monsoleum for inhuself and beginn. Lear the alirne are several liandsome houses arranged in the form of a square with a well in the centre belonging to the emperor and princes of the royal hoose, who occasionally visit Cuttub for the purposes of devotion —(Fullarion, J B Blant Eucer, fe')

Curva (Analoya).- A town in

the province of Bengal, seventy-five miles N N.W from Calcutta, lat. 23° 37′ N., lon. 88° 10′ E. This place is noted for a smart action that was fought here, in 1763, with the troops of Cossim Ali, and for the manufac-The compoture of brass vessels. sition termed dosta seems to be a kind of pewter or alloy, containing a a great deal of zinc.

DABBLING -A Tartai village in Tibet, situated on the left bank of the Sutuleje, 9,020 feet above the level of the sea; lat. 31° 45' N, lon. 78° 37′ E.

DABUL (Devalaya) —A town in the province of Bejapoor, division of Concan, eighty-five miles S by E. from Bombay, lat. 17° 46' N, lon 73° 16′ E.

DACCA JELALFOOR (Dhaka) -A district in the province of Bengal, situated principally between the 23d and 24th degrees of north latitude To the north it is bounded by Mymunsingh, on the south by Tiperah and Backergunge, to the east it has Tiperah, and on the west Rajeshahy Prior to the new arand Jessore rangement in 1800 this was one of the largest and most valuable districts in Bengal, stretching south to the sea, and north to the Garrow mountains. It then contained 15,397 British square miles, subdivided into a number of zemindaries, and was reckoned the granary of Bengal, a distinction it still retains; but prior to 1814 its limits had been reduced within 6,000 square miles During the rainy season a great extent of Dacca Jelalpoor exhibits the appearance of an immense lake, in which villages raised on artificial embankments seem scattered like islands; and being intersected by two of the largest livers in the world (the Ganges and Brahmaputra), is subject annually to considerable changes in the boundanes of estates, large portions being transferred from one side to the other, occasioning infinite trouble to the revenue officers, and loss to the govern-These annual inundations. however, fertilize the land, notwithstanding which there is scarcely a district in Bengal where nione jungle and unoccupied land is to be found The whole of the latter is claimed as the property of individuals, who, although they derive no profit from it, and are too indolent to render it productive, will not suffer others to bring it into cultivation without exacting a disproportionate recompense

for the permission.

It must, nevertheless, be allowed that Dacca Jelalpoor has been in a state of progressive improvement since the famine of 1787, when cxtensive tracts of excellent land were utterly depopulated, and still continue so overgrown with jungle, and so infested with wild elephants, that the peasantry find it impracticable to prosecute cultivation, their labours are so rapidly destroyed In other quarters, tracts of country formerly covered with brushwood and rank vegetation, are now cleated of jungle, and exhibit villages and cultivated The ancient mosques and Hindoo temples are mostly deserted and in rilins, but those of modern date are kept in tolerable repair. Several modern temples and obelisks have also risen, and probably many improved domestic buildings, which, from the concealed and secluded situations always selected by the natives, do not so often attract the notice of the travellei In the vicinity of the capital, and more especially to the south, are the remains of many fortresses and redoubts, built to oppose the depredations of the Mughs, and to prevent their ascending the river, but they are now all in a ruinous condition, and their cannon honey-combed and unserviceable Throughout this district there are many Hindoo schools, in which the rudiments of the Bengalese language are taught, with the principles, or rather forms, of their religion and law.

The landed estates in this district consist mostly of small thlooks, so firlded and subdivided into minute portions os to become almost evonescent The busioess of the judicial department is consequently multifarious and intricate, and the Furopean officers are compelled to have recourse for explications to the natives ottached to their respective The latter find it them m terest to render the intrescy still more perplexed and es they here as elsewhere are alone masters of the detail they are thereby enabled to aggravate the confision In 1802 the existing collector stated the following proportious of the enitirated to the uncultivated land; but the latter appear in most cases to have been underrated the revenue officers of that period being little semininted with the measuration of land

uncultivated cultivated
Southward 1-4th to 3-4ths
Northward 5-8ths 1-8ths
Fastward 1-8th 7-8ths
Westward 3-8ths 5-8ths

The most valuable sericultural pro ductions are rice betel-unt cotton hemp and sugar In 1814 the jum mo or land tax assessment amounted to 12,87 145 especs. Plain muslims distinguished by different names nocording to the fineness and closeness of the texture as well as flowered striped and cheequered muslins ore fabricated chiefly in this district, where o species of cotton named the banga grows, necessary although not of a very superior quality to form the stripes of the finest muslims for which the city of Dacca has been so long celebrated The northern parts of Benares furnish both plain and flowered muslims which are not lift adapted for common uses though mespable of sustaining any compotruen with the beautiful and immitable fabrics of Dacea. Dimities of various kinds and patterns and cloths resembling disper and damask hoen arcalso made in this district. The export of the above stanles has much decreased and the art of manufacturing some of the finest species of mushin is in dan

ger of being lost the orders for them being so few that meny of the fami lies who possess by hereditary in struction the ort of isbricating them have desisted, on necount of the difficulty they afterwards experience In finding a purchaser This declino may partly be accounted for from tho otter stagnation of demand in the upper provinces since the downfall of the unperal government, prior to which these delieste and beautiful fabrics were lo such estimation, not only at the court of Delhi but among ail the noblesse of Ilundostan os to render it difficult to supply the man tity wanted Among the more secent causes may be adduced the French revolution the degree of perfection to which this particular manufacture has lately been brought in Great Britain the great diminution of the Com pany s investment and the advance in the price of cotton

The principal towns in this district ore Daces, Narraingunge Socoer gong and Rajanagur The headquarters of the judge and ma\_lstrate nod casil establishment is at hurced poor about forty miles from the city of Dacea. In 1801 the total popu lation was computed at D38, 712 in habitonts, one holf Hindoo and the other half Mahomedan A portion of this population are sloves and the custom of disposing of persons aircaely in a state of slavery ls common throughout the country On these occusions regulas deeds of sale are executed someof which are registered in the court of justice; and when on estate to which slaves are attached is sold privately the slaves ore com monly sold at the same time ofthough a separate deed of sale is always executed

During the Mahomedan government, the Dasca province was ruled by a foujdar or commaniant, the last of whom prior to the British conquest, was Shahamut Jung Nowardsh Mahomed Khan, ochhew end son-in law to Alwerd Khan Ite was at once dewan of the whole soubth of Bengal and Nahob Nazim of Dasca, with all the territories to the easts and

It was in search of the treasures amassed by his deputy, Raj Bullub, and supposed to have been concealed by his son Krishna Das, when he took refuge in Calcutta, that Seraje ud Dowlah in an evil hour commenced the war, that for him ended so fatally.

After the British conquest this large division of Bengal was partitioned into different districts, under the jurisdiction of distinct judicial and fiscal officers, and having a peculiar court of cucuit and appeal for the superintendence of the whole. At present the most prevalent crunes of enormity in this district are murder, robbery, theft, perjury, armed affrays, the encroachinent of zemindars, and the collusion of informers by profession, who conceal the principals, and derive a maintenance from the contributions they levy on the gangs, with which they are privately connected. The inherent timidity of the natives facilitates the plunder, while his want of moral principle leads him to view the deed rather as an adjoit exploit than a hemous crime against society In recent times, however, the Bengal government, by steady and persevering exertions, has greatly reduced the number, as well as the atrocity of the crimes committed, so that in 1813, it was reported by the superintendent of police that no dacoity or gang robbery whatever had occurred during the last quarter of that year. improvement continued so progressive, that in 1815 the third judge of the court of circuit reported, that he considered the perpetration of gang robbery to have been finally suppressed. On a general view of the Dacca division, crimes of great enormity had in a manner ceased to be perpetrated, and (with the exception of burglary) other crimes were less frequent; the consequence of a more vigilant control exercised by the police departments, and a due enforcement of the penal regulations. the criminal calendars generally more Mahomedans than Hindoos are to be found, but in civil suits the latter form the majority.

The people of Calcutta who speak

the Gour dialect of the Bengalese, although confounded by the natives of western Hindostan with the Bengalese, take, when they have an opportunity, the trouble to ridicule the inhabitants of Dacca, who are the proper genuine Bengalese; and Calcutta being now the capital, the men of rank at Dacca are becoming ashamed of their provincial accent, and endeavour to imitate the baboos (opulent Hmdoo merchants) of the modern metropolis. The districts comprizing the eastern quarter of Bengal, and subordinate to the Dacca count of circuit and appeal, are Mymunsingh; 2 Silhet; 3. Tiperah, 4. Chittagong; 5. Backergunge; 6. Dacca Jelalpoor, and 7. the city of Dacca -(J Grant, Colebrooke, J. D. Paterson, Crisp, Massie, Rees, Shakespear, &c.)

DACCA (Dhaca).—A large town in Bengal situated beyond the principal stream of the Ganges, but a great branch named the Booree Gunga, or old Ganges, above a mile in width, runs past it; indeed, few situations are better calculated for inland commerce, as the river communicates with all the other interior navigations by a direct course Its site is about 100 miles above the mouth of the Ganges, and 180 by road from Calcutta, but the journey by water, on account of the circuitous route and twistings of the liver, occupies from one to two weeks, and the space gone over probably exceeds 400 miles. Lat. 23° 42′ N, lon 90° 17′ E.

Dacca succeeded to Soonergong as the provincial capital of the eastern quarter of Bengal, and it is now probably the second in the province with respect to size and population. The country around it lying low, and being always covered with verdure during the hot months, is not subject to the violent heats of Benares, Patna, The unand other places in Bahar healthy season is from the 20th August to the 10th of October, during which period the rivers are subsiding, and the inundation draining off the land, but upon the whole it is one of

the healthest and mast pleasant stations in Hengal It manufactures and esports many surettes of the finest musling in the delicacy and beauty of which fabric it surpasses the whale world

warld That Dacen is a city comparatively modern is proved by its nat being mentioned by Abul Pazel at least ander that name in the Ayeen Ae In A D 1608 the scat of govertiment was removed from Raimshal to this place by the then governor of Bengal Islam Ahan, and in com plument to the reigning emperor its name changed to Jehangire Auggur Here he built a pulace and brick fort. same remains of which are still to This transfer of the sent be seen of government was probably occaslooed by the ravages then perpetrating in the sauth-castern quarter by the Muchs of Aracan and the Lortuguese pirates onder Schastian Gonzales In 1657 Meer Jumla the great enmmander under Autengrebe pureed the unfartunate Sultan Shuja to this place, and again constituted it the metropolis the seat of govern ment heing far samo time removed ta Ramahal It is related that during the second vicerovship of Shauta hhan rice was so cheap at Dacca that 640 pounds might be had in the market for ana runce To commemarate this event, as he was leaving Dacen in 1659, he ordered the western gate to be built up and an inscription placed thereon forbuilding any future governar to open it until he had reduced the price to as cheap a rate lo consequence of which injunction it remained shut antil the reign of Serferawz hhan in 1739 But this city appears to have had mara than ana alternation of prosperity and decay It appears to have attained its greatest splendour during the reign of Aureag zebe and judging from the magni ficence of the runs such as bridges brick causeways mosques carayan aerais palaces and gardens now overspread with jungle it must have vied in estent and riches with the greatest cities, Gaur perhaps ex cepted

The earliest permanent decline of Dacen appears to have cammenced with the troubles and distractions of the Mogul empire that followed that invarian of Andr Sliah and that it dld nat experience the fate af Gonr may be attributed partly to its salu brits and partly to the peculiar commercial advantages of its situation In this state of decay it remained with little variation until the establishment of provincial councils in 1774, wh n it again exhibited a shew of opulence from which it fell an tha abolition of these institutions. During the Mogul sway the naval establish ment maintained at Dacca consisted of 703 armed cruizers, to guard the sauth-castern quarter against the ra vages of the Muchs In this watery region the veneration of the Itla doos for the tutelary deitles af their tirers is extreme and their teremonies in hanone of these exhibit a degree of cheerfulness and ammation unknawn elsewhere in which watery rituals the more solemn Mussulmans largely participate but ascribing tho overnment at the floods to hhaulch Muzzer supposed to be the prophet Tawards the end of the se-Lhas tenteenth century Daces was the residence of Azim Ashaun Aureng zebe s grandsan wha commenced and nearly fim-hed a magnificent palace now in ruins About this era alsa was probably subracated and af those engrinous and uscless guns not un common in the Decean and other parts of India and which was still to be seen so late as 1790 It was made af hammered iron and consisted of an immense tube of fourteen bars with rings driven over them and beaten dawn to a smooth surface so that its appearance was very goad, though its proportions were faulty From its size this gun must have weighed 64 814 pauads, or about the wes ht of eleven thirty two paunders The weight of an iron shot for tha gun must have exceeded 400 pounds but the experiment of discharging it probably never was hazarded

The present town stands on a great deal of graond, and including the suburbs, extends six miles along the banks of the river; but its breadth is not in proportion. Like other native towns it is a mixture of brick, thateli, and mud houses, with very narrow erooked streets, and so combustible that they are usually burned down once or twice per annum, the owners looking on with the greatest apathy. Into large earthen pots sunk in the floor they throw the few valuables they possess, and mats, thatch, and bamboos being elicap, the expenditure of a few rupees restores their edifice to all its original splendour. Dacca continues to be a very populous city, although it suffered greatly by the French revolution, its beautiful fabrics having been held in great estimation by the old French court. In 1801 the total population was estimated by the magistrate at 200,000, in the proportion of 145 Mahomedans to 130 Hindoos. Besides the genuine natives, there are many respectable Greek, Armenian, and Portuguese merchants, who diversify the society and carry on a considerable traffic The late nabob of Dacca, Seid Ali Khan Nusrit Jung, was long celebrated for the suavity of his manners, and his steady attachment to the British government, which had been recognized in various public documents by the Marguis Cornwallis, Sir John Shore, the Marquis Wellesley, Sir George Barlow, Lord Minto, and the Marquis of Hastings In 1807 an allowance of 3,000 rupces was granted to the nabob for the repair of a building devoted to religious pui poses, not only on account of the uniform propriety of his conduct and the respectability of his character, but also as an indication of the disposition of the British government to support the freedom of religious worship among all classes of their subjects. native inhabitants have always been noted as a quiet orderly race, remarkably attached to the public functionaries placed over them, and to the British cause and nation generally Travelling distance from Delhi 1,107 miles .- (Rennell, Stewart, J. Grant, Crisp, Melville, &c.)

DAHA.—A station in Tibet, twentyseven miles N. by E from Niti Pass; lat. 31° 10′, lon. 79° 55′ E.

DAI APINI ISLE.—One of the small Philippines, about thirty miles in eircumference, lying due north from the large island of Luzon or Luçonin; lat 19° 15' N, lon. 121° E.

DALIA.—A town in the Ava dominions, province of Pegu, situated on the opposite side of the river to Rangoon; lat. 16° 35′ N, lon. 96° 10′ E.

Dat now.—A town in the province of Allahinbad, fifty-four miles south from Lucknow; lat 26° 5′ N., lon. 80° 56′ E. The appearance of this place, viewed from the river, is imposing, but nothing more wietelied can be imagined than the interior, which in 1819 appeared to have lost half its population.

DALMACHERRY —A town in the Balaghaut ceded districts, 100 miles N W from Madras, lat. 13° 38' N. lon. 78° 3' E

Damack.—A town in the island of Java, fifteen miles NE. from Samarang; lat. 6° 50 S, lon 110° 38 E. This is still a populous place, and was formerly the capital of a principality of the same name. The vicinity is marshy, and the country level. A fine canal, navigable to the distance of twenty miles from Samarang, runs along the left side of the road, and terminates in the river Tanganamio, which is also navigable, the whole district being much intersected by canals, water-courses, and streams.—(Thoin, &c)

Damak Shu Mountains —A high range of mountains north of the Himalaya, about lat. 31° 45′ N, lon 78° 15′ E, which separate the district of Kunawur from the Tartar province of Lahdack.

Damaran Isle —An island in the Eastern seas about forty-five miles in circumference, two leagues distant from Palawan, lat. 10° 5′ N., lon 119° 50′ E

DANAUN (a skirt) - A intec she trict in the Alghan dominlons extend ing along the west bank of the Indus between the 31st and 33d degrees of north latitude It commences near Suppor lat. 30° 4 / N., ned stetches os far north as the custern branches of the Solumen range. The hills sooth of the salt range and the plains and valleys they include ore also generally comprehended in Da maun The plain immediately on the right bank of the Indus is sometimes distinguished by the appellation of Muklewand in which case the term Damauo 14 only applied to the skirts of the lule which is its literal meaning. In its most extended sense Damaun includes oll the country between the salt range, the Soliman monetains the indus and Sungar in Upper Sinde The principal town le Dera Ismael Khan the residence of the governor delegated by the Cobui sorereign; the inhabitants are Jula and Baloochies dark in complexion. ican and meagre in form Muklewand extends along the Indus about 120 miles its main breadth being twents fire. It is a plain of hard smooth clay quite flat smooth of grass, but aprinkled with bushes and stunted trees. The soil when much tradden. becomes o minute whilsh dust an parently composed from the slime deposited by the Indus winch in summer mundates the country to a considerable extent The river banks are covered with

a tinck jungle of low tamarisks le some places mixed with long grass end thorny bushes swarming with wild aware hog deer and all sorts of game Around the villages frequently clumps of date-trees are seen end are the only tall trees on the plain When cultivated it is prodoctive but the greater part of the plain is a waste, owing to the vices of the government and consequent thinness of the population southern section of the plate has much jungle, the north sand and in both camela of the species seen in l'indostan are reared

The country of the Merwuts is

composed of orid sandy plains, separated by ranges of hills For the purposes of agriculture it is entirely dependent on the rains, spring weter being scanty link the Marwuta nro antionary being employed in agri culturo the others range about with their herds of camels Their country is about thirty five miles square, but thinly peopled Damaun proper lies to the south of the Marwut country, and is possessed by many small barbarous and hostile tribes. Minuto portuna however, are well cultivoted the produce being bajoree jowary, and wheat The winter of Damain is consucrably colder than in most parts of lindostan frost being com mon in the morning cod the thermometer some degrees below the freezing point The summer, on the other hand is most intolerably hot the heet of the night elmost equalling that of the day, and according to native reports the inhabitants are obliged to wet their clothes before they go to sieep The peasantry throughout the province are mostly Juts and Baloochies with some limdoes that they are not allowed to possess lend and enanot pass from one master to enother without per mission, but they can at ony time quit the tribe with winch they have been dwellers. The whole of Damuon is or rather was, subject to the Cabul sovereign a authority, which was however but slightly exercised The tribes were generally bound to furnish lum with a body of horse, usually commuted into a sum of money and he also lerled a tax on the Hindoos - (Elphinstone &c)

DAMAUN -A scaport town of con arderable note in the province of Gu lerat, 100 mdes N from Bombay lat 20° 25 N ion 72° 58 E The Portuguese conquered this place so early as 1531, ood it still remains in their possession It makes a conspicuous figure viewed from the sen, the churches and houses being lo general white t but the commerce is now much diminished The anchorage is in eacht fathoms, three miles off shore, but the river affords a secure harbour for small vessels, and in spring tides during the S.W monsoon has from eighteen to twenty feet of water over the bar. Ship-building has long been the most profitable occupation here, the teak forests being at no great distance. The builder in 1818 was a Hindoo, who constructed all his ships on one model, which was too short for the breadth, thereby rendering them uneasy in a head sea. On the other hand it is admitted they wear well, stow well, and before the wind sail most furiously—(Elmore, Malet, Bruce, &c.)

Dambooloo -A village in the island of Ceylon, thirty-four miles north from Candy, lat. 7° 47' N., lon 80° 46' E.—Dambooloo-gallé, the rock that contains the cave temples, is of vast size and almost insulated, its perpendicular height above the plain being about 600 feet. temples for which Dambooloo is celebrated are excavations on the south side of the rock, 350 feet above the plam. Some of these are of immense size (one 190 feet long by ninety wide and forty-five high), and they all still contain images of Buddha and other deities, besides paintings illustrative of the history of Ceylon, the whole in remarkably good preservation. It seems probable that these vast caverns are principally natural excavations, subsequently modified and adorned by the votaries of Buddha; but no rational tradition of their origin is now extant -(Davy, &c.)

Damla.—A small town in the province of Dellii, twenty miles N.W. from Saharunpoor; lat 30° 6′ N, lon. 77° 13′ E.

Damoo —A town in Tibet, forty miles N N E from the Niti Pass; lat. 31° 16′ N., lon. 80° 4′ E According to native reports, gold mines are worked in this vicinity.

DAMPIER'S STRAITS —These straits separate the Wageeoo Isles from the island of Battanta, and have from twelve to fourteen fathoms water through the passage.

DAMPOOR.—A town in the province of Delhi, district of Moradabad, thirty-eight miles N.W. from the town of Moradabad. This place contains several mosques, and has a tolerably large and well supplied bazar.—(Fullarton, &c)

DAMUL.—A village in the Carnatic, district of Northern Arcot, about eight miles W. by N from Conjeveram, and remarkable for its fine tank and Hindoo temple.

Dandar (Dhandar) — A small district in the Gujerat province situated to the north of Palhanpoor, and thus named on account of its extraordinary fertility. According to the repoits of a native moonshee sent to examine this and the adjacent tracts, it contains 180 towns and villages; but the moonshee appears to have been too liberal in his estimate.—(Public MS. Documents, & c)

Dang.—A small tract in Northern Hindostan subject to Nepaul, situated about 100 miles N.N W. from Lucknow, and bounded on the south by the Nabob of Oude's reserved territories. The rajahs formerly lived on a high hill named Dang, but for some generations they have withdi awn to Phalabamb, situated on a hill immediately overhanging the plain, and consisting of huts with wood and mud walls, the chief's house alone being built of brick. On the hills were several iron mines, but the most valuable portion of the Dang raja's estate consisted of the Toolseepoor pergunnali, situated within the Oude dominions. Bahadur Sah, the regent of Nepaul, gave the hills of Dang to his sister, the Ranny of Saliana; but Phalabamb, or New Dang, was protected by the Nabob Vizier, and the family still continue rajas of Toolseepoor.—(F. Buchanan, &c)

Dannoo.—A town on the sea-coast of the Aurungabad province, thirty-four miles south from Damaun, lat. 19° 57′ N, lon. 72° 50′ E.

DAOUDCAUNDY.—A town in the province of Bengal, situated on the east side of the great Menga, twenty-

five miles 9 L. from Dacca; let 27° 36' \( \lambda\_t\) for 30' \( \lambda\_t\) Define, the range season there is a part of firm Dacca to Comilish partificially to by the Goomte river which in the dry season is two shallow to a limit even canons.

Plactuages — A large tom in the Balase di this stinisted on the ear 1 life of the Sone tries the try miles 4.5 N. from Paters int 2.5 N., Inn. 818 S. I. This 1 a large place and including Ahmedguner in 1820 is sall in contains 000 hours. It contains a cloth factory dependent on the commercial red decital 1 sins and also a factor from the Letna opminagent—(1 Burkanes fr)

Danawagen.—A town in the province of Delbi d trict of M stadabil seconts four miles N 1 from Delbi city int 22 17 No. lon 72 lo

Danaponau - 4 populous tout in the province of ( am hatoar, situated In an open a unity about helf a a lie distant from the river Ameracani and 133' 48 1% from henngaputsmy lat. 10" 37" \ lon. 77" 35 I. This place Is about forty restes distant form the great hills that tun south and about fifteen from the Pilacy lills in Din digit The streets here are remark ably spacious and the habitation althou h built of carth and couled with tile and thatch large and coin modions. The aljacent country is enclosed with milt I lant hed es and prigated by two fine canals which render it very productive of rice and tobucco. The town and mud fail, which still remains were taken from Tippoo in 1783 by the southern army - (F Ruchungn Fallacton, Afedical Reports &c)

Danaponet — A small carton ment in the province of Antunquand distingt of Jonner plea antly situated on ite banks of the Moota three miles. New Wiften Pagus and lately the headquarters of manatury curps in the service of the ex Peahns commanded by British officers.—(I ullarion, §c.)

DARDYLIL-A small walled town

In the Bals haot ceded territories, district of Bellary and about seven tren miles travelling distance \$ \$1 from the town of ficilary This place le beautifully estuated on the margin of a ferrie rian leter a wild moun tainons tract entered with incests, which extend from hence to the bloomhood of fligonarur A mag nificent noted ial lake for the irrica tion of the subject tien is has been firmed here by means of an embant. ment about sisty fret blak with gerat stone sluices and estending there miles from the projection point of one muintain to another ennitracted dunes the government of Tippos "ultun.-(1 Harten fc)

Banctian —A town in Tibrt situ atela fee miles horth finor Mana aatonara and suppn ed to be an enterparbetween Laxia and Lahdata Individual merchants pitch their tents here and a sout of mart continutes finon Jime to Octaber. But when tuited his Mr. Monteroff the town comit ted of only fur hou es of un introd brokka nod about tarenty-right traits, neutried hy some gran nur chants and if reculerly his historial Picking Law 1914 A. Jon 1817 13 Law 319 4 A. Jon 1817 13 Law

Danon.—A town in the Auruege hal province musty miles 5 la from the city of Aurun, alsa Is lat 15 4 ? \, lon 70° 10' l.

Danwan - A Britl hebstrict in the province of flejapoor nequired from the dominious of the ex I cohwa and at pre ent suboriknate to the Bomhay presidency The trreltney in which it is situated in the official re corde le distinguished as " the Car natic or Smithern Maliaratta coun 113 In IR-O the land was said to con t t of B parts black soll 41 mix ed 21 wet un! Il gurden =16 parts. The linerarement of this district was greatly retarded by the fallure of the corps and the cridenile of 1818-19 which was suppo el to have sucpt away 2 . 000 persons out of a comput ed population of 600,000 revenue, after deducting charges, then e.

amounted to 15,21,503 rupees.— (Thackeray, &c.)

Darwar —A fortified town in the province of Bejapoor, the capital of the preceding district, and named by the Mahomedans Nusserabad; lat. 15° 28' N., lon. 75° 8' E. In 1790 it was taken from Tippoo by the Maharatta army under Purseram Bhow, assisted by three battalions of Bombay sepoys, who bore the whole brunt of a twenty-nine weeks' siege. was then strong, although not regularly fortified, and the ditches were particularly good. The town stands to the southward of the fort, extending eastward, and was almost destroyed during the siege; but a native town is soon rebuilt and repeopled —(Moore, &c)

Dassgong.—A town in the province of Aurungabad, seventy-three miles SSE from Bombay, lat. 18° 2' N., lon. 73° 5' E.

Dattanagur —A small town in Northern Hindostan, principality of Bussaher, situated below Rampoor, the capital Here the valley of the Sutuleje, which has litherto been narrow and confined between abrupt mountains, expands, and forms a flat three miles long, well watered by canals, and producing luxuriant crops. —(Messrs. Gerards, &c.)

Dauli River.—A river of Northern Hindostan, which it enters by the NitiPass; lat 30°47′N, lon.79°56′E, and ultimately joins the Ganges, of which, from its size and great length, of course it ought to be considered the principal branch, if the Neelung does not claim that distinction. Its source remains unknown.

DAUMNAGUR —A town in the Gujerat peninsula, seventy-eight miles N.N.E. from Diu, lat. 21° 34′ N<sub>1</sub>, lon. 71° 35′ E

Daungry.—A town in the province of Candeish, which in 1816 belonged to the Peshwa; lat. 21°8′N., lon 75°8′E, seventy-five miles W.S.W. from Boorhampoor. Here is a handsome mosque and reservoir of stone, erected during the reign of

Aurengzebe by Ahmed Khan Lodi, a Patan chief.—(Sutherland, &c.)

DAUNTA—A town in the province of Ajmeer, sixty-six miles W.S W. from Odeypoor, lat. 28° 18' N., lon. 72° 41' E

Dauree —A village in the province of Malwa, situated on the north bank of the Nerbudda, eleven miles from Buckutghur, lat. 22° 12′ N, lon. 76° 23′ E At this spot the navigation of the Nerbudda is impeded by a fall of thirty feet in height and 100 in length, and is also unusually narlow, the stream for half a mile being only from twenty to forty yards wide, and the current consequently rapid. —(Malcolm, &c.)

DAWURCONDA—A district in the Hyderabad province, bounded on the south by the Krishna river, and containing the towns of Dawurconda, Pailwa, and Nardinpet. The first, which communicates its name to the district, is situated in lat. 16° 40′ N, lon. 78° 57′ E, fifty-one miles S. by E. from the city of Hyderabad

DAWULGHAUT—A walled town situated at the entrance of a pass of the same name through the Berar chain of mountains, proceeding from the south; lat 20° 33′ N, lon. 76° 20′ E., fifty-four miles south from Boorhanpoor.

Deba (or Dhapa).—A town in Tibet, division of Undes, of which it may be reckoned the capital; lat-30° 13′ N., lon. 80° 2′ E. This place stands on irregular eminences, forming the side of a ravine, descending steeply to the river Tiltil. The broken ground in this neighbourhood exhibits many extraordinary appearances, the melting snow having cut the clay into channels, leaving distinct elevated ridges, fashioned by accident into a great diversity of figures, representing castles, fortifications, houses, and various indescribable It has been ascertained that masses Deba is tenanted throughout the year, the climate being by no means so severe as from the great elevation (14,924 feet) of the valley of Sutuleje

above the level of the sea, might have been outlepated. Fine crops of own grow in the neighbourhood the meal from which is very fine and the plant, heing of so hardy a nature night be advantageously naturalized in liratain and the north of Lurope

The houses are of stone two stones blah whitewashed on the outside but excessively filthy within The town itself is subdivided into three parts first a college tha residence of the lama and his griums or monks second a nanner; ; and thirdly the houses of the viner deba, and lasty in general. In the centre of a sementele formed by the houses, are the tambs and temples of various lamas having amailer ones attached to them; these are circular at their have decreasing gradually by smaller circles, and terminating in a point covered with plates of copper like an umbrella, and gilt. In the centre above these, stands the temple of Narayan (Vishou), surrounded by houses, and painted of a red colour This is so irregular building with one door surmounted by a square small building covered with gilt brave, and ornamented with grotesque figures. Within the porch of the temple the aide walls are painted with bold sketches of a deity with large staring eyes in his head which is enveloped with a kind of glory At the upper end of the temple and immediately fronting the door is a gilt copper fi-gure of Narayan, in the European sitting posture about twenty feet high Oo his right side is a small figure of Lakshmi (the wife of Vish nu) and an the left that of a lama, also of gult copper, to his canonicals. Other Limdoo deities of brass and lamas of word, attended by their mothere bowls of water, masks of tigers, ood other animals enormous brazen speaking trumpets and other paraphernalia of superstition ore here collected.

Secular matters oro conducted by the Deba water and immediate officers of the government who are apparently in confortable circumstances. The griums, or manks, who lead o

life of cellincy arem a dirty greavy, good-humoured people, who besides performing their religious functions carry on a considerable traffic in skeep a wool and sait which they exclasinge for wheat and barley. The rules of the numery are said to be aerere, and the paraphernalia of the lemple prearly resembles that of the Ilmana Lathohe chorch. In the rock oo which that temple stands are granarie, said to contain many thousand manards for ree the lohabitants being dependent for their annual supply of that grain and barley oo the Marchas of Nin and Jawaur.—
(Mostreyl 1) they Trail, fry)

Drsa Tente.—A temple in Northern lindostan, twenty-one miles S.E. from Sernagur 1 Int 29° 50 \, lon 75° 05 E., 8,751 feet above the level of the sea.

Drastroon (Development)—A town in the province of Lahore attinated to the Dosh formed by the aggregated waters of the Situales and
Bryah oo one sade, with those of the
Hover in the other in AD 1682
when Abul Fazel compeded the Institutes of Acber it was the capital of
a district lat. 30°30°N lon. 7°37°E,
sevently five index 55°N from the
city of Lahore At present both
tawn and district are subject to Run
ject Singh, the Seik ehlef of Lahare

#### DECCAN (Ducshina)

This term which is of Sanserit origin, means the south sod was far merly applied by Hundoo geographers to the whole of the countries alto oted to the south of the Serbudda river; but the fixed nossessions of tha Mahamedana having for many centaries after their invasion of the Decean extended no further south time the river brishns, the name of Deceno came to signify, in Hindostoo, the countries between those two rivers only and such is the populae acceptation of its southern boundary of the present day The territories to the south of the Krishno and 212

Toombudra may be described as India south of the Krishna, for although along with the Deccan it has been improperly termed a peninsula, an equal-sided triangle much more resembles their figure. When Arungzebe, in 1690, had completed the conquest of what was then called the Deccan, it was subdivided into six soubahs or viceroyalties, viz.

1. Candersh (or Khandesh), the ca-

pital Boorhanpoor.

2. Aurungabad, or Ahmednuggur, recently the capital of the Nizam Shahee dynasty.

3. Beeder, or Kalberga, the ancient capital of the Bhamenee sultans

4. Hyderabad, including Nandere, the seat of the late Golconda or Cuttub Shahee dynasty.

5. Bejapoor, the capital of the

Adıl Shahee dynasty.

6. The province of Berar, the limits of which were quite undefined, and extended eastward towards Gundwana and Orissa, neither of which provinces were included by name in the Mogul Deccan, although situated within its geographical limits.

7. The Hindoo and nearly unex-

plored province of Gundwana.

8. Orissa, on the margin of the

bay of Bengal.

The general character of the northwestern quarter of the Deccan now subject to the British government, is that of a barren country, with a population evidently inferior to the average of Europe, where of all kingdoms it most resembles Hungary, a region whose fertility has been generally over-rated Like Hungary, a considerable portion of it is well adapted for the cultivation of vines, which should be encouraged if it were only to procure a more healthy beverage for the troops, than the deleterious brandy, arrack, and rum, which they daily imbibe in no moderate quantities. The climate of this quarter, composing the late Peshwa's dominions, is also greatly praised during the rainy and cool seasons. and the hot winds are of no long duration. Indeed, its openness and

height above the sea might be expected to render it salubrious.

In these extensive regions, the chief part of the population is still Hindoo, more especially in the provinces that were under the Maharatta governments. There is a considerable Mahomedan population in the countries subject to the Nizam, but those of the lower classes, who are cultivators, have nearly adopted all the manners and customs of the Hindoos.

The Deccan is mentioned by the author of the circumnavigation of the Erythrean sea, as one of the divisions of the Indian continent His words are, "from Barygoza (supposed to be Broach or Bhrigu-gosha) the country stretches to the south, hence that district is named Dachenabades, for in the language of the country the south is called Dachanos"

The first independent sovereign of the Deccan was Sultan Allah ud Deen Hossein Kangoh Bhamenee, A.D. 1337, whose capital was Kalbergah. He died A.D. 1357, and was succeeded by

Mahomed Shah Bhamenee, who died in 1374 This prince was the first Mahomedan sovereign on record, who employed a train of artillery in the Deccany wars, worked by

Turks and Europeans

Mujahed Shah Bhamenee, assassinated in 1377 Hc penetrated to Ramisserain, in the straits of Ceylon, but did not retain perinanent possession of the country he had overrun.

Daoud Shah Bhamenee, assassinat-

ed in 1378

Mahmood Bhamenee, died a natural death in 1396.

Shums ud Deen Bhamenee, dethroned and blinded in 1396

Feroze Roze Afzoon Bhamenee, dethroned by his brother, who succeeded him in 1422

Ahmed Shah Wallee Bhamenee, died in 1434

Allah ud Deen the second, died in 1457.

Humayoon Shah Bhamenee, died in 1460.

Nizam Shah Bhamenee died in

Mahomed Shah Bhamence died in

Mahmood Shah Ilhamence died in confinement A.D 1518, and with him terminated the Bhawence dipacty of the Deccan although several other pageant monarchs were auccessively placed on the throne. On the dissolution of this once powerful empire the Deccan became subdivided into the following kingdoms which will be found described under their respective lieads.

1 The Beynpoor or Add Shahee 2 The Golconda, or Guttub Sha

7 The Berar or Ommand Shahee

4 The Ahmedninggar or Nizam Shalice. 5 The Beeder or Bereed Shahee Aurengache while viceroy of the Decean under his father Shah Jehan greatly curtailed the territories of the remaining Patan princes In that region and after he ascended the throne he subdited the whole. Just at the same timehis warr with the Visharattas then springing into natice commenced and gave him full occupation during the rest of his life. His perseverance was so great, that towards the conclusion of his reign, having taken most of tho Maharatta fortresses, they were left without any resource but plunder. set their numbers continued to in crease. Vany of the powerful and disaffected zemindary joined then that their predatory forces were esti mated at 100 000 horse. At the same time In spite of Aurengache a vigilance and habits of business, the Mogul army began to fall off both in spirit and discipline The imperial nobility deproved of their jaghires by the Maharatta devastations had recourse to false mosters and did not keep up half their complement of men and horses Owing to this detachmenta could not be dispersed in pursuit of the morauders and the grand army being constantly employed in aieges left the Maharattan at liberty to plun der without molestation By their in researct activity, they stopped every

communication of supply to the im nertal camp where numbers perished by famine; they even offered up mock prayers for the long life of Aureng zelie whose system of warfare so highly farouted their depredations, In addition to this the imperial troops were tired out with a constant cam paien of twenty years grew di gusted with their employment, and remiss in their duty Sueli was the state of the Deceany provinces towards the con-clusion of the lung and oble reign of Aurencycle and from this detail the difficulties of his successors may be conjectured It is asserted by Malio medan authorities that Zullficar Khan one of Aurengrebe a best generale during alx months, had nineteen actions with the Valurattas and pur sued them from place to place above 6 000 miles In marches and counter

marches In 1717, Sixam ul Mulck obtain ed possession of what remained of the Moral conquests in the Decean. which from that period virtually ceased to form a part of the Delhi empire The Decean continued subsect to the Airam and Mahrattas until the Briti h avrendancy which may be dated about A D 1603 and their paramount soverenaty mace the wars of 1818, at which era direct possession was obtained of a large tract of conotry described in the next orticlo as the " British Decean three years after the districts on the Aerbudda were ceded to the British government the natives began to level the forthestions round their villages, alleging that as they were now coo vinced their attachment to the British government would be permanent for tifications were no longer necessary besides which the population of these villages had so increased that there was not room for the inhabitaots within the old boundary The modern provinces comprehended within the geographical limits of the Deccan are the following era

I Gundwans

2 Orisin

3 The Northern Circurs

5,	Berar.
G.	Becder.
	Hyderabad.
8	Aurungabad.
	Bejapoor.

Under these heads, respectively, and the districts into which they are subdivided, further statistical particulars will be found. The rivers of the Deccan are too impetuous for navigation, when they are swollen by the periodical rains; and in the hot season too shallow except near their junction with the sca, which is invariably obstructed by sand-banks. Under these eireumstanees, the transportation of grain and merchandize became, at an early period, an occupation of considerable importance, the roads being nearly as impassable for wheeled carriages as the rivers were for boats. The whole of this great interchange has in consequence been always conveyed on bullocks, the property of a people termed Bunjaries, not aboriginal natives of the country, but mostly emigrants from Rajpootana, (Scott, Sydenham, Wilks, Ferishta, Briggs, &c.)

DECCAN (British).—This territory comprehends the districts of Candeish, Poona, Ahmednuggut, and Darwar, whieli from the information collected up to 1821 were estimated to contain 70,000 square miles The aggregate population (exclusive of villages belonging to Sindia, Holkar, the Nizam, and others, intimately mixed with the British possessions) was then calculated at 1,795,700 persons; but this does not include the city of Poona, the alienated villages in that district, the late cossions to the Nizam, nor the wandering tribes. By a comparison of the revenue of the excluded portions of this country with that of the British possessions in the vicinity, the population of which has been ascertained, the following estimate may be ventured on, and as Colapoor is not included, it nearly corresponds with Mr. Elphinstone's estimate of four millions

	Persons.

3,751,353

The number of government villages was 7,229; of villages alienated, as Jaglure, Sermjamniy, δ:c Umber, the eelebrated revenue intendant of the Decean, under the last of the Nizani Shahee princes, appears to have concluded a standard village settlement of all the countries This appears to under lus control. have been a fixed money rent, formed with reference to an equal share of the crop between the government and the cultivator; or two-fifths to the first, and three-fifths to the last. 1820, the revenue of the Deecany districts was 59,60,296 rupees, and it was expected that by 1830 it would have increased ten laes more: but so rapid was the improvement, that in June 1822 it already amounted to 76,63,411 rapces. In 1820 the mints of Kittoor and Moodhul had been suppressed, and that of Shahpoor transferred to Belgaum, and it was intended to substitute one uniform coinage for the infinite variety of currencies then eirculating through the districts.

From the answers to queries, it would appear that slavery is very prevalent in the British Decean; it is, however, a mild and mitigated servitude rather than absolute slavery. Many Brahmins have children by female slaves, who are designated Sindeys, and do not acquire the pure Maharatta blood until the third generation. The crimes here are principally committed by Bheels, Ramooses, Mangs, Dhers, Coolies, Korawars, Mewaties, Bedurs, and persons from distant countries. In 1822, Mr.

Chaplan estimated the whole number of horses from the Tupte to the Toombudra at only 20 000; excluding those of the Sanara Hoya but as cluding the of the Jaghredars; and of the above number more than half were mere poales. Within the immediate British possessions he did not thish there were more than 6,000 horses, and of these scarcely one fit for the British cavalry, yet as late as 1817 and 1818 the plains of the Decaro were entered with horsemen.—(Chaplan, Thackery Liphinaton 9c)

DECAMAL (Dalshinalaya the south ern rendence) -A town in the province of Orwan, the capital of a tributary zemiadary is the district of Cuttack, forty tolles \$ \$ 15 from the town of Cuttack; lat 20° 89 h., ion 83 45° E. The extreme dimen sions of this remindary are 112 miles from east to west, and eighty seven miles from north to south; the produce consists of rice, cotton, sugar-cane, timber dammer, from honey, and wax The annual inbute In 1814, paid into the Cuttack treasury was 4 780 rupces the estimated profit remaining to the remindar, 50,000 rupees - (Richardson, de)

# DEL III

(Dilli).

The imperial province of Delhi is situated principally between the twenty-eighth and thirty-first degrees of north latitude. To the north it is bounded by Lahore, and Northern Hindostan west of the Goggra; to the south by Agra and Ajmeer, on the east it has Oude and Northern Hindostan, and on the west Ajmeer and Lahore The principal modern geographical and political subdivisions are the following

I The assigned territories

2. District of Burelly,
3 District of Moradabad,
4 District of Shajehanpoor,

- 5 The jaghire of Rampoor, 6 & 6 District of North Sahr runpoor
- 7. District of South Saharunpoor or Merut.
- 8 Hurriana
- 9. Sirhind
- 10 Pattialah, and various petty Seik states

The commencement of the long range of hills, of moderate elevation, extending through the Macheriy dominions towards Jeypoor, is at Wuzeerabad, a small village on the banks of the Jumna, a little way above Dellin The range as far as Sonal, with the pergunnahs of Palam, Nunffghur, Padshapoor, Fnreedabad, and Palce Pakul, is inhabited chiefly by Goojurs; the second, commencing on the west at Padshapoor, to the Acberpoor ghaut beyond Alvar, by Mewaties Besides the Ganges and Jumna, the chief rivers are the Caggur, Chittung, and the almost extinct Sereswati, formerly a most distinguished stream. The first proceeds by Shahabad, Kotam, and Moonuk, towards Bhatneer. banks are in general steep, and it has a small current of water. The Sereswati, while it has any water, flows

past Mustaphuhad and Thunesur, and joins the Caggur near Moonuk. The former course of the Chitting, which is supposed to have been brought from the hills by Ferose Shih, was by Ladooah, Dalchoor, Jeend, Hansi, and Hissar, to Bahardaran, forty-eight miles W. by S. from Hissar, where it is lost in the sands; but the channel of the river is not now to be traced further than Jeend, and from the scantiness of the stream, the water during the dry season schoon reaches beyond Dalchoor.

In so and a country, where cultivation so entirely depends on un adequate supply of moisture, the importance of canals and water condnits is so obvious, that the British government has latterly directed a great deal of its attention to the restoration of the ancient ones and the construcof new. The canal of Ali Merdan Khan, extending from the river Jumna opposite to Kurnaul to Dehli, a direct distance of 100 miles, had long been choked up In 1817 Capt. Rodney Blane, of the Bengal Engineers, was appointed by government to restore it at an estimated cost of about 3,50,000 rupees. The chief difficulty consisted in constructing such an embankment, where the water is taken from the Jumna, as would resist the floods, which operation, together with the excavation of the channel 180 miles in length, with sluices and lateral branches, was completed in May The water was turned into it on the 22d January, but on the 11th February had only reached Bhowanny, sixteen miles from Delhi, its tardiness being attributed to the quantity iminediately absorbed by the soil, and abstracted by the farmers to assist the irrigation of the contiguous lands. It prosecuted its fertilizing course, and as the water approached the 1mperial city, it was hailed by a great concourse of inhabitants with joy Until the renoand exclamations vation of this canal, the people of Dehli had no pure water to drink, the well and Jumna water being much adulterated with saline and other deleterious impregnitions.

The total actual disbursement in curred in effecting the restoration of this const amounted to 2 "\_,603 res peer the collections of one year after its completion to \_3, 40 rupees after meeting all charges and will no doubt gradually increase Up to 1823 It had not been found practicable to establish a permanent channel between the head of the canal near the hills and the Jumna, the water of that river being still thrown into it by means of temporary dams and it is consered by the same cootrivance acro . the Soomh a mountain torrent nearly dry in the hot season which crosses the canal a little below its heal The bed of the Junna being hable to extensive changes, any chan nel that might be opened would prohably be ere long choated up with Could the water of the canol be kept up to the same level during the whole year to afford at all seasons the same facility of irrigation, much more land would be brought into cultivation and the coster crops give place to more valuable ooes such as wheat, cotton, and sugar On account of the extrema sandmess of the soil near the Soomb where the reverse is nost wanted no solul foundation can be obtained to admit the construction of a work of masonry with since gates, and suffi evently strong to resi t the violence of o swollen torrent. This canal in its course from the hills is do the guished by different names; the Delhl or Al: Merilim Khan a canal properly commences from humani, above which town it has various names such as the Shoh \chr or \chr Behesht and the Doab or Labeto Khan s canol

On the completion of this beneficent enterprize, the same mentiorious officer (Copr. Blane) was directed to undertoke the restoration of the canal of Sultan Ferozo Shah bot unfortunately died soon after the completion of the first underraking This canal (Feroze Shoh's) separating from that of Delhi o little below hurnaul stretches to the westward through the flurrana by Hansi and Ili sar to the frontiers of Bicanere. The primary object of its construction was to furnish the means of ir rigation to the above tract wholly dependent on the periodical rains the wells being of extraor dwary depth and the water frequently bracklish The branch lead ing through the city was a subsequent an I subordinate undertaking In 1823 the utmost expense estimated for ha resturation was E.00 000 rupees for which sum an extensivo tract of land, now sterile and waste will be ren dered expable of the finest cultivation and will soon reimburse the outly incurred

In It 2 Zabeto Khan s or the great Doah canal was urdered to be sur rejed This canal separated from the Jumpa a few miles below where that river issues from the northern mountains and after a coorse of about 150 miles ngain jained that riser nearly opposite to Delhi having passed through Saharumpoor Ram poor bhamler and other towns of note and fertilized an extensive tract of country formerly highly columnted and populous, but now sterils and waste. It has never been ascertained who was the original constructor of this canal which received the name of Zaheta khon from an attempt maile by that Robilla chief to restore it but which was in existence long prior to his time In 1823 the designotion of " Hastings canal which by on absurd strain of flattery had been applied to the renorated canal of All Merdoo Khan was ordered by the Rengal government to be discon tinued and the old nome restored

There is on portion of Ilindostan susceptible of greater improvement by irrigation than the province of Delhi, and its probable that o great extent of moring sand, at present not merely unproductive, but threatening to overwhelm the adjacent lands, might be a, an brought into culturation hotter in Late has pointed out to the British government the mode by which her territories un Ilindoston may be most beofficially fostered when is, by regulating the

490 DELIII.

redundance of moisture supplied by her noble rivers, so that none shall be lost There is no other employment in which capital, public or private, can be so profitably employed, and at the same time so greatly improve the condition of the inhabitants. ancient times many streams traversed the north-western quarter of the Delhi province which have long ccased to flow, and one of them, now almost extinct, the Sereswati, was of such magnitude as to mark a geographical region in Hindoo mythological history. With little trouble or expense, when compared with the benefit, these rivers might be again led into their former channels, and much valuable water, which now flows undisturbed thi ough the Sutuleic and Jumna to the sea, might be arrested in its progress, and made subservient to the purposes of husbandry. objections to these excavations are the difficulty of conducting a stream across a territory intersected by deep ravines, and the political state of the province, a considerable portion of which belongs to petty native states, in the improvement of which the British nation has no direct interest. According to Mahomedan authors. Sultan Feroze the third dug a canal from the Sutuleje to the Jedger, and formed also many other water-courses and conduits, which in the confusion of succeeding events were neglected, and have long been so completely choked up, that all traces of them have disappeared.

The western quarter of this province, especially the Bhatty and Hurmana countries, suffers greatly from drought in the hot season, when water can only be procured for which the inhabitants are obliged to dig from 120 to 200 feet deep, and even then they only arrive at what is brackish During the rainy season, the Caggur and other temporary streams overflow, after which the pasture is excellent, and the country tolerably healthy, until the desert in the west becomes intensely heated. In the latitude of Anopshehr, between the Ganges and Jumna, this province dis-

plays a naked sterility seldom disturbed by the intervention of either trees or cultivition, having been, for more than a century prior to its acquisition by the British, devastated by every victorious or defeated fac-In the territory between the Jumna and Sutuleje mango-trees are numerous, and the soil produces wheat, barley, gram, and other grains. This portion of the province is not quite so arid as that further west, but the periodical rains are not sufficient to insure a crop, irrigation being also neecssary, while water is ten and twelve cubits from the surface.

Compared with Bengal and the Company's old territories, the province of Delli has few inhabitants to the square mile, but they must have rapidly increased during the last twenty-two years of uninterrupted tranquillity. They consist of a mixture of Hindoos, Mahomedans, and Seiks, the latter religion being most prevalent in the north-western quarter, which is almost entirely occupied by petty Seik states The principal towns of the province are Delhi, Bareilly, Pillibeet, Shahjehanpoor, Rampoor, Moradabad, Anopshehr, Merut, Seerdhuna, Saharunpoor, Pattialah, Ambahlah, and Sirhind, under which heads, and the territorial subdivisions respectively, further local details will be found.

THE ASSIGNED TERRITORIES OF Delhi —On the expulsion of the Maharattas from Upper Hindostan in 1803, a large portion of territory (sometimes called the Delhi district) was assigned for the support of the emperor and royal houschold, consisting of a number of pergunnahs, the revenues of which continued so gradually to increase, that in 1814, they were not only sufficient to defray the expense of supporting the royal family, but left a considerable surplus applicable to general pur-In 1813 the jumma or land assessment amounted to 12,56,505 rupees, and a further increase was looked for by the falling in of certain large jaghires by the death of the existing

inemphents. Indeed, from the investigation of Mr Forteseue the com missioner, it was discovered that this tract had been long subjected to most improvident alienations From tho commencement of the reign of Baber to the conclusion of that of Alum geer the Second, a space of 274 years comprehending the reigns of nine emperers not more than sixty-six villages appear to have been granted away in perpetuity t whereas, during the reign of Shah Allum (forty-eight years) not less than 122 were alie nated for ever, and of these eighty eight were transferred in perpetuity. without reference to the emperor, by the Viziers, Peshwas Sindias and other chiefs, who had usurned tho privilege of alienating the national revenue simultaneously and co-existently

In 1820 the augmentation of what had hitherto been called the assigned territory had become so great, as te render a new arrangement necessary A civil commissioner and four assistents, each having charge of a divi sieo were in consequence eppointed to superintend the revenue collection. indicature, and police, the military and political regulations still remain ing with Sir David Ochterinny, tho resident The name of Assigned Territory was also sholished it having slwsys been in fact an integral part of the British duminions and the commissioner (Mr Fortescue) was especially directed to remove all intermediata agency between the savereign of the soil and the rynt or cultivator -(Public MS Documents, Local White Metcalfe Fortescue Fullarton, Blane Fickell, &c )

### THE CITY OF DELIH

(Dille; in Sanscrit Indraprast'ha)

The ancient capital of the Patan and Mogal empires siteated in int. 28° 41′ Nn ion 77° 5′ E. During the splendid era of Delhi, according to popular tradition it covered a space of twenty square miles and the rulns at present occupy nearly as great in extent but notwithsteading its great extent to the content of the provinciance of the provincian of the

antiquity, eed the long period of time during which it has ranked as the first city of Hindusten, there in nothing in its locality particularly attractive, the adjacent seal being rather of a sterile than fruitful description. and the river ununyigable during the dry scason for boats of any consider able burthen Under these dead vantages, however, it had become a city of great fame and magnitudo he fore the Mahomedan iovasma when it was distinguished by the Ilindon books of mythological history by tho appellation of Indraprast ha In A.D 1631, the emperor Shah Jehan founded the city of New Delhi on the west bank of the Jumes, which he named Shahjehanabad It is about seven miles in circumference and a large sum has been recently expended in renovating its walls which are now in a good state of repair, and faced along their whole extent with substantial masonry, constructed of large blocks of a bright grey granute. Martelio towers have been likewise erected at intervals for the purpose of flanking the defences, the old bastions being et too great distances from each other to answer that end effectually

This city has seven gates, riz. Lahare-gate, Ajmeer-gata Turkomun gate, Delhi-gate Mohor-gate and Cashmere-gate; all built of free-stone Near the Ameer-gate is a madrisva or college of great extent, built by Gharl ud Deen, the grandson of Mi ram pl Mulk The tomb of the founder who with his family lies entombed here, is much admired for tho exquisite sculpture of its screen, of white murble, as are also the tombs of Kummer ud Deen Ahan and his family in the vicinity Within the city of Shahjehanabad, or New Del he are the remains of many splended palaces which farmerly belonged to the great omrahs of the empire Among the largest are those of Kum mer ud Deen Khan, Alı Merdan Khan, Ghazi ud Deen Khan and Seldar Jung There are also the garden and palace of Condsenly Beruin the mother of the emperor Mahomed Shah, the palace of Saudit

492

Khan, and that of Sultan Darn Shekoh, the unfortunate brother of Aurengzebc. The first is now a dilapidated ruin, and the last has been convered into an English dwelling, and is now occupied by the resident. They are all surrounded by high walls, and take up a considerable space of ground, as they comprehend baths, stables for all sorts of animals, and music galleries, besides an extensive scragho.

In this quarter of Delhi are many very fine mosques, still in good repair, the chief of which is the Jumma Musiced, or great cathedral, elevated above the rest of the city, and a truly noble structure, begun by Shah Jehan in the fourth, and completed in the tenth year of his reign. It is composed partly of the fine dark red sandstone, and partly of white marble. Not far from the palace is the mosque of Roushen ud Dowlah, where, in 1739, Nadir Shah sat, and saw the massacre of the unfortunate inhabitants Besides these there are forty other mosques, some of which bear the marks of considerable antiquity This applies more particularly to the black mosque, a large and gloomy edifice of dark coloured granite, whose rude internal columns, clostered area, numerous low eupolas, and lofty outer walls, devoid of aperture or ornament, denote an origin coeval with the earlier Afghan dynastics. Other eurious remains of Afghan architecture are to be found in the plain to the south of the city. and in the fortress of Selimghur, which, both in their style and workmanship, form a remarkable contiast with the light, graceful, and highly decorated structures of the Moguls.

The modern city of Delhi contains many good houses, mostly of brick. The streets are in general narrow, with the exception of two, the first leading direct from the palace to the Delhi gate, which is 1,100 yards long by thirty broad, the second from the palace to the Lahore gate, which is a mile long by forty yards in breadth The first has an aqueduct down the middle, now again repaired and sup-

plied with water from the restored eanal of Ah Merdan Khan cloths and indigo are still manufactured in the town and neighbourhood, and n manufactory of shawls has reeently been established with success by nn enterprizing Hindoo incrchant, who imports the wool, and has engaged native Cishmerian weavers to superintend the looms The chief imports are by the northern caravans, which bring from Cashmere and Cabul slinwls, fruit, and horses. cious stones of a good quality are to be had at Delhi, particularly the large red and black cornelians and pecrozas, heedree hookah bottoms are nlso minufactured here The eultivation in the neighbourhood is chiefly on the banks of the Jumna, where wheat, rice, millet, and indigo are raised.

The city was formerly partitioned into thirty-six divisions, each named after n particular nobleman who at some period had his residence in that quarter, or from some local circum-The modern Delhi is built on two rocky eminences lace was built by the emperor Shah Jehan, it stands on the west bank of the Jumna, and is surrounded on three sides by a wall of red stone, thirty feet high and above a mile in circumference Part of the interior is now (1819) occupied by a public bazar, and the once splended hall of the Dewan Aum, with many other principal buildings, have been long consigned to filth and neglect. Some structures, however, still remain in sufficient preservation, more especially the Dewan Khas, or chief hall of audience (an open quadrangular arcaded terrace of white marble, richly ornamented with mosaic work and sculptures in rehevo), and the small but beautiful marble chapel of Aurengzebe, to impress the beholder with a just conviction of the former magnificence of the Mogul monarchy. The walls of the palace are intended for defence as well as seclusion, and are preserved with great eare. gardens of Shahmai were formed by the emperor Shah Jehan, and are

said to have cost one million sterling Hardly o vestige of its forioer stote now remains, except one small build iog probably ooce on opartment of Shah Jeban a paloce, but now com prizing part of a house occupied by the British resident The area bas been cooverted loto a neat mark, ond the verduro of its orange-groves forms on agreeable cootrast with tho black and orid aspect of the odjaceot country They appear to hove oe cupied about one mile in circum ference and were surrounded by a high brick wall The prospect to the southward of Shohmar as far on the ere can reach, is covered with the remaios of extensive gardens, pavi llons mosques, and sepulchres oll desolsto and in cums The obset vatory is 10 the vicioity of Delhi where it was crected by Raja Jey augh in the third year of the emperor Mishomed Shah but it hos since been repeatedly pluodered and the instruments destroyed

The ruins of old Delhi cover the plan for en extent of nearly eight miles to the south of the modern Shahjehonsbad, and connect that city in the wealth of its bazars or in the with the village of Cuttub exhibiting throughout this vast tract one of tho most striking scenes of desolation to be reet with throughout the whole world Some of the gates, carsvanserats and musques of the an event city are still tolerably entire but the objects most worthy of attention are two splendid mansoleums of the Emperor Humoyoon and Sef dar Jung the second vizier of Oude the smaller but oot less elegant seputtures of Khaneh Azım, the em peror Mahomed Shah ond Jehanara Begum daughter of Shah Jehan tho fort of Shere Shah the temporary reviver of the Paten dynasty and the currous remains of old forts and other buildings ascribed to the em peror Feroze Shoh In 1823 Capt Tickell recommended to government to have a regular plac of the city and suburbs of Delhi ovecoted by o Europeao engineer a document which woold no doubt prove highly inte restrog to the immediate residents and

to the poblic ot large Besides this it would greatly facilitate the trac conveyed water to the numerous gardeos &c in ond about that city. which the inhobitants, since the restoration of the Delhi canal, ore daily searching ofter and clearing out tho sand and rubbish with which they are choked un

Although the present population of this city will bear no comportson with that of the time of Aorengrebe when it was reported of two millions set it has certainly largely locreased since it came under the protection of the British government The com modious situation of Delhi for o great mland mort, for the soterchange of commodities between Indio ood the countries to the north and west. has, under the circumstances of accurity which property now enjoys compensated in some degree for the reduced expenditure of the imperial tourt, and there are perhaps few if nny, of the ancient cities of Hindontan which of the present moment will be found to rival modern Delhi attivity and other indications of a numerous and busy population The travelling distance from Calcutta by

The Jumno overflows here during the rainy season to a wide extent, but unlike the Genges does not confer fertility In this part of its course it as so strongly impregnated with na-tron extensivo beds of which abound in the neighbourhood, that its waters destroy vegetation instead of promoting it and the whole space between the bigh banks of the river while in its low state is a loose and perfectly barren sand like that of the sea-shore It most nofortunotely happened that during the year 1824 amidst all the other misfortunes of droomht and scarcity the Jumpa changed its course and the caosi became dry The sufferings of the inhabitants were great water was brought from a considerable distance (the wells during the existence of the canal having been neglected), and

the Birboom road is 976 miles

494

sold high, and the gardens were quite ruined. It was not until the middle of November that the canal could be restored, when its approach was hailed again, with similar expressions of joy as when it made its appearance.

Rajas of Delhi or Indraprist'ha are mentioned by the Mahomedan historians so early as A D. 1008, and in 1011 the city was taken and plundered by Sultan Mahmood of Ghizni, but restored to the raja as a tributary.

A.D.

1193. Cuttub ud Deen, the slave of Mahomed Gauri, took possession of Dellin from the Hindoo princes, and commenced the series of Afghan or Patan sovereigns, which reigned until the invasion of Baber, the great grandson of Imour.

first entered Delhi 1750. Shah Jehan the second. de-

throned in 1760

1701 Shah Allum the second This monarch commenced his reign hy an unprovoked and ill-con ducted attack on the Britash in Bengal and Bahar then recently acquired; but finding lumsoff buffied and defeated, he soon

ofter voluntarily surrendered himselfin the British comp with out treaty, condition or atiou On the ocquisition of the Devanor in 1765, o peorioo of twenty-six lacks of runees was settled on lune with a considerable tract of fertile territory in Upper Hindostan ; both of which he forfested in 1771, hu autting the protection of his henefactors, and rensump to Dellu, where he became a pri soner and political tostrument, under the custody of the Alebarattas, who about 1770 had acourred possession of that city In 1788, Gholeum hander, tho Robilla having by a sudden ir runtion made himself master of Delhi seized the unfortunate emperor and after exposing him for many weeks to every species of mult and degradation, in order to extort the disclosure of supposed concealed treasures concluded by piercing his eyes with a dagger so as completely to extinguish the sight. For the attalnment of the same object he messacred, starved to death and tortured many of the rotal family and of the chief laba bitanta of Delhi ; but being compelled to evacuate the city by o letschment from the army of Madhelee Stodie he was cantured during his flight, and ex pared onder the tortures he had so mercilessly inflicted

Nor was the misery of the Moral emperor's condition much alleviated by the transfer in jaghire, which about this period took place of Delhi and some adjacent territory to the Freech officers commanding the corps of disexplined infantry retained in the acr vice of Madhejee and afterwards of his nephew Dowlet Row Sindia for elthough he came successively under the estensible superintendence of M de Boigne, M Perron and M Dru geon he effectually remained a pri soner in the hands of the antive Maharatta officers, and subjected to all their proverbial rapacity During

1802, when there were fifty-two sons and daughters of the emperor, the monthly stipend allowed to each prince of the imperial family did not exceed fifteen rupees per month (£21 per annum); and the sums disbursed by M. Drugeon, who had charge of the emperor's person, for the aggregate expenses of his majesty, the royal family, dependants, and establishments, amounted only to 17,000 rupees per month, or £23,664 per annum; while the Maharattas retained and converted to their own use all the gardens and houses in and about the city that were royal property, and perpetrated the most atrocious crimes, in the name of their royal prisoner, for the purposes of fraud and extortion.

Such was the desolation of this ancient capital in 1803, when Lord Lake, having deseated the army of Dowlet Row Sindia, six miles from Delhi, on the 11th September, entered it next day, to the infinite joy of the aged emperor; and the Maliaratta sway being subsequently completely annihilated in Upper Hindostan by a series of discomfitures, the Bengal government proceeded to make arrangements for his support. As a commencement, all the houses, gardens, and lands, of which the royal family were deprived by the Mahaiattas, were restored to them, and these soon became of great value from the increased security of property. It was also determined that a specified proportion of the territories in the vicinity of Delhi, situated on the right bank of the Jumna, should be assigned in part of the provision for the maintenance of the loyal family, these lands to remain under the charge of the resident at Delhi, but the revenue to be collected and justice administered in the name of the emperor Shah Allum, under regulations to be promulgated by the supreme government. That his Majesty should be permitted to appoint a dewan and other inferior functionaries, to attend the office of the collector, for the purpose of ascertaining and reporting to his majesty the amount of the receipts, and satisfying his mind that no part of the revenue of the assigned territory was misappi opriated. That two courts should be established for the distribution of civil and eriminal justice, according to the Mahomedan law, to the inhabitants of Delhi and the assigned territory, but that no sentence of the criminal court extending to the punishment of death should be carried into execution without the express sanction of his Majesty, to whom the proceedings in all truls of this description should be reported, and all sentences of mutilation to be commuted to hard labour and imprisonment. To provide for the immediate wants of his Majesty and the royal household, the following sums were ordered to be paid in money from the treasury of the resident at Delhi

lebrution of certain festivals

The most urgent wants of the aged monarch and his family being supplied, various municipal improvements were effected, some of the canals were cleansed, the principal streets eleared of rubbish, and an efficient police established. The punishment of mutilation was abolished in this and all the adjacent territories sub-

ject in the British jurisdiction; and a regulation was enacted directly, that when a person by the Mahomedan law was condemned in loc two limbs, the decree should be commit ed to impresonment and hard labour for fourteen years a and If one limb the same for seven years. The frequent assa unations that were customary during the Maheratta administration were effectually suppressed more by the institution of regular court to which the ageneved im ht appeal, than by sanguinary examples or any extension of the penal cride But in thus protecting the person and increasing the comforts of the Mogul emperors, it was never lo tended by the British government to employ the royal prerogative as an instrument to establi h any control over the different states and prioces of India. An object of importance had been attained by his rescue from the custody of the French and Va harattas, who usurped his name to sanction these machinations for the subsersion of the Belil h emplee in Hindostan and detained in the most degraded condition of poverty and limit this nofortunate representative of the house of Gengu, Ti mour Baber, Acher, and Aumingrehe The most rational course appeared to be to leave the Ling's authority exactly in the state lo which it was found and to afford the royal family the means of subsistence, not merely in a style of comfort but of decent splendour not unsultable to a fallen but Illustrious race to whose power the Butish nation had in a great measure succeeded

From this period (Sept 1803) the tranquility of Delh remained undisturbed until October 1801 when Holcze, who was retreating from Mis thurs before Lord Loke, sent this relative, provided with a formidable train of artillery to invest the enty; and the steps was accordingly commenced on the seventh day of that month. Owing to a variety of pressing exigences in other quarters, the garrison at this sline was not only too small fire the deferee of so immense.

a city (the walls of which best les their great estent, were accessible on all sides), but extremely faulty in its composition consuting partly of 300 lematics robbers by profession and a body of irregular horse whn e falchty could not be relled on. The Menathe fuetified their previous character by going over to the enemy at an early stage of the sieget and the leregular horse their's, by flying on the approach of the enemy who In ennsequence approached close un to the walls Having opened their batteries a few days afterwards, and percent breaches being effected as much by the concursion of the gnns on the crumbling ramports as by the artiflere the enemy made an attempt to carry the place by escalade in which they were repul ed and soon afterwards their guns were spiked in the batteries by a well-conducted sortic onder I frut. Rose Being thus baffled in all their endeavours they moved off an the 15th October, al though they had prepared their mines, fald under the bastions between the Turknman and Aimeer gates, one of them pushed directly under the bastion and ready to be loaded. In this manner, by the Indictions arrangement of Colonels Burn and Othterlong and the determined resistance of the garrison a small force was enabled to sustain a alere of nine days repelled an assault and defended a city ten miles lo circumference which had ever been heretofore given up on the first appearance of an enciny

Shah Allum survived this event until December 1800 when he finds ed n long and calamations reign of forty five years to the eighty-shird year of his bite, and on the same day his oldest legitimate soo Acher was placed on the throne. The succession of this prince was marked by the most uncessimpled tranquility the commencement of every prince's reign halfug been invariably stalined with thoughted and distribed by tumult and commetton. But although peace precided with thost discording the survival and distributed and willing the walls of the sergiple, and willing the walls of the sergiple, and

Acber the second had scarcely been seated, when, at the instigation of unprincipled advisers, he commenced a series of intrigues, with the view of effecting the exclusion of his oldest son Abul Zuffer, aged thirty-two (to whom he had taken a preposterous aversion), and of procuring the sanction of the British government to the nomination of his fourth and favourite son Jehandar Shah, as Wulli Ahud, or heir-apparent. The causes of the different princes were supported by parties within the walls, and the most contemptible acts of meanness and absurdity practised by the different factions. The cause of the legitimate heir, however, was fast declining, owing to the unnatural hatred of his father, who being naturally weak, was perplexed by the artifices of his servants, among whom no honest man could remain without external support. Being entirely ignotant also of his relative situation to the British government, he persevered in his determination to alter the line of the succession, notwithstanding the reiterated remonstrances of the resident, who soon found that the effect of the kindness of the British government was quite destroyed by the impositions practised on him by his family and attendants, each of whom claimed the merit of accomplishing every measure in which his protectors acquiesced.

Accordingly, after several preliminary steps, Acber the second proceeded to the extremity of proclaiming his fourth son, Jehandar Shah, heir-apparent, under the pretext that the eldest was disqualified for such an elevation by the weakness of his ıntellects In this emergency the interposition of the British government became necessary, and the resident at Delhi was in consequence directed to institute an investigation regarding the sanity or derangement of the legitimate successor. sult of this was highly favourable to him: and the fact being established, his majesty was informed, that it was an invariable maxim of British policy never to pass over the next in suc-

cession, and lawful claimant to the throne, unless circumstances were so strongly against him as to preclude all hopes of improvement or amendment, that in the present case no such urgency existed, as the heirapparent's mind seemed quite equal to his duties, and that the evils which would originate from an irregular succession were too great to permit so momentous a deviation, merely for the possible benefit to be derived from a prince of greater abilities. Neither could any thing very satisfactory be expected from the conduct of such a sovereign as that of his favourite Jehandar Shah, whose youth, and whatever abilities he possessed, had been directed to the base purpose of supplanting his eldest brother. To prevent the recurrence of the miserable artifices which had so long distracted the interior of the seraglio, and now threatened the capital with commotion, Jehandar Shah was ordered to take up his residence at Allahabad.

The prosperity of the territories assigned in 1803 for the support of his majesty and the royal family, continuing progressive, in 1812 his stipend was augmented to one lack of rupees per month, or £139,200 per annum. On their first acquisition in 1803, they were leased on a triennial settlement, and the first year they yielded only 3,53,952 rupees ( $\pounds 41,058$ ), but so rapidly did a few years of tranquillity and good government ameliorate the condition of the cultivators, and the productive powers of the land, that in 1814 they realized 12,56,505 rupees, or £145,754. Nor did the ancient and venerable capital experience less benefit from the transfer than the surrounding territory, although the effects were not so quickly perceptible; and no improved system of government could wholly compensate for the absence of a splendid and Ever since the luxurious court. death of Aurengzebe, when it was loosely estimated at two millions, the population of Delhi had been gradually decreasing, and under the Sindia funily its decline was so uninter rupted that the land within its walls became of little or no value to the owners, who careleasy disposed of their rights for ony trifle of ready money and frequently to exope extentian disclaimed their properties altagether. Of this supmeness they had subsequent cause to repent far no sooner had the eity surrendered ta Lord Lake, than the value of the hauses and lands within the wolls instantaneously doubled and have been ever since progressively increasing

Among the mast magnificent and useful memarials of the taste and splendour of the emperor Shah Jehan remaining ot Delhi is the well belonging to the Jimmin Musiced (chief masque or cathedral), which had been excavated at an immense expense oat of the solid rack on which that edi fice stands. The water is raised by complicated machinery and o suc cession of reservoirs to the area of the masque where at the top of a grand flight of stores it fills a small fish-pond and is of great utility to all ranks of persons, but more especually to the Mahomedans in the performance of their prescribed nblutions. For many years the decayed stote of the principal wheels, and tha rumous condition af the machinery rendered the supply of water both difficult to procure and extremely limited in quantity At length in 1809, it completely failed and the consequences during the intensity of the hat season were extremely distressing to the inhabitants, and exerted con siderable interest in the mind of the emperor Under these circumstances Mr Seton, the resident at Delhi conceiving that the repair of the well at the expense of the British govern raent would be highly gratifying to tha inhabitants authorized its being put in a state of repair and the ex pense lacurred was subsequently annetioned by the outhorities to Cal cutta.

No regular census of the inhabitants has ever been taken ond any attempt at on actual enumeration would be viewed with jealousy and

district by a people naturally averse to innovation or to any new arrange ment tending to bring them mare under abservation ar likely to im nose on them either additional duties or expen c Frant a concurrence of circumstances it probably approaches, If it day not exceed 200 000, while Agra its oncient tival has retrograded to CO 000 persons But, not withstending its comparatively reduced condition in feeling is still prevalent all over india that the power possessing Delhi and the king's per san le virtually tuler of Hindostan, and under this impression many lodependent states have repeatedly applied to be received as subjects and tributance camplaining of the refusal as a dereliction of iluty an the part of the British government Par a great many years applications of this nature had been most pressingly urged by the Rajas of Jondpoor Jeypoor Birnnere Jesselmere Assam Cochar; the nabols of Mooltan and Behowulpoor by the numerous petty states so lang lineased by the depredations of bindin, Holear Ameer Khan and ather plunderers but never acceded to until the arrangement of the federal system in 1818 and altogether unconnected with the Magui dynasty

For the same reason although the Delhi emperor had lang been deprived of all real daminian before political events brought him under the British government, almost every state ood every class of people to India still cantinue ta revere his nominal authority Until recently, the current com of every established power was struck in his name and many princes of the highest rank bore titles and displayed insignia which they or their ancestors derived from this source; and the Delhi sovereign omidst all his vicissitudes was still cansidered the anly legitimote fourtain of similar hannurs. In conformity with this notion it was usual when a llindau prince succeeded to his deceased father to apheit the Mogul to hanour lum with o tecks. as o mark af insestiture or ot least

2 K 2

of royal approbation, which ceremony consists in having the forehead anointed with a preparation of bruized sandal-wood: for although this inunction had long ceased to be a necessary token of confirmation of the successor's right, it was still considered a gratifying mark of distinction.

The universality of this impression throughout Hindostan may be further illustrated by the conduct of the Tamburetty or princess of Travancore, a genuine Hındoo state sıtuated near Cape Comorin, the southern extremity of the region, and at no period of its history subject to the Mogul of to any Mahomedan superior, yet in 1813 she applied to have a dress of investiture for her son, the infant raja, although he was under the special guardianship of the British government. The favour she applied for was refused, and she was apprized of the inutility of the act as a mark of confirmation, as well as the folly of making an unmeaning reference of the validity of her son's title to a power, which neither claimed nor exercised a right to grant or withhold it; yet she could not be convinced that the ceremonial was wholly superfluous. Under existing circumstances, his majesty's assumption of legitimate authority is altogether incompatible with the situation in which providence has placed him: his granting dresses of investiture was accordingly prohibited, both as impolitic, and as adding nothing to the validity of the succession. The same objection did not apply to the granting of titles (through the agency of the British government), but even this phantom of former dignity was almost annihilated in 1819 by the conduct of Ghazi ud Deen, the reigning nabob of Oude, who that year renounced all titular subservience to the throne of Delhi, assuming of his own authority the title of king instead of vizier of Oude, and issuing at the same time a new currency impressed with his own name and legend, but of the same weight and standard as before; which change was cheerfully, but with doubtful policy, acquiesced in by the British government.

The king being a man of weak intellect, and quite infatuated with the idea of his own importance, was much disposed to encourage applications similar to that of the Tamburetty, because they at once gratified his visions of departed dignity, and proved a source of emolument to his servants, and to the hordes of intriguers by which he was surrounded. The exercise of such authority, however, is completely at variance with the scheme of British policy, the fundamental maxim of which is, that it shall not derive from the charge of protecting and supporting his majeaty the privilege of employing the royal prerogative as an instrument for establishing any controul or ascendency over the states of India, or of asserting on the part of his Majesty, any of the claims which, in his capacity of emperor of Hindostan, that prince may consider lumself to possess upon the provinces formerly composing the Mogul enipire. The British power in India is of too substantial a nature, to incur the hazard of resorting to the dangerous expedient of borrowing any portion of its authority from the lustre of the Mogul name; it could not, therefore, permit his interference to withdraw the inhabitants from their obedience to their actual superiors, or that he should attempt to eonvert his nominal into any thing like a real supremacy. From the emperor nothing was derived by the Britith government, and in return for the rescue of himself and family from a state of penury and degradation, and his support in comparative comfort and affluence under its protection, he is only required to live peaceably, and to abandon all dreams of ancient grandcur.

At present the British resident at Delhi exercises a most extensive authority, and the office is always filled by one of the ablest and most experienced of the public functionaries, as may be inferred from the following detail of his duties. He has the exclusive charge of the emperor and

coyal family conducts the negoclations with the Raja of Laliore; takes cognizance of all political events in the north-west of India; superintends the ex-king of Cabul of Inddesna, the protected Sesk and hill chiefe, the Nabobs Fyro Mohomed Khan Ahmed Buksh Khan, the Rajas of lihurtpoor Macherry Discolpoor Jeypoor Joudpoor Jesselmere Bi canere Kotah Boondee Odespoor, Sarowy the Bhatty and Mcwatty chiefs, Ameer Lhan, and various other chiefs of less importance present heir apparent, Mirza Abou Zuffer (1827), about forty two years of age, is a respectable man, with more talents than most native princes, and has a predilection for literary sursults, being fond of poetry, and himself a tolerable Persian noet but addicted to atrong liquors and in consequence prematurely aged -(Public M S Documents, the Marquis Il elicaley Fullarton Archibald Scion Metcalfe Frankin Malcolm, Gladwin Ferishta Maurice, de )

Droton.—A considerable towe in the province of Della, district of Saharunpoor about twenty four miles from the town of Saharunpoor; lat 20° 40° N., lon 77° 40° L. This is o place of some trade ond contains besides several entire streets of brick houses inhobited chiefly by Brahmus There ore also two small modern mosques, a serai, and the remains of an old fort of considerable extent.—
(Fullarton, &c)

DEO DITOGRA TEMPLE—A temple in Northen Hindostan, eighteen miles S.E. from Almora, lat. 29° 53′ N, lon. 79° 50′ E., 6,780 feet above the level of the sea.

DEODIUR.—A town situated in that portion of the Gujerat province named the Kakreze, about unneteen miles S. by E from Theraud; lat. 24° 1′ N, lon 71° 35′ E In 1809 the chief of this place could muster 60 horse and 200 foot; in 1820 these were reduced to seven horse and 123 foot.

Deodura.—A village in Northern Hindostan, district of Kumaon, about twenty-seven miles travelling distance W.S.W. from Almoia This small hamlet, inhabited chiefly by Brahmins, is romantically situated in a grove of deodai pines near the brink of a wooded precipice, commanding an extensive prospect to the north as far as the snowy mountains There is here a small temple of Devi singularly situated in the vertical crevice of a rock, accessible only hy a dark horizontal passage, which perforates the body of the rock. Deodura being on the road from Almora to Lohoo ghaut, a small house has been crected by government for the accommodation of travellers.—(Fullarton, &c.)

DEOGHIR -See DOWLETABAD.

DEOGHUR (Devaghara)—A large district in the province of Gundwana, situated principally between the 20th and 21st degrees of north latitude, and comprizing an important portion of the raja of Nagpoor's dominions From its geographical position it is usually separated into two divisions, Deoghur above the Ghauts and Deoghur below the ghauts.

Deoghur above the ghauts is an elevated tract looking down to the north on the valley of the Nerbudda, and to the south on the plains of Nagpoor, occupying a portion of the

Vindhyan table-land and hills lying It may be south of the Nerbudda said to consist of a regular succession of hill and dale, formed by the larger and smaller ranges of hills that cover its surface, whose general direction is east and west. The most elevated of these ridges rises in the high land of Bhutkaghur, and from the western extremity the mass of the Mahadeo mountains, the highest of which is Damlaghiri. Throughout its whole extent this ridge can be approached from the south and north only by ascending ghauts, more or less difficult, those from the south being generally the easiest. bottom of this ridge lies a beautiful valley, extending from Chiparah east to Hurdaghur west.

The country to the south of this table land, or Deogliur below the gliauts, is crossed by various ranges of hills branching off from the Vindhyan mountains, and mostly covered with loose stones and jungle, and broken with ravines and valles. The rest of Deogliur situated between the rivers Wurda and Wyne Gunga, and extending to the southward as far as the Chandah district, is generally open and undulating, watered by several considerable streams, and chequered hills, spurs of hills, and low ridges

The origin and early history of the powerful Gond rajas is quite unknown, although prior to the reign of Bulikt Boolind (contemporary with Aurengzebe) they had made considerable progress in the subjugation of the country below the ghauts. Buhkt Boolind, who to conciliate the imperial favour had turned Mahomedan, made great additions to his territories, and possessed the spot on which Nagpoor now stands, but, like the rest of his dominions in a very savage condition This Gond potentate usually remained in the districts above the ghauts, except when prosecuting his military expeditions. Towards the conclusion of Aurungzebe's reign, he plundered Berar and other provinces of the Delhi emperors, although he was still in the habit of transmitting tribute to that

city At that era Powner was the chief seat of the Mogal government cast of the Wurde river. On tha death of Buhkt Booland disvensions orose in his family and Hagojee Bhoonslo was called in the settle their disputes which ended to his usurjnag

their territories, Dechur and Chanda formed the nucleus of the Bhonnels dominions, but in both the original principles of the Gond system were the same. The rajos at first were little more then the feudal superiors of o number of petty chiefs, whose relations and depen dants contributed nothing but mi litary service. In progress of time they attracted the attention of the Deceany Mahomedan sovereigns, and ultimately became tributary to the throne of Delhi ambitious of the distinction lavished by that court as o source of influence over tribes still unconquered and of prido as adding a number of barbarous races

to the list of their nominol subjects The Good rains of Deoghur and Chonda are said at different times to have made their appearance at Delhiz and one of the most emment hoving become Mussulmann to ensure the imperial favour under the name of Bukht Boolind (high fortune), Ins fatruly still continue of that persuasion Under his reign civilzation made con siderable advances in Gundwana, as he ottracted many foreigners into that provioce by bestowing employ ments on them; he also founded many towns and villages and protectlin coort was also ed commerce the resort of military odventurers from all quarters, many of whose descendants stillremain With their assistaoce he made conquests from Chon da ond Mundalo and he ovailed him self of the convulsions in the Decem which origioated from Aurungrebe's ioterminable conflicts with the Mo-On his death domestic disputes orose among his descendants which rendered them on easy prey to foreign invaders After the conquest of Deoghur the Bhooosla family still pliowed the thie of rate to the Gond princes, with a small

share of the revenue; and the respectful ottention due to the onclosi family is still carefully, and even ostentificially observed for the Gond ryla gives the tuke or stamp of ray alts to the Bhoonsia sovereigns on their ascending the guiddy or throne. In 1820 the Inhabited towns to

Deoghor below the ghouts were sixty four, the lubabited villages 2,011, and the total population 572,772 per sons, within an area of obout 6,000 square miles. In 1818-19, under the British system of collection the revenue amounted to 14,08,134 rupees in 1823 to 16 46 607 rupees Cul tivation had greatly decayed of the first, period but of the last was on

mustly mereasing

Deoghur above the ghauts when It came under the British system was found to have suffired in an equal degree with the other parts of the Asppor dominions from the ruinoos system of Ragoree the accord from the ravages of the Gonds and more especially from Appe Saheh s residence in this elevated region The tooks here are few and of no importance the augar cultivation for which this district is noted being car ried on by means of wells. In 1824 the collection of the land revenue amounted to 258,221 rapees, the number of inhabited villages was 1,241 the total population 145,363 persons. -(Jenline &c)

December — Atown in the province of Allahabad twenty-nino miles N by E. from Ditteah; lat 26° 5' N., lon. 78° 3 E

Drootton.—A pass in the province of Ajmeer principolity of Odeypoor The predominating rock here is quoriz, which abounds every where in this part of Rolpoottan, whole peaks of it appearing pure white, and glittering like snow molgied with masses of o flesh colour.—(Jamee Frater &C.)

#### DEGGROR.-See BAIOYANATH

Dzoonon.—A towo in the provioce of Gundwann eighty-three miles S W

from Hussingabad; lat. 21° 43′ N., lon. 78° 35′ E

DEOGHURWARA.—A village in the province of Malwa, division of Oojein, situated under the hills about five miles S.E. from Indore, and remarkable for a sacred spring that rises in an adjacent cavern. The water is tepid, and a gateway and reservoir, with a temple of Mahadeva in the centre, have been constructed at the mouth of the cavern.—(Fullarton, &c.)

DEORRA.—A small town in Northern Hindostan, five miles west from the Pabur river; lat. 31° 6′ N., lon. 77° 40′ E.

Drola (or Dewla).—A fortified town in the province of Malwa, division of Kantul, in 1820 the residence of the Pertaubghur raja, lat. 24° 3′ N., lon. 74° 44′ E., eight miles west of Pertaubghur, and 1,770 feet above the level of the sea. The surrounding country is extremely rugged and jungly, but the trees are of good growth The town contains some well-built stone houses.—(Malcolm, &c.)

Deonella (or Deonhully). — A town in the Mysore territories, twenty-three miles N.N.E from Bangalore, lat 13° 14′ N, lon 77° 47′ E

Deo Tal Lakr.—A small mountain lake or lock in Northern Hindostan, twenty-six miles E N.E from Gangoutri; lat. 31°4′N., lon 79°21′E. Immediately north there is a pass into Tibet, the summit of which has been estimated at 18,000 feet above the level of the sea.

Dira Guazi Khan.—A town and small district in the Afghan territories, situated on the left bank of the Indus; lat. 29° 50′ N, lon. 70° 20′ E, forty miles from Mooltan This tract lies between the Indus and Buloochistan, and is subject to the Cabul sovereign, to whom, in 1809, it yielded a revenue of five lacks of rupees. In 1821 it is described as a populous town, inhabited by Durrances and merchants. — (Elphanstone, James Fraser, &c.)

Dera Ishmael Khan —A town in Afghanistan, the capital of the Damaun province, and situated on the west bank of the Indus; lat. 31° 50' N., lon. 70° 33' E. It stands in a large wood of date-trees about 100 yards from the Indus, and in 1809 had a ruined wall of unburned bricks about one mile and a-half in circum-The inhabitants are mostly Balooches, but there are also some Afghans and Hindoos; the peasantry are Juts and Balooches. There are also some hordes of wandering shepherds encamped on different parts of this extensive plan In 1809 the embassy to Cabul halted here for several weeks —(Elphinstone, &c.)

Denian Khan.—A town in the province of Lahore, situated on the east side of the Indus; lat. 31° 53′ N., lon. 70° 45′ E.

Desan River.—This ranks as the second river of Bundeleund, after the Ken It rises in the Vindhya chain of mountains, and proceeds with a northerly course until it joins the Betwa near Chandwar, after an independent course of 220 miles It is too rocky to be navigable, but is well stocked with fish.—(Franklin, 5 c.)

Drssir—A small town belonging to Sindia in the province of Mulwa, the cusha or head of a pergunuah of the same name; lat. 22° 43′ N, lon. 75° 13′ E.

Drucar.—A town in Northern Hindostan, subject to the Nepaulese, fifty-one miles N.E. from Barantelie; lat. 28° 8′ N, lon 82′ E.

Devaporation of the gods).—One of the five principal prayagas (holy junctions where two or more enters meet) mentioned in the shastras, situated in Northern Hindostan, district of Gurwal, twelve index west from Serinagur; lat. 30° 9′ N., lon.78° 33′ E. The town stands at the confluence of the rivers, and is built on the scarp of a mountain about 100 feet above the water, the mountain rising about 800 feet higher. The houses are in general two storns ligh, built of large stones, cemented

whit course time and covered with shingles. In the nyper part stands a temple sacred to Ra, hunarh or Rimanchandra constructed of large pieces of atone piled up without mortar, in helgha about sixty feet. The previding detay is an lunge as a feet high cut in black atone with the lower part paioted red. In 1803 the town contained above 200 louves, linhabited by Brahmos 200 louves, linhabited by Brahmos of different acets lint principally those of Poora and the Decean The reddent Brahmos being very ignorant persons, can give on information when or by when the temple was exercised; the only fact they are quite certain of is, that it has been in gustence 10,000 years.

The sacred junction is formed by the streams of the Bhagurath or true Ganges, and Alacananda rivers, the last before their confluence being the most considerable stream, with a breadth of about 12f feet, and during the rainy season a depth of forty-six or furty-seren feet above low water feet. The breadth of the Bhagurathis is 11g feet, and it is said to rise forty feet during the rains. The union of the two currents forms the Ganges tho breadth of which hamedustly below the junction is eighty yards.—(If the d. fe?)

Devicorra (Devicete the fort of the godders)—A town in the Carnatie province district of Innjore situated near the junction of Coleron river with the sea; ist. 11° 20. N., ion. 70° 52° E., thirty-seven miles would from Pondicherry. This place was taken from the rajn of Innjore by Siajor Lawrence in 1749 on which occasion Lieut Clave particularly distinguish of himself – (Orne, 40° – (Orne, 40

Davr.—A town is the Northern Circurs tweety-eight miles S W from Masoliputam; int. 15° 53' N, ion 80° 57 E

DEWA RIVER See GOOGRA RI

Drwass.—A town in the province of Malwa, which in 1820 contained 1 187 inhabited houses and 5,030 per sons; lat. 22° 50 N. for 76° 10° E

It stands about thirteen miles duo north of Semis, and has o good tank on the cast side Two miles further castward is another small tank, the source of the little hab Sinde river For the thirty years prior to 1817 the Puars of Dewass suffered the ex treme of mivery baving been so in ecseantly plundered and oppressed hy Sindia, Holenr and every Pindarry or freebooter of the day, that their being in existence, or possessing no Inhabited village appears almost a miracle A pleasing contrast was presented in 1821 at which date miracle Dewass which had been nimost de serted had become a populous town. and 141 villages had been re-peopled. In 1819 the gross revenue was to reach 6 00 000 ln 1824,-(Malcolm,

Dewotes Decapher .— An island on the coast of the Bejapoor province which commands a very line harbour where resucts of 600 tons may indo in safety during the monacon. The river here is navigable a long way up and there is a high road to the ghatta.

Distinguar/Development)—A rillage or haulet in the province of Gundwana, situate i on the east bank of the Baumginga river which is here in considerable stream, being au, mented by the junction of the Nurda and Waing Gunga rivers, shout six miles to the corth; lat. 18° 7° 10 in 81° 30° P. 150 miles N from the town of Rajamundry This is one of the most considerable Gond hamlets in the country and has an extensive spot of ground cleared round it.—(J. B. Blust 5 e)

Dewna.—A small town in the province of Allahabad twenty-four miles south from Chetterpoor; lat 21° 30' N., jon 78° 37' E.

Deware.—A town in the province of Ajmeer which in 1820 belanged to Zallm Singh of Katali, and cootain ed about 600 houses

Dawsau,-A considerable town in the province of Ajmeer, thirty-six

miles east from Jeypooi; lat. 26° 50', lon. 76° 12' E. This place stands on one side of a square table-like hill, with a sharp peak adjoining. The hill is crowned with a most extensive forest, and in 1824 there were other remains, such as those of large tanks, ruinous and dry, several tombs, and other vestiges of antiquity, all evincing that the place had seen better It is also a kind of secondrate place of pilgrimage, where a Hindoo fair and festival is occasionally held. The town is still surrounded by a ruined wall resembling that at Benares, and altogether the place is one extremely characteristic of the ancient habits of India.

DEYBUR LAKE (or Jey Saugur) -A lake in the province of Ajmeer, division of Mewar, about twentyseven miles SE from the city of Odeypoor, lat 24° 17' N, lon. 74° 1'E, 1,044 feet above the level of the sea. The Goometri river, which formerly burst through a narrow opening in the range of hills, is here arrested by a magnificent marble dam thrown across its bed. It presents a deep clear expanse of water, bounded on two sides by fine mountains, from 400 to 700 feet high, projecting abruptly into it. The other sides consist of lower elevations or ridges The extreme length of the nidge is about eight miles, and its breadth from three to four miles Near the centre are some woody hills, on the largest of which a Hindoo devotee has taken up his abode. A handsome palace and attendant buildings liave been erected on the hill at its eastein end, and steps the whole length of the dyke or dam lead down to the water, ornamented with large figures of elephants, on high pedestals of a single block. The total height of the dyke to the water's edge is fifty-four feet; its length three furlongs, and breadth 110 yards. Owing to the premature death of its builder, Rana Jey Singh, it is in an unfinished state. Every part of it is faced with fine white marble, and the small buildings, elephants, &c. and all other

decorations are of the same substance, which is abundant in the neighbouring range. — (Dangerfield, &c.)

Develution (Devapalapur) — A town in the province of Malwa belonging to Holcar, which in 1820 contained 1,035 houses, lat. 22° 50′ N, lon 75° 35′ E, twenty-four miles N.W by W from Indore. This place has a large tank on the east side from whence roads leads to Indore, Oojein, Dhar, &c. At the above date the pergunnah of Deypaulpoor contained 7,489 houses, and, including the town, yielded a revenue of 1,00,000 rupees.—(Malcolm, &c.)

DEYRAH DOON (Deira Dun).-A valley in Northern Hindostan, province of Gurwal, situated between the Jumna and Ganges rivers, which was ceded to the British government by the Nepaulese in 1815, and subsequently annexed to the district of North Saharunpoor. This valley or strath is separated from the Gangetie plain by a low serrated range of wooded hills, which, although it appears to cross the Ganges, and to penetrate for some distance into Rohilcund, is distinct from the great mass of the northern mountains, to which it may be considered a sort of Through this ridge an outwork. there are several openings, which afford a tolerably easy communication between Saharunpoor and the Doon; but the principal are the pass of Hurdwar, by the side of the Ganges; that of Timley, within a few miles of the Jumna; and the intermediate routes of Kheree and Kusserow. The ascent by these passes into the valley is for the most part so gradual as to be scarcely perceptible; yet the general elevation of the Doon itself has been found, by barometrical observation, to be from 800 to 1,000 feet above the level of the ocean climate also differs much from that of Saharunpoor, for it is hardly at all affected by the hot winds, and during the winter season the mountains inimediately bounding it to the north

are enpped with snow and Instances have even occurred of a f ll of snow

within the limits of the ralley
Degrab or Guridnara (different

names for the same place) is the only town or rather considerable village in the Doon It is t learnning saturated in the centre of the valley and sur rounded by a fine tract of cultivated land. It has a nest bater composed of large hous, and a Seal, temple with its dependent edificer The collector of Saharmanoor has a curcherry in the neighbourhood, and here are the cantonment and head-quarters of the Sumore luttalion. The whole valley is admirably watered by nn merous running streams but, with the execution of the part immediately around Deyrah in 1819 is presented to the eye nothing int a nil ferness of high grace interspersed with soul and sisso teen and swarming with tigers wild elephants pracocks, and every species of same. The inlinintants do not differ materially in features, person or language from those of the neighbouring plant

This valley having been a juglise from Aurungrebe to buttch Rali the resemng raje of Guran Inclonged properly to the throne of Itelh, but on the investor of Gurusl in 1803, it was seved on by the Gorkhas, along with the rest of the province. 10 1810 its estimated value was only 22,261 rapers per annum but it was known to have produced a much larger revenue and it is probable a few years of tranquillur will restore its prosperity, and augment its productive revenue to its former amount of 50 000 runees. In considering that value of this Doon however it most not be examined with advertence to the mere amount of its revenue but also with reference to its importance in a military and political point of view, as consecting the British ter mory cast of the Ganges within the hills with the harden Doon beyond the Jumna, and thus by means of the occupation of Majown and Subhatno and eventually of o fortress to Sir more furnishing a strong and unin terrupted line of defence from the

Call to the Sumieje—(l'ullart a l'ullic US Discussité Ge)

Diamer.—One of the Barra Thahooms at twelve love libys in North ern Bandonan situated between tho houteless and Tonals lat 31°2° No. lon. 77° b k. In livid its revenue was only 4,000 rapers per annum, and it di nat contain any fortress within its houts.

DHANONER (Diameni) .- A fortified then in the province of Maiwa; lat. 24" 11" \", ion. 7" 50' 1. The fort of 1)hamonce is triangular and situated on a small eminence to the form of which is the castern extremity the direction of the wall cor responds On the other side is the town, encompassed by a loose wait mn tly in rules but the compacts of the fort are in some places fifty feet high, and in general fifteen thick with capacions towers. The fort is again autolisided by internal lines of works which render the eastern quarter where the precipice is 200 feet high difficult of access. Beyond the town is a tank which when properly cut will loundate a portion of the vi emity This fortress was first ac quired by the Samoor state in 1799 from a Lodhee Italpoot who hal prized it from the Boadelain. -(Backer &c)

Duan for Dwonvery .- An an event city in the province of Malwa. I ... 104 feet above the level of the sea : lat. 22° 3. 1., lon 7. 21 1 Ilhar territories comprehend about 400 square miles and when properly cultivated sicids almost every tropical production and amongst others oplum It contains 179 villages twenty five of which are situated in the wild and hilly tracts and labo lated by Bheels In 1870 the number of labslated houses was 7,473 and the population about 37 965 souls Is the proportion of one lahomedan to auxteen Hindoon. The city of Dhar sprears at one period to have covered a great extent of ground and is said to have contained 20,000 houses In 1820 the number did not

amount to 5,000, but the population was then rapidly increasing. In length it may be three-fourths of a mile, by half a mile in breadth, and is only surrounded by a mud wall. The interior, however, contains some good buildings, and is watered by eight large and two small tanks. The fort is entirely detached from the city, standing on a rising ground about forty feet above the plain. The walls are about thirty feet high, and fortified with round and square towers.

In the early periods of Maharatta history, the Puars of Dhar appear to have been one of the most distinguished families; but they do not elaim any descent, although of the same tribe, from the ancient Hindoo princes of Malwa. On account of their high birth, and being officers of the Satara Raja (not of the Peshwa) they always claimed precedence over Sindia and Holcar, which the latter were forward to acknowledge at the very moment they were robbing the Dhar rajas of their territories 1817, when the British troops entered Malwa, Dhar was the only possession that remained to Ramchunder Puar (a boy twelve years of age), and the whole revenues of the principality did not amount to 35,000 rupees, whereas in 1819 the gross revenues amounted to 2,67,004 rupees, and in 1824 were expected to reach 6,54,000 The historical notices of the ancient kings of Dhar are examined by Major Wilford and Mr. Bentley in the eighth and ninth volumes of the Asiatic Researches. After the transfer of the government from Oojein it became the seat of government in Malwa, until the rise of the Mandoo sovereigns — (Malcolm, &c)

DHARMA.—An extremely mountainous country in Northern Hindostan within the British limits, and situated between lat. 30° and 30° 30′ N., and traversed by the Daulee river, which afterwards falls into the Cali It contains a few scattered villages and hamlets, but no towns.

DHARMAPOOR.—The northern di-

vision of the province of Cochar (properly Hairumbo) is thus named. The town of Dharmapoor is situated in an extensive valley upon the banks of the Capili river, to the north of the main range of mountains, and about sixty miles from Cospoor. once contained a strong fort, and in size, trade, and population, almost equalled Cospoor; but owing to the disturbed condition for many years of these semi-barbarous regions, its commerce has decreased, and in consequence its wealth and importance While trade flourished, the revenue derived from Dharmapoor equalled or exceeded the aggregate revenue of all the other districts of Hairumbo. —(Friend to India, &c.)

DHARWA,—A town in the province of Gundwana, sixty-two miles S.W. from Husseinabad; lat. 22° 17′ N., lon. 78° 42′ E.

DHAT.—In the middle of the space to the north of Parkur, in the southeastern quarter of the province of Mooltan, commonly marked as a desert, is a tract of country named Dhat, which extends among the sand hills as far north as Amercote, comprehending two minor divisions named Khori and Khawra, stretching to the borders of Rajpootana In this quarter of Hindostan, the sand-hills composing the barren portions are named thull, while habitable spots or oases are named dhat. The grain crops are scanty, but the pasturage abundant, enabling the inhabitants to rear large herds of oxen, which are purchased and exported by the Charons and such other sacred persons as are not afraid to venture into so wild a country.—(Macmurdo, &c.)

DHELLI.—A Portuguese settlement on the north coast of the island of Timor; lat 8° 35'S, lon. 125° 30' E This town is inhabited by natives, Chinese, and Portuguese, who carry on a traffic with Macao and the neighbouring isles.

DHENJEE.—A town in the Gujerat peninsula, which nominally belongs to Dwaraca; but owing to its situa-

tion amidst impenetrable jungle, the manick or chief, hav long octed as independent of that sacred fane. He was fined for piracy by Col. It siker in 1807 and his place taken from him lo 1816 for the same crime, and subsequently transferred to the Gulcowar.

Duooca —A small town in the province of Delhl eight miles W S W from Pattallah lat 30° 15' N, ion 76° 6 E.

linotxa.—A town ond pergannah in the province of Gujerns, district of halizs, twenty miles by W. from Ahmetakad lat 22° 45° N lon 72° 32° E. Three-fifth of this extensive and valuable pergannah are calculated only for wheat and gramy of the remaining portion of the soil one-half at least 1s appropriated to the cultivation of rice and another to that of the usual lagit granz—(Lapit A Robertson Public AIS Documents 46°)

Duotroos (Dholopur).-A town in the province of Agra situated about one mile north of the Chumbul tiver therir-four rules & by E from the city of Agra int. 20° 4° A., ion here about three-quarters of a mile acrovs, and most be forded of hyterce four miles higher up Dholpoor is a town of coundership size and the hilly country begins in its signity. opproaching from the north pergunnabs of Dholpoor Barree and Roiskers are rich and productive ond during the government of Ambalee are said to have vielded five lacks In 1805 while under the collector of Agra the land revenue of these domains was 3.95,000 runees an accient city, and frequently mentioned by the emperor Baber in his memours.-(Metcalfe Baber &c)

Duooa.—A town belonging to Sindia in the provioce of Agra, district of Narwar, aurrounded by a wall of masonry.—(MS, 4c)

Ducorcorz.—A village of 200 houses, in the province of Candersh, perguonah of Aseerghur fivo miles

from the fortress of Ascerghar t lot 21° 31' N. ion 76° 16' E. (AS. Ac.)

Docon.—A town in the prevince of Candersh twenty miles W by N from Chandere; lat, 20° 22' N., ion 74° 7' E.

Duon—The capital of a petty stote le Northern fundatae within the diminions of Nepsul the territory mtoched to which is said to con tain from mines list 27° 56° N., lon 83° 56° F., seventy-three miles weat of Catmanileo

Dungasze.—A town in the Oujerst peninsula fourteen miles N from Junaghur; lot 24° 41' N., lon 70° 45' E

DHOMDERE.—A village in the province of Condwana, district of Chotecephur, attested just below the point where the Mahamudiy river emerges into the plain of Chotecephur from the high country near its source and elevated 1,720 feet obovo the ievel of the sec.

Duennewroon,-A territory in the province of Guierat belonging to the Dhurrampoor raja, about forty five miles long by thirty broad olmost entirely covered with thick forest, tho extent of cultivation being comparatively insignificant In 1821 tle raio a revenuo was about 1 40,000 runees, bendes which the British government had chokies throughout his country for the purpose of levying customs Some of the inhabitants ore Dooreas, but the greatest propor tion are holumeas o tribe resem bling the Doorens, but speaking the longuage of the Concan from whence they originally migrated. - (Elphinstone, &c )

Din anontognet.—A decayed town in the province of Malwa, principality of Dhar stated oo the north bank of the Nerbudda river; ist. 22° 10° N., lon 75° 20° L. The pergunah of Dhurrumpooree formerly comprehended eighty four villages; but in 1830 and the twenty five were inhabited by Mahomedans, and were inhabited by Mahomedans, ond

1,198 by Hindoos. The town seems to have experienced a still more rapid decay, for in 1820 it was reduced to eighty-four houses, whereas twenty years ago it is said (by the natives) to have contained 10,000 houses—(Malcolm, &c.)

DIAMOND HARBOUR -A harbour in the river Hooghly, situated about thirty-four miles below Calcutta in a straight line, but much more by the windings of the river. This place and anchorage are singularly unhealthy, especially in the months of July, August, and September, during and after This is partly the periodical rains. owing to the proximity of low swampy shores, where a number of sluggish currents open into the stream of the Hooghly, floating down a quantity of vegetable and animal substances, which emit the most offensive vapours. To these natural evils are superadded many artificial ones, all contributing to the destruction of The great precautions the seamen. taken, from the best motives, to prevent their procuring wholesome spirits, drives them to the use of the most deleterious species of Bengal arrack, which no vigilance on the part of the officers could prevent Their food consists of half ripe half rotten fruit, stale eggs, and overdriven beef, and their druik, on shore, the most execrable water, generally procured from a filthy puddle teeming with animal life. Add to this the society of loathsome prostitutes, excessive labour in the sun, the want of any manly recreation during their leisure hours, and the absence of the requisite medical assistance, and the combined effect will sufficiently account for the mortality of the ships' crews while lying at Diamond Harbour.

At this place the Company's ships usually unload their outward, and receive on board the greater part of their homeward cargoes, from whence they proceed to Sagor roads, where the remainder is shipped. The government ground here consists of about 800 begas, enclosed by an em-

bankment raised to prevent inundation, and containing the government warehouses for ships' stores, rigging, &c; the provisions and refresments. such as they are, are purchased at high prices in the neighbouring villages. About twenty years ago an excellent brick road was constructed from Diamond Harboui to Calcutta, along the greater part of the distance elevated to a considerable height above the adjacent rice fields, which are in a high state of cultivation, and yield plentiful crops, although strongly impregnated with salt — (John Elhott, &c)

Diamond Island.—A small island on the east side of the bay of Bengal, about twelve miles south from Cape Negrais, lat 15°51′N, lon 94°12′E. This island abounds with excellent turtle of the largest size, from forty to fifty of which may be turned in one night. The shore being studded with sharp rocks except in one of two places, considerable caution is required in landing from boats—(Johnson, &c)

DIAMOND POINT—A low woody point, forming the western extremity of the Straits of Malacca and eastern extremity of the Pedier coast, in Sumatra, lat. 5° 16' N, lon 97° 31'E By the Malays it is named Tanjong Jambu Ayer.

DIAMONDS —See PANNAH and Ma-HANUDDY RIVER.

DIAMPER (Udyampura).—A town in the Cochin territories, fourteen miles E from Cochin; lat. 9° 56′ N., lon. 76° 29′ E. A celebrated synod was held here to convert the Nestorian Christians to the Roman church.

DICTAUN —A town in the province of Malwa, thuteen miles east of Dhar, which in 1820 contained about 1,000 houses, and belonged to Dowlet Row Sindia, lat, 22° 34′ N, lon 75° 25′ E

DIDDEE.—A considerable mountain hamlet in the province of Bejapoor, division of Ryebaugh, situated on the Gutpurba river, among the wilds that boider the western ghauts. The Gutpurba, although here so near

lts source, occasionally ofter heavy roam awds to o tremendous torrent, ahen the substitute resorted to for a ferry-boat is the angar-pan of the village a circular veste of this iron, about five feet wide by ono deep usu ally borrowed for the cagency--(kularton, fr)

Dinwaya.—A large village built of atone in the province of Ajmers, principality of Jeppoor attorci on the verge of a heautiful elevated valley which opens has a remarkable de file through the hills upon Laisoons, about forty-one mi'es traveling distonce from the city of Jeypoor lat. 27° 18' N., ion 74° 21 E—(Fullarton 5c)

Dican.—A village in the province ond divictio of Balar about tao miles from the cantonment of Dinapoor Here is an extensive farm conducted by a European, with the most complete establishment in India for our ing provi lons on a large scale

Dinoxo Rivra .- This is the name of the western orm of the Brahmana tro flowing from the north, as the Lubit is of the eastern but the sources of both are as yet undeter mined In 18°G an excursion nor therly along the course of the Dihong was made by two British officers but it did not solve the grand problem respecting the connexico of any of the Assam ravers with the Sannoo of Tibet. The travellers ascended tho Dihong to the village of Pasker about lat, 28° 6 N., ion 95° 3 E. which spot must be very close to the San poo if Duhnide a mop be not much more erroneous than has hitherto been aupposed

In the portion of its course thus explored the banks of the Dihong riso perpendicularly from the woter's edge surmounted by thick jungle through which it was found impossible to cut o path Horing proceed ed of the unlies in o canco beyond o point where the tract clong shore became impracticable they were stopped by o dangerons rapid diffi

cult elther to oscend or return by On climbing up a rock, an unbroken sheet of water was observed running for some distance in a westerly di rection, according to native information for about twenty miles, after which it again turns north The noth to the Bor Abor country goes directly to the north, and consequently feaves the river of this point. The width of the stream is here reduced to one hundred yards, and the current is slow t but us no considerable branch and joined the Dalong on the route, oll the water poured by the Dihong into the ilralimaputra, in quantity double that of the latter at their function must be comprised within this channel A tribe called Simongs dueil in the immediate vicinity of the point reached, and it is supposed that the country of the Lamas is next to there The view from the village of Parkee le described as magnificent comprehending the course of the Lubit or Brahmaputra from the hills as far as Seesce its juoction with tho Dihong the course of the Koundui and other streams, and lofty ranges of mountains behind the badeeya peak and the snowy rulge of moun tains to the south-cast at icast 150 miles off

According to information formished by the chief of the Mismees the Di hong consists of two branches, one running from the cast and rising la the country of the Khana Deba, count twenty nine degrees corth and ninety-seven cast. It pursues a westerly course to about lon 95° 20' E., where it unites with the western branch from Lassa, forming the Di hong here called Lassa Chombo, or Tzambo (Sanpoo), or the Lassa river, and Kongbong The same anthority says that it is not novigable through the hele on account of the rapids.-(Capt Bedford, Lieute II sleer and Buriton de)

Dillan —A small town in the province of Delhi thirty miles S W from Patlallah lat. 70° 6' E

DILLANTOOR -A small town so the province of Almeer division of Hor

rowtee, situated on the summit of a mass of hills, and surrounded by a stone wall. In 1820 it belonged to Zalim Singli, the regent of Kotah, and contained 1,500 inhabitants.—
(Malcolm, &c.)

DINAGEPOOR (Dinajpoor) .- A district in the province of Bengal, situated principally between the twenty-fifth and twenty-sixth degrees of north latitude. On the north it is bounded by Rungpoor and Purneah; on the south by Rajeshahy and Mymunsingh; to the east it has Rungpoor and Mymunsingh; and to the west Purneah and Boglepoor. greatest length, from the southern extremity to the northern, is 105 miles, and its greatest breadth eightytwo, having a triangular form, with the acute angle to the north surveyed by Dr. Francis Buchanan, in 1808, this district contained about 5,374 square miles, distributed nearly in the following proportions, viz.

Rivers, tanks, marshes, watercourses, &c. ..... square miles 353 Inundated during the rainy sea-

son	381
Red clay	38
Light-coloured clay	2,441
Free soil	

## Total square miles 5,374

During the Mogul government Dinagepoor, along with Edracpoor, constituted the territorial jurisdiction of Aurungabad, and was originally a frontier towards the independent principality of Cooch Bahar, on which account it was little known and lightly assessed.

Dinagepoor is every where intersected by rivers, which during the rainy season admit the passage of large boats to every quarter, and of small ones to most villages; the principal are the Mahananda, Jamuna, Korotoya, and Teesta. There are no lakes properly so called, although during the rainy season some of the rivers swell out to such an extent as to resemble very large oncs. The deserted channels of considerable ri-

vers also contain large quantities of stagnant water, always in the rainy season, and sometimes even during the parching heats of spring, and have the appearance of lakes; added to which there are many permanent marshes, and a multitude of unnecessary tanks, choked up with noxious plants and rank vegetation

The rainy season usually begins about the 12th of June, is accompanied with much thunder, and ends nearly about the 14th of October. The rain most usually comes from the east, but towards the end of the wet monsoon there are frequently light southerly winds, which increase the heat, and the nights become very suffocating. In favourable scasons there ought to be one or two days of heavy rain between the middle of October and the middle of December, and if these fail the crop of rice is scanty. From the 12th of March to the 12th of May there are usually strong winds from the west, attended by thunder, rain, and frequently hail of an enormous size, resembling round lumps of ice. The westerly winds usually blow cool, pleasant, and dry, with a clear sky from the middle of February to the middle of March, which is undoubtedly the pleasantest time of the year During November, December, January, and February, the cold is at times troublesome, and the Europeans have fires in their chambers, and wear woollen garments; but the natives, who are not so well provided, lainent and shive all night, and in the morning continue helpless and benumbed, both in body and mind, until reinvigorated by the rays of the sun.

The soil of this district is eonsiderably diversified, and the face of the country of a waving appearance, being divided into small valleys, each two or three inles broad. These valleys are watered by small rivers, which in the wet monsoon swell into lakes fifty and sixty miles long, and two or three broad, overflowing all the low lands, which are dry during the cold season. The soil of the elevated portions of land is in gene-

ral o stiff clay in some places black and porous, in nthers white and to nacious. The soil of some of the valleys resembles that of the cle vated parts and that of others is rich and learny with a substratum of clay. Althou is there is no elevation to the whole district that approaches to a menutant yet the surface is not so level as its many other district one of the place is the surface in the clay of the clay of the surface is not being it of 100 feet also the inendated country.

The soil of Dins, epoor when der Is in general of a very light ash colour, often almost white last becomes dark when molat in a few places near the horotoya the sed is of a very suff and red clay soil wherever found is called rang cameti and from this circumstance many places deriso their names for in Bengal a soil of this description la unusual Large rivers usually affect the course of the winds but in this district the streams are so small, compared with the Ganges and Brah maputra that this influence is much checked and the winds are here extremely variable. On the whole however the east winds are by far

the most prevalent The higher isnds in the southern quarter are inhabited by Vialiomedans the lower by Illindoes and on the first very little besides rice is produced, which is in a large proportion cleaned by boiling A quantity is put into a pot with some cold water and boiled for on hour after which It is dried and beaten, but it is not lawful for a Brahmin to use this kind of nee The natives here are generally extremely indigent and their farming implements are in consequence interrably simple. The plough is of a wretched description and has neither coulter to cut the soil, nor a meuld-board to turn it over Only one person ettends it helding the bandle in one hand, and occasions lig pulling the tails of the oxen with the other A pair of these sacred and o obsppy creatures may be purchased for six or eight rupecs, a plough for Is 3d. sterling and a yeke for seven

YOL I

Rice is the staple article penee the next in importance is indigo for which however this district is not particularly well edapted 1809 the extent of land under the Indigo weed was about 15 000 Cal entto begs allowing 700 for each art of works of which there were then twenty-one Either too murh or tee littlesun and either tee much or too little rain will entirely ruin the eren Sugar is olse ral cd but not in large quantities; and many sorts of fibrous plants for cords,c are cultivated

Hemp la rultivated on account of les buds which are used for intoxi eating purposes The natives have twn proper names for the liemp plant calling it ganja when young, and arddhi when the flowers have fully expanded It is a common weed in many ports of the district and the wild siddle answers for a particular manner of intexication. The dried leaves are besten in a mortar with water and the infusion is drank This is not so strong as the ganga, nor Is the intextention attended with such violent effects The wild plant In its young state has little effect and in order to procure ganja the plant most be cultivated with great care In February when the leaves are tender, and before the flewers open the huds nod Jonng leaves must be junched off and spread on the ground where they lie ten or twelve days earosed to the sun and dew until they are dry and fit for It is smoked like tobacco and about twelve grains may be the usual

The ficus indica celebrated among encent writers under the name of the banyan tree, become equally removated among the modern English Its great size ond picturesque appearance of its truok, the fineness of its foliage, intermixed with many gold on coloured betries, and above all its singular manner of sending down roots from its branches all combine to interest the spectator This tree from its beauty (for it is of very little use) has always been greatly esteemed by

the natives of Bengal, and is considered by them the female of the peepul tree. These two trees are supposed to represent a Brahmin and his wife, and it is reckoned a sin to cut or destroy either, but especially the male; and it is thought very meritorious to plant a young male tiee elose to a female, with certain matrimonial ceremonies. In this union the natives have discovered more taste than usual. the elegant lightness and bright foliage of the peepul are well adapted to contrast with the rigid grandeur of the banyan tree, but the appropriation of the sexes ought to have been reversed.

The branches and leaves of these two trees being a favourite food of elephants, the keepers, who are of low castes, make sad havoc among these emblematic Brahmins. usual to place a piece of silver money under the banyan tree when it is planted, without which it is supposed neither to grow to a large size nor to send down fine roots It contains a milky juice, which coagulates into a kind of elastic gum, and makes excellent bird-lime, the descending roots are often used for topes withstanding some good qualities of the peepul and banyan trees, the prejudice in their favour is attended with some bad effects; their fruit being a favourate food with monkeys and birds, seeds are constantly deposited in buildings and on other more useful trees, and wherever they find a crevice they take root. They send long filaments to the ground, and no sooner procure nourishment from thence, than they erush and overpower their original supporter, and thus lay waste old buildings and plantations.

The fieus religiosa is the peepul tree of the botanists. Although it has not the majestic size and numerous stems of the banyan tree, it possesses great elegance. The various roots which it sends down from a tree or building on which it first germinated, often compose a trunk of a most picturesque form, while the fine shape of its leaves, and their

tremulous motion, give it a peculiar elegance It is sacred to Vrihaspati (Jupiter), the planet of Thursday.

Nearly allied to the figs are the bread-fruit trees, of which the jack is the finest in India. This tree his a beautiful foliage, and exhales a delightful odour in February, produces very useful fruit, is excellent food for elephants, and yields a useful and ornamental timber, which, however, is unfortunately given to warp with heat, the wood is also use as a dye. The fruit has a nauseous smell, and its flavour is not agreeable to the generality of Europeans; but the natives are fond of the pulpy envelope by which the seeds me surrounded The green fiuit is very much used in eurries, and the ripe seeds are preserved for the same purpose. In some parts of India they form the common food of the people for two or three months of the year, as chestnuts do in the south of Europe, and when roasted have a great rescribiance to that The eusa grass, or poa cynosuroides, is a sacred plant among the Hindoos, and is dedicated to the invisible planet Ketu, which occasions the eclipses of the sun.

The bamboo is the most useful and common woody plant, houses, furniture, boats, and implements of agriculture, being entirely, or in part, made of this valuable reed, which is also the common fuel, and from it the Dinagepoor mats, so celebrated all over Bengal for the superiority of the fuel, are fabricated. The plant grows from a creeping root, which extends from twelve to twenty feet in diameter, and sends forth forty or fifty stems; these form a clump which keeps separate from the others that are adjacent. Every year from five to ten bumboos of a clump arc ripe and are eut, while young ones shoot up from the root to supply their places. If the whole be eut at onec the plunt is hable to death; the stem also perishes when it produces fruit, which very rarely happens in cultivated parts of the country, on which account many of the natives believe

that the plant never produces either flower or fruit. This plant pro luces upe banhoos in acren years but it requires to be exempted from the mundation and flourishes best in a flow sell.

The areca of botomsts thruct in the district of on ornamental tree for it soldom of ever brines its fruit to maturity; vetin the same intitude further to the east the tree thrises well so that its barrenness is probably owing in some defect of manozement. nearly in the same state, nor could it without difficulty be made to riven The guaras raised are serv Its Gust bad but this probably is a foreign in tradaction to Hinderton as the fruit has not any name in the Sanserit Ian oun e. The tamseind is a valuable and elegant tree; healdes producing an seid fruit used by the natives in seasoning their food the tumber is excellent, being hard and strong In this district many houses have been built with lone branches of tha heal tree that have been fixed in the ground for posts, and afterwards having taken root nushed forth branches which has liad a very ric turesque effect

The breed of axen bere is ex tremely degenerate and not only many Mahamedans but even many law tribes of Ilmloos, use the cow in the played which necording to the strict usages of Brahrulmes nations ought to be pumished with Notwithstanding the prevail see numbers of the followers of the Arabian prophet in this district tome swing are more numerous than sheen and are eaten by the lower classes of llindoos The breed of horses or rather nomes is of the most wretch ed description but their cost is moderate, being only from 40 Gd to His Od each Slaves are very few, ond were mostly purchased during the great famine of 1709 and the scarcuty of 1787 but they turned out so idlo ond careless that their employment was found much more expensive then that of hired labourers The elephant ood rhinoceros are of

most unknown and tuers are com parabacky not numerous: but lorce tacks of wild buffliors and hors in feet the fields and prove extremely destructive to the farmer In elife dutriet a white animal of the tierr Lind was killed some years aro, the skin of whileh heing sent to I mone by Lord Wellesley necessoned a slis mute whether It was that of a bon or a tleer No such onimal had been seen before nor has it been seen since The Indian schneumon is common but is sery seldom tamed nce an elenteous that their for micht become an altest of commerce Beers ore not numerous ne destrue the rad ore chiefly found near tho runs of Perusa Where the soil is loose the common porciular is abun dant and destructive as It necessate the cultivation of turmerle and penper It is eaten with eagerness by all ronk

Although the country swarms with woter-fowl both web-footed ond waters the natives make little uso The common wild coose is exceedingly obundant, and in the cold season remarkably good enting The water fuwl preferred by the na tives are three birds of the corvorant or shog kind which they call pant Lourly several small herons comprehended by the natives under the general name of vok several birds of the jeesna and gallmute kind included under the native term johners : but. obose all the comman house-spar row, which lost being thought to possess prirodi lae qualities is in request at all times

Second kinds of torthuse ore engerly sought ofter; but, to o kuropean taxte they are executable Frogs are not eaten by any of the natives but some inzurds are. Fish form by far the greater part of the onlinal food that is consumed in the country During four months of the year when the rivers are avoilen fish is scarce as they have then an extensive range of element and ore not easily caught; but as the Inmediation subsides, and the asliands ore confined within nar row bounds they one secured by

212

various simple means, indeed many are left sticking in the mud, and taken without trouble, a circumstance never disagreeable to a native.

Six weeks after the rainy season commences, every rice field, although quite dry and hard in the spring, abounds with small fishes. They are certainly most numerous near livers and marshes, from which they generally come, but it is also probable that the eggs often continue dry in the field, and are hatched after they have been moistened by rain. The natives account for their appearance in such places by supposing that they fall from heaven along with the rain, and assert that immediately after the rain they can see them leaping among the grass, indeed, when so disposed, a native can see any thing he wishes or expects.

The picking and cleaning of cotton is performed by the women, and the preparation of cotton-thread occupies the lessure hours of the females of the higher ranks (even the Brahminies), and of the greater number of the farmers' wives, but the raw material is mostly imported. Although some native houses in this district trade to a considerable extent, the East-India Company must still be considered as the chief merchant, and much eagerness is evinced by the natives to deal with its agents. In 1808 the following towns were the principal, viz Dinagepoor, containing about 5,000 houses; Malda, 3,000; Gour, 3,000, and Raygunge, 1,000 houses. At the above date the total population of the district was estimated by Dr. Francis Buchanan at 3,000,000 of persons, or about 558 to the square mile. Contrary to what is seen in most parts of Hindostan, the Mahomedans are here the prevailing sect, being as seven to three Hindoos, which sect appear at one time to have been almost entirely extirpated, most of those now existing being the progeny of new-comers.

In 1808 the following was nearly the respective proportions, according to the opinion of the above-mentioned authority:

Maliomedans	2,100,000 900,000
Total	3,000,000
Of the Hindoo popular are of Bengalese origin, Pure tribes	vız . 70,000
•	440,000
Very low eastes (below	7

Up to the above date Christianity had made very little progress in Dinagepoor, nor were there any native

Portuguese.

impure) ...... 150,000

Abominable .......... 210,000

In most parts of this district the leases granted to tenants are equivalent to a perpetuity; but this does not appear practically either to have bettered the condition of the peasant, as compared with other districts, or to have improved the cultivation of the soil; and, what is remarkable. notwithstanding their right of perpetuity, they are constantly migrating from one estate to another. greater part of the landlords are new men, who have recently purchased their estates, and who were formerly eitlier merchants, manufacturers, agents of landholders, or native officers of government. The old zemindars are either sunk in miserable superstition, the prey of religious mendicants, or are totally abandoned to sottish and stupifying dissipation. The evils resulting from the endless subdivision of estates are also severely felt here. In 1814 the jumma or land assesment to the revenue was 17,66,373 rupees; and the abkarry, or excise on spirituous liquors, 10,117

Ever since the cession of this district along with the rest of the province in 1765, it had been greatly infested by dacoits, or gang-robbers, partly owing to the numerous rivers by which it is intersected, and partly

to the dastardly split for which the solubitants have long been noted In 1814 however o considerable smprovement took place in consequence of the pains taken by Mr Sisson to ensure the co-operation of the land holders and to impress the inhabitanta with a sense of their ability to resist the otrocious octs of these dopredators. In the first half year the whole of the offenders in five cases of gang-robbery were brought to justice and it oppeared that in several iostances the robbers had been remated and even serzed in the fact hy the villagers on which occasions they were liberally sod publicly rewarded. Two metances of geog-robbery ottended with murder and torture occurred to 1814 but these were mostly perpetrated by large gangs of Keochuks, Acpaulese, and inhabitants of Rhoten.

Some reform in other respects. however appeared wanting as, occording to Mr Suson the main road from Dinagepoor to Moorahedabad which of one time was thickly set with villages had been quite deserted by the inhabitants through fear of the scroys passing to and from that city In 1814 a oight watch was also established in the different vil lages of the district planned and in troduced by Mr Sisson composed of villagers who took it by turns, which expedient operated with enn aiderable effect in reducing the oursber of gang-robberies and burglaries Bot notwithstanding these odrantageous circumstances, it was found ex permentally to be o great hardship on the labouring classes, especially in small villages where the turn of watching occurred too often besides which, subsequent to the seizure of any criminal, they were called on for evidence and compelled to quit their homes and occupations without recommense which accovances occurred exactly to proportion to their activity and vigilance as wotchmen,-(F Buchanan Corey, Suson Oswald, Ge S

DINABETOOR .- A towo ID the pro-

rince of Bengal the capital of the preceding district lat 25° 37' N . lon, 88° 43 E., 102 miles N N.E. from Moorshedshad This town con casts of four portion , et. Dinagepoor proper Rajgunge kongehou Ghaut, and Poharpoor The houses, or rather dwellings for many contain ten huts were estimated in 1805 at about 5 000 and the total population of all descriptions ot 30 000 persons. The raja a house was of great aire, but has gone to run since the decay of the family It was built hi A.D 1780 and its remains exhibit a strange mixture of Eoropean Moor ish, and Hindoo styles all in tho worst taste nor is much better displayed in the architecture of the houses erected by the European portion of the community. (F Buchanan, de )

DINATOOS,-A town in the prorance of Bahar situoted on the south aide of the Ganges ten miles west of Patna lat 25° 37 N lon 85° 5' E The military buildings here ore hand some edifices, arranged in apacioos aquares . bot they are only one story high and in point of magnificenco inferior to those of Berhamnoor Many of the officers and others have boilt neat and commodions habita tions to the vicinity and the grounds round them are well Isid out with good reads through the cantooments so that the appearance of Dinapoor is greatly superior to that of Patna. In 1811 the different bazars scattered within the cantooments were said to contain 3,236 houses. In this vici nity potatoes are cultivated to a great extent, and are consumed both by Europeans and natives; by the latter not as a substitute for grain but as a seasoning -(F Buchanon Fullarion (c)

Dinass —A town in the province of Allahabad situated on o small lake fifteen miles west of Jansi; lat 25° 28' N Ion 78° 28 E

Dinnigol (Dandigalo) — The district of Dindigul (including that of Madura) is situated to the Carnatie province, and about the tenth degree of north latitude, where it accupies about one degree of intitude and 12 of longitude. Ta the north it is hounded by Combiatoof and Trichnopoly, on the south by Travancare and Timevelly; to the cast it has the Bny of Bengal; and to the west Travancore and Countatoor. The particular portion of this district named Dindigul is mountainous and woody, the general surface of the country being aliont 400 feet abave the level of the sea. The Dudigul the level of the sea. valley, seventy-five miles long by about twenty broad, is formed by the great mass of the Piln's mountains on the north, by the Travancore on the north, by the mountains on the west, and on the east by a lower range of hills that extend from Dindigul to the bottom of the valley near Sheragurry, where they unite with the western ghants A projection from this range commonly known by the pame of the Aligherry hills, stretches castward to within fourteen miles of the garrison of Madura, and are the nearest high lands to that fortress. Along their northern base they are watered by the Vyar river, which after passing close to Madura, and traversing the zemındaries of Shevagunga and Ramnad, is absorbed into a large tank, near Altongherry, twenty nules south of Tondi. After passing Maduia, the river is so diverted from its channel for the purposes of urigation, that its bed at Ramnad is usually dry throughout the year, and only contains water when the floods happen to be unusually great. There are other streams that traversc Madura, and afterwards fall into the gulf of

In common seasons the climate of Dindigul is reckoned one of the finest in India It seldom rains in Maich and April. May is the hottest month of the year, but the thermometer does not rise so high as in Combatoor and Madura, yet in December and January it seldom falls below 64° In June, July, and August, the superiority of the Dindigul climate over that of the adjacent districts is

very perceptible, owing chiefly to the number of hills scattered over the surface, which arrest the clouds, and cause the discharge of much rain; the temperature of the air is consequently rendered cool and pleasant during these months, but for the remanuder of the year the climate does not differ essentially from that of Counliatoor. Notwithstanding its comparative superiority of chinate, this district, in 1809, 10, and 11, was visited by a destructive epidemic faver, which so thinned the population, that in many parts therice rotted on the ground for want of hands to From the first of Auril 1810 to the 31st of March 1811, there died in the Dindigil division 21,510 ncisons, ant of un estimated nopulation of 295,651 persons

The principal towns within the limits of Dindigul Proper, are Dindigul, Vedasundoor, Pilny, and Perryacottah, but the villages are meanly built, the roofs low and miserably thatched The lands lying faithest from the hills are invariably higher and drier than those lying near their base, where many large marshy, weedy tanks are to be found general plane of the country is considerably lower than that of Coimbatoor, although higher than those of Madura and Tinnevelly bourers here are chiefly Pullars, and are not comfortably situated houses, except in a few of the largest towns, are small, ill-built, carelessly thatched, and but little raised from the ground, more especially in the villages near the hills, which present an appearance of misery and squalid Truckle beds are seldom used, except by such individuals as are above the rank of labourers, but coarse cumlics of blankets are in general use The dry cultivation is to the wet rather more than four to

In the villages of Dindigul the same internal policy is found to prevail as in the other provinces of the south of India. Certain inhabitants, under particular titles, are in the enjoyment of a portion of land rent-free,

and are hereditary occupiers of the remainder Certain principal officers, the enroum (or occountant and register of the offurs of the village), iron smith carpenter barber, washermon, village watchman pot maker dancing girl, the di tributor of water, &c are sometimes found in o rilisge sometimes only a part of them lime the government produce of a portion of land assigned to them for their support, lint no claim to culti vate the land; and from the occupation in life of mmy of the licum bents it may be presumed they have schlam the wish The enoutry of Itanibgal was cedeal by Tippoo in 1792 and now, together with Viadura the Manapara pollama Ramnad, and Shevagunga formsonenf the collectorates under the Madeas pre-In 1822, according to the sidency returns made by the collectors to the Madras government the united districts of Dunligul and Mailura con tained 601,293 persons. The city of Madura is the head-quarters of the cu il establishment -- See also Mapu na. Aledical Reports, Hodgson oth Report Hurdu, &c)

DIRBIGUE-The cantal of the preceding district situated in lat 10'18 N lon 76 2 E., 160 miles \ by E. from Cane Comorn and about 400 feet above the level of the sea place is situated near the western ex tremity of an extensite plain about thirty miles from east to west and twenty five wale from north to sooth and almost surrounded by mountains The petiali is o clean and neatly hold native town particularly the principal bozar, which is lined on both sides with trees A small population of native Christians (obtanch of the Malabar Roman Catholics) reside here, and inhabit o particular inparter of the town where their hauses ore distinguished by o bitle cross at the top; and the total num ber of this persuasion within the province is said to be about 8,000 per They have a smoll place of worship south of the town where in 1820 the officiating priest was o na

tive of Malabar, subordinate to the Bi lion of Cananore.

The fortified rock of Dindigul is o bluff buiging-out mass of granite about 400 feet high, the upper half in some parts over topping the lower so as to render It quite inaccessible on the south and west The fortifi cations enclose an area of about 100 feet at the base of the acclivity but cover only the eastern and northern faces of the rock The garrison (n detachment of Involide) have breracks In the lower fart, the works of which are allowed to deeay, while those above are kept in the highest order The principal line of defence is within about 100 feet of the summit, nul consists of a range of solid ramparts faced with masonry, and flanked by quadrangular bostions There are many tinks executed in the bill above ond the apex is crowned by o Ilindoo temple the necent to which is by steps cut in the rock Under the northern ledge of this hill there is a remarkable natural cavern Inhabited by Unbomedan fakeers. dark narrow passage penetrates from hence towards the interior of the rock and a local tradition is related of forty three fakeers who musted the world by this passage and never returned

Dindigal was conquered by the Mysore Itaja in A.D 1755 and taken from Tippoo by a British mmy in 1763 but restored at the pearse of 1784. It was finally excled to the British government along with the district in 1702, ond befure the epitemie of 1811 was supposed to contant 7,000 ninhulunts. Traveling distance from Scringapatam 178 miles; from Biddras 275 miles — (Fullarion & C)

Discourd lates — A number of small ulumid lying off the Perak river and territory in the straits of blalaces and for many years a favourite resort of pratecy lat 4°20'N, lon 100°32' E. In 1810 they were offered to the Perang go terminent by the captom of a country, hip, who said they had been given to limit by the deceased.

Raja of Perak. Pulo Dinding is a beautiful granitic island 250 feet high, and covered with thick woods from the margin of the sea to the summit. —(Public MS. Documents, Finlayson, &c)

DIPNAGHUR.—A town of considerable population (not laid down in any map) in the province of Bahar, district of Bahar, thirty-six miles S.E. of Patna, and two south from the city of Bahar.

DITTEAH (Dattiya).—The capital of a small principality in the province of Allahabad, forty-three nules S S E. from Gualior; lat. 25° 43' N., lon. 78° 25' E This town, when visited by Dr. Hunter in 1790, was a mile and a half long and nearly as much in breadth, the houses being mostly of stone and covered with tiles, surrounded by a stone wall furnished with gates The raja had then a palace without the town, situated on an eminence, which commanded an extensive view as far as Pechoor, Narwai, and Jhansi. Close to this hill is an extensive lake

During the reign of Aurengzebe, Ditteah was the capital of Dhoolput Roy, a Bondelah chief of some celebrity. On the cession of Bundelcund to the British, in 1804, Raja Parakhyit of Ditteah joined the British standard. and was taken under its protection. The modern territories of Ditteah bolder on those of the Bhow of Jhansı and the Tehree Raja. At the conclusion of the Pindarry war of 1818, the Vinchoor Cur's lands, known by the name of Chournssy, lying on the east side of the Sinde, and forfeited by the Cur's adherence to Bajerow, were given to the Ditteah Raja, on whose territories the British army, commanded by Lord Hastings in person, had for a considerable time encamped. The annual value was about 92,000 rupees per annum .- (Hunter, Richardson, Public MS. Documents, &c)

Div (Dwipa, the island). — A small island and harbour near the southern extremity of the Gujerat peninsula, lat. 20° 41′ N, lon. 71° 7′

This insulated spot, about four E. iniles long by one broad, in ancient times contained a Hindoo temple. celebrated for its sanctity and riches. In A.D 1515 the Portuguese obtained possession of Diu, and in 1536, by permission of Bahadar Shah, the reigning sultan of Gujerat fortified it. While the Portuguese prospered, it enjoyed considerable commerce, but it fell with their decay, and in 1670 was surprised and plundered by the Muscat Arabs, then a considerable maritime power. It has since dwindled away, and is now an insignificant place, containing not more than 4,000 inhabitants, but it may at some future era again become of importance on account of its harbour and geographical situation. Even now it receives a small tribute annually from Poorbunder, for the protection it is supposed to afford to the trading ships of that port, but which it neither does or can afford The remains of convents and monasteries are still to be seen, and cannon are mounted on the walls, but without soldiers to look after them In 1809, during a particular emergency, it was garrisoned by a detachment of his Majesty's 47th regiment. — (Stewart, Bruce, Duncan, &c )

DOAB (Two Waters) - Recently this name has been applied indiscriminately to the whole tract of country between the Ganges and Jumna, from Allahabad to the hills of northern Hindostan, but formerly by Mahomedan historians it was usually restricted to the southern portion, for the most part comprehended in the Agra province, and during the Mogul predominance subdivided into the districts of Furruckabad, Kanoje, Etaweh, Korah, Currah, and Allahabad There are several Doabs in Hindostan, the name designating any tract of country included between two rivers.

The general aspect of the Doab is that of extreme nakedness Clusters of trees are occasionally seen near the larger villages, but ten miles may frequently be passed over without the appearance of one. firewood is in

consequence both scarce and expenanye, nor is there any tree pasture for elephants to be met with in the whole tract from Allahabad to Sabarunpoer In fact the only wood found here in any shundance is the low shrubby palass which has overspread a coo uderable extent of the interior, and supplies Caunpoor and the other Lo ropean stations with fuel of a very indifferent quality. The millet raised alshough a small-cared grain formishes a great quantity of straw ten feet long which is of great use as provender for eattle Besules millet sugar-conc and barley are cultivated and in the neighbourhood of kaoojo considerablo quantitles of tobacco, the only plant introduced by Europeans that is in general request all over fiindos-The stanle article, hewever of the northern part of the Doab is cotton and a coarse cotton cloth died red with cheap materials is largely manufactured in the central tracts as is also another species named gens and germas. The soil of this region is so naturally adapted for the production of tadigo that the plant a here found in w wild state of wso perser quality to that raised by culti The system on which the manufacture of indigo is conducted in the Deab Is in some respects pecuinstead of the whole process from the commencement being carried on at the factory the colouring mat ter is extracted by the cultivator him self and delivered in a figure state at the factories where it is afterwards inspessated and formed into caker The crops of the indigo weed here, al though precamous, are ices so thun in Bengal butthe dye thus manufactured is universally of inferior quality to that produced in the lower provinces

The chmate of this portion of India is subject to extractinary finctuations of temperature within the limits of the same tweety-foor hoors there being frequently a difference of forty degrees, and seldom less them thirty degrees, throughout the cold season between the extreme points of the morning and afternoon. At this season the thermometer hes been

known to fall at day-break below the freezing point, yet is seldom under sixty-eight degrees during the after part of the day The hat winds blow here with great severity in April and Vlay, and have been known to raise tho thermometer even to 120 degrees and This intolerable hear as upwards might be expected frequently proves fatal to animal life but the European residents in the Doab who have the means of cooling their rooms with wetted khuskhus mats, and whose avocations do not call them into the open air enjoy generally as good health while the hot season lests as in any other

While this tract of enuntry remained subject to the Nabobs of Oude, salt was made to almost every vdlage from Allahabad to Hurdwar. by professed manufacturers who disposed of it in small quantities to the rame class Salt of a similar qua ity wa also made on the opposito bank of the Jumns, the total quan tity then manufactured in the ceded provinces being estimated at 40,000 tnaunds principally used by the lower classes and given to cattle Much base salt was also imported from Sambler Nho and Combhere By the treaty of peace concluded with Dowlet flow Sindia on the 30th December 1803 he ceded to the British all his forts, territories god nalits in the Doah between the Ginges and Jumna the southern division having been previously ac guired from the Nabob of Oude in 180) It did not in fact constitute ony part of the original possessions of his family, busing been added, olong with flohileund to the Oudo deminions by victories obtained by the British armies. The ermie of ils costy, or gang robbery most frequently occurs in this region during the first six minths of the year. when the Ganges and Jumna are fordable during the last six months it becomes less frequent. Indeed, considering the almost total anarchy that preveiled in this quarter before it came under the British domination and that the Jauts, Goojurs, Rai

poots, Aheers, Lodhas, Patans, Mewatics, Meenas, Buddicks, Thigs, Cozauks, Chummas, and Khaukrobes (who still form the bulk of the population), had been from time immemorial addicted to open and secret plunder, it is not surprising that criminal offences are not wholly eradicated.— (Fullation, Tennant, Sir Henry Wellesley, Swinton, Guthrie, &c.)

Doab Canal.—See Zabeta Khan's Canal.

DOABTH BARRY.—(Bari, a residence) —A doab in the province of Lahore, which comprehends the country between the Ravey and Bevali rivers It is also named Maniha, and the Seiks who inhabit it, the Maniha Singhs. It contains the cities of Lahore and Amritsir, and becomes in consequence the centre of the power of the Seik nation. In 1806, Runjeet Singh of Lahore, Futteh Singh of Allowal, and Joodh Singh of Ramgadia, were the principal chiefs of the country, but the first since that period has usurped the possessions of all other competitors within its limits Approaching the mountains this tract is said to be less fertile than the Doabeh Jallinden; it must, however, from its geographical position, have nearly the same elunate and soil.—(Malcolm, &c)

Doabfh Jallinder (Jalindra).— A doab in the province of Lahore which comprehends the country between the Sutuleje and Beyali rivers, and the mountainous district of Cah-This natural subdivision of the Lahore province, although of small dimensions, is from the peculiarity of its geographical position of considerable importance, as it is by this route that the imperial province of Delhi is to be most conveniently penetrated, the extent of fertile country being here circumseribed by the hills on the east, and the desert on the west. It is also the most fruitful portion of the Seik territory, and is not excelled in climate and strength of regetation by any province of In-The soil is light, but very productive; and the country, which is

open and level, abounds with every kind of grain. The absence of water, which is so severely felt in the more westerly regions, is here unknown, as it is every where plenty within two of three feet of the surface. The principal towns, are Jallinder, Rahoon, and Bhatty.

This territory is principally occupied by the Malawa Singh Seiks, who are called the Doabeh Singhs, or Singhs who dwell between two wa-With their chiefs we are but little acquainted. In 1808, Tarah Singh was one of the most considerable; but he seems to have disappeared so early as 1812, when Boodh Suigh of Jallinder, Futteh Singh of Allowal, and Jodh Singh of Raingadia, were the principal leaders. In that year Runjeet Singh of Lahore, taking advantage of their discord, attacked the possessions of the first, and captured lus two principal fortresses, Jallinder and Bhutty. It is worthy of remark as illustrating the political condition of the Seik community, that the instruments employed in the subjugation of this territory were the two chiefs last named, whose forces composed the largest body of cavalry in Runject's army; yet a defensive alliance was believed to exist between these three chiefs, to resist conjointly the aggressions of Runjeet Singh. Under these circumstances, two of them followed his standard to effect the destruction of the third, swayed by the delusion of piotracting for a short period their own downfall. the other hand, the pride of Boodh Siugh, the chief first-mentioned, induced him to abandon without a strug gle a tract of country yielding three lacks of rupecs per annum, rather than submit to a personal attendance on Runject Singh. — (Ochterlony, Malcolm, &c)

Doaben Recutva.—A doals in the province of Lahore, which comprehends the country between the Chinanb and Ravey rivers, and in every geographical feature resembles the preceding Doabs, but respecting the interior of which scarcely any thing is known. The extent of Doubeh Rechtin (a mine given by Abul Fazel) is considerable and it contains some towns of note, such as Bissooly Vizierabad and Ludnabad.

Dona .- A small town in the province of Aimeer, on the frontier of the Rans of Odeypoors dominious towords the city of A meer In 1824 there was a eastle here but much de lapidated the thakour then being in disgrace and exile of Notah of the tradesmen and merchants of this neighbourhood are natives of Bi canere in the desert who generally return home after they have made o little money, to end their days in that ploce although attuated in one of the most inhospitable regions of the earth surrounded by an ocean of sand and all the drinkable water menopolized and sold by the govern ment.

Dorrson.—A town in the Car notic province, twenty miles 8 W from Ascat; lat 12° 42' N, lon 79° B E.

Docatage.—A town and small district in the My-soro territories twenty two miles E by \ from Chittel droog lat. 16° 14'N., lon 76° 48 E

Dornam —A town or rather vd lage in the province of Bahar, Zemiodary of Chuta \approx 213 miles V.N W from Calcutta; lat 23° 11 N ion 85° 16' E

DODAREE.-A small town in the province of Ajmeer principality of Boundee themty three onles tra Boondee velling distance north east from the town of Boondee. This place stands close to the margin of o beaouful lake surrounded by low hdis, covered with wood ond adorn ed with pagodas and other buildings A perpetual stream from the lake posses through the streets whose waters are afterwards employed to irrigate the adjacent fields There is a templo here dedicated to Parawanath the Join desfied saint there are many of that seet among the inhabitants. (Fullarion &c)

Dogoram.—Atown in the province of Allahabad forty two miles S.S.E. from Jhanel, lat 2.5° N lon 78°.2° E.

D mun (Do-hud, twa frontiers) .-This place stonds on the common boundary of Maluo and Gujerat, at the north-east entrance of the Barreah jungle which extends above forty miles nearly to Godra, yet the road through it leading into Guierat is the best and most frequented lat 22° 55' N., lon 74° 20' E Dohud 18 of considerable extent the houses well built ond the bazar abundantly supplied with grain and water in consequence much frequented by the traders of the interior, being a thoroughfare for the inland traffic between the provinces of Upper Hindostan and Malwa with Baroda, Broach Surat and other large commercial towns of Gujerat It is olso of considerable importance on account of its position, which com mands the principal pass into Gujerat from the north-east. The present fort of Donud was a caravanserat ot the eastern extremity of the town, and to have been built by Aurengzebe It is 450 feet square and has two strong gates one on the north and onother to the south, and the interior contains a mosque, two wells ond other handsome structures, all of excellent workmanship and durable

nuctrials.—(Aladeolas, \$\frac{1}{2}\) Dollarals.—A trading town in the province of Gujerat pergunnah of Dundooka, ten miles west from the guilfo Cambay las 22°18 N lon 72°21′E In 1820 owing to the river Bhadur harving burst fits banks and overflowed the adjocent country so much mud and sand was occomminted at this ploce, as to threaten its fold destruction as a morthino towo.—(Public Al'S Documents & \$\frac{1}{2}\)?

DONEL ISLE.—One of the Mergul orchipelago, named olso Lamboo and Sullivan a Island lat 11° 3 N It is about tweety miles long by twelve broad and in 1820 was unachabited. It has a bold store but does not rise to a greater elevation than 500 feet The soil is probably good, as the hills are covered with brushwood and large trees.—(Lieut. Low, &c)

Domus.—A town in the province of Gujerat, fifteen miles SW. from the city of Surat; lat. 21° 4′ N., lon. 72° 53′ E.

Dongere.—A small fort built on a rock near Chatsoo, in the province of Ajmeer, principality of Jeypoor, twenty-three miles travelling distance S. by E. from the city of Jeypoor.

Donobew.—A town and stockade in the kingdom of Ava, province of Pegu, about sixty miles by the course of the river above Rangoon, lat. 17° 8' N , lon 95° 55' E In 1825 the stockade of Donobew extended for nearly a mile along the sloping bank of the river, its breadth varying, ac cording to the nature of the ground, from 500 to 800 yards; the whole space fortified in the strongest manner, and exemplifying the perfection to which the Burmese had attained in the art of temporary defensive for-The army within, under tifications the Bundoola, amounted to about 15,000 men of his best troops. After having repulsed General Cotton's detachment with a heavy loss, it was shortly after evacuated by the garrison, owing to the death of their commander, who had been killed by a stray bomb. The embassy in 1827 found this place considerably enlarged and strengthened—(Snodgrass, &c )

DONDRA HEAD.—The southernmost extremity of the island of Ceyion, near to which are still to be seen the ruins of what apparently has once been a magnificent Hindoo temple; lat. 5° 56' N., lon. 80° 35' E

Donnal River.—A river of Cochin-China, the source of which still remains unknown—It flows past the city of Saigon, unto which place it is navigable for ships of burthen; but smull craft can ascend much higher. It falls into the sea at Cape St. James, lat. 10° 16′ N, lon. 107° 45′ E, where the rise of the tide is mine feet at full and change. It is

said to have been recently connected with the Cambodia river by a canal. The delta of this river in many respects resembles that of the Ganges in Bengal, being intersected by a labyrinth of channels, with low and jungly banks, swarming with tigers. Another point of resemblance is the mangoe fish, which abounds near Saigon, and of an excellent quality.—(Lieut White, &c.)

DOOBEE.—A small fortified town in the province of Ajmeer, which in 1824 had some small ordnance on the bastions, and well calculated to defy the attacks of a native army; lat. 26° 52′ N., lon 76° 20′ E, fortyfour miles east of Jeypoor.

DOODPUTLEE—A small town in the province of Cachar, about forty miles east of Silhet, where in 1824 a sharp action took place with the Burmese, in which a British detachment was repulsed with the loss of 150 sepoys killed and wounded, besides four officers; lat. 25° 3′ N., lon. 92° 42′ E.

Doolea —A considerable town belonging to the British government in the province of Candeish, and formerly the residence of the political agent and the head-quarters of a small military detachment, thirty-five miles west of Arundool, lat. 21° 1' N., lon. 74° 47' E The river Paunira runs close to the north of the town over a rocky bed, with a fine broad stream, for part of the year, but in the cold season it becomes dry. When it is able it joins the Tuptee. From hence there are roads leading east to Boorhanpoor, north to Sindwah ghaut, south to Lallung, and west to Surat.—(Sutherland, Sc.)

Dooloo Bussundar (Dalu Bassandra).—A Hindoo place of pilgrimage in Northern Hindostan, where there are three coonds or springs. According to native accounts a flame appears on the surface of the water above the small holes, from whence the water issues.

Doolooria.—A considerable town

belonging to the British government to the province of Candeish, per gunnah of Bagwanea altuated on the Athere river thirteen miles S.S. W. from Iluseensbudt 1st 22° 33 N, 10n. 77° 40° L

Doonan.—A town in the province of Gundwana 120 miles N.E. by \ from \acpoor lat 22° 46 N, ion 80° 5 E.

DOOMEOT —A fortified post in Northern Hindoston twelve miles south from Scrinagur; lat 30°4 N Ion 78°45 L

Dany (a rolley).- See Divisin

Dooranage.—A small town in Northern Hindorian sisteen miles N. W from Almora; lat 20°46 N., 10n 79°28 E.; 7,834 feet above the level of theses

Donvocatona (Danguryur) -The capital of a small principality in the prosince of Gujerat, situated in the hilly tract formerly named Bs enr mett-fire miles & L of Ahmedahadalat 23° 54 V. lon 77° 50' I. We have no topographical infor mation respecting this district, ex centing that the mounds enclosing the Doongurpoor lake are built of solid blocks of marble Both this state and Banswara have been so long disunited from Oderpoor that they are virtually separate sovereigo ties although still kent attached by family descent and alliance Doongurpoor princes claim to be a senior branch of the reigning save reigns of Odeypoor; and this right is tacitly admitted by the highest sest being always kept vacant when the raja of the latter country dines No race of men are more punctillous in giring and demanding those dumoctions that relate to birth, than the Raipoots nor are the rights of the Individual at all affected either by his being in a reduced coodition or being merely the odopted child of the family whose soherstance he claims Dynasties never could have been perpetuated except by a lati

tude in the law of adoption which renders the intol extinction of a fumily almost impossible

The Doongurpoor raiss linve among their military adherents a few Thakoors and some Rajpoots of their own tribe; but the majority of their subjects are Bheels, who are profu lily the aborigines of the country When Valwa and the neighbouring provinces fell into their late state of snarchy the Doon urpoor chief, in order to preserve his country, enter tained bands of Araly and bindies who soon usurned all nower and laid waste the country they were hired to From these merciless ra protect regers the principality was rescued by the Best h government under whose protection (for which a small tribute is paid) It is fast recovering from the state of desolation to which It had been reduced. In 1824 the Doongurpoor gross revenues amounted to 247,540 rupces - (Malcolm, Public WS Documents, Se)

DOUDLAKERS (Dendyscars),—A town in the king of Oode a territo ree forty-eight miles south by west from I nekoaw; lat °0° 12' N<sub>n</sub> lon 80° 30' I.

Doos.—A rilinge in the Balaghaut ceded territories, di trict of Cuddla pah twenty-mac miles N W from tho town of Luddopah; lat 14°48 N., 78°43 L.

Bosaua.—A town in the province of Malwa attuoted on the road from Bhopaul to Shugawulpoor, and about seventeen miles from the for mer; lot 27 24 N., lon 77º 15 E It formerly belonged to the Vinchoor Cur but after the Pindorry war of 1818 was given to the Nabob of Bhopaul in 1820 st contained about 300 houses.—(Alaclosia &c)

Donary.—A town in the prevince of Allahebad furty two miles 6 S.E from Jhana; lat. 24° 62' N, lon 81°41 E

Dacenaul.—A town in the Balaghast ceded districts, 6fty six miles north from Cuddapah; lat 16° I'N., los 78° B' E The soil is probably good, as the hills are covered with brushwood and large trees.—(Lieut. Low, &c.)

Domus—A town in the province of Gujerat, fifteen miles S.W. from the city of Surat; lat. 21° 4′ N., lon. 72° 53′ E.

Dongree.—A small fort built on a rock near Chatsoo, in the province of Ajmeer, principality of Jeypoor, twenty-three miles travelling distance S. by E. from the city of Jeypoor.

Donobew.—A town and stockade in the kingdom of Ava, province of Pegu, about sixty miles by the course of the river above Rangoon, lat. 17° 8' N., lon. 95° 55' E In 1825 the stockade of Donobew extended for nearly a mile along the sloping bank of the river, its breadth varying, according to the nature of the ground, from 500 to 800 yards; the whole space fortified in the strongest manner, and exemplifying the perfection to which the Burmese had attained in the art of temporary defensive for-The army within, under tifications the Bundoola, amounted to about 15,000 men of his best troops. having repulsed General Cotton's detachment with a heavy loss, it was shortly after evacuated by the garrison, owing to the death of their commander, who had been killed by a stray bomb. The embassy in 1827 found this place considerably enlarged and strengthened—(Snodgrass, &c.)

DONDRA HEAD.—The southernmost extremity of the island of Ceylon, near to which are still to be seen the ruins of what apparently has once been a magnificent Hindoo temple; lat. 5° 56′ N, lon. 80° 35′ E.

Donnal River —A river of Cochin-China, the source of which still remains unknown. It flows past the city of Saigon, unto which place it is navigable for ships of burthen; but small craft can ascend much higher. It falls into the sea at Cape St James, lat. 10° 16′ N., lon 107° 45′ E, where the rise of the tide is mine feet at full and change. It is

said to have been recently connected with the Cambodia river by a canal. The delta of this river in many respects resembles that of the Ganges in Bengal, being intersected by a labyrinth of channels, with low and jungly banks, swarming with tigers. Another point of resemblance is the mangoe fish, which abounds near Saigon, and of an excellent quality.—(Lieut White, &c.)

DOOBEE—A small fortified town in the province of Ajmeer, which in 1824 had some small ordnance on the bastions, and well calculated to defy the attacks of a native army; lat. 26° 52′ N, lon. 76° 20′ E, fortyfour miles east of Jeypoor.

DOODFUTLEE.—A small town m the province of Cachar, about forty miles east of Silhet, where in 1824 a sharp action took place with the Burmese, in which a British detachment was repulsed with the loss of 150 sepoys killed and wounded, besides four officers; lat. 25° 3′ N, lon. 92° 42′ E.

Doolea.—A considerable town belonging to the British government in the province of Candeish, and formerly the residence of the political agent and the head-quarters of a small military detachment, thirty-five miles west of Arundool, lat. 21° 1' N., lon. 74° 47' E The river Paunjra runs close to the north of the town over a rocky bed, with a fine broad stream, for part of the year, but in the cold season it becomes dry. When it is able it joins the Tuptce. From hence there are roads leading east to Boorhanpoor, not the Sindwah ghaut, south to Lallung, and west to Surat.—(Sutherland, Sc.)

Dooloo Bussundar (Dalu Bassandra).—A Hindoo place of pilgrimage in Northern Hindostan, where there are three coonds or springs. According to native accounts a flame appears on the surface of the water above the small holes, from whence the water issues.

Doolooria.-A considerable town

belonging to the British government to the province of Candersh, per gunnah of Bagwanea situated on the Athere tiver, thirteen miles S.S. W. from Hus clasbod lat 22° 33' \, 100 77° 40' F

Doors n.—A town in the province of Gundwans 120 miles \ E. by \ from Nappoor lat 22° 46° \ lon 80° & E.

DOONEOT —A fartified post in Northern Hindoston twelvo miles south from Sennagur; lat 10° 4 N, lon 78° 45 L

Doon (a ralley).- See Devant

Doons once —A smoll town in Aorthern Hundortan alexteen miles A \ W from Almora; let 23°46 \, too 70°28 E; 7,534 feet above the level of the sea

Dookeraroon (Dongurpur) The capital of a small principality in the province of Gujerat situated in the hilly tract formerly named Ba gur, ninety-five miles \1 of Ahmedabed; lat 23° 54 \ lon 77° 50' L. We have no topographical infor motion respecting this district ex cepting that the mounds enclosing the Doongurpoor lake are built of solid blocks of marble Both this state and Banswara have been so long disunited from Oderpoor that they are virtually separate soverel notices, nithough still kept attached by family descent and alkance Doongurpoor princes claim to be a senior branch of the reigning savereigns of Odeypoor; and this right is tacitly odmitted by the highest seat being olways kept vacant when the rais of the latter country dines No race of men are more punctilious lo giving and demanding those distinctions that relate to buth than the Rajpoots nor are the rights of the indiridual at all offected either by his being to a reduced condition or being merely the adopted child of the family whose inheritance he claums. Dynasties never could hove been perpetuated except by a lati

tude in the law of adoption, which renders the total extinction of a fa-

mily almost impossible The Doongurpoor rafas hove among their military adherents a few Thakoors and anme Ramoots of their own tribe; but the majority of their subjects are Bheels, who are proba bly the aberigines of the country When Malwa and the neighbouring provinces fell into their late state of anarchy the Doongurpoor chief in order to preserve his country enter tained bands of Arabs and Sindies who soon usurned all power and laid waste the enuntry they were lured to From these merciless to protect vagers the principality was rescued by the Brul h government under whose protection (for which a small tribute is paid) it is fast recovering from the state of desoistion to which It had been reduced In 1824 the Doon-urpoor gross revenues smount ed to 243,080 rupees - (Malcolm I ublie It's Documents, 5c)

Donous Erra (Dundyacaro).—A town in the king of Oude a territories forty-right miles south by west from Lucknow; lat "6" IZ N., ion 80" 36" L.

Doos.—A village in the Balaghaut ceded territories district of Cudils pals twenty-nine miles \ W from the town of Cuddapah; lat 14°48 N., 78°43 F

Donana.—A town to the provice of Visiwa, autoted on the read from Bhopaul to Shojowulpoor, and about seventeen unler from the for mer lat 25° 24 N., lon 77° 16 E It formerly belonged to the Vicehoor Cur but after the Pundarry war of 1818 was given to the Nabob of Bhopaul in 1820 it contained about 300 houses.—(Afalcolm &c)

Doosex.—A town in the prorince of Allshabad forty-two miles S.E. from Jhansi; lot. 24° 52' N, loo 81° 41 E

Doornaut.—A town in the Balaghaut ceded districts, fifty-six miles north from Cuddapah; ist 16° 1'N., ioo 70° 9' E DOORYGHAUT (Durighat).—Atown in the province of Allahabad, thirty-seven miles south by east from Goracpoor; lat. 26° 16' N., lon. 83° 37' E.

DOPHLAS (or Dufflas) —The great bund, or causeway, which formerly extended from Cooch Bahar to the eastern extremity of Assam, at the village of Lakhomati Bhoteya runs through a thick forest and separates the district of Noa Dewar, in Assam, from the Dophla country, the land on the north of the bund belonging to the Dophlas, and to the south to Assam proper.

These Dophlas are a powerful tribe, inhabiting the second range of hills. They carry on an active traffic with Assam, bringing down rock-salt, and coarse red woollens, and taking back in return fish, buffaloe flesh, and coarse silk. Then nearest village is about eight miles north of the bund, which here seems to serve the stead of a boundary line. In 1814 the Boora Gohaing, or regent of Assam, in his correspondence with the Bengal presidency, attributed the desolation of a considerable portion of his territories to the predatory incursions of the Dophlas — (Public MS. Documents, Public Journals, &c)

Dony Harrour.—A harbour on the northern coast of Papua, lat. 0°48′S, lon 134°35′E. The promontory of Dory, the sea-coast of which extends about fourteen leagues, is of moderate height, the ground every where ascending gradually The trees are lofty, with lit-The neighbouring tle underwood. country abounds with fresh-water rivulets, and there is good grass. The climate is temperate, being so near the high mountains of Arfak, where the clouds settle There are neither goats or fowls at this harbour, but wild hogs, fish, greens, and fruit, are to be had. The Papuas who reside at Dory are supplied with plantains and calavansa beans by the horaforas of the interioi, who take in return from and other goods. Wood is

plentiful here, and the wild nutmeg grows in the vicinity.—(For rest, &c.)

Double A town in the province of Gundwana, forty-two miles east by south from Bustar; lat 19° 22′ N., lon 83° 7′ E.

DOWLETABAD (or Deoghu). — A town and strong fortress in the province of Aurungabad, seven miles N.W. from the city of that name; lat 19° 57' N., lon 75° 25' E. This fortress is formed of an insulated mass of granite, about 3,000 yards from the lange of hills to the north and westward, and presents to the eye a shape not unlike a compressed bee-hive, except that the lower part, for nearly one-third up, is scarped like a wall, and presents all round a perpendicular cliff It has never been accurately measured, but appears to be about 500 feet to the summit, which is almost a point. The scarp of the rock down to the counterscarp may be about 150 feet, and the scarp below the glacis from thirty to forty feet, which added to 150 will give above 180 feet for nearly the whole height of the scarped cliff. An outer wall of no strength surrounds the pettah, above which towers the hill that forms the citadel; but up to the ditch three other lines of walls and gates are passed. causeway across the ditch does not admit of more than two persons at once, and a building with a battlement defends it on the opposite side.

After passing the ditch the ascent is through an excavation in the heart of the rock, and at first so low that a person is obliged to stoop nearly double, but after a few paces it opens into a high vault, lighted by torches, out of which the ascent is by a winding passage gradually sloping cut through the interior of the body of the hill. This passage is about twelve feet high, and the same in breadth, with a regular rise. At certain distances from this gallery are trap doors, with flights of small steps to the ditch below, only wide enough to admit a man to pass, also cut through

the solul rock to the water a cd\_c and not espaced to the fire of or mil ents unless they gain the very erest of the glaces There are likewise other passages and recesses for depositing stores. After ascending the unaln passage for about ten minutes, it opens out into a hollow of the rock about twenty feet square On one side leaning against the cliff a lar e iron plate is seen nearly the same are as the hottom of the hollow. with an immense iron poker place is intended to he laid over the outlet and a fire placed on it should the beuegers make themselves masters of the subterranean passage, and there is a hole three feet in diameter intended to convey a strong current of elr to the fire On the road to the aummit which levery steen and In some places covered with brush wood there are some houses towers. and gates. In the lower furt there is a remarkable minar or column apparently about 160 feet blak and of great diameter but deformed by a line gallery which encompasses it at about a fourth of its elevation from the ground. The enclosure of the pettah or town contains numerous remains of buildings composed of a rough dark-coloured stone but the Inhabited portion is now very inconaiderable The Interior of the lower fort presents also a similar scene of runs. The governor a house is on excellent one end surrounded by a verancia with twelve arches and through this house passes the only road to the top Towards the sum mit the road becomes narrow and on the peak, where the Nizam a fing flies, atands a large brass 24-nounder. but bendes this in the whole for tress there are said to be only a few two and three-pounders. rock contains reservoirs of water, if properly defended it could only be won by famloc

When the Mahomedans, under Al lah od Deen carried their arms hit this quarter of the Decean, about A.D 1293 Deoghir or Tagara was the residence of a powerful limitoo raja, who was defeated, and his ca-

intal taken and plundered of immense riches In 1 100 the fortress and surrounding district were reduced to permanent subjection by Malhek sib, the I mperor of Delhi s gene-In the early part of the four teenth century the emperor Valiomed made an attempt to tran fir the seat of government to Deoghir, the name of which he changed to Dawletahad To effect this absurd roject he almost ruined Delhi with the view of driving the inhabitants to his new capital, 7.0 miles distant; but his endeavours were unavailing so that he was obliged to desist after doing much muchief About 1595 Dowletabad surrendered to Ahmed Neam Shah of Ahmedauggur, and on the fall of that dynasty was taken possession of by Malhk Amber, on Abys Inlan slave who was reckoned the ablest general, politician and financier of his oge line successors reigned until about 1634 when the city and fortress were taken by the Mugula during the reign of Shah Jelian when the sent of government was transferred to the neighbouring town of Gurke or herkhi, and smeu named Aurungahad Along with the rest of the Mogul Decean is fell into the possession of \iran ul \lulk, and less continued with his descendants the Airans of Hyderabad ever since with the exception of the year 17-8 during which it was held by V Busy but he was obliged to abandon it when ordered to withdraw his army to the Carnatle by 31 Lally his superior in command,-(Fitzelarence Fullarion Fernila, Scott, Orme, &c )

Downerann — A large dutrice, mostly comprehended in the Nizam a dominions in the province of Aurungshad and astueted about the twenueth degree of north lattude Although forming part of the elevated table-land of the Decean this territory for the most part is of an uneven aurisee and interacted by hilly ridges of considerable extent. There is little cultivation except in the neighbourhood of villaces ond

towns, the principal of which are Aurungabad, Dowlethbad, Elmin, and Phoolaidry; the chief streams are the Godavery and the Sewna.—(Fullarton, § c.)

Drauppa.—A town in the Gujerat peninsula, forty nules N.N.W. from Janaghar; lat. 21° 57' N., Ion. 70° 17' E.

Dnaus.—A town in Little Tibet, situated near the junction of two branches of the Indus. In old imaps it is placed in lat. 35° 30' N., Ion. 76° E., 100 unles N.E. from the city of Cashmere. By the natives it is asserted, that two great streams contributary to the Indus, join at or near to the town of Draus, eight days' joinney for a caravan northeast of Cashmere. The main stream of the Indus at this point is said to come from the north-east.—(Elphinstone, Macariney, &c.)

DRAVIDA (or Dravira) -This is the ancient name of the country which terminates the south of India. Its northern limit lies between the twelfth and thirteenth degrees of north latitude, and it is bounded on the east by the sea, and on the west The name, by the eastern ghauts. however, is occasionally extended to all the country occupied by inhabitants speaking the Tamul language; and there is a whole class of Brahmins designated by the name of Dravida Brahmins. The subordinate divisions of Dravida were named from the three rival dynasties of Cholan, Cheran, and Pandian; the first governing in Tanjore and Combooconum, possessed the northern tract. Pandian had Madura and the south: and Cheran united Kanjam and Salem to the dominions of the Kerala, on the coast of Malabar.—(Wilks. Colebrooke, F. Buchanan, &c)

DRUMTOOR —A small valley in the province of Lahore, situated between the thirty-fourth and thirty-fifth degrees of north latitude, and extending from the Doar rivulet, which runs S. W. and falls into the Indus at Torbaila. The mountains are lofty, and

produce onks, pines, walnuts, wild olives, and other hill trees, but no European flowers or fruits are found here. The country is tolerably inhabited, and contains some populous villages.—(Elphinstone, § c)

Dunnot —A large town in the province of Gujernt, which in 1780, although them in a rapid state of decay, was supposed still to contain 40,000 inhabitants, among whom were only 300 families of Muhomedans; lat. 22° 9′ N., lon. 73° 25′ E., thirty-eight unles NE from Broach. mains of fortifications, gates, and temples, indicate a former state of great magnificence, and the profusion of lieun stone, and the remnins of sculptine scattered about are astonishing The ancient walls and towers were entirely built of large square stones, the expense of bringing which from the distant mountains must have been enormous, as not the smallest pebble is to be found in this part of Gigerat. The gate of diamonds piesents a very favourable specimen of Hindoo architec ure, extending in length 320 feet, with a proportionate height. Rows of elephants richly caparisoned support the massy fabric, and the whole is covered with sculptured groups of various descriptions. Within the walls is a large tank constructed of masonry, having a grand flight of steps to the water whole is now in a state of dilapida-Such is Mr. Forbes's description of Dubboi as it existed fortyseven years ago, and it does not since appear to have attracted the slightest notice. Some of the principal houses are well built, but the rest are native huts, the whole overshadowed by mangoe and tamaiind trees, where dwell nearly as many monkies as there are human creatures below. The natives consider them half men, and say that on account of their laziness, tails were given them and also hair to cover their bodies - (Forbes,

Dublana —A large village built of schistus stone, in the province of Ajmeer, principality of Boondee ele-

ven miles north from the city of Boonder lat 20°38 V . lon 70°80'1

DUCBENTABA (Dalshingare the southern portion ] .- A district in the north-tast corner of Cashmere on the mountains of which Abul Fazei in 158? says the snow never decreases so that from the cold the narrowness of the roads and the great height of the mnontains, they cannot be passed without extreme difficulty

Deo .- A considerable town in the province of Vislas, which in 1800 contained 2 000 houses; lat. 240 \... lon 76° 1' by fifty two miles . from Oojein It is the head of a pergunnah which belonged to Zahm hingh the old regent of hotah In 1700 lt selded a revenue of 1,00 000 rupers perannum which in 1820 on account of the lung prevailing acerchy, had derlined to 2,500 rupees - (Mal coln fr)

DLEKA JETHO .-- A town in the province of Bootan eighteen miles 46' N. lon 89° 32' E.

Desginshahasazroga-A large island in the province of Bengal as tusted at the mouth of the great river Megna, from the sediment of which it has been furmed to length It may be estimated at thirty miles by thirteen the average breadth lt is very low land and at spring tides during the rains Is almost submerged In the channels between Dukkia shahabazpoor and the neighbouring Islands the bore caused by the sudden laffux of the tide prevails with great violence, and renders the navi gation extremely dangerous Salt of an excellent quality is manufactured here on government account by on establishment aubordinate to the Bulwo and Chitta, ong agency

Duncon.-A military villege and extensive cantonment in the prosmee of Bengal, six miles W.A W from Calcutta, where a battalion of European artiliery is usually stationed, being the head-quarters of the Bengal artiliery It coosists priocepally of

several long low ranges of buildings, all on the ground floor ornamented with verandas, the lodgings of the troops and some small convenient bouses occurred by the officers, adfolining a large plain like the espla nade of Calcutta, and appropriated to the artillery practice There is a church and free school here

DENNOUGAN RIVER (Damodara, a name of Tuhnu).-This river has its source in the billy part of the Ranghur district, and province of Behart it afterwards flows through the Pachete remindary and joins the floo hily a few miles below bulta. Including the windings its course may be estimated at 100 miles, and it is important as greatly assisting the Inland navigation of the adjacent districts.

Druto.-A town in Tibet, built on a steep emmence forming part of a ridge stretching from a mountain a suic and sloping down to the river. obove which it rives about 300 feet : lat 318 6" N, ion 80" 15 F On the lanks of the Sutulcje between Lienling and Dumpo are many Liva of the kind of locust that breeds to the stony plains of Tartary marked on the body with o yellow ring on a black ground and having a large horn In the tal. Two other species of locusts also breed in this vicinity oon with purple wings which by clapplng the harny eases together make a cracking noise as at files the other Is twice as large the body and wings of a yellow colour spotted with dots a little darker .- ( Moorer ft, fc )

Dunoau.-A large village in the province of Mooltan, principality of binde situated on the south west bank of the Goonee river; lot. 24°58 \ lon C8° 58 L. This place stands on the route from Hyderabad tha enpital of Sinde to Mandavie on tho gulf of Cutch, by the river Goonee, which is here one fathom and a half deep, and about accenty yards brond during the rains Twelve miles fur ther south it contracts to the breadth of twenty yards, with two fathoms

2 x

TOL. I

depth; but in 1819 all the rivers in this quarter were deranged by the Cutch earthquake.—(Maxfield, &c.)

DUNDOOKA.—A town in the province of Gujerat, fifty miles S.W. from Cambay; lat. 22° 25′ N., lon. 72° 6′ E. The territory contiguous to Dundooka was greatly injured in 1813 by the total absence of rain, followed by the presence of locusts, and in 1818 a severe frost destroyed the cotton and almost all the other crops in this pergunnah.

Dungerguna.—A very wretched village in the province of Aurungabad, situated on the high land near the verge of the fine range of ghauts about ten miles N. by E. from the city of Ahmednuggur. This place stands near a romantic dell or ravine to which the appellation of the "Happy Valley" has lately been applied. It has been carefully laid out as a garden in the native style, and luxuriantly planted with cocoa-nut and other trees, and a handsome pavilion of stone stretches from bank to bank across a space of about sixty feet. Below this is a reservoir of water supplied by a perennial spring, which keeps it in continual agitation, and likewise gives motion when required to an artificial fountain on the north side of the pavilion. The descent to this singular spot is by a stair cut in the scarped face of the rock. It is inhabited by some Brahmins and Hındoo ascetics, who officiate at a small temple dedicated to Mahadeva or Siva —(Fullarton, &c.)

Dungy —A town in the province of Bahar, district of Shahabad, sixty-eight miles S.W. from Patna; lat. 25° 10′ N., lon. 81° 10′ E

DUNKER—A town in Tibet Tartary, situated on the banks of the Spiti river, fifteen miles N.W. from Lari, in Lahdack; lat 32°9′ N., lon. 78°8′ E

DUPAUD —A small subdivision of the Balaghaut ceded districts, situated at the north-eastern extremity towards Guntoor. It is traversed by the Gondigam river, but contains no town of note except Dupaud, which stands in lat. 15° 58' N., lon '79° 23' E., sixty-one miles N.W. from Ongole. Within this tract copper ore of the best quality has been discovered.—(Heyne, &c.)

DURRANGDRA.—A town in the province of Gujerat, forty miles east of Mallia; lat. 22° 54′ N., lon. 71° 35′ E. The Durrangdra raja is the chief of all the Jhala Rajpoots, and enjoys the privilege of being seated on a cot, while the other chieftains are placed on a carpet. In 1807 the annual tribute to be paid to the Guicowar was paid at 74,000 rupees—(Walker, &c.)

Durales.—A village in Northern Hindostan, said to be the highest in the bed of the Ganges, and approaching its source; lat 31°8′ N., lon. 78° 39′ E, sixty-eight miles north from Serinagur.—(Jas. Fraser, &c.)

DURAR.—A town in the province of Malwa, pergunnah of Rutlam, eight miles S.E by S. from the town of Rutlam.

DURBUNGAH (Dwarabhanga).—A town in the province of Bahar, district of Tirhoot, fifty-six miles N.E from Patna, lat. 26° 9′ N, lon. 85° 56′ E.

DUROO.—A small town in the province of Cashmere, thirty-five miles S E from the city of Cashmere; lat. 34° 7′ N, lon 75° 16′ E.

DURRUMGAUM (Dharmagrama).—A town in the province of Candeish, seventy-seven miles north from Aurungabad; lat. 20° 58′ N., lon. 75° 22′ E.

DURYAWUD.—A town in the province of Aymeer, situated at the confluence of the Karmaulee and Sookta rivers; lat. 24° 5′ N., lon 74° 32′ E

DUSAPKEIRA.—A small walled town in the province of Aurungabad, built with considerable regularity, and situated about four miles S. by W. from the celebrated caves of Ellora.

Dussara.—A town in the province of Gujerat, which in 1809 was estimated to contain 1,300 houses, in-

habited by Cashatics, Coolies, Rajpoots and other castes and a few
Binyans; let 23° 16 N, lon 71° 51
E. One of the soccators of the Dissara Millicks, who are Mohamedane
about AD 120° was put to death
by the rajs of Holward for having
committed gowhatita (cow-kliling),
and is now held in great veneration
hy the adjacent followers of the Arabian prophet. His tomb is on the
banks of a large took in the neighbouthood—(Macasardo, &c)

Deri .- A petty state in Northern Undostan which formerly extended from the Goerra on the east to the Calı or Biack river, that acparates it from humaon on the west, and through its centre passes the Se tigungs or white river Alone the banks of the la t-mentioned river la a fine valley, four miles loog by two broad on which stands Depal (or Duti) the capital encompassed on three sides by the river ; lat. 20° 6 \... lon 80° 31 f., eighty-fine miles . L. from Itsreelly It is said to contain about 400 houses built of stone and roofed with the same resterial. The principal crop is winter rice the se cond unid the third kurth! and the fourth barley; sil the others being of small account. The oil-seed chiefly raised is the sesamum According to native accounts of the whole population one-foorth are pure Brahmins, another fourth bastard Brahmins : haudras compose three-stateenths ond low labourers and tradesmen the remaining five-sixteenths. - (F Bu change Il coo de l

DOTTAL.—A town in the province of Lahore, sixty miles east from American int 31° 33 N Ion. 75° 49° E

Detrooa.—A town in the province of Malwa pergunnals of Indore which in 1820 contained 400 houses

Dwanaca (Dwarfea the gate).—
A town and celebrated temple (named olso Juggeth) stanted of the western extremity of the Guyerat penusula; lat 22° 15' N, lon 60° 7 E In 1803 this place was possessed by

Mooloo Maniek then considered the most powerful of the Okamundel chiefs. The sanctity of the fane ut tracts a rich population and presents un as lum from danger At the above date twenty-one villages belonged to Dwaraca, with a population of about 10,210 persons. In 1807 Vooloo from pursey, and was taken under the protection of the British government, the benefit of which was expeperienced in 1819, prior to which it had been acted by a party of Araba, Sinders, and other pluoderers. It was in consequence escaladed by a detechment under Colonel Lincoln Stanhone and the whole garrison, amounting to 550 and consisting of n class who oever give or expect quarter, destroyed

The most original and sacred spot in this quarter of India according to Brahminical legends is Dwaraca but about six centuries ago the valued image of their god Ronchor (an incarnation of krishnal by a mancurre of the priests was conveyed to Daccoor in Gujerat where it still remains After much trouble the Brahmins at Dwaraca substituted ano ther, which unfortunately also took a flight across a narrow arm of the sea to the Island of Batoor Shunkodwar ubout 150 years ugo, on which event another new one was installed Dwaraca is also designated as "the laland" and having long been the residence of Lushna, the favourite delty of the modern Hindoos is a celebrated plan of pilgrimage for the sectaries of that religion, in perform ing which the following ceremonies are observed.

On the arrival of the pilgrim at Dwaraca he bathes in a sacred stream, named from its windings the Goonty for which ablution he pays the Dwaraca cluefs four rupees and a quanter but Brahmins only three ond o half After this purification or sixt is paid to the temple where offerings ore recented according to the circumstances of the devotee ond a certain number of Brahmins are fail. The pilgrim mext proceeds to Aranna.

2 M 2

where he receives the stamp from the hand of Brahmin, and impressed by an iron instrument, on which are engraved the rmg and the lotos flower, which are the insignia of the god The instrument is made hot and applied to any part of the body, but generally to the arms, and not being overheated, leaves a durable impression, it is even applied to infants, and a pilgrim can receive not only his own mark, but also act as proxy in receiving other stamps on his body for the benefit of a friend. stamp costs one rupee and a-half. Having accomplished thus much, he next embarks for the isle of Bate, where, on his arrival, he must pay a tax of five rupees to the chief, present liberal offerings to the god, and dress him in rich clothes and orna-The chief of Bate, who is a holy person, receives charge of the present, which he retails again to other pilgrims on reasonable terms, and it performs in time a similar revolution The annual number of pilgrims resorting to Dwaiaca has been estimated to exceed 15,000 persons, and the revenue derived at about one lack of rupees.

Notwithstanding this existing place of pilgrimage, the most authentic Hindoo annals assert that Dwaraca was swallowed up by the sea a few days after the decease of Kushna. This incarnation of the preserving power spent much of his life at Dwaraca, both before and after his expulsion by Jarasandha from Mathura, on the banks of the Jumna, in the province of Delhi. which would indicate a greater intercourse between these distant places than could have been expected at so remote a period. The chalk with which the Brahmins mark their foreheads comes from Dwaraca, where it is said to have been deposited by Krishna, and from thence by merchants carried all over Thirty miles south of Poorbunder is the supposed spot where the ouginal Dwaraca stood, until swallowed up by a sort of cataclysme or bursting forth of the ocean it is that a bird annually uses from the foam of the waves, and by its colour and other circumstances enables the Brahmins to predict the nature of the coming monsoon. The belief of this apparition, which is mentioned by Abul Fazel in 1582, is still prevalent, and according to the Hindoos, this bird of omen continues annually to peck grain, dance before the deity, and die, as it did two thousand years ago.—(Macmurdo, &c)

DYHUL —A town in the province of Candeish, seventy miles E. by S from Surat; lat. 21° 3′ N., lon 74° 13′ E. This was formerly the capital of the Puar (or Powar) family, one of the original branches of the Maharatta confederacy, but in process of time their possessions were wrested from them by more powerful competitors, and in 1803 the whole were encompassed by the dominions of Dowlet Row Sindia.—(Duke of Wellington, &c)

## E

## EASTERN ISLANDS.

archipelago comprehended under this title is by far the largest assemblage of islands on the globe. Its commencement may be fixed at the western extremity of Sumatia, stretching to the 138th degree of cast longitude, and its breadth from 11° south to 19° north. The whole is situated within the tropics, the equinoctical running through the centre of a large proportion of the islands, which, with the exception of the Philippines are nearly all situated within ten degrees of the equator on each side. The whole are distributed into groups and chains of isles, with here and there a great island intervening

This archipelago (for which there is no general or comprchensive Hindoo name) contains three islands of the first rank and size, viz Borneo, Papua, and Sumatra, of the second rank, Java, of the third, Celebes, Luzon, and Magindanao, and of the fourth rank, Bally, Loinbhook, Sum-

blawa, Chandann Flores Timore Cerum Bonro Giolo Palmon, Asgros, Samar, Alindoro Ponay, Leyte and Zebu. The western boundary of these is formed by the Malay penosula odd Sumotra; the southern by o long chom of contuous island; beginning with Sumotra and ending with Papua; the eastern is prince pally formed by Papua Giolo Magindanao ond Iuxon; the northern and north-western by the great islands of Iuxon Palswon, and Borneo.

In that division of the Lastern Is lands extending from 121° to 130° east lon stude the character of the monsooos is reversed. The eastern which in the western เทอกรดอก quarter is dry and moderate is here rainy and boisterous the westerly monsoon which is rough ond wet berond the diove innits is within them dry and temperate. Thus Is the native country of the close and nutmeg while rice is scarcely produced of all the general food being sago This archipciago is the only portion of Asia situated under the enumected and like other tropical countries enjoys heat, moisture, and o luxurant vegetation. It is through out of a mountamous nature and the principal chains volcanie

As in other tropical emintries the oniy essentially useful divisions of the sea sons is into wet and dry for the sun hav ng sufficient strength to quicken vegetable life moustare to nourish it 19 all that is wanted the wet half of the year is convequently the season for germination the dry for fructification The inhabitants of the castern por tion derive their mealy natriment which other nations procure from the cercal graining, from the path of the sago tree which affords an edible fariao, the bread of these islanders The sago palm is o native of low marshy situations a good sago plan tation or forest heing a bog knee-deep Before the tree has attained its full growth and prior to the formstion of the fruit the stem consists of a thin hard wall, obout two inches thick onelosing an enormous volume of a spungy medullar substance like

that of the sider As the fruit forms, the furnecous medella disappears ond when the tree attains its full maturity, the stem is only a hollow sisell it seldom exceeds thirty feet in incept too is thick is proportion as a full-grown tree can with difficulty be elsayed. Its utmost age rarely exceeds thirty pears.

There is no regular person for ex tracting the pith but fifteen years may be considered on average time for its reaching moturity Five and even six ent. of nutritious matter have been procured from one tree but the average of each may be reck oned at 300 pounds and it has been calculated that an Inglish acre is espable of yielding 8,000 pounds of raw sego-meni per nanum taking a series of years. The pith when ground down in a mortar aleposits the faring at once which after one or two edulcorations through o sieve affords the raw sago-meni fit for being converted into cakes or panado. The true native country of this palm appears to be that person of the ar empeiago in which the easterly moon soon is the bouterous and rathy season, comprehending under that descrintion the castern portion of Ce iches and Borneo Magindanno Ti mor Panus and the adjacent liles but more especially that of Ceram

Sago is such insipld food that at requirer a seasoning accordingly blachang a mass composed of small fish, chiefly prawas, beaten up with aait ond spices and then allowed to ferment putrify &c in the sun as always an accompanisment. This feld preparation of first so noiseous to a stranger is afterwards much relished and it the oniversal source of the Bost crn islanders and Indo-Climices on accommon to food being deemed palatable without it.

Not withstonding the opparent aus larity of climate there is a produgous variety of the different islands, which may be referred to respectively. Tho most considerable traffickers are the blalay and Buggess notions principally the Wadjo Buggesse who in fact are the universal carriers of the

archipelago. In A.D. 1824 the total number of Wadjo prows, of from twenty to sixty tons, trading from the following places were 786; the average value of the cargos 4,000 dollars; rich ones, carrying bird's-nests and tortoiseshell, to 30,000 dollars. These Buggesses, however, are only carriers and general merchants, and have very little share in the collection or preparation of the articles that compose their cargoes. The principal piratical ports still existing, in 1820, were Rhio, Lingin, Billeton, Sambas, Borneo Proper, Tampasuk (subject to Borneo Proper), Passir, Sooloo, and Magindanao.

On shore, the women of the Indian islands, and more especially of Java, are almost the sole merchants and brokers, the men interfering very little, particularly with the retail bu-The higher departments of mercantile adventure are conducted by foreigners, mostly native Chinese, Europeans, or then descendants, and natives of Hindostan and Arabia. Of the Asiatic dealers the Chinese are decidedly the most useful, and they appear to occupy the same employment that the Jews did among the barbarians of the middle ages of Europe, except that here they have more fair play. A commercial intercourse has always subsisted with the Eastern maritime nations of Asia , but the most extensive, intimate, and probably the most beneficial, has always been with China. In fact, a demand for the peculiar productions

of the Eastern archipelago appears interwoven with the habits, manners, and religious ceremonies of that singular nation, whose industry we constantly find directed either to objects of mere necessity, or for the gratification of their sensual appetites, it never, in any shape, assuming the character of intellectual enterprize.

Gold is universally diffused throughout the archipelago, but is most abundant in the islands that form the northern and western barriers, and present a geological primitive formation, while it is rarely worth seeking for in the great volcanic range extending from Java to Timor Laut. Borneo affords the largest quantity; then in succession, Sumatra, the Malay peninsula, Celebes, and Luzon. In 1818 the total produce of the archipelago was estimated at 154,865 ounces, or £658,176 sterling. though gold in its native state is so generally diffused, no coins of that metal have yet been found, nor do the Indian ıslanders ın remote times appear to have possessed a metallic comage. Rude images of silver have been discovered in Java, and also some small coins—both probably imported, for native silver is one of the rarest of metals, and although it is frequently found in combination with gold, the quantity is so small, that as an article of commerce it may be said not to Iron is also a very limited production; in Java there is none whatever.

Copper ores are found in Suniatra and Timor, and have lately been found at Sambas in Borneo. The most general name for it throughout the archipelago is the Sanscrit word Tambaya, and nearly all the old Hindoo relics and images, are made of copper alloyed with iron Except Brazil and Hindostan, the Indian islands are the only portions of the globe in which the diamond is found, and even here it seems confined to the south and west coast of Borneo

The principal countries of the archipelago in which cloth is manufactured for exportation are Java, Bali, and Celebes, of which the last are

The practice of smaling takentra has been discontinued by the East In the blanders, in trad of which they stred it small and spek it through the treth. On the efter hend the whole of there smale instrad of smallening treum as the Turke Hud number, and other A isters do But although unlegrally adjected to the use of latoriest ing drups they have no partiality for sinous or spirituous liquors, which is probably the effect of climate All clauses are also distract cally fond of paming and the Malaya and Burgesses more than the rest Games of hazard are the most provalent, those of sedentary skill not being sufficiently estmulating But, of all others, betting on premacious animals, such as the game-cock quall and even ericket, is their favourite amusement. The latter are atlmuisted by the application of a blade of grant to their noses. Buffaloce and tigers are also compelled to fight within a narrow space but the latter are almost lovariably crushed to

death by the first onset of the buffalce.

The Javanese, Malay, Buggess, and Maeassar, are the most cultivated languages of the archipelago. sides the many unwritten languages of the Papuas and brown-complexioned savages, there are many written languages of tribes less powerful and improved, such as the Batta, Rejang, and Lampung of Sumatra, the Sunda of Java, the Madurese, the Bally, and the Lonibhook; and further to the east some languages written in the character of Celebes, such as the Sumbhawa, Bootung, &c. In fact, the dialects of the archipelago are innumerable; but the Malay, Javanese, and Buggess are the most influential, and appear all traceable to one common source, a large proportion of the words being radically and essentially the same. There are five written characters known among the Indian islanders, all distinct in form. The barbarous island of Sumatra has peculiar and no less than three well-defined alphabets, the best invented by the Battas, a still existing cannibal nation The uncouth and monotonous language of China never made any progress among the Eastern islanders, notwithstanding their long intercourse.

Hindoo colonies came at various times into the Eastern islands, chiefly from Telinga, and propagated the Hindoo religion and Sanscrit language; but at piesent, with the exception of a few mountaineers in the eastern end of Java, and the island of Bally, where it is still the prevalent worship, it appears to be entirely banished from the Eastern Archipelago. With the above exception, caste is also unknown, there being no artificial or liereditary restriction of the population to certain and peculiar occupations. Indeed, the inhabitants may be generally classed in the following gradations. the royal family, nobles, priests, free cultivators, debtors, and slaves

Whatever be the form of government, slavery, or or least servitude, is the lot of the people, which burthen is invariably lightest, and their personal freedom greatest, where the absolute authority of one despot has superseded that of many: for wherever there exist numerous petty states, war and contention are unceasing, and the miserable people are bought and sold without mercy. Thus slayery and rapine are universal under the feudal government of Cclebes; whereas in Java, the most despotic of all governments, there is no personal slavery among the natives, and in choosing their own village officers, the people enjoy a remarkable degree Slavery in the archiof freedom pelago is referable to four sources, viz piisoners of wai, debtors, criminals, and persons kidnapped None but the most savage tribes destroy or eat their pusoners.

The Indian islanders first received the Mahomedan religion from the parent land of Arabia, probably about A.D 1300, and they are still strict adherents to the orthodox doctrines of Hanifi, there being almost no sectaires, and only a few straggling Shiahs, named Rafzics Upon the whole, with the exception of gambling and the use of intoxicating drugs, they are exemplary Mahomedans without being intolerant

The Christian religion, as a prevailing worship, can only be said to exist in the Spice islands and the Philip-In the latter, the converted inhabitants are nominally Catholics, and in the first nominally Protestants, yet, judging of its effects in these instances, Christianity may be viewed (independent of its other merits) as a powerful instrument of civilization It must certainly always tend to the benefit of the governed to be of the same religious belief with their governors, nor is it possible that, while adopting the Christian faith, they should not at the same time imbibe a poition of its The feeble efforts pure morality. made to propagate Christianity by insulated and unprotected missionaries have hitherto proved nugatory and injurious, that religion being justly unpopular from its having been

introduced by intrigue (by the Portuguese and Spaniards) and propagated by sanguinary violence

"The Dutch nation as a principle of policy pursued the propagation of Christianity among the Lastern later and there ore now several countries to whilel the Protestant doctrines have made considerable propress A large proportion of the idanders, however, are still Fagans under the Inducence of a wide and unstella, this superstition, administered by priests, enchanters, and dealers with into the spirits whom the people both dread and despites.

Misreo Polo the celebrated tra veller, visited the Malayan archi pelago on his way from China to the Persian Gulf obout A.1 1290 The Portuguese reached the Lastern tales ten years after Lasco de Cama doubled the Cape of Good Hope under Don Lopez de Siqueira who if we except the accidental visits of Marco I olo Mandeville and some others may be considered the discoverer of this archipelano AD 1591 in consequence of the union of l'ortugal with Spain its Indian dominions became subject to the latter In 160° the Fn, hih, un der Sir James Lanca ter made their appearance at Acheen with letters and presente from Queen Elizabeth; and in 1621 the French, under Ge neral Beauhau arrived with lettera and presents from the king of France to the sultan of Acheen

With respect to their present con dition, moral and political bendes the evil effects of European influence as exercised by the Dutch the tribes of the Eastern islands have been much deteriorated by their unccasing commotions owing to the want of executive strength in the sovereign; the Ill-defined succession to the throoe primogeniture oot being recognized; the universal prevalence of mracy the obsence of efficient laws for the regulation of commerce and consequent monopoly of trade by the petty chiefs with all their arbitrary duties and ex tortions. Feo. 1. — The tawn and fortre s of I colals are frequently mentioned in the listories of Bengal and are supposed to have stood in lat 24 4 % Ion 90° 45 F., about nuetren miles N 1 from Dacca where the site of a poince choicy, statinged on a small red hillork. In a thick jungle close in the lanchla free; is still pointed out as the actual position of the furtres.

In AD 1353 Hyas Khan the brossa independent monarch of Beneal is sand to have taken post here when his dominions were inroded by the emperor Feruze of Delhi who odranced thus far and invested the furtress The parrison, however made so protracted a realitance that the rains commenced and loundated the country which compelled the emperor to raise the Sultan Seid Husnere and retreat sem hhan the ruler of Bengal from 1499 to 1 00 maile Ecdale his chief place of residence.-(Stewart, Jullarion Sc)

Ledatlan —A town in the province of Allahadad, fifty time miles west by \ from the fortress of Allahadad; Lit 25°54 \ lon 81°1 E

EGRAWARA -A large division of the Gujerat province, situmed on the northern frontler and bounded in that quarter by Rojpootona. It con tains many half lodependent native rains and thakoors but the principal is the raja of Liler designated par excellence, the Thokoor' chlestam is fifth in descent from Aject Singh who reigned over Joudnoor 107 years ago lis direct ancestor obtained possession of Eder (then an integral part of the Joudnoor kingdom) shout eighty-seven years ago Aject Singh having then ex pelled another Rahtore chief called the Row whose descendants still hold the small but strong pergunuah of Poin, situated on the hills between Eder and Odeypoor, from whence they still issue and harass the usorp-

The Eder principality, although open towards the west, is naturally very strong, abounding in rivers, hills, and forests. The soil is fertile and the numerous mangoe trees indicate the existence of a denser population at some former period; at present, however, a large proportion of the surface is overrun with woods and jungles. In 1820, the revenues of Eder amounted to four lacks of rupees, without including its dependencies; but not more than one lack ever reached the Rajas treasury, the residue peing allotted to eight chiefs, who held lands of him, under the Rappoot denomination of Patayet. Prior to this date, the tribute to the Guicowar had been fixed by Major Ballantine at 24,000 rnpees per anum, one fourth paid by the raja, and the remainder by his patayets. Besides these feudatories, this principality contains three petty states, named Ahmednuggur, Morassa, and Bar. Jaspers are obtained from the Eder mountains eighty miles north of Ahmedabad, and the ridge of mountains which separates Guzerat from Marwar, abounds with various sorts of marble — (Elphinstone, &c)

EDER.—A town in the province of Gujerat, the capital of the preceding division, sixty-four miles N. by E. from Ahmedabad; lat. 23°53′ N, lon 72°3′ E. In A.D. 1820, this place was conjectured to contain 2,500 houses, which would give a population of about 12,000 inhabitants. Morassa is less than Eder, and Ahmednuggur. Although situate dwithin the walls of a magnificent fort constructed by the Mahomedan kings of Gujerat, it is only a large village.—(Elphinstone, &c.)

EDMONSTONE'S ISLE.—An island of alluvial formation in the province of Bengal, situated about lat 21° 35′ N., lon 88° 50′ E., where it occupies the position formerly laid down in the charts as Sagor shoal. This addition to the Bengal province was first brought into notice by the marine survey of 1816, for in 1813 it had not yet raised its head above water.

In 1818, it got one stage beyond a sand bank, and was visited by woodcutters and fishermen, who erected two huts thereon dedicated to Siva. Still advancing, a bungalow erected by subscription for the accommodation of invalids, requiring the refreshing influence of the sea breeze and a maritime situation Just at this crisis, however, the sea interfered, swept away the bungalow, and for a time submerged the island, which, however, reappeared again, and in 1821, a flag staff one hundred feet high and a small bungalow were erected on it.

EECHAUK —A town in the province of Baliar, district of Ramghur, 103 miles SS.E from Patna; lat 24° 10′ N, lon. 85° 46′ E. This place stands nine miles NE from the mihtary station of Hazarybaugh, and is the residence of the Raja of Eechauk. This is one of the largest zemindaries in the Ramghur district, and comprehends nearly the whole tract of country through which the great Benares road passes from Chass to Hazarybaugh The British judicial regulations have not yet been extended to this zemindary, where the raja continues to exercise a eeitain police jurisdiction — (Fullarton, &c)

EEDILABAD —A small walled town in the province of Candeish, situated on the river Puina near its junction with the Tuptee, twenty-three miles travelling distance S.S.W. from Boorhanpoor This place had been repeatedly plundered by the Pindaries, and in 1820 contained only one inhabited street. Lat. 21° 4′ N., lon. 76° 8′ E —(Fullarton &c.)

Ecsaughur.—A strong fort in the province of Malwa, thirty-nine miles N.W. from Chendarce; lat 24° 50′ N., lon. 77° 55′ E. This place is the capital of a pergunnah belonging to Dowlet Row Sindia, and has a large pettah that extends round the north and west sides of the fort.—(Malcolm, &c.)

Ectul —An inland town in the province of Canara, nineteen miles

S.S.E. from Mangaiore; lat 12° 46 N. lon 75° 13' E

Life......A harbour in the Eastern seas, shoated on the south coast of Mysol Island, and formed by a small silet also named Efb6. On shore there is a village where refreshments for ships may be had

Exocutera.—A small district in the province of Hyderaland extending along the east lamb of the Berna river, which bounds it on the west. The principal towns are Edigheer, Ferrozeghir and Dowletabad. The town of Engleter is situated in lat 10° 3.4 \, hon 7.7° 10° 1 \, 100 miles SW from the city of Hyderaland

EINURO (or 1 canoor) -A small town in the province of Consta t lat 13° 5 N., lon. 75° 16 L. Threplace contains eight temples belonging to the Jains and one to the Sira Brah mins. The first have an allowance of fourteen pageday, and the last of ten process. As the Jam voteries are here more numerous than those of Sira their temples have the largest endowments; but while the native officers of government are mostly Brahmins, pretences will never be wanting for distressing the Jain tem ples. At Einuru there is an Im mense colossal statue of one of the gods worshipped by the Jains, cut from a solid mass of granite and standing in the open air,-( ? Ila chanan &c)

ELEPHANTA ISLE .- A small bland in the province of Aurungalad altriated in the bay of Bombay, oboot seven miles from the castle and five from the Maharatta shore By the natives it is named Gorapori and consists of two long hills, with a narrow valley intervening; the whole about aix miles in circumference The usual landing-place is towards the south where the valley is broad est. About 250 yards to the right of the landing place on the acclivity of one of the hills there formerly stood a large and clumsy elephant cut out of the insulated black rock from which figure the island occurred

its European name; but in Septem ber 1814 the neck and head of the elephant dropped off and the body has aloce annk in such a manner or to threaten its fall.

The great temple is about 130 feet iong measuring from the chief encavet and 123 broad from the enst ern to the western entrance it rests nn twenty-six pillars (eight of them, in 1813, broken) and sixteen pilasters, and neither the roof nor the floor being in one plane it varies in height from seventeen and a half to fifteen feet. The plan is regular there being eight pillars and pilasters in a line from the northero entrance to the aouth crn estreme and the same number from the eastern to the western en trances. In the centre is a gigantic Trimmeti or three-formed god Brahma, the creator is in the middle, with Vishno the preserver, on one side, and Siva, the destroyer on the other The last holds in his hands a cohra canella, or hooded snake and on his cap, among other symbols ore a human skull and a young infant, To the ri ht is a large compartment hollowed a little and carved with a great variety of figures, the largest of which sixteen feet high represents the double figura of Siva and Parvati named Viraj, half male half female on the raht of Viral Is Brahma, four faced sitting on a lotus and on the left is Vishnu, sitting on the shoul ders of his engle Garuda. Near Brahma are Indra and Indrani on their elephant and below is a female figure holding o chowry On the other side of the Trimurti or triad is another compartment, with vathe most remarkable of which is the first in his violective character eight handed with a chaplet of akulis round his neck,

Besides the above there are innumerable mythological figures, which can not be rendered intelligible without the assistance of plates having been much defaced by visitors, and by the areal of the Portuguese, who inado war on the gods and temples, as well as on the armies of India; fragments of statues strew the floor, colums deprived of their bases adliere to the roof, and there split, and without capitals. All the Hindoo deities have particular symbols by which they may be distinguished, much as European families may be discriminated by their aimorial bearings. The excavations of Kenneri and Carlı evidently belong to the Buddlusts; those of Elephanta and Amboli to the Brahmus; while Elora possesses excavations of both classes. The cave here is not now in use as a temple, nor is it a place of pilgrimage, or possessed of any saccidotal establishment, although devotees from the neighbourhood make occasional offerings of prayers and oblations. Considering the pains bestowed on it, it must at some period have been held in greater estimation, and the Brahmins generally disregard imperfect or mutilated Nothing, however, presents itself among these excavations that can lead to a satisfactory solution of the important and curious question, in what age and by what tribe or dynasty was this vast temple completed?

The rock out of which the temple is carved is not calculated to resist for any length of time the ravages of the weather, and it evidently suffers much from the annual raius. to 1824 a great number of the pillars (nearly one-third of the whole) had been undermined by the accumulation of water in the cavern, and the capitals of some, and parts of the shafts of others remained suspended from the top like huge stalactites, the bases having completely mouldered These ravages appear to be annually making quicker progress, although for many years back the cave has been protected from all

wanton spoilation.

A similar rapidity of decomposition has occurred in the elephant, which when seen by Neibuhr was far more perfect than at present. If half a century, therefore, can produce such changes in this celebrated temple, it is hardly reasonable to suppose that

any part of it is of very profound antiquity. It is now also generally allowed to have been dedicated to Siva, the popular deity of the modern Hindoos in this quarter of India. Even now, though guarded by an European serjeant appointed to preserve it from the injury of man, the climate does its work of devastation, and it appears probable that in process of time not much will remain to evince what the temple was in the days of its glory.—(Erskine, Moor, M. Graham, &c.)

ELGUNDEL.—A large district in the province of Hyderabad, of which it occupies the northern extremity. Its limits are quite undefined, and the condition of its interior equally uncertain with that of the Nizam's dominions generally, which appear likely to remain a sort of terra incognita. The town of Elgundel stands on the north side of the small river Punnair, seventy-five miles NNE from the city of Hyderabad, lat. 18° 17' N, lon 77° 47' E

ELIANGOODY —An extensive, populous, and neatly built village in the Carnatic province, district of Madura, twenty-five unles travelling distance from Ramnad In 1820 it belonged to the poligai of Shevagunga

Ellichroon.—A city in the province of Berar, of which it is the proper capital, although that distinction is usually assigned to Nagpoor, which is not within its limits, lat. 21° 14′ N, lon. 77° 36′ E. It is situated between the Sarpan and Beechun rivers, which form a junction in the vicinity, and afterwards fall into the Poorna It is a place of no strength, being only in part surrounded by a wall, but the bazars and houses near the nabob's palace are of brick, and in the neighbourhood are the tombs of several Mussulmaun saints which stand conspicuous

Ellichpoor was conquered by the Mahomedans under Allah and Deen so early as AD 1294, but it has since experienced many vicissitudes, and until recently has been undergoing a rapid decline. At present it

is held by Salabut Ahan one of the Ausam a jeghtredars whose der en dence however, is little more than unmined The chief cottobahed a claim on the Brits h government tv his stendy attachment and was to 1815 rewarded accordingly with some lands shitracted from the terntones of the Ampoor Haja and Peons Malarattas Prior however, to this event he by a allowed he nothers to be usurped by Futteh Jung blum origically a private trooper, who had rai ed himself to the chief command tyran pleal over his nominations or soil a assinated his relations. In 12 " It required the interpretation of the Briti b government and the symmeth of a trong detachment to effect the remnal to Angunes al where he soon after died. On this occurring an arrangement was effected by which Salalun hhan a quotawas reduced in fi. 0 infantes and 600 horse but to he kept efficient in every respect for active military service Tearchies th tance from Sarpoon, 122 miles; from Hyderal at 210; from I was 340 t from Delhe GOL from Madrat Cile and from Calcutta #16 miles -Alfablic 118 Demments facilie Rennell Istelatence Blacker, &c)

I those ( Idera ) -This is one of the five original Northern Circate, but at present mostly comprehended in the modern intrict and enlicetorate of Mandquatam The I llore and Condapilly circure occur y the while of the space between the hereing and Godavery rivers the Manufinatum circur towards the sea : the Inland province of Cummomatt In the Nizam a territories towards the west and the jeel or take of Colair which is chiefly formed by the overflowings of the above two nyers. Its auperficial contents may be estimated at 2 700 separe miles exclusive of the high mountainous teact on the west the hmits of which are quite undefined. (J Grant &s)

Figure ... A town in the Anrihera forents, 183 miles travelling distance from Hyderabad; las 16° 43 h., ton 81° 10' k. This is a larges town than

any to be found in the dweet route from hance to Vallera and is in fact, the translence of the collector of the Manulipatam district. Some part of the principal buzza is built with contakerable regularity, and the shops with wooden from rescall c those in the west of Indus none however, exterione story. A battalion of oppays is munity contoned here.— (2 allerina 57)

Fuener — Atown in the Northern Circum entern miles & by L. finns Licacole; by 14° 26' \, lon 86° 10 t.

I the with the A village in the Northern Larents district of Viraging atom, forty miles travelling shatance W from the town of Viragination. This place stan bis in a load rant talley ornamented with this ter of districted and in mirrorad on all alles with green mountains. There is a temple at one extremity of this village containing an land on the Viragination of Viragina

I tona (Liera).- A village in the province of Annuarabad near to the city of Doubstabady lat 10° 55 \ lon 7. 23' L. It Is perrounded by an extensive wall of stone and cocers with its rings a considerable space on the plain near to the base of the ridge of hills in which the cases are estnated but in 1800 it was nearly depopulated Outskie the town a very handsome temple of Sien and a fine reservoir were ennatracted by the celebrated Maharatta princess Alia libre, and other temples of in ferior dimensions have been erected by other Handoo chiefs The Emperor Aurengrebe also crected a small most is probably to mortify the Brahmins Immediately opposite to the entrance of Carles

In a mountain about a mile to the cast of this place are some remark, able executions of I in loo temples which in magnitude and perfection of execution surpass any time of the kind in India, but which it is impossible to render intelligible without the assistance of plates. The cave temples occupy a considerable extent of surface, but at first do not strike the mind as any thing wonderful, until they are discovered to be all one solid mass of rock. The following are the dimensions of Cailas and the great temple, both, however, parts of the same excavation.

Dimensions of Callas: Height of the gateway.....Feet. Passage of the gateway, having on each side rooms fifteen feet 42 by nine ...... Inner area or court —Length from the gateway to the opposite scarp ...... 247 Ditto ditto breadth..... 150 Greatest height of the rock out of which the court is exea-Dimensions of the grand temple: Door of the portico twelve feet high by six broad, length from the door of the portico, entering the temple, to the back wall of the temple ...... 103 Length from the same place to the end of the raised platform behind the temple ..... 142 Greatest breadth of the inner part of the temple ..... Height of the ceiling ......

The symbols seen in these excavations tend to prove that they were formed some by devotees of the Brahminical doctrines, and others by those of the Buddhists; but at present they are visited by no pilgrim of either persuasion, nor are they held in the slightest veneration. They may be divided into three classes: the northern, which are Buddhist or possibly Jain, the central, which are Brahminical, and the southern, which are certainly Buddhist All the Brahminical caves are evidently sacred to Siva. The four southern excavations are purely Buddhist, being filled with curly-headed Buddhist figures

Besides the remarkable excavation called the cave of Vishwa Karma, which is a lofty hall with a vaulted roof, like the great Buddhist cave of Carli, and contains a colossal image of Buddha, to which the cicerones of the place give the name of Vishwa Karma, there are six other principal exeavations, some in the northern others in the southern quarter of the mountain, filled with sculptures which appear to be all repetitions of the effigy of Buddha. In the caves that are decidedly Brahminical, Siva and Bhayani seem to have been the presiding deities. The grand cave ealled Cailas, certainly a most extraordinary work, belongs to this class, and nearly the whole Hindoo pantheon is ranged along the gallery excavated in the perpendicular wall of rock which forms the exterior margin of the court or area, but the lingam alone occupies the sanctuary of the temple In some of the Buddhist caverns there are naked saintly images, not unlike the Digamber or naked figures of the Jams, whereas Buddhist images are generally Swetamber, or clothed

At the temple of Nilkhantha there is a regular establishment of Brahmins, being probably the only cave at which worship is still performed, although at all of them there is a Brahmin waiting to levy a contribution on strangers Besides the cave temples above described, there are many smaller excavations in the face of the rock, not distinguished by sculptures or any other peculiarity, which had probably been intended to serve as dwellings for the officiating priests and other attendants During the rainy season, the scenery about the caves of Doomar, Leyna, and Dehrwaia is much embellished by cascades, said to be of considerable volume.

The Brahmins on the spot assert that these caves were formed by Eeloo Raja of Ellichpoor, 7,914 years ago, but as they are found in the neighbourhood of Deoghir, or Tagara (now Dowletabad), which prior to the Mahomedan conquest in A D. 1293, was the capital of a powerful Hindoo principality, they probably originated in the superstitions of the

reguing families at that metropolis By the la a areaty with Holera, the village of Llora and lands attached were transferred in the British government; but in 1890 when Mr Islanton was on the upon the local functionaries were preparing to make them over to the Nisam, in pur sunoce of some arrangement with that potentiate for the adjustment of our respective boundaries — (Fallar-loss Fattelarare I rains a Mallat \(\text{1}\) and \(\text{1}\)

Front (Eur).—A village in the Carnatic cight miles north from Madras; lat 1 f 17 N 1on to 23 P. This place stands on the banks of e small sait water lake which centains

abundance of fine fish and excellent oysters. A society in Madias have built here by subscription a house on the edge of the lake, where there is a weekly meeting to eat fish, play cards, and sail on the lake in pleasure boats, a diversion which cannot be enjoyed any where near Madras on account of the surf. The town stands on a flat sandy bank, and contains about 100 native huts and two European houses, besides the subscription hotel.—(M. Graham, &c)

Eras.-See Lanca.

ERECH—An ancient town in the province of Allahabad, situated on the right bank of the Betwa liver, nine miles E by S. from Sumpter; lat. 25° 49′ N, lon. 79° 2′ E.

Erroor —A small town on the sea-coast of the Malabar province, fifty miles S by E from Calicut; lat. 10° 36′ N., lon. 76° 4′ E.

Erroad (Erodu)—A town in the Combatoor province, fifty-five miles NE from the town of Combatooi; lat 11° 21' N., lon 77° 45' E During Hyder's government the suburbs of Erroad contained about 3,000 houses Tippoo's reign reduced them one-third, and all that remained were destroyed during the invasion of General Meadows It has greatly recovered since that era, and in 1801 contained above 400 houses, with a battalion of sepoys in a large mud The canal passing Erroad from the Bhavani is an excellent work, and waters a narrow space of ground fifteen Malabar hours' journey in The best land here in 1801 length let for £2 7s per acre; the worst for 11s 4d. The dry field is from 5s 10d to 1s 6d per acre.—(F.Buchanan, &c)

ESAGHAR —A hill fort in the province of Aurungabad, division of Jooneer, situated above the village of Carli, and close to the strong fortiess of Loghur, about thirty-six miles travelling distance N.W. from Poons

Esaunagur.—A town in the province of Allahabad, twelve miles S.W.

from Chatterpoor; lat 24° 52' N, lon. 79° 22' E.

ETAWEH (Atava) -A district in the province of Agra, consisting principally of territory in the Doab, ceded to the British in 1801, and situated principally between the twenty-sixth and twenty-seventh degrees of north To the north it is bounded latitude. by the Furruckabad and Alighur districts; on the south by that of Caunpoor; to the east are the Oude dominions, and on the west, Agra, and the territories of various petty chiefs. Etaweh being itself a large component part of the Doab properly so called, a considerable proportion of what is there stated, with reference to soil, productions, climate, and commerce, applies particularly to this collectorate, and need not be here The principal towns are repeated Minpooree (the modern capital, and residence of the judge); Etaweh, the ancient one; Kanoje, Belah, Sindouse, and Shekoabad. The roads to most of the largest cities in the Doab pass through this district, which is consequently much frequented by merchants and travellers.

In 1807 Etaweh was described in the government records as being thinly peopled, the inhabitants indigent, and martial rather than agricultural; while the ravages of depredators from the neighbouring states, and internal commotions, checked its advances in husbandiy, and otherwise retarded its prosperity. In 1812, not only the pergunuah of Sindousc, but many others situated on the west side of the river Jumna, on account of their disorderly condition, required the especial attention of government, and even the interference of a military force Owing to the nature of this tract of country, it was in the power of twenty or thirty men with matchlocks to stop the navigation of the Jumna with impunity, and when pursued, they concealed themselves in the ravines with which the coun-These predatory try is intersected parties greatly injured the annual fair at Buttersur, which, if properly protected, might have been reodered an extensive must fur all hinds of mer chandize at well as of inners ond cattle. Agrs and this portion of the Doab can only be secured from foregen plonderers by petrols estiloned on the tanks of the Chumbul to check the lawless tribes on the opposite shore; but before so great an expense is incurred it is devirable that the districts in this quarter of limitostan be surveyed and new inmeted

In A D 1813 this district was said to contain 4 441.789 cucha or small begas in cultivation assemed at 30 G' 069 rupees which amount was realized within two and a unarter per cent t the average rate being about tacive annas ner bera. The number of rills or was 3,317; the quantity of land fit for culusation 8 753,564 berry, and of waste 1 781,504 becas. The gaol of I tauch is reclosed the best aituated most commodious and best executed graf in the north-west ern provinces and throughout the year 1813-14 contained up an aver a c GIO prisoners - (The Afgeoris of Hattings Gutthrie, Sir I' Colebrooke, Ker. Blant. Se Y

ETAMER—A town in the province of Agra, formerly the capital of the preceding destrict; lat. 267-47 V. lon. 78° 53° E. serecity miles by E. from Agra. This place stands on the cast bank of the Jumna many puris of which during the dry season are almost assiy feet above the water in its bed. The town is bout on the leights and as it approaches the river its directled into a number of apparate hillocks by deep ravines. While the floods are at the highest the Jumna here is in large treer, the relands and sandbanks being then submerged.

Erwaroon.—A small town in the Bejapoor province natice miles S E. from Meritch lat. 10°4./ N, yon 75°2′ E. In this toan there are some Mahomedan families who subsist on the produce of charitable lands granted in former times.

r

Fairez.—A town and harborn formerly the mart of men of the northern provioces of Coelan Ching, but which was destroyed durn, the crist was which as long agrated that cointry. In 1819 two stone forts, built by French engineers commanded the entrance of the lay of Turon and harbour of Faifoc. At that date a considerable parties or their descendants, but the town was moch imporrished and frequented only by small craft.—(Levs I like fg.)

FALORA.—A fown in the province of Lahore close to the north bank of the Satuleje river five twice \$\lambda\$ N from 1 udderans; lat. 31° N., lon. 73° 51 E.

Franzeroon / Firmput the city of rectory).—A town in the Delhi province fifty two miles 5.5 E from the rity of Labores int. 30° to N., Ion. 74° 35 }.

FINNEA,—A town in the province of Assungabad fifteen miles N F from Jains lat. 10° 50 N, ion. 70° 10° E.

Figorage of the victorious realdensed,—A town in the prevince of Agra taenty-four miles k from the city of Agra; lat. 27° 0° N, lon. 73° 16° E.

Figurence / Firepue, the city of reloxy/- A town in the promise of Agra, surrounded by a stone wall, the capital of the country bestowed on Ahmed Bukah Ahm whose ternitories comprehend the Vewotty Perpannals of Firerpoor, Aogena, and Poomshars with the talooks of Beecher and Sakras. He sho holds in japhire of a fixed rent to perpetually the small pergannals of La haroo belonging to the Mackerry raps, and in the Shekawatty country Lat. 27° 85° v ms 70° 10° 10° L; fifty fire miles 5° W from the city of Delhi—(Lleat White 5°).

FIROZE SHAR & CANAL -- See DEL-

Finozour.—A town in the province of Hyderabad, 105 miles S W. from the city of Hydernbad, lat. 16°25' N., lon. 77° 20' E.

Finozpoon.—A small fort and village allove Suchatal, in the province of Delli, district of Saharimpoor, where Timour is supposed to have crossed the Gunges; Int. 29° 30' N .-(Capt Hodgson, &c.)

Floris (or Endi) Island.—A large island in the eastern seas, situated hetween the eighth and muth degrees of south latitude, and the 120th and 123d of east longitude. In length it may be estimated at 200 miles, by thirty-six the average breadth. The proper name of this island appears to be Endé, it having heen denominated Floris by the early Portuguese writers, and after them by succeeding voyagers and geogra-Viewed from the sea this island appears hilly, and on the south side there are several conical volcame mountains, of great elevation, one of which exploded in 1810, with much

upioar.

Endé, the principal port of Floris, is situated near the south coast, and has an excellent harbour; indeed the only one to be found on the southern shores of all the islands from Java head to Ombay. It was formerly subordinate to the Dutch residency at Coopang; but about AD 1812 was occupied by a Buggess colony, who reject all European intercourse and authority. Before this event its exports consisted principally of slaves, gold dust, bees'-wax, cocoa-nut oil, sandal-wood, birds'-nests, and tortoiseshell, which trade employed about fifty Buggess prows. The only territory in possession of any European power is the eastern portion in the neighbourhood of Larantooka, where the natives have nearly been all converted to the Christian religion by the Portuguese (who have a church at Larantooka), under whose dominion they still continue, and by whom large quantities of sandal-wood are annually sent to Dhelli in Timor. The western end of Floris, called by

the natives Mangeray, was colonized from Buna in Sumbhawa, to which state, until 1819, it was subordinate: but in that year it revolted and set up the standard of independence.

The sen-const of Floris has been colonized by Mulays and Buggesses, while the interior is occupied by the aboriginal natives, respecting whom little is known, except that their physical appearance corresponds more with that of the Papuas than with the natives of Timor. They appear to be subdivided into innumerable petty communities, some consisting of not more than one village, and, like all barbarians in a similar stage, cursed with a never-ceasing hatred to their neighbours, a perpetual warfare is the consequence, during which slaves are made on both sides, and sold for exportation to Macassar and the other ports of Celebes — (Malay Miscellanies, Bligh, Leyden, Milburn, δc.)

Formost (or Tywan).—A large island lying off the south-castern coast of China, distant about 200 miles, between the twenty-third and twenty-fourth degrees of north lati-In length it may be estimated at 180 miles, by fifty the average The proper name of this breadth. ısland ıs Tywan, though called Formosa by Europeans, and it is about 200 miles distant from Manilla in the Philippines.

According to Chinese accounts Formosa was not discovered until  ${f A} \, {f D} \,$  1430, and then only by accident, after which it remained wholly unnoticed for 134 years; nor was it at last occupied by the Chinese until 1661, by which time the European settlers had rendered it worth possessing. The Dutch at an early period established a settlement, and exereised considerable authority. 1625 the viceroy of the Philippines sent an expedition, which landed on that part of Formosa next the island of Luzon, where they erected fortitifications in order to oppose the Dutch, and also to propagate the Roman Catholic religion. In 1630

the Dutch governor, Neyts treacherously seized some Japanese ven sels, which were ofterwards liberated by the address and bravery of their crews. Prior to this period the island does not appear to have been subject to the Chinese empire About the middle of the seventeenth century Formosa offorded a retreat to twenty or thirty thousand Chinese, unwilling to submit to the Manchew conquerors of their country These refu gees carried on a great and lucrative trado with their countrymen in Chion and produced considerable revenue to the Dutch government, every per son above seven years of age paying a capitation tot of half a guilder per mensem The Island also being at no great distance from Japan the Dutch Company a factory had an ad vantageous trade with that rich em From 1642 to 1662 while the Dutch possessed Formesa, they procured their teas through that chan nel which is still the most natural, being in the vicinity of the tea-producing provioces.

In 1633 the Chinese inhabitants of Formosa entered loto a conspiracy against the Dutch which was suppressed with the assistance of the original natives. Soon after this Comings (has Sing hong), the governor of the mantime province of Tehichiang in China applied for permission to retire to the island with his followers to escape the Invaders but his proposal was rejected by the Dutch governor Coungs in consequence ordered all the Chinese to join him on the continent which summons was obeyed by one half, and in order to distress the rest he prohibited all Intercourse and declared war against the Dutch years afterwards peaco was restored but Comings finding his attention in China insecure determined to estoblish a more lodependent sovereignty in Formoss and in consequence resolved to invade that island being encouraged by the rumous state of the Dutch fortifications

In March 1661 he arrived at Tywan or Formora with o fleet of 600 yes-

sels, and made himself master of the town and adjreent country, and af terwards besieged Fort Zealand Tho Dutch made several meffectual efforta to relieve it but were each time re pulsed with considerable sloughter At length the governor, Westburgh having sustained a close siege os long as it was possible to revist, was obliged to surrender on the 5th July of that year, and the survivors of the garri soo were allowed to embark on board the Dutch ships. This was a severe blow to the Dutch East Inda Company as while they retained Formoso they could cootrol the commerce of the Spaniords Portuguese, and Chinese, and had a place of refresh ment for their ships trading to Japan

Coxioga not long after he lind completed the conquest, sent o messenger to the Philippines requiring payment of tribute from the Spaniards. He also engaged in war with the emperor of China on the main land, and was afterwards defeated and slom in a oaval battle against tho united Seets of the Dutch and Chinese Ilis followers then withdrew from the coast of Chun In 260 vessels, but the place of their subsetained Notwithstanding this victory the allies could make no im pression on Formoso it was so well defended by Conings a uncle Tavin, and afterwards by his son, Telning Amg May

After Coninga a death it is probable that the dynasty controped to be distinguished by his came as the records of the East Indio Company in 1071 mention o war between the Aing of Java and Coxsin the elnef of Formosa whose power of that period controlled the Sultan of Jam bee on Sumetra, and of Johore on the Malay peninsula. In 1676 the English East-Indio Company had a factory on Formosa the principal object of which was through this medium, to carry on a trade with At that period the chief exports from Formosa were fino copper and gold both probably in the first instance procured from Japan

2 x 2

In the year 1683 the reigning prince, Tching Ki San, voluntarily surrendered his dominions to the Emperor of China, who settled a pension on him; and, having thus easily acquired Formosa, garrisoned it with a strong body of troops, and with him it has remained until the beginning of the present century. In 1805 the Ladrones, or pirates, had acquired possession of a great part of the south-western coast, which exported a great deal of grain to the province of Fokien in China.—(Macpherson, Bruce, Zuniga, Krusenstern, Crawfurd, &c)

FORWAK ISLE.—An island in the Eastern seas, extending thirty-six miles along the east side of the gulf of Siam. It produces agilla-wood, has a sea-slug fishery, and in 1820 was said to contain 2,000 inhabitants.

FOOLEYTA.—A small walled town in the province of Ajmeer, belonging to the Row of Ooniara, situated among wooded hills at the entrance of a pass leading from the Tonk pergunnah to that of Ooniara, sixtyfour miles travelling distance south from Jeypoor.

Fort Hastings —A small fort in Northern Hindostan, district of Kumaon, recently erected by the British government on the site of the Gorkha fort (or rather fastness) of Kotalghur, about three miles west from the frontier station of Lohooghaut; lat. 29° 25' N, lon 80° 3' E., twentyfive miles SE from Almora. fort stands on the narrow but level summit of a commanding eminence, about 500 feet above the cantonment at Lohooghaut, and 6,321 feet above the level of the sea The ramparts are irregularly formed to correspond with the margin of the cliff, with a parapet and loop-holes all round, and bastions at the angles; the whole, as well as the buildings within, constructed of an extremely compact gness, much better adapted for masonry than the loose schistose rock used at Almora. The hill is insulated and of very difficult ascent, and the

only gate is protected by a palisade, so that with a small garrison of 200 or 300 men it would be almost impregnable.—(Fullarton, &c)

FORT KING.—A substantial fort in the island of Ceylon, which commands the ferry of a considerable stream, eighteen miles W.S.W. from Candy, and 631 feet above the level of the sea; lat. 17° 13′ N., lon 80° 34′ E. The surrounding country is productive, and a bazar has sprung up in the vicinity of the fort, where in 1816 nothing but jungle was to be seen.—(Davy, &c.)

FORT MACDONALD—A military station in Ceylon, in the province of Upper Ouva, thirty-eight miles S.S.E. from Candy, lat 6° 49′ N., lon. 81° 3′ E. This post stands 3,000 feet above the level of the sea, but the summit of a pass two miles distant is about 1,500 feet higher.—(Davy, &c.)

FORT MACDOWAL.—A military post in the island of Ceylon, first established in 1803, but which soon disappeared Since the conquest of the Candian provinces it has been reconstructed, and permanently occupied, being on the high road from Candy to Trincomalee, lat 7° 30' N, lon 80° 48' E, fourteen miles north from Candy.—(Davy, &c)

FORT MARLBOROUGH,---(See BEN-

FORT WILLIAM.—(See CALCUTTA)

FORT ST DAVID.—A fortress on the sea-coast of the Carnatic, sixteen miles south from Pondicherry, and 100 S S W from Madras; lat. 11° 45' N, lon 79° 50' E The factory here was first established in A.D. 1691, when the Court of Directors ordered a purchase to be made from the Ram Raja of a new settlement named Tegnapatam, which was accordingly done, and re-named Fort St. David, the territory thus acquired being larger than that of Madras. In 1693 it was discovered that a plot had been arranged by Dr. Blackwell, the garrison suigeon, to deliver up this fortress to Zulficar Lhan, Aurengrebe's general who was then besleging the Ram Rala in Ginjee In recompense for which he was promised a large sum of money and the government of Portonovo lie was seized and carried to Madras where he made full confession of his treachery, which comprehended also the scizure of all the English settlements on the Coromandel coast After the capture of Madras in 1746 by the French under M de lo Bourdonnais, the British factory retired libber ned were ogain beneged hot without succeas From this period it continued the head of the British settlemente In this quarter until 1758 when it was taken by M Lally after a short siege The French then completely demolished the fortifications which were never rebuilt, and remain now very much in the same state as M Lally left them For this dilapidation o severe retribution followed when Pondicherry surrendered in 1761. (Orme, Bruce, Wills Se)

FORTITIEN ISLAM (or Beneza Reso Durga)—A smoll ulacd in the province of Canara, about one mile in circumstrence situated a short distance north from the entrance of Omore Bay It was originally fortified by an Iken ray and greatly strengthened by Tippoo who intended to make it his nayed arrenal.

FRINOTRAZAL—A small town in the province of Beogal, district of Dacca Jelalpoor situated on the west side of the Dullasery river (formed of a hrunch of the Ganges and ont of the Brahmaputra) about thirteen miles 8 W of Dacca; lat, 23° 33° N, lon. 90° 23° E.

Food late—A small island in the Eastern seas obout thirty five miles in circumference, one of the Philippines and aituated due north from the large island of Luzon or Lucoma, lat 10° N lon 121° 30′ E

Funox (or Punkek) — A large Island, apparently 2 000 feet high lying off the coast of Cambodia a little to the corth of the Cancao

river hat 10°17′ N., lon 104° 16 E

11 has a triangular form thirty four
miles in extreme length, sixteen in
extreme hreadth und generally corered with thick woods and luxornant
vegetation In 1821 It belonged to
the Cochin Chinese and was frequented periodically by Chinese and
Cochin Chinese in searchof sea-slugs
and aguilla-wood—(Finlayson, 6°)

Folgo Rives (Pholgs) .- A river in the province of Bahar formed shove Gase by two immense torrents, named the Mehane and the Nilajan The first enters the Bahar zillah from Ramgher, tweety miles & E of Gaya the last about eleven miles south from the same place Whee it reaches the high and rocky shore of Goya the clishnel of this river, where free of islonde, la about 500 yards broad, ond when filled by the periodical monsoon, its floads rush past that city with tremendous noise and velocity It is usually said that the sacred portion of the Fulgo which extends about half a mile occasion ally flows with milk, but the entire atream has been long noted for its sanctity.-(F Buchman &c)

FOLTA (Phallam fertidly)—A large village in the province of Bengal situated on the east bank of the Hooghly river twenty miles S.S.W from Calcutto in a straight direction but mach more following the curvatures of the river; in 25° 19° N. Jon 88° 20′ E. The unchorage here is safe, ships being protected from the swell of the sea. This bottom is a stiff clay in which anchors hold so fast that it a difficult to weigh them.

FUNNALAGUES.—A small fort in the province of Condesh, built on a comeal peak on the summet of the Satpoorn mountains, formerly of considerable strength and importance, but now in ruins. Near to Funnolaghiar there was a pass called Kook reem ghoat leading to Rheckuo gaum but not now frequented. The fort stands eighteen miles N W from Laowda and ten miles N of Recavul; lat 21° 24 N, lon 75° 47 E—(&Lalcolin, \$\phi\_0\$).

FURDAPOOR.—A village with a fine serai belonging to the Nizam, situated on the Berar frontier just below the Ajuntee ghaut.

Fureedabad.—A small town in the province of Delhi, from the capital of which it is distant fifteen miles south; lat. 28° 26' N., lon. 77° This place is remarkable for a large tank with a ruined banquetting house on its margin. There is also a large grove of tamarind trees, but no mangoes, few of which grow in the province of Delhi, owing to the unusual multitude of white ants, to whose increase ruins and a dry soil are favourable; indeed the whole country in this vicinity is barren and disagrecable, and the water bad. The white ant always attacks the mango in preference to all other trees.

Furledgeor.—A town in the province of Bengal, district of Dacca Jelalpoor, situated on the south side of the Puddah (Padma), or great Ganges, five miles from the bank of that river, and forty miles from the city of Dacca. This is the head-quarters and residence of the judge and magistrate and civil establishment of the zillah of Dacca Jelalpoor.—(Fullarton, &c.)

Fureedroor.—A town with a good serai in the province of Delhi, district of Bareilly, ten miles S. by E. from the city of Delhi.

Furran —A small village with the remains of a mud fort (now conveited to a saltpetre manufactory) in the province of Agra, district of Agra, situated on the high road from Agra to Mathura This place is built within the enclosure of what has been an extensive serai, the walls of which are still preserved as a means of defence On a little hill in the neighbourhood is a square mud fort, with a round bastion on each flank, and a little outwork before the gate. Formerly all the villages in this part of Hindostan were provided with a similar fort, where the peasantly and their families might seek refuge on the approach of their

enemies. The strength of the British government, and the internal peace which has in consequence prevailed, has rendered these precautions, as well as the walls and towers of greater towns, to be almost universally neglected; yet even in these times of tranquillity they may occasionally have their value.

FURRISHPOOR—A town in the province of Malwa, seventeen miles from Ashta, which in 1820 was supposed to contain about 1,000 houses.—(MS., &c.)

(Farakhabad, FURRUCKABAD happy residence).—A district in the province of Agra, situated in the Doab of the Ganges and Jumna, and between the 27th and 28th degrees of north latitude. To the north it is bounded by Barcily and Alighur; to the south by Etaweh and Cawnpoor; on the east it has Bareily, and on the west Alighur. This zillah, compared with the adjacent ones, is of small extent, and from its locality exempt from many disadvantages to which they are liable. jurisdiction comprises only thirteen police stations, and being almost sur-10unded by the judicial subdivisions of Cawnpoor, Etaweh, Alighur, and Bareily, it cannot be molested by foreign banditti unless they first penetrate through some of these magistracies, and it is thus preseived from a contingency, which it is difficult to guard against in the neighbouring districts The whole jurisdiction of Furruckabad is within the Doab, except the police station of Kakutnow, which is on the east side of the Ganges, and adjoins the Oude territories. In 1813, according to the collector's leturns, this zillah contained 1,805,383 cucha or small begas in cultivation, assessed to the revenue at 10,28,485 rupees, whole of which was realized within three per cent.: the rate of assessment was consequently about nine annas per bega. Besides this, there were 297,350 begas fit for cultivation, and 1,046,704 waste

Before the acquisition of the Doab

by the British, the small principality of Furnickabad was surrounded by the dominions of the nabels of Oude, to whom the Patan chief of hur ruckabad was tributary In 1501 by an arrangement made with the for mer the tribute payable by the latter was transferred to the Company; and in 1602 the civil and military government of the country was wesumed, making an allowance to tha Furruckabad naboli of 1,50,000 ru For many sents pees per annum preceding that event there had not existed, even nominally, any court for the cognizance of criminal acts or the redress of civil wrongs and the Patans of Forruckabad always noted for their ferocity were ho bituated by impunity to the commis sion of the greatest atrocities Mur ders were so frequent that the links breants did not dare to venture out after sunset and the workmen then corlored at the military conton ments always retired to their houses during daylight. Forcible burglaries took place in the # Iddio of the town and murders were perpetrated in the streets every man trusting to bls own individual means of revenge and ilefence. Since that period of oner chy the bands of robbers have been exterpated and owing to the in ereased security of property the vaine of lands and houses have greatly rises. It would be easy to provo that the great mass of every part of India have reason to rejuce at eam Ing under the British controls but the blessings to this small district in particular have been localculable In the financial year 1220 (A D

1813-14) a five years actilement of the land revenoe was made and the circumstances of the Furruckabad datirict appeared in a sufficient state of advancement to warrant the confirmation of the existing settlement in perpetolty, which the commissioners in the upper provinces strongly recommended but the vice-president he council thought that more precise information was still required to cauble the government to form a ma turn judgment on so unportant o

sufnect By precise information was principally meant the proportion which the cultivated part of the dif ferent estates bore to the unculti vated; exclusive of which however, various other points appeared to require elucidation, such as the omount of gross produce which the cultivator should pay, whether in money nr kind to the zemindars; a clear de finmen of the sources from which the latter ore entitled to draw a rent from the peasantry; also on accurate ond well ascertained boundary of the different remindaries and finally to a certain the general Interests of the government and the community In the several gradutions from the Sud der Maleoosar to the actual tiller of the and Arrangements for oter taining these being then in progress, it was deemed expedient to postpone the promulgation of a measure in its nature irrevocable and involving so materially not only the financial in terests of the government, but olso the welfare and prosperity of this e living under its protection - (Public MS Documents, Cathrie the Mar que of Hastings, Lord I alentia be)

FLARCEKARAD .- A city in the province of Agra the capital of the preceding di trict and one of the prin ernal towns of Upper Hindorton Int 27° 24 \, ion 79° 27 L stands at a short distance from the west shore of the Ganges and is only four miles drumnt from the king of Onde's reserved territories. town is surrounded by a wall which has been kept in tolerable order by the magastrates. Some of the streets are wide many of the houses and open spots skaded by trees; but, ex cept the principal streets o great mo jointy of the houses are mean ercetions of mud By the police arrange ments the city is divided into seven wards which are again partitioned Into 194 orohallahs many of which ore narrow and appear at one timo to have had harmer gates The residence of the civil establishment is at Futtelighur where government has also established a mint.

From an actual survey by the magistrates in 1811, it was ascertained that the town of Furruckabad contained 14,999 houses, of which number 13,348 were constantly occupied, the remaining 1,651 being shops, only inhabited during the day-time. Allowing five to a house, the total population would amount to 66,740, which must be considerably increased by the temporary sojourning of travellers and foreign merchants, this city being considered the chief commercial emporium in the conquered and ceded provinces, and the common resort of needy and dissolute characters from every quarter of Hun-One of the most brilliant achievements of the war of 1805 was the surprisal at this place by Lord Lake of Holcar's army, which thined the numbers, and entirely broke the spirit of his cavalry. Travelling distance from Lucknow, 111 miles; and from Calcutta by Birboom, 755 miles — (Guthrie, Lord Valentia, Fullarion, Rennell, &c.)

FURRUCKNAGUR (Farakhanagara, the happy city).—A walled town with a large scrai in the province of Delhi, district of Merut, ten miles E.N.E. from Delhi.

FURRUCKNAGUR.—A town in the province of Delhi, thirty-four miles west from the city of Delhi, lat. 28° 39' N., lon. 76° 31' E.

FUTTCHGHUR (Fataghar, the fort of victory).—A town in the province of Agra, situated on the west bank of the Ganges, ninety miles N.W. from Lucknow, and three miles from Furruckabad; lat. 27° 21'N., lon. 79° 30' E. Since the extension of the British frontier towards the northwest, Futtehghur has gradually ceased to be a military station of importance, and the force cantoned here now seldom exceeds half a battalion of native infantry. It is, however, the head-quarters of the commissioners for the settlement of the ceded and conquered provinces, and of the civil authorities of the Fursuckabad zillah, and also of several European merchants. The same predilection for mud walls prevailing here as at Cawnpoor, the dust here during the dry season is almost intolerable, and many of the unoccupied unlitary buildings having fallen to decay, its aspect is still more dismal than that of its sister station. A small, but strong mud fort has been crected for the protection of the arsenal, and the cantonment possesses the most elegant private theatre, next to Calcutta, within the limits of the Bengal presidency. Among other branches of industry, Futtehghur nearly monopolizes the manufacture of tents, which are here fabricated of excellent materials and with superior workmanship. During the dry season the Ganges at this spot is reduced to one or two narrow streams, meandering their way through a waste of sand.—(Fullarton, &c.)

FUTTFHABAD —A district forming a part of the Nizam's dominions in the province of Aurungabad, situated between the eighteenth and nineteenth degrees of north latitude. The principal towns are Daroor (the capital), Cullum, and Latoor; the rivers, the Manjera (which traverses the district) and the Tierna.

Futtcharad. — A town in the Bhatty country, in the province of Ameer, situated on the south bank of the Cuggur river, about thirty-five miles distance from Hansi, and thirty from Hissar; lat. 29° 30′ N. road from Hansi is good, and plenty of water is procurable at all seasons. At this place there is a large brick fort, with high thin walls, strengthencd on the inside with buttresses of earth, but without a ditch. There is a small ditch round the town, which is populous, and, as is usual in this quarter, most of the male inhabitants (in 1810 estimated at 5,000 persons) carry arms. The country from hence to Bat Summund is almost one continued jungle for thirty miles, affording excellent shelter for the Bhatty thieves, and according to the newspapers full of lions. Futtehabad is recorded as having been one of Timour's marches, at which period the

surrounding country must have been more productive or it never could have furnished one day a sub-latence for his innumeral ic border.—(Archibald Scien fre)

FUTTERASAD (the abode of rectory).—A town in the province of Walne, dission of Origin than named by Aurengebe niter a great hattle gained here in 1890 it belon, ed to Dowlet Ilon Sindia. Lat 27°1 N, ion 70°45 E.—(Valcolu, Fc)

Ferremovior (Felahgay) — A walled town in the presence of Oude, formerly the residence of Itaja Tic hart flow, of whom the only memoral remaining us a fine tank antround ed with runned lauldings eight miles W S W from Luckow

Terreticos — A large town in the protince of Allahalad sixty fice miles south from Jacknow; lat. 2.5 50 N. Jon 60° 40 L. In 1824 jills place had the appearance of consideral te prosperity and contained besides several good houses an elegant little mosque recently built by the nephews of the celebrated cunuch, Almans Ali hian

Like most towns in this vicinity, Futtelmoor is surrounded with tombs. and on one side is a large milnous seral. No payment is required of these serals except a few courses to the sweeper, while for a small sum of money, grass and water will be furnished to the traveller's beasts of burthen and fuel and earthen nots for himself The buildings them seives are generally noble monuments of individual bounty and in ancient times were liberally endowed and furnished with supplier of gram, milk. grass, &c gratis to the sejourner, as well as shelter There founds tions are now mostly obenated and a large proportion ruinous; but it is said their restoration and support is one of the objects proposed by the British government in the application of the internal tolls to works of public improvement

FOTTIPOOR SIKEA .- A town in the

province of Agra about macteen miles W S W from the city of Agra; Int 20° 6 N lon 77° 34 b It is surrounded by a stone well of great extent, with buttlements and round toucts built by the I mperor Acber The space within does not appear to have ever been filled up with buddings and the portion now inhalated forms but an incoorderable village. The neighbouring hills are composed of greyuh stone, sod have supplied tho maternie with which the town is built On the most elerated part of the rock stoods the tomb of Shale Schm Checetee, a Vishomedan saint, by the efficacy of who e prayers Acber's empress after remaining barren far several years became pregnant and bore a son who in honour of the holy man was named Selim and on seconding the throne of lindostan took the name of Jehangeer The tomb is stdl to be seen in tho rentre of an arcaded square surpaysing in extent the area of the Jumma Mu jeed at Delhi and approached through a gate of singularly grand proportions. Geveral individuals of Acher a family he interred within the precincts and the spacious and to lerably entire remains of a palace formerly inhabited by that emperor are still in existence. The line of British frontier in this quarter com mences at, and includes Futtlpoor Sikra.

This town wor a favourite resi dence of Acber and here during his expeditions he usually left his wives and children There are two tombs here of very claborate workmanship; that to the right contains several mo numents of the royal family a that to the left (s beautiful chapel of white merbie) the shrine of Sheikh Soliman, who had the rare good fortune of being both a saint and statesman It is kept in substantial repair by the British government and its solid stylo makes this on easier task than the lotricate and claborate inlaid work of Secundra and the Taule Mahal There is a small but nehly ornamented house still ahown as hay ing been the residence of Beenball, mperor's favourite minister, and the Mussulmauns accuse of ginfected him with the strange ous notions with which in the part of his life he sought to late his subjects. Another litulding is also shewn, consisting y of a shrine or canopy supd by four pillars, where, acing to the Mahomedans, Acber to perform his magical rites.—

ter, Fullation, &c.)

rra roon (Fatahpura).—A town reproved of Almeer, eighty-five N.W. from the city of Jeypoor; 7° 50' N., lon. 74° 45' E.

e province of Gundwana, fifty-miles S W. from Hussemabad, wenty-seven from Chowraghur; 2° 40′ N., lon. 78° 35′ E. This is the residence of a petty chief, cary to the Raja of Nagpoor.

TWA.—A populous town in the nee of Bahar, zillah of Bahar, zed at the confluence of the con river with the Ganges, behe city of Patna. Here are two las, and also a bridge over the con.

ZABAD (a beauliful residence) vn in the province of Oude, and apital of that principality durhe reign of Shuja ud Dowlah, 1775 abandoned for Lucknow s son and successor, Asoph ud ah, situated on the south side e Goggra river, seventy-eight east from Lucknow This city ll of considerable extent, and numerous population, y of the lower classes; the men, bankers, money-changers, nerchants, having migrated with ourt to Lucknow The remains fortress, and of Shuja ud Dowpalace, are still to be seen tterly Fyzabad has been chiefly rkable as the residence of the

rated Bhow Begum, the widow

nujah ud Dowlah, and mother

soph ud Dowlah, but not, as is

ally supposed, of the late Na-

The original inten-

Saadet Ah.

tion of this lady was to transfer the whole of her property, real and personal, to the British government, and to constitute that power sole heir and executor at her death. The just right of the Begum to transfer, and of the British government to accept, her highness's legacy, with reference to her personal property, could not be doubted; but the government immediately rejected the proposal, and recommended an arrangement by which, after providing for her own interment, and for her relations and dependants, the residue of her vast property should devolve to her grandson, Ghazi ud Deen, the present king of Onde

The Bhow Begum departed this life on the 28th of December 1815, after an illness of a few days, aged eighty-four, and on the 19th of February 1816 Mr. Strachey (then resident at Lucknow) proceeded to Lucknow, to carry into effect the provisions of her will. The amount of her treasure (exaggerated by the natives to twenty crores and thirtyfive lacks of rupees), according to the statements furnished by Dareb Ali Khan, who, in concert with Captain Robertson, commanding the guard at Fyzabad, had examined the coffers, was 89,48,916 rupees (£1,038,074 sterling), exclusive of jewels, shawl goods, wearing apparel, cattle, &c. The last-mentioned description of property, together with the jaghires of the late Beginn, which, even under her mismanagement, yielded eight lacks of rupees per annum (£92,800), was made over to the king of Oude, whose agent repaired to Fyzabad to The aggregate take charge of it amount of pensions for which the Butish government became responsible required a capital of 50,11,470 rupees, to which sum three lacks, payable to Dareb Alt Khan for the expense of the mausoleum, and one lack for donations to the holy shines of Kerbela and Nudjuff, were to be Other items swelled the toadded tal capital received by the British government for the purpose of executing the provisions of the Begum's will, to 62,50,748 rupees. The remander (after deducting the four lacks above appendied) left in the hands of the British government to cover the pensions, &c. (about 1,0,000 rupces) to be paid to the Begums relutions and dependants through her confidential cunnel. Darch Ali Aban amounted to 88,50,748 supces (4678,500 sterling).

After all these deductions from the Begum a property, the naboh a rest due amounted to 26,97,169 rupees in money, besides jewels and other valuables of which no estimate was made; and his execllency, as abovementioned succeeded to an estate of eight lacks of supees per annum Subsequently a fraudulent attempt was made to pass off a surreptitious will, purporting to be that of the late Begum, but the forgery was detected, and measures were taken to discover and punish the contrivers of it-(Public MS Documents, Major Holl lic, fc)

FYLMAN,—A village in the province of Delhi, district of Saliarun
poor, situated on the shirts of the
great northern forcest near the east
ern banks of the Juman where that
river Issues from the hills. A short
distance above they place there are
still to be seen the remains of nhunt
ling scot built close to the Juman by
the Mogul emperor Shah Jelian. The
runs oro massy but of no architec
taral beauty—(\*\*ellarion\*\*, 6\*\*)

G

GAGROON —A fortress in the province of Malwa, district of Aloch ond the unal resultance of the lata Zalim Singh the ray rana, or regent of that principality 1 lat 24 37 N., lon 769 12 E., forty mine miles & E from hotah

GARRAH.—A small town in the province of Mooitan about twenty four miles west from the city of Tat ts lat 24° 46° N., lon 67° 56° E. The surrounding country consists of a light sait saud, which during a fresh

breeze risea in such clouds as almost to blind man ond beast. A strong glare Is also reflected in the day-time ond the wind is dry and excessively parching. A few lye shrubs are sentered over this torrid tract.—(blas-feld, fe).

GALDERY IIILLS.—A range of hills in the langdom of Ava beginning at Tagourdane, forty miles east of Proine approaching towards Tone ho A party of British troops in 1822 accorded these elevations which were found so steep and rugged as to offer serious obstacles to the passage of an army. After passing them, the road was found to lead through a desert and dreary waite having a few nilserable cottages activered over it until within a day's march of Tongho where the country again assumes a more civilized appearance.—(Sand grant, 67)

GALEGE, A territory of small ex tent in Northern Hindostan and for merly one of the twenty four rainslups. Although a cooler country thon the rafley of Nepaul, it is said to be the best cultivated in this gunrier partly with the hoe and partly with the plough a besides which it contains three mines of copper and one of iron While one of the twenty-four indepen dent regasture the chief's share of the revence including the mines, amounted to 3,500 rupees per annum 1206 the whole number of inhabitants were reckoned to occupy 3 000 houses; half low tribes of cultivators and tradesmen one-fourth hhasyon and one-fourth Brahman and Rospoots The chief's house named Galkot surrounded by about 500 huts stands on a hill, in lat 28° 17' N., loa 83º 14 E., seventy-ux miles WAW from Gorkha .- (F Bucho япп, бс)

GANOHAOK (or Gamtoo) — A strong hold in Aorthern Himiotan belonging to the Sikkim raja animated between the great and lutilo Teestn about thety miles N from Delam cotta; lat 27° 26 N, lon 88° J8 E This place and the annall territary

attached, were never subdued by the Gorkhas

Gandapoon.— (Gandhapura, the fragrant town).—A town or rather village in the province of Aurungabad, sixty-two miles north from Ahmednuggur; lat. 19° 54′ N, lon 75° 11′ E It is now the frontier village of the British possessions in this quarter, formed of conquests from the Peshwa. A noble avenue of tamarınd and neem trees extends from hence to the left bank of the Godavery, opposite to Toka.—(Fullarton, &c.)

GANDICOTTA (or Gannicotta).—A subdivision of the Balaghaut ceded territories, situated about the fifteenth degree of north latitude It is intersected by the Pennar river, which penetrates through a gap in the Gandicotta hills into the plain of Cudda-The break or chasm in these mountains appears to have resulted from some violent concussion of nature, as it is very narrow, and the opposite sides almost perpendicular. On the southern precipice is the fort of Gandicotta, which has communicated its name to a range of hills, of a barren aspect, and almost destitute of The town and fort of Gandicotta are situated in lat. 14° 51' N, lon 78°22' E, forty-three miles N.W. from Cuddapah. It is not at present a place of any importance, although formerly noted for its strength, and the vicinity of a diamond mine. the immediate neighbourhood the waters of the Pennar are abstracted for the purposes of urigation, being conducted to the fields by channels cut in various directions. - (Heyne. Rennell, &c)

Ganges River.—The Bhagirath, or true Ganges, issues (about lat. 31° N., lon. 79° E) from under a very low arch, at the base of a great mass of solid frozen snow, about 300 feet perpendicular height, composed of layers, each several feet thick, and probably the accumulation of ages. From the brow of this snow wall large and hoary icicles depend, whence may have originated the my-

thological fable of the Ganges issuing from the hair of Mahadeva. The height of the snow arch is only sufficient to let the river flow under it. The mean breadth of the stream, where it issues, on the 31st of May 1808 was twenty-seven feet, and the mean depth about twelve inches such is the diminutive apparition of the young goddess who ultimately rolls a flood into the ocean ten miles broad.

There does not appear to be any practicable route by the course of the Ganges, as there is by the Jahnevi, otherwise the natives would probably, before this date, have found it out This tract, however, has not yet been explored by Europeans during the rains, when it is probable the mass of snow would be found much reduced But certainly the Dauli, and not the Bhagirathi, ought to be considered the main stream of the Ganges: for the Dauli proceeds from the very base of the highest ridge of the enormous Himalaya chain, and one of its tributaries issues from the pass which leads through the mountains, whereas the Alacananda (the next longest branch), in the inferior, short of the snowy mountains It is probable that there are not any boiling under the mass of snow here, as at the source of the Jumna, no steam being perceptible. The termination of Capt. Hodgson's route, one mile and a half further up than the spot where the Ganges emerges, was found to be 14,600 feet above the level of the sea; but the point above-mentioned, where it first becomes visible, is only 13,800 feet.

From Gangautri the Ganges has the upper part of its course among the mountains, flowing from the south of east to the north of west, and it is only from Sukhi, where it fairly pierces through the Himalaya, that it assumes a course of about south 20° west to Hurdwar, whence it enters the plains, and from thence to its confluence with the Jumna at Allahabad (the first large river that joins it in Upper Hindostan), the bed of the Ganges is generally from a mile to a mile and a quarter wide. From hence

its course becomes more whiling and lits channel broader, until hasing mic ceasively received the ( eggrs, the bone and Gunduck, besides smaller streams, its current attains its great ext width inland, as it afterwards becomes so narrow in some parts as half a mile and, where no islands in terpore occasionally spreads to three miles when at its lowest the principal classification one nule and in quarter uside but the commonly about three-faurities of a mile wide.

The Ganges is fortisble at soma places abave its conflux with the Jumns lust the navigation is never interrupted. At 500 miles from the sea the channel is thirty feet idep when the rever is not stated which depth continues to the sea where the audien expansion of the stream deprives its of the stream deprives the bars of mad and send thrown across it by the strong south crip winds so that the principal branch of the Ganges cannat be entered by large vessels.

About 200 miles from the sea, but much more reckoning the wind ings of the river the Delta of the Ganges commences The two westernmost branches named the Cos elmbazar and Jellinghy rivers unite, and form what is afterwards named the Hooghly flowing past Calcutta, and the only branch navigated by ships Below the ebonnel named the San to Mohana, where the Ganges sends off thesa two branches, which go to Calcutta the majo trunk loses not only its name, but o large propor tlon of its sanctity The Cossimbazar river la almost dry from October to May; the Jellinghy olthough a stream runs in it at all seasons, is in some years unnavigable for two or three of the drest months so that tho only secondary branch of the Ganges that Is at all times navigable for boats, is the Chandan river which separates of Modapoor and terminates in the lioo ringotto That part of the Delta bor dering on the sea consists of o laby rinth of creeks and rivers named the Sunderbunds, which, including the

strers that bound it, give an expansion of 200 miles to the branches of the Ganges at their junction with the

The descent of this river is about one lackes per mile but the windings are so great as to reduce the decisity to less than four inches per mile. In the dry season the mean rate of motion is less than three miles per hour, but in the west season and while the waters are draining off the ionodated inade the current runs, from five to six miles an hour, and there are to reliable to the original of the running from seven to eight in particular

situations The Ganges owes part of its in crease to the roins that fall in the mauntains, although it does not oppear to be much affected by the melt ing of the snow in spring The sum total of its roung is thirty-two feet out of which it rises fifteen feet and a half by the latter end of June and the rainy season does not seriously begin in most of the flat countries until about that time In the taountake the runs commence early in April, and by the end of that month when the rain-woter has reached Bengal, the mers begin to me by very slow degrees the increase being only one luch per day for the first fortnight. It then gradually augments to two and three mehes before ony quantity of run has fallen in the low countries; and when the rolo becomes general its increase of o medium is fire inches per day By the end of July oli the flat country of Bengal contiguous to the Ganges and Bmb maputra are everflowed, and form on Inundation of more than 100 miles in breadth, nothing appearing but vil lages and trees and here and there the ortificial arte of an abandoned village resembling on island

Owing to the quantity of roln that falls is Bengal, the lands in general are overflowed to e considerable height long before the bed of the river is filled the ground adjacent to the river bank to the extent of some mides, being higher than the rest of the country Particular tracts or

UUO

Ganges.

guarded from inundation by dykes or bunds, kept up at an enormous expense, the permanent utility of which has recently been much doubted, for the country must be irrigated at some period, when it becomes necessary to From their long ducut the bunds ration, also, they have had the effect of elevating the beds of the rivers they confine to a greater height than they would naturally have attained; in some instances greatly exceeding the level of the adjacent fields The whole neighbourhood has in consequence been brought into so a tificial a state, that no alternative remains but perseverance in the same erroneous and It has been estiexpensive system mated that the total length of these dykes, collectively, exceeds 1,000

Table of the increase of the Ganges and its branches.

Jellingby. Dacca.
Rise in May ..... 6ft. 0in. 2ft. 4in.
Do. June ..... 9 6 ... 4 6
Do. July ..... 12 6 ... 5 6
First halt of August 4 0 ... 1 11

Total ... 32 0 14 3

The inundation is nearly at a stand in Bengal for some days preceding the 15th of August, when it begins to run off, although great quantities of rain continue to fall during August and September; but a decrease of rain has by this time taken place in the north, and a consequent deficiency in the supply to keep up the inunda-The daily decrease of the tion. Ganges in the latter half of August and the whole of September is from three to four inches; from September to the end of November it gradually lessens from three to one inches, and from November to the end of April is only half an inch per day at a medium.

Approaching the sea from the limit to which the tide reaches, the height of the periodical increase gradually diminishes, until it totally disappears at the point of contact with the sea. The ocean preserving at all times the same level, necessarily influences that

of the waters which communicate with it At Luckipoor there is a difference of about six feet between the heights at different seasons; at Dacca and places adjacent fourteen feet; and at Custee thirty-one feet. The latter place is about 240 miles from the sea by the course of the river, and the surface of the river there, during the dry season, is eighty feet above the level of the sea at high water.

In Bengal, the banks of the Ganges exhibit a variety of appearances, according to the nature of the soil, or the degree of force with which the current strikes against them. those parts where the velocity of the stream is greatest, and the soil extremely loose, the banks become perpendicular, and are undermined and swept away by the strength of the current with such rapidity, that an acre of ground has been seen to disappear in less than half an hour. At other spots the bank is seen excavated into deep bays with projecting points between them, round which the current rushes with great velocity; but it is considerably slackened, and has even a retrograde eddying motion, in the interior part of the gulf. In the upper districts, where a conker soil (a hard white calcareous earth) prevails, the banks are not so liable to be undermined, and the Rajmahal hills, from which several rocky points (as at Sicrygully, Pointy, and Pattergotta) have for ages effectually resisted the encroachments of the Ganges.

In its course through the plains the Ganges receives eleven rivers, some of which are equal to the Rhine, none smaller than the Thames, besides a great many others of lesser note. The largest tributary streams to the Ganges in Bengal and Bahar, are the Goggra, the Sone, and the Cosa. Such of these rivers as are narrowest, are remarkable for their windings; the larger rivers having a tendency to run in more direct lines. Within the space of 100 miles, the Ganges by the winding of its course is calculated to increase the space

gone over to 12. miles some other rivers more than double it

It is only that portion of the over that hes in the most direct line from Gangoutre near to which he feeblo stream serves from the Ilimalsta, to Sagor island below Calcutta, that it is particularly sacred and named the Ganga or Ilhagirathi The lloo.hlv river, therefore of I mopean geographers is considered the true Ganges ; the great branch that runs east to jmn the Brahmsputra is by the Inndoos named the Puddah (Palma or Padmawati), and le not by them esteemed equally sacred Although the waters of the whole river from Gangoutri to Sagor is holy yet there are places more emineutly sacred than the rest and to these pilgrams from a distance resort to perform their ablutions ond carry off woter to be used in future ceremonies. Wherever this river runs from the south to the north, centrary to the usual direction, it le considered necularly holy, and is coiled Uttara Bahari

The most sanctified places are eer tain pravages or confluences of ravers, of which Allahabad, where the Ganger and Jumna unite is esteemed the chief and by way of distinction hamed Prayag Some others are situated in Northern Bindostan in the prosince of Gorwal, at the junction of the Alacananda with other streams and are named Devaprayaga Rudraprayaga, Carnaprayaga and Nanda-prayaga. The remaining ascred spots are liurdwar where the river first escapes from the mountains Uttara Janager a short distance below Mon ghir; and Sagor island at the mouth of the Isnoghly Besides its sanctity the Ganges water is much esteemed for its medicinal properties and is on this account drank by many Ma homedans In 1792 Abdul Hakeem the reigning cabob of Shalinoor near the west coast of India, and above a thousand miles traveling dutance although a Mahomedan never drank any thing clse,

In the British courts of Justice onder the Bengal presidency the Ganges water is used to anear wil-

nesses of the Brahmmeri faith, in the same manner as the Evangelists are put into the hands of Christians, and the Aoran into these of the Mahomedans; but many respectable lindoos refine to comply with the exercismos, allegoge that oo such occavions it is forbidden to touch the Ganges water, o Salgam, or o Brahmin. When such cases occur if the perion be of good character, the judges permit him to gwo his evidence in the way most consistent with his prejudees.

In the l'indoo mythology, Ganga (the Ganges) is described at the daughter of the great mountain III marati; her sixter Gomn of the spouse of Vishaders, the destroying

DOM CT

She is called Ganga on account of her fluxing through Gang the earth she is called Jahnavi, from a cholerie Ilindoo saiot, whose devotions sho interrupted on her passage to the see, when he a paroxy am of anger he drank her up but was afterwards in duced by the humble supplication of the demi-gods to discharge by his cars. She is called Bhazarathi from the royal devotee Bhagaratha, who by the intensity and austerity of his devotions brought her from heaven to earth from whence she proceeded to the infernal regions to re-animato the ashes of his oncestors. lastly, she is called Triputhaga, on account of her proceeding forward In three different directions, watering the three worlds heaven, earth ond the infernal regious and filling the ocean which according to the Brah minical mythology although excavated before her appearance destitute of water. (Rennell Colebrooke Colonel Colebrooke, Hodgson and Herbert Webb, Raper the Moonthee F Buchanan Fullarian the Ramayuna if ard &c )

Ganaroos.—A small chiefdip in the province of Gunilwans formerly a dependent pergunah on Sumbhulpoor, and latterly o fendatory of the British government The town of Gangpoor stands in lat 21° 54 N. lon. 84° 30' E, seventy-eight miles N. E from Sumbhulpoor

When taken possession of by Major Roughsedge in 1818, this zemindary was found in so complete a state of desolation, that in his triennial settlement of the revenue it was only assessed at 1,250 Sumbhulpoor ru-Many pees, or about 800 siceas. streams and rivers flow through Gangpoor from the hills of Chuta Nagpoor, on their road to the province of Cuttack, and valley of the Mahanuddy. In the channels of these, considerable quantities of gold are found, and occasionally diamonds of considerable magnitude, but the pestilential climate of this most wretched district, deters the boldest European from attempting a regular search for these The zemuch-prized productions. mindar's name in 1819, was Raja Indra Sicca Deo — (Roughsedge, &c)

Gangoutri (Ganga avatari) —A celebrated place of pilgrimage in Noithern Hindostan, situated among the Himalaya mountains, near to which the river Ganges issues into day from under an immense mound of snow; lat 30° 59' N, lon. 78° 56' E, sixtytwo miles north by east from Serinagur, 10,073 feet above the level of the sea. The temple here is merely a mundap of stone of a diminutive size, but it contains small statues of Bhagiratha, Ganga, and other local It stands on a piece of rock, about twenty feet higher than the bed of the Ganges, and at a little distance there is a rough wooden building to shelter travellers. By the river side there is a little soil where small cedars grow, but in general the margin is strewed with masses of rock On the 26th May 1808 the mean breadth of the Ganges at Gangoutri was fortythree feet; depth eighteen inches; on the 2d June the depth was two feet and rapidly increasing. The river has here an expanded bed and runs with a less furious current than immediately above and below.

There is no village here but merely a few sheds for the attendant Brahmins, who reside here during the pilgrim season, but notwithstanding the great efficacy attributed to this pilgrimage, it is but very little frequented. It was first visited by Captain Raper's moonshee (whose name has not been recorded) in 1808; by Mi Fraser in 1815; and by Messrs. Hodgson and Herbert in 1817.

By the natives the pilgrimage to Gangoutri is reckoned a great evertion of Hindoo devotion, the accomplishment of which is supposed to redeem the performer from many troubles in this world, and ensure a happy transit through all the stages of transmigration which he may have to undergo. The water taken from hence is drawn under the inspection of a Brahmin, to whom a trifling sum is paid for the privilege of taking it, and much of it is offered up by, or on the part of the pilgrim at the temple of Baidyanath in Bengal. specific gravity of this river is said to exceed that of its neighbour the Alacananda, according to Hindoo belief, and is so pure as neither to evaporate, or become corrupted by being kept and transported to distant places — (Captain Hodgson, Herbert, Raper, &c.)

GANJAM (Ganjam, the depôt).— This district occupies the northernmost portion of the five Circurs, and has a very extensive line of sea-coast. To the north it borders on the district of Cuttack, which is subordinate to the Bengal presidency, to the south on that of Vizagapatam, to the east it has the bay of Bengal; and on the west a barbarous and unexplored tract of the Orissa province The interior of this zillah, as also the names and relative distances of the towns and villages, are still very ill delineated in the best modern maps The western and require revision. portion of Ganjam is hilly, but not far from the shore there are large and fertile plains, this being on the whole one of the most productive under the Madras presidency. The climate is also more salubrious than some of the southern Circars, the land winds being comparatively little felt, but it

has notwithstanding been occasion ally especially in 1815 experienced the ranges of a pelestilential force which a parently visite in succe ion overy part of illudostan

The rice cultivation throughout Canjam le very ennu lerable inter rupted linwever In extensive tracts of bamboo an I thura jungle Onegreat fore t in puticular composed prin enally of bamboo clumps a covers the plain for a space of maht or ten miles Cotton is not generally raised here, int only in detached mots. The same ground that produces cutton one year will not answer that eron the succeed year but with encouragement the cultivation night be extended and im proved The orchitecture of the ilin doo religious edifires In this quarter of Indio is peculiar Lach temple is composed of a groupe of rather luw hulldings, in some cases detached in others joined each with a graduated pyramidical roof terminating in an ornamented cooreal cupola, Jumer nauth is the favourite of sect of wor ship. The principal towns for the conting trade are leanism Nunsoor totta Foonspoor Calings; stam and Burhampoor, which in 14.0 was the head-quarters of the civil es abli h The exports can let of cot ton cotton-cloth rice sugar rum pulses of all kinds gums drugs and other hili produce was giver and salt to Bengal. In 1817, the total gross collection of the public resenue amounted to 312,0.6 star pandas Ganjam escaped the Pindary Invovion which in 1916 desoluted Contours but in the following year hall a vi it from these depredators who nithough expelled in the abort space of eleven doys committed ravages and left on impression of terror on the minds of the inhabitants scarcely inferior to what had been experienced in Cun toor - (J Grant Hodgeon Fallarlon Sc)

GANJAN.—A town in the northern Currars the former capital of the preceding distract situated near the sea coast in the bas of Bengal; lat 19° 21'N., lon 83° 10' F It atands 30°, r on an elevated portion of the plain, with a range of high mountains at the distance of a few miles in the lack ground The public includings of this station as well as the houses and gariens of the civilians, were on a scale of gran leue surpassing almn t every other station under the Madras presidency; but in 1520, these and the fort and cantonments were going rapilly to decry At that date on oll invalid sergeant in charge of the fort was the last remaining white in isalitant even the master attendant having taken faht to Yunsoorcotta The native quarter of the town was rather less demiate, half the bouses being still inhabited Neanwhile the ferer, which had caused this general dispersion, and which had its onen (as was supposed) in a great flooding of the low country from a violent storm, its i altogether cen ed and Ganjam was again considered more healthy than even the neighbouring stotlan of \userspatam Such are the sicesutudes of a tropical climate. The renceral arm of the Ganiam tirer which enters the sea to the south of the town is about one third of a mile troat and it fordable at most sea one of the year Another narrower but ilrener branch is crossed on a wooden imige built somewhat on the price ciple of the Sangan of the Hamilara mountains,-(Fullerton ge)

Ganadias -- A town in the Gije int Peninsula forty four miles we t irom the gulf of Cambay; lat. 21.30' N., lon. 71° 41' E.

Garilwara.—A town in the province of Gundwana, the head of a pergunnah of the same name belonging to the British government, sixteen miles S. W. of Sacur and twenty-four miles N. E. of Chowraghur. Lat. 22° 49′ N., lon. 79° 15′ E. — (Malcolm, &c.)

Garnows (Garndas) — This tribe formerly occupied an extensive tract of country between the 25th and 26th degrees of north latitude; bounded on the north by the course of the Brahmaputra, on the south by the districts of Silhet and Mymunsingh, to the east by Assam and Gential, and on the west by a bend of the Brahmaputra. Such were the ancient dimensions, which, besides the country still retained by the independent Garrows, comprehended the territorial divisions in modern maps named Howeraghaut, Measpara (or Mechpara), Caloomaloopara, Cuitybarry, Gonasser, Susung, and Sheerpoor, in Mymunsingh At present the tract occupied by the independent Garrows cannot be estimated at more than 130 miles in length by thirty in breadth, and nowhere touches the Brahmaputra. Seen from the confines, the whole appears to be a confused assemblage of hills, from 100 to 3,000 feet high, watered by numerous small streams, and containing scarcely any level ground, the hills being every where immediately Towards contiguous to each other. the centre it is said (for they have only been recently penetrated by Europeans) there are immense masses of naked rock, and large spaces destitute of vegetation; but in general the hills, though steep, consist of a rich deep soil, suitable for the hoe cultivation. The climate being very humid, such a soil produces a most exuberant vegetation, and where undisturbed by agriculture, the mountains are covered with noble forests, containing an infinite variety of curious and ornamental plants.

In geological structure the Garrow

mountains are of two orders. first rise to the height of two or three thousand feet, and in some parts more; are composed of granite, with veins of unmixed quartz beneath, and of pure white felspar towards the summits. The hills of the second order are seldom above 200 feet high, and appear to have been formed by the operation of water, the strata being nearly horizontal, and their substance composed of clay, sand, and small stones. In some places, on a mountain above 4,000 feet high, north of Robagiri, ridges of gneiss appear, more especially at the top, in a position nearly vertical. At Robagiri, above the white clay, a stratum of limestone, abounding in nummulites, appears in the bed of the river.

Besides the space above-mentioned, the Garrows seem formerly to, have occupied much of the adjacent low country, and still retain some portions as subjects of the neighbouring powers, most of the rajas. tubutary to Assam on the south side of the Brahmaputra being of the Garrow tribe. On the British frontier the several large estates adjoining to the Brahmaputra on the east have never, under any government, been regularly surveyed, nor have their internal resources until very lately been the object of official scrutiny. During the Mogul government some of them were made hable to a provision of elephants, some to certain assignments towards defraying the expenses of the Dacca artillery park, and others to the maintenance of a few petty garrisons; but the internal administration was left almost entirely to the hereditary chiefs found in possession of the principalities, who were treated rather as tributaries than subjects. This arrangement probably originated partly from the wild and uncultivated state of the country, which did not admit of a regular assessment, and partly from an adherence to a favounte maxim of Mogul policy, that of conciliating the good-will of chiefs possessing local influence on their distant frontiers.

Whatever share of independence the Carrows may have retained dor ing the sway of the Moguls, whose cavalry could not penetrate these Impervious forests, they soon lost when the adjacent semindary of lien cal could call to their assistance the terrors of British mosquetry, against which the bows, swords, and spears of the Garrows could oppose int a feeble resistance. In AD 1775 the chowdres of Measpara and Currybarre noder pretence of incursions made by the Garrows col lected a con silerable body of armed men and invaded the tills where they are said to have cootinued for two or three years, during which period great micibers of their followers are said to have fallen victims to the unhealthiness of the climate eventually however, succeeded in subduing several tribes, nod it is a sserted that on this occasion the hill chief Hongta first became subject to the authority of Corrylarry 1794 Currybarry Celoomaloonara, and Measure were considered by the commissioner in Couch Bahar to be three istimrary mahala (lands pay ing tents in perpetuits), the assess-ments on which were first at a low rate on condition of their opposing the Garrow moontaineers, for it are pears there tribes were in the haint of making aonual plundering incur sions similar to those committed on the south-west frontier by the Maharattas. The chowdres of the above three estates had military rank conferred on them nod paid revenue for duties levied but not for land; net ther did the tenaots pay any rent except for a few tracts within the in undation of the Brahmsputra hold ing their laods by military tenure These feudal arrangements enabled the chiefs to organize such a furce that in 1789 Ram liam the chowdry of Measpara, attacked and defeated Mr Bailile a merchont then residing ot Goalpara on the frontiers of Avsam but who it oppears hed also on army of his own to process of time, when the connexion of the Garrow chiefs with the Mogul government of

Bengal became more matered they began to pay a trifung revenue in cetton the simploproduction of their hills; every loa! brought it market by these mountainneers being accompanied by a small bundle named the buchs or young load for the semindar a share. The mann load was carriculon the beak, in a long basket slung round the forehead while the young load wa carried lo one hand and the cumbures or long word in the other la 1794 by repeated acts of con-

inmacy un the part of the Curry barry seminder, induced the govern ment to detach a party against him under the command of Cant. Darrah. who captured the fortified residence of the thoudry, in consequence of which he pald up the arrears. This was the first time that a regular Britub force had been sent to Currymarry. The affairs of the reminder falling subsequently into disorder the estate was brought to sale and tho purchaser rained not being able to resell an estate the extent of which was undefined and the owner subjected to continual alarms of conflagration and massacre from the atruce gleenf the western Garrows to shake off a yake which they had long born with impatience llungta, one of their principal leaders died many years ago and was succeeded by his son Igund who was alive in 1817 and was then said to possess much wealth in slaves brass pots, and hu man skulls. This chief attended the marriage of the reminder of Currybarry s son, when a palanquio was presented to him, which, having first deprived it of the poles as incless he entered and was borne away over the hills on the head of his slaves. I is family establishment was sald to be so numerous as to require five dhenkies (machines to clean rice) tole constantly keptat work. Agund'a influence prevalled over that portion of the Garrow mountains which ho contiguous to Currybarry and My munungh ond under him are gliceries and bhoomeas (local chiefs) who exercise authority over the particular villages to which they reside 200

The Garlows have no other means of disposing of their cotton than by carrying it to the Bengalese markets, which they continue to do notwithstanding the constant succession of frand, falsehood, and extortion which they there experience. The trade with Rungpoor is entirely carried on at these foreign marts, to which in ordinary times the Garrows repair once a week during the dry season, more especially in the months of December, January and February When the Garrow arrives at the market, the zemindar commences by taking part of the cotton as his share; the remainder is exchanged for salt, cattle, hogs, goats, dogs, cats, ducks, fowls, fish dry and fresh, tortoises, rice, extract of sugar-cane for eating, tobacco and betel-nut for chewing, some hoes, spinning wheels, brass-ware, Monoham ornaments, and also some silk, erendi, and cotton cloths. In 1809 there were 47,000 maunds of cotton brought into the Rungpoor district by the Garrows, but of this 10,000 maunds came from Currybairy, and 700 from the Garrows of Assam. It is uncertain what quantity went to the southern markets, but were the Garrows sure of a reasonable recompense, the quantity might be greatly augmented a reasonable exchange is meant their receiving a maund of good salt for two maunds of cotton, whereas what they now receive is adulterated with a mixture of earth and addition of The value of the cotton, however, far exceeds the amount of all the other goods, and a large balance is paid in rupees, which is the only coin the Garlows will accept; the best cagle-wood is found among the Garrow hills, but hitherto little has been procured

The presence of an armed estatablishment is indispensable, to keep the peace while the traffic is going on, and to give confidence to the sly but timid Bengalese. It was formerly the custom to keep a large body of matchlock-men with matches ready lighted, who paraded round the market during the sale, and discharged a

matchlock at short intervals, to remind the savages that they were on the aleit. Without this coercion, the Gairows, on the least dispute between one of their party and a merchant, would rise in arms and massacre all within their reach. Notwithstanding these precautions, the Gairows continued to perpetratesich atrocities, that in 1815 all commercial intercourse was interdicted, and parties of police peons stationed at the different maits in the vicinity of their mountains to enforce the prohibition.

With respect to the term Garrow, that people assert that it is a Bengalese denomination, nor does it appear that either nation have any general name for the congeries of elevations which we call the Garrow mountains, nor for their inhabitants collectively, each tribe or clan having a name peculiar to itself. The northern Garlows are a short, strong-limbed, active people, with strongly-marked Chinese conntenances, and, in general, harsh features, but some of their chiefs are rather handsome, and in manners and vivacity are said greatly to excel the adjacent Bengalese zemindars. 10w woman can carry over the hills as great a load as a Bengalese man can carry over the plain, and a Garrow man one-third more. For their own eating, the Garlows rear cattle, goats, swine, dogs, cats, fowls, and ducks, and purchase from the inhabitants of the low countries all these animals, besides tortoises and fish, fresh and dried. Among the hills they procure deer, wild hogs, frogs, and snakes, all of which they eat, rejecting no food but milk, which they utterly abhor and abominate in any shape whatever, comparing it by way of execration to diseased matter They are very partial to puppics, and the mode of cooking them is worthy of notice, as furnishing an example of their diabolical cinelty. They first incite the dog to eat as much rice as he can swallow, after which they tie his four legs together and throw him alive on the fire, when they consider the body to be

safficiently raisted, they take it aut rip up the belly, and divide the rice in equal shares minang the jurity as sembled. The whale of this process has been repeatedly witnessed by the Bengalese traders of the outinn muris

One more instance of their cult nary operations will probably suffice When a quarrel muses between two Garrows the weaker party flies to a distant hill to clude the vengeance of his antagonist but both parties im mediately plint a tree hearing a sour fruit called chotokor, and make a solemn vow that they will arml them selves of the earliest appartunity that presents it elf of enting their adversary a head with the juice of the fruit, Ageneration sometimes prisees away without either party being oble ta execute the measure in contem plation in which case the feud descends as an herriagm to the children The party that eventually succeeds horing cut aff the head of his slain adversary summans all his friends, and boils the head along with the fruit af the tree cats of the sann bimself and di tributes the rest among his friends r the tree is then cut dawn. and the feud ends

Their vegetolila diet consists chiefly of rice and millet with many arupis culadiums, and diascoreas Far sea soning they live enpircums onians, and garlie hot they do not uso tur merie In their cookery they employ both salt and oshes and somerimes oil but they cultivote no plant that produces the latter They prepare n fermented liquor both from rice and millet which is not distilled, but drank to excess both by men and women, on which occasions they usually squabble and fight Mans of them prefer wine to hrandy which is seldom dane by a llindoo topur or by savage notions generally

A process somewhat different is followed when they manage to assistant on Bengalese zemindar. On these oceasions great minibers of relations and neighbours ore collected round the recking heads bron, hit back as trophies, which being filled with luquor and food, the Garrons dances.

round them, singing sangs of triumph After thus rejoicing the heads are buried for the purpose of rotting nff the flesh, and when orrived at o proper stage of patternetlan are alog up cleaned of their filth sung and danced runnd as before and then suspended in the hauses of the perpetrature of the musacre It is n mistaken notion that it is o mere nbstract fundaces for human skulls that lasti ates the maintoineers to these atrocities were that the mothe the skills of persons ilying o naturol dro h would likewise be in ilemand, which is not the fact. It ning can sequently be admitted that it is the made at acqui itian by battle sur prise or ambuscoile that stamps in the opinion of the Garrows the value of a Bengalese cranium, which is be sides esteemed in proportion to the rank of its farmer possessor ISIn the skull of a Hundoo factor wha during his life-time had purchased the remindity of Calcomoloopara, was relucil at 1 000 copees and that af Indra Talookdar agent to the Curry barry reminder, at 500 rupces, while the price of a common penannt's was only from ten to twelve supees of deficient weight To this custom of horrding skulls and af making them the circulating med om In large payments 14 ta be ottributed the extremo care with which the Corrows burn to powder the entire lodies of their own people, lest by any occident thaskell af a Gorrow should he passed aff as that of a Bengalese

These doorestie fends would be Immortal if there were not in most tribes a council of chiefs and hend nien, who emileavour ta reconcile off thase af the clon who hove disputes, for it is said they have no right to Inflict any punishment unless a mon be detected in uttering a folselmod before them. The havoe such a regulation would accusian, were it ex tended to their Bengalesa neighbours will be daly appreciated by the Luro pean functionories who miminister justicam that land of mendacity Aniong the Garrows dishonesty and stealing are nat frequent but murder is a

ctime of ordinary occurrence, a Garrow man never being seen without his sword. With this he carves his meat and cuts his way through the forest; and so fond are they of the weapon, or aware of its utility for defence, that they never part with it, even when loaded with the heaviest Their habits of intoxication also occasion frequent crimes. Poor persons get drunk once a month, the chiefs once every two or three days, on which occurrences they squabble, fight, and assassinate.

With respect to religion, the unconverted Garrows of the hills behere in the transmigration of souls as a state of reward and punishment Sall Jung is their supreme god, who has a wife named Manim; but they have no images or temples. In front of each house a dry bamboo with its branches adhering is fixed in the ground, before which, after having adorned it with tufts of cotton. thread, and flowers, they make their offerings. In science they have not advanced so far as to be able to write their own language, but a few on the frontier have learned to write the Bengalese; and although so much cotton is produced in their country, it is only recently that they have begun to practice the art of weaving it.

The particulars above detailed have reference principally to the northern Garrows, between whom and the southern there appears to be no essential difference, except that the latter seem to have undergone a partial conversion to the Brahminical doctrines. The southern Garrows are stout, well-shaped men, hardy, and able to do much work. They have a surly look, a flat Caffry nose, small eyes, wrinkled forehead, and overhanging eye-brows, with a large mouth, thick lips, and round face. Their colour is of a light or deep The women are extremely short and squat in their stature, with masculine features, and almost masculine strength. In their ears a number of brass rings are fixed, sometimes as many as thirty, increasing in diameter from three to six inches

The females work at all the most laborious occupations. Their food is the same as that of the northern tribes, but their houses seem of a superior description: these are named channgs, and are raised on piles three and four feet from the ground, being in length from 30 to 150 feet, by from ten to forty in breadth. props of the house consist of large saul timbers, over which other large timbers are placed horizontally, and the roofs are finished with bamboos, mats, and strong grass The latter are uncommonly well executed, especially in the houses of the bhoomeas or chief men. This dwelling consists of two apartments: one floored and raised on piles; the other for their cattle, without a floor, at one end. The chiefs wear silk turbans, but their apparel is generally covered

with bugs.

These Garrows are said to be of a mild temper and gay disposition, and very fond of dancing. In regulating these, twenty or thirty men stand behind each other, holding by the sides of their belts, and then go round in circle, hopping first on one foot, after which they hop on the other. The women dance in rows, and hop in the like manner. During their festivals they eat and drink to such an excess. that they require a day or two to get properly sober. Marriage is generally settled by the parties interested, but sometimes by the parents. If the latter do not readily accede to the wishes of their child, they are well beaten by the friends of the other party, and even by persons unconnected with either, intil they acquiese, and the drubbing is rarely ineffectual. Among this people the youngest daughter is always the heiress; and the females generally, although they work hard, have great privileges, and in their debates have quite as much to say as If her husband dies the the men. wife marries one of his brothers, and if they all die she marries their father. The dead are kept four days and then If the chief be a highland burned chief of common rank, the head of one of his slaves should be buined

with him; lut if he le a chief of great dignity, a large body of his alarse saily out from the hills and acree a limdoo, whose head they cut off and burn along with the body of their chieflain. The customs of the light rile, who reside at the foot of the Garrow mountaios partake more of the Ilindoo as they will not kill a cow but they worship the tiger.

Such are the people whom a strange concurrence of circumstances has brought in contact with the British nation t and where the two extremes of civilization and the want of it mert the last is sure to succumis As yet, however they are an Independent commonty even the British as soccessors to the Moguls having no claims on their lands far less any reminder onder that government The country from which they have been driven by the Bengalese of Calcomaloopers and Mechpara, con tinues waste, and will probably remain so until the grievances of the Garrows are redressed and their locursions restrained In 1812, Mr. hisson recommended that an intelligreat mature of rank, with one or more deputies should be appointed to the superiotendance of the whole range of Garrow hills and to give efficiency to his office that a small corps, con sixting exclosively of Nucliles, Coochies, Ilajus Rajhungues and other aboriginals, should be placed under him .- (Sisson & Buchenan, D Scott Elliott, 4c)

GALKANA—A town on the sen coast of the province of Canara, twenty-one miles \ by W from Ooors; lat. 14° 32° N., lon 75° 2. E. This place is very much scattered among cocos aut palms and contains about 300 houses, of which one-half are occupied by Brahmins, who es teem Gaukaras on account of an insage of Siva named Mahaboluwara. Aboot six mides north from hence is Gangawall an inlet of fresh water, which separates the Ilindoo geographical tract named Halgo, or I siva from Kankana (Concan).—(F Bucha nam, &c)

GARLYA.—A strong hilly district In the province of Caudeth intill 1818 mustly powersed by the Holear family. The country is fertile and abounds with mountain streams; but when taken possession of by the British government, awing to the Incessant ravages it liad sustained was found in a state of great decolation Besider Gaulus the principal towns are Chandore Loneir Naumpoor and Wuckautry.

GALIVA .- A hill-fort in the proviner of Candersh eighty seven miles I from the city of Aurungabad lat 20° 44 \... lon 74° 33 1.. This fort stands on a high rocky mountain, the top of which is surrounded by a stone and bree wall about a mile in circumference and twenty feet high The entrance from the pettah le hy winding steps well protected by walfa and high towers and the dutance to the top about a quarter of a mile On the cast side there is a high barren hill connected with the first by walls and towers, and completely commanded by it

The town or pettals of Caulna hes closely under the north side of the mountain, surrounded by a mud wall and towers. It was formerly a large place but in 1816, while enlycet to liolear, it had greatly decayed although too strong to be molested by the Bheels or Pindarries To the north-east and west Gaulna la en compassed by high barren hills, but to the south there Is a fine valley bounded by the termination of the western glauts. The fort is abus dantly supplied with water preserved In tanks and the air at the summit Is reckoned salubrious, on account of the dry and atony nature of the od iscent soil It was captured in 1804 by Col Blurray a detachment, but subsequently restored to liolcar 1818, on the approach of the army under Sir Thomas Histor the com mandant and garrison of Gaulan ter rified by the catastropho at Talnere evscuated the fort which at the peace of Mundissor, together with the per gunnah, was ceded to the British go

GAYA

vennment. — (Sutherland, Malcolm, &c)

Gaunsa Laur Isle—A small island lying off the coast of Sumatia, lat. 1' 48" 78, where the party under Capt. Crisp, in A D 1823, ascertained the length of the pendulum under the equator, which, after numerous experiments carried on for nearly three months, was determined to be 3,902,125,994 inches.

GAWELGHUR (Gayalghur or Ghargawil)—A considerable district in the province of Berar, situated about the 21st degree of north latitude, and in 1582 described by Abul Fazel under the name of Kaweel. The surface of the country to the northeast rises into hills of considerable elevation, and is naturally very strong and defensible, the other portion is less hilly, and when under tolerable cultivation very productive, owing probably to the multitude of small streams by which it is intersected.

GAWELGHUR.—A fortress in the province of Berai, the capital of the preceding district, situated on a high and rocky hill, in the midst of a range of mountains lying between the sources of the Tuptee and Poorna rivers; lat. 21° 22 N., lon. 77° 24' E., fifteen miles NW. from Ellichpoor. Fronting the north there is one complete inner fort, where the rock is most maccessible, and this entadel is strengthened and defended by an outer fort, which entirely covers it to the north and west. The outer fort has a thick wall, which covers its approach by the noith from the village of Lambada, all of which walls are strongly built and fortified by towers and rampaits. To the whole of the fortifications there are three gates: one to the south leading to the inner fort; one to the north which leads to the outer foit, and one to the north which communicates with the third wall The ascent to the first gate is very long, steep, and difficult, that to the second is by a road used for the common commumications of the garrison with the country to the southward, but which

leads no further than the gate extremely narrow, the rock being scooped out on each side, and from its passing round the outside of the fort, is exposed to its fire for a considerable distance. Such were the reputed strength and complication of its defences: notwithstanding which it was taken by stoim in 1803, by the armies under General Wellesley and Colonel Stevenson, after a siege of only two days, indeed the facility with which these apparently impregnable hill fortresses are captured create strong doubts of their intrinsic strength, and suspicion of exaggeration in their description. This fortress was acquired by Ragojce Blioonsla, the first about A D 1754, having been previously possessed by a Gond chief. —(5th Register, &c)

GAYA ISLE (or Pulo Gaya)—A small island in the eastern seas lying off the north-west coast of Borneo, about seven miles in circumference, and, being very near the main land, appears from the sea to be an integral portion of its enormous neighbour; lat 7° N, lon 116° 2′ E. Near to Pulo Gaya are many smaller, such as Pulo Pangir, Pulo Piin, Pulo Udar, &c.

GAYA (Gaya).—A city in the province and district of Bahar, of which last it is the modern capital, lat 24° 49' N., lon 85° E., fifty-five miles south from Patna It consists of two parts, one the residence of the priests, which is Gaya proper, the other the residence of tradesmen, &c, which having been very much enlarged and ornamented by M1. Thos. Law, is now called Sahebgunge. The old town of Gaya stands on a rocky eminence between a hill and the Fulgo river, Sahebgunge stands on a plain on the bank of the Fulgo, south from a hill named Ramsila. merly between the two there was an open sandy space called the Rumna or chase, but the court-houses have occupied part of this, and the remainder is taken up by the houses and gardens of the few Europeans at the station. The streets in the quarter named Schebgunge ore wide per feetly strait, and kept in good order althou is not paved, with a double row of trees, learing in the middle an excellent carrage road, with o foot

path on each sule The old town of Gava is a strange looking place but its buillings are much better thon the e of the quarter nomed Sahebgunge the grea er part of the houses being of brick and atone, and many of them two or three stones high, The orchitecture is very singular with entners tor rets and galleries projecting with every possible irregularity streets ore norrow dirty crooked, uneven, and enqualbered with large blocks of stone or protruding angles of rock. The reflection of the ann arays from the rocks by which it is encompassed and from the parched sands of the Fulgo, render Gaya uncommonly hot and in apring it as obscured by perpetual clouds of dust The two atotions composing Gaya during Mr Law a magistracy, were found to contain G 000 houses and it is probable that at least 400 have been since added The whole ere full of population for besides the resident inhabitants there are always many strangers on the spot and the pilgrims ood their followers often omount to several thousands adjacent hill of flamula as well os almost every remarkable eminence in the neighbourhood of this singular place is the theme of mythological legend and the excavations ore besond number Blany of these are vaulted eaverns cut out of Immense masses of solid gramite, the interior surface of which has been highly nolished They orodistinguishoole from the care temples of the Decean and west of India by the obsence of images onel other mythological decorations: although there ore groups of Brahmmeal deities sculptured in rehef on some of the rocks of the base of the hill ond on the ground not far off is an insulated figure of Buddho an a sitting posture of superhuman dimensions

What is called Pritails or the hill

of the ghost is a perpendicular bleck eight or hime feet high, projecting from the summit of a rocky steep peak the ascent to which is difficult Up this hill the pilgrims are led one after the other in the most careless and slovenly monner, by o dirty in onrant priest without the slightest oppearance of respect for the place or the presiding detty. Another at miler lazy and filthy officiator is seen folling with his back against the rock who, without deining to notice them permits the votaries to prostrate them selves and kiss his feet the whole accompanied by the utmost tumult ond bawling for mency by the reli gions mendicanta

The chief Mahomedan place of worship stonds north from Sahely regimes where no the day of the ker belo obout 20 000 persons assemble to celebrate Hossan and Hossen the grandsons of the prophet The monument of Vinnehur bhain in Goya, is also much frequented by persons under the indisence of apprehended danger, and in apring 5,000 persons of the tomb of a saint near kenduya.

At Gaya at present there is no

ot the tomb of a saint near henduya. At Gays at present there is no trace of any considerable building of the least notinuity most of the lmages and even materials appearing to have been brought from Buddha Gova and the universal counten is that five or six centuries ago, Gova os o place of worship was io com parative obscurity when probably the legend now current was invented, ond adapted to the prevailing opi-From this era the number of pilgrims has been gradually increasing: but these devout persons auffered mony checks until Mr Law protected them by new regulations. Prior to this the nilgrims on appropriate Gaya, found custom houses creeted by every londholder or petty officer who had local power sufficient to ex tort contributions These Mr I ow obolished, and having oscertained that four sorts of pilgrimages were usu olly performed he fixed on e certain sum for a license for the celebration of each Deductions are however, made on oll heenses to the Nepaulese

and on the highest heenses to persons who bring water from the Ganges, which class are considered holy,

and are generally poor.

Among the places of minor efficacy in the neighbourhood of the chief sanctuaries was a tank; but a gentleman of the name of Seton having cut a road through it, the water and its reputation disappeared. Mr. Seton, during the operation, having found a lingam or emblem of Siva, gave it to Raja Metraject of Tickary, who placed it in a neat little temple. This entirely satisfied the people, who made no complaint about the violation of the sacred place; indeed the moderation of the Hindoos in this respect is much to be admired. another quarter is a tank named Vaiturani, after a pool near the residence of Yama, the infernal judge, in which the souls of dead persons are boiled, unless they have had the precaution of bathing in the terrestrial pool, or if, while on its banks, they omitted to give a few cowrics to the Brah-

Respecting this celebrated place of worship there are many Brahminical legends, of which the following has the merit of being the shortest, Gaya, an Asoor, grant, and infidel, by severe penance obtained divine favour, and subjugated the three worlds (heaven, earth, and hell) to his power. The demigods, bereft of their dignity, implored the assistance of Vishnu, who entered into a long contest with the Asoor, but could The monster, not overcome him. however, was so well pleased with Vishnu's prowess, that he promised to give him whatever blessing he should ask; and the latter in consequence requested him to descend to the infernal regions. The giant consented, but begged he might be pressed down by Vishnu's foot, which was accordingly done, and the scene of action has ever since been reckoned sacred for the space of several Such is one of the square miles. Brahminical traditions; but the Buddhists ascribe the sanctity of Gaya to its having been either the birth-place

or residence of their great prophet and legislator. The British government has an agent at Gaya, who levies a tax on each pilgrim, according to the magnitude of the sins he has to explate, and of the consequent ceremonies he has to perform. One class, visiting only one place, pays 2; rupces; another, visiting two places, 3; rupces, a third, visiting thirtyeight places, pays 416 rupees; and the fourth class, visiting forty-five places, 141 rupees. The duty to government, however, is but a small part of the pilgrim's expense, for he is fleeced by the priests, not only of all the money he brings with him, but of promissory notes for future payments, which are sent after him when he returns home; the Gayawals, or priests of Gaya, maintaining emissaries for this purpose in the remotest parts of India, which they also occasionally visit on speculation. most numerous votaries are Bengalese and Maharattas; and some of the great chicfs of the latter have been known to expend 50,000 rupees.

When a pilgrim arrives, his gayawal, or spiritual father, conducts him to the darogah, or superintending officer, and explains to him the ceremonies his client is desirous of performing; after which an order. specifying the names of the pilgrim and gayawal, as also of the ceremonies contemplated, is made out and signed by the collector. There are numberless regulations among the Gayawals for the internal management, but they are a sort of freemasonry, the particulars of which have never been communicated to the public, although a translation or abstract would certainly prove cu-rious and interesting. Formerly it was customary for the priest to keep the thumbs of his votary tied until he consented to give a sum proportionate to his circumstances; but the British government has ordered that all contributions shall be voluntary, and the collector of the tax, or the magistrate, will, on complaint, compel the priest to perform his duty, and to accept whatever the pilgrini

chooses to give Persons from a distance are still grossly abused, but the checks imposed have rendered violenco less practicable, and the introduction of the British police sys tem an well established their personal security that the number of these wanderers has been gradually increasing In AD 1709 the number of pilgrims who received licenses to wor ship at Gaya was 21,659; to 1811 it was 31.114 In 1816 the gross col lections omounted to 2,29,603 slees rupees charges 40,000; net receipts, LS2.876 sieca rupece

It is usually supposed that the number of pilgrams and their attendants in unimary years is not less than 100 006; but in times of peace, when visited by any of the great Viaharatta chicftmins, the number probably exceeds 200 000 persons with many horses I nor will twenty lacks of runces defray their expenses in these districts, where many of them so lourn for three munths Indeed the number of crimes that originate in the Bahar district, of which Cara is the capital may in a great measure be ascribed to this vast moltitode of pious and superstitious pilgrams The wealth them persons possess generally consists of money, jewels, and other articles which excite the en pidity of the apprincipled while tha defcoceless condition of the greater number of these stragglers eshibits it to them as a prey of easy acquisition Numerous affrays and breach es of the peace may also be expected where such a number of strangers from all ports of India are promiscuously congregated. Any will these votsnes of superstition gain ooy addition to their prior stock of morals by their intercoorse with their spiritual guldes, the Gayswols who are in general both ignorant and dissolute. and do not affect even the appearance of any self-denial or ascetism of con duct.-(F Buchanan Fullarion, Ila rington, Ward, A Scion, &c )

GERY (or Gibby) ISLE .- An island in the Eastern seas surrounded by a cluster of smaller ones, situated on

the west side of the Gunlo passage, between the 120th and 130th degrees of east longitude. In leagth it may be estimated at twenty fire mlies, by three the arcrage breadth It is in habited, but has never been com pletely explored. The rise and full of the tides here at the springs is only ten feet

GEENGOUL -- A small town or station in Tibet twenty-eight miles & F from the Nitt pass lat 31° 5 \... Inn 80 & E.

GENTIAN (Jaintiva) - A small principality bordering on the British district of Silhet in Bengal and al tunted between 25° and 26° 30' north Intitude On the east it is bounded by Cachur or flairumbo; on the south by Silbett on the west by the Garrow mountains and on the north by Assam Its extreme length from east in west, is about i 00 miles, and extreme breadth, from north to south. about 80 miles

Of this territory, about sixteen miles on the Silhet side and about the same number on that of Assam consist of lowland, resembling Ben gal, but interspersed with small hills About ten miles on the Assum side and five un that of Bilhet, consists of bills covered with thick forest and jungle like the Garrow mountains In the intermediate country, about fifty miles in extent, is an undulating huly table-land, supposed to be from 1,500 to 2,500 feet aborn the plans, and distinguished by the absence of jungle and the comparative coolness of the chimate. It is mostly covered with short herbage clumps of trees thinly scattered and necessionally more extensive woods of fir and other trees; the whole space apparently well adapted for pasturage. It is however but very thinly inhobited. and except a few yams and ather roots presents an aigus of cultiva Gentiahpoor, the capital, is situated about twenty miles to the north of the town of Silbet rirer Capill, which joins the Brahma putra a little above Rangamatty is the chief stream The principal produce is lice and cotton, and a coalse species of silk from the wild silkworm, named thisser. Iron, limestone, and coal are among its minerals and both elephants and ivoly are exported. The hills are generally barren, and do not yield any valuable timber.

The natives of the country call themselves Cossyahs (Khasiyahs), and it is by this name they are distinguished among the mountain tribes Their features partake more of the Tartar than Hindostany, and then language marks the line where Sanscut ceases to form the hase of the eolloquial languages Of the thirtytwo words that compose the Lord's Prayer in their language, more than half are monosyllables used in the Chinese, while searcely three words resemble, even in sound, the language of their Bengalese neighbours. They have no original written characters, but their chiefs use those of Bengal, the dialect of which province is gradually becoming more prevalent, and will ultimately supersede the Cossyah. Before their intercourse with Bengal they were devoid of caste; but within the last half century the Brahminical doctrines have made such progress that most of the leading men have adopted them, and been classed by their spiritual instructors in the khetri, or military tribe Their principal deity is Jayenti Iswara, but many worship the whole Hindoo pantheon, and at the same time endeavour to mollify revengeful evil spirits by human sacrifices.

The Gentiah territory, notwithstanding its limited extent, is governed by many petty chiefs, rulers over one, two, or three hills, whose obedience to the raja is little more than nominal. Their domestic feuds are consequently incessant, their manners barbarous, and condition apparently so miserable, that nothing but a superstitious attachment to the soil prevents, the lower classes from migrating into the neighbouring countries under the British government, where there is abundance of uncultivated land.

In 1822 two persons were sent from the Gentiali country to kidnap a Bengalese for a human sacrifice. miscreants were employed by Gentiah Kooalee, the raja's sister, or sister's daughter, and wife of Oochung Ram Khant, who wished to propitiate the deities Cali, Genti, and Durga, to grant her husband's prayers for the pregnancy of his wife, whose son, by the Cossyah laws, would be herrapparent to the throne The messengers were caught and committed to prison by the Bengal police before they had executed their errand, and the matter reported to the Supreme Government, which sent a letter of nemonstrance to the Gentiali raja In 1824 Ram Singli, the reigning clines, was about sixty years of age, and never having been married, his heir-apparent was a grand-nephew, the rule of succession, as with the nairs of Malabar, going solely in the When visited by Mr. female line. Scott, of Rungpoor, in 1824, his army consisted of 150 miserably equipped Hindostany sepoys, to which, on an emergency, it was supposed he could add 5,000 of his own mountaineers Notwithstanding the very savage stage of civilization which Gentinh presents, its natives are able to construct bridges and erect monuments with stones of an enormous weight. Near to the town of Gentiah, in A D 1774, an action was fought by a detachment of British troops and the forces of a native chief.—(Public Journals, Public MS. Documents, F Bu-

chanan, &c)
GEORGE TOWN—This is the capital of Prince of Wales' Island, otherwise named Pulo Penang It is bounded on the north and east by the sea; on the south by an inlet of the sea, and on the west by the high road The streets are spacious, and cross each other at right angles—See Prince of Wales' Island.

Gerar —A small town in the province of Allahabad thirty miles 5 by E from Teang, lat. 24° 18' N., lon. 78° 54' E

Geroli.—A small town in the pro-

vince of Allahairul twenty miles 5 W from Jentpoor; 1st 226 7 N lon 742 20 1

Guassa.—A town in Bootan the capital of a direct and head stati in of the aconpoor or provincial giver nor; lat 27° 50° N. lon 89° la I, twenty three miles W. lis N from Tassaudon. The highest mountals in this neighbourhood net covered with annw throughout the year and are swille nlong the northern fronter of Bengal from Cooch Balant to I ar neah and at the lase of the loftlest is a spring of water so lost as scarcely to admit of lusting.—I water fee

GHALTS FASTERN -The chain of hills commanly described under this appellation commences in the south about lat 11° 20' \ to the north of the Carery and extends with little interruption or comparative deviation from a straight line to the lanks of the Arohas, in lat 16" \" separation the two Carnstict: the one named the Carnatie Halighaut or above the chauts (the true Carnatle); the other the Carnatle Paycengiant, or below the chauts extending along the coast of Unromandel The term ghaut properly signifies a pa a through o range of high hills but the came has been transferred to the mountal nous chains that support the central table-land is the south of India

The exact height of this ridge along its whole course has not been nicer tained which is rather estraordinary a but its ceneral elevation is known to be considerably less than that of the Western Ghauts About the latitude of Madras which is the lunkest part it is estimated at 3 000 feet and the table-lond of Bangalore towards Ooscottah which is within the chain is more than 3 000 feet above the level of the sea. As the rivers that have their sources in the opper table-land universally declino towards the east It proves the superior elevation of the western ghauts and they are by far the most abrupt in their occut geology of these mountains is very imperfectly known; but the chief rock is said to be a gramte consisting

offeldeparand quarte with dark green mica in a small proportion to the other two ingredients The rocks appear stratified but the strain ore very much broken and confused The country above the ghauts about Naskau I ray, rives into awells like tho lond in many parts of I ngland and le overlooked by the ligh barren peaks of the ghants which close the siew to the critward The soil between \aikan I ray and \incatigherry le very poor and covered with copie having a few large trees Intermised The whole of the copse land serves for pasture of an inferior sort and the bushes supply the natires with fiel for domestic purposes and for tha smelting of Iron About two miles above Sailan Fras a torrent in the rainy season brings down from the hills a quantity of Iron ore in the form of black agnd which in the dry season ly smelted

The tops of the hills near the Vel lore road by Sautchur, are covered with large stones among which grow many trees and shruhs with occa sionally a tamarmil tree of ereat a.e. and aire The scenery here exhibits a great contrast to that about Madras the whole country being unfulated with a few loft; devolated peaks the whole appearing very barren, and without any extensive forests pass has been widened and levelled since the conquest of the Mysore In Artillery can now asceed lt with little difficulty which was not the case when Lord Cornwalls made his first and innuccessful attempt on Seringapitam The trangullity co joyed by the Mysore and Cornotle since the final extinction of Hyder a short lived Viahomedan denasts, hos increased the importance of an easy communication between the two countries -(F Buchanan, Lord | a lentra Rennell Se )

GRAUTS, WEAVERS —This chain is liestler defined than the other as it leatened from Capa Comorin to the Tajuee or Surat river where however it does not terminate in a poist or promaintory but departing from

its meridianal course, it bends eastward in a wavy line parallel to that river, and is afterwards lost among the hills in the neighbourhood of Boorhanpoor. In its line along the Tuptee, this ridge forms several gliauts or passes, from which there is a descent into the low land of Candeish. In their whole extent the Western Ghauts include thirteen degrees of latitude, with the exception of a break in the ridge, about sixteen miles wide, in the latitude of Paniany, through which the river Paniany flows to the Western Occan from the province of Their distance from Coimbatoor. the sea-coast is seldom more than seventy miles, commonly about forty; and they are frequently visible from the sea, to which, between Barcelore and Mirjaoa, they approach within six miles

The Western Ghaut mountains are in general from 2,000 to 3,000 feet higher than those of the Eastern Ghauts, and several are from 5,000 to 6.000 feet above the level of the The peak of mount Subramani, on the frontiers of Coorg, has been estimated at 5,611 feet. This altitude is sufficiently great to prevent the body of the clouds passing over them, and accordingly the alternate NE. and SW. winds (called the monsoons) occasion a rainy season on the windward side of the mountains only, and the greater the height of the chain at any given point the more complete is the division of the climates. In some parts of the Concan and Malabar province west of the ghauts, 130 inches of rain have been ascertained to fall in one year, mostly during June, July, and August, while the contiguous provinces of Bejapoor and Mysore, during this deluge, are only visited by gentle showers. This cause ceases to operate in the parallel of Surat, where the SW. wind, no longer opposed by a wall of mountains, carries its supplies of moisture without interruption over the whole surface of the country. The extensive region above the ghauts is called a table-land; it is not a regularly flat level country.

being on the contrary in many parts studded with hills, and in others mountainous.

The Western Ghauts about the fifteenth degree of north latitude, although steep and stony, are by no means rugged or broken into masses of rock. The stones in the neighbourhood of Cutaki are buried in a rich mould, and in many parts are not seen without digging therefore of the naked, sun-burnt, 10cky peaks so common in the Eastern Ghauts, there are here fine mountains covered with stately forests of poon, teak, and other large timber. There are nowhere finer trees, nor any bamboos that can be compared with those that grow in this portion of the Western Cordillera ground rattan also abounds in the woods and grows to an enormous size, a specimen having been procured 225 feet in length, and thicker than any Malacca cane. The difficulty formerly experienced in ascending these monutains from the Malabar and Canara provinces, may be estimated from that which the Bombay army had to surmountin December 1791. On that occasion two days were spent in dragging up twenty light field pieces two miles, and three weeks to bring up fourteen guns (none heavier than eighteenpounders) with their tumbrils, to the top of the Gliauts.—(Rennell, F. Buchanan, Fullarton, Moor, Dirom, Colonel Lambton, &c)

GHAZIPOOR.—A collectorate in the province of Allahabad, zemindary of Benares, situated about the twentysixth degree of north latitude. the north it is bounded by the Goggra, on the south by the Ganges; to the east it has the Goggra, and on the west Juanpoor. It has long been celebrated for the excellence of its rose-water, and being also well supplied with moisture, may be noted as one of the most fertile subdivisions of Hindostan. The chief towns are Ghazipoor, Azimpoor, and Dooryghaut.

GHAZIPOOR —A very large town in the province of Allahabad, the ca-

pital of the preceding distract, satuated on the north side of the Ganges, forty-one miles NE from Becares; lat 23° 35 N., lon 83° 33 E This town is extensive and within the su perintendence of the poice office there are so less than 300 villages all swarming with a population noted from time immemorial for their refractory spirit and turbulent habits.

At one end of Ghazipoor is a pajace (which formerly belonged to Sandit All the deceased nobob of Oude) overhanging the Ganger, here flowing in a wide bed and with a alow current; and there are also cantonments for three regiments of earsity and a branch of the government stud On a plain not far from these, an elecant mausoicum in the form of n Greeian tempie has been raised to the memory of the Marquis Corn-walks, who died here while on his way to the upper provinces. It is entirely constructed of large blocks of Chunar free-stone without the interrention of any wood, cost one lack of rupees and consumed lifteen years in its erection; yet it appears aninsignificant structure when placed in comparison with the meanest of the sepulchral edifices bequeathed to posterity by the logui emperors.

The government stud in 18.23 was remarkably flourishing 400 most aspectior horses bred] here having that year been passed into the cavalry service by the stod committee of which number 147 were chargers. The inferior horses sold for large prices in Calcutta, and were driving tha Araba out of the market—(Fullarton, Public MS Documents, Looke, &c.)

Gueacone (Girigrama /—Atown in Assam attusted on the Disho river which falls into the Brahmsputza river from the south. This place was for many years the capital of Assam but since the iosurrection of the Mahaman (or Monmares) priest and his rabble the city, palace, ond fort, have continued a heap of runs. In old maps it is also named Ger. In old maps it is also named Ger.

gong Gurgown and Kirganu. -

GREALAS (Ghirry, flowing from a Mountain J-A fortress in the province of Bejapoor, astuated on a promontory of rocky land in the Coocan district, about one mile and a quarter broad and eighty two miles N.N W from Goa lat 16° 30' N., ion. 73° os L. This rock is joined to the continent by a narrow neck of land, and lies one mile from the entrance of a harbour formed by the mouth of a mer that descends from the Western Chauts. In AD 1707 Consider Angria established on Independent sovereignty at Gheriah, and possessed o numerous piratical ficet. In 1756 it was taken by Admiral Statson and Colonel Clive, and all the reigoing Angria a fleet destroyed. -(Orme, Bruce, Ge)

Gutonozz (Gidhaur )-A town formerly stood here and it is still marked in the best maps hat it has loog reased to exitt; lot. 21° 52' N., lon 86° 10' E. thirty-seven miles S.S.W from Monghir It is now only remarkable for the ruins of an old castle said to have been huit by Shere Shah the Patan who expelled Humayoon the father of Acber, and became Emperor of lindostan, and founded a short fixed dynasty fortress (called Anologea by the sur rounding peasantry) is huried to jun glo near the foot of a wild and rugged precipice and so commanded by the adjacent height that Shero Shah after it was completed ordered it to be abandoned What ot present remains, consists of a wall ruddy built of uncut stones from the neighbouring mountains and very ill put together At the middle and angles these walls are twenty three feet thick of the bottom and about seventees at the top, and seem originally to have heen about thirty feet high, without a ditch and solely odapted for the use of massile weapons. At Gliddore the plains of Bolior terminote. and the country begins gradually to ascond as the traveller proceeds eastward The Ghiddore raja resides at Dumree, a small village on the Kewlee Nullah, fourteen miles S.E. from this site which is wholly destitute of inhabitants

As illustrative of native manners, the following description of the personal habits of the two Gluddore rajas in A.D 1810 may be inserted First, Raja Gopaul Singh, a fat heavy man, forty-mne years of age and very His usual practice was to rise civil. He took forty minutes to early. clean himself, after which he sat in his office until noon attending to bu-He then prayed, bathed, and eat, the whole occupying about an hour and a half, after which he slept. In the evening he sometimes went out to hawk, after which he cleaned himself again and prayed, both of He then which employed an hour. again sat in his office until nine in the evening, when he retired to the inner apartments to eat and sleep Second, Raja Neiblioy Singh, a thin timid man about forty-two years of He rose early and took about fifty minutes to clean himself, after which he sat in his office until noon. He then washed and prayed for about forty minutes, eat for half an hour, and then slept for an hour and a half. After this he talked with his chief officers, or with men of learning until sun set, when he cleaned himself and prayed for about forty minutes. He then sat until ten or eleven o'clock, listening to legendary tales recited by the pundit, after which he withdrew to his inner apartments to wash, eat, and sleep — (F. Buchanan. Fullarton, &c)

GHIZNI —A celebrated city in Afghanistan, once the capital of a powerful empire, lat 33° 10′ N, lon. 66° 57′ E. The surrounding country being considerably elevated above the level of the sea, the climate is so cold as to have become proverbial, being described as intense even by the natives of the adjacent cold districts. For a large proportion of the year the inhabitants seldom quit their houses, and even within the city of Ghizni the snow has been known to lie deep

for some time after the vernal equinox. Traditions also prevail of immense falls of snow which buried under it the city and its inhabitants. The climate of the flat country to the south of Ghizni is scarcely more mild than that of the city. In Kuttawauz the snow lies very deep for three months, and when hardened by the frost is capuble of supporting travellers. ing part of the winter the streams are frozen so hard as to bear the weight Towards the north of of camels. Ghizni, however, this excessive cold decreases, until the Kohistaun north of Cabul is approached, when it again The surface to the becomes severe west of Ghizni is interspersed with low hills, and, except a few cultivated spots, produces little else than a prickly aromatic weed on which camels feed with avidity, and which, with paste of unsifted barley, constitutes then chief food, yet these animals will carry a load of 800 pounds English The summer 15 hardly so warm as that of England, and admits but of one harvest

Ghizm continued the capital of a powerful empire for nearly two centuries, and a city of importance for nearly two more. The first sovereign was Nassi ud Deen Sebuctaghi, who ascended the throne A D 975, and invaded Hindostan repeatedly.

d s

997. Emir Mussood began to reign.

997 Sultan Mahmood 1028 Sultan Massood. 1041 Emir Modood.

1049 Aboo Jaffei Massood

1051. Sultan Abdul Rasheed.

1052 Ferokh Zad. 1058 Sültan Ibrahim.

1098. Allah ud Dowlah.

1115. Arsalan Shah

1118 Byram Shah

1152. Khosi u Shah

1159 Khosru Mallek, and

A D 1171, Saheb ud Deen Mahomed Ghori, who subdued the empire of Ghizni, expelled the dynasty of Sebuctaghi, and buined this then magnificent capital to the ground. The surviving members of the dethioned family retired to Lahore, where they continued

to reign for some time, but about A D 1185 became extinct. For many years afterwards Ghlznl was known as a principal city but It subsequently declined to a secondary rank, and at last to total insignificance

In 1809 Ghizal was reduced to a town of about 1,500 houses besides d pettah or extramural suburb atands on a height at the base of which flows a river of some size is encompassed by stone walls and contains three bazars of no great breadth having high houses on each side, and there are also some dark and narrow atreets. In the neighbourhood same remains of its sament grandeur are still to be seen particularly two lofty minarets each above 100 feet high The tomb of the great Sultan Mishmood is still extant about three miles from the city and is a spacious hailding covered with a cu pola, but not magnificent Tho doors which are large, are of sandal-wood and sald to have been transported from the temple of Somnauth in the Gu Jerst peninsula. The tomb is of white marble on which are sculptured verses of the Loran and at its head lies the plain but weighty made sald to have been wielded by tho interred monarch t it is of wood with a leaden head so weighty that few have strength to use it. There are also within the tomb some thrones or chairs inlaid with mother of pearl and said to have belonged to Vishmood The tembatone is under a canopy where some mouliabs are still maintained to chaunt the Koran aloud over his grave and on account of the number of holy men lying here entombed, Ghizni is emphatically called by the Mahomedans the second Medina.

Among the lesser runs are the tombe of Beloit the was, and of His-lam Suns, o poet of celebrity; but mothing remains to point out the Ghiznavi palacet, once the residence of Ferdous or of the mosques, boths and caravanears that once or-disinct this oriental metropolis. The most useful antiquity now to be seen is an embankment built by Mahmood across in stream which was much darcoss in stream w

maged on the destruction of Ghizm be the Ghori sultans vet it still sunplies water to the fields and gardens Some few lindoos raund the town arosettled here who carry on a small traffic and supply the wants of the Mahomedon residents. The Immedi ate environs of the city are inhabited by Tsiiks and Hazarehs and the cootiguous valley to the north belongs to the Wurduks; but the country between the hills which bound that rai ley on the cat ond the Solman mountains are inhishated by Ghilper Travelling distonce from Cubul eighty two miles t from Dellu 917 miles. (Liphinstone, Foster Rennell Man rece de)

Gios.—A town in the province of Arracen, division of Tonkhuem slitted about 112 miles south fram Sandowy This was once a consider able town but has been for some years on the decline and in January 1827, contained only eight houses. Aren then however it showed symptoms of reviral, as traders from Basern and opposite side of the Yamadong mountains were beginning to resort to it.—(Public Januals, de)

GHRONA.—A small town in nor thern Hindosten thirteen miles north of the Chorn station; lat 31° 2' N., len 77° 28 E

GROBARIIA OT .-- A town and zemin dary in the province of Bengal district of Dinagepoor ninety miles A E from Moorshed-bad, lat 25° 13 N lan 89° 10' L. This zemindary, which In 1784 contained 632 squore indes in A.D 158. Is described by Abul Fazel as producing raw silk gunules (sack-cloth), and plenty of Tanyan At an early period after the horses Mahomedan invasion it appears, along with several others in this quarter tu have been bestowed on different Af ghan chiefs who colonized in them, and received accessions of their coun trymen from abroad, Being zealous converters of the Illadoos, and not very scrupulous as to the means, o very large proportion of the inhabi tants to this day profess the Mahomedan religion, and dignify themselves with the Arabian title of Sheik. process of time the Ghoraghant zemindary was seized on by the Kakeshelan tribe of Moguls, but for many years past it has reverted to its prior owners, the Hindoos. From the traces of rums still visible the town of Ghoraghant appears at one period to have covered a great space, but it is now almost restored to the condition in which it probably existed liefore the Mussulmann conquest, being hursed in woods and jungles, with tigers prowling about the streets. The most remarkable monument is the tomb of Ismael Ghazi Khan (a holy man and good officer who first subdued this tract), which is much feared and respected both by Hindoos and Mahomedans; and although nearly rumons, has still a small canopy hung over it - (F. Buchanan, J. Grant, Stewart. &c \

GHOUSGIUR.—A large fortified town in the province of Delhi, twenty-seven miles south by west from Saharunpoor; lat 29° 34′ N, lon 77° 27′ E. This place was the residence of Nijib ud Dowlah, an Afghan chief, appointed prime minister to Shah Allum by Ahmed Shah Abdalli of Cabul, and of his son Zabeta Khan, who conducted the Doab canal from the foot of the hills to this place.

GHUNGAGHUR.—A small town in Northern Hindostan, twenty-three miles S.E. from Serinagur; lat. 29° 53′ N, lon 78° 58′ E.

GHUNPOOR.—A district of considerable size in the province of Hyderabad, due south of the capital, but, notwithstanding this vicinity to a large market, scantily cultivated and thinly The town of Ghunpoor inhabited stands in lat 16° 33' N., lon 78° 8' E., sixty miles S.S W from the city of Hyderabad. It is a fortified hill, and must have formerly been a place of considerable consequence as the mosque is one of the largest and best constructed in the Nizam's dominions It is now, however, mostly used by travellers as a place of repose, and

nttended by only one solitary fakeer. Numerous proofs remain that the country was once more populous and better cultivated than it is at present, traces of ruined towns and villages being still visible, as also the marks of former land divisions,—(Heyne, &e,)

GHYRETTY.—A small town in the province of Bengal, near the river Hooghly, situated on the high road from Scrampoor to Chandernagore. Glivretty house was formerly the country residence of the governor of Chandernagore, but fell from its state of splendour with the decline of the French. On the opposite side of the river is the village of Pultali, and here is the common ferry, where travellers proceeding from Calcutta to the upper provinces usually cross the river.

GHYSABAD—A town in the province of Allahabad, seventeen miles E N.E. from Huttah; lat. 24° 13′ N, lon. 79° 51′ E.

Giaritchas Isles—A cluster of five small islands in the Eastern seas, lying about six miles S.S.W. from Makiam; they are of middling height, and contain many bare rocks, intermixed with green spots and trees.

GILION ISLE —A small Island about thirty miles in circumference, lying off the east end of Madura Isle, lat. 7° 5′ S., lon. 114° 40′ E.

GILOLO ISLE (or Halmahera).—A large island in the Eastern seas of a most fantastical shape, consisting of four limbs or pennsulas, separated from each other by deep bays. It has between the parallels of three degrees north and one south latitude, and may be estimated at 220 miles in length, by thirty, the average breadth, giving an area of about 6,600 square miles.

This island is naturally very fertile, and abounds with bullocks, buffaloes, deer, goats, and wild hogs, but few sheep The inhabitants subsist mostly on the sago or libby tree, which, like the cocoa-nut tree, lias no distinct bark that peels off. It may be described as a long tube of hard wood,

about twn unthes thick, containing a judy or path intermised with longing timal fibres of from 900 to 400 pounds weight, from this pith is procured the sage floar which is the general food of the inhabitants. It is said that east of Goldot there are not any horses, harted ontile in sheep

While the Dutch inflornce existed mmong the I les to prevent the smug gling of spices they discouraged the inhalatante of Gilolo from tending with Celebes Bouro Oly Ceram My sol and Salwatty, and also rooted out the spices in places of ea y acress, or near the sea. They also forbul the manofactoring of cloth but the natives continued to make it procuring their cotton from Bally and the Ban gers country la 1774 the northern part of Gilolo belonged to the sultan of Ternate Ossa, a town situated on the south side of the great hay of that name lat. 0'45 lon 125'22'l affords many conveniences for ships, as they roay there be supplied with unter provisions, spars, and other necessaries, in this bay there are olso several villages that of Columns in 1403 was destroyed by the Dutch The imports come principally from the Dutch settlements and the adjacent lafand and consist of opuum coarse cutlery piece goods china ware and front the esports are spices luche de mar l'ini-nests, tortouseshell seed pearl and sago

In A D 1531 the Ling of Gilolo, tho Papuas, and the princes of tho Mininees Isles formed in a league to extermionte the Portuguese and suc cceded in massacreing o considerable number; but we have no information regarding the modern history manners and customs of this island which lins long been wholly under the influence of the Dutch whose colonial policy is always mixed ap with mystery and concealment Gilolo (with Ceram) is remarkable as being apparently the eastern boundary of Asiatle civilization (such as it is) where the anjerior races of the ani mal man stop and the mop-headed Papuas and South-Sea islanders begen - (Forrest Tharn, Crowfurd, ye)

Cincer (Jimje) - A celebrated for rees in the Carnatic thirty five nules \ W from P milicherry ; lat 12 12 \ Inn 70° 25 } tifications here cover the summits and o great 1 art of the dechrities of three detached rocky mountains of sees difficult aveent from 100 to 000 fret lugh, connected by lines of works that enclose an extensive triangle In the plain between them divided by onother fortified intrict into on outer and inner luner furt tives of In in who esteem no fortifi cations very strong unless placed on in h und difucult eminences, havo olugis regarded Gin, ceas the strong est fort In the Carnatic it has how ever, been captured repeatedly and was always noted for its insumbrity In 1820 the walls of Cince did

not contain n single inhabitant and the pettah without was reduced to twenty or thirty ninerable but with the shops of two or three Boo-The walls gates and bastions were still however, remark ably entire and the runs extensive and interestion, more especially the singular seven-storied tower of the palace of the ancient rajas in the lo ner fort ; the paroda of the base of St George's mountain green with peopol branches and ereepers the two great magazines the oronque onil tho castellated palace Best les these the Choultry on the open of the I nalish mountain the works and buildings on both eminences and the sent ex caration and savage scenery of the Devil a Tank are worthy of atten tion Gingee has not been garrisoned for o very long period and many parts of its interior are wholly choked up with jungle

This fortress was either built or improved on on old foundatinn of the Chola kings by the son of Vigon Runga haik the governor of Tonjore, in AD 1442 ond was auccessively strengthened by the Mahomedans of Bejapoor, who possessed it from 1020 to 1677 by the Maharatins who ield it from 1677, when it was taken by Serage during a sudden irripition into the Cornaire until 1698. At the

date last-mentioned it was besieged and taken by Zulficar Khan, the imperial general, and Rajpoot governors being appointed, they affected independence, and assumed the rank of rajas. In 1715 it was held by Saadet Oolla Khan, and in 1750 was taken by surprise, during a night attack by the French, under M. Bussy. After the eapture of Pondieherry, it surrendered, in 1761.—(Fullarton, Wilks, Orme, &c)

GIRDURTOOR —A small town in the province of Ajmeer, division of Harrowtee, which in 1820 contained about 1,500 inhabitants. It stands in a very secluded spot, without any carriage-road, and even the footpaths rugged and difficult, fourteen miles east from the Odeypoor fortress of Bansrar.—(Malcolm, &c.)

GIROUT.—A town in the province of Agra, forty-nine miles east from the city of Agra; lat. 27° 12' N., lon. 78° 40' E.

Girre River.—A small river of Northern Hindostan, which traverses the principality of Sirmore, and falls into the Jumna at Rajghaut; lat. 30° 26' N., lon. 77° 38' E.

GITHERHAW.—This village stands near the common boundary of the Gundwana and Allahabad provinces, seven miles south from the town of Selyah, and in 1820 belonged to the Nagpoor raja.

Goa (Govay)—A city in the province of Bejapoor, the capital of the Portuguese possessions in India; lat. 15° 30′ N, lon 74° 2′ E, 250 miles S.E. from Bombay. This appellation is applied to two distinct places, viz. Old Goa, here described; and Panjim or New Goa, situated five miles nearer the entrance of the harbour—(For the latter, see Panjim.)

The once splendid and populous city of Goa is now a wilderness, of which the monasteries form the only tenanted portion, and a few miserable-looking monks, half of them natives, the only inhabitants. Indeed the city may be traversed from one extremity to the other without meeting a hu-

man being, or any other signs of former population than pavements overgrown with grass, gardens and court-yards choked with underwood, and princely dwellings and venerable abbies mouldering rapidly to decay. The chief religious edifices that still remain in tolerable prescryation are the cathedral, the churches of St. Caetan, St. Pedro, and St. Domingo, the church and monastery of the Augustins, and the church and monastery of the Jesuits. The last of these possesses the reliques of St. Francis Xavier, his body being interred here in a sepulchre of black marble, richly sculptured in bas-relief, representing divers passages of his life. The church of St. Caetan surpasses the others in architectural elegance. In 1820 there was still a convent of nuns, containing about thirty inmates, and the arehbishop of Goa continued to perform service at the cathedral, although he resides at St Pedro. The building formerly occupied by the Inquisition is entire, but has been shut up for many years; and close to the esplanade, which is the common landing-place, stands the ancient palace of the viceroys, long unoccupied, and now going fast to The principal entrance to the city is by a gate adjoining the palace, over which, in a niche, is the statue of Vasco de Gama, barbarously painted in imitation of life.

Goa was taken from the Hindoo rajas of Bijanagur by the Bhamenee Mahomedan sovereign of the Deccan, about A D. 1469, and in 1510 was besieged and taken by Albuquerque, on which event he strengthened the fortifications, and made it the capital of the Portuguese dominions in the He was recalled in 1518, at which period the Portuguese power in India had reached its greatest height, and from that time declined It does not appear that they ever possessed any considerable extent of territory, although they maintained a large army of Europeans; and they may be said rather to have disturbed and pillaged India than to have conquered it, or carried on any regular commerce In A.D 1580 the Portuguese powersed the following places io In dis riz. Diu Damaun Chon! Batseln, Salsette Bombay and Gon. They had factories at and influenced the government of Dabul Onore, Barcelore Mangalore Cananore Ca licut, Cranganore Cochin, and Quilon They had several establishments in the maritime parts of Cerlon, and factories in the bay of Bengal at Masu lipatam Aegapatam, and St. Thome, with commercial stations in the provioce of Bengal In addition to these they possessed the city of Malacca, and had trading factories lo the coun tries that compose the modern Bur mese empire, and Butish district of Chittagong. Io the Eastern Islanda they had many establishments enjoyed the trade of the Spice islands and a coouderable intercourse with Japao and China but did oot acquire Macao unul 1580,

After the conquest of Partues! In 1580 by Philip the Secood of bosin, the connexion between the Portu guese settlements and the mother country was very much loosened, and the intercourse abnd ed. In the three years (1620 to 16.3) that Hernan de Abuquerque was viceroy, ho never once received ony letter of instrue tion or information from the court of Spain; the colonies must convequently have been supported entirely from their own resources, while in volved in a destructive war with the Dotch The vices of their Internal government, ood exorbitant power of the priests, assisted to accelerate their decay The viceroy never had any power over the Inquisition and was himself liable to its censures. Towards the conclusion of the French revolutionary wor, the acttlement seemed again abandoned by the mo ther conotry and the poverty of the Johabitants became extreme, many females of the best families being compelled to earn o scanty subsistence by making lace or artificial flowers, and working musina While the Portuguese European trade last ed it was carried on entirely on oc count of the king there being no re-

cord of any voyage from Portugal to India on account of Individual Por tuguese merchants

Including the islands the Portu guere atill possess territory in tho neighbourhood of Gor, forty miles in length by twenty in breadth; but the viceroy and chief inhabitants reaide entirely at Panjim or New Goa In 1805 it was estimated that within the abore tract there were 200 churches and chanels, and abore The dialect mostly 2,000 pnests prevalent la a mixture of the Europesn with the Canara and Maharatta languages; but the Furopean Partoguese is also understood by o great majority At present, except ing a very few of the highest classes, the creat ms s of Portuguese popul lation throu hout India are the spu rious descendants of Furopean set tiers by native women; and the no meroos converta that have folned them the last still retaining many Pagan customs and predilections Io 1820 the Portuguese force atationed at Panjim and other places was barely sufficient for the purposes of police; yet it was principally through their agency that two revolutions (constatutional and regal) were effected without bloodshed to 1821 22 Aren under all these disadvantages, tho expenses of the government are said to be entirely defrayed from the local revenues derired chiefly from cocoa-nut plantations and port-duties Besides Gon the remaining Portu guere possessiona in India are Da maon Diu Macno in China, Dhella, on the island of Timor, also establishmenta on Sumbhows, Floris, and some others of the Eastern Jales Travelling dictones from Pooos, 245 miles; from Bombay, 292 from Delhi I 158; and from Calcutta 1,300 miles,-(Fallarion, C. Buchanan Bruce, &c)

Go.ec.—A town in the island of Celebes, the notive capitol of the Macassar country, which is sometimes called the kingdom of Goack Lat 5°13 N Ion 110° 21′E In AD 1512 subsequent to the arrival

of the Portuguese, the Malays were allowed to build a mosque at Goack, the natives not being yet converted to the Mahomedan religion. In 1778 this city was taken by assault by the Dutch, the fortifications razed, and the government new modelled. Prior to this event, the sovereign of Goack was not despotic, but was obliged to consult his nobility regarding the performance of any important regal function, every township having a chief nearly independent — (Stavorinus and Notes, Marsden,  $\delta e$ )

Goahati (the cow market).—A small town in the province of Assam, situated on the south side of the Brahmaputra, seventy-three miles east of Goalpara, lat 25° 55′ N, lon. 91° 40′ E. This was once the capital of the ancient Hindoo division named Camroop, which included great part of Assam, but is now in a very miserable condition.—(F. Buchanan, &c)

Goalgunge —A small town in the province of Allahabad, twenty-one miles S.W. from Chatterpoor; lat. 24° 43′ N, lon. 79° 22′ E.

Go ILPARA (Govalpara )—A town in the province of Bengal, district of Rungpoor, situated on the south side of the Brahmaputra, 170 miles N by E from the city of Dacca, lat 26° 8' N, lon, 90° 38' E This place contains some good houses, and a street of shops, which in this remote and barbarous region excite great admiration among the rude tribes in its The number of houses that vicinity may be considered as belonging to the town amount (1809) to about 400, most of them miserable huts, and with the exception of a few, regularly surrounded by the floods for above two months in the year, so that the only massage from house to house is in boats; and inside, the floors are covered from two to three feet deep with water In other respects, also, this place exhibits a squalid scene of vice and misery Goalpara is, notwithstanding, a place of considerable resort, and the principal mart of the

intercourse with the Assamese, who bring here coarse cloths, stick-lac, tar, way, and occasionally gold to barter. Salt is the article they usually take in return, but it is delivered to them much adulterated Neither has this traffic hitherto been so considetable as might have been expected, owing to the disorderly state of the Assam country, and the barbarity of its chiefs, who formerly were accustomed to settle their unadjusted accounts by the assassination of their cieditors. Recently, however, a great change has taken place in this quarter of Asia, by the expulsion of the Burmese in 1824, and the protection since bestowed on this distracted country by the British government, has had the effect of completely tranquillizing A great micrease of commercial intercourse, therefore, may now be expected, not only with Assam, but also with the hitherto unknown nations far beyond its limits

There are a few families of Portuguese Christians scattered over the Rungpoor district, but at Gonlpara there are as many as twenty termed Choldar, which seems a corruption of soldier. None of them can either read or write. only two or three know a few words of Portuguese, and they have entirely adopted the diess of the natives The only European customs they retain are, that the women curtsey, and the men shew by a motion of the hand as they pass, that if they had a hat they would take it off. Notwithstanding the absence of this distinguishing covering, the men retain some portion of European activity, and are much feared by the natives, who employ them as messengers in making a demand, such as the payment of a debt, to a compliance with which they think a little fear may contribute The females gain a subsistence chiefly by scuing and distilling spirituous liquors, of which last article the men consume as much as they can afford, and retul the remainder Concerning the Christian religion they appear to know little or nothing, nor have they any priest. Sometimes they go to Bowal

near Dacer in neitr to procure a priest to marry them; but in general this is too expends e and they content themselves with a public seknow led-ment of their marriages

On a hill near Goalpara there have been several buildings of brick arparently of a religious origin the cast alde of the hill near the el ser le a mece of grantte on which le carrel a foure of Buddhs, which the people worship and name hira 18trs a Brahmin from the west of India, who ha I formerly been a mer chant, was reported in have found a sum of money, which fact how ever, he dealed. In can equence of a dream to built a small place of worship on the hill, and endeavoored to living Its sanctity Into repute ; but although he bired persons daily to went naked and performed otherwise many extravagant actions, he did not succeed; not could be by all these exertions establish his character as an idiot (demana), a being much veperated in the east but continued strongly su pected of being a knave

About Godjaara casterly whole prevail during three months of the year but for four months after the middle of October they lacline to the north ward. It esterly which a llow from about the middle of behruary until the middle of April when the east which re-commence an I refresh the earth with coolness and gootle show ers often alternating with southern breceres. It Bucknam for 1

In 1815 certain parts of the Godavery were deepened and obstructions removed in others by 21essey. Was Tohmer & Co. who from their own observe tion and from faces detailed by inhobitants of the Hamghur and Poloco that pergunnals were of opinion, that a navigation of 400 miles in length ind, bit be opened during four mooths of the veer or this river and

the Wurda, which would greatly facultate commercial intercourse between the inland provinces of the Deccan, and the Bay of Bengal. Including windings, the whole course of the Godavery may be estimated at eighty-five miles, from its source to its junction with the sea.—(Rennell, J. Grant, J. B. Blunt, H. Russel, Voysey, &c)

Godra (or Gudara.)—A town in the Gujerat peninsula, sixty-seven miles N.E from Cambay, lat. 22°48' N., lon. 73° 44' E.

GOELWAR (or Golulwar.)—A division of the Gujerat peninsula bounded on the north by the river Bhadur and the British district of Arratum, on the east by the gulf of Cambay; on the south by the sea; and on the west by Cattywar and the Walak coast. It is watered and fertilized by many rivers, and contains the valuable seaports of Bhownuggur and Gogo. The name is derived from the Goel tribe of Rajpoots. The face of Goelwara, although generally flat, has several conspicuous mountains, among which may be reckoned Oollitana and Seroi. By the conditions of Col. Walker's agreement in 1807, the chieftains of Goelwara were bound to pay to the Guicowar state a perpetual tribute of 1,11,700 rupees, which the district can afford, as it is fertile, and produces almost every kind of grain, much of which is ex-There is also an ambawan or mangoe forest, extending for about a couple of miles, and remarkable as being the only thing of the kind in the Gujerat peninsula. — (Walker, Macmurdo, &c)

Gogga (Gharghara.)—This river has its source in the Himalaya mountains, but the exact spot has never been ascertained. The principal branch of the Goggra is named the Cali, now the eastern boundary of Kumaon, and before it quits the mountains it is joined by the Sarjou (Sareyu), or Deva, after which their united streams issue from the hills at Bremadeo (Brahma Deva), and the

river thence forward is indifferently named the Goggra, Sarjou, or Deva. In the course of its passage through the hills several rapids occur, but there are no ascertained rapids although such are marked in the best maps. The Goggra forms one of the largest streams contributary to the Ganges, which it joins in the province of Bahar. Major Rennell thinks it is the Agoramis of Arrian.

In the mythological poems of the Brahmins, this river is always mentioned by the name of the Sareyu, which in modern times it has almost lost. Its banks were formerly esteemed of peculiar sanctity, having been much frequented by Viswamitra and other potent and choleric Hindoo saints.

Gogo.—A town in the Gujerat peninsula, situated on the west side of the Gulf of Cambay; lat. 21° 40' N., lon. 72° 23' E This is a safe roadstead during the SW. monsoon, to which vessels may run in case of parting with their anchors in Surat roads, it being an entire bed of mud about three-fourths of a mile from the shore The natives are chiefly Mahomedans, who build yessels from fifty to 300 tons, and formerly carried on a brisk trade to Bombay, but latterly much of this traffic has been transferred to Bhownuggur. — (Elmore, &c.)

Gogul Chupra.—A town in the province of Malwa, thus named from its vicinity to Chupra, from which it is distant only seven miles. In 1820 it was the head of a pergunnah belonging to Ameer Khan, to whom it yielded an annual revenue of 50,000 rupees —(Malcolm, &c.)

Gohra.—A small town in the province of Allahabad belonging to Punnah, twenty-three nules S.E. from Teary; lat. 24° 31′ N., lon. 79° 5′ E.

Gohud —The capital of a division in the province of Agra, twenty-two miles NE from Agra; lat 26°24' N., lon 78°20' E. About the middle of last century Gohud was a small village attached to the district of

Guaior and the Roma a necestors were zemndare of the village and by caste Jouts of the Bamrowly tribe Bheem Singh the Itana prior to the battle of Paniput in 1761, nequered Guaior but was offerwards abliged to yield it to the Valsarstiss. When this people last the battle of Paniput the Rama of Gabud attempted to shoke off their yold but was subdued by Racconnauth Row in 1766 and compelled to continue tributary. On a subsequent rupture Guaior was taken by Mnthisjee Sindal in 1784

The territory of Gohnd, though hilly is fertile and in 1700 was supposed to yield a revenue of twenty two lacks af rupees per mnum, out of which seven went to the expenses of collection What madifications ar dissections the limits of this principality subsequently experienced we are not infarmed but in 1805 we fied them described by Mr Metculie os extending olang the Chumbul and producing only eighteen lacks per sooom, of which nino were appropri sted for the payment of the sub-idiary farces - (Thirdnad Seventh Registers, Treaties, Metcaffe, &c )

Ganun.—A small town in the prorince of Allahabad eleven miles N by W from Jaloun; lat. 20° 20' N., ian. 79° I3 E

Gaxaux.-A town in the province of Bejapoor possessed by the Put wurden family, farty-mne miles N from Darwar; lat 16° II' N., ian. 74° 58 E It stands an the aarthern neclivity of a bill watered an its narthern side by the Gutpurba, which Immediately opposite has deep weter but there is e fard one mile east of the tawn It is enclased by a well and ditch on its eastern and sauthern sides, but to the westward it is commanded by a hill. This is e place of considerable extent and importance, and in 1790 had a considerable maaufactory of silk and cotton fabrics both in the farm of dresses and of piece goods The silk was imported probably from Bengal by the way of Gaa. When taken by Sulton Manz zum. in A D 1685 Gakauk was the

head of a district but does not now possess my building ar rule of con sequence About twa miles from hence there is a superb estaract formed by the river Gutourba, which is precipitated from the helis to the During the rains this iaw country river about IG9 yards broad rushes for some space down on inclined plane and then in one unbroken mass into a ravine cut through the table-land, and bounded on both sides by mural preciplees A very hand some and elsborately finished temple of Mishadeya stands amidst o group of infernar religious edifices on the brink of the cataract to the right, and n picturesque waoded hill rises some hundred feet above its margin on the opposite side .- (Aloor, Fullarion, &c)

Goset.—A small tawn in the province of Agra district of Alighur, situated on the left side of the Junna, six miles believ Mithura. This spot is sone of the supposed scenes of the early adventures of Krishna, who is worshipped here under the name of Golul

Golconda (Gollhanda.)—Ac ex tensive division of the Hyderabad province occupying the tract of country to the east af the capital, north and south of the Mussy river which intersects it. Althaugh renowned in Lurape fordiamond mines it at present does not contain acy. and probably never did The for tress is notwithstanding a very conardemble depôt for these gems, which are brought however from other marts, mastly in the Balagbaut districts to be palished and fashioced for sale by the Golconda diamond merchaots Io the immediate neigh bourhood nothing is to be seen but nyemte, but about farty miles further west opals and chalcedonies are found

The fortress of Golconda stacks on hill about three mites W N W from the city of Hyderabad, lat. 17° 15′ N, lan 78° 32′ E I W mas once the cepital of on extensiva kingdom, first under Hindoo princes, ond after wards as e divisian of the Bhamence wards as e divisian of the Bhamence

empire, upon the fall of which it again became the seat of a monarchy under the Cuttub Shahee dynasty. In A.D. 1690 it was surrendered by treachery to the Mogul army of Aurengzebe, after a siege of seven The deposed sovereign, months Abou Hossem, died here in confinement in 1704. At present this fortiess is principally used as a stateprison, where the refractory members of the Nizam's family are confined; among which number, in 1915, were his wife, mother, and two youngest The principal inhabitants and bankers of Hyderabad are also permitted to retain houses in the fort, to which on any alarm they retire with their money

In the alluvial soil of the plains at the base of the Neela Mulla mountains, and more especially near the banks of the Krishna and Pennar rivers, are situated the mines that produce the famous Golconda diamonds, the territory adjoining the fortiess of Golconda never having produced any precious stones whatever. Its reputation for them pro-bably originated from their having been brought in a rough state to Golconda to be cut and polished An opinion pievails among the miners that the diamond is continually growing, similar to that prevalent in Cornwall with regard to tin, and that the chips and small pieces rejected by former searchers in process of time become large diamonds. In 1820 Dr Voysey found most of the diamond mines deserted, and the search confined to the rubbish of the old mines. He assumes that sandstone breccia of the clay formation is the matrix of the diamonds procured in the Deccan, that those found in an alluvial soil have been brought down by some torrent or deluge, and that those found in the beds of rivers are washed down by the annual rains; but if so, their sources might be traced.—(Scott, Voysey, Upton, Heyne, Sc)

GOMANO ISLE.—A small island in the Eastern seas, about twenty miles

in circumference, lying due north of Oby Island, from which it is separated by a narrow strait; lat. 1° 55'S., lon. 127° 40' N.

GOMATA SEROLE —A fortified town in the province of Bejapoor, principality of Colapoor, eight miles travelling distance south from Merrich.

Gomea.—A village and remarkable pass through the hills in the province of Bahai, district of Ramghiir. on the line of the Benares road, 200 miles N.W. from Calcutta.

Gonawud.—A small town in the province of Malwa, pergunnah of Deypaulpoor, four miles from Moondla, and ten from the town of Deypaulpoor, lat. 22° 56′ N, lon. 75° 28′ E.

GONDEGAMA RIVER — A small stream which rises among the Balaghauthills, and after a short course falls into the bay of Bengal at Moutapilly, marking by its channel the separation of the modern Carnatic from the Northern Circars.

Gondwara.—A town in the province of Bengal, district of Purneah, twenty miles S. by W from the town of Purneah; lat. 25° 33′ N, lon. 87° 26′ E.

Gonds (or Goands).—See Gund-Wana.

GOOCHNAUTH.—A village in the province of Gujerat, situated on the south bank of the Banass river, about three miles S E. from Rahdunpoor.

GOODLOTTA.—A town and small district in the Mysore territory, forty-four miles N by E. from Chittel-droog, lat. 14° 47′ N., lon. 76° 42′ E.

GODDOR.—A town in the Balaghaut ceded districts, seventeen iniles W.S.W from Carnoul; lat. 15° 40′ N., lon. 77° 47′ E.

Goodoor.—A village in the Carnatic province and Nellore district, twenty-two miles south from the town of Nellore This place contains a small mosque and two pa-

godas, and there is a collector a bun griow open for the accommodation of travellers.

Goolarnar.—A town in the prevince of Alishibad twenty nules S.W from Christerpoor, lat 24° 42 N ton 70° 20 E

GOMBATOONOT —A vilinge in the Carnatic province and northern district of Arcot, twenty seven miles traveling distance \(^1\) W by \(^1\) from Mixing. There is a bungalow hero for the accommodation of travellers

### GOONTEE.—SEC DWARACA

GOOKTY RIVER / Gomale, winding -This river has its source in North ern Hindostan among the hills of humaon from whence it flows in a south-casterly direction nearly parailed with the Goggra, and after passing the cities of 1 ucknow and Juannoor falls into the Ganges below Benares It is named the Goomty from its estremely winding course, which is o circumstance common to rivers traversing the Gongetie กโลเต There are many other rivers of a secondary class distinguished by the same epithet more especially one that passes Comilian, the capital of the Tiperali district which springs from on unknown source among the eastern hills and falls into the Viegna at Daoudeaundy It is navigable for canoes fifty miles obovo Comillah

GOONELE (Ghumsara).-A town and large zemindary in the Northern Circurs district of Ganjani sisty miles west from Jugermanth country in this neighbourhood is remarkably impenetrable, the forests consisting of humboos which grow closer and resist the oxe better than ony other species of ligneous vegetation In former times the inlinbitants, relying on these did not think it necessary to erect redoubts for the defence of the paths leading to their strong-holds but obstructed them with frequent barriers of bamboos, wrought into a variety of entanglement. Besides its naturolly pestilential atmos phere, the whole truct is once the hottest sulnds and is particularly subject

to strokes of the sun by which M Bussy in 1757, lost seven Europeans in one day

In 1801 this estate stood roted in the revenue records as containing 506 villages with an esturated nopulation of 66 016 persons and ossessed to the land-tax 21,218 pageday; but the proprietor, although in regular subjection to the British on thorsty so long or he paid the stipu lated rent, had been little interfered with When originally transferred to the Last India Company several of the best informed public functionaries were of opinion that, owing to the peculiar delicacy of estending tho full outhority of the courts of law over genundance situated on the frontiers and among the high lands it would be more advisable to regard the proprietors rather as tributary chieftains than as ordinary subjects omenable to the usual process of the courts of justice In progress of time bowever, the population genorally and even mony of the zemindars, have been forword in bringing their matters of litigation before the regular courts, and hove subsequently submitted to the decrees without murmur or resistance The Goom sur chiefs had long remained nearly independent and might have con tinned so had not the enormous atrocity of their conduct compelled the Interference of the British co-

Yernment In 1815 a charge of murder was brought against the zemindar Da noongjoy Bunje by his father who for his own previous crimes had been deprived of the zemindary, and a reward proclaimed for ida opprehen-An investigation in coasequenco took place when it oppeared from the evidence of the surviving femoles of the seragho that the zemındar Danoongjoy Bunje in 1814 became impressed with the idea that his wives and the female port of the family had conspired to deprive him of his life with the view of setting up his cidest son named Bullaidder Bunge as zemundar of the conotry Under this maron Danoong joy confined

a great many of his wives, concubines, and slave girls, most of whom, from the inhuman treatment they received during their imprisonment, The survivors dedied on the spot. posed before the magistrate that they were all chained to a log of wood placed in the centre of two rooms, with holes large enough for two legs; that being thus seated in pairs opposite to each other, each having one leg in the hole of the log, they were secured by a wooden pin; but the remaining legs were placed on the top of the log, chained together in irons. Several of them declared (one being only thirteen years of age) that they had witnessed the death of the person to whom they were chained until the corpse had become putrid and covered with worms, and as the marks on their limbs proved they had undergone at least some part of the cruelties they had asserted, the black and malignant nature of the zemindar's disposition rendered the rest extremely probable.

Orders were in consequence issued to seize Danoongjoy, and to dismantle the strong fortress of Kolaida, which fortress, although within fifty miles of Ganjam, the zemindar repeatedly asserted existed only in the imagination of the magistrate. When attacked, however, in May 1815, by a small detachment of the Madras army under Col. R. Fletcher, it was found to be of such extent and strength, that the troops during their stay were only able to destroy the stockades and houses. thence the detachment proceeded in pursuit of the zemindar to Jarang, where they did not succeed in effecting his capture, but had the good fortune to effect the release of about one hundred men who were found in irons, besides women and children. and others were reported to have been put to death on the approach of the military.

Anxious to establish or confute the assertions of the female witnesses, the magistrate determined to visit the gloomy fortress of Kolaida, to examine a well in which it was said the bodies

of those who had died in confinement had been thrown, and to collect further information on the spot. well being pointed out by two female slaves, who, according to their own account, had been employed in putting the dead bodies there, after six hours' digging, finger-bones, ribs, and other parts of the human frame began to make their appearance, intermixed with earth; and after a further lapse of time, a great number of skulls and bones were met with. excavating to the depth of twentyfour feet, eighteen entire skulls were thrown out, and an immense pile of bones collected, from the condition of which there was reason to believe the bodies they appertained to must have remained a long time in the well, as all the flesh and hair were gone, and nothing remained perfect but the bones and teeth, the whole corroborating the depositions as to the fact of the bodies having been thrown into the well It appeared also that the zemindar, apprehending a research of this nature, had ordered two of his dependents to dig the wells and remove the bodies, which had actually been done (as they confessed) into another well. human skulls, with a quantity of bones, were also found in the fortress of Kolaida by the officers of the detachment, close to five stakes wedged into the ground, which had every appearance of a place appropriated to confinement and torture. In fact, the hill zemindars of the Northern Circars had long been accustomed to exercise despotically the power of life or death, and also to levy contributions through the means of a desperate banditti. The present consequently seemed an excellent opportunity to make an example of a most atrocious petty tyrant, who subsequently emerged from the jungles to which he had fled, and surrendered himself; but it does not appear that he ever suffered the punishment due to the enormity of his crimes.—(Travers, Woodcock, Orme, &c.)

GOONDA.—A town in the king of

Oude a terratories, twenty-eight miles N by E. from Fyzabad; lat 27° 0 N, lon 81° 52' E

GOONEE RIVER .- This small river appears to be a branch of the great Indus, which during the rains diverges from the min trunk a short distance south of Hyderabad, from whence It flows in a southerly direction to Luckput Bunder where its further navigation was formerly interrupted by a mound to the base of which tho salt woter of the ocean ascended; but the great earthquake of 1810 destro; ed this bund or embankment, and ef feeted an union of the two Daring its progress south at passes through part of the great salt morass named tho Runn and is navigable for boots during the months of July and Au gust

GOONGRANA.—A town in the province of Delhi thirty miles E \ E from Sirhind; lat, 30° 44' N, ion 75° 52' E

GONNONO SELLOO.—A small town in the island of Celebes where the Dutch formerly had a settlement si tunted on n river of the same name; ist. G'30' A., ion 123' E. This place stands on the north side of the great bey of Gonnong Telloo nomed also Tomiole which deeply Indents the east coast of Celebes. The Inhabit ants are Malays and of course Machomedans but their chief assumes the Bisdoot title of rays.

Googsegal.—A small town in the province of Allahabad, thirty-one miles NW from Jettpoor, lat 25° 37 N., lon 70° 7′ E

Goort (Gati).—A divinet in the Balaghaut ecded territories, aituated priocipally between the fifteenth and aixteenth degrees of north lastinde. Besides Gooty, the espital there is not any towo of note nor any stream of magnitude except the Pennar Gooty is first mentioned as o district during the reign of Aurungzele, when it formed part of a small state held by the predecessors of the Shahmoor family who were disposited.

sessed in 1768 by the Minharatto partizan chief Moran Row In the course of the three years war between 113 der ond the Mahmattas, from 1770 to 1770, the province of Gooty was con quered by the former, and the raja (who was never ofterwards heard of carried nway prisoner. With the rest of the Blan, hand district it was ceded by the Nirsm to the British government in 1800 and is now an integral portlon of the Bellary collectorate

GOOTY .- A strong fortress in the Balaghaut ceded territories, and for some time the capital of a petty Mo hamitn state ; lat. 15° 8 N., lon 77° 42' F', farty foor miles cast from Bel The fort of Gooty is composed of a number of strong works occu pying the summits of a circular cluster of hills connected with each other and enclosing a space of level ground, the site of the town which is opprosched from the plain by two breaks or openings forming forthied gateways to the south west and north west and by two footpaths ocross the lower hills, communicating by amail sally ports Animmense smooth rock, rising from the northern limit of the circle, and fortified by gradations, ascended through fourteen gateways overlooks and commands the whole of the other works form ing a enadel which, with o tolerable garrison may be considered impreg nable The Gooty mountain is com posed of syenite, in which red feldapar prevails The extreme height of Gootydroog above the sen has been ascertained to be 2,171 feet; but notwithstnoding this elevation, the heat here during the months of April and May is most intense The mean height of the country extending round Gooty and Bellary is 1,182 feet obove the level of the sea, and from this plain the hills and mountains rise like lalands from the sea. Travelling distoace from Seringapotam 228 miles from Madras, 263 and from Hyderabad 178 miles,-(II dle, Lambton, Rennell &c )

Gorantonun -A town in the pro-

from Seronge; lat. 24° 15' N., lon. 77° 41' E.

Goranunder.—A village and small fort situated at the northern extremity of the island of Salsette, in the province of Aurungabad. At this place there is a small but handsome building, nearly in the form of a church, with a nave leading to a circular chancel, covered with a high eupola, and surrounded by a veranda, the whole arehed with stone and solidly built. It is generally regarded as a Portuguese church, but has not been used as such within the memory of man, and differs from most churches in having the entrance at the east, instead of the west end It is now used as an occasional residence for the governor of Bomhay, and it makes in reality a cool and convenient house for this climate, and commands a magnificent view. A narrow arm of the sea, extending from this place to Tannah along a space of about sixteen miles, divides the island from the main land. This winding passage is in some parts bounded on both sides by mural rocks, and presents much beautiful scenery. At Daravec, a few miles to the north of Gorabunder, there are some basaltic rocks. ---(Fullarion, &c)

GORAM ISLE—A small island in the Eastern seas, about twenty miles in circumference, and situated one day's sail E by N from Banda This island is inhabited by Mahomedans, and is said to contain thirteen mosques. In AD 1774 the Dutch sent an armed force of Buggesses against Goram, but they were repulsed by the inhabitants.—(Forrest, 5°c)

GORKHA—A town and district in Northern Hindostan, the original country of the reigning Nepaul dynasty; lat. 27° 52′ N., lon. 84° 22′ E, forty-one miles W.N.W. from Catmandoo. Prior to the conquest of Nepaul by Raja Prithi Narrain, the Trisoolgunga river separated the territories of the Gorkha and Newar (or Nepaulese) princes, the western limit of the first being marked by the

Marielangh The Gorkha territory, although situated more to the north, is rather warmer than the Nepaul valley, and, like it, is watered by yarious fertilizing mountain streams, winch are all ultimately absorbed by the Trisoolgunga, the declination of the country being in that direction. Its chief inhabitants formerly were Brahmins and Khasiyas, m about equal numbers, with rather fewer Magars; the Brahmun's being the chief cultivitors, the Khasiyas and Magars fighting men, but many of the last have transferred their residence to Gorkha, the eapital, Cutmandoo. stands on a high hill, and is said to be the only place of note in the prin-According to native acemality. counts, for it does not appear to have ever been visited by any European, it contains about 2,000 houses, and a temple dedicated to Gorakhanath, who is the tutelar deity of the reigning princes.

The Sah family, which has risen to such extraordinally eminence, and for two whole campaigns contended on terms of equality with the British government, pretend to be descended from the Rajpoot family of Odeypooi: but this must be considered a merc fable, as on the arrival of the original Hindoo colony from the south, they were certainly of the original unconverted mountaincers named Magars. One of its branches, however, has long adopted the Brahminical rules of purity, and has intermarried with the best families, but the other continues to wallow in all the mire of primitive The first persons of the impurity. Gorkha family of whom there is any tradition were two brothers, Khancha and Mincha, names altogether barbarous, and in no respect resembling the ligh-sounding titles of the family of the sun, from which the modern From these chiefs claim descent, various obscure chiefs descended, for the Go1khas being cut off from any direct intercourse with either the low country or Tibet, having neither mines nor productions suited to commercial exchange, were always considered insignificant until Nurbhupal procured in marriage, first in doughter of the Palpa family, and secondly n daughter of the sixth son of a chief Ilis son Prithi Aar of Malebum rain commenced the aggrandizement of the family by the conquest in 1768 of Nepaul Proper, under which head further idstorical details will be found On the arcomplishment of that undertaking the seat of govern ment was transferred to Catmandoo. and being followed by many of the natives Corkha, the original capital, has been much neglected and in consequence has greatly declined -(F Buckonna, Kithpatrick &c)

COTTOTE (or Garoo) -- A place in Tibet or southern fartary which rather deserves the name of on os semidage of tents than a town lat 31°8 N lon 80°23 L The tents ore made of blankets surrounded by hair ropes fixed on stakes, and over the whole ore various coloured shreds of alk and doth as flags. They ore usually surrounded by a luter of bones, horns and tufts of wool The chief persons here as in other towns of Tibet, ore the Deba and Vizler, who went long tails of three plaits The plains in the vicimity ore covered with large flocks of sheep goals, yaks, and there are also a few horses The mountains on each side of this volley dip very much to the north west they are destitute of vegetation, but said to contain much gold and mineral substances

According to the information col lected by Mr Moorcroft the river that rises near to Dharchan or Gan gari runs past Gortope about four miles west then close to Lahdack and ot fast falls late the main stream of the Indus of which it appears to be the most remote source. Lahdack was reported to be ten days journey from Gortope the Deba of which in formed Mr Moorcroft that caravans of 500 and 600 people came on horseback to the Gortope fair but he did not say from whence The Tarters here call Europeans Felings (probably their way of pronouocing Feringhee), and appeared to have an equal aver

sion to them ond to the Gorkhas Culonak, the capital of Chinese Tarary, is said to be twenty days journey from hence to the north-east.—() footreph, ic)

Ganocraon (Coralkapura) -A British district in the province of Onde situated about the twenty seventh degree of north latitude. To the north it is bounded by the lulis ond forests of Neponl 2 on the east It has the zillah of Sarun and on the west by the Nabob of Oudes reserved territories It is divided by the Coggra into two distinct portions the southern being named Azim, hir, and the northern Gorucocor Proper In A D 1813 Azunghur appeared to contain 3.0 1'10 begas in cultivation, assessed at 1),54 135 supees or about two and three-quarter rupces per bega The number of begas fit for cultivation was estimated of 263 003 waste at 1,291,772 begas At the same date Gornepoor Proper con tained 363 572 pucks (or large begas) In cultivation, assessed at 7,02,205 runces or two and three- exteenths rupces per bega 768 72 begas fit for cultivation, and 569,086 of waste

This territory is sald to have been in a flourishing condition during the long reign of the Emperor Acber and to have continued so under the na bobs of Oude until the defeat of Shuja ud Dowlah at Buxar, after which owing to the efforts of the raiss and reminders to render them selves independent much confusion ensued, and a consequent suspension of cultivation The Grst and second ranges of hills extend in a westerly direction from the district so that the hot wieds are scarcely felt in the northern parts Easterly winds prevail generally throughout the year and even during the warm senson tho nights and mornings are cool and pleasant. The elimate however la not generally favourable to health on account of the great extent of junglo and stagnaot woter over which the easterly wind must oake its anproach Tho ratio of the cultivated tu the uncultivated land is remark

ably disproportionate. In 1814, the superintendent of police reported that the whole tract north of the capital was waste and almost uninhabited, and the efficiency of the police merely nominal, as some of the thannahs (stations) comprehended a space of 1,500 square miles. These forests in ancient times have often been the refuge of governors, princes, and pretenders who had unsuccessfully raised the standard of rebellion, and in modern times have been abandoned to the wild elephants and other unclaimed animals. former, although of an inferior quality, are caught by the natives, but not in herds, as is practised in Silhet, Tiperah, and Chittagong. In general they are scized either singly in pits, or are decoyed by the intervention of female elephants, in both of which processes many are killed, and still more maimed.

At some seasons of the year the second range of hills is visible from the town of Gorucpoor under an angle of forty degrees. The height of this range above the plains of the zillah is 4,000 feet; that of the first range 2,100 feet. At the base of the last is the Terriani, or low country, intersected by many streams which issue from the hills, and afterwards fall into the Rapty, a river of secondary magnitude. The great forest, - which commences near the capital, extends as far as the first range of hills. It varies considerably in breadth, and in some places is so open as to admit with ease the passage of elephants, while in others it is scarcely to be penetrated by a human crea-In this forest, and the rank grass jungle connected with it, game of all description abounds. Among the quadrupeds, elephants, rhinoceroses, tigers, bears, and buffaloes may be enumerated; and among the winged, the beautiful and high-flavoured florican, the otis houbara of Linnæus. The Terriam fever, at all times dangerous, is more particularly so in the months of May and June, and usually proceeds to its termination, good or bad, with great rapidity. By the natives it is ascribed to the water, but it probably results from a combination of noxious qualities in the air, water, and soil.

The Gorucpoor district came into the possession of the British in 1801, when it was ceded by the Nabob of Oude in commutation of subsidy, and in 1813 its jumma or assessment to the land revenue amounted to 17.75.377 rupecs; but from the great extent of jungle in Gorucpoor Proper it cannot be fit for permanency in the revenue settlement in less than half a century. In 1815, during the Nepaulcse war, with the view of increasing the population, arrangements were made for settling within its limits a class of persons named Tharoos, and such other hill natives as might seek an asylum within the British territories. Early in that year one of the chief Tharoos reported to the collector that about 3,000 of his tribe were assembled in a mangoe grove at Cumareeah, a village situated in the Sectassee jungles, belonging to the Ranny of Gudgepoor, and that more were expected. In deliberating on this measure, it was thought that the aggregation of the Tharoos into communities would be more agreeable to them than being scattered in small numbers among strangers, and that as their habits were understood to be industrious and pacific, no motive for their dispersion, or for wishing them to merge into the mass of the surrounding population, appeared to exist. On the contrary, it was thought that the preservation of their distinct and original habits, which enabled them to resist the pestiferous atmosphere of the jungles, might be turned to good account in some future hostile emergency.

It was therefore determined to assign them tracts of waste land, of which there was abundance; but the Tharoos objected to such as were too near the hills, where they would be continually under apprehensions of an attack from their former masters, the Gorkhas. In consequence of the delays attendant on every similar

measure, great sickness and heavy rains many of the Thermos who lin I been collected dispersed but print to the 10th July 1816 whove 2 000 Tharpos had erected buts an I com menced cultivation in the Sectorice jun, les, money having been advanced to them he government to procure seed and cattle, and a certain quantits of ner sopplied for their lamedute sul sistence. After the con chann of the lindary war a colony of a more questionable character was established: hurreen hhan a celebrated leader of that buoditte his nephew and adopted son with some of their followers having had lands assigned to them in Gorucnoor equivalent to a revenue of 1 000 supers per manth

Under these circumstances, and on account of its local contiguity to two independent states (Oude and Acpaul), the Goruepoor di trict appears too extensive for the maintenance of an efficient police. In [8] 4 most of the desperatorobberies perpetrated in this district were ascribed to a race of people named Seed Murants or Ceeder Mars (jackal lunters), who were robbers by profession resembling in every respect the Buddicks of These plunthe Agra province derers have no fixed habitations, but mostly frequent the Onde dominions. as best adapted for their operations -(J thusty the Marquess of Has tings, Capt Stoneham Blant &c)

Goaleroon —A town in the prevince of Oude the capital of the preceding district, situated on the east able of the Rapty 145 miles N. from Pating 181, 267 40 N., ion 837 197 E. In the western suburb is o mundlin or temple of Gorac nath o delty in high repute amongst the little of the capital situations.

GOVALLY.—A comblerable town in the province of Agra watered by canals drawn from the Laswaree riser lat 27° 30′ N lon 20° 51′ k., thrty-seere miles N W from Blurt poor Six miles west of the town a new fort has been erected by the Macherry Raja

Gota.—A town in the province and district of legispoor, twenty three miles traveling distance 8 W from the city of that name Thisplace, which is unnoticed in any map, is surrounded by a well-built stone wall and has altogether a respectable appearance

Gornatt --- A central town in the Gujerat penin ula thirty seven miles 1 L from Junaghur; lat. 21°54 In 100 50' So L This was for merly a small village belonging to the government of Soreth, and most of the territory now postersed by the chiefs of Coundal was acquired from the nabels of Junaghur, as remu neration for pecuniary ands ance. In 1509 the Gouodul chief was fined by Colonel Walker for encouraging tho depredations of the Cattles, and conmixing at the infanticule of his son a dangliter, (11 aller, I ablic VIS Do exments de )

Gors (( eur) - The ruins of Gour the ancient capital of Beneal are situated in the district of Dinagesoor, a few miles to the south of Malda, and are now mostly over whelmed with reeds, and the trees of old frul gardens become wild and intermixed with palms. By Abul Fa sel in 1889, it is described as fol-" Jennetabad (the Vlahomelows dan name for Cour) is a sery ancient city and was once the capital of Ben gal. Formerly it was called Lucknowty (Laksimanarati), and sometimes Cour The present name of Jenoetabad (the abode of paradise) was given it by the fate emperor list mayoon liere is a fine fort, to the east of which is a fine lake called Chutteah Pottesh, lo which are many felands.

The rules of this town extend olong the hanks of the old Ganges, and probably occupy a space of twee of y aquare mides, which, considering the stragging manner in which In dan ethics are usually built would not contain any sery enormous population. Several sillages now stond on its site and eight market places sufficiently contiguous to form a town.

20

*5*94

have been estimated to contain 3,000 houses, many of which are of brick, procured from the debris of the ancient city Some progress has also been made in bringing the suiface under cultivation: but the undertaking is much impeded by the great number of dirty tanks, swarming with alligators, musquetoes, and all sorts of vermin, and choked up with pestilential vapours The soil is of extraordinary fertility, and well suited for the mango and mulberty. The principal i uins arc a mosque built of a black stone, called by former visitors marble, but by Dr Francis Buchanan considered to be black horneblende. or indurated potstone, as he could not discover one piece of maible, either of the calcareous or of the harder kind The bricks, which are most solidly composed, have been sold and carried away to Malda and the neighbouring towns on the Mahananda, and even Moorshedabad has been supplied with bricks from this mass. There are (1819) several other mosques besides the above, in tolerable preservation, and one of them is distinguished by a keblah, and corresponding mehes of horneblende, curiously sculptured. The tower. delineated by Daniell, still exists, and two of the gates (the Cutwal and the Dakkel, especially the latter) are highly picturesque and venerable It is obvious, from a variety of circumstances, that a still more ancient city furnished materials for the construction of some of the Maliomedan buildings, whose vestiges may still be discovered, for defaced images of Hindoo deities have been found sculptured in relief on the reverse faces of many of the horneblende blocks, separated from the masses of masonry with which they were once connected.

The situation of Gour is nearly central to the populous parts of Bengal and Bahar, and not far from the junction of the principal rivers which form the admirable inland navigation. Lying to the east of the Ganges, it was secured from any sudden invasion from the only quarter whence hostile

operations might be apprehended. No part of the site of ancient Goul is nearer to the present bank of the Ganges than four miles and a half, and some spots which were originally washed by that river, are now twelve miles from it. The name of Gour is apparently derived from Goor, which, both in the arcient and modern languages of India, significs raw sugar, and from the Sanscrit term for manufactured sugar (sarcara) are derived the Persian, Greck, Latin, and modern European names of the cane and its produce. Gaura, or, as it is commonly called, Bengalese, is the language spoken in the country of which the ancient city of Gour was the capital, and still picvails in all the districts of Bengal, except some tracts on the frontier; but it is spoken in the greatest purity through the eastern or Dacca division of the province.

At a most early period of antiquity this place is said to have been the residence of a saint named Jahnu, who one day swallowed the Ganges, as Bhaghnathi was bringing it down from the mountains to water Bengal: since then there has always existed here a path to the infernal regions, the mouth of which may still be seen at Sheebgunge. Tradition also asserts that subsequent to this remarkable event Janmejaya, the son of Parikhyet, the son of Abhimanyu, the son of Arjun, the brother of Judhisteer, and third king of India of the family of Pandoo, removed all the Brahmins, and settled them to the west of the Ganges beyond Hastmapoor, where their descendants still remain.

When Adisur erected a dynasty which governed Bengal, although he resided mostly at Soonergong, near Dacea, he had a house in Gour, then probably near the western extremity of his dominions. The same arrangement continued during the reign of his successor, Bollal Scn. His son, Lukshman, extended his possessions far to the north-west, made Gour his capital, and seems to have built the town of Gour, insually designated by that name, but also known by that of

Lakshnanavoti, corrupted by the Mahomedans to Lucknowty

When Mahomed Bukhtyar Khillsjee conquered Bengal m A D 1201 Gour was o place of vast extent and being selected by that commander for his chief station soon ottained o still greater magnitude The last Ilindoo sovereign named Raja Lakshmonyah, held his court of Nudden until ex pelled by the followers of the Arabian prophet and probably retired to the uld eastern canital at Sooner gong On the establishment of a Muhomedan dynasty todependent of Delhi the sent of government was transferred to Purnesh oo which event Gour oppears to have suffered indiscriminate dilauldation Io A D 1533 the emperor Humsyoon, when in pursus of Shere hasn the Patan (by whom he was subsequently ex pelled), took Gour then described as the cantal of Bengal Ferishin says that the seat of government was ulterward removed to Taooda or Tangra, a few miles higher up aince which period although the city does not appear to have sustained any signal calamity it has progressively doclined to its present state of desola tion.- (F Bechanan Colebrooke Fullarton Col. Colebrooke Stewart, 40)

GOOREAR—A town and pergunnah in the province of Allahabad sixteen miles S W from Bando, lat. 25° 18 No. 100. 80° 10° E.

GOORFEARA.—A small village belonging to Nepaul with a large tank situated about ten miles from the Bratush boundary near the Bera river, and thirty-eight miles south from Catmandoo; lat 27° 10′ N<sub>2</sub> lon 84° 50′ E

GOSMODONGY (Gotmdagen) — A large mart and ferry in the province of Bahar district of Chumparin, si tusted on the banks of the Gunduck river lat. 25° 23' N.—(Capt Hodg ses &c)

GOWOHAUT.—A village in the provioce and district of Agra, attented on the west bank of the Jumes now almost deserted, but still noted for

the rules of a spacious seral, twelve miles NW by W from the city of Agra

### GRASSIAS.—See GUJERAT

Goraste.—This was formerly the capital of an one-ent lingdom in the siland of Jara but is now merely a small town divided between the natices and the Chinese, who hove here their own campong temples and presats lat 7° 0° S., lon 11° 5° 0° S., to miles N W from Surabhaya. According to a census taken by the British government in 1815 the modern distalon of Gressle contained 115 442 subabitonts, of which number 334 were Chinese. Its area was only 778 aquare miles.—(Raffee fr.)

Gaosooano—A district in the island of Jare which eccording to a census taken by the British gevern ment in 1815 contained (including Japang) 65.522 rahabitants of which number 403 were Chinese The orea comprehended 1,219 square miles, The town of Grobogang stands in lat. 6° 58° 5 len. 110° 50° E., thirty miles rest from Samarays.

In the plants of Grobogang fifty miles N E. from Sole are some remarkable mud volcanoes having of a distance the appearance of the surf breaking ever the rocks Oo approaching them an elevated plain of mud is perceived, about two miles in excumicrence in the centre of which immenso bodies of salt mud are thrown up to the height of ten or fifteen feet, in the aliano of large globes or hubbles of which there are two continually throwing up and bursting seven or eight times in o ml nute As the globes burst they throw out the mud from the centre with a considerable noise sometimes they throw up two or three toos of mud The mud is cold at the surface, but said to be warm beneath A quantity of salt is manufactured by the Javaneso from the water that drains from the mud. In the Ramsam forest which is in the neighbourhood ore a salt lake o mud hillock and vaneus boiling or rother bubbling pools.

-(T & Goad, Raffles, &c)

GUALIOR - A strong fortress in the province of Agra, the modern capital of Dowlet Row Sindia, about seventy nules direct distance south from the eity of Agra; lat. 26°15' N, lon 78°1' The hill on which it stands is in length one mile and three-fifths, but its greatest breadth does not exceed 300 yards. The height at the north end, where it is greatest, is 342 feet, and the sides are so steep as to be nearly perpendicular A stone paranet extends all round, close to the brow of the hill, which is so precipitous that it was judged perfectly seeure from assault, until Major Popham took it by escalade in 1780. The storming party was led by Captain Bluce, brother to the traveller. The town, which is placed along the east side of the hill, is large, well inhabited, and contains many good houses of stone, which is furnished in abundance by the neighbouring hills, forming an amphitheatre round the town and fort, at the distance of from one to four nules These mountains are chiefly composed of schistus. which apparently contains a large portion of iron, their suiface is rugged, and nearly destitute of vegetation To the east runs the small river Soonnea (probably Suvarnanca), which in the beginning of spring is almost dry. At the distance of 700 yards from the northern extremity is a conical hill, having on the top a remarkable building, consisting of two stone pillars joined by an arch. Within the summit of the fort are large natural excavations, which contuin a never-failing supply of excellent water.

Gnalior must in all ages have been a militury post of great importance, both from its central position in Upper Hindostan, and the peculiarity of its formation, which rendered it, according to the opinion of the natives, impregnable During the existence of the Mogul empire it was a state prison, where the obnoxions branches of the royal family were confined, and a large menagerie, consisting of hons, tigers, and other wild beasts, was kept for their amusement. When possessed

by Madhajee Sindia, he appropriated it to the same use, and on account of its strength made it a grand depôt for artillery, ammunition, and military stores.

Rajas of Gualior are mentioned so early as A.D 1008, and it was first captured by the Mahomedans in 1197, after a long siege. The Hindoos appear afterwards to have regained possession, as it was again subdued in 1235 by Altumsh, the Patan sovereign of Delhi. In 1519 Gualior surrendered to Ibrahun Lodi, the last Patan emperor of Delhi, after having been possessed 100 years by the Hindoos; and subsequent to this period it must have been acquired by the emperor Acbei, or his son Humayoon, for in 1543 we find it was delivered up by his governor to Shere Khan, the Afghan. Thus it would seem, notwithstanding its reputed impregnability, to have very frequently changed masters.

After the dismeinberment of the Mogul empire, Gualior came into the possession of the Rana of Gohnd, from whom it was taken by the Maharattus. In 1780 it was taken by escalade by a detachment under Mujor Popham, but was afterwards dehvered to the Rana of Gohud, who, failing in his engagements, was abandoned to the resentment of the Ma-Madhajee Sindia invested the fort, and after a fruitless siege of many months, prevailed at last in 1784 by corrupting the garrison. 1803 Raja Ambajec Inglia engaged by treaty to deliver up the fortress of Gualior, then in his possession, in consideration of obtaining favourable consideration from the British government. When the period for its surrender arrived, the commandant, clandestinely instigated by Ambajee, refused to deliver it up was in consequence invested by a detachment under Sir Henry White, batteries opened against the fort, and on the 4th February, a practical breach having been effected, the garrison made overtures to surrender on condition of receiving 50,000 rnpees. This proposal was rejected,

but an arrangement having been subsequently effected the British troops obtained possession of the fort oh the 5th February 1801 The British government having abandoned all territory south of the Chumbal by the final trenty with Sindia of 1805, Gualior came into that chief's posseasion, who, up to 1810 was generally in motion with the greater part of his army, Oojem being little more than nominally his capital But shortly after the forced resumption of Gualior fram the family of the deceased Ambajee he pitched his camp a short distance south west of the far tress which he entered himself and his court has never been moved from that spot except on occasional pil grimages. A second and external city has arisen on the site of lils encampment surps sing the old one in mag nitude and population In 1820 the soubth of or territory attached to Gualior, was by far the most produc tivo portion of Sindia a dominions for the long time his army had been quartered there had reduced the Innumerable ghurnes and strong-holds. and brought the tract under completa subjection but even the revenue was collected with the assistance of a flying detachment.

Traveling distance from Delhi 197 miles i from Lucknow 211 from Bonares, 355 from Nagpoor 380; from Calcutta by Birboom 805 miles.—(Public Mis Documents, Hunter, Maurice, Major William Hamilton Rennell, Capt J Stewart, §c.)

GOCKERS.—A true in the province of Lahore well known to history from the increase in trouble they used to occasion both to the Patin and Mogul emperors of Hindostan. They once possessed the whole country between the Indos and the Jhylum or Hydaspes but have insterly been expelled by the Seiks. They still however retain a high multary reputation. The Gucker country produces vast quantities of grapes, which there grow wild and droves of horses of a tolerably good breed are pastured. To the south-east the land is much.

cut up with deep ravines and torrent courses, and it is altogether a strong country, and very difficult to murch through The floods are so sudden and copious that the water has been known to rise ten feet within a nii nute of time so that one portion of an army may almost be instantaneously separated from the rest The chief of the Guckers takes the title of sul tan, but the place of his domicile lins never yet been satisfactorily as-A great many of the Gacker towns have been destroyed by the Seiks and now he in ruins,-(Tiphinstone &c)

Gatoran Istx —A small Island in the Eastern seas, one of the Philippines about eighteen miles in cr cumference Iping off the south-eastern extremity of the sland of Jama, being the most easterly of the Philipnics.

GOJERAT PENINSOLA -This ter ritory is sitoated principally between the 21st and 23d degrees of north latitude and occupies the southwestern extremity of the province to the main land of which it is joined by an isthmis To the north at Is bounded by the gulf of Cutch and the Runn on the south and west by the Indian ocean; and on the east by the latter and the gulf of Cambari In length from east to west it may be estimated at 190 miles, by 110 tho average breadth The general namo of Cattywar for the Gujerat penin sula was applied by the Maharattas having probably been first opposed there by the Cattier whose active and roving disposition gave them the appearance of greater numbers than the reality justified At present the

principal geographical and political subdivisions are the following, viz. 1. Cattywar; 2. Jhalawar, 3. Hallaur; 4. Okamundel, 5. Burudda; 6. Babreawar, 7. Goelwar; 8. Ariatum. And the chief towns and petty states are Noanuggur, Bate, Juggeth or Dwaraca, Poorbunder, Soreth or Junaghur, Diu, Durangdra, Goundul, Bhownuggur, Gogo, and Palyad.

The largest river in this peninsula is the Bhadui, which falls into the sea fifteen miles south of Poorbunder, after a course of above 100 miles including the windings. During the monsoon small boats navigate it as far as Kattiana, eighteen miles from its mouth. Next to the Bhadur is the Muchoo river, which has a rocky channel, and after a direct course of about sixty-five miles disembogues itself by many channels into the Runn. In the bed of the Ajee river, which falls into the gulf of Cutch near Balumba, small quantities of gold-dust are found. The Sutringe has its source on the western side of the hills that form the Junaghur cluster, and joins the sea near Tullaja. All these rivers receive a great many tributary streams and streamlets (according to the natives the Bhadur receives ninety-nine), the whole peninsula being remarkably intersected with excellent and clearrunning waters, and their banks occasionally presenting pieturesque scenes of romantic beauty. Many of these have poetical names, such as the Roopa Rete, silver waves; the Pooljce, studded with flowers, and Nagne or scrpentine.

The mountains here are few, and of no remarkable elevation. Cholula is noted for the wildness of its appearance and the barbarity of its inhabitants, and the mountain of Pulletana, in Goelwar, for the Shrawuck temples on its summit. The loftiest of the Junaghur hills (named in Sanscrit Rewtachil) is sacied, and surrounded by others of a smaller size with vallies intervening. The Burudda hills consist of a clump near Poorbunder, extending from Gonilee on the north to Kudorna on the

southern extreme, about twenty miles. All the clusters of hills abovementioned send off spiirs and branches. in various directions, while other hills stand in plains detached and insulated. The whole peninsula swarms with places of worship and reputed sanctity, among which may be enumerated Dwaraca, Bate, Somnauth, and Gernal. In some parts hot winds prevail in May and June, but the general climate may be considered dry and healthy, with a westerly wind all the fair season. In December and January there are east and north-east winds, with remarkably dense fogs that disperse at sunrise.

The following are the principal classes into which the inhabitants of the Gujerat peninsula may be sub divided. 1. Rajpoots, such as the Jahrejahs, Jhalla, Goel, and Jetwah. 2. Catties, of which there are three principal families, the Walla, Khachir, and Khooman, 3 Coolies, Kauts, and Sindees, called also Bawais. 4. Koombies, Mhars, Alicers, Relibaries, and other industrious tribes. The Bhatts are more immediately connected with the Rajpoots, and the Charons with the Cattics

of this country are of the Jahrejah tribe, conjectured to have originally come from Persia through Sinde, whence they were probably expelled by the early invasion of the caliphs. As it is, the Jahrejahs, Catties, and many other tribes calling themselves Hindoos, are but very superficially instructed in the doctrines of their own faith, and their claim to be con-

A great majority of the petty chiefs

Hindoos, are but very superficially instructed in the doctrines of their own faith, and their claim to be considered within the Brahminical pale but very slender, although they profess belief in all the Brahminical le-The sun and the Matha Assapuri are, in fact, the real objects of their worship; their tenets with respect to purity and impurity by no means rigid; and they drink spirits in public. Under the title of Matha Assapuri they venerate the goddess of nature, named also Hinglais Bliavani, to whom in Cutch the Jahre-Jahs have erected a temple named Assapuri, where a buffaloe is annually

immolated The name of Jahrejah is ascabed to the origin of the four Yodoos who escaped from the bat tles of Krishna and were protected

by Hinglals Bharanl

Among the chiefs of the Jahrejah tribes, the remarkable and inhuman custom of female infanticide univer sally prevailed, until they were induced by the interference of the Bri tish government to put a stop at least in appearance, to the practice none of the prior governments that ottmned on ascendancy in India hav ing ever attempted to suppress the custom For its prevalence various emises have been assigned avariee the cares of o family tho disgrace attending female miscon duct the difficulty of procoring them surtable establishments, and the apprehension of exposing them to in human treatment; all these motives combined have infloenced the Joh rejulis to perpetuate the practice of femalo infanticide The Jahrejaha however, were not singular in this, os the custom has also been discovered to exist omong the Rhatore Rappoots of Marwar and Almeer and the perpetration of the same crime has been traced to the Jants to a Mewnty race of Mahomedans to the Hari tribe of Boondee and Kotah. the Wash the Cutchwa, and to the Rajpoot tribes generally the birth of o ilaughter is by most sects of Hindoos considered an un anspicious event and rarely morked by festivity or exoltation The Jahrejahs carefully select wives

from the most respectable Remoot families, but prefer those of the Jholias spring from the Good Chu rassans, Punnar Surveyo, Jacka Wolls ond Wodal tribes Such daughters as they preserve they give in marriage to these castes, illegitamate daughters ere bestowed on Mahomechan or in Hindoos of improcesses midfferently on which account the latter are not put to death like the others. It is remarkable that the conculunes frequently hurn them selves with the deceased Jahraphs which is surely done by their yives which is surely done by their yives

When Row Lackn grandfather to the present chief of Cutch died fifteen concubines hurned et his funeral pile, but not one of his wives performed that sacrifice although there is no law against it Of these conculunes two were Minhomedans one a Siddee and the rest Hindoos of different castes. This painful ceremony is less expected from the wives than from the concubines who frequently con sider it a point of honour to burn with their deceased lords, each in spired with the ilreadful emulation of becoming the first sietim It moy be necessary here to correct on opi nion entertained by many Europeans that these sacrifices ore compulsory The Jahreish s wives and concubines are at liberty to follow this custom or obstain from it neither diverage or opproblum ottaching to those who choose to survive It may be men tioned os another extroordinary deviction from Illindoo customs, that in the district of Hulwad the wives of the lowest castes invariably burn with their husbands.

Through the persevering exertions of Mr Dunean then governor of Bombry and of Colonel Walker com manding the detachment in Catty war the Jahrejahs were ot length in duced to sign o paper agreeing to obolish the practice of femole inf to tierde, which document coarprehend ed within its obligations all the chief tuns and leaders of any consequence within the Gujerat peninsula but the erime itself is one of which it is ex tremely difficult to obtato direct proof According to native testimony when o womao is taken in labour a large pot of milk is placed in the room into which if the birth be o female, it is immediately plunged and suffocated One estimate, in 1807. stated the number of female lofan ticides throughout the whole peninsula to ba 5 000 annually while another raised it to 30 000 both founded on very uncertain data nad it seems probable that olthough reduced in frequency it is atill practiced tho sentiments of unture end humanity having so long heen stifled by the passions of avarice and pride that the right of destroying their daughters became a privilege, and regarded as a dignified distinction of easte.

In 1812 Witul Row, the Gnicowar's chief functionary in the peninsula, in hopes of satisfying the unxiety of the British government, estublished mehtalis or scribes, in the principal Jahrejah towns, with instructions to communicate the birth, preservation and murder of female children as soon as they received information of these occurrences; but the jealousy with which these men were regarded rendered their evertions nugatory, and so long as no Jahrejah would himself communicate the condition of his wife, they found it in vain to seek for information from any of his neighbours; indeed, it would require very extraordinary exertions to arrive at the knowledge of the domestie transactions of 5,000 families, particularly interested in their In India no man will concealment. without a reward accuse another of an act considered a crime by the ruling power, but which is looked on by themselves and their countrymen, not only without horror, but with approbation, and if by accident they did inform, their motives might be traced much oftener to a spirit of revenge than any sense of justice. This observation applies to the natives of Hindostan generally, but more especially to those among them who practice the cruel religious observances which require mystery and concealment to impose on the ignorant an impressive notion of their No native, therefore, unsanctity less urged by a deep-rooted enmity, will accuse another of an action deemed criminal by the ruling power, but, bearing among them the appearance of preternatural approbation, and reported as a custom of the caste from the fabulous ages.

Although no direct evidence had been afforded of any Jahrejah having destroyed his offspring since his engagement to abandon the practice, still, as the preservation up to 1816 of only fifteen females could be

vouched for, a strong suspición remains that the perpetration of female infanticide in this quirter has not yet been cradicated. To the universality of the custom the Raja of Moorvee may he mentioned as an honourable exception, he having strictly adhered to his engagement, and reared his two female children. In that year the resident at Biroda suggested to the Bomhay government, that it would tend greatly to accelerate the extinction of the practice if the East-India Company would defray or assist the expenses of their nuptials; but this proposal, on account of the strong injunctions to economy biennially received from the Court of Directors by that presidency, was declined. The expense estimated for marrying the daughters of the different Cattywar elucitains was as follows. daughter of the Jani of Noanagur, 35,000 rupees, of an inferior raja, such as Moorvee Goundul or Rajeote, 15,000; a near relative of the last, 7,000 rupees; and the marriage of a poor Juhrejah's daughter, from 1,000 to 1,500 rupces.

Throughout a large proportion of the Gujerat peninsula the country is subdivided into bhyands or brotherhoods, under which term are comprehended the relations of the rajas, who have villages assigned for their maintenance, which on failure of heirs revert to the elnef. The possessors of these villages are the Bhyand, or fraternity of the principal chiefs. In this state of family connexion the Ramoot tribes are distinguished by a great degree of personal independence, and all assert the right of revenging personal wrongs, real or imaginaly. The number of small fortresses with which the country is overspread, and the want of artillery, renders it easy for a fugitive to obtain an asylum from whence he may infest his enemics. When a compromise ensues coosamba is drank together by the contending chieftains; this potion being here, as in Cutch, considered to cause oblivion of the past and reconciliation for the Under these errcumstances, it is fortunate, in the absence of a

stable government, that the influence of religion, or rather superstituna, has same effect in restraining their turbu lent propensities. The veneration in which the Blusts are held and the inviolability of their persans, are as sected to by the most uncertized nad were repeatedly brought into action during the negaciations of the British government with the different chief times of the Gujerat pennsula in 1809

Priar ta 1807, the whale af this territary had for many years been tri butary to the Gascowar but the revenao derived was altingether preexriaux, and could never be realized without the periodical advance of an army By this mode of procedure both parties suffered extremely; the country being annually ravaged, the revenues dissipated and the society excited to a state of such commution as threatened to disturb the peace of the neighbouring provinces The Gui cowar in this emergency having renucated the mediation of the British government, a detachment from the Bombay army, under Col Walker, was marched Inta Catty war, which restor ed tranquility arranged a perpetual settlement at the tribute, and imposed fines on the predatory and paratical states In 1818 after the fall of the Peshwa the farm of Ahmedabad was tendered to the Guicowar in Heu of the above tribute which being accepted, the management of this turbulent peninsula devolved wholly on the British government In 1820 only ane instance of piracy occurred which was discovered and punished furnish ing decided evidence of the solutary saffuence exercised over its uncivilized chick who are now recovering from tha miserable condition to which they had been reduced by the tyranny and undue exactions of the Guicowar s officers, and the finnine of 1813,-(II alker Muemurdo Carnac, Elphinstone, Public MS Documents &c ]

# THE PROVINCE OF GUJERAT

(Gurjara Rashtra.)
This large province is principally

situated between the twenty first and twenty-fourth degrees of north late On the north it is bounded by the province of Ajmeer; an the south by the sea and the province of Anrungabad; to the cast it has Malwa and Candersh; and to the west por tions of Monitan, Cutch, and the sea. In length at may be estimated at 300 miles by 180 the average breadth The south western extremity approaches the shape of a neninsula farmed by the gulfs of Cutch Cambay and the Indian acean, which is lasulated for a short time during the rams Il lien the institutes of Acher were farmed by Abul Fazel in 1582 Guicrat extended southward to Damaun, where it touched an Bagla na and within its ill-defined limits appears to have included the greater part of Candersh and Malwa. In mare recent times the principal territarral and political subdivisors com meneing from the west and north were the following

1 Puttenwara 8 Cherooter
2 Jutwar 9 Ahmedalad
3 Gujtrat peninsula. 10 Baroda

4 Chawal 11 Broach 5 Ederwara 12 Nandode 6 Wagur 13 Surat

Chumpancer 14 Attavecseo The mountains that board Gujerat ta the north and east are steep craggy, and af difficult access, and send out many spurs or branches, the intervals between winch are nearly filled up with jungle Further south the hills terminate the jungle becomes less universal while the rivers increase In size and number and their banks broken by deep intricate ravines a ver-grown with thick jungle All these obstacles diminish as the south is anproached where the farest deappears and the streams unito into the Saber matty and Mahy Nearly the whole at the south-west of Guierat, a tract sixty miles deep and extending 150 miles along the gulf of Cambay tho frantier of Cattywar and the Runn This plain 18 an open fertile plan was almost whally subdued by the Maharattas, though the jungles of

Chawal and of the Maliy river nearly

as far south as Baioda, still fuinish shelter for independent Cooly villages. The western boundary, along the Banass river, is in some parts a level arid country, and in others a low salt swamp resembling the Runn. Within these swamps, jungles, and mountains there formerly dwelt many tribes of professed thieves, who preyed on each other and on the civilized districts, and being mostly mounted, extended their depredations to a great distance

Guierat is traversed by several noble rivers, such as the Nerbudda, Tuptee, Mahy, Mehindry, and Sabermatty, but in particular tracts a great scarcity of water is experienced the sandy soil north of the Mahy, which soon absorbs the periodical rains, the wells are deeper than further south, being from eighty to 100 feet deep. In the adjacent province of Ameer, however, they are still deeper, the inhabitants being obliged to descend 300 feet before they reach a sufficient supply of water. In some particular portions of this province, for many square miles not a stone is to be met with, while in others, but not many, nothing else is to be seen. The principal seaports are Sulat, Broach, Cambay, Bhownugger, and Jumboseer.

The Gujerat province generally, notwithstanding its apparent smoothness to the eyc, is much intersected by ravines and by ground broken up by the rains. Some of these chasms are of considerable depth and extent, and during the wet monsoon suddenly assume the appearance and volume of rapid livels, not to be crossed without the assistance of rafts or boats, so that one portion of an army may be almost instantaneously separated from the other During the hot and dry months the surface of the country mostly appears sand or dust, and in the rainy scason a thick The fields in general, except for particular crops, do not require much manure, that used by the peasantry is chiefly the dung of animals and the refuse of the cov-house, to which may be added the remains of the cocoa-nut, after the oil is express-

The natural productions are the same as those of other tropical conntries, among which may be enumerated horses, excellent bullocks, and draught cattle, coarse cloths, saltpetre, hemp, indigo, and opium. The last, however, has never been much cultivated, the province having been usually supplied from Malwa. In the northern tracts of Gujcrat the natives indulge to excess in the use of this pernicious drug, and the propensity can only be checked by raising the price beyond their means of frequent payment The districts directly subordinate to the British in Gujerat are susceptible of great improvements, but these could not be even commenced until the authority of the government was completely established, the accomplishment of which has been greatly retarded by their local position, having until lately been surrounded and intermixed with the more extensive territories of the Peshwa and Guicowar.

In so vast a province, never completely subdued by any invader, a great diversity of population may be expected, and accordingly Gnjcrat still exhibits a wonderfully stringe assemblage of sects and castes, some of whose usages may as well be recorded, as they will probably be hereafter but of transient duration.

In some parts of the province the Grassias are a numerous class of landholders, in others they merely possess a sort of feudal authority over certain portions of land and villages. Neither the original source or piecise commencement of the Grassia claims have ever been satisfactorily traced; and the etymological cyplanation has been resorted to with as little suc-According to some Hindoo pundits, gyrassic is a term signifying a mouthful, bit, or small portion, and equally applicable whether the bounty given be voluntary or extorted. On this subject the Mahomedans make a bad pun, and say the term is composed of gliyre (without), and rast (right) Others think the phrase originates filom gliauss (grass), allusive to the appearance of extreme indigence and distress which a subject sometimes assumes in the presence of his ruler, by standing before him with a bunch of grais in his mouth

Whatever be the original derivation of the word, these Grassias have not, as has been supposed, the slightest elalm to the distinction of a tribe or caste nor could they, from the great variety of Individuals, ever be formed into one. Grassias are of many dif ferent tribes of Hundoos some ore Mahomedans, and any person pur change the claimy or lending money, or farming lands and collections, would even if a Parsee or Christian, come equally under the denomina tion of Grassis which is also extended to all the mercenaries employed by the principal to inspire terror or inflict injury The records of an tiquity furnish no confirmation of the justice of these complicated demands, and the Ayeen Achery, or institutes of the emperor Acher being wholly sdent on the subject of claums, now so formidable to the public perce and revenue, it may be safely concluded that they did not exist at the date of that laborious compilation otherwise they never would have been passed unnoticed in a work, composed for the express purpose of exhibiting the exsating combine of the empire

The common and traditionary report of these claims is that subse quent to the decease of the emperor Acher, In A D 1605 the Gujerat province was so infeated by the Incur sions of the Bheels and robbers from the hills and jungles that the nabobs of Surat in the reign of Ferokhsere submitted to a compromise end ceded certain leads to them in each village These surrenders are said to have been denominated grounds and exempted from taxation by the Mogul government but sfler wards subjected to a quit-rent by Damajeo Guicowar when he con quered Gujerat. It is also asserted that depredations after this still con tinuing the zemindars pursued the same weak policy and to satisfy fresh invoders and gratify the avarice of the old, agreed to the payment of

what is now called " toda," or ready muney

These vanta lands and toda gyraus have been continually increasing during the prorehy that so long prevailed in Gujerat, and by the persevering encroachments from nil sides the corruption of the native revenue officers and the necessities of the landholders much government property was, in these forms, alienated and marrgaged, and every subsequent contingency or imposition was consolidated under the general name of toda gyrauss With the Grassias it has always been an immutable axiom. that a claim once received never becomes defunct; and at this day the Balasur pergunnah pays an Item of thirty rupees, on account of a chari table attention once bestowed by a immane banyan on the wife of a Grassia who was suddenly taken in labour at his door and many other spurious charges are annually collected, under

an infinite variety of names Proprietors of such claims, and

more especially of toda gyrauss, sel don prosecute them in person; but having retired to some secluded resi dence such as Rappeepla and Vandavie, they proclaim themselves chieftains, and rally adventurers around them to whom they sometimes farm out the grassia demand or depute them to levy it. Thus qualified the adventurer enlists a bandittl of every caste and country, with the intention of making money honestly, if circum stances favour him but at all events of making money In the course of ins operations, the zemindars are bribed or bullled into new surrenders the government revenue is misappropriated its subjects mutilated and the country devestated These suronds vexatious as they are are perplexed and aggravated by the family fends of the Grassus whose claims are subdivided hito minuta shares and so contradictory the ane to the other that the culturators are quite anecriain which is the truo and winch the false elalment. but all are equally compelled by these incendiaries to projutiate their for bearance by contributions of food

and money. Until recently, any proposals made by government to liquidate all these claims, by payment of a fixed sum annually, were always rejected, the Grassias preferring a fluctuating revenue, with the military pomp it confers, to a certain onc without it. It occasionally happens, also, that these demands lie so long dormant that the extinction of the elaimants is concluded, when suddenly an heir, real or fictitious, enforces his pretensions by conflagration and murder. Indeed, so complicated arc these claims, and so anarchical the system of collection, that the British revenue officers have never been able to arrange any thing approaching to an accurate list of them, from which their justice or injustice might be inferred

A large proportion of these Grassias, who thus infested the British territories, were resident in the adjoining countries, then belonging to the Peshwa and Guicowar, and more especially the divisions of Rajpeepla and Attaveesy, Mandavie north of the Nerbudda, Meagaum and Ahmode, between that stream and the Mahy, and Mandowee on the Tuptee. On the rugged margins of the Gujerat rivers many Grassias still reside in a kind of independence, and also over the Gujerat peninsula, usually denominated Cattywar by the Criminals from the plains natives fly to their haunts for refuge, and receive the names of Grassias, Cattles, Coolies, Bheels, and Mewassies, but are in reality thieves, and so numerous, that formerly they were estimated to compose one-half of the population north of the Mahy river. The villages held by Coolies are in this quarter called Mewass, but this term applies properly to all refractory villages, whether held by Coolies, Rajpoots, or Bheels. Mewassie villages are generally situated in hilly or broken ground, surrounded by deep ravines, jungle, and of difficult access: for in India mere situation often decides the character of the natives, as obedient or predatory. Mewassie, in fact, is used for refractory, whether

applied to Rajpoot of Coolie; but as all pretension to independence in a Cooly is reckoned usurpation, and not so in a Rajpoot, the term has been applied to the former in contradistinction to Grassia. Since 1814 the Bombay government has been strenuously endeavouring to effect an arrangement for paying the Grassia claims from the public treasury, and considerable progress is annually made in accomplishing this very desirable commutation

Of all the plunderers who formerly infested, and still, but in a less degree, infest Gujerat, the most bloody and untameable are the Coolies, who, however, present different characters in different quarters, the most barbarous being in the vicinity of the Runn, or in the neighbourhood of the Mahy These were taught to despise every approach to civilization, and the usual appellation they bestowed on a man decently dressed, was pimp In order to procure reto a brothel spect, they stained their apparel with pounded charcoal mixed with oil, and their charons (priests and baids) and other influential persons surpassed the laity in filthiness. With this tribe cleanliness was considered indicative of cowardice The Portuguese at an early period used the name of Coolic (or slave, in Persian) as a term of reproach, and from them it has descended in the same sense to the English Besides Gujerat, Coolies are found in other parts of India, and more especially about the northern portion of the Western Ghauts, where they confine on the Bheels, whom they somewhat resemble, but are less predatory and more civilized These inhabit part of the range to the south of Baglana, and the country at its base on the west, as far notth as Bassein; but they are much more numerous in Gujerat.

The description of men named Bhatts or Bharotts, abound more in Gujerat than in any other province of India; and during the sway of the native powers, and even until recent times, possessed unbounded influence. Some few cultivate land, but the

greater number are recorders of births and deaths, beggers and stinerant isards in which fast capacity they also frequently nre truders Some of this easte formerly stood security for tha revenue and guaranteed the observ nnee of ngreements ond awards They are n singularly olotinate race ond when pressed far money for which thay have become security, sometimes sacrifice their own lives; but more frequently put to ileath some sged female, or a child of their family, in the presence of the person who caused them to break their word Bhatt, however never becomes security for a person of whom he is ignorant. Under native rulers the Bhatts were a link that connected the wild Mewassy population with the govern ment; every Grassia Coolie, and Bheel chief having his Bhatt whose intervention was then calculated to produce a salutary influence on minds callous to all impressions but those These Bhatts were of superstition rewarded by a small per-centage on the omount of revenue for which they became security, and for the consequent Protection it afforded against the extertions of the inferior agents of the governments their persons being regarded as eacred, nod their in fluence predominant over the minds of the natives

The Charons are o sect of Illindoos allied in manners and customs to the They are often possessed of large droves of carnaga cattle by means of which they carry on o distant inland trollie in grain only other articies. Travellers in the wildest parts of Gujerat are protected by Brahmins and Charoos hired for the purpose When a band of predatory horse appears these sacred persons take on oath to dio by their own hands in case their protégé is pillaged; and in such veneration are they held by these superstitious thieves that in almost every case this threat is found effectually to restrain them.

Among those most benefited by the lax system of government that followed the death of Anungzeho were the religious orders, such as

the Bhatts and Charons, who, however never enjoyed or exercised any nastoral influence like that of the Realimina The legality of their ac qualitons was never investigated from the horror of their self immolation which they threatened if it were ottempted The system of Bhatt agency in revenue motters strongly nincked the district substitute between the Mahnratto rolers and their subjects If the one demanded of the blewmates Bhatt security for the payment of the revenue the other required a similar security from the government against 1th own oppressign and extertion The instrumen tality of the Bhatts was consequently o usefui and economical expedient to a feeble government incapable by legitimate means, of controlling and gradually civilizing its turbulent subcets; but wee o clumsy machinery that impeded the progress of a strong one The Mewasses, from the time of the cooquest, received the most miorinus treatment from the Maharattas who havenedriven them to desperation, believed it hipossible to reclaim them; and in reality al ways treated the Grassins Coolies ond Bleels like outrosts from society ood beasts of the field But on the substitution of a govern

ment solicitous for the welfare of its subjects and desirous of elevating these classes from a state of degradation to their proper station in the scale of human beings, o different result took place; and the Mewasses never demanded security from the British government against its own oppression not being apprehensive of nny The annals olso, of oil native history from the Maharotta conquest. prove the inchiency of seventy, whether exercised by means of treachery or by brute force, in reclaiming their evil propensities. lo the more early stage of the British establishment to Gujerat policy dictated the propriety of having recourse to every expedient for checking and keeping in order tho unruly tribes, until such time as ex perience of its justice and energy should convince them that full reli

ance might be placed on the first, and that the last was not to be resisted with impunity. The natural result of such wise and moderate policy has followed; and at present the Bhatts, once so important a race in this province, have become so insignificant as searcely to deserve serious notice, while all the industrious and peaceable classes have advanced greatly in wealth, comfort, and security.

In Gujerat, as in other parts of Hindostan Proper, there are a race of people called Ungreas, whose profession is that of money-carriers, which is done by concealing it in their quilted cloths. Although miserably poor, one of them may be trusted to the value of 1,000 rupees, to earry many miles off, merely on the responsibility of his mirdla or superior, who frequently is not richer than the other They are of all castes, and generally well armed and athletic When performing distant journies, they assemble in parties, and fight with desperation to defend a property for which their recompense is a mere subsistence, and which, under other eircumstanecs, they would readily steal. There is another set in the northein and western tracts, named Puggies, from their extraordinary expertness in tracing a thief by his steps. When nccessary, the examination must be resorted to early in the morning, before the people have been moving about; when, such is their skill, that they seldom fail in pointing out the village where the thicf has taken refuge.

The Dheras of this province are a caste similar to the Mhars of the Deccan and the Parias of Malabar. Their employment is to carry filth of every description ont of the roads and villages and from their immediate vicinity. They scrape bare the bones of every animal that dies within their limits, and share out the flesh, which they cook in various ways, and feed on. They are also obliged by ancient custom to serve the state and travellers, as carriers of baggage to the nearest village from their own. They are ginlty of many netty thefts, and much addicted

to intoxication. Their gooroos or priests, named Garoodas, eook and deyour earmon like the rest of the tribe; and, on account of their extreme degradation, dare not read the vedas or learn Sanscrit. They have abridgments of the mythological stories of the Puranas, written in the vernacular idiom on rolls of paper, ornamented with rude figures of the heroes of the Ramayuna, by the exhibition of which and the muttering of some charm, they pretend to eure diseases. In the Gijerat villages it is customary to make the Dheias, Halalkhors, and Bhungeas, who eat carrion, and the Bheels, who kill innocent animals, to live apart in huts by themselves. Although the British service in the Sepoy liattalions offers an elevation to the young Dheras, from the most abject degradation to high wages and dignity of rank, there are extremely few instances of their ever availing themselves of it—indeed scarcely any; neither do they often become eonverts to the Arabian religion. washermen are also considered so ciuel, on account of the numerous deaths they involuntarily occasion to animalculæ in the process of washing, that they are likewise elassed among the seven degraded and excluded professions.

In this quarter of India the term Koonbee is applied to the pure Sudra, or fourth caste, whatever his occupation may be, but who in Gujerat is generally a cultivator. In the Deccan this title distinguishes the cultivator from one who bears arms, and prefers being called a Maharatta. They most observe the Brahminical forms of worship; but the Gujeratee Koonbies in their diet abstain from all flesh and fish; whereas the Maliarattas cat freely of mutton, poultry, fish, game, and every animal fit for food execpt the cow species. A Gujerat Koonbie will not willingly kill any animal, not even the most venemous snake According to tradition the ancestors of the Koonbies, who are now the most numerous and industrious portion of the agricultural peasantry, were emigrints from

Ajmeer and Upper Hindostan ٨t present they are subdivided into three tribes the Lews, the Chilyen ond the Arianna Formerly the Validmedans of Gujerat engaged but little in a riculture or manufactures addict ing themselves mostly to traffic and a martial life; but since the exten alon of the Bruish influence the latter profession lios so much declined, that they are gradually resorting to the pacific arts of husbandry the present Mussulmouns are become quite an Indalent and effeminato race of reorde

The different Ayat or families of Brahmins are eights four called after the places of their nativity or Inheri tance Luch has several subdivimons the members of which although on an equality are not permitted to intermarry the minute districtions being almost innumerable Mr 11 phinstone is of opinion that the Ilas poots are strangers in Gujerat Each tribe gives a separate account of its own settlement but scarcely any at a remote period. They appear to have enginally come from Mewar. Marwar and the countries that we call itemootana, home appear to have passed into Sinde and returned by Lutch Into Gojerat.

The Vanceyo (named Bunrans hr the I nglish) are a numerous tribe of Hindoos la Gujerat where they are separated into many divisions, besides the Shrawuks, or seceders from the Brahminleal doctrines They are all of them merchants and traffickers and many travel to parts very remote from Indus where they remain from one to ten years, after which they rejoin their wives and children blany also finally settle in the towns of foreign countries, where their descendants contioue to speak and write the Oujerattee tongue which may be pronounced the grand mercantile language of foreign Indian marts is very osarly allied to the filledi while the character in which It is written conforms almost exactly to the vulgar Nagari On examining the translation of the Lord's Prayer into Onjerattee, the musionaries discovered that in thirty two words no less thing twenty-eight were the same os the llengalese and Hindontomy specimens. In 1821 of Hindon re former named baam harrion had made considerable progress in collecting converts in his cow doctrines, which appeared to be a great in provement in the prosiness and absurbity of the Brahmuneal idolatry; but still he did not appear to have any intention of shaking off the whole aystem intending only to modify it to suit his precibiar views.

The Jain sect are here mere numerous than in any of the contiguous provinces, and possess many hand some temples, adorned with wellwrought smages of morble spars, and Their chief deity, of the twenty-four they have altogether is worshipped as in other parts of India under the name of Parswanath Among the Brahmmical Illudoos the officeents of Siva mark their forchends herizontally, and those of huhnu perpendicularly, which should be renewed every morning and if atternable by the hand of a Brahmto At the vents of the Rappoots Grassine, and other tribes opium is olways presented in some form, solid or laguld acil swallowed by the guesta in quantities that would destroy n Europeso The natives here especially of the Respoot castes when driven to desperation dress in sellow cloths which is a signal of despot and being reduced to the last extremity females here are frequently known to burn themselves with hosbands with whom they have never cohobited and with those who have ill treated them as well as the reverse o mistaken sense of what they conceive to be thele duty setustion them, totally Independent of affection.

Besides its notic obordes and castes, Gujerat (arth Bomba) contains rearly all the Paraces or fire-worshippers to be found on the condinent of India the feeble remains of the once predominant religion of to Mag [I According to their own traditions, after the Mahomedin religion was promulated in Arabia, and began to

pervade Persia, the ancestors of the Indo-Parsees retired to the mountains, where they remained until the overthrow of the Persian monaichy, and the death of Yezdyırd, the last sovereign. Finding the religion of their native country wholly overthrown, and themselves outlaws, they wandered towards the port of Ormus. then governed by a branch of the old royal family, where they resided fifteen years, during which they acquired the art of ship-building, for which they are still celebrated At the expiration of the above period they quitted Ormus, and proceeded to the island of Diu, where they solourned nineteen years, but finding it too small for their increasing numbers, they embarked for Gujerat, where they first lighted up the Atish Baharam, or sacred fire, and spread themselves over the country At present they are dispersed among the towns and villages along the north-western coast of India, and in 1815 were estimated at 150,000 families.

The zendavesta, or sacred book of the Parsees, is the only work known to have been written in the Zend language, and is believed by them to have been the composition of Zoroaster, in the reign of Gushtasp (supposed to have been Darius Hystaspes), or about his era. Although the writings of Zoroaster are alluded to by the ancients, the name of Zendavesta does not occur for 1,500 years after the period when they are supposed to have been published The original work of Zoi oaster is said to have contained twenty-one nosks or books, of which only one entire nosk, conjectured to have been the twentieth, is now extant and a very few fragments of the others. greater portion of the Zendavest is a series of liturgic services and prayers for various occasions, and is totally destitute of any literary merit.

No existing religion, the Jewish excepted, has continued from such remote ages, with so little apparent change in the doctrine or ritual. Different opinions, however, are held regarding the nature of the world. All

the lasty consider Ormazd the author of good, and Ahriman the author of evil; but many of the priests assert that all things originated from Zerwan, or Time, and that Ormazd was only the first of created beings. They admit, however, that Zerwan has ceased to operate, and that good and evil flow directly from Ormazd and Ahriman. Ormazd is all light, purity, and excellence, and inhabits the primeval light: Ahriman, all darkness, impurity, and wickedness, and inhabits the primeval darkness. Cayumers, the father of the human race, was created by Ormazd, but Ahriman attempted to destroy him and attacked the revolving sphere, but was repulsed and precipitated into hell. The modern Parsees, even of the sacerdotal class, know little or nothing about the theory of their own cosmogony, the whole of which, however, is evidently Chaldean, and often forcibly reminds us of Milton's Paradise Lost. Sin and misery found their way into the world, and continued to increase until Zoroaster promulgated the law, and instructed man in the will of heaven. The whole Parsee system is founded on the supposition of a continued warfare between good and evil spirits, which pervade all nature, and religion teaches us how to gain the assistance of the first, and to escape from the snares of the last.

The grand visible objects of Parsee veneration are the elements, and more especially fire, light being considered as the best and noblest symbol of the supreme being. The sun, moon, planets, stars, and even the firmament, are consequently objects of profound respect; but they have no temples considered as the residence of the Deity or of any superior angel, their fire mansions being merely to preserve the holy element pure and unextinguished. Of the latter there are two species in Gujerat, the Behram and Aderan; the first composed of 1,001 kinds of fire; the last of at least fifteen or sixteen These varieties of combustion are procured from different ma-

terials such as the fire from the fact tinn of wood, frem a funeral pile from a liteben fre, de Tie Belieum fire, that must reserved to only to be fund in their temples see at l broom (a town near flame in), st National at 1 at 10 river In their original country the greatest rumber of Corbres or fire-ward by-ere per collected in the city of I call a tea ed about \$30 miles conthera t from Is pahan where they are sall still to orcurr about 4 000 louve. •

general not only disliked but despised, and little attended to except by the females. Like the Hindoos, the Parsees show some desire to be esteemed by the individuals composing their own peculiar tribe, but have little regard for any extraneous opinions, and appear totally insensible to any remote check of religion bold, active, and persevering in the holy thirst of gold, and many of their mei chants by superior enterprize and address have accumulated large for-On the other hand, like all tunes. Asiatics, they are tyrannical when in power, regardless of truth, and not the less esteemed by their own sect for the want of it The consequence is, they express no contrition when detected in any fraudulent attempt or imposture. Their houses are in general duty, wretchedly furnished, and slovenly arranged, presenting to the view women, children, master, mistress, and servants, stretched out on the floor in all directions, asleep, dozing, or lounging. They are not, however, parsimonious, but on the contrary both luxurious and voluptuous, and frequently generous. Their great expenditure takes place on the marriages of their children, on which occasions, like the Hindoos, they waste immense sums in childish show and folly. Their houses of recreation on the island of Bombay are generally a little distance in the country, and sometimes handsomely furnished after the European fashion, in which mode the disposal of their table equipage is Like them also they inai ranged dulge freely in luxurious food, and rather exceed them in their potations of wine. But notwithstanding all their faults, the Parsces are certainly the most improveable caste in India, being free from Hindoo and Mahomedan bigotry, and in every respect more resembling genuine Europeans, than any other class of natives at present existing in Southern Asia

The province of Gujcrat enjoyed a much more flourishing external coinnerce, even during the most convulsed period of the Mogul government, than it has ever done since.

The imports consist mostly of sugar, raw silk, pepper, cocoa-nuts, cochineal and woollens, and absorb a great The Surat manudeal of bullion. factures have long been famous for their cheapness and excellent quality. The chief are cotton, cotton-goods, and grain, principally to Bombay. Almost all the castes of this province (Brahmins and Banyans excepted) occasionally follow the occupation of the loom, which employs a great number of the more industrious of the lower classes In all the larger towns, that remarkable class of men the Boras are to be found, who although Mahomedans ın religion, are Jews in features, manners, and genius. They form everywhere a distinct community, and are every where noted for their address in bargaining, minute thrift, and constant attention to lucre; but they profess total uncertainty of their own origin Boothanpoor in Candersh is the head-quarters of this singular sect, and the residence of their moollah or high priest, but individual Boras are found straggling all over Gujerat, and the adjacent provinces, as itincrant pedlars.

It is a custom in Gijerat, when a merchant finds himself failing or actually failed, to light a blazing lamp in his shop, house, or office, and then abscond until his creditors liave examined his effects, and received a disclosure of his property. Until his creditors have acquitted him, he does not wear the tail of his waistcloth hanging down, but tucks it up. Persons who act thus in time, so as not greatly to injure then creditors, are highly esteemed, and have so frequently been remarked as subsequently prosperous, that Hindoo merchants have been known to set up a light (proclaiming themselves bankrupt) without any real necessity, in hopes of good fortune afterwards

The principal towns in this pro-

vince are Sulat, Ahmedabad, Broach, Baroda, Cambay, Gogo, Bhownuggur, Chumpaneer, and Junaghur. It is difficult to estimate the inhabitants of a country where the extremes of population and desolution nicet. Surat

and its vicinity exemplify the first, and the morth western districts the accord for the sake of accuraty the great body of the natives do not live in am, le sequestered houses hut In assemblages of them; in Valabac, on the contrary, every Hindoo has a distinct or distant dwelling. The south-castern zillalis of Gujerat aur pass Bengal in the abundance of trees and hedges in handsome aubstantial well-built villages and in the decent thriving appearance of the people Culeratty village is often visited by travelling comedians who exhibit puppet-shaws, and act historical plays They are also occasionally frequented by Itiocrant niusicians ainging and dancing men and women wrestlers and very expert jugglers dancing bears trickish goats and monkies.

I ortifications were formerly name rous in Guierat an I still continue in the more savage and remote quarters but wherever the British influence ex tends they are fast crumbling to dr-Some years ngo female Infan tle le prevailed among the Jahrejsh tribes, of which are the principal chieffaint of the peninsula, anch us the Jam of Noanegur the Hajas of Wadman Goundel and others All these leaders through the exertinus of Mr Duncan when governor of Bombay, and Col. Alexander Walker la 1807 were induced to enter into engagements renauncing the lahumon practice which was usually perpetrated by drowning the infant in a have no milk as soon as born but as acareely ony of their female children ever reach maturity it is strongly suspected they have not adhered very strictly to their agreement whole number of inhabitants in this vast province are probably much un der rated at aix millions, in the proportion of one Maliomedon to ten lindoos

There are many semarkable wells and watering places in Gigerta particularly one near Boroda, which is said to insecont mine lacks of rupers; and another at Vadva in the vicinity of Cambay, which, from the sinception appears to hore been erected in

A D 148? Smoking tobacco is a very universal practice among the Hindoo moles (Brahmine excepted who toke anuffreely), and Mahomedans of both acces throughout Gujerat. This province has long been famous for see excellent breed of cattle, especially the buildocks, which are reckoned the atrongest a wiftest, and handsomest.

en Indes It is a common belief in Galerat that the province was originally peopled by the rude castes that still exi & and are known under the name of Cooker and Bheels but there is nerther record nor tradition regarding the nature of their religion or government while subsisting in this primeral state Subsequent to this ern there is reason to suppose that the space of enuntry from the gulf of Cutch to the Concan composed one great nation apealing and writing the samo language the Gujeratty The names at present affixed to the aubdivisions of the province are entirely modern and can be traced to some incident of their history more recent period the Ralpoots ne quired the ascendance and the most powerful chief of that race resided at Auhulva la (named Puttan ond Nehr walls in the maps), situated on the northern frontier According to legends handed down among the Halpost tribes they do not appear to have been aborigines but military ad venturers who entered the province at different periods, and there esta blubed themselves they consequent ly have no nacient cloim to the coun try, and even now continue to be onposed by the primitive inhabitants Three Rappoot dynasties are said to have occupied the throne of Anhul vadat the Chowrn the Sociunker and the Veghcela from which many of the modern Grassla families pretend to be descended

We learn from Abul Fazel, that. Gujerat was first invaled from the west by Sulton Vahmood of Glurn about A D 1025 who subsected the throne of its nativo prince nomed Jamund and plundered Nehrwalin, his capital in 1295 its meationed

2 2 2

by Marco Polo. After the establishment of the Delhi sovereignty, this province remained for many years subordinate to the Patan emperors; but in the fifteenth became again independent, under a dynasty of Rajpoot princes converted to the Arabian faith, who removed the scat of government to Ahmedahad, and mfluenced many of the natives to embrace their newly adopted religion In 1572, during the reign of Acher, this race of princes was overthrown, and the province subjugated, but during the period of its independence, it had flourished greatly as a maritime and commercial state, for when the Portuguese first visited Malacca, they found a regular intercourse established between that distant port

and Gujerat. After the death of Aurungzebe in 1707, this province was immediately overium by hordes of Maharatta depredators, and about 1724 was finally severed from the Mogul throne, which never afterwards recovered its authority. Until 1818 the Maharatta Peshwa and the Guicowai possessed large tracts of country. but at present only the last remains, the authority and dominions of the other having devolved to the British, who previously occupied about 6,000 square miles of feitile territory. The most striking circumstances attending the British progress were the extraordinary obstacles that existed to the introduction of order, and the surprising success with which these obstacles have been overcome. continual intermixture of our ter-1 itories with those of the Peshwa, Guicowar, the nabob of Cambay, and the unsettled tributailes of Cattywar and Mahykaunta; the number of half-subdued Grassias and Mcwassies, the numeious and ill-defined tenuies of every village, the turbulent and predatory habits of a large proportion of the people, combined to make the country, more especially beyond the Mahy river, more difficult to manage than any portion of the Butish conquests in Hindostan, yet by the cautious progress of the government, the judgment and temper of the local functionaries, our system and authority has been gradually and tranquilly established, without either irritating our subjects, or emhairassing ourselves by any sudden or violent changes.

In A.D. 1820, the north-western fiontice of the British dominions in this quarter were formed in the first instance by the Runn, to the north of which is the sandy desert desert tract between the frontier of Jesselmere (about lat 26°) and the was divided between the Ameers of Sinde and the Joudpoor raja, whose respective limits might be indicated by a line drawn from Nuggur in Parkur to Jesselmere The Sinde territory, however, would cross this line near its southern extremity, Bankasır and the whole of Parkur belonging to Sinde and the whole line being still contested, the Joudpoor 1aja claiming Amercote, and having actually levied contributions as fai west as Sansur and Chaucra

Parkur 15 partially cultivated, but all the remainder is a desert, consisting of high sand-hills, with scattered spots of verdure, and the capital villages that figure in our maps seldom containing more than 100 huts. This desert extends to near the banks of the Lonce, where a fertile tract commences known by the name of Never, inhabited by Rajpoots, and subject to Joudpoor, to which also the district immediately beyond the Lonee is subordinate, while that on the southeast is paitly tributary, and partly in direct subjection to that state, as is also Sachore The limit of the Joudpoor dominions to the south is shewn by a line drawn from Bayatree, neai Bankasir, and at the mouth of the Lonee due east of Abooghur, and passing about half way between Sachore and Theraud The above states, including Palhanpoor, fill up all the space between the Runn and the mountains of Abooghur, while the whole tract, whether belonging to Joudpoor or to our new allies, is thinly 1. shabited, and ill supplied with water, while its natural desolation

hos been operasoted by the famines and petitlen ril distempera of 1813 mil 1814.—(I fplias over Brusmer t Public US Becausate Cron Bourchier, 31 atter Vacuardo, Janes Forber 4¢)

Criticori — A small district in Northern Hin lo tan principality of Browsher noted for the number of its from nine but containing few spots capable of cultivation — (Centralists)

Girentagant a [ and Industry a file again a district in the province of Belphoor, similar between the hands and Toomhuddra trierra, and honoided towards the east by the Milpinta. A great proportion of third trict is which and hills but the toward and villages are pleving and usually encomposed with fine clusters of faminand trees. Last of this territory belongs to the Nisam ond part to the British government as assectioned to the Pesting The practical toward are Gujuodu, bur and hanns here?

(arthornoura.—Abill forth the province of Beythor timate I on the detached extremity of a long wind stone mountain fifty-nine miles. See from Darwar In AD 1801 line place with a small surrounding tract was held by Builen Row Gorpera (a descendant of the familia. Morari Row) Independent of the Pealing, ofthough within his dominions.

Gelacit —A fort in the province of Agra situated within the limits of Col bilimer's julifrent the Douby lat. 225° 28° V

GOME—Formerly one of the twen ty-four rayships in Northern Hindon-tan but now absorbed in the Gorkhydomions Galan the capital is at stated on old in lat 28° 11'N I on 82° 17'P, ea, bit five milea W W from Gorkha The castel la built of bricks and covered with ules, and the town formerly contained 500 houses.

mostly thatched and a great part of a hall mert named Herz, hant, belong ing to the chief of C ulm! According to native testimany this territory contains mises of zine, clouders, and copyer. In Guilini and Baltimag one-tail to the people are kinayas one es, this Brahmins, and the remainler impure tribes of cultivators and in thicers. The principal crop omong the C ulm hills is rice which is reaped in the beginning of their winter.—
(I Backama fr)

GLLTA,-A Hindro sanctuary In the province of Ajourer, three inlies I liv & from the city of Jespour, with which It communicates by o read over steep mountain pared with large blacks of atone. fane is skinated in a wild and deep ravine ainklit abrupt rocks waters of a sacred spring ore colle t ed in two brautiful reservoirs and the little mace that remains is crowd ed with parodas (some perched high on the rock), partitions on atone arches Lower flown there is a small Insar and a govern a garden peopled with Innumerable black faced man-Lris-(I ullarten fr)

Giventry—A small bamlet in Anthern Hindostan mear the bor stern of Tibet twenty-one miles west of Binadrounth temple for 70° 40° F 10°,317 feet obor e the level of the aga. Near to this place there is a sanga or saloging bridge over the Dunit

GLNANATH — Astockasion Arthern Himiostan, eleven miles north from Almoray lat 29° 46 N lon 79 18 L., 6,843 feet above the level of the seg.

Genass Pass.—A pass in Northern Inindestan over the outer ridge of the Illinaidya leading from the valley of Illinain Into 18 appa. Int 31° 21° N, Ion 78° 8° F, elevation above the level of the sea 15 45° feet. This glass or pass was erosted by I lett. Herbert on the 70th September 1810. Six miles of the road was over anow then very soft in some places, the general depth from

three to six feet; but on the summit the ground could not be reached with a stick nine feet long thermometer at sunset stood at 33°, and water boiled about 187° Faht. This ridge appeared to be entirely composed of gnesss -(Hodgson and Herbert, &c)

Gunderghur —A lofty hill-fort in the province of Bejapoor, division of Azımnaghur, situated about twentytwo miles travelling distance W. by N. from Belgaum.

Gunduek (Gandahi) —A district situated in that polition of the Bejapoor province which hes to the south of the river Krishna, and principally between the forks of the Malpurba The soil is naturally fertile and productive, and the country tolerably populous, notwithstanding the anarchical government it had for many years experienced previous to its coming under the British rule in 1818. The British portion forms part of the district of Darwar, besides which the principal towns are Hoobly, Noolgoond, and Kittoor.

GUNDUCK RIVER (Gandakı or Salgrami).—The source of this river is supposed to lie near the enormous peak of Dhawalagiri, or the White Mountain, supposed to be 27,000 feet above the level of the ocean, and situated about lat. 29° 30' N, lon. 83° 45' E. Another conjecture fixes it in the table-land of Tibet, which, if correct, would give it a course of about 450 miles, including windings, until its junction with the Ganges nearly opposite to Patna It is to be regretted that the valley of the Gunduck has not yet been explored In that valley ammonites are known to abound, and other antediluvian remains may be looked for. It is by this route, also, the great white mountain of the Himalaya is to be approcched. Measurements taken from remote stations, give the Dhawalagiri an elevation of 27,000 feet above the level of the sea, and it is desirable that these should be confirmed or corrected.

The Gunduck in its early course is

called the Salgrami, from the schistuous stones, containing the remains or traces of ammonites, found in the bed of the river, and carried thence to all parts of India, where they are worshipped under the name of salgrams. They are mostly round, and commonly perforated in one or more places by worms, the spiral retreats of antediluvian molluscas being taken by the superstitious Hindoo for visible traces of Vishnu Common salgrams are about as large as a watch, and they are valued according to their size, shape, and internal construction. The price varies according to circumstances, some being valued so high as 2,000 rupees one of the Hindoo legends the following story is found explanatory of their

original consecration

Vishnu, as the preserver, created nine planets to regulate the destinies of the human race Sanı (Saturn) commenced his reign by proposing to Brahma, that he (Brahma) should submit to his influence for twelve Brahma referred him Vishnu; but he was equally averse to the baleful influence of this planet, and therefore desired him to call next day. On Saturn's departure, Vishnu meditated how he could escape the misery of a twelve years' bondage to so mauspicious a luminary, and the result was, that he assumed the form of a mountain. Next day Saturn was not able to find Vishnu, but soon discovered that he had become the mountain Gandaki, into which he immediately entered, having assumed the form of a thunderbolt worm, and began to perforate the stones of the mountain, and in this manner he persevered in afflicting the animated mountain for the space of twelve years At the end of this probation the deity resumed his own figure, and recommended that the stones of the mountain Gundaki should be in future worshipped. On being asked by Brahma how the genume stones might be discriminated, he said they would have twenty-one marks, the same number as were on his body. Since the above era the

salgrams of the Gandock have been held in high estimation; and suring, the hot months the Brahmins suspend a pean perforated with a bit of through which the water dimps on the stone and keeps it cool onlibeing can be being in another panis drank in the credin, with much satisfaction by the decout of that faith. The Brahmins well these stines but trafficking to images as recknored

di honours'ic The following is 11r 1 Buchansn a description of the sairram, which is more minute than alone On the banks of the Gundeck near Makthnath north of the Housinga (lat だい 10" \" lon. No Iu I ) la a precipice from which the riser is supposed to wa h the salgrams. Pilgrims who have been at the place say that the atones are found partly in the precipice and partly in the bed of the riser, where it has we hed down the earth On account of its contaiong these stones, this branch of the river is usually enited the Sal grand and the channel every where be on Muktinath until it reaches the I lain of India at Sheelmoor abounds with these stones. Ther all come t of carbonate of lime and are in goneral note I lack but a few have white venu. Their culour is probably owing in some metallic impressation. which also occasions their great speenfic weight. Most of them are what naturaista cail petrifections, and by far the most common are ammonites. half imbedded in a buil of stone, ex octly of the same nature with the peinfied animal Others which are reckoned the mo t valuable are balls containing a cavity formed by no ammonite that has decayed and left only its impression The ammonites, of the impressions are called the charras or wheel of the salgram but ore sometimes wanting ; the stone belog then a mereball without ony mark of animai causine Some balls have no enternal opening jet by rubbing away part of one of the aider the hollow-wheel or chacra la discovered Such salgrams are reckoned particularly valuable.

Bed les saigrams some few grains of gol'l are occasionally aeparated from the sand of the Gunduck and also froto the substance of the saigrams, which on examination have been found unt to be calcarcous in Northern I lin lostan the term funduck is a general appeliation for a rivery and Major iltentific control of Arrasan. The stricter slaves of limitous all turn from swimming in this timer it being privilited in their saided loss all turn from swimming in this timer it being privilited in their saided loss.—(I Harbarous Coferente Rard, Khippatrick, Renard, Illyand, 67 1

### GUNDWANA.

A large province of the Decean extending from the est intenth to the twentr fifth degree of north latitude. On the north it is bounded by Alla lated and lisher on the south by Berar Hydrahad and Orsea to the excit has Berar and Orsea, and on the west Allahalad. Makes, Candel he Berar, and Hydrahad. In Iensh it may be estimated at 400 miles by 2°0 the atering breadth.

Gundwans, in its most extensive signification comprehen is all that portion of Hindovian surroun led by the soubalis above-mentioned which remained unconquered up to the reign of Aurengrabe; but Coundwana Proper, or the country of the Gund Is more atnetly limited to the thetricts of Gurrali Mundlan Mehkoor hheiriah, Assissor Chutecoghur Deoghur, and Chandah, stretching south olong the eat aide of the Wards one Godsvery to within one hundred mies of the mouth of the riser isst mentioned Within the aboro space intervening between Bengai On as and Sagnoor there were a va t tumber of petty rajashins which although partly tributary to the Nagpoor Ilaja or to the limitsh government were until recently in a manner politically independent and unconnected with each other These are all wild and woody countries, lutherto affording little or no revenuo to their dominal sovereigns, and in

reality of no importance except as being conterminous with Bengal and Orissa, to which then rugged and mountainous surface, covered with thick jungle, presented a strong barmer against any invasion, especially of eavalry, from the west Several of these have been incorporated with the British districts acquired in 1818 from the Nagpoor Raja, and the whole are more or less directly subordinate to the British government, but the geography of this part of India has not yet assumed so determinate a shape as to authorize an alteration of the old designations of the principal tracts, which up to 1817 were the following, commencing at the northern extremity, viz 14 Sumbhulpoor. 1. Chandail. 2. Boghela. 15. Sohnpoot. 3. Billounja. 16 Choteesghur.

2. Boghela. 15. Sohnpoon.
3. Billounja. 16 Choteesghur.
4 Singrowla. 17 Mundlah.
5. Raja Chohans 18. Gurrah
6 Manwas. 19 Mehkoor.
7. Canroody. 20 Kheirlah.
8 Sohagepoor. 21. Gundwana
9 Sirgooja Proper.

10. Odeypoor. 22 Nagpoor. 11 Koorba. 23. Chandah.

12 Jushpooi 24. Bustar.

13 Gangpoor.

During the leign of Aurungzebe, the whole northern part of this province, named Baundhoo or Bhatta, was partially conquered by his generals, and annexed to the soubah of Allaliabad, but they never made any impression on the southern quarter, which remained unsubdued about the middle of the eighteenth century, when Ragojee Bhoonsla of Nagpoor reduced or rendered tributary a large proportion, and confined the independent Gonds within very narrow limits. By Mahomedan liistorians the large division of Chotcesghur is sometimes named Jeliarcund, but this appellation properly applies to the greater part of the province.

Gundwana contains the sources of the Nerbudda and Sone rivers, and is bounded by the Wurda and Godavery, but is on the whole but indifferently supplied. The Mahanuddy, Caroon, Hatsoo, and Silair traverse its interior, but are not navigable within its limits; neither are there any lakes of the slightest magnitude. A continued chain of hills extends from the southern frontier of Bengal almost to the Godavery, and formerly separated the eastern from the western division of the Nagpool do-Indeed a very large prominions portion of the sui face is mountainous, ill-watered, unhealthy, covered with jungle, and thinly inhabited; and to its poverty and evil qualities it has probably been indebted for its longcontinued independence The more fertile tracts were subdued at an early period by the Bhoonsla Maharattas, who claimed as paramount over the whole, but their sway in many paits was little more than noninal, and the tubute could only be realized by the presence of an army. During the war of 1818 considerable benefit was derived from the rebellion of the hill tribes occupying the passes in the Nagpoor territories, who indeed had before been restrained by the apprehension of the co-operation of the British troops against them

The country occupied by the genume Gonds remains for the most part a primeval wilderness, its human inhabitants being scarcely superior to the brute ereation with which they live intermixed number of this miserable tribe exist nearly in a state of nature, and are probably amongst the lowest in the scale of civilization of all the natives of Hindostan. Having been driven by their invaders from the plains to the unwholesome fastnesses of the more elevated regions, they frequently descended during the haivest to the lowlands, and plundered the produce of their ancient inheritance. In the course of the last half century the mereasing appetite of the wild Gonds for salt and sugar has tended more to promote their envilvation than any other cucumstance; and since the establishment of an extensive teak-cutting concern, they have so far overcome their dread of Europeans as to enter into their service for the purpose of felling timber, and

afterwards of assisting the convey ance of the rafts down the Godavery although the sea are is said to he as fatal to them as that of the hills to a sojourner from the plants

The Gonds present the character of no aboriginal people distinct from the llindoos nithough borrowing many of their institutions and prac-Their own religion is of the rudest description the chief object of their worship being o deity named Thurscepen, represented by a small spear-head of iron carefully pre served in certain trees, and his rites can only be performed in woods and jungles. Their own idols are of o similar description possessing various attributes, bestowed on them by the hopes and fears of their savage vo taries alternately o prey to each other and to the beasts of the fo-To these they offer up as sacrifices hogs, goats, and fowls, ac companied with many funtastic rites, even human sacrifices are not abstatoed from, and were formerly com They eat the mest ood never fail to drink hard after the celebra tioo of every ecremony, whether of o purely religious nature or of a mixed description such os births. marriages, and functals The women are as unrestricted on the men in the practice of intoxication, and join in all the songs, dances and drunken To their original deities they revels have added several from the llindoo stock, but they worship in a manner peculiar to their own manners and notions All the individuals of this tribe are remarkably superstitions with regard to omens and portentous signs and practise the arts of witchcraft and soreery in which by their Hindoo neighbours, they are believed to excel In this part of India the Gonds have, rather unaccountably been sllowed to class themselves with the second or military tribe of Ilia doos, a stretch of complaisance in the Maharatta functionaries owing probably to the ancient predominance of the Gondehicfs. These last term Koocctoor' (a corrupthemselves tian of Khetrie), and claim a de-

scent from the Pandoos; and in performing their donestie worship, al though they profess Mahomedanum at their births and marranges they intermingle observances peculiar to Rappoots with those of the common Gonds on! Waboncedans.

Within the limits of their own com munities they seporate themselves into o great variety of classes, subdivision into eastes being apparently so inherent in the nature of East-Indians, and even the Europeans of Calcutta already show a tendency that way With the Gonds the shades of difference in most cases have o reference to dialect, as we find Gurra Gonds Bhopaul Gonds, the Ray Gond of December the Manjee Gond of Bustar, and the Abattollec Gond of the low countries East and west of the Lange hills are the Jaria Gond of Chands, the Marres Gond of Telin gans the Bustar Goad and the koor Loo Gond of the Mahadeo hils. The Monjee Vistree, and hoorkoo Gonda speak dialects illistinct from the one common to the rest Of the two first no specimens have been procured but the koorkoo direct has been found to resemble the language spoken by the Lurkokoles on the borders of Singhboom

In the Namoor dominions the Gonds, like their Handoo oes, bbours, divide themselves 10to twelve and a half eastes, which again ramify intoendless subdivisions, according to the number and nature of their household gods and their rules on the subject of cating and drinking are apparently as complicated and absurd as those of the Brahminical sects. The Gonds eat animal flesh without distinction, even that of the cowand they rival the outcast Himloos in their eagerness after carrion Their language contains among its elemen tary words several of Telinga and Tamul origin The same mixture is to be observed in the Koorkoo which has even o larger proportion of the latter and o similar colneidence is said to exist in the ilialect of the tribes in habiting the Raymalial hills

The Gonds, as o people, have every

where a distinct physiognomy which discriminates them from other tribes. They have usually broad, and rather flat noses, and thick lips, with not unfrequently curly hair while young. There is a great difference in size and strength between the domesticated Gonds of the plains and the wild dwellers in the hills and jungles. The first are tall, well-made, stout, and sometimes even handsome and fair. They are also good agricultural labourers, faithful and intelligent, and not quite so much given to lying as their Hindoo and Mahomedan neigh-Even the wildest of this class are not insensible to kind treatment. or unwilling to adopt regular modes of procuring a subsistence. On the other hand, some of the ruder tribes who inhabit the forests of Bustar and Kuronde are as wild and untameable as the New Hollander, and it is among these chiefly that human sacrifices are still perpetrated. Maharattas, as far as their authority reached, put a stop to this practice, and the zemindars of Bustar and Kuronde have been induced by the exertions of the British functionaries to suppress it within their own limits: it is to be apprehended, however, that their laudable endeavours have been but partially successful. these Gonds the wildest are the Marees, who generally wander about in a state of complete nudity, for even their females have no covering but aprons of leaves Their food consists principally of roots, vegetables, and the tender shoots of the bamboo. They pay but little even of nominal obedience to the Bustar raja, reject all intercourse with other tribes, and at stated periods try to catch strangers in order to sacrifice them to their gods.

The Gonds are mentioned in the historical poems of the Hindoos as being a powerful nation or tribe in early times, and probably an aboriginal people partly conquered and converted by the Hindoos, and the remainder driven to the hills and jungles. The country over which they are now seattered seems to

have been subject to different Hindoo princes, when the Mahomedans first crossed the Nerbudda and invaded the Deccan. The great Hindoo dynasty of Deoghur or Dowletabad is believed to have extended beyond Berar, east to the Wyne Gunga, and north to the Nerbudda, ineluding Candeish, Baitool, &c. the north-east of this state was the kingdom of Guirah, which, on the north, stretched over Deoghur above the ghauts, the present British eastern districts, the valley of the Nerbudda, and beyond that liver to Bundelcund and Malwa, and on the east to the districts of Wyne Gunga, and probably Choteesghur. To the south was the kingdom of Telingana, including Chanda and the southwestern portions of Choteesghui, with Bustar. Telingana and the Hindoo empire of Deoghur were early dismembered and formed into the Bliamenee empile of the Deccan, but Gurrah was not subdued until the reign of Acber. The Mussulmaun princes of the Deecan extended over most of the country between the Wurdah and Wyne Gunga rivers, and close up to the western boundary of Deoghur above the ghauts. lah and Baitool, which were also subdued by them, seem at one time to have been the seats of a Hindoo prince, probably a remnant of the Hindoo family of Deoghur, and the Mahomedan princes of Malwa and Candersh had encroached on the territories of the Gurrah dynasty on the side of Bliopaul and the valley of the Nerbudda, prior to its subjugation by Acber. A period of almost total darkness follows the slight mention of these circumstances in the Mahomedan annals, and the chasm is ill supplied by tradition.

In Aurengzebe's time we find Gond princes of considerable power in Mundlah, Deogliur, and Chanda, and the amount of tribute paid by the two latter would indicate a higher degree of opulence than could have been expected. Tradition reports that most of Deoghur above and below the ghauts, after being devastated

by some great calemity, was overrita and conquered by the Gowala or conferd tribe lerishts orentions Asa Alter the Gowala chief, and reputed founder of Ascerphur, as her ing rule over Gundwana; but Jatha, a Good subrested the power of the Gonales above the chauter and bly descendant Buhkt Boolind, entried his arma beyond Sarpoor, and also made conquests from Mundlah an l Chamla, The territors of Mundlah also became the property of a Gond dynasty by some mess lamed serolo tion; and the reaning family of Chanda termed Holhar bally (prolat lily a remnant of the Warangol princes), were supplanted by auccessors

of the Gond tribe After the expulsion of Appa Saheb the ex Itaja of Agreer, in 1418 ho sought refuge among the will Gond tribes of the Mahadeo hills, which brought on the temporary occupation of the elevated plain of l'uchmurry. o comman ling and central position both with re-ard to the Good hills and to the lints h territories on the Nerbudda, in which these tribes wero In the habit of making predatory Incursions Chyne sah of the Har ree family whose ancestors had obtained possession of the flurrye lalure situated in o mountainous jungle from the Raja of Deoghur had been the grand creator of all these disturbances, by affording an asylum to the ex-rais and aupporting his cause; he was in consequence de posed and permanently confined of Chanda where he died of the cho lera in 1820. The success of the British troops caused most of the Gond chiefs voluntarily to aurrender, and the British government at last manazed to auppresa the avatem of plon der and devastation so long habitual to the Inhalutanta of the Mahadeo hills Indeed so effectual was the change that the Gonda subsequently adhered to their reformed habits under erroum atances of great poverty and distress The tracta in Gundwana acquired by these events were found in a very reduced condition and in 1819 only yielded 1,84,000 rupees per anoum;

but the resources of accept under o state of tranquility were considered capable of grent future improvement. The pigrum tax at the Valuadeo tem ple and the parset leming to it, which had before been invided among many Gond chief and occa ioned endiess disputes was assumed by the British goretiment, which allotted shares to each respectively.

Na, poor is the modern capital of Gundama; the melent ones were Deephor, Mumilah and Gurrah i lint here are no remains indicative that the province at any era flourished as occilized as highly cultivated country since the expulsion of Appa Sabet the et raja a large portion more especially north of the Netholdh has been transferred in the limith government and considerable progress has been made in arrancing its judicial and financial establi hunetta—(Jersius Pablic Al's Document J (prais, Jeckie Capi Bluni, Col Coleboole, 46.)

Gintistiation (Conesa Ghar).— A tawn obtained at the southern extremity of the Agra province neverty five miles by it from Seronge, lat 227 N., ion 75° 16 L.

Girandon — A considerable town in the province of Ajmeer on the road from hotals to Odespoor where Gun-s Bluye the wife of Madhajee Sindia lies buried An establishment is kept up at the temple for the support of which some villages were formerly sanigned but the revenues they jelided have been gradually diverted to other purposes.—(726, &c)

General for Cangarar)—A town in the province of Malas which in 1820 was estimated to contain 1.00 immer; lat 23° 56° \(^1\), lon 70° 41° E filty-six miles oorth from Oojeen Thila town ond pergonnah former) belonged to Hoten but was green to Zalim Singh of Kotah by

the treaty of Mundessor in 1817 It is watered by the Cali Sind river and from wells.—(Malcolm, &c.)

Gungawutty (Gangavatı) — A small walled town with a mud-fort in the province of Bejapoor, district of Annagoondy, seven miles N by E. from the city of Annagoondy, or Bijungur At present it belongs to the Nizam. At the fortified village of Juntcull, about a mile to the south of Gungawutty, there are some cunious remains of Hindoo temples.— (Fullarton, &c)

Gunnarum.—A very small village, but provided with an excellent bungalow for the accommodation of European travellers, situated in the Northern Cucars, district of Masulipatam, about twenty-six miles travelling distance S.W from Ellore

Gunnoorghur —A town in the province of Malwa, thirteen miles N W. from Hussingabad, lat. 22° 50′ N, lon 77° 34′ E.

Gunterry (or Gungleterry)—A tract of country in the province of Aurungabad, separated from Candeish by the Injadree hills. Candeish is comparatively a low country. Gunterry, which joins it on the south, is from 1,500, to 2,000 feet above the level of the Tuptee. The east of Gunterry, though open and fertile, has been almost uninhabited since the famine of 1803—(Public MS. Documents, Jas. Fraser, §c)

GUNTOOR -The fifth district of the Northern Circuis, which, with the addition of Palnaud from the Carnatic, now forms a collectorate and magisterial jurisdiction under the Madras presidency. To the north it is bounded by the Nizam's territorics and the district of Masulipatani, on the south by the districts of Cuddapah and Ongoli, to the east it has the bay of Bengal; and on the west the dominions of the Nizam A.D. 1786 the original Guntoor Circar comprehended an area of 2,500 square miles, exclusive of the mountainous tract on the west, and its general boundaises are the Kishna

to the north, and the Gondegama (which separates it from the Carmitic) to the south. The geography, however, of this quarter is as yet but ill dehneated, in even the best modern maps, where the dislocations of towns and villages are so numerous, that a more exact survey appears requisite. The principal towns are Guntoor, Junaconda, Camupaud, and Nizampatam.

The earth of the Guntoor Circar,

in the neighbourhood of the populous village of Mundaium, is much impregnated with saltpetre In this vicinity the soil is black, and capable of producing every soit of grain if supplied with adequate moisture Unfortunately, however, the bed of the Kushna lics too deep, and after the periodical rams, which terminate in November, it often happens that not a drop of rain falls until next July, for which reason rice cannot be cultivated in any considerable quan-During the months of April, May, and June, animals and vegetables suffer greatly for want of moisture, and every thing exhibits the appearance of decline and misery. After the descent of the first showers a very different scene is presented, for the finest verdure immediately springs up, and all nature scems reanımated. The natural strength of the soil is such, that in good years Indian corn grows to the height of six and seven feet, with ears a span in length. The natives, who feed principally on this grain, are stout and healthy, and during the dry months its straw affords the clucf nourishment for sheep and cattle. Cotton is only partially cultivated in detached pergunnalis, and is usually sown along with grain of different sorts, but the soil and climate are not considered favourable for its pro-Trees are not plentiful; duction those seen are mostly clumps of tamarind tices, which during the hot scason afford refreshing shelter to-Mango, cocoa-nut, and the traveller palmira tiecs are scarce, but incasures have been taken to encourage the cultivation of the latter.

are diamond mines in this Circar but it is n very long period since they lime been productive or profitable; and several mins of Buddil t temples have been discovered within its limits.

In 176 , when Lord Clive acquired the other Northern Circurs from the Mogul, Guntour remained in the possection of Bazalet Jung the Nizam n brother to be enjoyed by him us a jachire during lile life after which le was to devolve to the British govern In 1779 a treaty was most Improperly concluded with Bazalet Jung by the Madras government (then noted for peculation) without the conscot of the \iznm, for the erision of Guntoor, and a few months after it was granted by the same pre-sidency to Malomed Ali, the Car-ontic abob on a lease of ten years but the whole transaction was abrogated next year by the govern-ment of Bengal Bazalet Jung died In 176. but the country was not oc cupied by British functionaries until 1766 a tribute of sis lact of ripect being still payable to the Nizmi 1503 when the present Arata aucceeded has father on the throne of Hyderalad he offired to relinquish the tribute i but the offer was refused by the Margare Wellesler, and it was regularly paid until 1823 when tha whole was finally redeemed by the payment of £1,00 000 to the \1 in 1816 Guntoor suffered ZAID. dreadful raynees from a numerous body of Producers, which entered it from the western borders of Maruli patum nul d iring eleven days stay in this and the neighbouring district of Cuddopole plandered 333 villages Lilled or caused to destroy them selves 182 persons wounded 505 and tortured in different ways 3,603 persons In 1817 the total gross collection of the public revenue in the Guntoer district was 4 12,738 str pagodas - (Oakes F 11 Robert son Hidgson Rennell Fifth Report. ge)

Guntoon,-The chief town of the preceding circar, situated in lat 150

17 \" lon 80° 7" F forty-eight miles west from Mossipatore is an extensive, but irregularly built and mean town or rather sillage : for althou li some of the houses are roof ed with tile, while others are only thatched, the walls of both ara muil and there is neither temple or edifice of note within its whole precincts. Trees however abound and it is ili vided into two portions by an exten sive reservoir to the west of which ntand the courts of jostice and hun galows of the civilians. In 1816 it was attacked by the Pradarries and for four hours pillaged, but the trea sury, nithough nimost defenceless owing to the extreme cownrdice of these misercants, escaped plander, and was subsequently fortified with a mud anli nod basticos - (Fullarion, de I

GLAGON (or Garudun) .- This is a regular Chinese station, and is so far ndvanced among the mountains that It may be considered as standing on deliateable land on the verce of Tl het and Sorthern Ifinilostan ; Int 30° J" V ion 81° 7 L , seventeen miles south from Lake Vianasarovara Gurdon is nt nil times a permanent mort for trade; but in the month of November there is no nonual fakt. which is resorted to by increhents from Cashmere and Lahdrek and ha sinessto a considerable amount la tran sacted The principal articles brought from Clima are wool woollen cloths. gold-dust, and ten On these oceasions the electifuling medium is a comnamed timashi, struck of Lahdael. from ingots of silver brought all the way from China onil gold-dust in many cases supplies the place of coin It has been computed that from 15 000 to 20,000 fleeces are manually brought to the markets of Curdan ond Tucia gur; but the goats hair oved in the manufacture of showls is not to bo met with at cither station the salo of this article being almost monopolized at Labdack It is said that these fleeces fetch only one rupec gold dust is delivered separately, in small purcels tied in a rag, one of which is called a titang, and contains about eighty grains apothecaries' weight, worth about fourteen shillings sterling. It is probable that pearls, coral, shanks (large buckie shells), and broad-cloth, to the aggregate amount of 10,000 rupees, might be here annually disposed of —(Webb, &c)

Gurnoura.—A large and well-peopled village in the province of Allahabad, belonging to the raja of Ditteah, near to which is a remarkable subterranean bath, built by one of the female ancestors of his family. In length it is about 190 feet, breadth eighteen, and depth, from the surface of the earth to the bottom of the well, by a flight of stairs, fifty-seven feet. It is constructed of hewn granite and cemented with chunam. — (Public Journals, &c.)

Gun upy —A town in the province of Bengal, district of Backergunge, situated on the west bank of the Puddah or Great Ganges, lat. 22° 50′ N., lon. 90° 11′ E

Gurran (Gura) -A large division of the province of Gundwana, situated about the twenty-third degree of north latitude, and intersected by the Nerbudda and some of its tributaries The town of Guirali stands in lat. 23° 9′ N., lon. 80° 16′ E., 150 miles N N.E. from the city of Nagpoor. In the remote times of Hindoo antiquity this was the capital of a considerable Hindoo principality, which comprehended Bhatta, Schagepoor, Choteesghur, Sumbhulpoor, Gangpoor, Jushpoor, and other contiguous districts. In the reign of Aurungzebe the division of Bhatta or Baundhoo, consisting of the six divisions above-inentioned, was considered as a new conquest, although it had previously been partially subjected, and was formally annexed to the province of Allahabad. The real dimensions of Gurrali are very uncertain, but it is known to occupy a considerable portion of the upper valley, through which the Nerbudda flows, and that it comprehends a large tract of fertile, but in most parts uncultivated and thinly peopled territory. The principal towns are Jubbulpoor (the Maharatta capital), Guriah, Panagur, and Sirienuggur; the whole of which in 1818 were ceded to the British government. In the town of Gurrah there was formerly a mint established, in which an inferior rupee, named the ballashahy, was coined. The modern town of Gurrah stands in a most singular pass, and extends through and along the face of a monntainousridge for about two miles, and along with the country is now comprehended in the following British district. -(Leckie, Fitzelarence, &c.)

Gunrah Mundlah.—A British district thus named in the province of Gundwana, consisting of cessions acquired from the Nagpoor raja in 1818, situated principally about the twenty-third degree of north latitude, and townids the sources of the Nerbudda.

In this part of India there are not any fiscal officers called zemindars, that appellation being only given to the descendants of the jaghiredars of the old native governments, who have a stronger hereditary connexion with the land than any other class. Many of these are Gonds, who are considered the only indigenous portion of the population; and some have large talooks, while others have only single villages. They may be regarded as the proprietors of their own estates, but liave not any office similar to that of chowdry or desmooklis only hereditary officer is the register or accountant, here termed beobar, and sometimes gomashta, but always of the Kayst tribe. The heads of villages are called potail or gurtul, the use of the one term or the other depending on easte. Among the Gonds the term is blow.—(Molony,  $\delta c$ )

Gurrote—A town in the province of Malwa belonging to Holear, which in 1820 contained 500 houses; Int. 24° 20′ N, Ion 75° 43′ E. It is the head of a pergunnah, which at the date above-mentioned contained 128 villages, and yielded a revenue exceeding 20,000 rupees.—(Malcolm, &c.)

Gennakora (Caracula).- Atomn and furtress in the province of Alla haba i, and fermerly the capital of a peter state tributary to Sindia ulnety miles S.S.W. from Chatterpoore lat 23° 44 \, lon 70° 8 1 The for tresa of Gurratota standest the con fluence of the Sonar and Clolarl tr very which was hithe nuter wall on luth aller while towards the land there is a wet ditch il at irrites them Its longest extent is 900 yards and Its greatest beradth "00 Its general figure approaches that of a semicircle ot which the chord of the d ameter is parallel to the banks of the honor the remainder being composed of broken lines that t mel the Cardasl, and take the general foure of his win lings. A fairse-lease rime along the lank of the rater and the scarp of the dutch which is therty feet deep and substantially electred; but, except during the wet season the Sonar at a particular spot may be easily forded About 1 600 rands from the ditch a wall extends between the two rivers and is continued for the space of a few hundred yards along the Sonar The space thus Inclosed is nearly waste. This town and forteres were coled by binds, whose orders to surrender were realsted by the commandant It was In consequence inserted an I cantured by a British detachment and the gosernor sent prisoner to Gualtor 1620the Bengalgovernment determin ed on restoring to Arjoon buigh the expelled rais of GurraLots the whole of the lands he had been dispossessed of, in convequence of his forcible oc cupation of the place This was orcordingly done after lopping off such tracts as were intermised with the Bertish district of Sau, or and reduc ing the Gurraliketa demains to a compact form and clearly defined boundary - (Blacker, Public MS Documents, &c)

Guanteconoan,—A hilly district in the Bala, haut ceded territories, situated between the thicteenth and fourteenth degrees of north initiate and at present comprehended in the

collecturate of Cuid lapab. This tract of country less ment the verge of the extern ghants, and presents a morn tainous surface rather thinly laba lated, butvery productive on fer surface. Laterty productive on fer surface to the watered by many torrents from the bills but has no river of mannitode.

Gi asi ncovonie-A strong hill fort in the Halaghaut coded districts the rapital of the preceding district situated in lat 13' 46 \ lon 7h 71 by 130 miles \ M from Madras In 1791 this fortress was be are red by the Nizam's army assisted by a small British corps which storm ed the lower fort without much lose, an I was afterwards ordered south to in the gran larmy A hody of the the inner for an I blockade the upper under the command of one of the Nicam a Officers who was shortly after attacked by Hyder Falich Tippao a cidest suo totally routed and slain After supplying the upper fort with necessance Hyder Sahele re tired, having fully accomplished the object for which he had been detached - USS, Se)

Grana—A town in the province of Allahalad fifty even index south from Teary 1 in 227 of 5, lon 762 of 1.

G; act.—A small town in the province of Agra situated on the nurth bank of the Jumpa river, eighteen unles east from kalpee; lat 26° 6°N lon 70 59 F

Grawal (Carharel) — A province of Northern Illindostan attasted between the thirtest had thry first degrees of north latitude. To the north it is separated from Tibet by the Illinaisyn mountains; on the south it has the great plain of the Ganger; to the east its lumits are defined by the Danh Alacananda and liangunga rurers; and in thowest by the course of the Junna. The super ficial contents may be estimated at 9 000 square miles and containing two geographical subdivisions, riadirand corpules the Gursal proper which occupies the

whole of the lower ranges of hills; and the sources of the Ganges, comprehending the holy and alpine region whence that river springs. In former tunes this principality also included Kumaon, when Gui wal was designated by a term signifying 14 lacks, and Kumaon by one signifying eight lacks, but it has not been clearly ascertained whether these numbers had reference to revenue or population. In 1814. the Gorkhas had undisputed possession of the whole country to the dependencies of China, but since their expulsion a new distribution has taken place, separating it into two distinct portions. the Biitish government having retained the Deyrah Doon, the passes of the Ganges and Jumna at either extremity of that valley, as also all the country to the eastward of the Bhagirathi andAlacananda, which lastmentioned tract has been annexed to Kumaon, and the 1 cmanider restored to the expatrated Gurwal Raja The present boundaries, therefore, of his territories to the castward, are the Alacananda from Rudiaprayag, until its junction with the Bhagirathi, and thence to the plains by the united streams forming the Ganges, above Rudraprayag where the Alacananda receives the Mandakini, by the latter 11ver. All the country to the east of that line has been permanently incorporated with Kumaon

On the south, towards Lolldong, the whole face of this province is an assemblage of hills, jumbled together in various forms and directions, sometimes in parallel chains, but of no great extent, and often connected at their termination by narrow ridges running across the vallies at right an-The summits of all are usually nairow, and of various shapes, and the distance between each range short, the vallies in consequence are so confined that in many parts it would be difficult to find a spot large enough to accommodate a corps of one thousand men Some of these ranges are covered with trees and always gieen, others are naked and stony, affording shelter for neither birds or beasts On the eastern borders of Gurwal,

among the lower range of mountains, are extensive forests of oak, holly, horse-chestnut, and fir, and beds of strawberries are also seen, equaling in flavour those of Europe. But a small portion of this extensive country is either populated or cultivated, a very large proportion of its surface being left in the possession of the wild animals.

The inhabitants of Guiwal and Kumaon are termed Khasyas, as having settled in the Khas country, but all pretend to be descended from colonies that have migrated from the south, and disclaim all connection with the original and impure barbaijans West from Gui wal the designation of Khas is altogether rejected, and it is asserted that the impure race never held the country. Although only scparated by a small river, the inhabitants of Gurwal differ much in their appearance from those of Kumaon, being considerably stronger and more But the first, although more robust than the Kumaonics, appear equally devoid of the energy usually attributed to highlanders, for although oppressed by the Gorkhas, and sold by hundreds into slavery, they never made any effort to assert their inde-Yet then country is iependence markably strong, the mountains being lofty and precipitous, and separated at then bases only by deep watercourses and streams, formed by the numerous rivulets and torrents that pour down their sides.

The Bhagirathi and Alacananda, which by their junction at Devapiayag form the Ganges, are the largest rivers of Guiwal The first has a course from north to south, the last from N.E to SW., and towards them all the other streams have a natural inclination The Bilhang, which falls into the Bhagirathi, the Manaakini, the Pinden, the Mandacoki, the Birke, and the Dauh, all of which join the Alacananda, may be denominated streams of the second order. these some approach in magnitude the river they unite with, a majority have their somices in the Himalaya mountains, which one (the Dauli) actually peoctrates, and is certainly the remotest source of the Ganges. None of these streams being fordable they are crossed by rope and plat form heldges at the most convenient points of communication, the masses of rock and stones by which their chan nels are encumbered preventing in most places the use of boats roads are mere footpaths carried along the alope of a mountain in the di rection of the principal streams and water courses. Sermagur the former cantal is the only town of note next to which comes Barnhat, the modern residence of the Gurwal Raia; but the province abounds with celebrated places of worship which seem to have been held sacred by the Hindoos for many ages although there is reason to auppose that the conversion of tha Inhabitants to the Brahminical faith Is an occurrence of no great antiquity Four of the five Prayage, or holy functions of rivers, all renowned for their sacetity and ain dispelling privi leges, are within the limits of this miscrable principality as is also Gan gouter the source of the most revered of rivers

The country now called Gurwal (Garhawal or Gar) at least in part formerly belonged to a netty chief of low birth who resided at Chandroor and paid tribute to haraverpoor the eapital of a dynasty that has long disappeared About 300 years ago a Rappoot came from the plains and ex pelled the Chandpoor chief and catablished his own family which subscquently built Sermagur and for many years were only known to fame as the Sermagur Rajas After the conquest of Kumaon the Gorkha commanders in concert with Harsha Deb a turbo lent Brahmin attacked Gurwal and after a contest of two years were on the point of succeeding when they were recalled to Catmandoo in con sequence of the advance of a Chinese army Its conquest however was subsequently effected in 1803 by Ummer Singh Thappa No pretext or excuse was ever held out for this attack nor does it appear that the

natives of India ever considered a pretence for a war necessary or in cumbent although since their diplomatic Intercoarse with I uropeans they have collected and occasionally when circumstances aust make use of many very good observations on the aubject. The Gurwal Ruja, Pradyum na Sah unablo to opposa an effectual resistance retired with his dependants Into the British territories where having the family throne for 1,50 000 rupees he raised some troops returned to the Deyrah Doon and fought a battle with the Gorkhas In which he was defeated and slain Ilis fimily however escaped and in 1814 resided at Futteheliur

During the wars of 1814 15 between the Gorkhas and the British the entire apathy and neglect of the ex lled Raja his family and ndherents towards contributing by their exer tions to its auccess was such as left the country at the disposal of the British government unshaekled by any engagement resulting from the conditions on which the Raja was in vited to join and co-operate ond Gurwal might safely bo viewed os a country conquered from the Gorkins, by the unaided efforts of his European The latter, howaver did not take advantage of that circumstance further than to complete with such variations and extensions as expediency might suggest the original in tention contemplated and carefully made known to the Raja of retaining the Deyrah Doon including the fer ries on the Ganges and Jumna, together with the territories lying to the east of the Bhagirathi and Alacananda as boundary streams The question respecting the large district of Roween was reserved for future const deration which ultimately terminated In its restoration to the raja, whose hopeless condition a short time back must have precluded all expectation of ever recovering any fraction of his hereditary dominions. The aggregato revenue of the territory thus restored amounted to 40 000 rupees per annum subject to no other charge than the

YOL, S

expense of the civil administration, and of the raja's family; the British government undertaking the military protection and all other contingents arising from the connection with Gurwal.

The Nepaulese rulers had counted the houses and villages in the portion given up to the Raja, and according to one report they amounted to 1,129 villages, and 5,144 houses, which at five to a house would give 25,720 for the number of inhabitants, but this appears a singularly scanty population for so extensive, and in many places fertile tract of country. By the adoption of the Alacananda for the eastern boundary, the town of Sermagur, the ancient capital, fell within the territory reserved by the British government, in consequence of which the raja fixed his residence at Barahaut, where the details of his civil government are conducted by his own officers, and the expense defrayed from his own resources.

Previous to the re-establishment of the raja a sunnud was delivered to him, specifying the conditions of the grant, which were, that he would govern his subjects with lenity and justice, promote agriculture and commerce, and abolish the traffic in It was also stipulated that slaves. he should not alienate or mortgage any portion of his dominions without permission; that he should furnish hill-porters and supplies when wanted, and generally perform all the obligations of allegiance and fidelity; in return for which he would be protected by the British troops, which were however only to be employed for the maintenance of public tranquillity, and for strengthening his authority when the ordinary local establishments were found ineffectual. It was thought advantageous that the least possible degree of interference in the details of the internal administration should be exercised by the British government, but that its advice and assistance should not be withheld, nor even its direct interposition, when necessary to check mismanagement, or prevent the recurrence of anarchy and confu-

Besides the Deyrah Doon, valued at 22,264 rupees per annum, the other sections of Gurwal, annexed to the Kumaon district, were valued at 37,000 rupees per annum, exclusive of the sayer or variable imposts The copper mines of Dhunpoor were leased, in 1816, for 1,850 Furruckabad rupees. Those of Nagpoor. which formerly yielded 52,000 rupees per annum, during the confusion consequent on the Gorkha invasion had been abandoned, and became choked up with rubbish, to recover them from which condition required much more capital than a native miner usually possesses. It was soon discovered that a disproportionate quantity of rent-free land was attached to temples and other religious buildings, the resumption of which might cause an impression unfavourable to the character of the British government for liberality and toleration, in matters connected with the faith and religious usages of all classes of their native subjects; it was in consequence determined that the revenue of the pergunnahs so appropriated should be continued, provided that the commissioner was satisfied they would not be diveited from their original purpose, and, as too frequently happens, converted to source of individual emolument. The repair of the 10ad also from Serinagur to Badrinath also appeared an object of some importance, encouraging the resort of a greater number of pilgrims, and thereby promoting the intercourse and traffic between the plains and the immense hills whence spring the sources of the Ganges.—(Raper, Public MS. Documents, F. Buchanan, Trail, W. Fraser, Hardwicke, &c.)

GUTPURBA RIVER (Gatapurva) — A small river in the province of Be-Japoor, which has its rise among the western ghauts near Gunderghur, and after a course of about 100 miles joins the Krishna, and proceeds with it to the bay of Bengal. Like all monatum streams in this part of Indio the Gotporta is subject during
the mossoon to sudden and extraordinary nungs and fallings. Between the village of homoor and
Gocank it descends from an elevated
table land to the line country in the
form of a magnificent entaract.—
(I salartee 5.)

CETOOTTA (Gajacalo Hecliphon)
fort).—A small town in the province
of liencal di trict of llungpoor tee
miles north from the town of flung
poor; lat. 2.0 50 A., lon. 89 15 L.

CTTERNUTTY GHART -A romarkable mountain pass forming the priscipal communication between the Mysore table-land and the province of Combatoor, and commencing about fifty-one miles & by In from the city of Mysore It was greatly Improved about twelve years ago by the formstion of a broad practicable carrage-road which wands down the face of the mountains. A hungalow for the accommodation of travellers has been erected in the little town of Tallimally at the head of the pass and at he lower declivity near a handsome bridge of three arches across a mountain stream another busgalow and choultry bare been constructed but suffered to go to rum. At the base of this pass rolls the rapid and formidable torrent of the Maraur and close to its left bank are the old fort of Guzzelhutty now choked up with junglo and a small endowed choultry attended by few Brahmins within and without by many wild beasts,

The scenery liere is magnificent The mass of the Neelgherry mean takes nives immediately to the south, separated from the Mysore toble-land only by the charm through which the Maysur flows and preserving to the eye a bold and abrupt activity of probably not less thas 4 000 feet, with a swelling green-award on the sum milt. The prependicular height of the pass itself above the valley of the Mayour may be about 2 000 feet.—(Fullarion, 6c)

11

Ilaster Onas hatarov.—Aplace of refreshment is the province of Viroltan, distinct of Tatta, fifter miles east from Corachie About a mile to the 5.W at this place the soil is a fine loam overflowed during the freshes by the Iodos.

Hannerson—A small tows in the province of Hengal, district of Dacca Jelahoor, twenty nino miles V.S.W. from Dacca; lat. 23° 31 N, los 10° 53° E.

HADITPOOR .- A town in the proriace of Rahar dutrict of Tirhoot, situated on the north-cast side of the Canges, where it joins the Gunduck nearly opposite to Patna; lat 25° 41 . fon 85 21 E The ami of the surrounding country is peculiarly productive of saltnetre, and it is from hence and the adjacent division of harun that the greater part of thot article latended for the Company a lavestment is procured In Novem ber as assual horse fair is held in the vicinity, when horse races are also calibited. Is 1807 the whole number of horses exposed at the fair amounted conear 0 000 two of which from the government sted sold for 4 000 tupees each At the fair of IN10 the show of horses indicated a great improvement of the breed with in the districts under the induence of the stud and a large batch of remin dary colts and filbes were nurchased by the officers of the stud on government account, -(J Grant 1c)

Haman ince—A large Island In the China sea situated at the southern extremity of the empire, between the 18th and 20th degrees of sorth is titude. In length it may be estimated at 180 miles by seventy the average breadth in A.D 1800, according to Captain hrusenstern, the Ladroso printes who lafest the const of Chi sa had obtained possession of Ha aras, but the survivors of the crews of several British vessels wrecked on this island since the obore date describes to a populous, well cultivoted, 2 s 2

and carrying on an extensive traffic with the main-land of China, to which it continued in regular subjection.

HAIRUMBO (Hedamba).—The ancient name of a country bordering on Assam and Silhet in Bengal, in modern times named Cachar, under which head it will be found described.

HALDUBARY.—A town in the province of Bengal, district of Purneah, situated on the east side of the Mahananda river, fifty-five miles N.E from the town of Purneah; lat 26° 20' N, lon 87° 59' E The pergunnali, or rather estate, in which Halderbary stands, is one of the largest in the Purneah district, containing about half a million of acres, besides a portion of Dinagepoor. During the reign of Acber it was but a small territory, the greater part of which belonged to the Bhooteas of Sikkim, and being overspread with jungle, was much frequented thieves. In this condition it remained until Seid Khan, a stranger, obtained possession, drove the Bhooteas to the mountains, and erected a fortress at Haldubary.—(F.:Buchanan, &c.)

HALLAUR (or Halawar).—'A division of the Gujerat province which derives its name from Halla, a Jahrejah chief, and comprehends the whole country conqueted by his des-The boundary of this cendants. country to the north is the gulf of Cutch; on the west the Burudda mountains, the ocean, and Okamundel; on the south the river Bhadur and Cattywar; on the east the district of Muchoo, Kaunta, and The eastern parts are Cattywar hilly and rocky, but the soil in gemeral is light, and well adapted for the cultivation of bajaree, jowaree, and in some parts of wheat—bajaree and cotton are exported Trees are seldom met with in Hallaur, to remedy which defect, the Jam of Noanagur order the heads of villages to plant a certain number of mango-trees annually. The fabulous history of the Jalirejahs traces their descent from the four Jadoos, but at present few

of the independent chieftains trace their lineage beyond Rawul, youngest son of Humeer, the sovereign of Cutch The principal of these, after the Jam of Noanagur, are the chiefs of Dehrole, Rajacote, Goundul, Kotra, and Drauppa; but the internal administration of these petty states is entirely in the hands of the Nagne Brahmins, who promote and encourage the dissipated liabits of their respective chiefs, so that, until the interference of the British government, confusion, anarchy, and dissention prevailed through every corner of this miserable country —(Macmurdo, Walker, &c.)

HALLOLE.—A town in the province of Gujerat, fifty-two miles E N E from Cambay; lat. 22° 32′ N, lon. 73° 22′ E.

HAMBANGTOTTE.—A bay and fort on the S.W. coast of Ceylon, much frequented by small craft to load salt; lat. 6°8′ N, lon 81°10′ E., forty miles E N E. from Dondra Head.

Hangarang. —A pergumah north of the true Himalaya, bounded on the south by the district of Kunawur, and subject to the principality of Bussaher. The villages here are all perfectly Tartar, and exhibit a striking difference in appearance and language to those of Kunawur. The appearanceof this pergunnah is strange and melancholy; mountains bare of forest, but covered above with a little snow, of a rounded form with gentle declivities, but broken towards the Sutuleje into abrupt and precipitous abysses, bare of vegetation. Although now subject to Bussaher, this tract must have formerly been part of The separation of Bussa-Lahdack. her from Hangarang is decided and strongly marked, whereas from the latter to Lahdack there is no difference perceptible

Hangarang produces wheat, barley, ooa, papar, and turnips, but no rice, not even the kind peculiar to high and dry situations. There is but one harvest season The trees, such as apricots, willows, dog-roses, goose-berry, currants, and whins, are all

stinted, and only to be found near villages and in the beds of streams in 1819 the pergunarh contained time villages, the revenue of which was 900 rupees per annum ond the inhabitants carried on a small trade with Lahdak and Gortope from which last they bring salt and wool They manufacture a corror sort of lianket-stuff; but ponies and mules compose a great proportion of their wealth. The pergunant at prevent is poor, maked and burren, and is principally valuable as a clarated of communication with the Lahdackles and other Tartar tribes—(Iffered, &c.)

HARDARANO PARL—A pass thus named in Tibet between Ifang and Soongnam elevated 14 710 feet above the level of the sea. Int. 312 47 N. Ion 758 317 F. The summent of this pass is entirely composed of lune-stone and in October 1810 was without show and horses were seen running foose and feeding 15 000 feet above the ocean. A few hundred feet higher there were patches of snow—Illogious and literari fee.

Hanowette.—A little fort in the island of Genion situated on the Ka lany Gunga nver, eight miles road distance east from Columbo The intervening coomry is well inhabited; lat, 6° 55 N, lon 70° 54 E

Hassor (Hasswell).—A town in the province of Guyerat fourteen miles & W from Broach; lat. 21° 37° N los 73° 3 E In 1812 the total population of the Hassoch pergunnal was ascertatoed to be Illindon 13° 388. Blahomedans 016 Parsecs 303 total 18° 34°. And of the towo Unidoos 2,517 Mahomedans 1001, Parsecs 133 total 730 persons 133 total 730 persons

Harst.—A town to the province of Delhi sometimes named Hansi Illisar from its proximity to the latter, and situated on the channel of the canal constructed by Sultan Fe-roze about unset; two miles IV by N from Delhi; lat 28° 54 N., Ion. 75° 39 E. The fort here is strong, for a native fortification and isplaced on the top of a small hill, scarped

and surrounded by a ditch Th town lies immediately to the wouth and in 1810 contained few house although the walls included a conderable space of ground On th east is an excellent brick tank ; an vestiges of the Chittang canal or wi ter-course, are still to be seen Ilan was captured by the Chizal Vishe medans so early as A D 1033, an towards the end of the eighteent century again attracted notice on th capital of the short-lived principalit erected by the adventurer Ocorg Thomas - Lieut li hite, G Thoma Rennell, de )

HARPONELLY -A division of th Balachaut ceded districts hounde on the north and west by the Toon budden meer The town of lia ponelly stands in lat. 14° 44 V., lor 76° 8 E., sixty-one miles W.S V The country here from Bellary not so billy as further east, but the are some strong positions the monoted of which is Oothingdron The Raja of Harponelly continue independent until AD 1774, who his principality was conquered by Hyder, and annexed to his dominion as a tributary appendix On the fa of Seringapatam the ostensible he took possession of Harponelly, an Is now a jughiredar under the Britis government It is supposed he ha no just claim to the estate but wi merely a boy set up by the Brahming who held the principal offices unde the former rajas, to perpetuate th management of affairs in their on hands. In this manner rains on semindars are every where created i chief pative servants in order to se cure their own situations which ar In general heredstary, whenever th line is extinct take care to bran forward o child from some quarter,-(Minro, Moor &c)

HALOWEY (Haronds or Horavats)

A large divition of the Afineer provance situated principally betweet
the twenty fifth and twenty-nixth de
grees of north latitude Its bounds
hes are on the north, Keroulee, or

the south, the Muckundra hills, which separate it from Malwa; on the east Dandair; and on the west, Mewar. Harowty is nearly on a level with Malwa, and possesses the same general features and natural advantages. with the exception of its climate, which, from its more elevated hilly girdle, is much warmer. It is well peopled, and has a fine black soil, highly cultivated and abundantly watered by the Kali Sinde, Parbutty, Chumbul, &c, which in their passage through Harowty become considerable streams. In some parts also the lands are irrigated by conduits brought from lakes, which, like the great reservoirs of the Carnatic and Mysore, seem to be usually formed by artificial embankments. The principal towns are Kotah, Patun, and Boondee, the first and last of which are the capitals of Rajpoot princes, who almost divide the district. Patun, or, as it is commonly called, Jalrapatun, founded by Zalim Singh the regent of Kotah, has within twenty years risen from a village to be one of the handsomest and most opulent cities of Upper Hindostan. The name Harowty indicates that it is the country of the Hara tribe; but the cultivators are a mixture of Rajpoots, Jauts, Brahmins, Bheels, and other low tribes. Of the words of the Lord's Prayer in the Harowty language, twenty-two were identified by the missionaries as the same with those of the Bengalese and Hindostany specimens. The practice of erecting cheterees, or sculptured monuments in commemoration of deceased persons of rank or military caste, appears almost peculiar to the south-eastern parts of the Ajmeer province, more especially in Harowty, where they are of surpassing size and superior workmanship. — (Malcolm, Fullarion, &c)

HARRIORFOOR (Harrharapura).—A Gorkha fort in Northern Hindostan, district of Muckwanpoor, commanding the Bogmutty river; lat. 27° 15' N., lon. 85° 28' E., forty-two miles S.E. from Catmandoo.

HARRIORPOOR.—A town in the province of Orissa, the capital of the large zemindary of Mohurbunge, and residence of the proprietor, lat. 21° 51' N., lon. 86° 42' E., twenty-eight miles N by W. from Balasore.

Hasser.—See Aseerghur.

HATTIA ISLE.—An island in the province of Bengal, district of Chittagong, formed by the sediment of the great Megna, and fourteen miles long by about ten the average breadth. On the western side it is now nearly joined by alluvions to the adjacent island of Dukkinshababazpoor. Although Hattia be in the jurisdiction and collectorate of Chittagong, it is separated from the main land of that district by two considerable arms of the sea, so as to render the communication difficult even in moderate weather, and altogether impracticable for two or three weeks during the south-western monsoon. The surface of this island lies extremely low, and at spring-tides, during the height of the rains, is nearly submerged is, notwithstanding, very productive of grain, and yields salt, which is manufactured here on government account, and brings a high price at the annual sales in Calcutta.

HATRAS (Hathras) —A town in the province of Agra, district of Alighur, thirty-one miles north from the city of Agra; lat. 27° 37' N., lon. 75° 58' E. The fort is an oblong, its longest diameter running nearly from east to west, measuring 1,600 yards The ditch is 120 round the glacis. feet wide and eighty-five deep, and the body of the place 400 or 500 yards in compass. In some places the scarp is perpendicular from above; in others it has been excavated so as to form extensive subterranean dwellings, with windows opening into the cavity of the great ditch, into which apartments the zemindar's family frequently resorted during the intensity of the hot The cutterah, or fortified monsoon. town, lies west by north of the fort, about 700 yards distant

The forts and estates of Hatras

and Moorsson formed part of the termore ceded by Dowlet Row Sudia lo 1803 from which period their chiefs had invariably pursued a system directed to the establishment of total independence council base money, and made their forts the refuge of criminals. Repeated warnings and admonators having failed to produce any permanent impression, listras was besieged in 1817 and taken after a tremendous bombardment from forty-two mortars which enveloped the place in smoke and ruin ; but tho reminder, 1) yerem Thakour, made his escape during the confusion with a small party of horse. After remain ing lo concealment for some years, he emerged in 1800 and intreated the comparsion of the British covern ment which, in coosequence on actooes settled a pension oo him of 1,000 rupces per month and gave him permission to reside at Soron, a Hindog place of worship on the banks of the Ganges, Pensions had previously been settled on his two wires, and on his son Neckaram Since the above event the commercial prosperity of Hairas has greatly in creased, and its enactous cutterah now presents one of the busiest scenes in Upper Hindostan. A temple dedicated to Krishna, the lite Thakour's court of justice, and some other buildings are still standing within the ruined walls of the fort. (Public 118 Documents, Fullarton, Sc )

HATCOOL,—A town in the province of Bengal dustrict of Sarun eighty miles out in from Patna; lat, 26° 42° N., Ion. 83° 28 E.

HATTOOK—A small fort in the provioce of Ajmeer, divation of Marwar, which in 1820 was the principal strong hold of a predatory race numed Mhairs, and then captured by a Bratish detachment

Haussulfock.—A town in the province of Malws, situated on the Chumbul river within a few miles of this source, elesen miles SW of Mow; lat 22°29 N., lon 75°37'E

In 1800 it contained about 300 houses, (Malcolm, fc)

Hawrtsacou.-A spot in North ern Mindostan, district of Kumaon beautifully situated on the banks of the Coula over five miles A by E. from Almora, but above 1,800 below that city Sugar-cane does not come to meturity here but plantains, mangoes, and many hot-climate vegetables thrive It is remarkable however, that although the aummer is much hotter than at Almora, there is much longer nod harder front in winter The civil communioner for the affairs of humaon resides at this place where are also the cantonments of the humaon battalion llawelburgh was at one period the site of a royal gardeo, and a favourite retreat of the homaon rajes; but the only memorial that remains of its former dignity is a lofty stooe gateway which has been converted into a court of justice -(Heber, Fullarion &c)

liazanysacon.-A town in the province of Bahar dutrict of Ram ghur P41 miles west from Calcutta. It stands on an elevated tract of tablefind, extending from east to west about twenty-right miles, and although unnoticed in any map of 11 in dostsn previous to the late Mr Ar siderable places in the district and was for many years the head-quarters of the Ramghor Inttolion onder Mafor Edward Houghtedge. The progress of conquest has removed this corps to flumbhalpoor in Gundwana, but a small corps of sepoys still remain to charge of the cantonments. The principal bazar here is open and regularly built, and although the shops and houses are all of mud, some of them are two stones high The king of Oude has creeted a small mausoleum here over the remains of tho celebrated Tofazei Hossem Khan. who died of Hazarybaugh on his return to I ucknow from Calcutta. Near to Hazarybaugh there are some hot springs, atrongly impregnated with sulphuretted hydrogen and holding in solution muriate and sul

phate of soda. The spring arises at the base of the table-land of Hazarybaugh, about twenty-seven miles to the north of the new road. There are four springs, but only two of them are of a remarkable lugh temperature, raising the thermometer to 170° and even 190°. The fumes of sulphuretted hydrogen rise in great abundance from the last. The water, as is evident from its composition, might be employed for medicinal purposes if the ingredients be in sufficient quantity.—(Fullarton, Medical Transactions, &c)

HEERAPOOR.—A town in the province of Allahabad, thirty-six miles S.E. from Teary, lat. 24° 16′ N., lon. 79° 12′ E.

Helai.—A village near the Indus, in the province of Mooltan, principality of Sinde, on the road leading from Tatta to Hyderabad; lat 24° 52′ N., lon. 68° 27′ E. At this place the Indus is three-fourths of a mile wide, and in some parts from four to five fathoms deep

HENERY.—A very small Island on the west coast of the province of Aurungabad, about fifteen miles south from Bombay, lat. 18° 41′ N., lon 72° 57′ E This islet is about 600 yards in circumference, and nearly of a circular form. There is only one landing-place on the north-east side where boats can lie; but the island is well inhabited, being almost covered with houses and fortifications. In A.D 1790 it belonged to Ragojee Anglia, and, although in sight of Bombay, was a principal rendezvous of pirate vessels.

Near to Henery is another islet named Kenery, which is also fortified, and of considerable strength. In 1790 it belonged to the Peshwa, who also permitted pirates to resort to its harbour. Kenery was taken possession of and fortified by Sevajee in 1679, before which period, from a supposed want of fresh water, it had been neglected Henery was first settled and fortified by Sidi Cossim in 1680.—(Moor, &c.)

Henzadah.—A town in the kingdom of Ava, province of Pegu, lat. 17° 25' N., lon. 95° 38' E. Along with Keoumzook which adjoins it, it forms a considerable town, and is distinguished from common villages by the number of pagodas and rehgious edifices it contains, the only marked distinction between them in In 1825 it was found deserted, but had been a place of commerce, miliabited by some Armenians and other merchants, who cultivated indigo, which thrives in Pegu with less risk and uncertainty than in Bengal. -(Snodgrass, &c.)

HEOORA.—A village in the province of Aurungabad, district of Ahmednuggur, thirty-six miles N E by N. from the city of Ahmednuggur. This place has a handsome quadrangular stone fort, situated on an adjoining rising ground.

Heroria —A small town in the province of Allahabad, fourteen miles S by W from Huttah; lat. 23° 54′ N., lon 79° 33′ E

Herrioor (Heriuru) —A town in the Mysore raja's territories, situated on the east side of the Vadavati river, lat. 13° 56' N., lon. 74° 43' E In front of the temple of Siva at this place, there is an obelisk for the display of lights at festivals, forty feet high, and formed of a single granite block. The Vadavati (or Hoggry) is here a fine clear stream, abounding with fish, and easily fordable at most seasons The surrounding pergunnah, named also Herrioor, is of an uneven stony surface, poorly cultivated, and thinly peopled.— (Fullation, &c.)

Herrenkairo. — A considerable town in the province of Candeish, district of Bugwanea, situated on the high road from Kotra to Babye, twenty-one miles S.S.W. from Hussingabad, lat. 22° 27′ N., lon 77° 40′ E. The town and annexed pergunnah belong to the British government.—(Malcolm, &c.)

HETHAURA —A town in the Nepaulese dominions, situated on a fine

plan about a mile wide, bounded on the north by the Rapty (itaputi), which is here a beautiful elear, and rand stream lat.27° 26 h., lon 84° 54 L., eighteen miles S by W. from Catmandoo. The soil of the plain is good but not cultivated being mostly covered with mately forests of saul trees, which are kept clear of underwood by burning the fallen leaves and withered grass in the dry season The Rapty having come from the north here turns to the west and after being joined by the Kanura some way below, flows on until it ioms the Guoduck through a valley, the lower part of which is cultivated, while all near Hethsora is waste This proceeds from the lealousy of the Gorkha government, which does not wish to have the forests cleared The licat of Hethaura Is more temperate than that of the Terriani; but as the warm weather advances its 10salubrity increases. Although Hethaurs, on account of its being the chief mart for the commerce carried on between the Nepaulese dominions and those of the British nation, is a nlace of much occasional resort, yet it still continues a miserably unheal thy village. For the accommodation of merchants there is a brick build ing surrounding a square court and there are also a few shops. From hence to Bheemfed, a traveling dis tance of eighteen miles, the road leads through a parrow defilo between high and steep hills, overgrown with thick woods, through which the Ropty winds in so extraordinary a manner that at is excessed by tho way twenty two miles -(F Buchanan &c)

The land about Hidjelico is of two descriptions the first, fresh and ara-

lile Is preserved from the mundation of the tides by embankments running parallel to and at some distance from the rivers and numerous inlets that Intersect the whole territory The second, or salt land is that poction exposed to the overflowing of the tides, and osually termed churs or banks, where mounds of earth strongly impregnated with saline particles (named kalaries or working places) are formed Each of these heaps is estimated to yield on a medium 233 maunds (of eighty pounds each) of salt, requiring the labour of seven manufacturers, who by an easy proeess of filtration and boiling are enabled to complete their operations before thosetting in of the periodical raine In 1814 the Hildrellee district yielded a laoil revenue of 2.01 448 rupees exclusive of an immense sum realized annually by the monopoly of its salt,-(James Grant de)

High Istanos.—Islands sunated off the coast of Borneo, principally between the first and second decrees of south latitude which, from there number and unknown positions, render the natigation of the circumja cent seas dangerous The expedition scalnet Betavia In 1811, under Sie S Auchimuty, anchored at one of thesa blands where two excellent watering places were found. Hogy mouse-deer and monkeys were discovered but no resident inhabitant of the sor-durant homo samens tribe The coasts however, are occasionally visited by Malay fishermen and pirates. (Thorn de )

Himmurenon — A hill-fort recently built, and of considerable strength, in the provioco of Malwa, pergunah of Birseah twenty-seven andes NW by N from Bopaul

Ilitsan.—A town in the province and district of Bahar, twenty miles S.E. from Poton lat 2.º 18 N Ion 85° 20' E

## THE HIMALAYA MOUNTAINS

West of the Indus this stupendmis range of mountains is known to the

Afghans by the name of Hindoo Cosh, while to the east of that river it has the more appropriate name of Himalaya (the abode of snow); but in reality the chain is the same, and can scarcely be said to be interrupted by the slender stream of the Indus. about lat. 35° N. From the north-east point of Cashmere it has a south-eastern course, extending along the sources of all the Punjab rivers (except the Sutuleje), where it separates the hilly portion of the Lahore province from what in modern times, for want of a better designation, has been called Little Tibet. Still pursuing the same direction, it crosses the heads of the Ganges and Jumna, forcing their currents to the southward; but further east the chain is less continuous, as there is reason to believe it is penetrated by the Gunduck, the Arun, the Cosi. and the Teesta. Beyond the limits of Bootan the chain is lost in an unexplored country; but it probably extends to the Chinese sea, along the northern frontier of the provinces of Quangsi and Quantong, declining gradually in elevation as it advances So long as it borders to the east Hindostan the height of the Himalaya is enormous; and it may be there considered as a buttress or supporting wall to the Tibetian plateau, into which the descent is comparatively moderate, when compared with that from the southern faces. The breadth of the snowy belt varies in different parts, between the Sutuleie and Ganges; it has been estimated not to exceed eighty miles from the plains of Hindostan to Tibet.

With respect to altitude the Himalaya is probably the highest range of alpine mountains in the world, twenty of its most elevated peaks greatly exceeding Chimborazo, the loftiest summit of the Andes. Among the lofticst of the Himalaya is one distinguished by the name Dhawalagiri, or the white mountain, situated, as is understood, near the source of the Gunduck river. The near coincidence of Capt. Blake's observations, made in 1814, with those of Capt. Webb,

justify the expectation that when the true height of Dhawalagri shall be accurately determined, it will clearly exceed 27,000 feet. The following numbers are stated as differences of elevation, which may be received as near approaches to a correct determination of their height.

mation of their height.	
	Feet.
Dhawalagiri, or the white	
mountain, above the le-	
vel of the sea	27,000
Jumoutri	25,500

18,452 feet; do do.	~U,UU~

Hodgson, at do........ 22,240. The Tahirgang, or Pargeul mountains, which are situated near the Shipké pass, were ascended by Messrs Gerards to the prodigious height of 19,411 feet above the level of the sea, measured barometrically and confirmed trigonometrically, and within two miles of the summit, which is conjectured to be 22,000 feet rocks here he in immense detached masses, heaped on one another. Seeds of a species of campanula were gathered at the elevation of 16,800 fcet, on a spot where the thermometer in the middle of October was at 27° Fahrenheit; but the utmost limits of lichens and mosses must doubtless reach still further. At the elevation of 16,200 feet, on the confines of Chinese Tartary, real ammonites were

A peak, named St. George,

was estimated by Capt.

plcked up, not salgram atones merely, containing their impressions. An monthes were also found in the beds of torrents near the Net and Mano passes. In 1810, I leut. Merhert traced the Tonse river to its source within the snowy munitains and crossed over the southern ridge of the Humalaya by the Gunna Pass, elsevated 1.5,700 feet above the sea a desecteding from which he entered the valley through which flows the river Baspa a principal tributary to the Stutleic

The Ilimalayan glens for the most part ruo perpendicular to the range, or from N.N.F and N.E to S.S.W and S.W The face exposed to the north-west is lovariably rugged and the opposite one facing the south-east shelving Oo the declirity towards the north west the trees grow at elevations several hundred feet higher than these on the opposite face, which has a more gentle slope t in some Instances the difference exceeds une thousand feet The general height of the forest on the southern face of the Hunalaya is about 12 000 feet above the level of the seas make ond pioes reach that alutude birches ascend a few feat higher Descending from the pass of Bandain the level of the highest juniper was 13,300

On ascending the southern slope of the mowy range, the extreme height of cultivation is 10 000 feet, ned even there the crops ere frequently cut green; the highest habi tation is 0.500 feet 11.800 may be reckoned the utmost limit of fuel, and 12,000 that of bushes; although, le ravines and sheltered apots dworf birches ond small bushes may be found almost to 13,000 feet Oe the north side, in the velley of the Burne river, the villages are found at 11,400 feet; cultivation about the same; ond the forest at least 13 000 feet Advancing further, villages are found ot 13 000 feet, cultivation at 13,000 fine birch trees ot 14 000; and furzo bushes furnishing excellent fuel, 17,000 feet above the level of the sen. Further cast, towards lake Ma-

manrovara, according to Tortar in formation crops and bushes three at a still greater elevation. In the exterior chain to the south, where the licat is only reflected from one alied the warmth is much less than in the lateriar cluster where there is a reverberation of heat from all aides

All travellers over the llimaloya have remarked that a difficulty of breathing ottended with lassitude and severe head-ache, takes place at so altitude of nearly 15,000 feet above the level of the sen. The native mountaineers, who feel it as sensibly as strangers, and know nothing about the ranty or density of the atmosphere, attribute the faintness to cer taio exhalations from noxious plants ; and Capt. Hodgeon was inclined to think them right, as the fatotness was never experienced on naked mow. even when higher, or where vegetation was completely alment but only an inability to go far without stopping to take breath By the notives to the cold of the Illmologa our in formation is rather defective peaks formed of solid rock, that hove been covered for oges with never melting mow and not exposed to the vicissitudes of the seasons on norform cold must have always prevailed All meleture le frozen no rain falle nn partial thaws take piece or there would be glaciers ; in fact although we hear o great deal about the snows of the Himalays, very little is said about ice

Throughout the Illmalays as far os yet explored, the only rock suffiescally extensive to chorocterize its formotion is gacus, the other rocks occurring only in beds and veins Granite veins pro numerous la somo contions, but it does not form the leading feature in the geology of these mountains, which differ in structure remarkably from the Andes Other differences occur among which tho most remarkable is the total absence of volcanoes The chief mmeral productions hitberto found are sulphur alum plumbago bitomen, gypaum, potstone burax rock-sult, gold dust

in small quantities, copper, lead, iron in some abundance, antimony, combined with lead and sulphur, and

manganese with iron.

No volcanoes were seen or heard of by Capt. Hodgson when he explored the sources of the Ganges; where the mountains consist of various sorts of granite, nor were any shells or animal remains seen. The magnetic variation was very small, about one degree easterly, scarcely differing from that of the plains of Hindostan. The diurnal tides of the barometer are perceptible, the mercury always falling a little before noon, as on the plains.

When Captain Webb visited the Bhootea pergunnah of Jowaher (about 11,000 feet above the level of the sea) in 1817, he found extensive fields of a species of barley and buckwheat, between the village of Milum and the temple (elevated 11,401 feet); and from a height at least 1,500 feet above the spot last-mentioned, he procured plants of the jatamansı or The road from Milum spikenard. to Tartary leads along the banks of a mountain stream, and is a continued ascent of four days' journey for laden slicep and goats This route opens in July, at which time the Bhooteas find pasture for their flocks, even at the fourth halting-place, which, allowing only 500 feet ascent for each day, will carry the limit of vegetation in this quarter of the Himalaya to 13,500 feet On the 21st of June 1817 Capt. Webb's camp was 11,630 feet above Calcutta, on a clear spot, surrounded by rich forests of oak, pine, and rhododendra, the surface covered with rank vegetation as high as the knee; very extensive strawberry beds were in full flower, and numcrous currant bushes in blos-On the 22d of June, on the summit of Pilgointa Churhai, 12,642 feet above Calcutta, there was not any snow to be seen in the vicinity. The soil collected over the rock was a rich black mould, covered with strawberry plants, not yet in flower, dandchons, buttercups, and a profusion of small flowers; and 500 feet

lower was a forest of birch trees, alpine rhododendra, and raga pine. In 1818 the Niti Pass or ghaut was explored by the same officer, when still greater descrepancies with the calculations of theory resulted The crest of the Niti ghaut was found to be 16.814 feet above the level of the sea, and he estimated the lowest part of the valley of the Sutuleje, which he was prevented visiting by the Chinese functionaries, at 14,924 feet. seen by Capt. Webb no snow remained on the ghaut or in its neighbourhood, and many quadrupeds pastured on the grassy banks of the

Sutuleie.

The next portion of the Himalaya regarding which information comes from European travellers, is that situated between Gangoutri and the chasm where the Sutuleje river forces its way through the mountain, flowing to the south-west. In some parts of this elevated region the heat of the summer dissolves the snow, while in others the cold is so intense as to split and detach large masses of rock, which tumble down with much up-This process appears to be in such constant operation, that it must ultimately reduce the altitude of the peaks. The rock is granite of various hues, with a great mixture of white quartz, both in the veins and the no-When crossed near to the dules. Sutuleje, in June 1816, snow still lay on the ridge 5,000 feet (by estimation) above the lower line of congelation, and vast beds of a hard surface and steep ascent were passed Among the mountains there are villages that are under snow onehalf of the year, but in June the climate resembles that of spring in England. These villages stand 6,000 fect above the banks of the Sutuleic, on the banks of which the thermometer in a tent rose to 108° Fahrenlicit, yet three days' climbing brings the traveller beyond the line of perpetual congelation.

On the north side of the Himalaya chain, as seen from the low country, a great and steep mass of rock riscs on both sides of the Sutuleje, to the height of about 5,000 feet from its hanks. Still higher up is a belt of land susceptible of cultivation on which are situated the villages of Au nawur, and although the soll is very rocky and poor, coarse grams, apples, pears, rasplerries, spricets and other wild fruits, are produced this is a forest of greantic place, which are asserted to be twen ty-four feet in circumference and more than 160 in height nol le trees are also found on the north side of the Chur mountains, where the snnw lees most part of the year Beyond the forest belt (which also contains out and other large timber), still ascending are steep grassy knolls have of timber but presenting laurel and other bushes The soil here collected among the rocks is black and spongy; but in May and Jone and during the rains, it is covered with every variety of wild Luropean spring flowers, such as cro-Throughout this alpine country high mends and fogs are troublesome and a deficulty of respiration is experienced, with a sensation of fainces in the head Immediately from these grassy and flowery heights rise the steep preciplees of the summit, on which the snow fixes wherever it can find a resting-place; but in June much of the rock is disclosed No volcanie matter has yet been discovered in this quarter The third portion of the limalars

that has been traversed by European travellets lies due north of the Bre gal distract of Hungpoor In the ling ald distract of Hungpoor In the ling dom or henrarchy of Bootses where it was crossed by Cap Turner in 1783 when sent by Mr Hastings on an embasy to the Teshoo Lama. That officer had also the adrantage of penetrating a long way over the vast Tartaran plateau, into which the descent from the sommt of the Himaleya appears inconsiderable when compared with that presented by its southern face. In the latter, all the passes or yet explored ere formed by the direction of Tivers, which do not appear to rise from any

remarkable raige of mouetaies, but rather from detached eminences on the talle-land of Tibet, and pass south through interruptions or charms of the Himalaya. From the north western at le of these mountains arme streams tesbutary to the India and in all probability the Indea itself; those flowing from the nurth-eastern side, in all lekelshood, contribute to in crease the volume of the Sanne ri ver which probably originates at no great distance from the sources of the indus, the Sotoleje and the Jom ne. The Ihmslava chain in different parts of its great extent receives va rious names such as Ilimaile, Illmavat, Himschil and Himshchil, the whole in signification having reference to snow and cold In the Ihndoo pantheon Illmalays is desired and described as the father of the Ganges and of her aister Ooma, the spouse of Siva the destroying power - (Calcornole Mesers Cerants. Hodgron and Herbert Webb, F Bn chanan, isc )

HINDIA.-The extreme eastern district in the province of Camicish but which in the time of Acher was attached to Malwa To the north it Is bounded by the course of the \erbudds, and on the south by the Caly gong (or Caligrama) hills which have been little explored but since the Pindary war of 1817 18, having been frequently traversed by British ar mies, and a detachment permanent ly stationed at Hussingaliad, more complete geographical and statis tical information have consequent ly been obtained. At present the singabad, and Charnah; the principal rivers are the Nerbudda and Towah The earth of the Nerbudda from Anutcote to Armanur opposite to Hindia, is deemed by the natives part of Gundwans the inhabitants speak ing the Gond dislect.

Hindia.—A town in the province of Candeish, situated on the south back of the Nerbudda river the chancel of which is here I 000 yards broad, and during the height of the monsoon presents a vast expanse of water; lat. 22° 26' N., lon. 77° 5' E. It is a place of little strength, but of some importance, from its commanding some of the best gliants or fords over the Nerbudda. It is the head of a perginnah belonging to Sindia, but in 1820 was still occupied by the British. On the opposite side of the river is a remarkable Hindoo pagoda, the sculpture of which is said to have been much defaced by the armies of Aurung/ebe when he waged war in the Decean.

Hindonr.—A town in the province of Agra, sixty-five miles S.W. from the city of Agra; lat. 26° 47' N., lon. 76° 54' E. This place belongs to the Raja of Jeypoor, and was formerly a large town, but owing to the depredation of the Maharattas and other plunderers became greatly reduced: but, since the province has been relieved from these oppressors, has again the appearance of a thriving place. Like other old towns in this neighbourhood, many of the houses are built either wholly or in part of a fine dark red sandstone, cut in large quadrangular masses, and well polished. There are also two spacious chowks of the same material. with a Hindoo temple in each, both built in imitation of the Mahomedan style of architecture.—(Hunter, Fullarton, &c.)

HINDOO COSH MOUNTAINS -The range of mountains (a continuation of the Himalaya chain) from the north of Cashmere to the high snowy peak, nearly north from the city of Cabul, a distance of about 440 geographical miles, is usually distinguished by the name of Hindoo Cosh, but when, as in this instance, a chain of hills is of considerable extent, there is great difficulty in assigning a just name to the whole, the natives having generally a distinct one for each particular point, peak, or section. The ridge has an east and west direction for the above distance, appears to wind within 34° and 35° north latitude, From the northeastern point of Cashmere eastward

it receives the name of Himalaya. From Cashmere to the peak of Hindoo Cosh ahove-mentioned, all the rivers that rise north of the range have a north-west course, except the Indus and Kameh, which are forced to the southward by other high ridges extending at right angles to the main one, and all the rivers that rise south of the Hindoo Cosh chain have a southerly course. The height of one of the peaks of this chain, seen from Peshawer by the embassy in 1809, was estimated at 20,493 feet, and on the range connected with it the snow remains in June, while the theimometer in the valley of Peshawer rises to 113° of Fahrenheit. - (Elphinstone,  $\delta c.)$ 

HINDOOR (Indur).—A hill principality in Northern Hindostan, situnted in the tract of country between the Sutulese and Jumna was conquered by the Gorkhas and its raja, Ramsurren, compelled to fly to the plains; but with the exception of Malown he was subsequently restored to all his possessions by the British government. In 1815 the revenues of Hindoor from the hillterritories amounted to about 15,000 rupces, and from the plains to about 30,000, making a total of 45,000 iu-pees. The land here is distributed rather with reference to produce and soil than to measurement, into divisions called tekas, from every ten of which the raja exacts two maunds of grain and two rupees—(Lieut. Ross, Public MS Documents, &c)

## HINDOSTAN. (Hindust'han)

This extensive region is situated in the south-castern quarter of Asia, where it is nearly comprehended between the latitudes of 8° and 35° north, and the longitudes of 68° and 92° cast. The extreme length from north to south is about 1,900 miles, and from east to west about 1,500; but, on account of the irregularity of its figure, the total superficial area cannot be estimated at more than 1,280,000 English square miles.

According to the ancients, India on its most enlarged scale composed on extent of forty degrees on each side, including a space nearly as large as all hurope; being divided on the west from Persia by the Arachossan mountains ; limited on the east by the Chinese parts of the peninsula beyond the Ganges; confined on the north by the wilds of Tartary and stretching south as far as the Sunda Isles. These expanded limits com prehended the stupendous bills of Tibet the romantic valley of Cash mere and all the domains of the old Iodo-Scythians the countries of Nopaul Booten Cumroop and Assam, together with Siam Ava, Arracan, and the berdering kingdoms as far as Chien of the Iliedoos, and the Sin of the Arabian geographers the whole western peniosula, and the Island of Ceylon

It is difficult to discover any namo opplied by the Brahmins to the coue try over which their doctrines have prevailed and which they generally describe by a circomlocution Sometimes they give it the epithet of Midhyama or central (from its occupying the centre of the back of the tortolse which supports the world) ond Punyabhuml or the land of virtue and assert it to have been the portion of Bharat, one of nine brothers whose father ruled tho whole earth and named after him Bharatkhand. This domain of Bhorat they counder the centre of Jam blindalpa, which the Tibetians call the land of Zamhu At other times the Brahmins describe their country as the space between the Himplana mountains and Ramisseram in the straits of Ceylon, for Cape Comerin as e geographical point oever appears to have attracted ony attention Tho modern name of Hiedostan is e Per man appellation derived from the words Hindoo black and at ban place but it has been adopted for ages back both by natives and foreigners.

By the Mahomedan writers the term Hindostan is understood to signify the coootry in immediate sub-

jection to the sovereigns of Delhi, which in A D 1582 was subdivided by the Emperor Aeber Into eleven soubahs or provinces most of which. notwithstanding the frequent political revolutions they have since experienced, still nearly retain their or ginal geographical limits The names of these provinces ore Lahore, Mool ten, Almeer Delh!, Agra, Allahabad Bahar, Oude Bengal, Malwa, and Geferat. A twelfth soubah was formed of Cabul and the coentries west of the Indus, and olso Cash mere; and three new ones were ofterwards added from cooquests made in the Deccan, eiz Berar, Candelsh and Ahmednuggur, afterwards named Au runcabad

Is modern times the limits of Ilindestan have generally been considered as co-extensive with those of the lliodoo religion, which delicentico having also the advantage of being singularly well defined on three sides by strong natural barriers, is the one adhered to throughout the following work According to this arrangement Illindostao is separated on tho north from the table-land of Tibet by the lofty chain of Hunalsya mountains which commences of the Indus ebout the 35th degree of north latitude, and passing Cashmere in the same parallel extends from thence In a south-easterly direction to on unascertained distance beyond Boo-To the south Hindostan is every where bounded by the ocean. and on the west by the course of the To the cast its limits raver Indus are more difficult to define; but the most distinct are the range of bills and forest that skirt the Beneal districts of Chittagong and Tiperali and stretch north to the Brahmaputra near to where that great river. after having long flowed almost duo west, makes a suddeo sweep to the south. In this corth-east corner the Hindoo religion is irregularly diffused, as it extends beyond the !!-

mits assigned leto Assam Cachar.

and other petty states while that of

Buddho prevalls in Bootan, and pro-

trudes into the Brahminical regions

on the banks of the Teesta. Cireumseribed within the boundaries above specified, Hindostan presents four grand geographical divisions, viz.

1st. Northern Hindostan.—This extensive and rugged territory commences on the west at the Sutulcie river, from whence it stretches in an easterly direction, slanting to the south, until it reaches the Teesta river, in longitude 88° 30' E., beyond which, among the mountains, the Lama religion prevails. To the north it is separated from Tibet or Southern Tartary by the Himalaya; on the south, from the old Mogul provinces by the line where the lower ranges of hills press on the vast Gangetic plain. The principal modern territorial and political subdivisions are the following:

1. The country between the Sutuleje and Jumna.

2. Gurwal or Serinagur.

3. The sources of the Ganges.

4. Kumaon

5. Pamkhandi Bhutant

7. The dominions of Nepaul.

The inhabitants of these alpine tracts having, until times quite recent, had but little intercourse with the plains, are comparatively much behind in knowledge and civilization; which may also be partly attributed to their having attracted the attention of the Brahmins at a much later period than their lichel neighbours in the south.

2d. HINDOSTAN PROPER —This is by far the most comprehensive division, as it reaches south to the Nerbudda river, where the Deccan commences, and includes the eleven large provinces (each equal to a kingdom) formed by the emperor Acber, as also Cashmere and Cutch, viz.

2. Bahar. 9. Ajmeer.
3. Allahabad. 10. Mooltan.
4. Oude. 11 Cutch
5. Agra. 12.

6 Delhi.

13. Malwa

7 Lahore

These provinces have long been celebrated for their richness and fer-

tility, and contain the seats of the most powerful Mahomedan empires, having been repeatedly subjugated by the more hardy tribes of the north. The generality of the inhabitants are a superior race to the population of the other divisions, possessing a more robust frame of body, besides surpassing them in energy of intellect. Among the Hindoos, Hindostan Proper, contradistinguished from the southern peninsula and eastern India (Dacshin and Purb), is named the Medhya Dcs, or central country.

3d The third grand division is the Drccan, which is bounded on the north by the course of the Nerbudda river, and easterly from its source by an imaginary line, extending in the same parallel of latitude to the south of the Hooghly, or western branch of the Ganges. To the south the boundaries of the Deccan are the rivers Krishna and Toombudra; to the east the Bay of Bengal; and to the west Within these lithe Indian Ocean mits the following large provinces are

nearly comprehended, viz
1. Gundwana. 5. Berar.

2. Orissa 6. Beeder

3. The Northern 7. Hyderabad 8 Aurungabad. Circars

9 Bejapoor 4. Candeish 4th India South of the Krish-NA. — This division is frequently named the peninsula, although its figure more resembles an equilateral triangle, of which the northern boundary at the river Krishna is the base; the coasts of Coromandel and Malabar the sides; with the apex at Cape The modern territorial Comorin. and political subdivisions are the fol-

lowing, viz 1. Canara.

6. Mysore.

2. Malabar.

7. Combatoor.

3 Cochin. 4. Travancore. 8. Salem and the Barramahal.

5 The Balaghaut 9. The Carnatic. Ceded Districts.

There are few sea-coasts of such extent so destitute of islands as that of Hindostan; indeed, excluding emerged sand-banks and mere rocks, it may be said to possess only one, Ceylon, with which the geographical airrey in this quarter terminates. Proceeding on the next objects that come under consideration are the boundary countries, which are the following commencing on the south west:

1 Baloochistan

2 Alchanistan 3 Tibet

4 Northern Hindostan

5 Bootan 6 Assam

7 States adjacent to Assam

8 Ara and the Burmese empire

The are and relative position of the different countries will be more satisfactorily learned from an imprection of the map prefixed than from any written explanation honever minute and each of them being described in their alphabetical order for further local details the resider is referred to the distinct heads respectively what observations follow having reference to Illindo tan in general

Viewed on a grand scale the prin cipal geological features of this region are the vast Gangetic plain the great sandy desert of the Indus the elerated table-land above the ghouts, ond the Illmalayan Vindhyon, ond Ghaut chains of mountains with their subordinate ranges There are oo lakes of any considerable magni tude but many morasses, especially an coormous salino one named tho There are no volcanoes in a Runn state of octivity nor is the existence of extinct ones ony where clearly ex tablished Farthquokes although frequent with the execution of one 10 Cutch in 1819 have never been The seasons winds destructive and rains are periodical and through out the whole space what ore called monsooos more or less prevoil Within the gengraphical limits of Illndostan every degree of tempera-ture may be found from burning heat to perpetual congelation ; but, with the exception of an elpine tract among the northern mountains the elimota is strictly tropical and promotes the growth of oll congenial fruits, plants, and vegetables in the VIL. I

most linxurant profusion although the soil in most jurits wants strength and tenacty Minerals are abunare few countries that spontaneously produce so great a voriety of saline rubstance. Leamined more moutely the 1 hysical geology of lindostan may be considered on resolving stieff into three great divisions, vi

1st The peninsular tract which constitutes the south of India

2d The belt of flat country ex tending from sea to ses and distinguished by the name of biddle lo dia.

3d The continental mountains which form the northern limits of India rising between the middle region and the vast plateau of South orn Tartiny, and extending more than fifteen degrees of Inaginade su o direction from W.N.W. to F. S.E.

le the champaign country of \lid die India three principal divisiona may be noticed lat, the tract wo tered by the Ganges and its tribu tary streams; 2d a tract watered by the lodus and 3dly the interme disto desert la which the ever 5araswall loses itself Of this division a principal feature is the total obsence of publics or rolled stones of one kind except in the beds of the rivers fur a few miles after they quit the bills; and the soil of the plains la every where earthy and comminuted except in certain instances where indurated nodules or concretions have been found Throughout this extensive plain there is neither mine nor quarry The banks of the rivers being usually precipitous on one sido ond shelving on the other exhibit sections of strata down to the level of their beds; but scarcely ony other natural section is to be found tho sinking of wells and borning for woter is consequently the only opportunity that presents itself for the examina tion of the strata Tha surface of this level tract is every where olluvial, and the strate, as far os they go ho rizontal, Beneath the superficial mould the subsoil is sand clay or loam so layers more or less inter

mixed, and distinguished by colour or texture. In the inferior strata of clay, nodules or concretions of the same substance are to be met with. The whole basis of the Decean and south of India is supposed to be granite.

But the glory of Hundostan is its noble rivers, and more especially the venerable Ganges, which at once fertilizes the soil, and serves for the transport of its matured productions During the rainy season the mountain torrents swell in a wonderful manner, and within a few hours frequently rise twenty feet above then usnal level, rushing down with much uproar and rapidity. The larger streams generally begin to increase before the rains fall in the low countries, which circumstance is equally remarked of rivers that do not spiing from cold countries, such as the Nerbudda and Tuptee, as it is of the and Brahmaputra, whose sources benefit by the snows of Himalaya. In the dry season they proeced to the ocean over their broad sandy beds with a slow and sluggish stream, but when swelled by the periodical rains their course is furious, and destructive to the villages placed too near its banks. On the other hand, some rivers, such as the Seraswati, mentioned in ancient Hindoo writings as being of great bulk and importance, have in latter times either disappeared, or been nearly absorbed by the thirsty soil. In general the rivers have retained their original appellations better than the cities or provinces, the latter having often had their designations altered from vanity or religious motives. The following are the names of the principal streams, with their probable length of course to the sea; but there are many others omitted that would be reckoned large rivers in Europe.

	Miles to the	sea

In the Decenn and South of India: Nerbudda ...... 70 Mahanuddy ..... 550 Tuptee ..... 460 Cavery ...... 400 The harvest in Hundostan Prope is divided into two periods, the firs is cut in September and October the second in March and Ayrıl Rice is the grand article of nourish ment, and the chief object of atten tion in the cultivation of it is to have the soil pleatifully supplied with wa ter. Indeed, while travelling through India, a tolerably correct indemen may be formed of the wisdom of the government and condition of the people, from viewing the number and state of preservation of the tanks water-courses, and other conduits for the irrigation of the fields Wheat is the food of the higher classes in the provinces between the Nerbudda and Sutuleje, but the poorer classes are obliged to resort to substances of a much coarses and uasavoury nature. In this country the wages of the labouring cultivators are limited to a merc subsistence, which is not the case in Europe. In the latter, the labourer's expenditure consists not only of food, but also of many accessaries, such as a cottage, furniture, clothing, and liquor, so that in times of scarcity when grain becomes dear, he finds a temporary resource in abstaining from, or parting with, some of these superfluities. working classes of Hindostan are not so well circumstanced, for their wages being little more than the mere expense of their food, they are interly destitute if it rise, having no reserve for emergencies That the Hindoos were in early

That the Hindoos were in early ages a commercial people we have many reasons to believe; and in the first of their sacred law tracts, which they snipose to have been revealed by Menu, many millions of years ago, there is a curious passage respecting the legal interest of money, and the limited rate of it in different cases, with an exception in regard to

adventures by sea. The three great articles of general importation by the Greeks and Romans were first, spices; secondly precious stones and pearls; thirdly silk Their exports to India were woollen cloth of a slight fabric, finen in chequer work, some precious atones and some aromatica unknown in India coral storax glass vessels of different kinds wrought ailver italian, Greek and Arabian wines brase tin lead girdles sashes, mehlot, white glass, red arsenie black lead and gold and silver Of the just-mentioned metal the influx to illindostan has always been very great as the inhabitonts have siways sold much and purchased ittle the balance has consequently always been in their favour deal of bullion is supposed to be onnually lost by being concealed under ground by the natives, mony of whom die without revealing the sito of their bidden treasure, and tho practice of hourding is among all ranks of limdoos almost universal During mony centuries cotton plecegoods were the grand starde of ilin dostan but latterly, owing to the great improvements in Europe the quantity exported has considerably diminished The various sorts fahricated in dif ferent provinces from Cane Comorin to the northern mountains are too numerous to admit of particular detail; and for further information regarding the agriculture manufectures ond commerce of illudostan the reader is referred to the provinces ond cittes respectively In the mean time it may safely be asserted that with so vast an outent of fertile soil peopled by so many milhons of tructable and industrious inhabitants illindortan is capable of supplying the whole world with ony species of tromeal merchandize the production, in fact being only limited by the demand

The Greeks have not left us any means of knowing with occuracy what verasculor longuoges were prevalent in India on their arrival. The radiesi ionguage of India is the San acrit of which such is the entiquity that neither history nor tradition has

2 T 2

preserved any account of a people of whom it was the living tongue. From this source the most ancient derivatives are the Prakrit, the Bali, and the Zend. The first is the language which contains the greater part of the sacred books of the Jainas, the Balı or Palı is equally revered among the followers of Buddha, while the Zend, or sacred language of ancient Persia, has long enjoyed a similar rank among the worshippers of fire, and been the depository of the sacred books of Zoroaster is reason to believe that ten polished dialects formerly prevailed in as many civilized nations, which occupied the whole extent of Hindostan Saraswata, the Kanoje, the Gour, the Maithıla, and the Orissa, are denominated the five Gours, the five Dravirs are, the Tamul, the Maharatta, the Carnata, the-Telinga, and The modern dialects the Gujaia. are the following, and have ninetenths of their words in common, the basis of the whole being the Sanscrit; and except the Hindostany, which is the universal language of intercourse, they are all local. The Hindostany, The Harowty,

Bengalese, Malwa, Cashmerian, Bruj, Bundlecundy, Dogura, Ooch, Maharatta, Sindy, Magadha, Cutch, Koshala, Gujeratty, Maithila, Nepaulese, Concanese, Punjaby, Orissa, Bicanere, Telinga, Marwar, Carnata, Jeypoor, Tamul.

Odeypoor,
On the east we find the Sanscrit language arrested by the Khasee, the Birman, and other Indo-Chinese languages, and on the west by the Pushtoo, or Afghan, and the Baloochy.

That any general similitude of manners existed before the Mahomedan invasion is very doubtful, but certainly there are in modern times strong shades of difference in the characters of the Hindoos dispersed over the several provinces. Travelling though

Hindostan, from Cape Comorin for example, up the Carnatic, the Deccan, and through Bengal to Cashmere, an extent of country of above twenty-five degrees of latitude, under many general points of resemblance, a very great variety of habits, languages, and religious observances is perceptible, nearly as great as a native of India would remark were he journeying from Gibraltar to St. Petersburgh. The character of the Maharattas, nurtured in war and depredation, differs much from the placed Tamuls of the south, and the unmartial population of Bengal. Those who inhabit the northern territories from the Neibudda to the Indus, are almost all (or pretend to be) of a military tribe, the caste of Raipoots or Rajwars, who are governed by petty chiefs, and divided into small principalities, which, until reluctantly compelled to adopt more pacific habits, were engaged in never-ceasing conflict with each other ference between the industrious manufacturing classes and the Naii of Malabar, the Poligar of the Carnatic. and the turbulent Grassia of Malwa and Gujerat, is very great; and as to the tribes of Catties, Coolies, Babreas, Mhairs, Jhuts, Meannas, Mewaties, &c., they are rather objects of police than legislation. What one would view as means of safety and protection, another would consider tyrannical and insupportable A want of attention to local usages, and a desire to regulate our administration by general rules, often in direct violation of them, has frequently had the effect of rendering the British government more unpopular than it ever would have become through the grossest violence and oppression.

The great mass of the Hindoos and Mahomedans throughout Hindostan has nearly attained the same stage of civilization, but intermixed with these are certain races of mountaineers, probably the true aborigines, whose languages have little affinity with the Sanscrit, and whose customs retain all their primitive barbarity. The most remarkable of these are the

Gonds Bheels and Coolers but there are many other no less note such as the hall people of Baglapoor, the Garrows, and the knokese of Clait tagong. In the capital settlements and in the larger towns within the British dominous, same few of the notives attempt to inhibite the man ners of Furopeans and almost adapt their drews; but they receive no encouragement from the class then are endeavouring to concillate and in variobly low the estimation of their own tribe in proportion as they devante from its usages.

The two great religious persuasians of Hindostan ore the Hindoo and Mahomedon whose relativa numbers throughout the whole emplre are probably in the proportion of seven the first to one of the lest By I uro peans the term Handoo is la general so very loosely and inoccurately applied or to include religions such as the Buddhist and Jain professing tenets in direct opposition to the Brahminical system Indeed Hindoo mythology is a subject as mexhaustible as it is difficult to render intel ligible and can only be slightly touched upon; but viewed on the most favourable side the following may be considered a tolerably exect

sketch of its doctrines. The great deity Brabm remains in holy obscurity and superstitlen is never allowed to profune his name which is always kept clear of fiction Three energies however, the creat ing preserving, and destroying are embodied under the names of Brah ma Vishnu and Siva to each of whom o femole or passive energy is attached These have all human forms diversified by the imaginetian in various ways; and os the two last ore supposed to have descended meny times each evatar or incurrection furnishes a distinct deity, in wham worship is addressed. Of the three specified Brahme olone has no lnear notions and 19 never worshipped Some of the avetars ore supposed to beve been mearnations of the whole god, while others are considered only partial emanations of the divinity

Bealdes these three principal gods thera is a whole pantheon of minor The sea the winds the heavens the elements the sun, mooo and stars, every river, fountein and stream, is either a ileity in itself, or has a divinity presiding over it no thing being done without the inter vention of supernatural power Descending still lower, there are myrisds of demigods of a most extraordinary description, and numerous beyond the powers of calculation A little red paint smeared over a stone n lump of clay, or the stump of a tree, converts it into a god, worshipped by the lower classes and soluted by the upper with inuch apparent devotian Any monster any figure partly brutol, any multiplicity of heads and hunds in the object adored, indicate a Brahminical place of worship. The presence of umbrella-covered pyramile or semi-glabes cod of plain human figures sitting cross-legged, or standing in a meditative posture point out a temple or exercation of the Buddhuts; the twenty four saint ly figures without the pyramid an nounce a temple of the Jain

Five great sects of Ilindoos wor ship exclusively a single chity one recognizes the five divinities that are reverenced by the other seets respec tively; but the followers of this comprehensive scheme mostly select ooe object of daily adaration, and per form rates to the other detties on The wor particular occasions only ship of Rame and Arishoa of Siva ond Bhovanl, oppears to here been introduced since the persecution of the Buddhists and Jams The establishment of the Vedas was enterior to Buddha whose thealogy seems to hove been borrowed from the system of Capile, who forbid the alonghter ing of animals; but the overthrow of the Buddhist seet in Hindoston has not effected the full revival of the religious system inculeated by tha Vedas Most of what is there taught 18 now obsolete, and in its stead new orders of devotees here arisen, with new forms of religious ceremonies Rituals founded on the Puranas and

Tantras have in a great measure antiquated the institutions of the Vcdas. a remarkable instance of which is the sacrifice of animals before the goddess Cali; and the adoration of Rama and Krishna have succeeded to that of the elements and planets. William Jones was of opinion that we might fix the incatnation of Buddha, or ninth incarnation of Vishnu, in the year 1014 before the birth of our Saviour. The earliest accounts of India by the Greeks who visited it with Alexander, describe the inhabitants as divided into separate tubes, consequently a sect like the modern Buddhists could not liave been the most prevalent. No modern nation of equal civilization remains so completely infatuated as the Hindoos are with conviction of the potency of magic, to the effect of which every event, good or bad, is attri-Their religious rites have, in fact, degenerated to mere incantations, all directed to the attainment of some end through the efficacy of a spell; and the requisite ceremonies have become so numerous and intricate, that no votary could accomplish them were he to devote day and night to their performance.

The Hindoo religion is without any acknowledged individual superior or public convocation, but the pre-emmence of the Brahmins is never disputed by the other castes The true derivation of this sacred order remains involved in obscurity; but at present the impression of many orientalists is, that they were originally strangers from Persia, or some portion of central Asia, and it is quite certain that the Biahminical religion formerly prevailed far west of the Indus Even now their advance eastward is progressive. north-eastern parts of Bengal, Brahmins are a recent importation, the rude natives of that quarter not having long acknowledged their vast superiority, or submitted to their distinctions of purity and impurity. is a mistake to suppose the Brahmins do not admit of proselytes. They certainly never dreamed of admitting

any stranger to a participation of their own rank, the distance being utterly immeasurable, but where it suits their interest, they have no objections to class them with the military and working classes, and even condescend to perform certain ceremonies for the bai barians, which is a virtual adinission within the pale of the Brahminical church. altogether vile are those for whom no person of the sacred order will perform any ceremony, unless they i enounce their impure habits; and, in reality, wherever Brahmins penetrate among savage tribes, a gradual and regular conversion immediately follows.

The division of people into castes is the paramount distinction between the Brahminical Hindoos and the votailes of Buddha; but strict adherence to the peculiar duties of each caste having probably been found impracticable, they have been compelled to relax the spirit of the law, and to admit of numerous exceptions. peculiar duty of a Bialinin is to meditate on things divine; and the proper manuer of his procuring a subsistence is by begging, every species of industry being delogatory to The majority of Brahmins his rank may and do eat animal food, pilests, while officiating as such, perhaps do not; but, though all priests are Brahmins, all Biahmins are not priests. The right of bearing arms, which in early times was confined to the nulitary caste of Khetries, has latterly been found diffused through all classes, and Brahmins may be daily seen standing in the ranks as common soldieis. It is probable that the institution of a distinct military caste had the effect of eradicating martial habits from the mass of the population, and contributed greatly to facilitate their subjugation by foreign-It is generally, but erroneously supposed, that persons of the same caste will communicate and eat together all over India: but this is by no means the case, the intercourse being confined to a few families only in their own immediate neighbourhood and as for as refers to them the residue of the same tribe are in a manner outen is. There is something however or is chauling to the natives of India in the doctrine of caste, that the Valadar Christian notwithstaning their concernion to a religiou that sonctions no distinction have not been able to free themselves from it; and the lower choses in Valonmedian throughout limdostan show a remarkable pronents towards its admits

ness towards its adoption So far as the distinction of caste eliecks pri greadre improvement and permanently degrades a large portion of the people it is injurious to society; but so for as they perpetuate the arts and tend to prevent further deterioration as they repress liregi lar passions and promote tranquility and subordination, their inflience is beneficial In a country an | climato predisposed to improvement the slischles of caste must be a curse; but where retrogression of intellect Is much more to be apprehended, they are decidedly meful tan has hitherto belonged to the last description of nations and hos con sequently been upheld in the scale of civilization by the doctrine of caste At present its destiny seems altered and it may be expected the Brah minical system will be gradually relaxed and at lat whether for the better or the worse disappear great error however may be com initted by unduly serelerating this event or attempting prematurely to overthrow an ancient ayatem bel iro the people ore prepared for the change

The lindoos believe that by tho performance of extreme penunces and austenties mortals may ocquire superantizal power and exclesioners or rather prodigality of life has always been a remarkable feature in their character Bendes o meritorious suffering for their faith suicide is to many case legal ond commend able such as the immediation of a widow with her husband's corpuse Theso ascrifices (called sutters) are almost unknown in many parts of

Southern India, an I in the countries of the Deccan Malwa, and Upper Illndostan are of rare occurrence Indeed the practice is most prevalent In the immediate vicinity of Calcutta where more than half of all the out tees in Hengal ore perpetrated In establishing their places of religious pligninge the Hindoos have always shewn a great preddection for places near the sea the sources and june tions of rivers the tops of remarkable hills, but springs, caves woter falls in short any natural phenome non the access to which happens to be difficult or dangerous. Of late years a great many of their holiest fance have had their reputation for sanctity considerably tarnished in consequence of their having been visited and examined by I property but more especially by the improved abstracted all mystery from the jour ney and rendered the pilerimano too easy to be mentorious The fullow ing are the names of several places that still retain a considerable por tion of their original celebrity which must be expected, however, annually to diminish Cancoutri

The Ganges on account of the peculiar sancisty of its waters in worshipped throughout its whole course but there ore particular spots on its banks held more seared than others; they also senerate in an one-to-regree many other rivers. Mo to of the holy places obsore enumerated are situated very distant spart; jet appear from the remotest antiquity to have had a constont influx of pil grisus from every quarter of Ilindos tan; which appearently ought to have had been every quarter of Ilindos tan; which appearently ought to have had the effect of improving their geographical system, and uf promoting

a general knowledge of each other. But no such beneficial effect ever resulted, and, owing to the total want of historical records among the Hindoos, any fable that has been retailed for 100 years, comes down to the existing race with an origin as obscure as if it had been established for a thousand.

The modern Mahomedans may with safety be estimated at one-seventh of the total population; and notwithstanding the subversion of their political predominance by a Christian power, their religion continues to ex-They are no longer, however, the sanguinary zealots who, eight hundred years ago, in the name of God and the prophet, spread desolation and slaughter among the unconverted Open violence produced little effect on so patient a people, and although the Mahomedans subsequently lived for centuries intermixed with Hindoos, no radical change was produced in the manners or tenets of the latter, on the contrary, for almost a century past, the Mahomedans have evinced much deference to the prejudices of their Hindoo neighbours, and a strong predilection towards many of their ceremonies. The higher ranks of Mahomedans in general abstain from making offerings to the gods of the pagans, but the multitude in their distresses have recourse to the idols, and even make offerings on festivals, whereas it is the higher ranks of the Hindoos who are chiefly addicted to the propitiation of Mahomedan saints

The next religious sect of sufficient importance to deserve notice is the Christian, which probably throughout Hindostan comprehends about half a million of souls, almost all the descendants of the ancient Christian stocks, and, relatively to the other classes, existing under circumstances The pride of caste of degradation among the Hindoos does not singly account for the contempt felt and shewn by the followers of the Brahminical system towards them, no such contempt being manifested to the Mahomedans, or to the European Chris-

There are undoubtedly circumstances of diet and cleanliness which tend to lower the Nazarene in the eyes both of the Mahomedan and Hindoo, and the European holding himself aloof from the native Christian, no portion of the veneration which the first attracts is reflected on his humble brother in religion. Were it practicable to raise the lower part of the chain without lowering the upper, the Christian might, like the Mahomedan, become a tribe holding a respectable station in the mixed society of India; and until some such improvement is effected, the temporary causes that oppose the conversion of the Hindoos will continue to operate. Conviction does not easily reach the mind of an individual who, by becoming a proselyte, must descend from a decent rank in society to one degraded and discountenanced; whereas were he encouraged, not merely by the number but also by the reflective lustre of those, who, although of a different origin and complexion, unite with him in faith, he would soon have numerous associates.

With a view to the creation of so important a link in the chain, combined with other reasons, a gradual extension of the colonizing system has been recommended by Mr. Colebrooke. Considered as a measure of policy, a Christian population holding a decent rank in the motley throng of tribes and castes, would tend to consolidate the strength of the state, and add to the probable duration of the empire A colonization of the nature alluded to, far from being likely to terminate in a separation of the colony, would rather serve to perpetuate the union, by the addition of a tribe whose interest and doctrines must attach them to their European With habits more analosuperiors gous to those of Europe, the Creole Christians would certainly be better customers for its productions than the For the furtherance of other sects such an object, all that is necessary is to allow the natural course of events to take effect, without either encouragement or restraint, and to permit

Europeans and their legitimata pra geny to settle in India and acquira property At present it is only the illegitimate offspring that Is thus privileged while the legitimste descendant is probilited from obtaining a property in the soil of his birth gradual mercase of the illegatlmote race infact, constitutes n progressive colonization but it proceeds less rapidly thon might have been expect ed being absorbed into the classes immediately nhave and below it Oo the ane side, by the intermarriages af the females with European sojourners; and an the other it melts into the dark native Christian Calonizatian in the usual sense of the term is never likely to toke pisco in Hinduston as no inducement exists to attract the common labourer or artizan voluntary resort would be confined to merchonts, traders and factors; to navigators and acamen of a superior class; to master planters and over scers of plantations, and to the elid and military servonts of the govern ment but the influx of emigrants would never be in such numbers as to interfere with the ordinary employ ment of the native population process of time however when nees shall have passed away should the mercass of o Christian Creole popul lation terminate to a separation which is hawever more likely to happen from other caoses the event when it orrives will be oilvantageous to both parties and its approaching moturity hailed on o common benefit The historical notices procurable

The historical notices procurable in links are usually either more tra ditions preserved among ignorant people, or legends miled with the most moostronyfables for it may be safely overried that the linindoor have nothing deserving of being dignified with the name of history, or which could with propriety be denominated a chromele. Iodeed it is quite un accountoid have in the miles of such o moss of mythological fable their priests and bards did not by occulent stumble an some historical or chronological fact. The wars botween the princes consequent as in-

carnatians, Vichnu, and the Asuras or demans such as Rarano hava reference no daubt to a period when the worship of certain gods was in recent tigour and the sectories of each were contending for superiors; There is olso reason to believe that the I mans so aften mentioned were the Macedoniansaf Bactria who abtnined lorge possessians in the north-west quarter, where about the time of the Mahomedan invasion. the family of Polas clormed universal dominian The dinostles of the princes named after the aun and maan seem to hove governed Hin dostro from the earliest times and each branched aut into numerous lines that shared the country between them while sometimes the one and sometimes the other proved most potent and furnished the prince who was considered the pa ramount lard of India The pawer posses ed by these sovereigns oppears to have consisted of three pri vileges each prince sent him annually on embassy with presents; he bestawed the tika, or mark of lovestiture, an each beir when he succeeded to the throne and he had a right ta interfere to prevent the stronger of his nominal vassals from com pletely subjugating the weaker The prerogative last mentiaced was probably limited to persuosian os ha possessed na menas af enforcing a co-operation among them For the chranology of Ilindoston since tha Mohamedan invasion the reader la referred to the words Grieni god DELHI ; that of each province city, ond district is given as they respectively occur

tively occur. For mare than n century past the notice gareriments of Illimication hora been in o perpetual state of floctuation, conquest being oranged as tha first and legitimote pursuit of every soreteign and the sole sources of glory and renawn. In such a condition of society ho views of ambition can olono be bounded by limbibity to prosecute them Besides this, so far from haring any political system, this strength of which would system, this strength of which would say.

have afforded protection to the feebler states, exactly the reverse was the case, the object of every native chief separately, and of all collectively, being to destroy the weak Internally the constitution of a native state is an unmixed despotism, every movement originating with the government, to the power of which there is no limit except the endurance of the people, the sovereign's will being never opposed but by a The consegeneral insurfection. quence is, that the great bulk of the population entertain no attachment to any set of political principles, or to any form of government; and they have been so long accustomed to 1evolution and frequent change of sovereigns, that they obey with little repugnance whoever is placed over them, expecting his sway, like that of his predecessor, will be transitory-They are solicitous for the toleration of their religious doctimes, lites, and prejudices, the security of their domestic concerns, and the prosperity of their particular villages, but are totally destitute of what is understood in Europe by the term patriotism. Indeed the system of village government throughout India presents the only instance of permanent territorial collesion counteracting the evils incident to despotism, and serves to account for the flourishing condition of many tracts of country from which all government whatever appears to be withdrawn.

Under such eircumstances, it is not surprising that the natives do not look upon the crime of treason against the state in the light we do In fidelity and attachment to a master or chief they are not surpassed by any people: but those who stand in the relation of subjects, without being in the service or pay of the supreme power, do not feel themselves bound by any very strong tie of allegiance. have no idea of loyalty and disloyalty but to the masters who support them, and their ideas run equally counter to all European notions of civil liberty. In adverting to the incessant

revolutions of these countries, it is a remarkable fact, that in all the schemes of polity, whether of the victors or the vanquished, the idea of civil liberty in any shape never seems to have been contemplated, and is to this day without a name in the languages of India. The Sciks, when they rejected the Brahminicul religion, exhibited the first and only approach, however imperfect, to republican principles. In reality our native subjects have been as remarkable for their cheerful submission to power, as for a want of moderation, an unsteady disposition, and a spirit of encroachment and litigation, when suffered to indulge these evil propen-They have been accustomed to be governed by the sword, a species of rule which they comprehend, and even seem to like No country in the world can exhibit a more cheerful and apparently happy class of neople, than the native sepoys in in the British service, which disposition, with the many other good qualities they are known to possess, may in a considerable degree be attributed to the salutary discipline and subordination they are subjected to

In Hindostan there are no titles of nobility exactly similar to those of Europe, nor are they in general liere-According to oriental ideas, ditary. honours or titles conferred by the sovereign must be accompanied by ત jaghire, and generally by a military command along with the title, which is in itself considered merely as an appellation attached to the acquisition of emolument or power; and it is quite impossible to impress the minds of the natives with the value of a mere name On this subject their ideas are more simple and natiral than our's If an unfit person receive a patent for the title of amcer or raja, he would not be able to retain it: for when a man has nothing left of dignity but the name, in India, that also soon fades away other hand, if a Hindooshould emerge from poverty and obscurity, and attain wealth and celebrity, he would,

of he wished it he saluted rays he would be considered as having as entered a claim to the title in the same manners other persons acquired by learning the titles of muslary and pondit, which becomes, among the mass of the people Inseparally at tached in their names. Election of rank and increase of optience among the natives of India produces a greater accession of dependants particularly in the female branch of the family, than in any other country; and ar cording in their prejudices few of these addressions and individuals.

out incurring disgrace In modern times the British govern ment, since the establishment of its predominance being analous to raise up an intermediate body of respec table gentry has made vast sacrifices of revenue to the semindars with the view of elevating them to the rank of European landlords but the experiment has totally failed, scarcely any of those whose incomes admit of their supporting a becoming splen dour having shout any device to shake off their original habits, while the unceasing division and subdivision of estates preuliar to the lilin doo law of inheritance threatens to reduce the whole in the course of a few generations to the condition of labouring cultivators Another step towards improvement would be to give the towns and market places a privileged municipal government the want of which in all castern govern ments has greatly retarded the adsonces of civilization and long ex persence has demonstrated that the villa\_e institutions of India well ma naged are competent to maintain peace and order within their respective boundaries.

But a still more exential improvement than either of the above would be the admission of natives to places ut trust onal bonour which is the only mode by which they can be of fectually conclusted. It is in soin to expect that men will be satisfied with merely having their property secured white all the paths of he nourable substitues are said spanish.

Under the Mahomedans al them though they ruled as conquerors the Ilindoos could rise to offices of dig nity an I importance from which they are now entirely excluded manners of the Mahomedans were much more like their own; they reaided permanently among them, spent their revenue in the country and became part of the people whereas the British are only birds of passage The natives have certainly a high printon of their justice-it is a proseth t but under a great sovereign such as Acher or Aurengrebe who rewarded them adequately natives of honour and integrity have surung up an I under smiler erreumstances No European le would do so spain so thoroughly acquainted with the langua e manners and economy of the natives as they are themselves and so far is infritor to any native judget but the natives are at present so consinced of the superior integrity and impartiality of the I uropean jud es that they are never sa theed without an appeal to their au thority At present the best natires will side with their own family caste or village. The main objection to the employment of the natives is their notionous liabits of the honesty and peculation t but it is only sinco the I mopean functionaries were well paid that they themselves became trustworthy All European govern vernments have purchased integrity in high public officers by honours and emoluments; If we want it in India we must take the same means and If we pay the same price we shall almost as readily find it among the nathers of that country as among Lurupeans The judicial system introduced into Illindostan by the Briti h government le too artificial for the state of soenery there ond proceeds upon an assumption that the natives are alsotogether unworthy of trust. So they certainly are and will continue while so demicably renunerated for their honesty or they have litherto been The grand objection to European a, ency 14, that it cannot be employed to the extent which is necessary for governing well so vast a country, which could be effected only by an increase of colonization; under the present system, a few hundred Europeans, scattered over a territory greatly surpassing in extent the largest kingdom in Europe, can never duly administer to the wants of so numerous a people

These, and every other measure of a like nature, ought to be conceded slowly and gradually, for the expenence of the world has shewn how vain and delusive are all sudden attempts to reform and improve the social condition by the mere force of The institulegislative enactments. tions of the natives have arisen out of customs, religions, climates, and constitutions, essentially dissimilar to our own, but they have been approved and perfected by the experience of ages, any innovation, then, on their simplicity, where not absolutely necessary, is much to be deprecated, and the law most required just now is one to prevent European interference and meddling. We have, in fact, in most cases but little in our power beyond what internal tranquillity, and a steady government to check active oppression, produces. This cautious line of policy is more especially requisite in India, where the people are more under the trammels of prejudice than any other, their laws and usages being identified with their religion, which pervades every action of their lives. In laying the foundation, therefore, of order and improvement, the genius of the people must be consulted, and the greatest respect paid both to their inoffensive and hurtful prejudices It is to the actual condition and exigencies of every society that its legislature must conform itself, and when a new evil arises it must be met by a corresponding remedy The best and most effectual plan of improvement is that which does the least violence to the established order of things, requires no adventitious aid or complex machinery, and, as far as may be, executes itself

In Hindostan land is the chief

source of revenue, and the government assumes so large a proportion of the produce of the soil that it has a direct interest in encouraging the labours of the peasant. In 1815 the assessment per bega of the land revenue exhibited a remarkable diver-In Shajehanpoor and Bareily it was seven and eight annas, while in Moradabad, immediately contiguous and similarly situated, it was one rapee twelve annas for a bega of the The fluctuation same description of rate per bega between individual adjoining estates was yet greater. The only inference deducible from this variety of rate is, that if a propiletoi can venture to engage for so high a rate per bega as the records frequently exhibit, it is only from the knowledge that he has other lands unknown to the assessor, from the proceeds of which, united with those recorded, he has the means of raising the amount of the jumma beyond the necessary returns of his capital and The assessment therefore in these cases is fixed on his total receipts, without reference to the extent of land supposed to be assessed. Indeed, from a statement furnished by the board of commissioners, it appears that, in the ceded and conquered provinces alone, the extent of land held under rent-free grants (all questionable as to their validity) amounts to 4,495,177 begas, an extent exceeding the recorded area of the cultivated land in the largest of the British districts The amount and value of the general improvement may be inferred from particular instances which come under the notice of the revenue and judicial authorities, when occasions arise for ascertaining the proprietor's income by regular inquiry, or, when it is accidentally made known, or is deducible from other circumstances. such as the price given for lands by public and private sale From such sources of information there are grounds for reckoning the net income of the zemindars, upon an average, at an amount equal to half the assessment paid to government, viz.

Sudder Jumma (say) ... 10

or one tilted nearly which indicates an improvement to the proportion of one-shired of the former produce of the fam. The resources of the state inother irranches (such as sait optim stamps customs atharps (ac) have been in the mean time increased in a higher ratio and the state berne fitted by the augmentation during the whole period of sit properties.

The price of wheat, as stated in the Institutes of the I mperor Arber is tweive dama per maund of thirty dams, equal to twenty-six dams or ten onnas nearly, per barne maunil. Flour twenty-two dams per mauod of thirty dame, equal to one rupee one anna and a half per bazar maund Recenue of a bega of wheat in kind four maunda twelve and three-quar teras in money (the average of four prosloces) the highest renta were 102 daent medium of years sixty seven dams. Four maunds twelve and threequarters at 102 dams equal to twenty four dams nearly; at slaty seven dama coust to stateen dama nearly. or therteen annas to one supee three annas per bazar maund During the twenty years that elapsed between 1792 and 1812 great changes took place in ligitain but in India no suris advance in the rate of wages or average price of corn took place as to indicato a material and permanent alteration in the value of money com pared with the necessaries of life, nor in the wider range of two or three centuries does there appear to have been changes keeping exactly pace with those that have occurred within the same period in Europe As may be inferred from the above statement the price of provisions in the time of the Emperer Acher and therelative proportion of a money rent to a rent in kind differed much less than a similar comparison at on equal interval in Great Britain would show

The circumstances in which the British government is placed pre cludes all improvident generodly and the peculiar habits of the people require that their natural tendency to Insction should be stimulated by the necessity of providing for the pay ment of a moderately inch land assess-An incitement of this naturo ment is more particularly called for in a country where the mere necessaries of life are easily procured, and where, in most parts, during the prevailing anarchy of more than a century, to acquire property by Individual exer tion was only to tempt the hand of rapacity In several provinces tho as exement to the land resenue has been rendered permanent and it is certainly desirable that in process of time the system be extended to the whole; but it must be door with caution as by fising its amount in per netous, we impose bounds to the demands of the state ignorant of tho future extent of the public ext, encies The alufities and indefatigable exer tions by which the fiscal arrangements of India bare been brought to their present improved condition liare ne ver been duly appreciated in Europe Much remains still to be done : but even in their present imperfect form their regularity presents a singular contrast to the ayatem of shifts evasions, and externions, which seems so congenial to the obliquity of a oativo financier The same observation is applicable to the existing system of police, which notwithstanding its nu merous imperfections (far easier to describe than to remedy) has greatly amellorated the condition of the na tives who are highly sensible of the protection their persons and property now experience and acknowledge that the administration of civil and criminal justice has been improved, inasmocii as form and consistency have been substituted for discretionary authority On the other hand it must be admitted that, under the new regime the condition of some classes and more especially the military, has materially retrogaded, the productiva income having by the course of events been almost wholly transferred to the purely agricultural and trading portions of the community.

The formation of the enormous empire now possessed in India by the British nation, has been urged on by events so uncontrollable, has been so fervently deprecated by the ruling authorities both at home and abroad, and so peremptorily interdicted by the strongest legislative enactments, that its acquisitions under such circumstances almost appears like a We are dispensation of providence certainly intruders into Hindostan: but never was there, in a similar process of aggrandizement, such a want of intention or premeditation. Force alone could never have effected its accomplishment, although it was necessarily the subsidiary means through which the native states were enabled to surmount the obstacles that checked their inclination. Of the truth of this an adequate judgment can only be formed by those who have examined the voluminous documents that have fallen under the author's notice, and observed the incredible pains taken by the different British governments of India, since 1784, not only to avoid every war of aggression, but also to resist the importunity of the different native chiefs and communities to be admitted within the pale of its protection as subjects or There may have been tributaries. cases, although it would be difficult to indicate them, where the prospect of gaining a political ascendancy, or too hasty apprehension of meditated attack, have misled the government into hostilities which might have been avoided; but the general history of the British empire in India is, that it has been wantonly assailed, the unprovoked enemy has been conquered and the possessions wrested from him retained, not merely as a legitimate compensation, but also on the consideration of self-defence Thefollowing concise abstract of the British territorial possessions, with the date of their acquisition will furnish a general notion of their progressive increase.

1639. Madras with a territory five miles along shore by one inland.

A D. 1664 Bombay.

1691. Fort St David

1696. Calcutta

1750. The Jaghire in the Carnatic.

1757. The twenty-four pergunnahs.

1761. Chittagong, Burdwan, and Midnapool.

1765. Bengal, Bahar, and four of the Northern Circars.

1776 The island of Salsette.

1781. The zemindary of Benares.

1787 The Guntoor Circar

1792 Malabar, Canara, Coimbatoor, Dindigul, Salem, the Barramahal, &c.

1799 Seringapatam.

1800. The Balaghaut ceded districts

of Bellary and Cuddapah.

1801. Territories ceded by the Nabob of Onde in compensation for subsidy, consisting of Rohilcund, (including Bareily, Moradabad, Shahjehanpoor, &c) the lower Doab, and the districts of Furruckabad, Allahabad, Caunpoor, Gornckpoor, Azımghur, &c.

1801. The Carnatic province, comprehending the whole of the Nabob of Arcot's territories

1803 The Dutch portion of the is-

land of Ceylon.

1803 Delhi, Agra, the upper Doab, Hurriana, Saliai unpoor, Merut, Alighur, Etawah, Bundlecund, Cuttack, Balasore, Juggernauth, &c.

1803 Cessions from the Peshwa and

Guicowar in Gujerat.

1815 Conquests from Nepaul, consisting of the hill country between the Sutuleje and Jumna, and the districts of Gurwal and Kumaon

1815. The kingdom of Candy in Coy-

1816. Anjar, Mandavic, and other

places in Cutch.

1818 Poons and the whole of the Peshwa's dominions, Candeish, Saugur, and other places in Malwa, Ajmeer in Rajpootana; Sumbhulpoor, Sirgooja, Gurrah, Mundlah, and other cessions in Gundwana from the Nagpoor Raja,

1825 Canquests from the Burmese consisting of Assam Cacher, Munipoor, Arraem Martaban le Tayor, Tenosserim and the

Mergus Isles

In 1814 the existing political system of Hindostan consisted of stoles sub idiary, federative and Indepen deat ri

lat Those with whom the British government had forme I subsidirry alliances, such as the Airsm the Peshwa the Galcowor, the Rojas af Mysore Travancore Cochin and The con the Nobob of Oude ditinn of these subsidiary ollionces were that the British government should protect the notive state from external invosion and internal dissension but the troops assumed for this purpose were not to be employed in the civil administration or collectian of the revenue In return for the protection thus granted the British government received o compensation in money ar territory and the subsidizing state not only undertook ta maintain a cectain contingent in readmess to act with the subsidiary force but also ta abatsın from all political intercourse with the ather powers of India except in cancert with the paramaunt nuthority which undertook to arbitrate their disputed rights. In cases of exigence the entire resources of the protected state to be at the commend and under the di rection of the British government. 2d Certain small priocipalities,

scarcely deserving the nomes of substantive powers which enjoyed that British protection without ony sub adjary connection The principal members of this class were the Rajas of Burtpoor and Macherry with some petty chiefs in the neighbour hood of Delhi ond Agra the Bun deleund chiefs and the petty Scik chieftains on the froatiers towards the Sutuleje. The Rappoot chiefs of Jeypoor Joudneor Odeypoor, Biexoere and Jesselmere were out in The engagements for the protection of these principalities were nearly the same as those entered late with the greater states except that the British government soldem

exacted any consideration far its protection and was not baund to main tain any special force for that pur pose

"MI The third class consisted of orknawledged princes auch as Sin der Holear ond the Nagnoor raja with whan the British nation was of peace and had o permonent ambasadar (as mrangenent considered by nature politicans as the first step towards sulpugation) stotioned at their court

4th As a faurth elss may be mentioned the Independent pinces and cammunities who hot never been acknuwledged as substantive powers and towords whom the British government was not bound by ony connection wisister. The two classes last mentioned had niwoys shewn a great reluctance to form any induspolible allunness on terms that seemed calculated ta interfere with the un restrained lottude of political acting they had before enjoyed.

Since the data above-mentioned (1814) great political changes have taken place the Maharatta power having been irretrievably broken by the war of 1817 18 and the Nepaulese by that of 1815 The Peshwa as a potentate has been onaihilated and his possessions with the exception of Satara, locorporated with the British daminions the Nagpoor rajo reduced to a state of complete man nificance and Halear deprived of oil sovereignty south of the Nerbudda. The Sinilia family from circumstances for which they can claim no ment present no exhibition af desperate fortune but they are now insulated ond precluded from all extrançous ossistance, nat to mention the essential prostration their strength sustained by the destruction of the Pin dones In fact their existence now depends on the omeoble relations they maintain with the British government Oa tho ather hand several friendly states such as those af Bonadee Kotsh and Bopaul bava had their territories augmented and the five great states of Raincatana have been colmitted into the federa-

tive alliance

The following table (originally formed in 1820) is an attempt to present an abstract view of the relative area and population of the whole: but, from the imperfection of all East-Indian statistical documents, it must be regarded as a mere approximation

to the truth. Since the date aboveinentioned some territorial mutations of no great importance have taken place, but the estimate may nevertheless be considered as tolerably correct, and the number of inhabitants rather under than overrated.

Table of the relative Area and Population of the Modern States of Hindostan for A.D. 1820.

J0F A.D. 10≈0.		
	British Sq Miles	Population
Bengal, Bahar, and Benares	162,000 148,000	39,000,000 18,000,000
Gurwal, Kumaon, and the tract between the Sutuleje and Junia	18,000	500,000
Total under the Bengal Presidency Under the Madras Presidency	328,000 154,000	57,500,000 15,000,000
Under the Bombay Presidency	11,000	2,500,000
Territories in the Decean, &c. acquired since 1815, consisting of the Peshwa's dominions, &c. and since mostly attached to the Bombay Presidency	60,000	8,000,000
Total under the British Government	553,000	83,000,000
British Allies and Tributaries.		
The Nizain	96,000	10,000,000
The Nagpoor Raja	70,000	3,000,000
The King of Oude	20,000 18,000	3,000,000 2,000,000
The Guicowar Kotah, 6,500; Boondee, 2,500, Bopaul, 5,000	14,000	1,500,000
The Mysore Raja	27,000	3,000,000
The Satara Raja	14,000	1,500,000
Travancore, 6,000; Cochin, 2,000	8,000	1,000,000
Under the Rajas of Joudpoor, Jeypoor, Odeypoor, Bicancere, Jesselmere, and other Rajpoot chiefs, Holcar, Ameer Khan, the Row of Cutch, Bhurtpoor, Macherry, and numerous other petty chiefs, Ameers of Sinde, Seiks, Gonds, Bheels, Coolies, and Catties, all comprehended within the line of British protection.	283,000	15,000,000
Total British Government and its Allies	1,103,000	123,000,000
Independent States		
The Nepaul Raja	53,000	2,000,000
The Lahore Raja (Runjeet Singh)	50,000	3,000,000
The Ameers of Sinde The Dominions of Sindia	24,000	1,000,000
The Cabul Sovereign east of the Indus	40,000	4,000,000
1	10,000	1,000,000
Grand Total of Hindostan	1,280,000	134,000,000

population but the particulars have never been ascertained

In 1805, according to official returos transmitted the total oumber of British born publects in Hindostan wor 31 000 Of these 22,000 were in the army as officers and privates the end officers of government of all descriptions were about 2 000 the free merchants and marmers who resided in India onder covenant, about 5 000; the officers and prac titioners in the courts of justice 300 the remaining 1,700 consisted of ad renturers who had smuggled themselves out in various capacities. Since the date above-mentioned no detail ed reports have been published, but there is reason to believe that even now (1828) the total number of British nubicets in Hindostan does not exceed 40,000 the removal of the rentrictions on the commercial inter course hoving, contrary to expecta tion, added very few to the previous number

Compared with the West Indies and other tropical regions. Hodoston may be considered overy healthy country being little afficied with minny distempers that ore destruervo in other countries. Indeed one of the most unkning features of the me diral history of India is, that it does not tolerate ony infectious fever, typhus, yellow Fever, and the plaguo being equally unknown east of the Judius Cancer is nearly unknown within the trapics and phthisis pul monsias in not common. Scrophila saree, although instancemeeur from saree, although instancemeeur from

2 1

particular causes, and the formation of the stone in the bladder is but very seldom experienced Although the climate does not prevent attacks of the gout, yet they are certainly less common and severe than in cold countries, and quite unknown to the abstemious natives Acute rheumatism is rare between the tropics, and the chronic kind is more easily cured than in Europe Within the last fifteen years a new and very fatal disease has visited at different times Hindostan, and swept off great numbers of the natives; but its virulence has latterly very much abated, as it originally commenced, without any assignable cause, either from improvement of climate, diet, habits, or mode of treatment

The army required for the protection of these extensive provinces, and for the retaining them under due subordination, although it presents a formidable grand total, probably does ' not amount to the fifth of the number maintained by the Mogul sovereigns and then functionalies, when that empire was in its zenith, yet, even under the ablest of the emperous, commotions in some quarter of their ill-subdued territories were unceas-The British system in India has always been to keep the troops in a constant state of preparation for war, but never to enter into unprovoked hostilities, or engage in any contests, except those rendered neces-At picsent, with the exception of the Russian, the British military force is probably the largest standing army in the world. In 1796 it amounted to 55,000, in October 1826 it exceeded 300,000 men, viz

Artillery . . . . . . 15,782 Native cavalry..... 26,094 Infantry . . . . . . 234,412 Engincers ...... 4,575

280,863 King's troops ..... 21,934

Grand total.. ...302,797 men. Of these the irregulars of all descriptions amounted to 82,937 men

This formidable army is distributed throughout Hindostan under the orders of the supreme government, promulgated through its political agents. Commencing from the great stations in the Doab of the Ganges, at Ajmeer is one coips, another at Neemutch; a third at Mow; all supplied from the Bengal army. These are succeeded by the Gujerat subsidiary forces, the field corps at Mulligaum, and the Poona division, furnished chiefly by the Bombay army The circle is further continued by the field force in the southern Maharatta country; the Hyderabad and Nagpoor subsidiaries, composed of Madras troops; and the detachments from the Bengal establishment forming the Nerbudda and Saugur divisions, from whence the cordon terminates in Bundelcund. Such is the general outline, hable, of course, to temporary modifications, and occasional change in the selection of stations. At present, with the exception of a tract thirty-five miles broad on each side of Aseerghur, there is an unbroken line of communication through the British territory from Bombay to Calcutta. The statement of the revenue and aggregate debt of the three presidencies will be found under the article "Brngal"

For many years after the com-mencement of the Bruish empire in India, the unavoidable necessity of extending its conquests was one of sary by the principle of self-defence. - the great disadvantages attached to dominion, for the wider they spread, the more assailable did they In more recent times a process exactly the reverse has been taking place, and the augmentation of territory, by approaching the natural barriers of Hindostan in place of extending the defensive line of frontier, has actually diminished it. Between Calcutta and the Indus there is now no hostile boundary, nothing but states bound together by a sense of common interest, or a comparatively small proportion of ill-disposed population, icndered incapable of rearing a hostile standard. But the multiplication of the points of defence is urged, the

decreased means of annoyance ought also to be taken into consideration and its new altostion has not brought the Bettle government into cootact with any state that has the power to give much troul le All within the fodus is consolidated under one coo federation, of wilch the British fovernment is the head while the indus and its desert present a justier against common means of aggres ion; against minist invasions in the course of ages no state whatever can be wholly se-To recede is often more liagardous than to advance; and no ar gument can be necessary to demon strate how vain would be the expectation of augmenting our security by diminishing our power and airen daoor One certain benefit has al ready remited to the Bertich dominions from the new order of things which is immunuty from the ravages of a handitti generated and organized within the limits of Hindustan, a minet the recurrence of which it could never he secure while un a plum remained where the depredators could mutter and refresh Henceforward therefore If dargers arise to Hindostan ther will be interest and greatly attributable to the negligence of the local covernments.

In direct and authoritative control the dominion of the British gavern ment eaten to much farther than that poste ted I y any prior dynasty when ther Latan or Moguli jet the latter so line or they a numed from persecution, had nothing to apprehend from the religion of the Hindoos and history proves that the commotions which antated the Mahomedan monarchies chiefly store from their one internal dissentions and national de putes Seither does it appear that any prior conquerors ever cinplosed disciplined corps of their own coun termen in defence of their own sovereignty although they had to con tend with one very numerous tribe the Hindee while the Hattih, more advanta cousir situated hato two to put in motion ogninet each other, and in process of time may raise up o tiurd. Each foreign invoder certainly

favoured his own countrymen but it was he heatowing on them places an high appointments which excite enry without executally atrengther ing his domination. Besules there fore, total abstraces from persecution the Buttin government, to powerful corps entitely Furnpear and totally distinguished from the natives by colour, language, and manners poweres a solidity and cor at tense much beyond any of the provisioned an dynattice.

In the constitution of the peculis esecumstances of its astuation th character of its dominion and th habits of the people with whom it associated either as to its domest or external relations—this govern ment le not a pure despotism be one of law and responsibility, undi numerous and salutary rhecks Th administrators of that governmen eacreme a driegated power; they at accountable agents amenable to th law of Ln land the Court of Dure tors the Court of Proprietors the Commi sioners for Indian Affairs th two bouses of Parliament the crown and the Briti h public. They recor regularly fasticulty and moutely a their transactions, with a scrupulout of exactness unprecedented in an other country as well as their specia reasons for every measure, legal pol-tical or financial At present the legaistivo enactment most wanted is on to check I propess oueddling and at novation and a heavy responsibility will test with thoso who subvert t without clear and satisfactory ground for presuming that a more perfec system of administration will be sul stitu ed The dominion exercised by the

British nation in Hindorian notwith standing certain imperfection, has on the shoet most impounded by the incefficial to the great may of the native oppulation although the peculiar elecumstances in which it is placed precludes the higher classe placed precludes the higher classe from any participation in the superior functions in the state. Indiced the natives of Indian occustomed either to absolute command or implicit obe

dience, have not been practically found to make a beneficial use of delegated authority. Strictly speaking, however, those whom the British have superseded were themselves strangers, and attention to dates will shew by how very short a tenure most of their possessions were held. The strength of the existing government has had the effect of securing its subjects, as well from foreign depredation as from internal commotion, advantages rarely experienced by the subjects of Asiatic states, which, combined with a domestic administration more just in its principles, and executed with far greater integrity than the native one which preceded it, sufficiently account for the improvements that have taken

On the other hand, were the territories so unexpectedly acquired to be restored to the natives, we should only transfer them from a state of the profoundest peace to sanguinary distractions, to profligate adventurers, and, most probably, to some rival European power We cannot now, therefore, from a principle of justice and mercy, renounce the many millions we have so long and so effectually protected; and, with all our superior advantages, there is no reason to apprehend that the duration of the British empire shall not, at the least, equal that of the Moguls fact, if India be hereafter lost to Britain, it will be owing to circumstances wholly extraneous to the system of government hitherto pursued, or to some dereliction from the energy of that system. Time is certainly wanting for the present generation to forget their past habits, and to acquire information on practical points, in which they are most deficient; for, owing to the long-subsisted anarchy in Hindostan, all the relations of the community had become confused. On the British government will devolve the task of inculcating the principles of mild and equitable rule. distinct notions of social observances, and a just sense of moral obligations, the progressive result of which must

inevitably be the adoption of a purer and more sublime system of religion.

—(Colebrooke, Sir William Jones, F. Buchanan, Sir Henry Strachey, Prinsep, the Marquis of Hastings, Erskine, C. Grant, Tucker, Rennell, 5th Report, Public MS. Documents, &c)

## HINDOSTAN, NORTHERN.

This alpine country commences on the west of the Sutuleje river, about the seventy-seventh degree of east longitude, from whence it stretches in the form of a waving parallelogram, slanting to the south until it reaches the Teesta river, in lon. 88° 30′ E., beyond which, among the mountains, the Buddhist Lama doctrines prevail. In length it may be estimated at 600 miles, by eighty-five the average breadth.

Within the above limits. Northern Hindostan may be considered as separated from Tibet, or Southern Tartary, by the Himalaya mountains; and on the south from the Mogul provinces of Upper Hindostan by the line where the lower ranges of hills press on the vast Gangetic plain; but a belt of flat country about twenty miles in width having always been left in possession of the hill chiefs, it will also be described along with the hilly portion of their dominions principal modern territorial and political subdivisions which the above geographic space at present exhibits, are noticed below, and under each head respectively further particulars will be found, but the attention of the reader is more especially directed to the general description of the Nepaulese dominions, as being in reality applicable to the whole of Northern Hindostan, of which they still occupy two-thirds, and before the war of 1815 occupied almost the whole

- 1. Country between the Sutuleje and Jumna.
- 2 Gurwal or Serinagur.
- 3. The sources of the Ganges.
- 4. Kumaon
- 5. Paikandi,
- 6. Bhutant,

7 The Nepsolese dominions 8 The Sikkim Raja a territories

The inhabitants of this hilly region, both before and after their conversion to the Braholnical tenets, maiotained but little intercourse with their south ern neighbours and are probably the only Hindro people who have never been disturbed, far less subdued, by any Viahomedan conqueror Towards the conclusion of the eighteentle, and in the commencement of the ulneteenth century, they fell wholly under the yoko of the Gorkhon who observing the most jealous system of exclusion until times quite recent their interior condition remained a mere matter of conjecture; but war, the great promoter of discoveries in geography, having removed the veil we are oow nearly as well acquointed with their local execumstances, as with those of many old provinces long powersed. In 1827 Capt Her bert estimated the superficial extent of the mountainous country now comprised withle the limits of Bri tish lodio at about 23 000 square miles.

HIXOLAISOHUB. A fortress in the provioce of Malwa ninety miles north from Oojem lat 24 29 N. ion 75 48 E. The ridge of mountains that bound Malwa to the north extends in a direction nearly north and sooth to this place forms an angle here, and diverges to the westward This fortresa is aurrounded by a deep natural ravine 250 feet in length and 200 in breadth the aldes perpendicular, on the linner of which the walls of the fort are built There are three made causeways leading to the gates. Hinglaughor has been in possession of the Holcar family sioce the middle of the 18th century, and by the notives is considered one of the strongest castles in their domioions yet it was carried by assault in 1804 with little loss by a detach ment noder Colonel Monsoo during the compaign against Jeswunt Row Holear

HINOUNONAUT.—A large trading town in the province of Gundwans.

forty fire miles S W from Nagpoor; lat 20° 37° N, ion 78° 54 E

Hinaroga.—A town in the province of Allahabd forty-seven miles S by W from Allahabd, lat. 24°20' N Ion 70°22' E.

Histat. — A populous village in the Balagiant ceded district of Bellars, with a small fart well-built in the modern style and protected by n dicth ond glassa distant about twelve miles south west from the town of Bellars — (Fellarton 4c)

listan.-A town in the province of Delhi the ancient capital of the country now known by the name of Hurrianna int 28°57 N, ion 75°24 E., 105 miles W. W from the city of Delhi. The remains of this place cover a great extent, but are nuw so utterly ruinous as to preclude the possibility of occertaining its original imits In 1806 it contained only 300 men besides a garrison of 200 soldiers, which was soon afterwards withdrawn The palace of Sultan Ferore stands in what was the cen tre of the city and has very exten sire subterrancan apartments to the palace is an iron rillar rather less than that at Joobut near Delhi called Feroze Shah's loth ore also several large tank wells and vestiges of the Chitting nullah, or water course conducting the waters of the Jumna ore still visible. (Lient li hite Ge)

Illera (or Lolbadya).—Ao un known region adjacent to kunon in China mid to be situated between 07° and 98° E., ood conjectured to be the Borkhampti country

Howamornis—A pennaula Joun-ed to the should of Geram by o nar row isthmus celled the pan of Tanoeno which was not only productive of clova trees but yielded also large quantities of nutnegs of these last what was called the great nutners forest was destroyed by the Dutch in 1607 Great quantities of aggo are obso produced here which the Dutch monopolize

Hee Istz .- A small island to the

Eastern seas, about twenty miles in circumference, lying off the north-eastern extremity of Java; lat. 7° 5′ S., lon. 114° 55′ E.

Hog Isle —A long narrow island lying off the west coast of Sumatra, between the second and third degrees of north latitude, and about forty miles in length, by three the average breadth

-Hog Islf — A small islet thus named, in the province of Aurungabad, harbour of Bombay.

Holcar.—See Indore.

HOOBLY (Havil) -A town in the province of Bejapoor, thu teen miles SE. from Darwai, lat 15° 20' N., lon 75° 15' E. This has for many years been a place of great trade, and in 1820 was estimated to contain 15,000 inhabitants. rounding country is well wooded and watered, and an extensive traffic inland and with the sea-coast is carried The bankers are numerous and rich, and extend their commercial intercourse by means of agents as far north as Surat, eastward to Hyderabad, and southward to Seringapatam. There are no public or private buildings of any note; and although there are two forts, neither are capable of opposing any resistance to an army. Near to Hoobly, and to many other towns in this part of India, the ruins of mosques and Mahomedan buryinggrounds prove that there were formerly a great many inhabitants of that religion, but they are now so reduced in number that in twenty towns and villages there is scarely one to be found, and where there are a few, they are found subsisting on alms, in a miserable state of pride, poverty, and contempt. In 1673 this place was attacked by the Maharatta chief Sevajee, at which time the English factory here was plundered, and sustained a loss of 8,000 pagodas, in 1685 it was taken by Sultan Mauzum, Aurungzebe's son.

In 1804 Hoobly was in possession of the Furkish Maharatta family, at which time, when General Wellesley

was marching south after his campaign against Sındia, ıt was besieged by the Susoubah, or deputy of the Peshwa. The garrison in the fort, on hearing of the general's airival in their neighbourhood, requested his interference, and sent him a letter addressed to the deputy by the Peshwa, directing him to give old Hoobly and its dependencies to Bapoo Furkiah, his highness's biother-in-law, and the very person for whom the garrison already held it. other hand, the deputy produced the Peshwa's order, commanding him to besiege and take the place from Furkiah by force, and before this mudwalled village he had been detained six weeks In this dilemma, General Wellesley recommended a suspension of hostilities to both parties, until the Peshwa's real intentions with respect to the destination of the place were ascertained; which sound advice was acquiesced in -(MSS, Moore, Orme, &c.)

HOOGHLA (Hugh) —A district in the province of Bengal, situated between the twenty-second and twentythird degrees of north latitude. is comparatively of recent creation, being composed of sections from Burdwan, Midnapoor, and other adjacent districts of greater antiquity. To the north it is bounded by Burdwan and Kishenagur, on the south it has the sea; on the east Jessone and the Sunderbunds; and on the west Midnapoor. The whole of this territory consists of low, flat land, very fertile, but much covered with jungle on the sea-coast, where it is remarkably unhealthy. Like the other southern jurisdictions, it has an excellent inland navigation, being intersected in every direction by rivers and their branches, which were formerly rendered almost impassable by the number of dacoits and river pirates. On the banks of the rivers near the sea, salt of an excellent quality is manufactured on government account, which, in the opinion of the natives, possesses peculiar sanctity, as being extracted from the

mud of the most eater I branch of the Ganger. The provision and cultivation of this direct are certurity improving and among a finitetial religiously. In a finite-term constructed on the backs of their erabut nowable hands, in prosects to Cacutts, which presents a contact backet for the sight of posture it is surject for a large a presenting of its surface at a terminal in a cite of better the avilant of their all gatore and a great serting of inverts across and register extrapt and result is unevaluated.

The Dutch is 1023 and the I ngh h in 1610 vertexperitited to book factories at the place but thele track was greath restorted and offect to continual exaction. In 1622, the first serious quarrel that occurre I between the Mornia and I intopeans happened at Hoophie which then belinged to the Lottinguese. The Mogula in sested it with a strong army, and the slege continued three months and a half sloring which thus the Portuguese made many slifers of subn if the first of subn incre made many slifers of subn incre many slifers

sion, and agreed to pay a tribute; but all were rejected by the besiegers, who having sprung a mine, carried the place by assault. The slaughter of the Portuguese was very great; many, in attempting to escape to then boats, were drowned, a few reached their ships in safety, but these also were immediately attacked. The captain of the largest ship, on board of which were embarked 2,000 men, women, and children, with all their wealth, rather than yield to the Mahomedans, blew up his ship, and many others imitated this example. Out of sixty-four large ships, fiftyseven grabs, and 200 sloops, which were anchored opposite to the town, only one grab and two sloops got away; and these owed their safety to the bridge of boats, constructed by the Moguls below Hooghly, at Seerpoor, having been broken by catching the flames from the conflagration of the fleet.

In 1686 the English were involved in hostilities by the imprudence of three of their soldiers, who, quai relling in the bazar with some of the nabob's peons, were wounded. The garrison of the English factory were called out, and an action ensued, in which the nabob's troops were defeated, sixty of them being killed, and a considerable number of them wounded, and a battery of eleven guns spiked and destroyed. At the same time the town of Hooghly was cannonaded by the fleet under Captain Nicholson, and five hundred houses burned. This was the first action fought in Bengal by the English: but the result was a disgraceful peace, the Mogul government then subsisting in full vigour. An arrangement was afterwards made with the foundar, or military superintendent of the district, but the agent and council, considering that Hooghly was an open town, retired on the 20th December of that year to Chuttanuttee, or Calcutta.—(Bruce, Stewart, Rennell, &c.)

Hooghly River.—A river in Bengal, which communicates its name to the preceding town and district. It

is formed by the junction of the Cossimbazar and Jellinghy, the two westeinmost branches of the Ganges, after which it flows past Calcutta, and is the only branch of the Ganges navigated by large vessels, although the entrance is dangerous, and the channel up to the town intricate and fluctuating. When joined by the Roopnarram, a very expanded sheet of water is formed; but it has many shoals, and as it directly faces the approach from the sea, while the Hooghly turns to the right, it occasions the loss of many vessels, which are swept up the Roopnarrain by the force of the tide. The eddy caused by this bend of the Hooghly has formed a most dangerous sand, named the James and Mary, around which the channel is never the same for a week together, requiring frequent surveys,

The bore, or sudden influx of the tide, commences at Hooghly point, where the river first contracts its width, and is perceptible above Hoogh-So quick is its motion, that ly town it hardly employs four hours in travelling from the one to the other, although the distance is nearly seventy miles. It does not run on the Calcutta side, but along the opposite bank, from whence it crosses at Chitpoor, about four miles above Fort William, and proceeds with great violence past Barnagore, Duckinsore, On its approach boats must immediately quit the shore, and seek for safety in deep water in the middle of the river, which is little affected. At Calcutta it sometimes has an instantaneous rise of five feet.

Only that portion of the Ganges that hes in the most direct line from Gangoutri in the Himalaya to Sagor Island is considered holy by the Brahminical Hindoos, and named the Ganga, or Bhagnathi; the Hooghly river, therefore, of European geographers, is revered by them as the true Ganges—(Rennell, Lord Valentia, Colonel Colebrooke, &c.)

HOOKERY—A town in the province of Bejapoor, fifty-five miles S.S.W. from Mertich; lat 16° 15° N., ion. 74° 47° L. This is now a poor tunn but still exhibits vertices of a once flours hing condition, when it was subject to a bladomedan sovereign. The last of the Viogal chiefs was Abdul hhard who was dethroned by the then Itaja of Parnella, and ded in A.D. 1643. As unsoccassful attempt was made to resolute a surviving son since which the Viahomedans have continued to decline and live now in great poverty—(Ver 4c)

Hoolioososooo - A small hill fort to the Mysore territories thirty fire miles & P., from Fermenpatam. This fortrees covers a little isolated conical granute rock of a very singular appearance exceedingly precipt near the top being carried through the body of the rock from whence the aid of a ladder is requisite to reach the enclosed smooth can on the aummit Small as are the dimensions of this droop it exhibits four or fire distinct teers of fortifications. The commandant a house and a small temple are comprehended within the wally at the foot of the rock pettah is of very small extent and contains only a few strag ling habitanoon-(Fullarion de)

HOOLY Owner -A town in the hiysore Ilaja a territories 120 miles N II from Seringapatam ; lat. 14° N., ion 75° 48 E. The fort here Is of a square form, with towers at the angles, and two on each face, but It is not a strong place The pettah is extensive and tolerably well built, and enclosed by a bad wall and ditch During the rains the western wall of the fort is washed by the Budra river Io 1702 Ilooly Onore was taken by a detachment under Captain I ittle and completely sacked and destroyed by the Alsharattas who got all the plunder although they jud none of the fighting Prior to the Maharatta invasion the adjacent country was remarkably well peopled and culti rated Ao officer of that ranacious natioo, describing it, sald it was so

thickly acttied, that every evening when the Maharatta army encamped they coold count ten villages in themes the work of the previous day — (Moor de)

HOUMARAN - A town in the province of Beeder, twenty-three miles west from the city of Beeder; ist. 17° 40' N., lon 77° 14 L.

Honeper.—A small town in the province of Value pergunnsh of lundersor, situated on the banks of the Toomber river

lienwooden .- A pergunnah in the province of Bejapoor situated on the south bank of the hruhna rivee. which for about tweive miles from the Kapen Sungum (or junction) forma its northern boundary The Moodgul territory belanging to the Niram, bounds it on the east for about eigh teen miles and no the south are several independent descrephor. The erea of the whole pergunnah may be estimated at 676 square miles Full three fourths of this space including all its central northern, and castern merts are icicl, or pently so is little wood except the overgrown buth jungle of the waste arable land. none of the hills yielding any useful timber; Indeed, many of them are quite bare A bisch alluvial soil apparently of considerable fertility occupies the whole of the northern and castern and much of the central portions, every where of an adequate

depth. licongoond is comprehended in the ancient Carnatle and Canareso is the universal language. It contains 105 inhabited places reported to possess 6,719 houses, and 31,079 persons or farty-nine to the square mile The follest population is found in the agricultural towns of licon goond, Kandgul, and heloor, witch altogether contain about 5 467 per The largest manufacturing town named Ikul contajor only 2,570, and Ameerghur 1,809 persoos The two most intelligent tribes are the Lingawuot, or lay Jungum, and the Dhungur, and amount to about half of the whole: the remainder consists of a great variety of Hindoo tribes, and a few Mahomedans. The system of katkaee, or indiscriminate pillage, broke out here prior to 1790, and subsisted up to the very day of the British conquest in 1818—the famine of that year also loosened the bonds of society, set every man against his neighbour, and consummated its rum. The instantaneous transition from this state of anarchy to one of entire subordination and tranquility on the establishment of the British government, appeared almost miraculous; and so early as 1821 there was nothing to indicate that they had not been a civilized, orderly, and moral people for a century preceding.—(Marshall, S. Thackeray, &c)

Hooshearpoor —A small town in the province of Lahore, forty-five miles north from Luddeeanna, lat. 31° 35′N, lon. 75° 52′E.

Hoseepoon —A town in the province of Bahar, district of Sarun, eighty-two miles NW from Patna, lat. 26° 25′ N, lon. 84° 17′ E.

Hosso Durga.—A small town in the Malabar province, forty-one miles S. by E. from Mangalore; lat. 12° 10′ N, lon. 75° 10′ E. This place is inhabited by a few Puttah Brahmins who serve a temple, and whose ancestors were put there by the Ikery Raja, who built the fort.

Hossobetta.—A small town on the sea-coast of the Canara province, fourteen miles S. by E. from Mangalore; lat. 12° 42′ N., lon. 75° E Near to this is a large straggling town named Manjeswara, containing many good houses, chicfly inhabited by Moplays, Buntars, and Biluars. The principal inhabitants of Hossobetta and of many other towns are Concanies, or people descended from natives of the Concan. It is reported they fled hither to escape a persecution at Govay (Goa), their native country, an order to convert them having arrived from Portugal. The rich immediately removed, and the poor who were left behind were converted to what was then called Christianity. —(F. Buchanan, &c)

Howeraghaut (the pergunnah of).
—See Bijnee

HUDEAH.—A town in the Delhi province, fifty miles S.W. from Luddeeanna, respecting the condition of which quarter, scarcely any thing is known. Lat. 30° 11′ N., lon. 75° 36′ E.

Hudsoo River.—A wide and remarkable river of the Deccan, which is supposed to have its source in the elevated table-land of Mynpat, in the province of Gundwana, not far from the spot from whence issue the Mahanuddy and Sone rivers.

Hue (or Huefo).—A town in the empire of Cochin China, of which, in 1820, it was the capital, having been the royal residence for nearly twenty years, lat. 16° 19' N, lon. 107° 12' E. It stands about ten miles up a barred river, but broad river of the same name, accessible to large vessels at high water only, and suirounded by a double ditch, said to be five miles in circumference. fortified after the European manner, by walls built of brick, united by a eement in which white sugar is said to be a principal ingredient. The fortress is of a square form, and armed with many cannon of different calibres from the king's arsenal, which is usually said to contain 2,000 pieces A strong fleet of gallics is usually stationed here, and others are annually constructed in the buildingyards, some after the European plan, and others a mixture of all models The population in 1822 was estimated ut about 30,000.—(Lieut. White, Ci awfurd's Mission, &c.)

Hughly (district, town, and river) — See Hooghly.

HULLIHALL (or Hullial). — A town in the province of Canara, twenty miles S.W. from Darwar, lat 15° 21' N, lon. 74° 50' E. In 1801, the Madras government, at the recommendation of Colonel Arthur

Welfeder wade this the brad-quarters for the troop in the Roomla of treet and authorized with expe as to be made on the week at Hulphull as appeared never any to p accut in a state of seconty.—(The Bake of Het opto 4)

Herven —A town in the Government is the readen expended the Juste Represent, thirty-three views F in S from Mel's, lat. 22 51 %, lon 71 16 lm.

Here Ista.—An Ideal in the Eastern rens, about fly are nine or number or a useful at it emissre of the great lay on the north era to fly an or Yes Gunray lat 2 37 Ng. lon, 1% 70 in.

Hereau (He at ) and town in the process of and in program's of Hugeanes, which in 18 To be homed to Drudet Hose S rade, it a and about the tiern whe 48 M from Hera and about the tiern whe 48 M from Hera and leading to Hispaul Hoser stared Supress, Charest and Hudan, 4 Validade 49.

lleanant tay—A fortified town in the My sore itays a territories, ditant about forty-one males B, by 1 from the city of Mysser Though not of great enter this is a populous and cheerful place and contains a time temple deducted to bita—(J'M larten 4e)

licanwan (Hendwer, the gate of Hari or is inv.)—A your and colibrated place of Illadoo pligtinage to the protince of Ilelia, district of Saharunpoor 110 miles % I from the cuts of Belhi Ias 27 67 N. Jon 78 10 k., and 30 % feet above the level of the sea Ilundwar, or Ilaridwar, is also maned Gange dwars (dwars messing a door gate to passege). In the beands and other Pa

rins it is written Hallwar, which reaks a d ferent etymology from Hally in they, not from Hara (bira

er Mahaderak If t place i estantel at the lane of a steep progress an the conthern serve of a serall cultivate I shat of fand recisioned from the great forest, which altrest tenebre the western entremity of the town heat pagedas and sparants ed free of a prefrested by plans todailasts for the accommodation of printing, with their fights of stem leade, to the meer, weer ad and with turicts of pare has esters covered over with fantestic Hindon paretiem all in some way sew decked an I decorated. esince the est tence of a fourthing hierarchy; while the ascred Canres there a brantral and forms atteam), to fire down in raid is through a rain lounded on three a tea by lofty property to complete to benefitte a potte lind ence. The hole billing set is at the luse of the finker Parre where the courtain renjects towards the enter, and there is sport for only four provint to pain after t which not fined opper for the pas age of an impresentational pers some I the deradful traceds of 141 t On that excessor to as necessary of a desiretute ruth made by the infatuated pilgrims to gain preveilency in both theth smoon whom were several lishich servis place I as guards to rerent this very sata trophe fut who were borne away by the multitude and fost their lives while endea rouring to execute their duty river in front of Hundwar abounds with tame fit, which salm in shouls to the ghants to be fed posite to the town is the sacred well of Chandel Heal where there le an officiating priretess but the trisool or trident of Mahadeta, which formerly erouned the summit, was overthrown in a storm some years are and has not been replaced. The Brahminical town of honkul, on the river about two miles below may be conclicted an appendage, if not a rivel to Hurdwar

Besides religious motives, great numbers resort hither for commercial purposes, Delhi, Lucknow, and other important towns being supplied from hence with the productions of the northern and western countries. The merchants usually travel in large caravans, and the cattle brought for sale are used also for the conveyance of the merchandize. At the two annual fairs it is supposed that from 200,000 to 300,000 persons are collected; once in twelve years, when particular ceremonies are performed, the number has been computed at a million, and in April 1819, but probably exaggerated, at two millions. The most conspicuous persons are the fakeers, or religious mendicants, of whom there are several sects; but the principal are the Gossains or Sanyassies, the Bairaggies, the Jogies, and the Udassies, which four classes are again subdivided, and branched out to a great variety. The most numerous are the Gossains, who during the Maharatta sway were sufficiently powerful to usurp a temporary superiority, and not only collected duties on their own account, but regulated the police of the fair.

The next powerful class are the Bairaggies; but, from the year 1760 until the Company obtained possession of the Doab this tribe was debarred from the pilgrimage; and, although the sway of the Gossains be over, they still occupy the best stations at the fair. Many of these profess a total disregard for worldly concerns, and appear in a complete state of nature, but among them are many men of considerable property, who assume only the semblance of the devotee, being in other respects well provided with the comforts and conveniences of life Some of them follow the military profession, but the greater part are engaged in agricultural and commercial pursuits.

The Gossains, the (Sanyassies, of the west of India,) are the worshippers of Siva or Mahadeva, and have taken vows of celibacy, and are distinguished by a wrapper of cloth dyed with red ochre. Those of Ben-

gal are worshippers of Vishnu, and The term is a corruption married of Goswami, lord of the bull, and ought, consequently, to have reference to Siva. The Bairaggies are religious mendicants, who, as their name implies, are supposed to be exempted from human passions. They are disciples of Vishnu, and are distinguished by two stripes of yellow ochre, or sandal, on the forehead, and a string of tulasi beads round the neck. The Udassies are followers of Nanok Shah, the founder of the Seik sect, and are known by a conical cap with a finge

The Jogies are votaries of Siva, and have a longitudinal slit in the cartilage of the ear. Another custom prevails among the Gossains and Jogies which is uncommon among other Hindoos, that of burying their dead. All these sects engage in husbandry and commerce, but the profession of arms is peculial to the Gossains or Sanyassies. Some of them never shave, but allow the hair of their head to grow to an extraordinary length, binding it round their forehead in small tresses like a turban

At the foot of the pass into the mountains above Hurdwar, there was formerly a post belonging to the Gorkhas, to which slaves were brought down from the hills and exposed for sale Many hundred poor wretches of both sexes, from three to thirty years of age, were formerly imported from all parts of the interior of the hills, and sold at prices from ten to 150 rupees The average price of camels from Lahore was seventy-five rupees, and common horses from 250 to 300 rupees, which fair still continues. The merchants never mention viva voce the price of their cattle, but having thrown a cloth over their hands, they conduct their bargain by touching the joints of their different fingers, to prevent the bystanders from gaining any information.

No particular ceremony is used in bathing, which consists merely of simple immersion. The depth at the proper season is only four feet and both sexes nlunge in Indiscriminately Those who are rich and rigidly plous are introduced by o couple of Brah mins who having dipped the penitent In the holy stream reconduct him to the shore The period of oblution is that of the suns entering Aries which, according to Hindoo calcula tion, happens twenty days later than Lvery twelfth the vernal equinox year when Jupiter is in Aquarius ot the time of the sun s entering Aries the concourse of pilgrims is greatly augmented Owing to the precautions taken by the British government the fairs at Hurdwar have for many years past ended without ldoodshed to the astonishment of the vast multitude assembled who were formerly accustomed to assocrate the idea of fighting and murder with that of the pilgrimage to liurd

This commercial residency has for some years past been incorporated with that of Comercelly

HUBBIANNA .-- A inrge division of the Delhi province situated princi pally between the 28th and 29th degrees of north latitude To the north ond the domains of numerous Seik chieftsins on the south by the She-Lawutty country, the pergunnah of Narnoul and the assigned territories to the east it has the Seik chiefs ond the assigned territories and on the west the Bhatty and Bleanere countries and tho sandy desert of Af Although sunated on the verge of the desert it is eclebrated for its verdure (probably by compa rison), from which the name is derived. Hurya, in Himlostany signifying green While Acher reigned this district was comprehended in the circur of Illeant Firozeh and from the num

ber of large and populous towns it then contained, must have been in a very superior state of police and cultivation to what it exhibited when it flist came under the British domination. It is also occasionally named, but it does not appear why, the Lesser Baloochistan.

The country known by the distinctive name of Hurrianna includes the pergunnalis of Hansi, Hissar, Mohim, Tosliam, Barwallah, Bliehul, Beeree, Rotuk, Agroha, and Jemaulpoor, and, excepting the northern and eastern part of the last-mentioned division, is an extensive plain, free from jungle, and remarkable for the depth to be penetrated before water can be reached, and the further west the more the difficulty increases. The depth of the water from the surface at Rotuk is seventy feet; Mudecna 100; Mohim 90, Mundahil 109; Hansi 120; and at Hissar 136 A large proportion of the villages have small shallow lakes, containing water sufficient for the inhabitants and cattle throughout the year, but the cultivation is entirely -dependent on the monsoon, there being at present no artificial means of irrigation, and the wells too deep to supply the requisite quantity. Sultan Feroze brought the waters of the Jumna to Hissar by a canal, which while it subsisted fertilized the country, but it has been long choked up and almost effaced.

The chief towns of Hurrianna are Hansi, and Hissar, venerable for their 'antiquity, Rotuk and Bhowany, but it contains also a number of large villages, where herds of cattle are pastured, and in the vicinity of which lions are said to be sometimes disco-Rotuk is one of the best cultivated and least turbulent of the pergunnalis, and is said to have yielded M. Perron eight lacks of rupees, although he never established any regular authority over the country. The assessment of Hurrianna prior to the British conquest is said to have been 7,14,508 rupees. The eastern quarter is inhabited mostly by Jauts, and the western by Rungurs, which is an appellation given to such of the Jaut tribes as have embraced the Arabian prophet's religion. Both tibes are ferocious and uncivilized, and before the pressure of Biitish coercion were in a state of unceasing hostility, town with town, village with village.

During the flourishing period of Mogul history this district was of great value and unportance, and usually considered as a personal appendage of the heir apparent to the throne; but after the dissolution of that empire it had never in fact been subjected to any regular government, and although nominally forming part of Sindia's former dominions, and transferred to the British by the treaty of Surjee Anjengaun, the authority of either had never been substantially established. The solicitude of the supreme government to dispose of a large portion of its territorial acquisitions west of the Jumna, in a manner consistent with the security of that frontier, afforded an opportunity of combining with the accomplishment of that object a remuneration for the higher class of chieftains, who had distinguished themselves in the British cause Hurrianna was in consequence accepted and abandoned in whole or in part as jaghire, by the Nabob Bhumboo Khan, by Ahmed Khan Buksh, by the Seik chieftains, Bhangh Singh, and Bhye Laul Singh, and by Abul Summud Khan, an enunent The difficulties which so many chiefs found insurmountable, arose from the martial and refiactory spirit of its inhabitants, and from the predatory habits of its barbarous neighbours the Bhatties.

Abul Summud Khan having spontaneously relinquished his claims to this country, was reimbursed for the expense he had fruitlessly incurred in attempting its subjugation; and in 1809 the Bengal government resumed the district, and proceeded to introduce the British authority, with the caution and moderation adapted to the exigence and semi-barbarous state

of its population.

The province of Hurrisons had during a series of years been a prey to successive invaders and a scene of Incessant rapine and confu ion, and without the elightest sestige of a regular government. Its inhalutants from neces its had become warlike and ferocious noused to control and earths and this betweenpany client tages of a last and regular adminitration The policy of every power which had yet atten pred Its conquest had been invariably directed to brat down by main force eather than at tempt to conclute their attachment, treating them always rather as natural enemies than as sulvected their dispositions consequently became hostile to every power that attempted to enforce subordination esteeting homized evil from all I sperience however has repeatedly shewn that this futious and turbu'ent at lest gradually seelds to a mildandconcillatory conduct, which introduces merely such restraints as are indispen also to the general good and is exerted in confirming and supporting Individual novel species of government are not at first obvious to them act it imper ceptibly operates a relutin, when combined with a focal power of corr cion capable of reducing to abedi ence those whom it may be found Impracticable to conclute or con

vince Lpon these principles it was determined in regulate the measures adopted for the ecttlement of the country and to render the existing aumils gemindars and farmers in atruments for the establishment of tranquility; to consider them as par ties with the government and not onposed to it and as interested in auppressing rather than exciting disor ders. The Harrianna has in consequence ever since enjoyed a trao quillity unknown for centuries al though in 1812 it suffered greatly by a severe drought and subsequent scarcity, approaching nearly to o famine, which caused o considerable diminution of the revenue Under these unfavourable circumstances, a

provisional settlement was to for the district with the except futchabad for there years re-

vince of Gujerat, principality of Banswara, about thirty miles west of the town of Banswara; lat. 23° 30′ N., lon 74° 3′ E In 1820 it was the capital of a small feudatory named Dowlet Singh.—(Malcolm, &c.)

HUSSEIN ABDAUL. — A beautiful valley in the north-west corner of the Lahore province, situated about twenty-four miles east from the Indus; lat. 33° 55′ N, lon. 72° 25′ E. valley was always a favourite restingplace of the Mogul emperors, during their annual migrations to Cashmere; but the gardens and buildings have long gone to ruin. The tomb of a devout Mahomedan named Hussein Abdaul, which communicates name, is partly composed of marble, and stands in a square enclosure. This person was a famous saint of Candahar, there known as Baba Wul-The surname Abdaul in the Afghan language signifies mad A D. 1809 the hills to the south of the valley of Hussein Andaul formed the boundary of the Cabul dominions in this quarter of Hindostan.—(Elphinstone, &c)

Husseinabad.—A village in the province of Bengal, district of Dacca Jelalpoor, situated on the Isamutty river, twenty miles W.S.W. from the city of Dacca Near to this place on the west bank of the river there is a small Portuguese church, and the vicinity is inhabited by a population of native Catholics.—(Fullarton, &c.)

Husseingunge —A town in the King of Oude's reserved territories, situated about twenty-one miles west from Lucknow.

Hussingabad (properly Hoshungabad)—A considerable town in the province of Candeish, situated on the south side of the Nerbudda, 135 miles N.W. from Nagpoor, lat. 22° 40′ N, lon. 77° 51′ E The bed of the Nerbudda here is much broken, and about 900 yards broad, but there are thirteen fords across within fourteen miles of the town. The best is at Goondra, three miles and a half east to which there is a good curriage

road. All the fords near Hussingabad become passable in the beginning of January; in October the depth of water (which is remarkably sweet, and abounds with fish) in the shallowest parts near the town is between five and six feet. The valley here through which it runs, is but scantily cultivated, and that only contiguous to the villages, which lie scattered along the banks at considerable distances from each other. During part of the month of February the jungle here appears of the brightest scarlet from the flowers of the butea frondosa, and at the same season the bassia latifulia perfumes the air with its powerful fragrance. flowers of the tree last-nientioned are collected by the natives, and when dry have the appearance of berries, and are as sweet as raisins A vinous spirit with a smoky flavour is extracted from them by distillation. In 1827 a vein of anthiacite, or blind coal, was discovered here while digging a well through grauwacke and slate.

Hussingabad has long been noted as an important position, and was visited by General Goddard, when marching from Bengal to Gujerat by the route of Bilsah and Bopaul, to the Nabob of which place it then belonged, but was subsequently wrested from him by the Raja of Nagpoor. It is now the capital of a large pergunnah belonging to the British government, and being the key of this quarter of the Deccan, has been made a permanent station for a military detachment. In 1820, although the houses covered an extensive surface, they were meanly built, and thinly populated .- (Public Journals, Malcolm, Heyne, &c)

months of the year is often so low as 45°, 40°, and even 85° of Fahren-To protect themselves against this degree of cold, the lower classes use a coarse woollen blanket, made in the country, the higher classes, shawls and printed silks. A few of the courtiers and chief noblemen clothe themselves in English broadcloth, as a fashion or a luxury, but the mode is not general. The Nizam's cavalry clothe themselves after their own taste, but the infantiv are regularly dressed in British red cloth, and are equipped with accourrements made either at Madras or Masulipatam.

Although there are many inters and streams in this province none of them are navigable, being in general mere channels to drain off the water that falls during the rainy season; after which, having little or no regular supplies from springs, they be-The territory is notwith--come dry standing naturally productive; but from the nature of the government it has never attained any great prospcrity, the cultivators being wretchedly poor, and much oppressed by their immediate superiors, the jaghiredars, who are subject to little restraint from their nominal sovereign. the south of Hyderabad city an immense tract of land is depopulated, desolate, and much covered with jungle, among which the traces of ruined towns, villages, and enclosures, indicate the prior existence of a numerous and civilized population. When properly cultivated the fields yield abundant crops of wheat of an excellent quality, which is transported by inland carriers to the sea-coast, from whence salt is brought in retuin. The districts acquired by the Nizam in 1803 are particularly productive, and under prudent management capable of yielding'a revenue of above one million per annum Owing to defects in the fiscal arrangements the government are almost totally deprived of the benefits of foreign commerce, the average import of European goods into the Nizam's extensive dominions prior to 1809 not exceeding £25,000 per annum.

In 1801 the aggregate amount of the existing customs levied on importations was about fifteen per cent, and as a principal part of the revenue of the state was then derived from this source, the utmost reluctance on the part of the Nizam was to be expected to any alteration tending to its reduction. The British government, on the other hand, wished to prevail on his highness to abolish the collection of all imposts whatever on the ingress and egress of commodities, as the most likely mode of ensuring the beneficial advantages which would result to both raities from an inrestricted com-As this, however, could not merce be attained, a moderate rate of two and a-half per cent was proposed as a subsidiary condition, under the apprehension of the difficulty that would be experienced in attempting to annihilate the whole. But the existence of even this moderate rate is liable to many abuses and exactions, detrimental to the private adventurer, and injurious to the public revenue, for granting that it were conceded, a great difficulty would be experienced in fixing the value of the various articles of merchandize with such precision as to preclude litigation between the traders and the custom-house officers. A general permanent duty on the aggregate invoice value, which would be authenticated by the signatures of the public officers of each government, appears more eligible than by having the value fixed by juries of merchants, an arrangement no less repugnant to the principles and usages of Asiatic states (although customaly as to landed property) than productive of litigation, fraud, and delay.

At present the principal trade carried on between the Nizam's dominions and those under the British government, is the supply of cotton sent from Berar to the Northern Circars, and also to the markets at Vellore, Ainee, and that vicinity The traders return loaded with salt and salted fish; some cloths manufactured in the northern Circars, and some Ainee

mushus In 1808 it was discovered that a considerable quantity of opinim was exported from the 'virson's ter ritories to the Lastern Isles so I there sold nt o much cheaper rate than the Company's Brench drug; but shihough thus tra'le interfered meterlally with the monopoly of that marcotie it did not appear that, under the condulon of subusting treattee the Narum could be called on to provibit has subjects from engaging in the traffic.

assistance or co-operation of the subsilary force except in the erent of extreme exigence. They were however, after experience, found sholly unequal to the task being ill paid intitious and intitle disposed to excrima Beddes this, being composed of distinct primes and squads belong lag to persons of rask resuling at the court of 11) derabed, and commanied by their own officers no combination of morement or unity of action could be expected from them.

In the time of Axim-ul Omrsh the ilewan s fees were only one-eighth of each rapec; but Meer Allam on his accession to office raised them to three-sixteenths When Mooner ul-Will was appointed dewan It was determined that he should receive a fixed anlary of ten lacks of rupees per annum, the excess of the mi mater's fees beyond that som to be accounted for to government a statement given in on this occasion it appeared that the minister a fees or commission for seven years prevlous, averaged about seventeen lacks per annum. The peshear's (a head financial officer) fees were estimated at 2 ff,000 tupees per annum It is difficult to ascertain the real produce of the ja hires held by the stram a officers, but the sum total upon tolerable grounds, has been computed to average eighty five lacks per an num. The offerings tremamitted from all parts of the country, and presented on the Niram a birth-day, are included in the public accounts; but those presented on ordinary octa arons directly to the Nizam amount to one lack of rupees per onnum and are olways retained by his high ness in his own custody gregate may be thes competed : Average receipts per so

Average of the estimated gross revenues of the Aram a govern 2,01,01,046

ment, per annum

The Nizam receives from the Peshcar 80,000 supces per month for the current expenses of his personal establishment; but a large proportion of this, and probably the whole of the presents, are deposited in his private treasury. Besides these sources of accumulation, there is another appropulation from the minister's fees of about eight lacks, and the value of jewels and other articles annually purchased by the Nizam averages They are paid by, about five lacks. the peshcar, and the amount is entered in his accounts under the head of commissions. In 1811 the deficit of the receipts, in comparison with the disbursements, continued to increase, and the whole country was in so deplorable a condition, that it was utterly unable to support any additional extortion.

While Telingana existed as an independent Hindoo sovereignty, it comprehended most of the tracts lying between the Krishna and Godavery rivers, the capital of which was At an early period it Warangol was invaded and partly conquered by the Mahomedans, and afterwards formed part of the Great Bhamenee empire of the Deccan. On the dissolution of that state, Telingana became again the seat of an independent government under the name of Golconda, the first sovereign being Cooly Cuttub Shah, who established the Cuttub Shahy dynasty of Golconda. He began to reign in 1512, and was assassinated in 1551.

Jumsheed Cuttub Shah; died A D 1558.

Ibrahim Cuttub Shah; died 1581.
Cooly Cuttub Shah; died 1586—
This prince founded the city of Hyderabad, and having no son, was succeeded by his brother Mahomed The successor to the last-named prince was Abdallah Cuttub Shah, who became tributary to the Mogul emperor Shah Jehan; and in this dependence his kingdom remained until 1690, when Golconda was taken by Aurengzebe, and Abou Hossein, the reigning prince, made prisoner, and confined for life in the fortress of

Dowletabad, where he died in the year 1704.

On the destruction of the Mogul empire, after the death of Aurengzebe, Nizam ul Mulk obtained possession of the Mahomedan conquests in the Deccan about the year 1717, he died in 1748, aged (it is said) 104 years, leaving six sons, Ghazi ud Deen, Nassir Jung, Salabut Jung, Bassalet Jung, and Moghul Ali.

Nassii Jung being on the spot at Boorhanpoor when his father died, succeeded, and was assassinated in 1750.

Muzuffer Jung, the grandson of Nizam ul Mulk, was placed on the throne, and assassinated in 1751

Salabut Jung, by the influence of the French, was then proclaimed, and reigned until 1761, when he was impusoned, and in 1763 put to death by his brother, Nizam Ali, who ascended the blood-stained throne. Nearly the whole of his reign was a scene of intricate negociation or impending hostility with his rapacious neighbours the Maharattas; and that he was not finally devoured, was entirely owing to the intimacy of the political connexion he latterly contracted with the British During a temporary segovernment paration of interests in 1795 war with the Maharattas actually took place, when the Nizam advanced to Beeder to meet Dowlet Row Sindia, who had drawn great part of his then strong army from Upper Hindostan. An action was fought, which was followed by the retreat of the Nizam to Kuidlah, where, allowing himself to be shut up and deprived of supplies, he was compelled to sign a convention, by the terms of which he admitted all the Maharatta claims, agreed to cede to them the fort and district of Dowletabad, to pay three crores of rupees, and to deliver Azim ul Omrah, his prime minister, as a hostage, into the custody of Nana Furnavese.

That he was defeated in the abovementioned battle by Sindia's disciplined legions will not be thought surprising, after perusing with attention the following afficial description. written in 1815 of oportion of his own troops The late Nizam had two hat talions of female sepoys of one thou sand each regularly trained to the manual and platoon excresses which mnunted guard in the Interior of the palace and occomponed the ladies of the palseo when they moved were with the Nizam during the war with the Valiorattas to 170a and were present at the hattle of Lurdlah, where ot least they did not beliave worse than the rest of the ermy One of these battolions was commanded by Msma Burrun, end the other by Moma Chumbehee, two of the prin cipal female attendants of the At zam s family The present \izam still keeps up o reduced establishment of these women, and Mooner ul Mook (the primo minister in 1815) has also a party of them They are dressed as British sepays formerly used to be carry musquets, and do the French exercise with tolerable correctness They are called the Juffer pultures, or victorious battalions, and the females composing them are called Gardnoces o corruption of our guard

Their pay is five rupees per month in 1798 the British interests at the court of Hydernhad which had been greatly imposed, or rather nearly subverted, by the increasing influence of o strong French party were restored by the vigorous measures of the Margus Wellesley ammediately after his assumption of the supreme The force under M government Raymond consisted of 13,000 men, ond constituted in fact the only of ficient portion of the Nizam s military strength and from the known prio circles of that odycoturer, and his connextoo with France there was little doubt that if the chaoce of war ever seemed to waver he would co-operate with whitever foo opposed the British The Nizam's minister Azim of Om ra, had for some time viewed with coosiderable olarm o growing influ ence which he was oo longer obloto control and in consequence was ready to promoto the objects of the British government. In September

1798 the Nizam was prevailed on to occede to a treaty, occording to which a detochment of six thousand menwith guns and ortillery men in proportion were to be entertaiced by his lughness out the subsidy raised from six to twenty-four locks of ru nees per onnum It was also agreed that the officers and servants of the French party should be secured ond delivered up not as prisoners of war, but to be restored to their own coun try, without waiting for exchange or cartel While these negociations were going nn, e force was ossembled in the Northern Circurs under Col Roberts who on receiving intimation from the resident, Capt. Achilles hirkpatrick morehed to Hiderabad, where the French troops were mostly stationed These he advoitly sur rounded and resistance opposing hopeless the officers were secured. the corps dissolved and the men dis banded without bloodshed, and their place in the \izam s service occupled by Bratish troops

It being found necessary in 1800 to engment the subsidiary force sto tioocd in the Hydernbad dominions to 8 000 regular infantry and 1 000 regular covalry a new treaty was en tered into on the 12th October of that year when the Nizam was in duced with the view of iosuring punctuality of payment to cede to the British government all the terri tories he had negulred by the treaty of Seringanotam in 1792 and also under that of Mysore in 1799 Cer taio of the tracts ceded by this trenty being iocooveniently situated to the north of the Toombudra, it was determioed, for the purpose of rendering the houndary well defined that his highness should retain Copaul and Gujonderghur and other districts north of the Toombudre, and in licu thereof assign Adoor ood whatever territory he possessed to the south of that river, or to the south of the Arishon, below its junction with the Toombudra the estimated value of the whole being about seventy two lacks of rupees per annum. These arrangements being occomplished, It

was determined that all British claims on the Nizam, of every description, should cease; from which date also all demands on account of the subsidiary force were to terminate, as the whole was in future to be subsisted and paid by the British government. By this treaty it was likewise decided that all external political ielations should be exclusively managed by the British government, which undertook to protect his highness from invasion from without and internal insurrection, and to procure a total exemption from all claims for choute on the part of the Maharattas. His liberation from this harassing demand was to the Nizam an important favour, as the choute levied on the districts within his country by the Peshwa and his jagheerdars amounted to forty-

five lacks per annum In 1803 Nizam Ali finished his long life and reign, and was succeeded on the Hyderabad throne by his eldest legitimate son, Secunder Jah, the present reigning Nizam. He was entirely indebted to the British government for the tranquillity of his accession, and as a token of his gratitude offered to relinquish the tribute of seven lacks, paid on account of the Guntoor circar; but the acceptance of this douceur was declined by the Marquis Wellesley, then governorgeneral. Soon after the Asophia (Nizam's) dominions received a very considerable augmentation, for in 1804 a partition treaty having been concluded with Dowlet Row Sindia and the Nagpoor Raja, the latter eeded to the Nizam all the country of which he collected the revenue in conjunction with the Nizam, and fixed the Nagpoor frontier towards the west at the Wurda river, from where it issues out of the Injardy hills, to its junction with the Godavery. The hills on which Nernallah and Gawelghur stand, with a district contiguous, to the amount of four lacks of rupecs revenue, to remain with the Nagpoor Raja; but every other tract south of the Injardy hills, and west of the Wurda, to be transferred to the Nizain. From Sindia he received all

the territories that elnef possessed prior to 1803, situated to the south of the Ajuntee hills, including the fort and fertile district of Jalnapoor, the town of Gandapoor, and all the other districts between that range of hills and the Godavery These were, in fact, first ceded by Sindia to the British government: but immediately afterwards transferred in perpetuity to the Nizam. In consequence of these airangements the Hydcrabad sovereignty received a great increase of territory, and obtained for the first time a compact and well-defined boundary

Secunder Jah for a short time expressed the utmost gratitude to the Butish government, both for the tranquillity of his accession and the augmentation of his kingdom; but it soon appeared that his conduct was regulated by no fixed principles, being directed by a few ignorant and vicious creatures who surrounded his person, and whom he permitted to control his actions The most offieious of these were Assud Yaı Khan and Jaffer Yar Khan, his highness's foster-brothers, and two individuals, named Burkendanze Khan and Roz-The two persons first named were low illiterate creatures: the other two had been common sepoys, and had been noticed by the Nizam for their skill in shooting, ever since they had undertaken to evercise it on the late prime minister, Azıın ul Omra. Although these persons were never permitted to sit down when the British resident was present, they were on other occasions often indulged with seats, and honoured with the familiar conversation of his highness, while noblemen of rank and character, compelled to attend the court, were kept at a distance with the appearance of studied indignity. Like most of the factious miscreants with which the city of Hydcrabad swarmed, his highness's associates evinced a decided hostility to the British government, and of course to the prime minister, Meer Allum, who disdained to take the usual incthods of obtaining their

good offices while their cumity was fostered by lus rival Raja Nichiput Rum in prosecution new hose schemes they were accustomed to exercise n species of vulgar wit on the I nglish, to alarm the Nizam s mind with ex oggerated representations of their ombition, and to extol the prowess of Holcar and Sindia. The governor general of India was represented as o ficutions fonctionary octing without the outbority of the Fuglish government, and the orrangement of the Margus Wellesley in the House of Commons was odduced os a proof of the ossertion As part of their system they were io the habit of prompting the Aizam to resist every proposition whatever from the British onthornes on l of abusing the minister and his adherents as British partizans always concluding with the most fulsome and extravagant core pluments on his limitness a anguesty penetration and courses

This conjuncture of affairs prosented externally an appearance of solidity to the allisoce while in reality the foundation was utterly deested for in the event of wor not only would the resources and forces elaimable by treaty hove been with held but the British subsidiary force would have been virtually placed In the country of on enemy and conse-quently exposed to all the hazards of such o situation, without the odyan tage of the occupation of posts, the enablishment of depots or security of communication with the British territory Ao alternativo was there-fore left but either to obandon the olliance altogether, or to make on effort to replace it on its proper basis by a direct and decided interference. The adoption of this measure how ever appeared so fundamental a deviation from the system professed by the Misrous Cornwallis during his second mission to India and also by his soccessor Sir George Barlow, that the latter thought it necessary to state some orgament su vindicution of the measure. On this subject he observed, that the adoption of the system of non-interference pre-

supposed a just conception on the part of the Nimm of the true prin ciples and solid odvantages of the alliance, and also o sincere disposition to minimum it. It also presupposed a degree of firmness, disecroment and dignity on ins part, which would lead him to reject the enuncils of profligate and interested odvisers who should endeavour to permade him that the obligations of the olhanco were those of degradstion and os such urge him to re-Unsupported by these nounce it just and reasonable presumptions Sir George considered the system of non interference or altogether deprived of its foundation and that tho change on the part of the British government would be adopted, not from choice, but from necessity Ho siewed the measure not as o rentineration of general political principles but as extorted by the general impractica bility of applying those principles to vernment without the certain loss of the benefits expected from on odherence to them; the mere adoption of a measure of secutity against a great

and sospending danger The propriety of interfering with the Aram's internal government being in this manner decided he was in 1807 addressed in such terms by the British government as would con vince him but without specifically mentioning them that it was ac qualited with the secret machingtions he had been carrying on. He was olso informed that the British government would not tsettly suffer the benefit of the alliance to be hazarded or ultimately subverted by the sosidious intrigues of designing persons, who in furtherance of their own objects would induce him to believe that his roterest and security were distroct from those of his allies ond who according to the suggestions of the moment, made every proposal from that quarter oppear on object of

contempt or olarm

While these discussions were going on at became necessary for Meer Allum, the prime miester, to take

up lns abode at the British residency, assassination being then so common at Hyderabud as to render hun apprehensive of being carried off by unfair means; and the Buckshy Begum, the Nizam's mother, and head of the Asophia family, was so much affected by her son's disgraceful conduct, that she implored the resident to interfere and rescue him from the hands of his profligate associates. Affairs having reached this crisis, the Nizam himself became alarmed, and began to manifest contrition for his extravagant and unprincely behaviour towards his family, made his apologies to the Begums, and requested their advice regarding the course of policy he ought to pursue, and it appears they counselled him to adhere strictly to his alliance with the British resident then being apprized of the Nizam's repentance, proceeded to bring forward the following propositions, viz. 1. The dismissal of Raja Mohiput

Ram and Ismael Yar Jung

2 That some provision should be

made for Noor ul Omrah.

3 That the civil and military authorities of Berar should be separated. and entrusted to persons in whom the British government could confide.

4 That the resident should be admitted to an audience when he re-

quired it.

These propositions, after undergoing some slight modification, were ratified by the Nizam, who expressed his unalterable attachment to the British nation, and his resolution to conform to all the stipulations of the It still, however, continued necessary vigilantly to watch and rigorously to oppose the recurrence of these evils, now, in appearance, On the other hand, such corrected constant interference as would prove vexatious to the Nizam, or excite in his mind a sense of dependence, was cautiously avoided, the legitimate objects of the alliance being perfectly compatible with the free exercise of his highness's rights of sovereignty within his own dominions

In process of time, as Secunder

Jah's mind became less gloomy, he proposed a hunting excursion, in the course of which, having passed near to the British cantonments, he was prevailed on to inspect the lines. He was received with a royal salute, after which, having looked at the ordnance, he expressed his admiration of the appearance and discipline of the troops, and paid many compliments to Colonel Montresor, their commander This casual visit only derives importance, because his highness had been led by his private advisers to believe that the subsidiary hrigade had been secretly augmented with the view of getting possession of Hyderabad and Golconda, seizing on his person, and placing another prince on the throne These apprehensions were all dissipated, and on his return home, when the females of his family made him the offerings usual after a safe return from any perilous enterprize, he refused to receive them, declaring with indignation that he had been deceived with respect to the designs of the British government, to which he would in future entiust the security of his person and protection of his thione

The reconciliation was, however, of very short duration; for on the death of the prime minister, Meer Allum, in 1808, new difficulties arose, with endless intrigue and discussion, caused by the spirit of perveiseness and caprice which distinguishes the The British go-Nizam's character vernment was at first disposed to support the pretensions of Shums ul Omra, a nobleman of excellent character; but the Nizam objected to lum that, in the first place, he was not a Shiah in religion, nor a Send by birth; secondly, that he was allied to Feridoon Jah, his highness's brother; and thirdly, that he was at the head of the pagah (a sort of body guard) party, an office that had always been maintained by the sovereigns of the Deccan as a counterpoise to the power of the minister, and that the possession of that office was consequently ineligible to the ministerial office, as he would thereby engross the whole power of the state civil and military,

To the first election Capt Sy denliam then resident at 113 deralisid replied that the selection of a mim ter should be regulated i y political considerations alone an i could have no relation to the telialous tenets of the different candi lates. The secon l of jection he endeatoured to repel ly referring to the altered circumstances of the state, and the a' ence of all danger from his brother's greatry, while his highness a throne was sintained to the arms and resources of To the third the British emite objection Capt Sydenliam observed, that there was no longer any necessity to secure the obedience of the officers of government by employing them as checks on each other as it was now in the power of the Means to keep them all in due subordina tion; ben les which the British al hance he remarked, had wholly altered the relative condulors of the Paralt chieftains Formerly the chief of the Lersha was entrusted with the care of his highness s person, was foremost in battie, and led his troops on all services of danger or despers tion; now the case was changed for the Briti h detarhment in fact firmed the Pagali party of the Ni sam a army where that confidence was placed which had furmerly been reposed in the Pagah corps

These reasons, however, not sufficing to satisfy the Nizam, Bluoneer ul Mull, the son of Azum ul Omira wos, after much discussion, appoloted prime minister; and his character, or illustratise of a native court and its political instruments deserves notice Although the descendant of a nrime moister he is not destitute of alalitless but personally he is extremely pushianknous, a perpetual har and everlaiting interguer, with pointe and plansible manoers lle is o true belever in the doctrines of astrology and maintains an establishment of sootheaters to his house, by whose predictions not only nil his public business is conducted, but also the ordinary pursuits of life down to

the mispicious moment for criting and lirinking. His questions to these eages are generally propo ed in wriing and so firm is his belief in their presence that he always cautious them in predicting the event not to consult his will kee, but to tell him the real truth whatever it may be

Ills ma ter the Stram, Is still more Irrational and is known to be oc carlonally afflicted with temporary This infirmity, in 1811, Invanity reached to such an excess that he no longer tru ted the preparation of his food to any person abstaining from every dish he had not cooked with his own hands Sitting in sulien silence in the female apartments, where none but his menial acreants were admitted he crased to appear in public and wholly neglected the affairs of government I ren in bet ter times when his intellects are more composed he continues to coince a strong and restless feeling of district towards the British notion, which, however abound the ontion may appear he considers hostile to his interes a and desirous of Accran diring their empire at his expense t an i so powerful le the influence of this delucion over his mind, that he twi to and exaggerates the most travial circumstance to suit the has of his temper lin greatest misfortnoe, and the cau e of most of the errors of his life is the awkward uneasuness he feels in the society of the only persons who are suitable companions for him or whose presence is likely in the abglitest degree to recall him to a sense of his own dignity and of the duty he owes his subjects

of the duty he owes his subjects in 1815 the Nizam is sons resulting at 11) derished collected around them all the dividute ra abonds and Patan bravoes with which the city swormed and committed the most flagitlous excesses. The most profligate of these princes were the two youngest, Shums ud Dowlah on Whariz and Powlah who were supported by the Aizam a wife ond mother. In the Aizam a wife ond mother — In the Aizam of the truth of the proceeded to the extremity of seizing an attendant on the British embasy for the

~

U4 1

purpose of extorting money, and were in consequence apprehended and removed to Golconda, but not without considerable bloodshed, and the death of a British officer belonging to the escort. When at last despatched to the fortiess, the two ladies resolved to accompany them, in hopes of influencing the Nizam to relent; but on this occasion he evinced unexpected firmness, declaring that he believed the Begums wished to get rid of himself instead of the English. The principal subordinate instigators of the tumult were subsequently seized and executed.

In A.D. 1818, after an interval of four years, during which he had never passed the gate of his palace, the Nizam, accompanied by some ladies of his family, and attended by Mooneer ud Mulk, Raja Chundoo Laul, and other ministers, went to a garden a little way to the southward of the city, and in the opposite direction to to escort him on this occasion were estimated at about 8,000, but probably did not exceed two-thirds of While on this excurthat number. sion he hunted sometimes, but in general he secluded himself with his usual privacy, and in three weeks returned to his palace in the city The effort of making the excursion, and the time selected, were so much at variance with his accustomed habits, that they excited no small surprise, and many extraordinary motives were assigned to account for such a display of unseasonable activity. But although the Nizam's aversion to the control of the British was sufficiently notorious, and his wishes for the success of the Peshwa Bajerow equally so, yet if on this occasion he had been stimulated by his servants to the adoption of active measures, they certainly had greatly overrated both his boldness and perseverance.

Notwithstanding this contumacy, on the conclusion of the Pindary war in that year, and on the expulsion of the Peshwa, the British government, which had succeeded to all his rights, not only gave up to the Nizam the

arrears of choute due by him, but abrogated all claims whatever that the Poona state had upon that of Hyderabad. Some exchange of territory, alike convenient to both parties, were made, and the whole of these arrangements were reduced into the form of a treaty on the 12th of December 1822. Soon afterwards the supreme government, whose Bengal treasury was overflowing, redeemed the peshcush of 6,30,630 rupees paid annually to the Nizam on account of the Guntoor Circar, for a capital sum of one million two hundred pounds sterling. At present (1827) the powers of the state are principally centred in Raja Chundoo Laul (a serk of Nanok Shah's persuasion), while the apathy of his master seems to increase with his years. But although the efficiency given to the military establishment, by the introduction of the British, has no doubt contributed to the maintenance of the residency The troops assembled, public tranquility, yet it may still be asserted that the Hyderabad territories are as ill governed as any part of India — (Public MS Documents, Sydenham, H Russell, A. Kirkpatrick, Ferishta, Orme, Malcolm, Blacker, Heyne, &c.)

> HYDERABAD.—The capital of the preceding province and of the Nizam's dominions, situated in lat. 17° 15' N., lon 78° 35' E. Hyderabad or Baugnuggur stands on the south side of the Musah river, which runs very rapidly in the rains, but in the dry season has scarcely two feet of water. It is surrounded by a stone wall, which is no defence against artillery, but which formerly served as a protection against the incursions of predatory cavalry. Within the wall the city is about four miles in length, by three in bleadth. The streets are narrow, crooked, and hadly paved. The houses are mostly of one story, built of wood and other combustible Over the river Musah materials. there is a large arched budge, sufficiently broad to allow two carriages to pass The most remarkable buildings are the palace and mosques, of

which last there are a consideral le number, this city having long been the principal Mahamedan station in the Decean About ux miles to the west is the celebrated forteers of Colconda occupying the summit of a conical hill and by the natives deemed impregnable becunderabad. where the subs harr brigade is can toned, stands about three miles north of the city and is now a large and populous military tillage. The sur rounding country has o barren rugged repect, and the ranges of hills have a remarkably jumbled irregular ap-pearance. Vegetables and grapes grow to this vicinity to considerable perfection, which is more owing to the temperature of the charge than

the goodness of the soil Hyderalad being one of the few remaining Viocul governments more of the old forms and ceremonies are retained at the Visam's court than at any other of lindostan Some of the fucher and wealthier Mahomedans use a few articles of Euronean manufacture in their dress, and in the furniture of their houses, but this has principally occurred omong the ministers of the Autom These artl cles consist of glass ware, lustres, china, chiotz covering for solat, and some articles of plate after the European fashloo The nobles at Hideralad have either been bred un os soldiers or courtiers, and expend their Incomes in keeping up as large a retinue of servants and dependants as their wealth will allow, or they consuma their property in the profil ency and corruption of the court where they reside Within the city the Nizam possesses large magazines, in which are deposited the presents received ot various times from the different native and European pow The rooms are filled from the floor to near the easing with bales of woollens cases of glass, glass-ware china-ware clocks, watches, other European maoufactures These orticles have been received as pre sents by the reigning Nizam his fa ther, and grandfather some so far back as the time of Dupleix and

Burry They have ever since coo tinued locked up in the magazines. where they are likely to remain

This city, formerly named Baug nugger was founded about the year 1555, by Mahomed Cooly Cuttub It was taken and plundered Shah by the Mogul armies of Aurenezehe A D 1697, the principal inhabitants having previously retired to the neighbouring fortress of Golconda The late Nizam Ah transferred the royal rendence from Aurungabad, which had litherto been the cantal, to this place, the former, owing to the fluctuation of his limits, being latterly placed in o corner of his dominious, and too near the Alsharatta frontler It has never since expe tienced any molestation from without and having been the residence of the court has progressively increased in wealth and population Of the latter no very accurate estimate has ever been made but from a combina tion of circumstances there is reason to suppose it approaches or exceeds 200 Offinersons, including the suburbs

Travelling distance from Colcutta by the northern Circurs 902 miles by Nagpoor 1043; from Madras 152; from Bombay 490, from Delhi 923; from Nagpoor 32i; from Poona 387; and from Seringspatam 406 miles - (Sydenham Il Russell. Heynr Upton, Rennell, &c )

livorassao.—The espital of the modern principality of Sinde lat 25° 22' N lon 686 41' E The for tress stands on a rocky hill the base of which distant about 1,000 paces is washed by o branch of the Indus named the Fulalce The nearest point of the majo channel of the In dus bears from the fort W by S three miles It is of an irregular pentagonal figure, built to suit the shape of the mass of rock on which it stands, defended by round towers and o high brick wall perforated with loop-holes In many places the sides of the hill are so steep that the ascent to the fortress would be difficult aven were it breached at the foun dation The weakest part of the fort is towards the south-east, opposite to a break in the rock from the Fulalee. The northern side of the fort ling a dry ditch cut in the rock, but not above twelve feet broad. walls have loop-holes for matchlocks, lint the artillery is placed so high as to be useless against an enemy very near the fort. Its natural situation is strong, and the whole is capable of resisting every native attack, but would present a feeble opposition to European assailants. On all these walls there were, in 1809, about seventy pieces of artillery mounted, lut except eight or ten they were all in a very had condition.

are several handsome mosques within the fort, but no buildings worthy of notice in its vieinity, except Gholaum Shah's (the founder of the principality) tomb, on a hill to the south of the fort The shops in the bazar are kept well supplied, and are mostly tenanted by Hindoo Banyans. Although no encouragement is given to industry by the Ameers, the artizans are numerous and skilful, especially the armourers, who are noted for the excellence of their workmanship, and the artificers who embroider in leather.

The soil in this vicinity is of a light sandy nature and colour, yet very fruitful when properly cultivated Two miles and a half and watered to the south of Hyderabad is a tableland, extending about two miles, and twelve index to the southward is a range of rocky hills, part of which approaches the Fululce, and is called the Gunga hills. Three miles west by south is a village on the eastern bank of the Indus, from which boats are constantly crossing with passengers to Cotrie, on the opposite side, which is on the route from Tatta to Hyderabad. This city is the head-quarters of the Ameers or present rulers of Sinde, yet the resenue collected only amounts to the trifling sum of 60,000 rupces per annum, and the population to about 15,000 persons. There is not, however, any standing army kept at Hyderabad, each Ameer retaining a few troops, which serve in time of peace to garrison the fort .-(Maxfield, Smith, Kinneir, Pollinger, Sv.)

Hypergnun.—A town in the province of Oude, thirty-two milles S.E. from Lucknow; lat. 26° 37′ N, lon. 81° 17′ E.
